Cab (קַב, *kab, a hollow* vessel; Sept. κάβος), a measure for things dry, mentioned in 2 Kings vi, 25. The rabbins make it the sixth part of a *seah* (q. v.) or *satum*, and the eighteenth part of an ephah. This would be nearly *two quarts* English measure. See MEASURE.

Cábala, the title of the celebrated system of religious philosophy, or more properly theosophy, which has played so important a part in the theological and exegetical literature of both Jews and Christians ever since the Middle Ages. See PHILOSOPHY. The following account of it is partly compiled from Herzog's *Real-Encyklopädie*.

I. *The Name.*—KABBALA (from the Heb. קַבָּלָה, *Kabbalah'*, the *received*), properly denotes *reception*, then *a doctrine received by oral tradition.* The term is thus in itself nearly equivalent to "transmission," like the Latin *traditio = Massora*, for which last, indeed, the Talmud makes it interchangeable in the statement, "Moses received (קִבֵּל) the Law on Mount Sinai, and transmitted (מָסַר) it to Joshua." The difference between it, however, and the word מְסוֹרָה (from מָסַר, *to deliver*) is, that the former expresses *the act of receiving*, while the latter denotes *the act of giving over, surrendering, transmitting.* The Cabala is also called by some חָכְמָה נִסְתָּרָה, *secret wisdom*, because it pretends to be a very ancient and secret tradition, and ח״ן, *grace*, from the initials of these two words.

The term *Kabbalah* is employed in the Jewish writings to denote several traditional doctrines; as, for example, that which constituted the creed of the patriarchal age before the giving of the law; that unwritten ritual interpretation which the Jews believe was revealed by God to Moses on the mount, and which was at length committed to writing and formed the Mishna. Besides being applied to these and other similar traditions, it has also been used in, comparatively speaking, modern times, to denote a singular mystic mode of interpreting the Old Testament.

We are reminded by this indefinite title that among the Jews, as throughout the greater part of the East, human knowledge, whether historical or scientific, rested principally on a sort of *succession*, and the best claim for its reception was an unbroken chain of traditionary evidence. Hence the care with which Judaism established the regular consecution of the sacred custodians of truth, from Moses through Joshua and the so-called greater prophets, thence through Ezra and "the Great Synagogue" to the teachers of later times, subdividing at length into the various schools or periods of particular rabbis and their hereditary adherents. While, therefore, the truth was gradually exhibited in the writings of the Law, the Prophets, and the Talmud, the Cabala indicates the verbal exposition of these, orally transmitted along with them, and not generally known to the people, but containing a deeper or more thoroughly initiated style of instruction. It thus came ultimately to designate a particular theologico-philosophical system, that arose and established itself in the bosom of Judaism, yet in a measure independent of, or rather supplementary to it.

II. *Original Documents.*—Instruction in Judaism being principally verbal and founded on memory, its phases of development could necessarily leave but little mark on history; and as such a philosophy would thus naturally, in process of time, become a mystery, at least in the view of posterity, the origin and progress of the Cabala are yet largely matters of conjecture, and it is even a subject of scientific controversy whether in its speculative form it can be distinctly traced earlier than the Middle Ages, although its leading principles appear to have been derived from ancient documents, the nature of which is still very imperfectly understood, such as the so-called revelations of Adam, Abraham, Moses, Ezra, etc. See APOCRYPHA. The Talmud, indeed (both in the Mishna and Gemara of the tract *Chagiga*, passim), makes mention of a doctrine imparted only to a few carefully selected persons, and even applies to it certain fanciful names (drawn from the phraseology of Gen. i, 1, and Ezek. i, 1), significant respectively of a speculative *cosmology* and a speculative *theology;* but it is uncertain whether these designate definite treatises, or, if so, whether these have in any identifiable form descended to modern times. The only works which can with any propriety claim to embody these earliest views are the following two, that became the acknowledged texts of the Cabala in the latter part of the Middle Ages; a third cabalistic treatise (called the סֵפֶר בָּהִיר, *Sepher Bachir*, or *Choice Book*), which is found in an edition of Amst. 1651, and attributed to a rabbi, Nechoniah Ben-Hakana, of the first century, has long ago been generally acknowledged to be fictitious, although a cabalistic work of the same title is mentioned as early as the fourteenth century.

The first of these is the *Book of Creation* (סֵפֶר יְצִירָה, *Sepher Yetsirah*, often reprinted, as ed. Steph. Rittangel, Amst. 1642, with a Latin translation and commentary; and the ed. of J. F. van Meyer, with a German translation and commentary, Leipz. 1830, 4to), ascribed to the renowned rabbi Akiba (A.D. 120). It is a rather short treatise, in oracular sentences, the language of which, more obscure in import than in form, does not resemble the Hebrew of the Mishna. As a book of the same title appears to be already mentioned in the Gemara, where wonderful power is ascribed to it, and as R. Saadias is said to have commented upon it as early as the tenth century, it is certain that we can ascend to a considerable antiquity in tracing its authority. See JEZIRAH.

The other and more important cabalistic text is the celebrated *Book of Light* (סֵפֶר הַזֹּהַר, *Sepher haz-Zohar*, from Dan. xii, 3), first printed at Cremona and Mantua in 1560, and since often reprinted, as at Sulzbach in 1684, fol., with various additions. Tradition ascribes this work to a contemporary of R. Akiba, namely, R. Simeon Ben Jochai, a teacher much praised in the Talmud for his great wisdom and legal knowledge, although nothing is there said directly of his writings. Incredulous criticism considers it as a production of the thirteenth century, the time of its first appearance in the history of literature, and ascribes it to a Spanish Jew, Moses of Leon. It appears, however, to be older than this, having probably originally appeared piecemeal in the East at intervals, the whole being completed in its present form about the eighth century. It includes certain special tracts or treatises, in which the author seems especially to develop his own sentiments, and which form, so to speak, the kernel of the science sought to be imparted. Three of these are designated by particular names (*The Book of Confidence*, and the *Greater* and *Less Collections*); the popular distinction made by the Jews, however, between a great and a small Zohar sometimes refers to the varying fulness of the editions merely. See ZOHAR.

III. *Fundamental Doctrines.*—These are somewhat differently expounded in the above-named books (to the separate articles on which the reader is therefore referred for full particulars), and most at large in the latter. The following, however, is a summary of the cabalistic views as expressed in the general writings of later authors of that school:

1. *Nature of the Deity.*—God is above everything, even above being and thinking. It cannot, therefore, be said of him that he has either a will, intention, desire, thought, language, or action, since these properties, which adorn man, have limits, whereas God is in every way boundless, because he is perfect. Owing to this boundlessness of his nature, which necessarily implies absolute unity and immutability, and that there is nothing without him, i. e. that the τὸ πᾶν is in him, he is called EN-SOPH = *without end, boundless*, and can neither be comprehended by the intellect nor described with words, for there is nothing which can grasp and depict him to us. In this incomprehensibility or boundlessness, God, or the *En-Soph* (אֵין סוֹף), is in a certain sense not existent (אַיִן); since, as far as our mind is concerned, that which is incomprehensible does not exist. Hence, without making himself comprehensible, his existence could never have been known. He had, therefore, to become active and creative in order that his existence might become perceptible.

2. *Development of the Deity.*—But since, on the one hand, the will to create, which implies limit, and the circumscribed and imperfect nature of this world, preclude the idea of taking it as the direct creation of him who can have no will, nor produce anything but what is like himself, boundless and perfect; and since, on the other hand, the beautiful design and order displayed in the world, which plainly indicate an intelligent and active will, forbid us to regard it as the offspring of chance, the *En-Soph* must be viewed as the Creator of the world in *an indirect manner*, through the medium of ten "*Sephiroth*" or *intelligences*, which emanated from the *En-Soph*. The etymology and exact meaning of the word are obscure. It is the plur. סְפִירוֹת, *sephiroth'*, of סְפִירָה, which R. Asariel, the first Cabalist, derives from סָפַר, *saphar'*, to *number;* while later Cabalists derive it from סַפִּיר, *sappir'*, the *sapphire*, from the word מְסַפְּרִים, "declare," in Psa. xix, 1, or even from the Greek σφαῖραι, *spheres*.

From his infinite fulness of light the *En-Soph* sent forth at first one spiritual substance or intelligence; this intelligence, which existed in the *En-Soph* from all eternity, and which became a reality by a mere act, contained the nine other intelligences or *Sephiroth*. Great stress is laid upon the fact that the first *Sephirah* was not created, but was simply an emanation (אֲצִילָה); and the difference between creation and emanation is thus defined, that in the former a diminution of strength takes place, while in the latter this is not the case. From the first *Sephirah* emanated the second, from the second the third, from the third the fourth, and so on, one proceeding from the other, till the number ten. These ten *Sephiroth* form among themselves, and with the *En-Soph*, a strict unity, and simply represent different aspects of one and the same Being, just as the flame and sparks which proceed from the fire, and which appear different things to the eye, form only different manifestations of the same fire. Differing thus from each other simply as different colors of the same light, all the ten emanations alike partake of the *En-Soph*. They are boundless, and yet constitute the first finite things; so that they are both infinite and finite. They are infinite and perfect, like the *En-Soph*, when he imparts his fulness to them, and finite and imperfect when that fulness is withdrawn from them. The finite side of the emanation of the *Sephiroth* is absolutely necessary, for thereby the incomprehensible *En-Soph* makes his existence known to the human intellect, which can only grasp that which has measure, limit, and relation. From their finite side the *Sephiroth* may even be called bodily, and this renders it possible for the *En-Soph*, who is immanent in them, to assume a bodily form.

3. *Forms of this Development.*—The ten *Sephiroth*, every one of which has its own name, are divided into three groups of three *Sephiroth* each, respectively operating upon the three worlds, viz, the world of intellect (עוֹלָם הַשֵּׂכֶל), the world of souls (עוֹלָם הַנֶּפֶשׁ), and the world of matter (עוֹלָם הַטֶּבַע). I. The first group operates upon the intellectual world, and consists of *Sephiroth* 1, denominated כֶּתֶר, or רוּם מַצְלָה, the *crown*, or the *inscrutable height;* 2, called חָכְמָה, the creative *wisdom;* and 3, called בִּינָה, the conceiving *intellect*. The result of the combination of the latter two (as "father" and "mother") is likewise represented as דַּעַת, or *knowledge*, i. e. concrete thought, the universe of mind, the effect of λόγος. II. The second group exercises its power upon the moral world, and consists of *Sephiroth* 4, called חֶסֶד, infinite *grace* (also גְּדוּלָּה, *greatness*); 5, called דִּין, or גְּבוּרָה, divine *justice*, or judicial *power;* and 6, which is called תִּפְאֶרֶת, *beauty*, and is the connecting link between the opposite *Sephiroth* 4 and 5. III. The third group exercises its power upon the material world, and consists of *Sephiroth* 7, called נֶצַח, *firmness;* 8, called הוֹד, *splendour;* and 9, which is called יְסוֹד, the primary *foundation*, and is the connecting link between the two opposite *Sephiroth*, 7 and 8. *Sephirah* 10 is called מַלְכוּת, *kingdom*, and denotes Providence or the revealed Deity (שְׁכִינָה, Shekinah) which dwells in the midst of the Jewish people, goes with them and protects them in all their wanderings and captivities. The first triad is placed above, and the second and third triads, with the unit, are put below, in such a manner that the four *Sephiroth* called *crown*, *beauty*, *foundation*, and *kingdom*, form a central perpendicular line denominated *the middle pillar* (עַמּוּד אֶמְצָעִי). This division yields three different forms in which the ten *Sephiroth* are represented by the Cabalists, and which we subjoin in order to make the description more intelligible. The first represents an inverted tree, called עֵץ חַיִּים, *the tree of life*, while the second and third are human figures, called אָדָם קַדְמוֹן, *the primeval man.* Yet, notwithstanding the different ap-

Cabalistic Diagrams of the "Sephiroth."

pearance of these three forms, the *Sephiroth* are so arranged that the three triads and the middle pillar are to be distinguished in each one of them.

4. *Processes of the Divine Development.*—These *Sephiroth*, or God through them, created the lower and visible world, of which everything has its prototype in the upper world. "The whole world is like a gigantic tree full of branches and leaves, the root of which is the spiritual world of the *Sephiroth*; or it is like a firmly united chain, the last link of which is attached to the upper world; or like an immense sea, which is being constantly filled by a spring everlastingly gushing forth its streams." The *Sephiroth*, through the divine power immanent in them, uphold the world which they have created, and transmit to it the divine mercies by means of twelve channels (צִנּוֹרוֹת). This transmission of the divine mercies can be accelerated by prayer, sacrifices, and religious observances; and the Jewish people, by virtue of the revelation, and the 613 commandments given to them (see SCHOOLS), have especially been ordained to obtain these blessings (שֶׁפַע) for the whole world. Hence the great mysteries of the Jewish ritual (סוֹד הַתְּפִלָּה); hence the profound secrets contained in every word and syllable of the formulary of prayers; and hence the declaration that "the pious constitute the foundation of the world" (צַדִּיק יְסוֹד עוֹלָם). Not only does the *En-Soph* reveal himself through the *Sephiroth*, but he also becomes incarnate in them, which accounts for the anthropomorphisms of Scripture and the Hagada. Thus, when it is said that "God spake, descended upon earth, ascended into heaven, smelled the sweet smell of sacrifices, repented in his heart, was angry," etc., or when the Hagadic works describe the body and the mansions of God, etc., all this does not refer to the *En-Soph*, but to these intermediate beings. These *Sephiroth* again became incarnate in the patriarchs, e. g. *Sephira* 4, *love* was incarnate in Abraham; 5, *power* in Isaac; 6, *beauty* in Jacob; 7, *firmness* in Moses; 8, *splendor* in Aaron; 9. *foundation* in Joseph; 10, *kingdom* in David; and they constitute the chariot throne (מֶרְכָּבָה).

5. The *psychology* of the Cabala is one of its most important features. All human souls are pre-existent in the world of the *Sephiroth*, and are, without an exception, destined to inhabit human bodies, and pursue their course upon earth for a certain period of probation. If, notwithstanding its union with the body, the soul resists all earthly trammels, and remains pure, it ascends after death into the spiritual kingdom, and has a share in the world of *Sephiroth*. But if, on the contrary, it becomes contaminated by that which is earthly, the soul must inhabit the body again and again (גִּלְגּוּל, עִבּוּר) till it is able to ascend in a purified state, through repeated trial (restricted by Nachmanides and the later cabalists to *three* transmigrations). The apparently undeserved sufferings which the pious have sometimes to endure here below are simply designed to purify their souls. Hence God's justice is not to be impugned when the righteous are afflicted and the wicked prosper. This doctrine of the transmigration of souls is supported by an appeal to the injunction in the Bible, that a man must marry the widow of his brother if he died without issue, inasmuch as by this is designed, say the cabalists, that the soul of the departed one might be born again, and finish its earthly course. Very few new souls enter into the world, because many of the old souls which have already inhabited bodies have to re-enter those who are born, in consequence of their having polluted themselves in their previous bodily existence. This retards the great redemption of Israel, which cannot take place till all the pre-existent souls have been born upon earth, because the soul of the Messiah, which, like all other souls, has its pre-existence in the world of the spirits of the *Sephiroth*, is to be the last born one *at the end of days*, which is supported by an appeal to the Talmud (*Yebamoth*, 63, a). Then the great jubilee year will commence, when the whole pleroma of souls (אוֹצַר הַנְּשָׁמוֹת), cleansed and purified, and released from earth, shall ascend, in glorious company, into heaven. See METEMPSYCHOSIS.

IV. *Origin, Date, Design, and Relations of the Cabala.*—The rise of Cabalism is involved in great obscurity. The Jews ascribe it to Adam, or to Abraham, or to Moses, or to Ezra, the last being apparently countenanced by 2 Esdr. xiv, 20-48. The opinions of Christian writers are as variously divided; and the Cabala is such a complex whole, and has been aggregated together at such distant periods, that no general judgment can apply to it. In its crude form it is undoubtedly to be attributed to the authors of the books Jezirah and Zohar above named, and therefore cannot be assigned an earlier date than these writings. Its fuller and more mature doctrines, however, as above delineated, are due to the speculations of later masters of this school. The account of this theosophy has been greatly obscured by modern writers, who, in their description of the Cabala, confound its doctrines with *the Jewish mysticism* propounded in the works called *the Alphabet of R. Akiba* (אלפא ביתא דר' עקיבא, or אותיות דר' עקיבא), *the Description of the Body of God* (שיעור קומה), *and the Delineation of the heavenly Temples* (היכלות). Even the book *Jezirah* does not contain the doctrines of the Cabala as above expounded. All these productions, and others of a similar nature so frequently quoted by writers who give an analysis of the Cabala, know little or nothing of the *Sephiroth*, and of the speculations about the *En-Soph*, or the being of God, which constitute the essence of the Cabala. Nevertheless, these works are unquestionably to be regarded *as having induced the more refined speculations of the Cabala*, by the difficulty in which they placed the Jews in the south of France, and in Catalonia, who believed in them almost as much as in the Bible, and who were driven to contrive this system whereby they could explain to themselves, as well as to their assailants, the gross descriptions of the Deity, and of the plains of heaven, given in these Hagadic productions. Being unable to go to the extreme of the rigid literalists of the north of France and Germany, who, without looking for any higher import, implicitly accepted the difficulties and anthropomorphisms of the Bible and Hagada in their most literal sense; or to adopt the other extreme of the followers of Maimonides, who rejected altogether the Hagadic and mystical writings, and rationalized the Scriptures, it may be conjectured that Isaac the blind contrived, and his two disciples, Ezra and Azariel of Zerona, developed the modern system of Cabalism (about 1200-1230), which steers between these two extremes. By means of the *Sephiroth* all the anthropomorphisms in

the Bible, in the Hagada, and even in *the Shiur Koma*, are at once taken from the Deity, and yet literally explained; while the sacrificial institutions, the precepts, and the ritual of the Bible and Talmud, receive at the same time a profound spiritual import. The Cabala in its present state is therefore a hermeneutical system, which, in part at least, was instituted to oppose the philosophical school of Maimonides (q. v.).

The relationship between the Cabala and Neo-Platonism is apparent. The Cabala elevates God above being and thinking, and likewise denies all divine attributes; so does Neo-Platonism. The Cabala, like Neo-Platonism, places intelligent principles or substances between the Deity and the world. The Cabala teaches that the *Sephiroth*, which emanated from God, are not equal to God; Neo-Platonism teaches that the substances, thought, spirit, and nature (*νοῦς*, *ψύχη*, and *φύσις*), which proceeded from one being, are not equal to their origin (*οὐκ ἴσον δὲ τὸ προϊὸν τῷ μένοντι*); and the Cabala has adopted the very same classification of the *Sephiroth* into the three great spheres of intelligence, animation, and matter. The comparison between the emanation of the *Sephiroth* from the *En-Soph*, and the rays proceeding from light to describe immanency and perfect unity, is the same as the Neo-Platonic figure to illustrate the emanations from the one Being (*οἷον ἐκ φωτὸς τὴν ἐξ αὐτοῦ περίλαμψιν*). The doctrine of the Cabala, that most of the souls which enter the world have occupied bodies upon this earth before, is Neo-Platonic (comp. Zeller, *Gesch. der Philosophie*, III, ii, 944). See Neo-Platonism.

V. *Later Processes of Cabalism.*—In the hands of the younger disciples of the cabalistic science, the secret knowledge was not only studied in its philosophical bearing, but also, and even rather, under two new aspects (which were not mentioned by their predecessors, and which carried it farther than it went at first, though by this we do not mean to say that it received any positively novel additions), namely, the *practical* application and the *hermeneutical* method. We find that in olden times secret philosophical science and magic went hand in hand. The sorcerer mentioned in Acts xiii was called by the Arab name of עֵילָם, *the secret*, i. e. learned; in Acts xix we read of books of magic which were at Ephesus; the sporadic mentions made of the Cabala in the Talmud are accompanied by descriptions of miracles. When R. Chabina and R. Oshia studied the book of Jezirah, we are told in the treatise *Sanhedrim* of the Gemara, they also made each time a three-year-old cow, and lived thereon. It is no wonder, then, if the Jewish cabalists of the latter part of the Middle Ages transmitted the conception of their science to their Christian adepts, not only as speculative (עִיּוּנִית), but also as practical (מַעֲשִׂית), i. e. in plain English, that they connected with it the idea that a true cabalist must at the same time be a sorcerer. It is self-evident, however, that we must here distinguish between theosophic overstraining and mere juggling, although in actual practice the difference may sometimes have been hard to perceive. The effects hoped for or believed in magic were accordingly transmitted outwardly through amulets, talismans, exorcisms, images, signs, and such things, consisting of certain writings, names of angels, or mysterious letters, whose connection, however, always leads back to the name of God. This last, unpronounceable to the unconsecrated, but known to the cabalist, whether it consist of four (יהוה), twelve, or forty-two letters (numbers which result from combinations from the Sephir system), was, as such, called שֵׁם הַמְּפֹרָשׁ, *the declared name*; and he who knew how to use it was a בַּעַל הַשֵּׁם, or *master of the name*. The well-known implements of magic, such as Solomon's keys, the shield of David, etc., owe their origin to this line of ideas. Amateurs will find a very entertaining account of these things in Eisenmenger's *Entdecktes Judenthum*, in Schudt's *Jewish Curiosities*, and other works of the same character. See Amulet.

The exegetical ingenuity of the Cabala is interesting to the theologian. The principle of the mystic interpretation of Scripture is universal, not particular to such or such schools, as every one will perceive in Church history, and even in the history of Greek literature. We find it in Philo, in the New Test., in the writings of the fathers, in the *Talmud*, and in the *Zohar*; and the more it departs from the spirit of the sacred text, the more had the latter to be brought to its support by distortions of its meaning. For such operation there are no known rules except the exigencies of the case and the subjective mass of the sense. See Mysticism. In the mean time, the Jews had already, by the arbitrary character of their alphabet, arrived at all manner of subtleties, of which we have already isolated examples in earlier writings, but which were especially established as a virtuosoship in post-Zoharic times. From this arose the following species of cabalistic transformation: 1st. גִּמַטְרִיָּא, *Gematria* (*γεωμετρία*), i.e. the art of discovering the hidden sense of the text by means of the numerical equivalents of the letters. For example, in the first and last verses of the Hebrew Bible are found six א's, which, according to this method, means that the world is to last 6000 years. The numerical equivalent of the first word of Genesis is 913, which is also the number given by the words בְּתוֹרָה יָצַר (*by the law He formed it*, i. e. the world), from whence it follows that the law existed before the creation, and that the latter was accomplished through the former. If the second word of Genesis (בָּרָא) be added to the first, the result is 1116, which is also the equivalent of בְּרֹאשׁ הַשָּׁנָה נִבְרָא (*in the beginning of the year it was created*), by which is known that God created the world in the beginning of the year—that is, in the season of Autumn. The antiquity of this method is already shown in Rev. xiii, 18, where the solution must be ciphered out with the aid of the Hebrew (or Greek) alphabet. It is also considered as Gematria when Biblical numbers—for instance, dimensions of buildings—are expressed in letters, and words again made of them. Still later came speculations on the greater, smaller, inverted, and suspended letters found in the Masoretic text; for instance, Deut. vi, 4; Gen. ii, 4; Num. x, 35; Judg. xviii, 30, in which some deep meaning is looked for, although they may perhaps have originally been but peculiar marks to aid memory. 2d. The particularly so-called "figurative" (צוּרִיּוּת) Cabala, נוֹטָרִיקוֹן, *Notarikon* (from Lat. *notare*, to extract), consists in framing with each letter of a word several new ones, e. g. from the first word of Genesis six can thus be framed: בָּרָא, *he made*; רָקִיעַ, *the firmament*; אֶרֶץ, *the earth*; שָׁמַיִם, *the heavens*; יָם, *the sea*; תְּהוֹם, *the abyss*. We thus learn the correct scientific nature of the universe, besides the proper meaning of the text. Again, it consists in taking the first letters of several words to form a new one: e. g. Deut. xxx, 12, מִי יַעֲלֶה־לָּנוּ הַשָּׁמַיְמָה, *who shall bring us to heaven?* Answer: מִילָה, *circumcision*. 3d, תְּמוּרָה, *Temurah* (*permutation*), the anagram, of two kinds. The simple is a mere transposition of the letters of a word: e. g. we thus learn that the angel in Exod. xxiii, 23 (מַלְאָכִי, *my angel*) was the angel Michael (מִיכָאֵל). The more ingenious kind is that by which, according to certain established rules, each letter of the alphabet acquires the signification of another: as Aleph that of Tau, both that of Ayin. Then, again, the letters may be read forward and backward (which constitute the alphabet of *Athbash*, אַתְבַּשׁ), or the first letter that of the twelfth, the sec-

end of the thirteenth, and the reverse (making the alphabet called *Albam*, אַלְבַּם). See ATBACH. The more multifarious these trifles, the easier it is to arrive in every given case at a result, and the less wit or thought is required. Thus the Christian theology of the 17th century, which itself inclined to literal belief, and which, by its strong polemical aspect against the Jews, was led to a diligent study of the cabalistic arts, through them found everywhere in the Old Test. evidences of the Christian dogmas (e. g. Gen. i, 1, בֵּן רוּחַ אָב שְׁלֹשָׁה יְחִידָה תַּמָּה=בְּרֵאשִׁית, i. e. *filius, spiritus, pater*; *tres unitas perfecta*).

In the 13th century we find evidence of a knowledge of the cabalistic ideas and methods in the works of the Spaniard Raymond Lullus; but with him, as well as among his direct and indirect followers, these elements of Judaic philosophy take the character of eccentricities and superstitions more than of grand speculative theory. Two centuries elapsed after this before the Cabala really entered the circle of Christian mental development. Its admission was prepared, on the one hand, by the overthrow of the worn-out scholasticism of Aristotle, and the consequent tendency toward Platonic ideas, although, of course, these latter were yet in their more elementary form, as they had been transmitted to Alexandria by Eastern influences; on the other hand, the same result was conduced by an awakening interest in the study of nature, which, it is true, was still in a poetic, dream-like infancy, but was the more inclined to entertain itself with mysteries, as it had discovered as yet but few natural laws. To these was, however, joined a third and more powerful influence, namely, the belief handed down by the fathers of the first centuries that all the wisdom of nations, and chiefly Platonic philosophy, actually took their origin in the Hebraic revelation; that, in a more extended sense than the popular religious histories admit, the Jewish people were the possessors and keepers of a treasury of wisdom and knowledge which time or zealous research could alone reveal. What wonder is it, then, if the assertion of the Cabalists that they possessed such a treasure found credence and gained them followers? The progress of Christians toward the Cabala was greatly helped by the conversion of a large number of Jews to Christianity, in which they recognised a closer relation to their Gnostic views, and also by the Christians perceiving that Gnosticism could become a powerful instrument for the conversion of the Jews. Among the converted Jews we notice Paul Ricci, physician in ordinary to the Emperor Maximilian, and author of *Cœlestis Agricultura*; Judas Ben Isaac Abrabanel (Leon Hebræus), son of the renowned Portuguese exegist, and author of the *Dialogi de amore*. Among Christians we will only mention the two most important: John Pico della Mirandola and John Reuchlin; the former as a highly gifted and enthusiastic syncratist, author of *Conclusiones cabbalisticæ secundum secretam disciplinam sapientiæ Hebr.* (1486); the other a faithful disciple of the classics, in connection with mysticism, but opposed to scholasticism and monachal torpitude, author of *De verbo mirifico* (1494); *De arte cabbalistica* (1517). His, and some other writings of the same kind, are collected in the work *Artes Cabbalisticæ h. e. reconditæ theologiæ et philosophiæ Scriptorum*, tom. i (unicus), ex. bibl. J. Pistorii (Basle, 1587, fol.). The powerful preponderance of the religious and Church interests, as well as those of practical politics, which became perceptible in the first quarter of the 16th century, giving to the mind a positive impulse, and to studies a substantial foundation, arrested the further development of the Cabala; and when, in latter times, it was occasionally taken up again, it was rather with the view of giving a high-sounding, mysterious name to theories which had not strength enough to stand by themselves, than as a genuine resurrection of the old systems.

VI. *Literature.*—As a sort of accessory subject of the so-called Orientalism, and even of Biblical erudition, the Cabala is mentioned by the ancient archæologues and isagogics (as Cuneus, *Respubl. Hebr.*; Walton, *Proleg.*; Hottinger, *Thesaurus Philol.*; Leusden, *Philologus Hebr.*; Pfeifer, *Critica Sacra*, and many others); but they contain nothing of importance respecting it. Much more copious, though not yet complete, is the information contained in the works of Buddeus, *Philosophia Ebræorum* (1702); Hackspan, *Miscellanea*; Braum, *Selecta Sacra*, v; Reimmann, *Jüdische Theologie*. The work of Sommer, *Specimen theologiæ Soharicæ* (Goth. 1734), is (like many others which Fabricius quotes in the *Bibliographia Antiq.* p. 216) only a polemico-apologetic attempt at tracing the Christian doctrine of the Trinity in the Cabala. Of a higher philosophic character are the works of Wachter, *Spinozismus im Judenthum*, and *Elucidarius cabbalisticus s. reconditæ Ebræorum philosophiæ brevis recensio* (Amst. 1699), in which the polemic tone prevails. Next are Basnage, *Hist. des Juifs* (tom. iii), and Brucker, *Hist. Philosophiæ* (vol. ii), who, however, from insufficient study of the original sources, acknowledges himself unable to master its intricate history. Among later writers we find the well-known works of Tennemann, Tiedemann, and Buhle. The line of the more recent monographic researches begins with Kleuker (Riga, 1786). But Christian writers, whose early knowledge of rabbinic literature has been fast waning, generally forsake it. Tholuck's treatise, *De ortu Cabbalæ* (1837), treats only of a preliminary question. Lutterbeck, in the first volume of his *Neutest. Lehrbegriff*, has a very interesting chapter on the Jezirah and Zohar. Molitor's extensive work, *Philos. d. Geschichte d. Tradition* (1827, pt. i-iii), is chiefly theoretical. Reuchlin (*De arte Cabbalistica*, 1517) is still a valuable authority. One of the latest is Etheridge (*Jerusalem and Tiberias*, Lond. 1856, 12mo). Next to the extensive work of Ad. Franck, *La Kabbale ou la Philosophie religieuse des Hebreux* (Paris, 1842; tr. by Jellinek, Lpz. 1844), we name the *Philosophia Cabbalistica et pantheismus* (1832) of M. Freystadt. See the *Eclectic Review*, Feb. 1856; *Christian Remembrancer*, April, 1862.

The earliest cabalist was Asariel, whose *Commentary on the Doctrine of the Sephiroth* (פֵּרוּשׁ עֶשֶׂר סְפִירוֹת), in questions and answers, has been published (Warsaw, 1798; Berl. 1850); also his *Commentary on the Song of Songs* (Altona, 1764), usually ascribed to his pupil Nachmanides or Ramban (q. v.).

Among the most important cabalists we find Rabbi Moses Ben Nachman, author of the *Books of Faith and Hope* (אֱמוּנָה וּבִטָּחוֹן); R. Jose, of Castile, author of שַׁעֲרֵי אוֹרָה (*Doors of Light*); R. Moses, of Cordova, פַּרְדֵּס רִמּוֹנִים (*Garden of Pomegranates*); R. Isaac Loria, סֵפֶר הַגִּלְגּוּלִים (*Book of the Wanderings of Souls*); R. Chayim Vital, עֵץ חַיִּים (*Tree of Life*); R. Nastali Ben Jacob Elchanan, עֵמֶק הַמֶּלֶךְ (*Valley of the King*); R. Abraham Cohen, of Herrera (vulg. Iriva), שַׁעַר הַשָּׁמַיִם (*Door of Heaven*). Some of these works (translated into Latin) are to be found whole or in their principal parts in the *Kabbala Denudata* of Chr. Knorr von Rosenroth (Sulsb. 1677, 3 vols. 4to), with all kinds of exegetical apparatus, and some texts from the *Zohar*. The cabalistic literature is fully noticed in Bartolocci's *Bibliotheca Magna Rabbinica* and in Wolff's *Bibliotheca Hebræa*, tom. ii and iv, though not in the correct order and construction; see also P. Beer, *Geschichte der Lehren aller Secten der Juden, und der Cabbala* (Brünn, 1822, 2 vols. 8vo); Senet, *De Cabbala Judæorum* (Rost. 1702); Sennert, *De Cabbala* (Wittenb. 1655); and especially the copious list of expositions upon the works of Simon ben-Jochai, the reputed founder of Cabalism, given by Fürst, *Bibliotheca Judaica*, iii, 329 sq. We may specify the following: Zunz, *Gottesd. Vorträge der Juden* (Berlin,

1832), p. 402 sq.; Landauer, in the *Literaturblatt des Orients*, vol. vii (1845); viii, 812 sq.; Joel, *Religionsphilosophie des Sohar* (Lpz. 1849); Jellinek, *Moses ben-Schem-Job de Leon* (Lpz. 1851); *Beiträge zur Gesch. der Kabbala* (Lpz. 1852); *Auswahl Kabbalischer Mystik* (Lpz. 1853); and *Philosophie und Kabbalah* (Lpz. 1854); Steinschneider, *Jewish Literature* (Lond. 1857), p. 104-115, 299-309; Munk, *Mélanges de Philosophie Juive et Arabe* (Par. 1859), p. 190 sq.; and especially the masterly analysis of the *Zohar* by Ignaz Stern, *Ben-Chananja*, i-v; the lucid treatise of Grätz, *Gesch. der Juden*, vii, 442-459; and the able review of it by Löw, *Ben-Chananja*, v, p. 325 sq. (also Lpz. 1863, p. 73-85). Ginsburg has lately published a compendious but copious and clear work entitled *The Kabbalah*, etc. (Lond. 1865), in which, however, he controverts the traditional view of the authorship by rabbis Akiba and Ben-Jochai, and assigns it an origin prior to the Zohar, which he attributes to Moses of Leon; considering this rather as the offspring than the parent of Cabalism.

Cabasilas, Nicolas, archbishop of Thessalonica in 1354, a firm supporter of the rights and independence of the Greeks against the Roman Church. In the Hesychastic controversy he took part with the monks of Mount Athos against Barlaam (q. v.). He wrote several works, among which are, 1. *Exposition of the Greek Liturgy* (Greek), translated into Latin by Hervet, and given in the *Bibliotheca Patrum* under the title *Compendiosa interpretatio in Divinum Officium*: and, 2. Περὶ τῆς ἐν Χριστῷ ζωῆς, etc., *Life of Jesus Christ* (Ingoldst. 1604; a bad Latin version). This book is of value as illustrating the mystical tendency among the Byzantine writers. See Cave, *Hist. Lit.* anno 1350; *Stud. u. Krit.* 1843, p. 724; Gasz, *Die Mystik d. N. Kabasilas*, etc. (Greifsw. 1849); Walch, *Bibliotheca Theologica*, i, 640; ii, 570.

Cabasilas, Nilus, uncle of the preceding, a Greek theologian, and archbishop of Thessalonica in the first half of the 14th century. He wrote Περὶ τῶν αἰτιῶν τῆς ἐκκλησιαστικῆς διαστάσεως, first printed at London (n. d.), afterward, Greek and Latin, at Basel (1544); again at Frankfort (1555), and at Hainault (1608). In it he shows that the arbitrary claims of the papacy were the true cause of the schism between the East and West. He wrote also Περὶ τῆς ἀρχῆς τοῦ Πάπα (Francfort, 1555, 8vo; Hanover, 1608, with the works of Barlaam). Dupin says that these writings are "full of learning." The book on the papal supremacy was translated into English by Gressop (London, 1560, 8vo). Cabasilas died in 1350.—Hoefer, *Nouv. Biog. Générale*, viii, 15; Cave, *Hist. Lit.*, Wharton's Appendix; Dupin, *Eccles. Writers*, cent. xiv.

Cabassut (*Cabassutius*), JEAN, an eminent Roman canonist, was born at Aix, in Provence, 1604 or 1605, entered the congregation of the Oratory 1626, and died at Aix, aged eighty-one, Sept. 25, 1685. At Rome he was regarded as an oracle in every thing relating to the canon law and casuistry, and a good Oriental scholar. He wrote *Juris Canonici theoria et praxis* (4to, 1696, 1698, and by Gibert, with notes, etc., 1738); also *Historiarum, Conciliorum et Canonum invicem collatorum veterumque Ecclesiæ rituum, ab ipsis Ecclesiæ incunabulis ad nostra usque tempora, notitia ecclesiastica* (best ed. Lugd. 1685, fol.; again, Lyons, 1725; and in an abridged form, 1776, 8vo).

Cab'bon (Heb. *Kabbon'*, כַּבּוֹן, in Syriac, *a cake*; Sept. Χαββών v. r. Χαβρά and Χαββά), a place in the "plain" of Judah, mentioned between Eglon and Lahmam (Josh. xv, 40); possibly the same with MACHBENAH (1 Chron. ii, 49). It is perhaps the modern ruined site *el-Kufeir*, marked by Van de Velde (*Map*) at 10 miles south-east of Ashkelon.

Cabet. See COMMUNISM.

Cabin (חֲנוּת, *chanuth'*; Sept. merely Græcizes, ἡ χερέθ), properly a vault or *cell* (so the margin) within the dungeon, and under ground, for the separate confinement of prisoners (Jer. xxxvii, 16). Others (Scheid, in the *Diss. Lugdun.* p. 988) understand it to mean a curved post, i. e. *the stocks* (comp. Jer. xx, 2, 3; xxix, 26). The idea conveyed in either case is that the prophet suffered the most severe and loathsome imprisonment. See PRISON.

Cabiz, also called **Aimé**, a learned Mohammedan who became noted for maintaining the superiority of Jesus Christ to Mohammed. Being summoned before the Divan, he silenced the two "cadilaskers" of Roumelia and Anatolia. He was then set at liberty, but the sultan, having listened to the discussion, referred the matter to the mufti and cadi of Constantinople. This time Cabiz was found guilty, and sentenced to death. He was executed on Sept. 19, 1527. An edict published on occasion of his execution forbade all Mohammedans, under penalty of death, to prefer thenceforth the doctrine of Jesus Christ to that of Mohammed.—Hoefer, *Biographie Générale*, viii, 27.

Cabral, FRANÇOIS, a Jesuit missionary, was born in 1528 at Covilhaa, in Portugal, and entered the Society of Jesus at Goa. Appointed a missionary, he traversed great part of India and Asia. After spending several years as professor of theology at Goa, he was made vice-provincial in Japan. He baptized, in 1575, the king of Bungo, who several years before had received hospitably Francis Xavier, but was not converted until the arrival of Cabral. He passed over into China, where he labored abundantly, and thence returned to Goa, where he governed the house of the Professed thirty-eight years. He died at Goa, April 16, 1609.—Alegambe, *Script. Soc. Jesu*; Hoefer, *Nouv. Biog. Générale*, viii, 36.

Ca'bul (Heb. *Kabul'*, כָּבוּל, according to etymology, *bound*, but signification uncertain [see below]), the name of a town and a district.

1. (Sept. Χαβώλ, but other copies blend with the following words into Χωβαμασομέλ.) A city on the eastern border of the tribe of Asher, and apparently at the northern part, beyond Beth-Emek (Josh. xix, 27). It seems to correspond to the village *Chabolo* (Χαβωλώ) mentioned by Josephus (*Life*, § 43, 45) as on the confines of Ptolemais, in Galilee, 40 stadia from Jotapata. A fortress by the name of *Kabul* is mentioned by Arabian geographers in the district of Safed (Rosenmüller, *Analect. Arab.* iii, 20). Dr. Robinson, during his last visit to Palestine, accordingly found a village called *Kabul* on his way to Accho, situated "on the left, among the lower hills" (*Biblioth. Sacra*, 1853, p. 121; *Later Bibl. Res.* p. 88; for Talmudical notices, see Schwarz, *Palest.* p. 192).

2. (Sept. translates Ὅριον, *boundary*, but in neglect of the context, ver. 12, which favors the derivation of Simonis [*Onomast.* p. 417] and Hiller [*Onomast.* p. 435, 775], as i. q. "something exhaled, as nothing;" Josephus [*Ant.* viii, 5, 3] calls it Χαβαλών, and says [apparently from conjecture] that it is a Phœnician word indicative of *dissatisfaction*.) A district containing "twenty cities," given to Hiram, king of Tyre, by Solomon, in acknowledgment of the important services which he had rendered toward the building of the Temple (1 Kings ix, 13). Hiram was by no means pleased with the gift, and the district received the name of Cabul (as if signifying *unpleasing*) from this circumstance. The situation of Cabul has been disputed; but we are content to accept the information of Josephus (*Ant.* viii, 5, 3), who seems to place it in the north-west part of Galilee, adjacent to Tyre. The foregoing town, named Cabul (Josh. xix, 27), being also in Galilee, it is possible that it was one of the twenty towns consigned to Hiram, who, to mark his dissatisfaction, applied the significant name of this one town to the whole district. The cause of Hiram's dislike to what Solomon doubtless considered a liberal gift is very uncertain.

It has been conjectured (Kitto, *Pictorial Bible*, note on 1 Kings ix, 13) that "probably, as the Phœnicians were a maritime and commercial people, Hiram wished rather for a part of the coast, which was now in the hands of Solomon, and was therefore not prepared to approve of a district which might have been of considerable value in the eyes of an agricultural people like the Hebrews. Perhaps the towns were in part payment of what Solomon owed Hiram for his various services and contributions." See HIRAM.

Cad'dis (Καδδίς, or rather Γαδδίς, as most texts read; so also Josephus, Γαδδίς or Γαδής, *Ant.* xiii, 1, 2; derivation uncertain, see Grimm, *Handb.* in loc.), the surname (ἐπικαλούμενος) of JOANNAN (q. v.), the eldest brother of Judas Maccabæus (1 Macc. ii, 2).

Cademann, JOHANN GEORG., a German theologian of the 17th century, was born at Oschatz, in Saxony, and studied at Jena and Wittenberg, where he took his degree in 1654. In 1656 he became pastor at Dahlen, and in 1676 archdeacon at Wurzen, where he died, Dec. 28, 1687. Among his writings are *Disputatio de Causa Instrumentali Justificationis* (Jena, 1650, 4to):—*Disp. de principiis Immanarum Actionum* (Wittenb. 1654, 4to):—*De Justitia Distributiva* (1654, 4to):—*De Majestate* (1654, 4to).—Hoefer, *Nouv. Biog. Générale*, viii, 63.

Ca'dès (Καδής v. r. Κῆδες and Κεδές), a Græcized form (1 Macc. xi, 63, 73) of the name of KEDESH (q. v.) in Naphtali (Josh. xx, 7).

Ca'dès-Bar'nè (Κάδης Βαρνή), a Græcized form (Judith v, 14) of KADESH-BARNEA (q. v.).

Cad'miel (Καδμίηλος v. r. Καδόηλος), one of the Levites whose "sons" returned from the captivity, and who assisted at the musical performances at the restoration of the temple worship (1 Esdr. v, 26, 58); evidently the KADMIEL (q. v) of the Heb. texts (Ezra ii, 40; Neh. vii, 43; xii, 24).

Cadonici, GIOVANNI, an Italian theologian, was born at Venice in 1705, and became a canon of the church of Cremona. He was a man of learning, and opposed the pretensions of the court of Rome and the doctrines of the Molinists. In a curious work, entitled "An Exposition of this passage of St. Augustine, The Church of Jesus Christ shall be in subjection to secular princes," he shows that as princes are subject to the Church in things spiritual, so the Church is bound to obey them in things temporal; and that in ancient liturgies, as the Ambrosian, Mozarabic, etc., prayer was made, specially and by name, even for persecuting princes. He wrote also *Sentimens de St. Augustin* (1763); *De Animabus Justorum* (Rome, 1766, 2 vols. 4to). He died Feb. 27, 1786.—Landon, *Eccl. Dict.* s. v.; Hoefer, *Nouv. Biog. Générale*, viii, 74.

Cadytis. See JERUSALEM.

Cæcilia. See CECILIA.

Cæcilian. See DONATISTS.

Cædmon or **Cedmon**, an Anglo-Saxon Benedictine and poet, born in Northumberland, died at Whitby in 676 or 680. He is the first person of whom we possess any metrical composition in our vernacular. It is a kind of ode, of eighteen lines, celebrating the praises of the Creator, preserved in Alfred's translation of Bede. "Bede gives the following account. Cædmon seems to have had the care of the cattle of the monks of Whitby. It appears to have been the custom of our Saxon forefathers to amuse themselves at supper with improvisatore descants accompanied by the harp, as is still practised at meetings of the Welsh bards. Cædmon, when the harp passed round among the guests, was fain, as it approached him, to shrink away from the assembly and retire to his own house. Once, after it had thus happened, as he was sleeping at night, some one seemed to say to him, 'Cædmon, sing me something.' He replied, 'I cannot sing;' and he told how his inability to sing had been the cause of his quitting the hall. 'Yet thou must sing to me,' said the voice. 'What must I sing?' said he. 'Sing me the origin of things.' The subject thus given him, he composed the short ode in question. When he awoke, the words were fast in his mind. Cædmon in the morning told his vision and repeated his song. The effect was, that the abbess Hilda, and the learned men whom she had collected round her in her monastery at Whitby, believed that he had received from heaven the gift of song, and when on the morrow he returned with a poetic paraphrase of a passage of Scripture which they had given him to versify as a test of his inspiration, they at once acknowledged the verity, and earnestly besought him to become a member of their company. He composed numerous poems on sacred subjects, which were sung in the abbey. Sacred subjects were his delight, and to them he confined himself. He continued in the monastery for the remainder of his life, and there he died, as is conjectured, about 680. The authenticity of the little poem above mentioned is perhaps unquestionable. But, besides this, a very long Saxon poem, which is a metrical paraphrase on parts of the Scriptures, is attributed to Cædmon. An edition of it was printed at Amsterdam in 1655, under the care of Junius. Hickes expresses doubts whether this poem can be attributed to so early a period as the time of Cædmon. He thinks he perceives certain Dano-Saxonisms in it which would lead him to refer it to a much later period. It has been again printed, with a much more accurate text, by Mr. Thorpe, as a publication by the Society of Antiquaries (Lond. 8vo, 1832). Mr. Thorpe is of opinion that it is substantially the work of Cædmon, but with some sophistications of a later period, and in this opinion our best Anglo-Saxon scholars appear inclined to coincide."—*Penny Cyclopædia*, s. v.; Hoefer, *Biographie Générale*, viii, 84.

Cælestius. See CELESTIUS.

Cærularius, MICHAEL, patriarch of Constantinople (A.D. 1043–1059). He was one of the chief promoters of the great schism between the Eastern and Western churches. In 1054 Pope Leo IX sent legates to Constantinople to accommodate matters; but they, being displeased at the treatment they received, left a written letter of excommunication, directed against the patriarch, on the altar of the church of St. Sophia, and departed, having shaken off the dust from their feet. The ostensible causes of difference between the churches, as detailed in a letter written by Cærularius and Leo, archbishop of Acryda, to John, bishop of Trani, were the following: that the Latins consecrated with unleavened bread; that they added the words *Filioque* to the creed of the Church; that they taught that the souls of the faithful make expiation in the fires of Purgatory; and that in some other respects they differed in their customs from those of the East. After this outrage on the part of the Roman legates, Cærularius called together a synod at Constantinople 1054, and excommunicated them and their adherents. Cærularius himself was a man of ambitious views and arrogant disposition, and little likely to ward off the final rupture with Rome, which in fact took place. However, the Emperor Isaac Comnenius took umbrage at his behavior, and, A.D. 1059, having caused him to be seized, sent him to Præconnesus. Cærularius refused to resign the patriarchal throne as the emperor endeavored to compel him to do, but died shortly afterward in exile.—Baron. *Annales*, xi, A.D. 1054; Mosheim, *Ch. Hist.* cent. xi, pt. ii, ch. iii; Neander, *Ch. History*, iii, 580.

Cæsar (Græcized Καῖσαρ; hence the Germ. title *Kaiser*, Russian *Czar*), a name assumed by or conferred upon all the Roman emperors after Julius Cæsar (who is said to have been so named from his having been born by a surgical operation, *cæsus*). In this way

it became a sort of title, like Pharaoh, and, as such, is usually applied to the emperors in the New Testament, as the sovereign of Judæa (John xix, 15; Acts xvii, 7), without their distinctive proper names. See also AUGUSTUS. It was to him that the Jews paid tribute (Matt. xxii, 17; Luke xx, 22; xxiii, 2), and to him that such Jews as were *cives Romani* had the right of appeal (Acts xxv, 11; xxvi, 32; xxviii, 19); in which case, if their cause was a criminal one, they were sent to Rome (Acts xxv, 12, 21; comp. Pliny, *Epp.* x, 97), where was the court of the emperor (Phil. iv, 22). The Cæsars mentioned in the New Testament are Augustus (Luke ii, 1), Tiberius (Luke iii, 1; xx, 22), Claudius (Acts xi, 28), Nero (Acts xxv, 8); Caligula, who succeeded Tiberius, is not mentioned. See each name. On Phil. iv, 22, see HOUSEHOLD.

Cæsare'a (Καισάρεια, in the Targum קיסרין), the name of several cities under the Roman rule, given to them in compliment of some of the emperors; especially of two important towns in Palestine.

1. CÆSARĒA PALÆSTĪNÆ (Καισάρεια ἡ Παλαιστίνης), or "Cæsarea of Palestine" (so called to distinguish it from the other Cæsarea), or simply Cæsarea (without addition, from its eminence as the Roman metropolis of Palestine, and the residence of the procurator). The numerous passages in which it occurs (Acts viii, 40; ix, 30; x, 1, 24; xi, 11; xii, 19; xviii, 22; xxi, 8, 16; xxiii, 23, 33; xxv, 1, 4, 6, 13) show how important a place this city occupies in the Acts of the Apostles. It was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and about half way between Joppa and Dora (Josephus, *War*, i, 21, 5). The journey of the apostle Peter from Joppa (Acts x, 24) occupied rather more than a day. On the other hand, Paul's journey from Ptolemais (Acts xxi, 8) was accomplished within the day. The distance from Jerusalem is stated by Josephus in round numbers as 600 stadia (*Ant.* xiii, 11, 2; *War*, i, 3, 5). The Jerusalem Itinerary gives sixty-eight miles (*Wesseling*, p. 600; see Robinson, *Bib. Res.* iii, 45). It has been ascertained, however, that there was a shorter road by *Antipatris* than that which is given in the Itinerary—a point of some importance in reference to the night-journey of Acts xxiii. See ANTIPATRIS. The actual distance in a direct line is forty-seven English miles.

In Strabo's time there was on this point of the coast merely a town called "Strato's Tower," with a landing-place (πρόσορμον ἔχων), whereas, in the time of Tacitus, Cæsarea is spoken of as being the head of Judæa ("Judææ caput," Tac. *Hist.* ii, 79). It was in this interval that the city was built by Herod the Great (Josephus, *Ant.* xv, 9, 6; Strabo, xvi, 2, 27; Pliny, *H. N.* v, 15). The work was, in fact, accomplished in ten years. The utmost care and expense were lavished on the building of Cæsarea. It was a proud monument of the reign of Herod, who named it in honor of the Emperor Augustus. The full name was *Cæsarea Sebaste* (Καισάρεια Σεβαστή, Joseph. *Ant.* xvi, 5, 1). It was sometimes called *Cæsarea Stratonis*, and sometimes also (from its position) *Maritime Cæsarea* (παραλιός, Joseph. *War*, iii, 9, 1, or ἡ ἐπὶ θαλάττῃ, *ib.* vii, 1, 3). The magnificence of Cæsarea is described in detail by Josephus in two places (*Ant.* xv, 9; *War*, i, 21). The chief features were connected with the harbor (itself called Σεβαστὸς λιμὴν, on coins and by Josephus, *Ant.* xvii, 5, 1), which was equal in size to the Piræus of Athens. The whole coast of Palestine may be said to be extremely inhospitable, exposed as it is to the fury of the western storms, with no natural port affording adequate shelter to the vessels resorting to it. To remedy this defect, Herod, who, though an arbitrary tyrant, did much for the improvement of Judæa, set about erecting, at immense cost and labor, one of the most stupendous works of antiquity. He threw out a semicircular mole, which protected the port of Cæsarea on the south and west, leaving only a sufficient opening for vessels to enter from the north; so that, within the enclosed space, a fleet might ride at all weathers in perfect security. This breakwater was constructed of immense blocks of stone brought from a great distance, and sunk to the depth of 20 fathoms in the sea. Broad landing-wharves surrounded the harbor, and conspicuous from the sea was a temple dedicated to Cæsar and to Rome, and containing colossal statues of the emperor and the imperial city. Besides this, Herod added a theatre and an amphitheatre; and, when the whole was finished, he fixed his residence there, and thus elevated the city to the rank of the civil and military capital of Judæa, which rank it continued to enjoy as long as the country remained a province of the Roman empire (see Dr. Mansford, *Script. Gazetteer*). Vespasian was first declared emperor at Cæsarea, and he raised it to the rank of a Roman "colony" (q. v.), granting it, first, exemption from the capitation tax, and afterward from the ground taxes (the real *jus Italicum*). The place was, however, inhabited chiefly by Gentiles, though some thousands of Jews lived in it (Joseph. *War*, iii, 9, 1; iii, 14; *Ant.* xx, 8, 7; *Life*, 11). It seems there was a standing dispute between the Jewish and Gentile inhabitants of Cæsarea to which of them the city really belonged. The former claimed it as having been built by a Jew, meaning King Herod; the latter admitted this, but contended that he built it for them, and not for Jews, seeing that he had filled it with statues and temples of their gods, which the latter abominated (Joseph. *War*, ii, 13, 7). This quarrel sometimes came to blows, and eventually the matter was referred to the Emperor Nero, whose decision in favor of the Gentiles, and the behavior of the latter thereupon, gave deep offence to the Jews generally, and afforded occasion for the first outbreaks, which led to the war with the Romans (Joseph. *War*, ii, 14). One of the first acts of that war was the massacre of all the Jewish inhabitants by the Gentiles to the number of 20,000 (*ib.* ii, 18, 1). This city was the head-quarters of one of the Roman cohorts (q. v.) in Palestine.

Coin of Cæsarea Palestinæ.

Cæsarea is the scene of several interesting circumstances described in the New Testament, such as the conversion of Cornelius, the first-fruits of the Gentiles (Acts x); the residence of Philip the Evangelist (Acts xxi, 8). It was here also, in the amphitheatre built by his grandfather, that Herod Agrippa was smitten of God and died (Acts xii, 21–23). From hence the apostle Paul sailed to Tarsus when forced to leave Jerusalem on his return from Damascus (ix, 30), and at this port he landed after his second missionary journey (xviii, 22). He also spent some time at Cæsarea on his return from the third missionary journey (xxi, 8, 16), and before long was brought back a prisoner to the same place (xxiii, 23, 33), where he remained some time in bonds before his voyage to Italy (xxv, 1, 4, 6, 13). After the destruction of Jerusalem, Cæsarea became the spiritual metropolis of all Palestine; but, since the beginning of the 5th century, when the land was divided into three provinces, Palestina Prima, Secunda, and Tertia, it became the capital of only the first province, and subordinate to the bishopric of Jerusalem, which was elevated into a patriarchate with the rights of primacy over "the three Palestines." Cæsarea is chiefly noted as the birthplace and episcopate of Eusebius, the celebrated Church historian, in

the beginning of the 4th century, and was conspicuous for the constancy of its martyrs and confessors in the various persecutions of the Church, especially the last (Euseb. *Hist. Eccl.* viii, s. f.). It was also the scene of some of Origen's labors and the birthplace of Procopius. It continued to be a city of some importance even in the time of the Crusades. It still retains the ancient name in the form of *Kaiseriyeh*, but has long been desolate. The most conspicuous ruin is that of an old castle at the extremity of the ancient mole. A great extent of ground is covered by the remains of the city. A low wall of gray stone encompasses these ruins, and without this is a moat now dry. Between the accumulation of rubbish and the growth of long grass, it is difficult to define the form and nature of the various ruins thus enclosed. Nevertheless, the remains of two aqueducts, running north and south, are still visible. The one next the sea is carried upon high arches; the lower one, to the eastward, carries its waters along a low wall in an arched channel five or six feet wide. The water is abundant and of excellent quality, and the small vessels of the country often put in here to take in their supplies. Cæsarea is, apparently, never frequented for any other purpose; even the high-road leaves it wide; and it has not been visited by most of the numerous travellers in Palestine. The present tenants of the ruins are snakes, scorpions, lizards, wild boars, and jackals.—Kitto; Smith. See G. Robinson's *Travels*, i, 199; Bartlett's *Jerusalem*, p. 6; Traill's *Josephus*, p. xlix; Conybeare and Howson's *Life and Epistles of St. Paul*, ii, 279; Rosenmüller, *Alterth.* II, ii, 326 sq.; Reland, *Palæst.* p. 670 sq.; Otho, *Lex Rabb.* p. 108 sq.; Thomson, *Land and Book*, ii, 234 sq.; Ritter, *Erdk.* xvi, 598 sq.; Wilson, *Bible Lands*, ii, 250 sq.; Prokesch, *Reise*, p. 28 sq.; Sieber, *De Cæsareæ Palestinæ Episcopis* (Lips. 1734); Wiltsch, *Geography and Stat. of the Church*, i, 58, 214 sq.

CÆSAREA, COUNCILS OF. Several councils have been held at this place. The most important are, 1, in 334, an Arian council, against Athanasius; 2, in 358, in which Cyril (q. v.), bishop of Jerusalem, was deposed.—Smith, *Tables of Church Hist.*; Landon, *Manual of Councils.*

2. CÆSARĒA PHILIPPI, or "Cæsarea of Philip" (*Καισάρεια ἡ Φιλίππου*, so Joseph. *Ant.* xx, 8, 4; *War*, iii, 8, 7; 2, 1; Euseb. *Hist. Eccl.* vii, 17), as having been in later times much enlarged and beautified by Philip the tetrarch (Joseph. *Ant.* xviii, 2, 1; *War*, ii, 9, 1), who called it Cæsarea in honor of Tiberius the emperor, adding the cognomen of Philippi to distinguish it from Cæsarea of Palestine. It was also known as CÆSARĒA-PANĔAS (Καισάρεια Πανεάς or Πανιάς, Joseph. *Ant.* xviii, 2, 3; *War*, ii, 9, 1; Ptolemy, v, 15, 21; Pliny, v, 15, 15; Sozomen, v, 21; on coins, K. ὑπὸ Πανείῳ or πρὸς Πανείω; in Steph. Byz. incorrectly πρὸς τῇ Πανειάδι), or simply *Panias* (Πανεάς, Πανιάς, or Πανειάς, Hierocl. p. 716), its original name (Joseph. *Ant.* xv, 10, 3; comp. Pliny, v, 15; Παναῖς in Cedren. p. 305; Samar. פניאס); from the adjoining mountain *Panius* (Πάνιον or Πανεῖον), which, with the spring therein, was dedicated to the heathen *Pan* (Philostorg. vii, 3), and which latter name has alone been retained in the present name *Banias* (Burckhardt, i, 90; comp. *Targ.* Jonath. on Num. xxxiv, 11); being, according to many, no other than the early LAISH (q. v.) of Dan (Judg. xviii, 7, 29), or LESHEM (Josh. xix, 47; comp. Theodoret, *Quæst. in Judic.* 26). Cæsarea Philippi is mentioned only in the first two Gospels (Matt. xvi, 13; Mark viii, 27), and in accounts of the same transactions. The story of the early Christian writers that the woman healed of the issue of blood, and supposed to have been named Berenice, lived at this place, rests on no foundation (Euseb. *Hist. Eccl.* vii, 18; Sozom. v, 21; Theophan. *Chronogr.* 41; Phot. *Cod.* 271, p. 823). See SHEPHAM.

This city lay about 120 miles north from Jerusalem, and a day and a half's journey from Damascus, at the springs of the Jordan, and near the foot of Isbel Shrik, or the Prince's Mount, a lofty branch of Lebanon, forming in that direction the boundary between Palestine and Syria Proper. Here Herod the Great erected a temple to Augustus (Joseph. *Ant.* xv, 10, 3; comp. *War*, i, 21, 3). *Panium* became part of the territory of Philip, tetrarch of Trachonitis, who enlarged and embellished the town, and called it *Cæsarea Philippi*, partly after his own name and partly after that of the emperor (*Ant.* xviii, 2, 1; *War*, ii, 9, 1). Agrippa II followed in the same course of flattery, and called the place *Neronias* (*Ant.* xx, 9, 4). Josephus seems to imply (*Life*, 13) that many heathens resided here. Titus exhibited gladiatorial shows at Cæsarea Philippi after the downfall of Jerusalem, in which the Jewish prisoners were compelled to fight like gladiators, and numbers perished in the inhuman contests (*War*, vii, 2, 1). The old name was not lost. Coins of *Cæsarea Paneas* continued through the reigns of many emperors. Under the simple name of *Paneas* it was the seat of a Greek bishopric in the period of the great councils (the second bishop being present at the Council of Nice, and the last at the Council of Chalcedon in 451), and of a Latin bishopric of Phœnicia during subsequent Christian occupancy, when it was called *Belinas*. "During the Crusades," says Dr. Robinson, "it was the scene of various changes and conflicts. It first came into the possession of the Christians in 1129, along with the fortress on the adjacent mountain, being delivered over to them by its Israelite governor, after their unsuccessful attempt upon Damascus in behalf of that sect. The city and castle were given as a fief to the Knight Rayner Brus. In 1132, during the absence of Rayner, Bâniâs was taken, after a short assault, by the Sultan Ismail of Damascus. It was recaptured by the Franks, aided by the Damascenes themselves. In 1139 the temporal control was restored to Rayner Brus, and the city made a Latin bishopric, under the jurisdiction of the Archbishop of Tyre" (*Researches*, iii, 360).

The site is still called *Banias*, the first name having here, as in other cases, survived the second. It has now dwindled into a paltry and insignificant village, whose mean and destitute condition contrasts strikingly with the rich and luxuriant character of the surrounding country. Yet many remains of ancient architecture are found in the neighborhood, bearing testimony to the former grandeur of the place, although it is difficult to trace the site of the splendid temple erected here in honor of Augustus. The place itself is remarkable in its physical and picturesque characteristics, as well as in its historical associations. It was at the easternmost and most important of the two recognised sources of the Jordan, the other being at Tell el-Kady. The spring rises, and the city was built, on a limestone terrace in a valley at the base of Mount Hermon. On the north-east side of the present village, the river, held to be the principal source of the Jordan, issues from a spacious cavern under a wall of rock. Around this source are many hewn stones. In the face of the cliff, directly over the cavern and in other parts, several niches have been cut, apparently to receive statues. Each of these niches had once an inscription; and one of them, copied by Burckhardt, appears to have been a dedication by a priest of Pan. The situation is unique, combining in an unusual degree the elements of grandeur and beauty. It nestles in its recess at the southern base of the mighty Hermon, which towers in majesty to an elevation of 7000 or 8000 feet above. The abundant waters of the glorious fountain spread over the terrace luxuriant fertility and the graceful interchange of copse, lawn, and waving fields (Robinson, *Later Bib. Res.* p. 404).

About three miles north-east of Banias are the remains of an immense ancient castle, covering one of the spurs of Lebanon, about fifteen hundred feet above

Cave at Banias.

the plain and city. It is enclosed by walls of immense strength and thickness, and must have been an almost impregnable fortress. It is of Saracenic architecture; but many of the fine *bevelled* stones with which the noble round towers are constructed must have belonged to a far more ancient edifice. This castle received the name of *es-Subeibeh* about the time of the Crusades, perhaps from the half-gipsy Arab tribe of the same name that still inhabit the vicinity. A short distance east of this castle there is a very ancient ruin, surrounded by a thick grove of venerable oaks. There are also ruins west of Banias, consisting of columns, capitals, and foundations of buildings, together with canals that formerly conveyed the water of the brook, now crossed by a stone bridge. Above the fountain are Greek inscriptions in the rock, confirming the testimony of Josephus that Agrippa adorned Banias with royal liberality, and also sustaining the ancient statements that the fountain was held sacred to Pan (*Biblioth. Sacra*, 1846, p. 194). See Reland, *Palæst.* p. 918 sq.; Eckhel, *Doctr. Num.* iii, 339 sq.; Burckhardt, *Syria*, p. 37 sq.; Buckingham, ii, 314 sq.; Thomson, *Land and Book*, i, 344 sq.; Schwarz, *Palest.* p. 144; *Mod. Traveller*, p. 327 sq., Am. ed.: Raumer, *Paläst.* p. 215; Wilson, *Lands of Bible*, ii, 175 sq.; Porter, *Damascus*, i, 307 sq.

Cæsarius, St., of Arles, was born in 469 at Chalons-sur-Saône. He early developed monkish tendencies, and privately withdrew from his parents to the monastery of Lerins, where he was appointed to the office of cellarer. Afterward, falling ill from extreme asceticism, he was obliged to remove to Arles, and was beloved by Eonius the bishop, whom, in 502, he succeeded in the see of Arles. He died in 542, leaving many homilies, containing evidence of much piety combined with great superstition. A volume of them was edited by Stephen Baluze (Paris, 1669, 8vo). The others are given in the *Biblioth. Patrum*, viii, 819, 860, and xxvii, 324. His *Regula Monachorum* (contained in Holstenii *Codex Regul. Monast.* Rome, 1661) was adopted by many convents, and often used by the founders of orders. Monks and nuns of St. Cæsarius existed until the rule of Benedict was generally adopted. A graphic sketch of his life and labors is given by Neander, *Light in Dark Places*, p. 50.—Mosheim, *Ch. Hist.* i, 164, 166; Neander, *Ch. Hist.* ii, 261, 304, 650; Cave, *Hist. Lit.* anno 502.

Cæsarius of Heisterbach, a preacher and historian of note, in 1199 became a Cistercian monk in the monastery of Heisterbach, in the diocese of Cologne. He became eventually prior of the convent of the Valley of St. Peter, near Bonn. He lived until the year 1227, but when he died is unknown. His writings are, 1. *De miraculis et visionibus sui temporis* (chiefly in Germany, Cologne, 1591, 8vo); the first edition is without name of place or date:—2. *Vita S. Engelberti archiep. Colon.* (Cologne, 1633, and in Surius, November 7th):—3. *Homilia*, edited under the title of *Fasciculi Moralitatis*, by Coppenstein (Cologne, 1615):—4. *Catalogus Episcoporum Coloniensium*, published, with a continuation by another author, in vol. ii of the *Fontes Rerum German.* (1845):—5. An inedited *Vita S. Elizabethæ* is preserved among the manuscripts of the library of Brussels. Many of his sermons are highly praised for their evangelical tone, as well as for their eloquence. His *De Miraculis* affords a graphic picture of the state of his times. See Kauffmann, *Cæsarius v. Heisterbach* (Köln, 1850); Cave, *Hist. Lit.* anno 1225; Herzog, *Real-Encyklop.* ii, 490.

Cæsarius of Nazianzus, a younger brother of Gregory Nazianzen, was educated first at Alexandria, whence he proceeded to Constantinople, where he obtained high honors, resisted the attempts of the Emperor Julian to win him from the faith, and died under Valens in 368. He was distinguished for his proficiency in physics and mathematics. Gregory delivered his funeral sermon (*Oratio funebris in laudem Cæsarii fratris*, Or. viii), in which his piety and devotion are lauded. According to Suidas, he wrote *contra Gentes*, and four Dialogues are given as his in the Latin editions of St. Gregory and in the *Bibliothecæ Patrum.*—Ullmann, *Life of Gregory*, p. 132; Cave, s. a. 362.

Cæsennius. See Pætus.

Caffraria. See Kaffres.

Cage (כְּלוּב, *kelub'*, φυλακή). Bird-cages are named in Jer. v, 27; Rev. xviii, 2; and are perhaps implied in Job xli, v, where "playing with a bird" is

mentioned. See Bird. In the first of these passages the Sept. renders it by παγίς, a *snare*, implying that it was used for holding decoys with which to entrap other birds until the cage was full—an idea which the derivation of the Heb. word confirms (from כָּלַב, to *clasp* together by the shutting of the valves or trap). This interpretation is therefore better than that of the margin, "coop," or that of the Talmud, "a place of fattening," implying that it was used for holding wild or tame fowls until they became fit for the table. The same article is referred to in Ecclus. xi, 30, under the term κάρταλλος, which is elsewhere used of a tapering basket. See Fowling. In Rev. xviii, 2, the Greek term is φυλακή, meaning a prison or restricted habitation rather than a cage. This just suffices to show that the ancient Israelites kept birds in cages; but we have no farther information on the subject, nor any allusions to the singing of birds so kept. The cages were probably of the same forms which we still observe in the East, and which are shown in the annexed engraving. It is remarkable that there is no

Modern Oriental Wicker Bird-cages.

appearance of bird-cages in any of the domestic scenes which are portrayed on the mural tablets of the Egyptians. In Amos viii, 12, the same word *kelub'* denotes a fruit-basket, so called, doubtless, from its resemblance to a cage. See Basket.

Caians (I.), a name given by Irenæus, Epiphanius, and Theodoret to a sect of Ophites, whom modern writers call more correctly Cainites (q. v.). (II.) A sect mentioned by Tertullian, which rejected the doctrine of baptism. It is doubtful whether this sect is identical with the preceding. Tertullian mentions a certain Quintilla as the founder, and some have concluded from this that the sect is identical with the Quintillians (q. v.).

Cai'aphas (Καϊάφας, perhaps from the Chald. קַיָּפָא, *depression*), called by Josephus (*Ant.* xviii, 2, 2) *Joseph Caiaphas* (Ἰώσηπος, ὁ καὶ Καϊάφας), was high-priest of the Jews in the reign of Tiberius Cæsar, at the beginning of our Lord's public ministry (Luke iii, 2), A.D. 25, and also at the time of his condemnation and crucifixion (Matt. xxvi, 3, 57; John xi, 49; xviii, 13, 14, 24, 28; Acts iv, 6), A.D. 29. The Procurator Valerius Gratus, shortly before his leaving the province (A.D. 25), appointed him to the dignity, which was before held by Simon ben-Camith. He held it during the whole procuratorship of Pontius Pilate, but soon after his removal from that office was deposed by the Proconsul Vitellius (A.D. 36), and succeeded by Jonathan, son of Ananus (Joseph. *Ant.* xviii, 4, 3). Some in the ancient Church confounded him with the historian Josephus, and believed him to have become a convert to Christianity (Assemani, *Biblioth. Orient.* ii, 165). His wife was the daughter of Annas, or Ananus, who had formerly been high-priest, and who still possessed great influence and control in sacerdotal matters, several of his family successively holding the high-priesthood. The names of Annas and Caiaphas are coupled by Luke, "Annas and Caiaphas being the high-priests;" and this has given occasion to no small amount of discussion. Some maintain that Annas and Caiaphas then discharged the functions of the high-priesthood by turns; but this is not reconcilable with the statement of Josephus. Others think that Caiaphas is *called* high-priest, because he then actually exercised the functions of the office, and that Annas is so called because he had formerly filled the situation. But it does not thus appear why, of those who held the high-priesthood before Caiaphas, Annas in particular should be named, and not Ishmael, Eliazer, or Simon, who had all served the office more recently than Annas. Hence Kuinöl and others consider it as the more probable opinion that Caiaphas was the high-priest, but that Annas was his vicar or deputy, called in the Hebrew סְגָן, *sagan*. Nor can that office be thought unworthy of a man who had filled the pontifical office, since the dignity of sagan was also great. Thus, for instance, on urgent occasions he might even enter the Holy of Holies (Lightfoot, *Hor. Heb.* ad Luc. iii, 2). Nor ought it to seem strange or unusual that the vicar of a high-priest should be called by that name. For if, as it appears, those who had once held the office were after by courtesy called high-priests, with greater justice might Annas, who was both a pontifical person and high-priest's vicar, be so called. In fact, the very appellation of high-priest is given to a sagan by Josephus (*Ant.* xvii, 6, 4). (See the commentators on Luke iii, 2, particularly Hammond, Lightfoot, Kuinöl, and Bloomfield.) See Annas. Caiaphas belonged to the sect of the Sadducees (Acts v, 17). (See Hecht, *De Sadducæismo Caiaphæ,* Bud. 1718.) See High-priest.

The wonderful miracle of raising Lazarus from the dead convinced many of the Jews that Christ was sent from God; and the chief priests and the Pharisees, alarmed at the increase of his followers, summoned a council, and pretended that their liberties were in danger; that the Romans would become jealous of them, and that their destruction was inevitable if something were not done at once to check his progress. Caiaphas was a member of the council, and expressed his decided opinion in favor of putting Jesus to death, as the only way of saving the nation from the evils which his success would bring upon them. His language was, "Ye know nothing at all; nor consider that it is expedient for us that one man should die for the people, and that the whole nation perish not" (John xi, 49). This counsel was wicked and unjust in the highest degree; but as there was no offence charged, it seemed the only plausible excuse for putting Christ to death. The high-priest's language on this occasion was prophetic, though he did not intend it so. The evangelist, in giving an account of this extraordinary occurrence, enlarges on the prophetic language of the high-priest, and shows the extent and blessedness of the dispensation of mercy through Jesus Christ. Nothing of this, however, was in the mind of the cruel and bigoted high-priest. After Christ was arrested, he was first taken before Annas, who sent him to his son-in-law Caiaphas, who probably lived in the same house; he was then arraigned before Caiaphas, and an effort was made to produce false testimony sufficient for his condemnation. This expedient failed; for though two persons appeared to testify, they did not agree, and at last Caiaphas put our Saviour himself upon oath that he should say whether he was indeed the Christ, the Son of God, or not. The answer was, of course, in the affirmative (q. v.), and was accompanied with a declaration of his Divine power and majesty. The high-priest pretended to be greatly grieved at what he considered the blasphemy (q. v.) of our Saviour's pretensions, and forthwith appealed to his enraged enemies to say if this was not enough. They answered at once that he deserved to die, and then, in the very presence of Caiaphas, and without any restraint from him, they fell upon their guiltless victim with insults and injuries. As Caiaphas had no power to inflict the punishment of death, Christ was taken from him to Pilate, the Roman governor, that his execution might be duly ordered (Matt. xxvi, 3, 57; John xviii, 13, 28). The bigoted fury of Caiaphas exhibited itself also against the first efforts of the apostles (Acts iv, 6).

Treatises more or less general on the character and conduct of Caiaphas in the above transaction have

been written in Latin by Baumgarten-Crusius (*Opusc.* p. 149 sq.), Hase (Brem. 1703, also in Iken's *Thesaur.* ii, 549 sq.), Hecht (Buding. 1719), Haufen (Viteb. 1713), Hoder (Upsal, 1771), Hofmann (in Menthenii *Thes.* ii, 216-222), Lungershausen (Jen. 1695), Saltzmann (Argent. 1742), Scharbau (Lubec, 1715), Schickendanz (Fcft. and V. 1772), Weber (Viteb. 1807), Seltner (Altdorf, 1721); in French by Dupin (Paris, 1829). See also Evans, *Script. Biog.* ii, 257.

Caiet (or **Cayet**), Pierre Victor Palma, was born at Montrichard, in Touraine, in 1525. He became a Protestant under the instructions of Peter Ramus, at Paris; afterward studied theology at Geneva, and about 1582 was a minister in Poitou. Catharine of Bourbon made him her chaplain, and brought him to Paris. Here, under the influence of cardinal Duperron, he abjured Protestantism, Nov. 9, 1595, became professor of Hebrew and Oriental languages in the college of Navarre, and died March 10, 1610. He left many controversial works, on the motives which led to his conversion; on the Eucharist; on the Mass; on the Church and the Apostolical Succession, etc. His best known works are his *Chronologie Septénaire* and *Novennaire*, 1598–1604 (Paris, 1605, 8vo).—Hoefer, *Nouv. Biog. Gén.* ix, 309.

Cain (Heb. *Ka'yin*, קַיִן, a *lance* [but see below]), the name of a man and of a city. See Kenite; Tubal-Cain.

1. (Sept. and N. T. Κάϊν. The root seems to be קוּן, to *beat*, perhaps with allusion to the murder; the context, however, ver. 1, makes this = קָנָה, to *create*, *obtain*; others, as Eusebius and Chrysostom, derive it from some root signifying *envy*; Von Bohlen, *Introd. to Gen.* ii, 85, seeks it in the Arabic *kayn*, a *smith*, from the arts introduced by the Cainites; Josephus Græcizes it, Κάϊς, -ϊος, *Ant.* i, 2, 2.) The first-born (B.C. apparently cir. 4170) of the human race, and likewise the first murderer and fratricide, B.C. cir. 4043. His history is detailed in Gen. chap. iv; the facts there given are in brief these: He was the eldest son of Adam and Eve; he followed the business of agriculture; in a fit of jealousy, roused by the rejection of his own sacrifice and the acceptance of Abel's, he committed the crime of murder, for which he was expelled from the vicinity of Eden, and led the life of an exile; he settled in the land of Nod, and built a city, which he named after his son Enoch; his descendants are enumerated, together with the inventions for which they were remarkable. Occasional references to Cain are made in the N. T. (Heb. xi, 4; 1 John iii, 12; Jude 11).

Among all the instances of crime, none impress the mind with a stronger feeling of horror than that of Cain. It is not, however, clear that he had fully premeditated taking the *life* of his brother, if, indeed, he was aware by what a slight accident death would ensue; for this was the first instance of human mortality. But it is certain that he had resolved upon some desperate outrage upon his brother's person, and he deliberately took occasion to perpetrate it. Abel, as most think, brought two offerings, the one an oblation, the other a sacrifice. Cain brought but the former—a mere acknowledgment, it is supposed, of the sovereignty of God—neglecting to offer the sacrifice, which would have been a confession of fallen nature, and, typically, an atonement for sin. It was not, therefore, the mere difference of feeling with which the two offerings were brought which constituted the virtue of the one or the guilt of the other brother. "The malignity of his temper showed itself in his unwillingness to ask his brother for a victim from among his herd. He offered before God an unlawful sacrifice," because a bloodless one, Heb. ix, 22 (Jarvis, *Church of the Redeemed*, p. 14). The circumstances connected with this offence are related in a brief but graphic manner in the Heb. text, the force of which is not well brought out in the Auth. Vers. (Gen. iv, 2–16). Abel, being a herdsman, naturally brought at the end of the week (for the Sabbath was already a well-known institution) an offering of the first-born and fattest of his flocks, while Cain, as a husbandman (hence the greater severity of the curse which blasted his professional hopes), presented an oblation of vegetable productions. The undevout temper and wicked nature of Cain are sufficiently evinced by his resentment against the Almighty, as if partial to his brother (see below). The Divine Being condescends to expostulate with him on his unreasonable behavior, and to warn him of the danger of cherishing the jealousy which he seems to have already entertained against Abel: "If thou reformest, there is forgiveness [with me for thy past offences]; but if not, [then beware, for] sin crouches at thy door [like a wild beast ready to seize thee on the first opportunity], and against thee is its design; but do thou subdue it [i. e. thy evil disposition]." Instead of heeding this advice, however, the ill-natured man, taking the first occasion to narrate the circumstance to his brother (probably in an upbraiding manner), fell into the very snare of Satan against which he had been warned; his feelings became again excited, as they two were alone conversing in the open field, and, there being no one near to witness or avert the consequences, he suddenly turned against his brother, and by an angry blow (probably with some agricultural implement, in the formation of which he had doubtless already begun to exercise the mechanical ingenuity for which his descendants became famous) he laid him dead upon the ground. Instead of the penitence which the sight of his brother's blood ought to have inspired in his horror-stricken soul, the craven murderer insolently demands of the all-seeing God, when questioned as to his crime, "I know nothing about the matter; am I my brother's keeper?" But when conviction is fastened upon him, and the penalty announced, with the despairing but still impenitent remorse of Judas, the guilty wretch exclaims, "My iniquity is too great for forgiveness! (גָּדוֹל עֲוֹנִי מִנְּשׂוֹא; Sept. μείζων ἡ αἰτία μοῦ τοῦ ἀφεθῆναί με·) for thou hast utterly driven me out this day from the face of the ground [of this pleasant region]," and I shall be in danger of starvation, and even of perishing by the hand of every stranger whom I may meet. (See Kitto's *Daily Bible Illust.* in loc.; Fechtii *Hist. Abelis et Caini*, Rost. 1704.)

The punishment which attended the crime admitted of no escape, scarcely of any conceivable alleviation. "He lost the privileges of primogeniture, was deprived of the priesthood, banished from 'the presence' of the divine glory between the cherubim, shut out from the hopes of mercy, and, with his descendants, delivered over unprotected to the assaults of the great adversary" (Jarvis, *Church of the Redeemed*, p. 14). Cursed from the earth himself, the earth was doomed to a double barrenness wherever the offender should set his foot. Physical want and hardship, therefore, were among the first of the miseries heaped upon his head. Next came those of mind and conscience: "The voice of thy brother's blood crieth unto me from the ground." Nor did any retreat remain to him from the terrors of his own soul or those of Divine vengeance: "From thy face shall I be hid," was his agonizing and hopeless cry. The statement that "Cain went out from the presence of the Lord" represents him as abiding, till thus exiled, in some favored spot where the Almighty still, by visible signs, manifested himself to his fallen creatures. The expression of dread lest, as he wandered over the face of the earth, he might be recognised and slain, has an awful sound when falling from the mouth of a murderer. But he was to be protected against the wrath of his fellow-men; and of this God gave him assurance, not, says Shuckford, by setting a mark upon him, which is a false translation, but by appointing a sign or token which he himself might understand as a proof that he should not perish by the hand of another, as Abel had perished by his. This

sign was probably no other than the Divine denunciation uttered at the time against any one who should venture to do him injury, and which, being well known, would prove a sufficient *caveat*. As such it is referred to by his descendant Lamech (Gen. iv, 24). The passage may therefore be rendered, "Thus Jehovah appointed a token for Cain, so that no one who met him should slay him." What was the Divine purpose in affording him this protection it is difficult to determine. That it was not with the intention of prolonging his misery may be conjectured from the fact that it was granted in answer to his own piteous cry for mercy. Some writers have spoken of the possibility of his becoming a true penitent, and of his having at length obtained the Divine forgiveness (Ortlob, *Cainus non desperans*, Lips. 1706).

It may be worthy of observation that especial mention is made of the fact that Cain, having traveled into the land of Nod, there built a city; and further, that his descendants were chiefly celebrated for their skill in the arts of social life. In both accounts may probably be discovered the powerful struggles with which Cain strove to overcome the difficulties that attended his position as one to whom the tillage of the ground was virtually prohibited. The following points also are deserving of notice.

(1.) The position of the "land of Nod." The name itself tells us little; it means *flight* or *exile*, in reference to ver. 12, where a cognate word is used: Von Bohlen's attempt to identify it with India, as though the Hebrew name *Hind* (הנּד) had been erroneously read *kan-Nod*, is too far fetched; the only indication of its position is the indefinite notice that it was "east of Eden" (ver. 16), which, of course, throws us back to the previous settlement of the position of Eden itself. Knobel (*Comm.* in loc.), who adopts an ethnological interpretation of the history of Cain's descendants, would identify Nod with the whole of Eastern Asia, and even hints at a possible connection between the names Cain and China. It seems vain to attempt the identification of Nod with any special locality; the direction "east of Eden" may have reference to the previous notice in iii, 24, and may indicate that the land was opposite to (Sept. *κατέναντι*) the entrance, which was barred against his return. It is not improbable that the *east* was further used to mark the direction which the Cainites took, as distinct from the Sethites, who would, according to Hebrew notions, be settled toward the west. Similar observations must be made in regard to the city Enoch, which has been identified with the names of the Heniochi, a tribe in Caucasus (so Hasse), Anuchta, a town in Susiana (Huetius), Chanoge, an ancient town in India (Von Bohlen), and Iconium, as the place where the deified King Annacos was honored (Ewald): all such attempts at identification must be subordinated to the previous settlement of the position of Eden and Nod. See NOD.

(2.) The "mark set upon Cain" has given rise to various speculations, many of which would never have been broached if the Hebrew text had been consulted: the words probably mean that Jehovah *gave a sign to* Cain, very much as signs were afterward given to Noah (Gen. ix, 13), Moses (Exod. iii, 2, 12), Elijah (1 Kings xix, 11), and Hezekiah (Isa. xxxviii, 7, 8). Whether the sign was perceptible to Cain alone, and given to him once for all, in token that no man should kill him, or whether it was one that was perceptible to others, and designed as a precaution to them, as is implied in the A. V. is uncertain; the nature of the sign itself is still more uncertain (but see above). (See Kraft, *De Signo Caini*, in his *Obss. Sacr.* i, 3.) See MARK.

(3.) The narrative implies the existence of a considerable population in Cain's time; for he fears lest he should be murdered in return for the murder he had committed (ver. 14). Josephus (*Ant.* i, 2, 1) explains his fears as arising, not from men, but from wild beasts; but such an explanation is wholly unnecessary. The family of Adam may have largely increased before the birth of Seth, as is indeed implied in the notice of Cain's wife (ver. 17), and the mere circumstance that none of the other children are noticed by name may be explained on the ground that their lives furnished nothing worthy of notice. These neighbors must, of course, have been the relatives of Cain, who had now branched out into a considerable community, and as his banishment would necessarily estrange him from them, he entertained the natural apprehension lest in the course of his remaining lifetime they might even become his enemies, especially as they would regard him as a murderer. See BLOOD-REVENGE. His wife must evidently have been one of his sisters (comp. "sons and daughters," Gen. v, 4). Tradition calls her *Save* (Epiphan. *Hær.* xxix, 6) or *Azura* (Malalas, p. 2); the Arabs call Cain himself *Kabil* by alliteration with the name of his brother (D'Herbelot, *Bibl. Or.* s. v. Cabil). See ADAM.

(4.) The character of Cain deserves a fuller notice. He is described as a man of a morose, malicious, and revengeful temper; and that he presented his offering in this state of mind is implied in the rebuke contained in Gen. iv, 7, which may be rendered thus: "If thou doest well (or, as the Sept. has it, *ἐὰν ὀρθῶς προσενέγκῃς*), is there not an elevation (שְׂאֵת) [of the countenance] (i. e. perhaps *cheerfulness* and *happiness*)? but if thou doest not well [*there is a sinking of the countenance*], sin lurketh (as a wild beast) at the door, and to thee is its desire; but thou shalt rule over it." (So Gesenius and others; but see above.) The narrative implies therefore that his offering was rejected on account of the temper in which it was brought (Sticht, *De colloquio Dei cum Caino*, Alt. 1766). See ABEL.

(5.) The descendants of Cain are enumerated to the sixth generation. Some commentators (Knobel, Von Bohlen) have traced an artificial structure in this genealogy, by which it is rendered parallel to that of the Sethites; e. g. there is a decade of names in each, commencing with Adam and ending with Jabal and Noah, the deficiency of generations in the Cainites being supplied by the addition of the two younger sons of Lamech to the list; and there is a considerable similarity in the names, each list containing a Lamech and an Enoch, while Cain in the one = Cain-an in the other, Methusael = Methuselah, and Mehujael = Mahalaleel; the inference from this comparison being that the one was framed out of the other. It must be observed, however, that the differences far exceed the points of similarity; that the order of the names, the number of generations, and even the meanings of those which are noticed as similar in sound, are sufficiently distinct to remove the impression of artificial construction. (See Bochart, *Hieroz.* i, 537.) See PATRIARCH.

(6.) The social condition of the Cainites is prominently brought forward in the history. Cain himself was an agriculturist, Abel a shepherd: the successors of the latter are represented by the Sethites and the progenitors of the Hebrew race in later times, among whom a pastoral life was always held in high honor from the simplicity and devotional habits which it engendered: the successors of the former are depicted as the reverse in all these respects. Cain founded the first city; Lamech instituted polygamy; Jabal introduced the nomadic life; Jubal invented musical instruments; Tubal-cain was the first smith; Lamech's language takes the stately tone of poetry; and even the names of the women, Naamah (*pleasant*), Zillah (*shadow*), Adah (*ornamental*), seem to bespeak an advanced state of civilization. But, along with this, there was violence and godlessness; Cain and Lamech furnish proof of the former, while the concluding words of Gen. iv, 26, imply the latter. See ANTEDILUVIANS.

(7.) The contrast established between the Cainites and the Sethites appears to have reference solely to the social and religious condition of the two races. On the one side there is pictured a high state of civiliza-

tion, unsanctified by religion, and productive of luxury and violence; on the other side, a state of simplicity which afforded no material for history beyond the declaration, "Then began men to call upon the name of the Lord." The historian thus accounts for the progressive degeneration of the religious condition of man, the evil gaining a predominance over the good by its alliance with worldly power and knowledge, and producing the state of things which necessitated the flood. See DELUGE.

(8.) Another motive may be assigned for the introduction of this portion of sacred history. All ancient nations have loved to trace up the invention of the arts to some certain author, and, generally speaking, these authors have been regarded as objects of divine worship. Among the Greeks Apollo was held to be the inventor of music, Vulcan of the working of metals, Triptolemus (see Hygin. 277) of the plough. A similar feeling of curiosity prevailed among the Hebrews; and hence the historian has recorded the names of those to whom the invention of the arts was traditionally assigned, obviating at the same time the dangerous error into which other nations had fallen, and reducing the estimate of their value by the position which their inventors held. See ART; ARTIFICER.

Additional treatises: Stockmann, *De Caino præmonito* (Jen. 1792); Danz, *id.* (ib. 1681, 1732); Bosseck, *De sacrificiis Caini et Habel* (Lips. 1781); Niemeyer, *Charakt.* ii, 57 sq.; Buttmann, *Mythol.* i. 164 sq.; Otho, *Lex. Rab.* p. 109 sq.; Eisenmenger, *Entd. Judenth.* i, 462, 471, 832, 836; Hottinger, *Hist. Orientalis*, p. 25; *Hamb. verm. Biblioth.* ii, 945 sq.; Sack, in the *Brem. u. Verd. Biblioth.* I, iii, 61; Rosenmüller, *Scholia*, in loc. Gen.; Philo, *Opp.* i, 185; Whately, *Prototypes*, p. 15; Dupin, *Nouv. Bibl.* p. 4; Kitto, *Daily Bible Illust.* in loc.; Evans, *Script. Biog.* ii, 1 sq.; Hunter, *Sac. Biog.* p. 17 sq. See MURDER.

2. (Heb., with the article, *hak-Ka'yin*, הַקַּיִן, = "the lance;" but may be derived from קֵן, *ken*, "a nest," possibly in allusion to its position; Sept. *Ζακαναΐμ* v. r. *Ζανωακείμ*, by including the name preceding; Vulg. *Accain.*) One of the cities in the low country (*Shefelah*) of Judah, named with Zanoah and Gibeah (Josh. xv, 56); apparently the modern village *Yukin*, a short distance south-east of Hebron (Van de Velde, *Memoir*, p. 300), now a Mohammedan station, said to be the place where Lot stopped after his flight from Sodom (Robinson, *Researches*, ii, 190).

Cai'nan (Heb. *Keynan'*, קֵינָן, derivation ambiguous, as in the case of "Cain" [q. v.], and signifying either *possessor* [so Fürst] or *forgeman* [so Gesenius]; Sept. Καϊνᾶν, but Καϊνάν in Chron. and N. T.; Josephus Καϊνᾶς, *Ant.* i, 3, 4), the name of one or two men.

1. The fourth antediluvian patriarch, being the (oldest) son of Enos (who was 90 years of age at his birth), B.C. 3846. He was himself 70 years old at the birth of his (first) son Mahalaleel, B.C. 3776, after which he lived 840 years, and died B.C. 3031, aged 910 (Gen. v, 9-14). See LONGEVITY. The rabbinical tradition was that he first introduced idol-worship and astrology—a tradition which the Hellenists transferred to the postdiluvian Cainan. Thus Ephraem-Syrus asserts that the Chaldees in the time of Terah and Abram worshipped a graven god called Cainan; and Gregory Bar-Hebræus, another Syriac author, also applies it to the son of Arphaxad (Mill, *Vindic. of Genealogies*, p. 150). The origin of the tradition is not known; but it may probably have been suggested by the meaning of the supposed root in Arabic and the Aramæan dialects, just as another signification of the same root seems to have suggested the tradition that the daughters of Cain were the first who made and *sang* to musical instruments (Gesenius, *Thesaur.* s. v. קִין). His name is Anglicized "Kenan" in the Auth. Vers. at 1 Chron. i, 2.

2. The son of Arphaxad, and father of Sala, according to Luke iii, 35, 36, and usually called the second Cainan. He is also found in the present copies of the Sept. in the genealogy of Shem, Gen. x, 24; xi, 12 and 13 (where his history is given in full like the rest: "And Arphaxad lived 135 years, and begat Cainan. And Arphaxad lived after he begat Cainan 400 years, and begat sons and daughters. And he died. And Cainan lived 130 years, and begat Salah. And Cainan lived after he begat Salah 330 years, and begat sons and daughters. And he died"), and 1 Chron. i, 18 (though he is omitted in 1 Chron. i, 24), but is nowhere named in the Hebrew text, nor in any of the versions made from it, as the Samaritan, Chaldee, Syriac, Vulgate, etc. As the addition of his generation of 130 years in the series of names is of great chronological importance, and is one of the circumstances which render the Septuagint computation of time longer than the Hebrew, this matter has engaged much attention, and has led to great discussion among chronologers. See CHRONOLOGY. Some have suggested that the Jews purposely excluded the second Cainan from their copies, with the design of rendering the Septuagint and Luke suspected; others that Moses omitted Cainan, being desirous of reckoning ten generations only from Adam to Noah, and from Noah to Abraham. Some suppose that Arphaxad was father of Cainan and Salah—of Salah naturally, and of Cainan legally; while others allege that Cainan and Salah were the same person under two names. It is believed by many, however, that the name of this second Cainan was not originally in the text even of Luke, but is an addition of inadvertent transcribers, who, remarking it in some copies of the Septuagint, added it (Kuinöl, *ad Luc.* iii, 36) Hales, though, as an advocate of the longer chronology, predisposed to its retention, decides that we are fully warranted to conclude that the second Cainan was not originally in the Hebrew text, at least, nor in the Septuagint and other versions derived from it (*Chronology*, i, 291). Some of the grounds for this conclusion are, 1. That the Hebrew and Samaritan, with all the ancient versions and targums, concur in the omission; 2. That the Septuagint is not consistent with itself; for in the repetition of genealogies in 1 Chron i, 24, it omits Cainan and agrees with the Hebrew text; 3. That the second Cainan is silently rejected by Josephus, by Philo, by John of Antioch, and by Eusebius; and that, while Origen retained the name itself, he, in his copy of the Septuagint, marked it with an obelisk as an unauthorized reading. It certainly was not contained in any copies of the Bible which Berosus, Eupolemus, Polyhistor, Theophilus of Antioch, Julius Africanus, or even Jerome, had access to. Moreover, it seems that the intrusion of the name even into the Sept. is comparatively modern, since Augustine is the first writer who mentions it as found in the O. T. at all. Demetrius (B.C. 170), quoted by Eusebius (*Præp. Evang.* ix, 21), reckons 1360 years from the birth of Shem to Jacob's going down to Egypt, which *seems* to include the 130 years of Cainan. But in the great fluctuation of the numbers in the ages of the patriarchs, no reliance can be placed on this argument. Nor have we any certainty that the figures have not been altered in the modern copies of Eusebius, to make them agree with the computation of the altered copies of the Sept. 4. That the numbers indicating the longevity and paternity of this patriarch are evidently borrowed from those immediately adjoining, as is the name itself from that of the antediluvian patriarch. See Heidegger, *Hist. Patriarch.* ii, 8-15; Bochart, *Phaleg*, lib. ii, cap. 13; Mill's *Vindic. of our Lord's Geneal.* p. 143 sq; Rus, *Harmon. Evang.* i, 364 sq.; Michaelis, *De Chronolog. Mosis post diluv.* (in the *Commentat. Soc. Gott.* 1763 sq.; translated in the *Am. Bib. Repos.* July, 1841. p. 114 sq.); Vater, *Comment. zum Pent.* i, 174 sq. See GENEALOGY (OF CHRIST).

Cainites, a sect of Gnostics that sprung up about the year 130, and is classed with the Ophites (q. v.)

or Serpentinians. They held that *Sophia* (Wisdom) found means to preserve in every age in this world, which the Demiurge had created, a race bearing within them a spiritual nature similar to her own, and intent upon opposing the tyranny of the Demiurge. The Cainites regarded Cain as the chief of this race. They honored Cain, and the evil characters of Scripture generally, on the ground that, in proportion to the hatred such characters evinced of the laws of the God of this world (the Demiurge), the more worthily did they act as the sons of *Sophia*, whose chief work is to destroy the kingdom of the Demiurge. For the same reason, they honored Korah, Dathan, and Abiram, as well as the inhabitants of Sodom, and Judas Iscariot, whom they regarded as procuring the death of Christ from the purest motives; for he knew that this was the only possible way of effecting the destruction of the Demiurge's kingdom. Hippolytus mentions the Cainites in his *Philosophoumena*, viii, 12.—Neander, *Ch. Hist.* i, 448; August. *De Hæres.* cap. xviii; Tertull. *De Præscript.* cap. xlvii; Lardner, *Works*, viii, 560.

Caius (of the New Test.). See GAIUS.

Caius (emperor of Rome). See CALIGULA.

Caius or **Gaius**, a presbyter of the Church of Rome, who flourished about 210, in the time of Zephyrinus and Callistus. Photius calls him τῶν ἐθνων ἐπίσκοπος, a designation the meaning of which is not clear. When at Rome, he held a celebrated disputation with Proclus, the head of a sect of Montanists, which he afterward reduced to writing in the form of dialogues. Eusebius quotes fragments of this work in lib. ii, cap. 25, and also in lib. iii, cap. 28, and lib. vi, cap. 20. Caius also wrote a book called *The Labyrinth*, and another against Artemon, unless the former be the same with the work attributed to Origen, as Cave supposes. Eusebius gives an extract from the *Parvus Labyrinthus* against Artemon and Theodotus, lib. v, cap. 28. Photius also attributes to this Caius a Treatise on the Universe, but both this and the "Labyrinth" are now attributed to Hippolytus. See Bunsen, *Hippolytus and his Times;* also *Origen or Hippolytus*, in the *Meth. Quarterly Review*, 1851, p. 646; Landon, s. v. See HIPPOLYTUS.

Caius or **Gaius**, a Dalmatian, elected bishop of Rome in 283, and is said to have suffered martyrdom under Diocletian, April 21, 296. His epistle was edited, with notes, etc., by Cæs. Becillus, a priest of the oratory of Urbino, and subjoined to the Acts of his Martyrdom, published at Rome in 1628.

Caius, JOHN (*Kaye* or *Key*, Latinized into *Caius*), M.D., was born at Norwich Oct. 6, 1510, and became successively first physician to Edward VI, Mary, and Elizabeth. He died July 29, 1573. He founded the college which bears his name at Cambridge for twenty-three students. He was a good classical scholar, and wrote many treatises on subjects connected with medicine and natural history. He published also a treatise on the antiquity of the University of Cambridge (which he states was founded by *one Cantaber*, 394 *years before Christ*), and another on the pronunciation of Greek and Latin. His tomb still remains in Caius College, with only this inscription, "Fui Caius."

Cajetan (GAETANO TOMMASO DI VIO), cardinal, surnamed from Gaëta, where he was born, Feb. 20, 1469 (others say July 25, 1470). His proper name was Jacob, but he assumed that of Thomas in honor of Thomas Aquinas. At fifteen he became a Dominican, and in 1508 he was made general of his order. In 1517 Leo X made him cardinal, and also his legate in Germany, the principal object of his mission being to bring back Luther to the obedience of the Holy See before his separation was finally completed. Cajetan fulfilled his mission in a haughty and imperious manner, and nothing came of it. In 1519 he was appointed to the see of Gaëta, after which he was employed in other missions, and died at Rome in 1534. He published a *Version of the O. T.* (*Libr. Vet. Test.*) (Lyons, 1639, 5 vols. fol.):—*In Summam Thomæ Aquinatis Comment.*:—*Opuscula* (among which is his treatise on the authority of the pope, in which he gives vent to the extremest views of ultra-montanism, and which was refuted by order of the faculty of Paris):—*Tractatus de comparatione papæ et concilii* (Venice, 1531). His works are collected, and somewhat modified (Lyons, 1639, fol.).—Mosheim, *Ch. Hist.* iii, 23 *note;* Hoefer, *Nouv. Biog. Générale*, viii, 142; Horne, *Bibliog. Appendix*, pt. i, ch. i, sect. 4.

Cake (represented by several Heb. words; see below). The Hebrews used various sorts of cakes, which was the form usually given to Oriental bread (2 Sam. vi, 19; 1 Kings xvii, 12). See LOAF. They were leavened or unleavened. They also offered cakes in the Temple made of wheat or of barley, kneaded sometimes with oil and sometimes with honey. For the purposes of offering, these cakes were salted, but unleavened (Exod. xxix, 2; Lev. ii, 4). In Jer. vii, 18; xliv, 19, we read of the Hebrews kneading their dough "to make cakes to the queen of heaven" [see ASHTORETH], which appears to have been, from early times, an idolatrous practice, and was also the custom of the Greeks and Romans. The ancient Egyptians also made offerings of cakes to their deities. In Hosea vii, 8, Ephraim is called "a cake not turned." This figurative expression illustrates the mixture of truth and idolatry (Jews and Gentiles among the Ephraimites) by dough baked on one side only, and, therefore, neither dough nor bread. See BREAD.

1. *For secular Use.*—The ordinary (wheaten) bread of the Hebrews certainly had the shape of flat biscuits; and as this has been already sufficiently discussed under the article BAKE, we will here consider only those finer sorts, which appear to have been of more artificial manufacture. The terms for these are as follows:

(1.) *Ash-cakes*, עֻגּוֹת, *uggoth'*. See ASH-CAKE.

(2.) *Pancakes*, baked in oil in the מַרְחֶשֶׁת, *marche'sheth*, or *pot* (Lev. ii, 7; see Jarchi in Rosenmüller, ad loc.), perhaps like modern *dough-nuts*. See FRYING-PAN. Different are the לְבִיבוֹת, *lebiboth'* (2 Sam. xiii, 6–18; Sept. κολλυρίδες), cakes kneaded of dough (ver. 8), which, boiled in a deep pan, were emptied out from it tender, but not liquid (ver. 8, 9). The import of this last, from the etymology, is very uncertain (see Rödiger, *De interpret. Arab. libr. hist.* p. 94; Thenius on Sam. xiii, 6; Gesenius, *Thes.* p. 141). It was probably a kind of fancy cake, the making of which appears to have been a rare accomplishment, since Tamar was required to prepare it for Ammon in his pretended illness (2 Sam. xiii, 6).

(3.) *Hole-cakes*, חַלּוֹת, *challoth'* (2 Sam. vi, 19), which were mingled with oil (בְּלוּלוֹת בַּשֶּׁמֶן, see Bähr, *Symbol.* ii, 301), and baked in the oven (Lev. ii, 4).

(4.) *Wafers*, רְקִיקִים, *rekikim'* (Exod. xxix, 2; Lev. viii, 26; 1 Chron. xxiii, 29), made very thin (Gr. λάγανα), and spread with oil (מְשֻׁחִים בַּשֶּׁמֶן, Sept. διακεχαρισμένα ἐν ἐλαίῳ). See WAFER.

(5.) *Crackers*, the נִקֻּדִים, *nikkuddim'*, of 1 Kings xiv, 3, translated "cracknels" in the Authorized Version, an almost obsolete word, denoting a kind of crisp cake, q. d. "crumb-cake." The original would seem, by its etymology (if from נָקֹד, *speckled*, spotted, Gen. xxx, 32 sq.), to denote something spotted or sprinkled over, etc. Buxtorf (*Lex. Talm.* col. 1386) explains thus: "Little circles of bread like the half of an egg, *Terumoth*, c. 5;" and in another place (*Epit. rad. Hebr.* p. 544), "Also the crackers, 1 Kings xiv, 3, commonly called *biscuit*, received their name because they were formed in little *round* slices as if stamped out, or because they were punctured in some peculiar manner." It is, indeed, not improbable that they may have been

a sort of biscuit, or small and hard-baked cakes, calculated to keep (for a journey or some other purpose) by reason of their excessive hardness (or perhaps being *twice baked*, as the word *biscuit* implies). Not only are such hard cakes or biscuits still used in the East, but they are, like all biscuits, *punctured* to render them more hard, and sometimes, also, they are sprinkled with seeds, either of which circumstances sufficiently meets the conditions suggested by the etymology of the Hebrew word. The existence of such biscuits is further implied in Josh. ix, 5, 12, where the Gibeonites describe their bread as having become as *hard as biscuit* (not "mouldy," as in the Authorized Version) by reason of the length of their journey. See CRACKNEL.

(6.) *Honey-cakes*, צַפִּחִית בִּדְבַשׁ, *tsappichith' bid-bush'* (Exod. xvi, 31; Talm. דּוּבְשָׁנִין, Mishna, *Challa*, i, 4), such as are still much relished by the Arabs. See HONEY. Different from these were the *raisin-cakes*, אֲשִׁישֵׁי אֲנָבִים, *ashishey' anabim'* (Hos. iii, 1; Sept. πέμματα μετὰ σταφίδας, Authorized Version "flagons of wine"), probably a mass of dried grapes pressed into form; comp. the *lumps* ("cakes") *of figs*, דְּבֵלִים, *debelim'*, in 1 Sam. xxv, 18. See FIG. The term אֲשִׁישָׁה, *ashishah'* (as explained by the Targ. of Ps.-Jonathan at Exod. xvi, 31; also the Mishna, *Nedar.* vi, 10; see Gesen. *Thes.* i, 166 sq.), seems to denote the same kind of cakes as used for refreshment (Cant. ii, 5; 2 Sam. vi, 19; 1 Chron, xvi, 3). See FLAGON. A species of cake prepared with honey is thought (so Jerome) to be referred to in Ezek. xvi, 13 (see Rosenmüller, in loc.).

(7.) The *hashed fragments of the offering*, תֻּפִינֵי מִנְחַת פִּתִּים, *tuppiney' minchath' pittim'* (lit. *cookings of* the *offering of* [i. e. in] *pieces*, Auth. Ver. "baken pieces of the meat-offering," Lev. vi, 21, i. e. cooked and prepared like the meat-offering, and then broken up into pieces; comp. Lev. ii, 4 sq.; vii, 9), are probably cooked pieces that were again kneaded up with oil and baked (comp. Wansleb in Paulus, *Samml.* iii, 330; Bähr, *Symbol.* ii, 302). For this purpose use was made of a *frying-pan*, מַחֲבַת, *machabath'* (Lev. ii, 5, etc.), probably a flat iron plate (stew-pan or griddle), beneath which the fire was kindled (comp. Niebuhr, i, 234). See PAN.

(8.) The *thin cakes*, כַּוָּנִים, *kavvanim'* ("cakes," Jer. vii, 18; xliv, 19), a sort of wafer used in heathen offerings, are rendered in the Sept. by the Græcized term χαυῶνες, which is explained by Suidas and other ancient glossarists as signifying barley-cakes steeped in oil; compare the cakes and barley-meal used with sacrifices among the Greeks and Romans (see Smith's *Dict. of Class. Antiq.* s. v. Sacrificium). See QUEEN OF HEAVEN.

The only remaining Heb. words relating to the subject, or rendered "cake" in the Auth. Vers., are, מָעוֹג, *maōg'*, a *cake*, i. e. whole piece (q. d. "slice") of bread (1 Kings xvii, 12; in Psa. xxxv, 16, in the phrase לַעֲגֵי מָעוֹג, *cake-buffoons, scurræ placentæ*, "mockers in feasts," i. e. table-jesters); מַצָּה, *matstsah'* (Josh. v, 11; Judg. vi, 19, 20, 21; 1 Chron. xxiii, 29, etc.), *sweet* or unleavened bread, as usually rendered [see LEAVEN]; and צְלוּל, *tselul'*, or צְלִיל, *tselil'* (Judg. vii, 13), a *round cake* of barley-bread. The חֹרִי, *chori'*, of Gen. xl, 16 (where it only occurs in the expression סַלֵּי חֹרִי, Sept. κανᾶ χονδριτῶν, Vulg. *canistra farinæ*, Auth. Vers. "*white* baskets," marg. "baskets *full of holes*"), may signify either *white bread*, as made of fine flour (in the Mishna, *Edaioth*, iii, 10, חורי is a species of bread or cake like the Arab. *chumaurny*, white bread or flour), or it may refer to some peculiarity of the baskets merely. See BASKET. In the Mishna, *Challa*, xi, 4 sq., many other kinds of cake are referred to, but the import of the words there employed is very uncertain. On the Greek cakes, see especially Athen. xiv, 644 sq. See generally Rau, *Diss. de re cibari Hebræor.* (Tr. ad Rh. 1769). See FOOD.

2. *As sacrificial Offerings.*—The second chapter of Leviticus gives a sort of list of the different kinds of bread and cakes in use among the ancient Israelites, for the purpose of distinguishing the kinds which were from those which were not suitable for offerings. Of such as were fit for offerings, we find,

(1.) *Bread baked in ovens* (Lev. ii, 4); but this is limited to two sorts, which appear to be, first, the bread baked inside the vessels of stone, metal, or earthenware, as was customary. In this case the oven is half filled with small smooth pebbles, upon which, when heated and the fuel withdrawn, the dough is laid. Bread prepared in this mode is necessarily full of indentations or holes, from the pebbles on which it is baked. Second, the bread prepared by dropping with the hollow of the hand a thin layer of the almost liquid dough upon the outside of the same oven, and which, being baked dry the moment it touches the heated surface, forms a thin, wafer-like bread or biscuit. The first of these Moses appears to distinguish by the characteristic epithet of חַלּוֹת, *challoth'* (see above), *perforated*, or *full of holes* (Exod. xxix, 2; Lev. ii, 4; vii, 12; Num. vi, 15, etc.), and the other by the name of רְקִיקִים, *rekukim'*, *thin* cakes, being, if correctly identified, by much the thinnest of any bread used in the East. A cake of the former was offered as the first of the dough (Lev. viii, 26), and is mentioned in 2 Sam. vi, 19, with the addition of "bread"—*perforated bread.* Both sorts, when used for offerings, were to be unleavened (perhaps to secure their being prepared for the special purpose); and the first sort, namely, that which appears to have been baked inside the oven, was to be *mixed up* with oil, while the other (that baked outside the oven), which, from its thinness, could not possibly be thus treated, was to be only smeared with oil. The fresh olive oil, which was to be used for this purpose, imparts to the bread something of the flavor of butter, which last is usually of very indifferent quality in Eastern countries.

(2.) *Bread baked in a pan*—1st, that which, as is still usual, is baked in, or rather on, the *tajen.* This also, as an offering, was to be unleavened and mixed with oil. 2d. This, according to Lev. ii, 6, could be broken into pieces, and oil poured over it, forming a distinct kind of bread and offering. And, in fact, the thin biscuits baked on the *tajen*, as well as the other kinds of bread, thus broken up and remade into a kind of dough, form a kind of food or pastry in which the Orientals take much delight, and which makes a standing dish among the pastoral tribes. The ash-cake answering to the Hebrew עֻגָה, *uggah*, is the most frequently employed for this purpose. When it is baked, it is broken up into crumbs and rekneaded with water, to which is added, in the course of the operation, butter, oil, vinegar, or honey. Having thus again reduced it to a tough dough, the mass is broken into pieces, which are baked in smaller cakes and eaten as a dainty. The preparation for the Mosaical offering was more simple, but it serves to indicate the existence of such preparations among the ancient Israelites.

(3.) *Bread baked upon the hearth*—that is to say, baked upon the hearth-stone, or plate covering the fire-pit, which frequently answers the purpose of an oven. This also was to be mixed with oil (Lev. ii, 7).

As these various kinds of baked bread were allowed as offerings, there is no question that they were the best modes of preparing bread known to the Hebrews in the time of Moses; and as all the ingredients were such as Palestine abundantly produced, they were such offerings as even the poorest might without much difficulty procure. See SHEW-BREAD.

Ca'lah (Heb. *Ke'lach*, כֶּלַח, *vigorous* old age, as in Job v, 26; in pause *Ka'luch*, כָּלַח; Sept. Χαλάχ, Vulg. *Chale*), one of the most ancient cities of Assyria, whose foundation is ascribed either to Asshur or Nimrod (Gen. x, 11). The place has been thought identical with the *Chaluch* (חֲלַח, Sept. Ἀλαί) named elsewhere [see HALAH] (2 Kings xvii, 6; xviii, 11; 1 Chron. v, 26); but, on monumental evidence, the Rawlinsons (*Herod.* i, 368) regard the site of Calah as marked by the *Nimrûd* ruins, which have furnished so large a proportion of the Assyrian antiquities. The Talmud (*Yoma*, x) locates it on the Euphrates, near Borsippa (בּוֹרְסִיף). If at Nimrud, Calah must be considered to have been at one time (about B.C. 930-720) the capital of the empire. It was the residence of the warlike Sardanapalus and his successors down to the time of Sargon, who built a new capital, which he called by his own name, on the site occupied by the modern *Khorsabad*. This place still continued under the later kings to be a town of importance, and was especially favored by Esarhaddon, who built there one of the grandest of the Assyrian palaces. In later times Calah gave name to one of the chief districts of the country, which appears as *Calacine* (Καλακινή, Ptolem. vi, 1, 2), or *Calachène* (Καλαχηνη, Strabo, xvi, p. 530, 736), in the geographers. Layard (*Nineveh and its Remains*, ii, 55) suggests that it may possibly be extant in the very extensive ruins called *Kaleh* Shergat, on the west side of the Tigris, above its junction with the Lesser Zab. But see RESEN. Less probable is the identification with *Chanlan*, the former summer residence of the caliphs in Arabia or Babylonian Irak, according to Abulfeda, five days' journey north of Bagdad (in Anville, 63½° long., 34½° lat.), which, according to Assemani (*Bibl. Or.* III, ii, 418 sq., 753), is also called *Chalcha* (comp. Michaelis, *Suppl.* p. 767; Rosenmüller, *Alterth.* I, ii, 98). Ephraem Syrus (in loc. Gen.) understands the old Mesopotamian *Chetro* on the Tigris (Rosenmüller, *ib.* p. 120; but see Michaelis, *Spicileg.* i, 245 sq.). As it would seem to have been at some distance from Nineveh, the city of Resen lying between them, most earlier writers concur in placing it on the Great Zab (the ancient Lycus), not far from its junction with the Tigris, and Resen is placed higher up on the same river, so as to be between it and Nineveh (Bochart, *Phaleg*, iv, 22). See ASSYRIA.

Calamol'alus (Καλαμώλαλος, Vulg. *Cliomus*), given (1 Esdr. v, 22) as the name of a place whose "sons" were restored after the exile; apparently a corrupt agglomeration of the names ELAM, HARIM, LOD, and HADID in the genuine text (Ezra ii, 31, 32).

Calămon. See SYCAMINA.

Cal'amus occurs in three passages of the Auth. Vers. for the Heb. קָנֶה, *kaneh'* (Sept. κάλαμος, elsewhere "reed"): Exod. xxx, 23, among the ingredients of the holy anointing oil; Cant. iv, 14, in an enumeration of sweet scents; and Ezek. xxvii, 19, among the articles brought to the markets of Tyre. The term designates the marsh and river reed generally [see REED]; but in the places just referred to it appears to signify the *sweet flag* (κάλαμος ἀρωματικός, Dioscor. i, 17), an Oriental plant (*calamus odoratus*, Plin. xii, 12, 48), of which the Linnæan name is *Acorus calamus*. No doubt the same plant is intended in Isa. xliii, 24; Jer. vi, 20, where the Auth. Vers. has *sweet cane*. In the latter text the Heb. is קָנֶה הַטּוֹב, *kaneh' hat-tob'* (i. e. *good cane*), and in Exod. xxx, 23, קְנֵה בֹּשֶׂם, *kaneh' bo'sem* (i. e. *odoriferous cane*). "A scented cane is said to have been found in a valley of Mount Lebanon (Polyb. v, 46; Strab. xvi, 4). The plant has a reed-like stem, which is exceedingly fragrant, like the leaves, especially when bruised. It is of a tawny color, much jointed, breaking into splinters, and having the hollow stem filled with pith like a spider's web" (Kalisch on Exod. xxx, 23.) The calamus of Scripture is probably the reed by that name sometimes found in Europe, but usually in Asia (Theophrast. *Plantt.* ix, 7; Pliny, xii, 12), and especially in India and Arabia (Diod. Sic. ii, 49; Pliny, xii, 48). It grows in moist places in Egypt and Judæa, and in several parts of Syria, bearing from the root a knotted stalk, containing in its cavity a soft white pith. It has an agreeable aromatic smell, and when cut, dried, and powdered, it forms an ingredient in the richest perfumes (Pliny, xv, 7; see Celsii *Hierob.* ii, 326 sq.). The plant from which the "calamus aromaticus" of modern shops is obtained appears to be a different species (*Penny Cyclopædia*, s. v. Acorus). See CANE.

Oriental Calamus.

Calămus sacer (also called *pugillaris* or *fistula*), a tube made of gold or silver, with a larger orifice at one end than at the other, through which the consecrated wine was drawn into the mouth, the large end of the tube being inserted into the chalice. See CHALICE.

Calamy, Edmund, an eminent English divine, was born in London A.D. 1600, and took his B.A. degree at Pembroke Hall, Cambridge, in 1619. After spending some years as chaplain to the bishop of Ely, in 1626 he was made a lecturer at Bury St. Edmund's, where he continued until the publication of bishop Wren's "Articles," and the enforcement of the order for the reading of the "Book of Sports," compelled him to protest, and to leave the diocese. He then received the living of Rochford, but in 1639, having avowed himself a Presbyterian, he was made lecturer of St. Mary's, Aldermanbury, in London, which office he filled for twenty years. In the ecclesiastical controversies of the times he bore a prominent part. He joined with Marshall, Young, Newcomen, and Spurstow in writing, under the title of *Smectymnuus*, a reply to bishop Hall's "Divine Right of Episcopacy." As a preacher Mr. Calamy was greatly admired, and listened to by persons of the first distinction during the twenty years that he officiated in St. Mary's. His celebrity was so well established by his writings, as well as by the distinguished station which he occupied among the ministers in the metropolis, that he was one of the divines appointed by the House of Lords in 1641 to devise a plan for reconciling the differences which then divided the Church in regard to ecclesiastical discipline. This led to the Savoy Conference (q. v.), at which he appeared in support of some alterations in the Liturgy, and replied to the reasons urged against them by the Episcopal divines. As a member of the Westminster Assembly (q. v.), he earnestly opposed the execution of king Charles, and promoted the restoration of his son, who made him one of his chaplains, and offered him the see of Lichfield and Coventry, which he refused. When the Act of Uniformity was passed he resigned his preferment, but refused, like many others, to gather a congregation, preferring regularly to attend the church in which he had so long officiated. He died Oct. 29, 1666, of a nervous disorder occasioned by the sight of the misery caused by the fire of London. He published *The Godly Man's Ark*, *Sermons* on Psa. cxix, 72 (Lond. 1693, 17th ed. 12mo); *The Noble-man's Pattern* (Lond. 1643, 4to), and many single sermons, etc.

Calamy, Edmund, D.D., grandson of the preceding, was born in London April 5, 1671. At the

age of seventeen he went to the University of Utrecht, where he was placed under the tuition of the distinguished professors De Vries and Grævius. In 1691, when Principal Carstairs was sent to Holland in quest of a gentleman to fill a professor's chair in the University of Edinburgh, he applied to Calamy, and pressed him to accept the situation; but he declined the honor, though soon afterward he returned to England for the purpose of pursuing his studies in the Bodleian Library. In 1700 he began to preach among the Nonconformists, and in 1703 he took charge of a congregation in Westminster, which he held for many years. In 1703 he arranged for the press *Baxter's Life and Times*, which publication gave rise to a dispute between Calamy and Hoadley. In 1709 he was made D.D. by the universities of Edinburgh, Glasgow, and Aberdeen. After a laborious life, divided between preaching and writing, he died, June 3, 1732. Among his works are *Discourses on Inspiration* (Lond. 1710, 8vo):—*Sermons on the Trinity* (Lond. 1722, 8vo):—*Defense of moderate Non-conformity* (Lond. 1703-5, 3 vols. 8vo):—*The Non-conformist's Memorial* (Lond. 1721, 2 vols. 8vo):—*History of his Life and Times*, edited by Rutt (Lond. 1829, 2 vols. 8vo).

Calas, Jean, an unfortunate merchant of Toulouse, of the Protestant religion. His son, Marc Antoine, hung himself in a fit of melancholy Oct. 13, 1761. The father was seized as guilty of the murder, on the ground that his son intended to embrace Romanism the next day. No proof could be offered against him, but the fanatical passion of the mob was roused. The corpse was honored as that of a martyr. "The clergy exerted all their influence to confirm the populace in their delusion. At Toulouse the White Penitents celebrated with great solemnity the funeral of the young man, and the Dominican monks erected a scaffold and placed upon it a skeleton, holding in one hand a wreath of palms, and in the other an abjuration of Protestantism. The family of Calas was, in consequence of the popular excitement, brought to trial for the murder, and several deluded and (most probably) some bribed witnesses appeared against them. A Catholic servant-maid, and the young man Lavaysse, were also implicated in the accusation. Calas, in his defence, insisted on his uniform kindness to all his children; reminded the court that he had not only allowed another of his sons to become a Catholic, but had also paid an annual sum for his maintenance since his conversion. He also argued from his own infirmity that he could not have prevailed over a strong young man, and referred to the well-known melancholy moods of the deceased as likely to lead to suicide; and, lastly, he pointed out the improbability that the Catholic servant-maid would assist in such a murder. But all his arguments proved unavailing, and the Parliament of Toulouse sentenced the wretched man—by a majority of eight against five—to torture and death on the wheel! With great firmness, and protestations of his innocence to the last, the old man died on the wheel, March 9, 1762. His property was confiscated. His youngest son was banished for life from France, but was captured by the monks, and compelled to abjure Protestantism. The daughters were sent to a convent" (Chambers, s. v.). The family of the unhappy man retired to Geneva, and Voltaire subsequently undertook to defend his memory. He succeeded in drawing public attention toward the circumstances of the case, and a revision of the trial was granted. Fifty judges once more examined the facts, and on March 9, 1765, the Parliament of Paris declared Calas altogether innocent. Louis XV ordered the property of Calas to be restored to his family, and made to the latter a present of 30,000 livres. The investigation at last led to the *toleration edict* of Louis XVI in 1787.—Bungener, *Priest and Huguenot*, vol. ii; Coquerel, *Histoire des Églises du Désert* (2 vols. Paris, 1841); Haag, *La France Protestante*, iii, 96; Coquerel, *Jean Calas et sa famille* (Paris, 1858, 12mo).

Calasanza, Giuseppe (*Josephus a matre Dei*), founder of the order of the *Piarists* (q. v.), was born in Aragon in 1556. He entered holy orders in 1582, and went to Rome, where he obtained the protection of Clement VIII, Paul V, and Gregory XV, the latter of whom, after the new order had been founded by Calasanza, named him general of it in 1622. He died in 1648, and was canonized in 1767. He is commemorated on August 27.—Fehr, *Geschichte d. Mönchsorden*, ii, 51.

Calasio, Mario di, named from a village of that name in the Abruzzo, where he was born in 1550. He became a Franciscan, and devoted himself to Hebrew, in which he soon became so great a proficient that Pope Paul V made him D.D. and professor of Hebrew at Rome. He is best known by his *Hebrew Concordance*, which occupied him during forty years, even with the aid of other learned men. He was about to commit this work to the press, when he died, in 1620. It appeared under the title *Concordantiæ Sacrorum Bibliorum Hebraicæ cum convenientiis ling. Arab. et Syr.* (Rome, 1621, 4 vols. fol.). Another edition was published by Romaine at London in 1747, but it is not considered so accurate as that of 1621. He is said to have died chanting the Psalms in Hebrew.—*Biog. Univ.* vi, 514.

Calatrava, a military order of Spain, named from the town of Calatrava, in New Castile. It had its origin in the following circumstances: When Alphonso, the father of Sanchez III, had taken the town of Calatrava, in 1147, from the Moors, he gave it to the Templars to defend; but when it was spread abroad in 1158 that the Arabs were about to attempt the recapture of the place, the Templars resigned it again to Sanchez, who thereupon presented it to Raymond, abbot of the Cistercian monastery of St. Mary. The Arabs, after all, did not attempt the place; but many of the warriors who had been drawn together for its defence (as well as many of the lay brethren of the convent) entered the Cistercian order, but under a habit more fit for military exercises than for those of monks, and designated as the order of Calatrava. It was approved by Pope Alexander III in 1164, and confirmed by Gregory VIII 1187. The knights at first wore a white scapulary and hood, but in 1397 the Anti-pope Benedict XIII permitted them a secular dress, distinguished by a red cross *fleur-de-lisée*. In 1486, Ferdinand and Isabella obtained a bull from Pope Innocentius VIII, which reserved the nomination of the grand master to the pope. Adrian VI, however, annexed the grand mastership of this order to the crown of Spain. The knights made a vow of obedience, poverty, and conjugal chastity (for they were permitted to marry once), and were bound to maintain the immaculate conception of the Blessed Virgin. As a monastic order the institution has ceased to exist, but there are now said to be nearly eighty commanderies and priories in Spain, generally given as rewards of merit

Red Cross of Calatrava.

Nun and Knight of Calatrava, in public Dress.

to political favorites. Since 1219 the order had also nuns, who had to prove, before being admitted, their descent from noble houses. They wore the dress of the Cistercian nuns, and their principal monastery was at Almagro. They are now likewise secularized.—Helyot, *Ordres Relig.* vol. i; Landon, *Eccl. Dict.* s. v.

Cal'col (1 Chron. ii, 6). See CHALCOL.

Calcutta, the capital of Bengal, and an episcopal see of the Church of England, on the Hoogly. The bishopric was erected in 1814, and the bishop is metropolitan of India. The incumbents have been, 1. Thomas Fanshaw Middleton, May 8, 1814; 2. Reginald Heber, June 1, 1823; 3. John T. James, June 4, 1827; 4. J. Matthias Turner, May 17, 1829; 5. Daniel Wilson, April 29, 1832, died 1858, who commenced the building of a cathedral church, and the foundation of a chapter; 6. George Edward Lynch Cotton, D.D., consecrated 1858; 7. Robert Milman, February 2, 1867. Calcutta has been the centre of an important system of Protestant missions, both English and American. See INDIA.

Calderon. See KALDERON.

Calderwood, David, a Scotch divine, was born in 1575, and in 1604 became minister of the parish of Crealing. When James I in 1617 sought to bring the Scottish Church into conformity with the Church of England, Calderwood was strenuous in opposition. Persecution and threats having failed to shake Calderwood, he was imprisoned, and afterward banished. He retired to Holland, where he published *Altare Damascenum seu ecclesiæ Anglicanæ politia*, etc. (L. Bat. 1623, best ed. 1708, 4to), in which he enters into a full examination of the principles of the Church of England, its government, ceremonies, and connection with the state. The work made a great impression at the time, and was translated into English under the title of *The Altar of Damascus, or the Pattern of the English Hierarchy and Church obtruded upon the Church of Scotland* (1621, 12mo). A report having been spread that Calderwood was dead, a man named Patrick Scot published a pretended recantation, with the title "Calderwood's Recantation, directed to such in Scotland as refuse Conformity to the Ordinances of the Church" (London, 1622). Calderwood, in the mean time, had returned secretly to Scotland, where he lived some years in concealment. He collected the materials for a *History of the Kirk of Scotland*, which he left in MS., and which has been published by the *Woodrow Society* (Edinb. 1842-9, 8 vols. 8vo). From the materials of this work Calderwood wrote his *True History of the Church of Scotland from the Beginning of the Reformation unto the End of the Reign of James VI* (1678, fol.). He died about 1650.

Caldron, prop. a large cooking vessel, is the rendering in certain passages of the Auth. Vers. for the following words: 1. אַגְמוֹן, *agmon'* (Job xli, 20 [12]), a heated *kettle*, others a burning *reed* ("rush" elsewhere); 2. דּוּד, *dud* (2 Chron. xxxv, 13; "pot," Job xli, 20 [12]; Psa. lxxxi, 6; "kettle," 1 Sam. ii, 14), a large *boiler* (also a "basket"); 3. סִיר, *sir* (Jer. lii, 18, 19; Ezek. xi, 3, 7, 11, elsewhere "pot"), the most general term for a kettle or basin (also a "thorn"); 4. קַלַּחַת, *kallach'ath* (1 Sam. ii, 14; Mic. iii, 3), a pan or pot (so called from *pouring*); 5. λέβης (2 Macc. vii, 3), a *kettle*, in this case a large caldron for torture. Metallic vessels of this description have been obtained from the ruins of Egypt, and still more lately two copper caldrons were discovered by Mr. Layard among the excavations at Nimroud (*Nin. and Bab.* p. 149 sq.), about 2½ feet in diameter, and 3 feet deep, resting upon a stand of brick work, with their mouths closed by large tiles, and containing a variety of smaller bronze objects. See POT.

Bronze Caldron. From the Egyptian Remains in the British Museum.

Caldwell, David, D.D., a Presbyterian minister, was born in Lancaster county, Pa., March 22, 1725, graduated at Princeton in 1761, and was licensed to preach by the New Brunswick Presbytery in 1763. Being ordained in 1765, he became pastor of the congregations of Buffalo and Alamance, N. C., in 1768. In 1776 he was a member of the Convention which formed the State Constitution, and some years later he declined the offer of the presidency of the University of North Carolina, by which institution he was made D.D. in 1810. He died Aug. 25, 1824, in his 100th year.—Sprague, *Annals*, iii, 263.

Caldwell, James, a Presbyterian minister, was born in Charlotte county, Va., 1734, graduated at Princeton in 1759, and in 1761 was ordained pastor of the Presbyterian church of Elizabethtown, N. J. At the Revolution he entered with spirit into the controversy, and was soon branded as a rebel; and on the formation of the Jersey brigade, he was at once selected as its chaplain. Throughout the war he suffered severely; toward the close of it, his church was burnt and his wife murdered by the enemy. The people reposed great confidence in him, and his labors, counsels, and exhortations were of great assistance to the cause he had espoused. This honored patriot was killed in 1781, at Elizabethport, by a drunken soldier named Morgan, who was tried, convicted, and hung upon the charge of murder. Caldwell was a man of unwearied activity and of wonderful powers of endurance. As a preacher he was uncommonly eloquent and pathetic.—Sprague, *Annals*, iii, 222.

Caldwell, Joseph, D.D., a Presbyterian minister, the author of a *System of Geometry* and a *Treatise of Plane Trigonometry*, was born in Lamington, N. J., April 21, 1773, graduated at Princeton 1791, and became Professor of Mathematics at the University of North Carolina in 1796, in which same year he was licensed as a Presbyterian minister. From 1804 till his death, Jan. 24, 1835, with an intermission of five years, he was President of the University, and to his exertions it owes the respectable position which it now occupies.—Sprague, *Annals*, iv, 173.

Caldwell, Merritt, A.M., Professor of Metaphysics, was born in Hebron, Me., Nov. 29, 1806. His early education, both religious and academical, was very carefully conducted, and he graduated with honor at Bowdoin College in 1828. In the same year he became principal of the Maine Wesleyan Seminary, Readfield. In 1834 he was elected Professor of Mathematics and Vice-president of Dickinson College, Pa. In 1837 he was transferred to the chair of Metaphysics and English Literature, which he occupied during the rest of his life. He soon became known as a strong thinker and excellent writer by his elaborate contributions to the *Methodist Quarterly Review*. Nor did his devotion to literature prevent him from taking an interest in the moral questions of the times; and in the cause of temperance especially his labors were abundant and even excessive. In 1846 he visited England as a delegate to the "World's Convention," which formed the "Evangelical Alliance," and took an active part in its proceedings. His health, which had previously been impaired, was apparently improved by his European tour, but in 1847 it failed again, and he died June 6, 1848. Professor Caldwell was a man of uncommonly firm and masculine character. As a pro-

fessor and college officer he had few superiors; as a writer, he was always clear, logical, and forcible. Many of his contributions to the periodical press were of rare excellence. He also published *Manual of Elocution, including Voice and Gesture* (Phila. 1846, 12mo, often reprinted), perhaps the best hand-book of the subject extant:—*Philosophy of Christian Perfection* (Phila. 1847, 18mo), "a model of clear thinking and forcible expression:"—*Christianity tested by eminent Men* (N. Y. 1852, 18mo):—*The Doctrine of the English Verb* (1837, 12mo).—*Methodist Quarterly Review*, 1852, p. 574.

Caldwell, Zenas, brother of Merritt, was born in Hebron, Oxford county, Me., on the 31st of March, 1800, graduated at Bowdoin College in 1824, and soon after leaving college took charge of the Academy of Hallowell. In 1825 he was licensed as a local preacher, and for most of the time of his connection with the Hallowell Academy he supplied the Methodist congregation in Winthrop. In the same year he was unanimously elected principal of the new Methodist Seminary at Kent's Hill, Readfield, Me., and proved himself abundantly adequate to any service that devolved upon him. But his whole work was to be performed within six months; his lungs became seriously affected, and he died triumphantly on Dec. 26, 1826. In 1855 a small duodecimo volume by the Rev. S. M. Vail, D.D., was published, containing a memoir and several of his productions, in prose and poetry.—Sprague, *Annals*, vii, 699 sq.

Ca'leb (Heb. *Kaleb'*, כָּלֵב, appar. for כֶּלֶב, a *dog*), the name of two or three men. See also CALEB-EPHRATAH; NEGEB-CALEB.

1. (Sept. Χαλέβ.) The last-named of the three sons of Hezron, Judah's grandson (1 Chron. ii, 9, where he is called CHELUBAI). His three sons by his first wife, Azubah or Jerioth (q. v.), are enumerated (ver. 18); he had also another son, Hur, by a later wife, Ephrath (ver. 19; perhaps only the oldest of several, ver. 50); besides whom another (his "first-born") is named (ver. 42, by what wife is uncertain), in addition to several by his concubines Ephah and Maachah (ver. 46, 48). B.C. post 1856. The text is possibly corrupt, however, in some of these distinctions.

2. (Sept. Χαλέβ.) A "son of Hur, the first-born of Ephratah" above named (and therefore the grandson of the preceding), according to 1 Chron. ii, 50, where his sons are enumerated. B.C. ante 1658. Some, however, have identified him with the foregoing, supposing a corruption in the text.

3. (Sept. Χάλεβ, but Χαλέβ in 1 Chron. ii, 49; Ecclus. xlvi, 9; 1 Macc. ii, 56; v. r. Χαλούβ in 1 Sam. xxx, 14; Josephus Χάλεβος, *Ant.* iii, 14, 4, etc.) Usually called "the son of Jephunneh" (Num. xiii, 6, and elsewhere [see JEPHUNNEH]), sometimes with the addition "the Kenezite" (Num. xxxii, 12; Josh. xiv, 6, 14), from which some have hastily inferred that he may have been a foreigner, and only *proselyted* to Judaism. See KENAZ. Caleb is first mentioned in the list of the rulers or princes (נָשִׂיא), called in the next verse (רָאשִׁים) "heads," one from each tribe, who were sent to search the land of Canaan in the second year of the Exode (B.C. 1657), where it may be noted that these officers are all different from those named in Num. i, ii, vii, x, as at that time phylarchs of the tribes. Caleb was one of these family chieftains in the tribe of Judah, perhaps as chief of the family of the Hezronites, at the same time that Nahshon, the son of Amminadab, was prince of the whole tribe. He and Oshea or Joshua, the son of Nun, were the only two of the whole number who, on their return from Canaan to Kadesh-Barnea, encouraged the people to enter in boldly to the land, and take possession of it, for which act of faithfulness they narrowly escaped stoning at the hands of the infuriated people. In the plague that ensued, while the other ten spies perished, Caleb and Joshua alone were spared. Moreover, while it was announced to the congregation by Moses that, for this rebellious murmuring, all that had been numbered from twenty years old and upward, except Joshua and Caleb, should perish in the wilderness, a special promise was made to the latter that he should survive to enter into the land which he had trodden upon, and that his seed should possess it. Accordingly, forty-five years afterward (B.C. 1612), when some progress had been made in the conquest of the land, Caleb came to Joshua and reminded him of what had happened at Kadesh, and of the promise which Moses made to him with an oath. He added that though he was now eighty-five years old (hence he was born B.C. 1698), he was as strong as in the day when Moses sent him to spy out the land, and he claimed possession of the land of the Anakim, Kirjath-Arba, or Hebron, and the neighboring hill-country (Josh. xiv). This was immediately granted to him, and the following chapter relates that he took possession of Hebron, driving out the three sons of Anak; that he offered Achsah, his daughter, in marriage (comp. 1 Sam. xvii, 25; Hygin. *Fab.* 67) to whoever would take Kirjath-Sepher, i. e. Debir; and that when Othniel, his younger brother, had performed the feat, he not only gave him his daughter to wife, but with her the upper and nether springs of water which she asked for. After this we hear no more of Caleb, nor is the time of his death recorded. But we learn from Josh. xxi, 13, that, in the distribution of cities out of the different tribes for the priests and Levites to dwell in, Hebron fell to the priests, the children of Aaron, of the family of the Kohathites, and was also a city of refuge, while the surrounding territory continued to be the possession of Caleb, at least as late as the time of David (1 Sam. xxv, 3), being still called by his name (1 Sam. xxx, 14). His descendants are called *Calebites* (כָּלִבּוֹ for כָּלִבִּי, *Kalibbi'*, 1 Sam. xxv, 3; Sept. translates as if a paronomasia were intended, κυνικός, Auth. Vers. "house of Caleb"). His name seems to be inserted in 1 Chron. ii, 49, by way of distinction from the others in the same list. See Ewald, *Isr. Gesch.* ii, 288 sq.

Ca'leb-eph'ratah, a name occurring only in the present text of 1 Chron. ii, 24, as that of a place where Hezron died (בְּכָלֵב אֶפְרָתָה, *be-Kaleb' Ephra'thah, in Caleb to Ephrath*). But no such place is elewhere referred to, and the composition of the name is a most ungrammatical one. Again, neither Hezron or his son could well have given any name to a place in Egypt, the land of their bondage, nor did Hezron probably die, or his son live, elsewhere than in Egypt. The present text therefore seems to be corrupt, and the reading which the Sept. and Vulg. suggest (ἦλθεν Χαλέβ εἰς Ἐφραθά, *ingressus est Caleb ad Ephratha*) is probably the true one, viz., בָּא כָלֵב אֶפְרָתָה, meaning either "Caleb came to Ephrath," i. e. Bethlehem-Ephratah), or, still better, "Caleb came in unto Ephrah." The whole information given seems to be that Hezron had two wives, the first, whose name is not given, the mother of Jerahmeel, Ram, and Caleb or Chelubai; the second, Abiah, the daughter of Machir, whom he married when sixty years old, and who bare him Segub and Ashur. Also that Caleb had two wives, Azubah, the first, apparently the same as Jerioth, and Ephrah, the second, the mother of Hur; and that this second marriage of Caleb did not take place till after Hezron's death. See NEGEB-CALEB.

Calendar, JEWISH. I. *Hebrew Lunar Calendar of Feasts and Fasts.*—The year of the Hebrews is composed of twelve (and occasionally of thirteen) lunar months, of thirty and twenty-nine days alternately. The year begins in autumn as to the civil year, and in the spring as to the sacred year. The Jews had calendars anciently wherein were noted all the feasts, all the fasts, and all the days on which they celebrated the memory of any great event that had happened to

the nation (Zech. viii, 19; Esth. viii, 6, in Græc.). These ancient calendars are sometimes quoted in the Talmud (Mishna, *Taanith*, 8), but the rabbins acknowledge that they are not now in being (see Maimonides and Bartenora, in loc.). Those that we have now, whether printed or in manuscript, are not very ancient (see Genebrar. *Bibliot. Rabinic.* p. 319; Buxtorf, *Levit. Talmud.* p. 1046; Bartolocci, *Bibl. Rabbinic.* ii, 550; Lamy's *Introduction to the Scripture;* and Plantav. *Isagog. Rabbin.* ad fin.). That which passes for the oldest is *Megillath Taanith*, "the volume of affliction," which contains the days of feasting and fasting heretofore in use among the Jews, which are not now observed, nor are they in the common calendars. We here insert the chief historical events, taken as well from this volume, *Taanith*, as from other calendars. The Jewish months, however, have been placed one lunation later than the rabbinical comparison of them with the modern or Julian months, in accordance with the conclusions of J. D. Michaelis, in his treatise published by the Royal Soc. of Göttingen. See MONTH. For the details, compare each month in its alphabetical place. See also *Critica Biblica*, vol. iv, and the following formal treatises: Clauder, *De forma anni Mosaico-prophetica* (Viteb. 1716); Dresde, *Annus Judaicus* (Lips. 1766); Fischer, *De anno Hebræor.* (Viteb. 1710); Felseisen, *De civili Judæorum die* (Lips. 1702); Klausing, *De forma anni patriarcharum* (Viteb. 1716); Röschel, *id.* (Viteb. 1692); Lanshausen, *De mense vett. Heb. lunari* (Jen. 1713); Lund, *De mensibus Hebræor.* (Aboæ, 1694); Nagel, *De Calendario vett. Hebræor.* (Altorf, 1746); Selden, *De anno civili Hebræor.* (Lond. 1644); Sommel, *De anno Hebræor. eccles. et civ.* (Lund. 1748); Strauch, *De anno Hebræor. ecclesiastico* (Viteb. 1655); Von Gumpach, *Ueber den alt. Jüdisch. Kalender* (Brüssel, 1848). See TIME.

ABIB or NISAN.

The first month of the sacred year, the seventh month of the civil year; it has thirty days, and answers generally to the moon of MARCH *and* APRIL.

Day 1.—New moon; a fast for the death of the sons of Aaron (Lev. x, 1, 2).

10.—A fast for the death of Miriam, sister of Moses (Num. xx, 1); also in memory of the scarcity of water that happened, after her death, to the children of Israel in the desert of Kadesh (Num. xx, 2).

On this day every one provided himself a lamb or a kid, preparatory to the following Passover.

14.—On the evening of this day they killed the paschal lamb; they began to use unleavened bread, and ceased from all servile labor.

15.—The solemnity of the Passover, with its octave; the first day of unleavened bread, a day of rest; they ate none but unleavened bread during eight days.

After sunset they gathered a sheaf of barley, which they brought into the Temple (*Menachot.* vi, 3).

Supplication for the reign of the spring (Geneb.).

16.—On the second day of the feast they offered the barley which they had provided the evening before, as the first-fruits of the harvest; after that time it was allowed to put the sickle to the corn.

The beginning of harvest.

From this day they began to count fifty days to Pentecost. See PENTECOST.

21.—The octave of the feast of the Passover; the end of unleavened bread. This day is held more solemn than the other days of the octave, yet they did not refrain from manual labor on it.

26.—A fast for the death of Joshua (Josh. xxiv, 29).

30.—Alternate of the first new moon of the succeeding month.

The book called *Megillath Taanith* does not notice any particular festival for the month Nisan.

ZIF or IJAR.

The second ecclesiastical, or eighth civil month, contains twenty-nine days; corresponds to the moon of APRIL *or* MAY.

Day 1.—New moon.

6.—A fast of three days for excesses committed during the feast of the Passover; that is, on the Monday, Thursday, and the Monday following (*Calendar* Bartolocci).

7.—The dedication of the Temple, when the Asmonæans consecrated it anew, after the persecutions of the Greeks (*Megill. Taanith*, c. 2).

10.—A fast for the death of the high-priest Eli, and for the capture of the ark by the Philistines.

14.—The second Passover, in favor of those who could not celebrate the first, on the 15th of the foregoing month.

23.—A feast for the taking of the city of Gaza by Simon Maccabæus (*Calend.* Scalig.; 1 Macc. xiii, 43, 44); or for the taking and purification of the citadel of Jerusalem by the Maccabees (*Calendar* of Sigonius; 1 Macc. xiii, 49, 53; xvi, 7, 36); a feast for the expulsion of the Caraites out of Jerusalem by the Asmonæans or Maccabees (*Meg. Taanith;* comp. TEBETH 28).

27.—A feast for the expulsion of the Galilæans, or those who attempted to set up crowns over the gates of their temples and of their houses, and even on the heads of their oxen and asses, and to sing hymns in honor of false gods. The Maccabees drove them out of Judæa and Jerusalem, and appointed this feast to perpetuate the memory of their expulsion (*Megill. Taanith*).

28.—A fast for the death of the prophet Samuel (1 Sam. xxv, 1).

SIVAN.

The third sacred, or ninth civil month; thirty days; the moon of MAY *or* JUNE.

Day 1.—New moon.

6.—Pentecost, the fiftieth day after the Passover—called also the Feast of Weeks, because it happened seven weeks after the Passover. We do not find that it had any octave. But see SABBATH.

15, 16.—A feast to celebrate the victory of the Maccabees over the people of Bethsan (1 Macc. v, 52; xii, 40, 41; *Megill. Taanith*).

17.—A feast for the taking of Cæsarea by the Asmonæans, who drove the pagans from thence, and settled the Jews there (*Megill. Taanith*).

22.—A fast in memory of the prohibition by Jeroboam, son of Nebat, to his subjects, forbidding them to carry their first-fruits to Jerusalem (1 Kings xii, 27).

25.—A fast in commemoration of the death of the rabbins Simeon, son of Gamaliel; Ishmael, son of Elisha; and Chanina, the high-priest's deputy.

A feast in honor of the solemn judgment pronounced in favor of the Jews by Alexander the Great against the Ishmaelites, who, by virtue of their birthright, maintain a possession of the land of Canaan; against the Canaanites, who claimed the same as being the original possessors; and against the Egyptians, who demanded restitution of the vessels and other things borrowed by the Hebrews when they left Egypt (see *Megillath Taanith*); but the Gemara of Babylon (*Sanhedrim*, c. 11) puts the day of this sentence on Nisan 14 (comp. CHISLEU 21).

27.—A fast, because Rabbi Chanina, the son of Thardion, was burnt with the book of the law.

30.—Alternate of the first new moon of the following month.

TAMMUZ.

The fourth sacred, tenth civil month; twenty-nine days; moon of JUNE *or* JULY.

Day 1.—New moon.

14.—A feast for the abolition of a pernicious book of the Sadducees and Bethusians, by which they endeavored to subvert the oral law and all the traditions (*Megill. Taanith*).

17.—A fast in memory of the tables of the law broken by Moses (Exod. xxxii, 19).

On this day the city of Jerusalem was taken: the perpetual evening and morning sacrifice was suspended during the siege of Jerusalem by Titus. Epistemon tore the book of the law, and set up an idol in the Temple; it is not said whether this happened under Nebuchadnezzar, Antiochus Epiphanes, or the Romans.

AB.

The fifth sacred, eleventh civil month; thirty days; moon of JULY *or* AUGUST.

Day 1.—New moon; a fast for the death of Aaron, the high-priest.

5.—A commemoration of the children of Jethuel, of the race of Judah, who, after the return from the captivity, furnished wood to the temple (*Megill. Taanith*).

9.—A fast of the fifth month in memory of God's declaration to Moses, on this day, that none of the murmuring Israelites should enter the land of promise (Num. xiv, 29, 31).

On the same day the Temple was taken and burnt: Solomon's Temple first by the Chaldæans; Herod's Temple afterward by the Romans.

18.—A fast, because in the time of Ahaz the evening lamp went out.

21.—Xylophoria; a feast on which they stored up the necessary wood in the Temple (Selden; see Josephus, *War*, ii, 17). Scaliger places this festival on the 22d of the next month.

24.—A feast in memory of the abolition of a law by the Asmonæans, or Maccabees, which had been introduced by the Sadducees, enacting that both sons and daughters should alike inherit the estates of their parents (*Megill. Taanith*).

30.—Alternate of the first new moon of the following month.

ELUL.

The sixth sacred, twelfth civil month; twenty-nine days; moon of AUGUST *or* SEPTEMBER.

Day 1.—New moon.

7.—Dedication of the walls of Jerusalem by Nehemiah (Ezra xii, 27). We read in Neh. vi, 15, that these walls were finished Elul 25; but as there still remained many things to be done to complete this work, the dedication might have been deferred to the 7th of Elul of the year following (*Megill. Taanith;* Seld.).

17.—A fast for the death of the spies who brought an ill report of the land of promise (Num. xiv, 36).

A feast in remembrance of the expulsion of the Romans [rather the Greeks], who would have prevented the Hebrews from marrying, and who dishonored the daughters of Israel. When they intended to use violence toward Judith, the only daughter of Mattathias, he, with the assistance of his sons, overcame them, and delivered his country from their yoke; in commemoration of which deliverance this festival was appointed.

21.—Xylophoria; a feast in which they brought to the Temple the necessary provision of wood for keeping up the fire of the altar of burnt-sacrifices. The calendar of Scaliger places this feast on the 22d (see the 21st of the foregoing month).

22.—A feast in memory of the punishment inflicted on the wicked Israelites, whose insolence could not be otherwise restrained than by putting them to death; for then Judæa was in the possession of the Gentiles. They allowed these wicked Israelites three days to reform; but as they showed no signs of repentance, they were condemned to death (*Megill. Taanith*).

[From the beginning to the end of this month, the cornet is sounded to warn of the approaching new civil year.] See YEAR.

ETHANIM or TISRI.

The seventh sacred, first civil month; thirty days; moon of SEPTEMBER *or* OCTOBER.

Day 1.—New moon. Beginning of the civil year.

The Feast of Trumpets (Lev. xxiii, 24; Numb. xxix, 1, 2).

3.—Fast for the death of Gedaliah (2 Kings xxv, 25; Jer. xli, 2).

The same day, the abolition of written contracts. The wicked kings having forbidden the Israelites to pronounce the name of God, when they were restored to liberty the Asmonæans or Maccabees ordained that the name of God should be written in contracts after this manner: "In such a year of the high-priest N., who is minister of the most high God," etc. The judges to whom these writings were presented decreed they should be satisfied, saying, for example, "On such a day, such a debtor shall pay such a sum, according to his promise, after which the schedule shall be torn." But it was found that the name of God was taken away out of the writing, and thus the whole became useless and ineffectual; for which reason they abolished all these written contracts, and appointed a festival day in memory of it (*Megill. Taanith*, c. 7).

5.—The death of twenty Israelites. Rabbi Akiba, son of Joseph, dies in prison.

7.—A fast on account of the worshipping the golden calf, and of the sentence God pronounced against Israel in consequence of that crime (Exod. xxxii, 6-8, 34).

10.—A fast of expiation (Lev. xxiii, 19, etc.).

15.—The Feast of Tabernacles, with its octave (Lev. xxiii, 34).

21.—Hosanna-Rabba. The seventh day of the Feast of Tabernacles, or the Feast of Branches.

22.—The octave of the Feast of Tabernacles.

23.—The rejoicing for the law; a solemnity in memory of the covenant that the Lord made with the Hebrews in giving them the law by the mediation of Moses.

On this same day, the dedication of Solomon's Temple (1 Kings viii, 65, 66).

30.—Alternate of the first new moon of the following month.

MARCHESVAN or BUL.

The eighth sacred, second civil month; twenty-nine days; moon of OCTOBER *or* NOVEMBER.

Day 1.—The new moon, or first day of the month.

6, 7.—A fast, because Nebuchadnezzar put out the eyes of Zedekiah, after he had slain his children before his face (2 Kings xxv, 7; Jer. lii, 10).

19.—A fast on Monday and Tuesday [Thursday?], and the Monday following, to expiate faults committed on occasion of the Feast of Tabernacles (*Calendar*, ed. Bartolocci).

23.—A feast or memorial of the stones of the altar, profaned by the Greeks, which were laid aside in expectation of a prophet who could declare to what use they might be applied (1 Macc. iv, 46; *Megill. Taan.* c. 8).

26.—A feast in memory of some places possessed by the Cuthites, which the Israelites recovered at their return from the captivity.

A dispute of Rabbin Jochanan, son of Zachai, against the Sadducees, who pretended that the loaves of the first-fruits (Lev. xxiii, 17, 18) were not to be offered on the altar, but to be eaten hot (*Megill. Taan.* c. 9).

CHISLEU.

The ninth sacred, third civil month; thirty days; moon of NOVEMBER *or* DECEMBER.

Day 1.—New moon, or the first day of the month.

3.—A feast in memory of the idols which the Asmonæans threw out of the courts, where the Gentiles had placed them (*Megill. Taanith*).

6.—A fast in memory of the book of Jeremiah, torn and burnt by Jehoiakim (Jer. xxxvi, 23).

7.—A feast in memory of the death of Herod the Great, son of Antipater, who was always an enemy to the sages (*Megill. Taan.* c. 11).

21.—The feast of Mount Gerizim. The Jews relate that when their high-priest Simon, with his priests, went out to meet Alexander the Great, the Cutheans or Samaritans went also, and desired this prince to give them the Temple of Jerusalem, and to sell them a part of Mount Moriah, which request Alexander granted. But the high-priest of the Jews afterward presenting himself, and Alexander asking him what he desired, Simon entreated him not to suffer the Samaritans to destroy the Temple. The king replied to him that he delivered that people into his hands, and he might do what he pleased with them. Then the high-priest and inhabitants of Jerusalem took the Samaritans, bored a hole through their heels, and, tying them to their horses' tails, dragged them along to Mount Gerizim, which they ploughed and sowed with tares, just as the Samaritans had intended to do to the Temple of Jerusalem. In memory of this event they instituted this festival (comp. SIVAN 25).

24.—Prayers for rain (*Calendar* Bartolocci).

25.—The dedication or renewing of the Temple, profaned by order of Antiochus Epiphanes, and purified by Judas Maccabæus (1 Macc. iv, 52; 2 Macc. ii, 16; John x, 22). This feast is kept with its octave. Josephus says that in his time it was called the Feast of Lights, perhaps, he says, because this good fortune of restoring the Temple to its ancient use appeared to the Jews as a new day (*Ant.* xii, 11). But the Jewish authors give another reason for the name of lights. They report that when they were employed in cleansing the Temple, after it had been profaned by the Greeks, they found there only one small phial of oil, sealed up by the high-priest, which would hardly suffice to keep in the lamps so much as one night; but God permitted that it should last several days, till they had time to make more, in memory of which the Jews lighted up several lamps in their synagogues and at the doors of their houses. (See Selden, *De Syned.* lib. iii, cap. 13.) Others affirm (as the *Scholastical History*, also Thomas Aquinas and Cardinal Hugo, on 1 Macc. iv, 52) that the appellation of the Feast of Lights was a memorial of that fire from heaven which inflamed the wood on the altar of burnt-offerings, as related in 2 Macc. i, 22.

Some think this feast of the dedication was instituted in memory of Judith. (See Sigon. *De Republ. Hebr.* lib. iii, cap. 18.) But it is doubted whether this ought to be understood of Judith, daughter of Merari, who killed Holofernes, or of another Judith, daughter of Mattathias, and sister of Judas Maccabæus, who slew Nicanor, as they tell us. (See Ganz, *Zemach David;* Millenar. 4, an. 622, et apud Selden, *De Synedriis*, lib. iii, cap. 13, n. 11.) This last Judith is known only in the writings of the rabbins, and is not mentioned either in the Maccabees or in Josephus. But there is great likelihood that the Jews have altered the Greek history of Judith to place it in the time of Judas Maccabæus.

A prayer for rain. Time of sowing begins in Judæa.

30.—Alternate of the new moon of the following month.

TEBETH.

The tenth sacred, fourth civil month; twenty-nine days; moon of DECEMBER *or* JANUARY.

Day 1.—New moon.

8.—A fast, because of the translation of the law out of Hebrew into Greek. This day and the three following days were overcast by thick darkness.

The fast of the tenth month (*Calend.* Bartolocci).

9.—A fast for which the rabbins assign no reason.

10.—A fast in memory of the siege of Jerusalem by Nebuchadnezzar (2 Kings xxv, 1).

28.—A feast in memory of the exclusion of the Sadducees out of the Sanhedrim, where they had all the power in the time of King Alexander Jannæus. Rabbi Simeon, son of Shatach, found means of excluding them one after another, and of substituting Pharisees (*Megillath Taanith*). Comp. IJAR 28.

SHEBAT.

The eleventh sacred, fifth civil month; thirty days; moon of JANUARY *or* FEBRUARY.

Day 1.—New moon, or the first day of the month.

2.—A rejoicing for the death of King Alexander Jannæus, a great enemy to the Pharisees (*Megill. Taanith*).
4 or 5.—A fast in memory of the death of the elders who succeeded Joshua (Judg. ii, 10).
15.—The beginning of the year of trees; that is, from hence they begin to count the four years during which trees were judged unclean. from the time of their being planted (Lev. xix, 23-25). Some place the beginning of these four years on the first day of the month.
22.—A feast in memory of the death of one called Niscalenus, who had ordered the placing images or figures in the Temple, which was forbidden by the law; but he died, and his orders were not executed. The Jews place this under the high-priest Simon the Just. It is not known who this Niscalenus was (*Megill. Taan.* c. 11).
23.—A fast for the war of the ten tribes against that of Benjamin (Judg. xx).
They also call to remembrance the idol of Micah (Judg. xviii).
29.—A memorial of the death of Antiochus Epiphanes, an enemy of the Jews (1 Macc. vi, 1; *Megill. Taanith*).
30.—Alternate new moon of the next month.

ADAR.

The twelfth sacred, sixth civil month; twenty-nine days; moon of February *or* March.

Day 1.—New moon.
7.—A fast, because of the death of Moses (Deut. xxxiv, 5).
8, 9.—The trumpet sounded by way of thanksgiving for the rain that fell in this month, and to pray for it in future (*Megillath Taanith*).
A fast in memory of the schism between the schools of Shammai and Hillel [called Taanith Tsadehim].
12.—A feast in memory of the death of two proselytes, Hollianus and Pipus his brother, whom one Tyrinus or Turianus would have compelled to break the law, in the city of Laodicea; but they chose rather to die than to act contrary to the law (Selden, *De Synedr.* lib. iii, cap. 13, ex *Megill. Taanith*).
13.—Esther's fast; probably in memory of that of Esth. iv, 16 (Geneb. and Bartolocci).
A feast in memory of the death of Nicanor, an enemy of the Jews (1 Macc. vii, 44; 2 Macc. xv, 30, etc.). Some of the Hebrews insist that Nicanor was killed by Judith, sister of Judas Maccabæus.
14.—The first Purim, or lesser Feast of Lots (Esth. ix, 21). The Jews in the provinces ceased from the slaughter of their enemies on Nisan 14, and on that day made great rejoicing; but the Jews of Shushan continued the slaughter till the 15th; therefore Mordecai settled the Feast of Lots on the 14th and 15th of this month.
15.—The great Feast of Purim or Lots; the second Purim. These three days, the 13th, 14th, and 15th, are commonly called the days of Mordecai, though the feast for the death of Nicanor has no relation either to Esther or to Mordecai.
The collectors of the half shekel, paid by every Israelite (Exod. xxx, 13), received it on Adar 15 in the cities, and on the 25th in the Temple (Talmud, *Shekalim*).
17.—The deliverance of the sages of Israel, who, flying from the persecution of Alexander Jannæus, king of the Jews, retired into the city of Koslik in Arabia; but, finding themselves in danger of being sacrificed by the Gentiles, the inhabitants of the place, they escaped by night (*Megill. Taanith*).
20.—A feast in memory of the rain obtained from God by one called Onias Ham-magel, during a great drought in the time of Alexander Jannæus (*Megill. Taanith*).
23.—The dedication of the temple of Zerubbabel (Ezra vi, 16). The day is not known, so some put it on the 16th; the *Calendar* of Sigonius puts it on the 23d.
28.—A feast in commemoration of the repeal of the decree by which the kings of Greece had forbidden the Jews to circumcise their children, to observe the Sabbath, and to decline foreign worship (*Megill. Taanith*, et Gemar. *Taanith*, c. 2).—Calmet, *Append.*

VE-ADAR.

Intercalary Month.

When the year consists of thirteen lunar months, they place here, by way of intercalation, the second month of Adar, or Ve-Adar. See Year.

II. *Modern Julian Calendar of the Temperature and Agricultural Products of Palestine for each Month of the Year.*—These were first carefully collected by J. G. Buhle, in a prize essay presented to the Royal Society of Göttingen, printed in Latin among their transactions under the title *Calendarium Palestinæ Œconomicum* (1785), and translated at large by Mr. Taylor in the *Fragments* added to his edition of Calmet's *Dictionary* (iii, 693 sq.), of which the subjoined synopsis is an abridgment. Much valuable information, similarly obtained from Oriental itineraries, combined with personal observation, may be found in Kitto's *Phys. Hist. of Palest.* vol. ii, ch. vii. See also the art. Palestine.

JANUARY.

Weather.—According to the seasons (q. v.) as divided among the Hebrews, this month is the second in winter, and the cold is more or less severe in different situations. There is frequently a considerable fall of snow, which, however, is speedily dissolved in most places. In the plain of Jericho the cold is little felt (Josephus, *War*, v, 4). Heavy rains now fall, especially in the night, which swell the rivers and lakes. Early in the day the thermometer is generally between 40° and 46°, and it does not rise above 3° or 4° in the afternoon. Toward the latter end of this month, when the sky is clear, it becomes so hot that travellers cannot, without some difficulty, prosecute their journey. The wind is generally north or east.

Productions.—All kinds of grain or corn are now sown. The beans are in blossom, and trees in leaf. Earliest appears the blossom of the almond here, even before it has leaves. If the winter be mild, the violet fig (of a longer shape than the summer fig, and gathered early in the spring) is still found on the trees, though they are stripped of their leaves. The mistletoe and the cotton-tree now flourish. Among the flowers and garden herbs of this month, the cauliflower, the blue and the white hyacinth, the gold-streaked daffodil, different violets, tulips in great variety, wormwood, the lentisc-tree, anemones, ranunculuses, and colchicas, a kind of lily resembling the Persian when blown.

FEBRUARY.

Weather.—This is much the same as during the last month, except that toward the close, in southerly parts, the snow and rain begin to cease. Like the other features of the rainy season, this month is chiefly remarkable for heavy showers of rain and sometimes falls of snow. The sky is frequently covered with clear light clouds; the atmosphere becomes warm; the wind continuing north or east, but latterly changing westward. During the first 14 days the mercury usually stands between 42° and 47°.

Productions.—The latter crops are now appearing above ground, and a delightful verdure begins to be seen on every side. Barley continues to be sown till the middle of the month; beans acquire a husk, and are soon fit for use; cauliflowers and parsnips are now gathered; the peach and early apple tree are blossoming, and a great variety of herbs are in flower, which, says a traveller, "render these parts so delightful that the beholder is often charmed and transported at the sight" (see Thomson's *Travels*, i, 137).

MARCH.

Weather.—In Palestine this month is the forerunner of spring, but rains, with thunder and hail, are not yet over (Pococke's *Travels*, ii, 11). The weather is generally warm and temperate, except on the mountains, and sometimes extremely hot, especially in the plain of Jericho (Thomson's *Travels*, ii, 27). In the middle of the month, the mercury stands at 52°, and nearer the close between 56° and 58° (Russel, *Aleppo*, p. 149, 150). Toward the end, the rivers are much swollen by rain and the thawing of snow upon the tops of mountains (Egmont and Heyman's *Travels*, i, 335). Earthquakes sometimes take place, and they are accounted for by Shaw in his *Travels*, p. 136.

Productions.—While the wheat is scarcely in ear, the barley is now ripe in Jericho (Shaw's *Travels*, p. 290, 291). Indian wheat, rice, and corn of Damascus are now sown in Lower Egypt (Thomson's *Travels*, ii, 169). Several kinds of pulse, as beans, lentils, and chick-pease, become ripe (*Itiner.* B. Tudel. p. 103). Every tree is at this time in full leaf (Russel's *Aleppo*, p. 10). The fig, the palm, etc., together with many shrubs and herbs, are now in blossom. The Jericho plum begins to ripen. The vine, having yielded its first clusters, is pruned. Various aromatic garden herbs are becoming fit for use.

APRIL.

Weather.—The "latter rains" (מַלְקוֹשׁ, ὄψιμοι) now fall, as Korte asserts (*Reise nach dem gelobten Lande*, p. 489); and Shaw affirms that none are observed after them until summer (*Travels*, p. 290). The rain ceases about the close of the month, and the sky generally becomes serene. The sun's heat is excessive in the plains of Jericho, but in other parts of Judæa the spring is now most delightful (Maundrell's *Jour.* p. 90). Concerning the meteorology of Palestine, some interesting observations are made by Mariti (*Viaggi*, iii, 226) and Dr. Shaw (*Travels*, p. 283). The mercury advances from 60° to 66°.

Productions.—The time of harvest depends upon the duration of the rainy season. After the rains cease, the corn soon arrives at maturity, according to the situation. Wheat, zea or spelt, and barley, now ripen (Korte's *Reise*, p. 187; *Itiner. Hierosolym.* p. 93). The spring fig is still hard (Shaw, p. 290). The almond and orange trees now produce fruit (Maundrell, p. 69), and the terebinth-tree ("oak," Celsii *Hierobot.* p. 34) is in blossom (Sandys, p. 176). A new shoot, bearing fruit, springs from that branch of the vine that was left in the former month, which must now be lopped (Brocard, *Descript. T. S.* p. 332). Syria and Palestine produce canes from which they obtain sugar (Ignatius von Rheinfelden, *Hierosolym. Pilgerfahrt*, p. 46, 47). Tulips, ranunculuses, anemones, etc., etc., are now in

flower at Aleppo and Tripoli (Thevenot, iii, 92; Rauwolf, i, 58). The grass is now very high, and the Arabs lead out their horses to pasture (Mariti, ii, 25, 28). The same is likewise done in Persia (Chardin, iii, 12).

MAY.

Weather.—In this month the summer season commences, when the excessive heat of the sun renders the earth barren (Korte, p. 257). A few showers are observed about Aleppo, sometimes accompanied with hail and thunder (Russel, p. 151). At the beginning of the month the mercury reaches 70°; then it rises gradually from 76° to 80°, being greatly affected by the direction of the variable winds. The snows on Lebanon thaw rapidly now, but the cold is still very sharp on the summits (Maundrell, p. 236).

Productions.—The harvest is completed during this month. Wheat is now cut in Galilee (Hasselquist, p. 84). About the beginning of the month barley is generally ripe (Egmont and Heyman's *Travels*, ii, 27). Rice, however, is not quite ripe (Schweigger, p. 317). The early apples in Palestine now come to maturity, at least toward the end of this month (Pococke, ii, 126). The common early apples may now be gathered in the warmer situations, but the better varieties ripen later (Shaw's *Travels*, p. 129). Cotton is said to be sown in the Holy Land at this period (Hasselquist, p. 176). The early shoots of the vine, which had been lopped, now produce the latter grapes (Brocard, *Descr. Ter. Sanct.* p. 332, 333). They still continue, after the harvest, to sow various garden herbs, part of which are unknown to us; and many of them, as cucumbers, cauliflowers, and others, come to maturity twice in the same year, in spring and autumn (Korte, p. 187). In Palestine the grass and herbs have grown to such a height this month, that when Thevenot was riding from Nazareth to Acre, on the 8th of May, they reached the girth of his saddle (*Voyages au Levant*, ii, 671).

JUNE.

Weather.—During this month the sky is generally clear, and the weather becomes extremely hot (Radzivil's *Peregrin. Hierosolym.* p. 27). As the month advances, the mercury gradually rises in the morning from 76° to 80°; in the afternoon it stands between 84° and 92° (Thevenot, iii, 1 2). The inhabitants pass their nights in summer upon the roofs of their houses, which are not rendered damp by any dew (Russel, p. 152). The summits of the mountains of Palestine are not, however, yet free from snow (Pococke, ii, 153).

Productions.—At Aleppo the corn is sometimes not all cut before the beginning of June; although Russel's testimony differs from this assertion of Thevenot's, yet Shaw says that in Africa the harvest sometimes lasts till the end of June (*Travels*, p. 123). The early figs, black and white, now ripen and immediately fall off. When they do not come to their proper size and maturity, they are called פַגִּים, ὄλυνθοι, which names are used for unripe fruit in general. The process of caprification is now performed (Shaw, p. 296). Apples (a few of the earliest of the better sorts), plums, mulberries, cherries, etc., are also ripe in this month, but of the last there are very few trees in Palestine. The cedar gum, or *cedrium*, a clear white resin, which is said to have great medicinal virtue when hardened, distils spontaneously in the summer time, and without any incision being made, from the bark of the coniferous cedar. In extracting a greater quantity, they cut the bark (Arvieux, *Mem.* ii, 413, 414). Of the shrubs and herbs, the balm-tree is worthy of notice, which grows chiefly about Jericho. From this the Arabs, by making an incision, get the "Balm of Gilead" during this and two following months (Sandys, *Tour*, p. 197). The Arabs, as the summer advances, lead their flocks to the hills northward (De la Roque, *Voyage*, p. 174; Radzivil, p. 45).

JULY.

Weather.—All travellers who have been exposed to the open air this month affirm that the heat is now extremely intense. Radzivil found the brooks of the "valley of the terebinths" dried up on the 9th. At Jerusalem the heat is much less than about Jericho (*Peregrin. Hierosol.* p. 97, 98). The snow on the tops of mountains, thawing gradually during the summer, yields a large supply of water to the brooks below. It cannot, however, be affirmed that the snows on the summits of Lebanon are entirely dissolved every year (Korte, p. 419). The winds generally blow from the west, but, when they fail, the heat is excessive. The mercury usually stands, in the beginning of the month, at 80°, and toward the end at 85° or 86° (Russel, p. 152, 153).

Productions.—Grapes are now ripe about Aleppo, but remain till November or December (Korte, p. 571). Dates are to be found ripe at Jericho, but they seldom come to maturity at Jerusalem (Shaw, p. 297). Apple and pear trees present ripe fruit, but of an inferior kind. The nectarine yields a fruit most agreeable in flavor and immense in size (Shaw, p. 129, 130). The vintage begins in favored situations. The cauliflower and parsnip are sown this month (Russel, p. 5; Shaw, p. 126). The gourd called *citrul* ripens (Russel, p. 25). There is no longer a supply of pasturage for the cattle (Shaw, p. 150).

AUGUST.

Weather.—The sky is serene and fair during this month, and the heat is extreme (Schulz, *Leit. d. Höchst.* v, 272). The mercury, until those days when the clouds rise, continues the same as in the last month; afterward it falls about 4° or 5°. So at Aleppo (Russel, p. 152). On the 18th snow is seen on the summits of Lebanon (Korte, *Reise*, p. 471).

Productions.—The first clusters of the vine, which blossomed at Antaradus in March, now come to maturity, and are ready for gathering (Brocard, p. 333). The fig, properly so called, which remains a long while on the tree, and is always reckoned, in the sacred writings, among summer fruit, may now be gathered at Algiers (Shaw, p. 129). The cultivated olive-tree yields ripe olives this month in the environs of Jericho (Tschudi, *Reyss*). Pomegranates ripen. The shrub *al-Henna*, brought out of Egypt into Palestine, puts forth leaves this month, and then fragrant blossoms, which the Turks, by various artificial methods, endeavor to produce sooner (Rauwolf, i, 58).

SEPTEMBER.

Weather.—The mercury remains the same at the beginning of this month as at the end of August, except that in the afternoon it rises (Russel, p. 14). Although the days are very hot, the nights are extremely cold (Schulze, p. 417-420). Rain falls toward the end of the month, but the rainy season generally commences now (Tschudi, p. 286).

Productions.—Russel says that the Syrians begin to plough about the end of this month (*Aleppo*, p. 16). The palm presents ripe dates now in Upper Egypt (Radzivil, p. 172). The pomegranate, pear, and plum trees are laden with fruit in this month in the gardens of Damascus (Schulze, p. 443). According to Korte, cotton, which was sown the year before, and has lain all the winter, is now gathered ripe (*Reise*, p. 576).

OCTOBER.

Weather.—The extreme heat is now abated, although still great in the daytime, the air being much refreshed by cold in the night, by which the dew, that is much more dense in this southern climate, is frozen (Korte, p. 257). The rains which now fall are called early or former rains (יוֹרֶה, πρώϊμοι), and come in frequent showers. The winds are seldom very strong, but variable. After the rains the mercury descends gradually to 60° (Russel's *Aleppo*, p. 155).

Productions.—Wheat is sown by the Arabs about Algiers in the middle of this month (Shaw, p. 123) Russel informs us that it is sown at Aleppo about the same time; so that it seems probable this is the time of sowing it in Palestine (*Aleppo*, p. 16). The third clusters of the vine, which in the month of May had produced another small branch, loaded with the latter grapes, must be gathered this month (Brocard, p. 333). The olive-tree produces ripe olives toward the latter end of October in the empire of Morocco, and the pomegranate also now yields ripe fruit at the same place (Höst, p. 304, 307). Lettuces, endives, cresses, spinach, beets, etc., may be gathered at Algiers from this month till June (Shaw's *Travels*, p. 126).

NOVEMBER.

Weather.—If the rains have not already fallen, they certainly fall this month (Shaw's *Travels*, p. 290). The sun's heat, although not so great in the daytime, is, however, still violent; but the nights are very cold and uncomfortable for travellers, many of whom journey by night, carrying torches before them (Cotovic. *Itin. Hieros.* p. 334). The mercury, as the month advances, gradually falls from 60° to 50° (Russel, p. 156).

Productions.—This is the time for the general sowing of corn, as wheat, zea or spelt, and barley, in Palestine, at Aleppo, and in Lower Egypt (Korte, p. 189; Shaw, p. 123). Dates are still gathered in Egypt in the middle of this month (Thomson, ii, 176). The trees till this period retain their leaves; and at Aleppo the vintage lasts to the 15th inst. (Russel, p. 14).

DECEMBER.

Weather.—This is the first winter month; the cold is piercing, and sometimes fatal to those not inured to the climate. Yet rain is more common than snow, which, when it falls, very quickly thaws (Korte, p. 585; Mariti, ii. 187). The winds, as in the last month, usually blow from the east or north. They are seldom violent. The mercury stands at 46°, and is subject to very slight alterations (Russel, p. 155, 156).

Productions.—Corn and pulse are sown during this month, as at the end of October. Sugar-canes now ripen, and are cut down at Cyprus (Cotovicus, *Itiner. Hieros.* p. 137). The grass and herbs are again springing out of the ground after the rains, and the Arabs now drive their flocks down from the mountains into the plains (Rauwolf, i, 118). See Agriculture.

CALENDAR, Roman. For this in its most complete and final form, the world is indebted to Julius Cæsar, who, during his office as Pontifex Maximus, undertook the memorable task known as the "reform of the calendar." The Roman year had hitherto consisted of 355 days, with a month of thirty days intercalated every third year, so that the average length of the year was 365 days. This arrangement was attributed to Numa Pompilius, who added two months to the short year of Romulus; its regulation was left

to the pontiffs. If the intercalation had been regularly made, the Romans would have lost nearly one day in every four years, since the real length of the solar year is about 365¼ days; but the business was so carelessly executed that the difference between the civil and the solar year sometimes amounted to several months. Cæsar called on the astronomers, especially on Sosigenes of Alexandria, to rectify the discrepancy and prevent future error. It was determined to make the first of January of the Roman year U.C. 709 coincide with the first of January of the solar year which we call B.C. 45. But it was calculated that this Jan. 1 of the year U.C. 709 would be 67 days in advance of the true time; in other words, it would not concur with Jan. 1 of B.C. 45, but with Oct. 22 of B.C. 46. Two intercalary months, making together 67 days, were therefore inserted between the last day of November and the first of December of the year U.C. 708. An intercalary month of 23 days had already been added to February of that year, according to the old method. The Roman year 708 was thus made to consist in all of the prodigious number of 445 days (i. e. 355+23+67). It was hence scoffingly called "the year of confusion;" more justly it should be named, as Macrobius observes, "the last year of confusion." To prevent future errors, the year was lengthened from 355 to 365 days, each month except February being lengthened (by one or two days, nearly alternately), according to the rule which we still observe. But as the solar year consists of very nearly 365¼ days, it was manifestly necessary to add one day in every four years, and this was done at the end of February, as at present in our "leap year." Such was the famous *Julian Calendar*, which, with a slight alteration, continues in use in all Christian countries to the present day.

Gregorian Calendar.—The addition of one day for every four years would be correct if the solar year consisted exactly of 365¼ days, or 365 days and 6 hours; but, in fact, it consists of only 365 days, 5 hours, 47 minutes, 51½ seconds; so that the Julian year is longer than the true solar year by about 12 minutes. Cæsar's astronomers are supposed to have been aware of this, but to have neglected it. Accordingly, in the year A.D. 1582, the beginning of the Julian year was found to be about 10 days behind the true time, the vernal equinox falling on the 11th instead of the 21st of March, its date at the Council of Nice, A.D. 325. The time of Easter, therefore, and of the other movable festivals, had been unsettled by the progressive recession of days, and it was matter of importance for ecclesiastical as well as civil purposes that the calendar should be rectified. Pope Gregory XIII (q. v.) therefore "ordained that ten days should be deducted from the year 1582, by calling what, according to the old calendar, would have been reckoned the 5th of October, the 15th of October, 1582; and in order that this displacement might not recur, it was further ordained that every hundredth year (1800, 1900, 2100, etc.) should not be counted a leap-year, except every fourth hundredth, beginning with 1600. In this way the difference between the civil and the natural year will not amount to a day in 5000 years. In Spain, Portugal, and part of Italy the pope was exactly obeyed. In France the change took place in the same year, by calling the 10th the 20th of December. In the Low Countries, the change was from the 15th of December to the 25th; but it was resisted by the Protestant part of the community till the year 1700. The Romanist nations in general adopted the *style* ordained by their sovereign pontiff; but the Protestants were then too much inflamed against Romanism in all its relations to receive even a purely scientific improvement from such hands. The Lutherans of Germany, Switzerland, and, as already mentioned, of the Low Countries, at length gave way in 1700, when it had become necessary to omit *eleven* instead of ten days. A bill to this effect had been brought before the Parliament of England in 1585, but does not appear to have gone beyond a second reading in the House of Lords. It was not till 1751, and after great inconvenience had been experienced for nearly two centuries, from the difference of the reckoning, that an act was passed (24 Geo. II, 1751) for equalizing the style in Great Britain and Ireland with that used in other countries of Europe. It was then enacted that eleven days should be omitted after the 2d of September, 1752, so that the ensuing day should be the 14th." Russia still adheres to the Old Style, so that her reckoning is now 12 days behind that of the rest of Europe.

Calendar of the French Republic.—By a decree of the National Convention, on Nov. 24, 1793, it was ordained that a new era should date from the beginning of the Republic, Sept. 22, 1792; the midnight preceding which, being the autumnal equinox, was fixed upon as the epoch, from which the years were to be reckoned as Year One, Year Two, etc. The year was divided into 12 months, each of 30 days, to which new names were given, as *Vendémiaire* (vintage month), *Brumaire* (foggy month), *Frimaire* (frost month), etc. The months were divided into periods of 10 days, called *Primidi*, *Duodi*, *Tridi*, etc. The tenth day was to be the day of rest, the Christian Sabbath being done away. Five intercalary days were added for each year, viz. the festivals of *Genius*, *Labor*, *Action*, *Reward*, *Opinion*. In every fifth year there was to be an intercalary festival of *The Revolution*. This calendar went into use Nov. 26, 1793, and was abolished in 1805 by Napoleon, who ordered the Gregorian Calendar to be resumed on Jan. 1, 1806.—Carlyle, *French Revolution*, ii, 336; *Penny Cyclopædia*, s. v.; Chambers's *Encyclopædia*, s. v. See CHRONOLOGY.

CALENDAR, ECCLESIASTICAL.—I. A table of the order and series of days, weeks, months, and holy days in the year (so called from the *calendæ*, or first day of the Roman month). The oldest extant calendar containing the Christian festivals is that of Silvius (A.D. 448), published in the *Acta Sanct.* June (vii, 176). There is a fragment of a Gothic calendar, supposed to be of the 4th century, covering the latter part of October and the whole of November, which gives seven days with saints' names. It may be found in Mai, *Scriptor. Veter. nova collectio*, v, 1. See FEASTS and FASTS.

II. The *Fasti*, or catalogues in which different churches preserved the names of those saints whom they especially honored, as their bishops, martyrs, etc., to which they added the names of some other saints, but generally those of the neighboring churches. The calendars differed from the martyrologies in this, that the former contained but few names of saints unconnected with the particular church; the latter contained all the saints honored by the whole Church. The most ancient known calendar is that of the Roman Church, which, according to Baillet, was formed about the middle of the fourth century, under Pope Liberius, or, according to Chatelain, in 336, under Pope Julius (Antwerp, 1634, ed. Boucher). See Landon, *Eccl. Dict.* ii, 488. The most copious work on the subject is Assemani, *Kalendaria Ecclesiæ Universæ* (Rom. 1755, 6 vols. 4to). The present Saints' Calendar of the Romish Church is very copious: it may be found, more or less complete, in the Roman almanacs from year to year.

The German Lutheran Church retained the Romanist Calendar (with the saints' days of that age) at the Reformation. Professor Piper constructed in 1850 an Evangelical Calendar for the use of the Evangelical Church of Germany, which is issued annually, full of biographical and other matter of interest, along with the calendar of feasts, fasts, etc. See Piper, *Die Verbesserung d. Evang. Kalenders* (Berlin, 1850).

The calendar of the Church of England, as it stands

in the large editions of the Prayer-book, consists of nine columns: the first contains the golden number or cycle of the moon; the second shows the days of the month in their numerical order; the third contains the Dominical or Sunday letter; the fourth the calends, nones, and ides (this was the Roman method of computation, and was used by the early Christians); the fifth contains the holy days of the Church, as also some festivals of the Romish Church, set down for public convenience rather than for reverence; and the remaining four contain the portions of Scripture and of the Apocrypha appointed for the daily lessons.

The list of saints' days and festivals includes a number of the Romish holidays, properly so called, viz.: Lucian, priest and martyr, Jan. 8; Hilary, bishop and confessor, Jan. 13; Prisca, virgin and martyr, Jan. 18; Fabian, bishop and martyr, Jan. 20; Agnes, virgin and martyr, Jan. 21; Vincent, deacon and martyr, Jan. 22; Blasius, bishop and martyr, Feb. 3; Agatha, virgin and martyr, Feb. 5; Valentine, bishop and martyr, Feb. 14; David, tutelar saint of Wales, March 1; Cedde or Chad, bishop, March 2; Perpetua, martyr, March 7; Gregory, bishop and confessor, March 12; Patrick, tutelar saint of Ireland, March 17; Edward, king of the West Saxons, March 18; Benedict, abbot, March 21; Richard, bishop, April 3; Ambrose, bishop, April 4; Alphege, archbishop, April 19; George, saint and martyr, April 23; Cross, invention of, May 3; John, saint, evangelist, May 6; Dunstan, archbishop, May 19; Augustine, archbishop, May 26; Bede, venerable, May 27; Nicomede, martyr, June 1; Boniface, bishop and martyr, June 5; Alban, saint and martyr, June 17; Edward, translation of, June 20; Mary, Virgin, visitation of, July 2; Martin, bishop and confessor, July 4; Swithin, bishop, July 15; Margaret, virgin and martyr, July 20; Magdalene, saint Mary, July 22; Anne, saint, July 23; Lammas Day, Aug. 1; Transfiguration of our Lord, Aug. 6; Jesus, name of, Aug. 7; Laurence, archdeacon and martyr, Aug. 10; Augustine, bishop of Hippo, Aug. 28; John Baptist, beheading of, Aug. 29; Giles, abbot and confessor, Sept. 1; Enurchus, bishop, Sept. 7; Mary, Virgin, nativity of, Sept. 8; Holy Cross, recovery of, Sept. 14; Lambert, bishop and martyr, Sept. 17; Cyprian, archbishop and martyr, Sept. 26; Jerome, priest and confessor, Sept. 30; Remigius, bishop, Oct. 1; Faith, virgin and martyr, Oct. 5; Denys, bishop and martyr, Oct. 9; Edward, translation of, Oct. 13; Ethelreda, virgin, Oct. 17; Crispin, saint and martyr, Oct. 25; Leonard, confessor, Nov. 6; Martin, bishop and confessor, Nov. 11; Britins, bishop, Nov. 13; Machutus, bishop, Nov. 15; Hugh, bishop, Nov. 17; Edmund, king and martyr, Nov. 20; Cecilia, virgin and martyr, Nov. 22; Clement I, bishop and martyr, Nov. 23; Catharine, virgin and martyr, Nov. 25; Nicholas, bishop, Dec. 6; Lucy, virgin and martyr, Dec. 13; O Sapientia, Dec. 16; Silvester, bishop, Dec. 31.

These are omitted in the calendar of the Protestant Episcopal Church, which retains only the scriptural festivals. Wheatly assigns the following reasons for their retention by the English Church:

"Some of them being retained upon account of our courts of justice, which usually make their returns on these days, or else upon the days before or after them, which are called in the writs *Vigil. Fest.* or *Crast.*, as in *Vigil. Martin*, *Fest. Martin*, *Crast. Martin*, and the like. Others are probably kept in the calendar for the sake of such tradesmen, handicraftsmen, and others, as are wont to celebrate the memory of their tutelar saints, as the Welshmen do of St. David, the shoemakers of St. Crispin, etc. And again, churches being in several places dedicated to some or other of these saints, it has been the usual custom in such places to have wakes or fairs kept upon those days, so that the people would probably be displeased if, either in this or the former case, their favorite saint's name should be left out of the calendar. Besides, the histories which were writ before the Reformation do frequently speak of transactions happening upon such a holy day, or about such a time, without mentioning the month; relating one thing to be done at Lammas-tide, and another about Martinmas, etc., so that, were these names quite left out of the calendar, we might be at a loss to know when several of these transactions happened. But for this and the foregoing reasons our second reformers under queen Elizabeth (though all those days had been omitted in both books of king Edward VI, excepting St. George's Day, Lammas Day, St. Laurence, and St. Clement, which were in his second book) thought convenient to restore the names of them to the calendar, though not with any regard of their being kept holy by the Church." —Wheatly, *On Common Prayer*, ch. i; Procter, *On Common Prayer*, 62; Piper, in Herzog's *Real-Encyklopädie*, vii, 232; Coleman, *Ancient Christianity*, ch. xxvi, § 5; *Christian Remembrancer*, xl, 891.

Calendārum Festum, *Feast of the Calends.* This heathen festival was retained by many Christians, and is called *bota* and *vota*. It was in some periods celebrated, with great indecencies, under the names *festum kalendarum*, *festum hypodiaconorum*, *festum stultorum*. In later times, the people met masked in the churches, and, in a ludicrous way, proceeded to the election of a mock bishop, who exercised a jurisdiction over them suited to the festivity of the occasion. Fathers and councils long labored to restrain this license, but to little purpose. Tertullian, Chrysostom, and Augustine declaim, in the strongest terms, against this festival; and the Council in Trullo, A.D. 692, forbids the dancings which were used both by men and women, under the penalty of excommunication. In some instances the practice of sacrificing a calf was adopted, especially at the *bota*, a feast of the god Pan. The Council of Auxerre takes notice of the remains of some heathen superstition in France, in offering a hind or calf, which it designates a diabolical observation.—Bingham, *Orig. Eccl.* bk. xx; Farrar, *Eccl. Dict.* s. v.

Calendārum Fratres, or *Calendar Brethren*, a society formerly spread over France, Germany, and Hungary, and which is said to have originated in Saxony in the thirteenth century. It assembled in various places on the first day of each month to regulate the observance of the ensuing festivals, the distribution of alms, days of fasting, the burial of the dead, etc. It was, in fact, a sort of beneficial society, under the patronage of the bishop of the diocese. It afterward led to abuses, carousals, etc., and most of the societies were abolished at the Reformation. Some, however, were still in existence at the beginning of the nineteenth century. Even in the Protestant city of Brunswick a "caland" has nominally maintained itself. One caland ("the caland of princes at Kahla") consisted merely of members of princely houses; several (as, e.g. the caland at Bergen) of knights and members of the higher clergy; others of knights only. See Feller, *Diss. de Fratr. Kal.* (Frankf. 1692, 4to); Blumberg, *Ueber d. Calandsbrüder* (Chemn. 1721); Ledebur, in vol. iv of the *Märkische Forschungen* (Berl. 1850).

Calf (prop. עֵגֶל, *e'gel*, μόσχος; fem. עֶגְלָה, *eglah'*, δάμαλις; sometimes פַּר or פָּר, *par*, a *steer* or young bullock; also periphrastically בֶּן בָּקָר, *son of the herd*), the young of the ox species. See BEEVE; BULL, etc. There is frequent mention in Scripture of calves, because they were made use of commonly in sacrifices. The "fatted calf" was regarded by the Hebrews as the choicest animal food. It was stall-fed, frequently with special reference to a particular festival or extraordinary sacrifice (1 Sam. xxviii, 24; Amos vi, 4; Luke xv, 23). The allusion in Jer. xxxiv, 18, 19, is to an ancient custom of ratifying a contract or covenant, in the observance of which an animal was slain

and divided, and the parties passed between the parts (comp. Homer, *Il.* iii, 208), signifying their willingness to be so divided themselves if they failed to perform their covenant (Gen. xv, 9, 10, 17, 18). The expression "calves of our lips," in Hos. xiv, 2, is figurative, signifying the fruits of our lips (Wolf, *Juvenci labiorum*, Viteb. 1711). As calves were used in sacrifices, the injunction requires us to render the sacrifice of prayer and praise to God, instead of the animal sacrifice (Heb. xiii, 15). Compare HEIFER.

CALF-WORSHIP.—This appears to have originated in Egypt, where we know that brutes of nearly all sorts were held in reverence by some one or another of the various nomes into which that country was divided. See ANIMAL WORSHIP. Of all these creatures, however, the calf, or rather bullock, seems to have been most generally adored, especially a peculiar description, or rather peculiarly-colored bull, to which, under the name of Apis or Mnevis, divine honors of the most extraordinary kind were paid throughout Egypt. It is from this form of idolatry that the scriptural examples of calf-worship are clearly derived. Yet it is possible that the commentators are not quite correct in supposing *Apis* to be the deity whose worship was imitated by the Jews, at least in the first instance. The Egyptians gave that name to a living bull which they worshipped at Memphis; but they also worshipped another living bull in the city of On, or Heliopolis, which they called *Mne*, or, according to the Greek form, *Mnevis*, and which they adored as the living emblem of the sun. Now the Israelites, from the circumstance of their living in the land of Goshen, in or near which Heliopolis was situated, and also from the connection of Joseph, the head of their nation, with one of the priestly families of that city, must have been well acquainted with its peculiar forms of idolatry. It is also very probable that many of them had joined in those rites during their sojourn. We might therefore naturally suppose that they would adopt them on this occasion; and the supposition that they did so is confirmed by a very curious fact, which has not yet been noticed, as bearing upon this question. Champollion has observed, in his *Panthéon Egyptien*, that Mnevis is said by Porphyry and Plutarch to have been a *black* bull, as Apis unquestionably was; but he assures us that this is not the case with regard to the existing remains of ancient Egypt; for, although in the Egyptian paintings Apis is either colored black or black and white, Mnevis, on the contrary, in the only figure of him hitherto discovered, is colored *bright yellow*, evidently with the intention of representing a *golden image*. This fact, though not a conclusive proof, affords a strong presumption that the golden calf was made according to the usual form and color of the images of Mnevis. The annexed engraving represents this symbolical deity of Heliopolis as he is painted on the coffin of a mummy at Turin, the name being distinctly written in hieroglyphical characters, MNE, without the Greek termination. It differs in color only, and not in form, from another painting on the same coffin, which bears the name of Apis. Both have the same trappings—the sun's disk between the horns, surmounted by the plume of ostrich feathers, signifying justice, and the whip, the emblem of power; and both are accompanied by the serpent, representing the spirit of the gods. The bull Mnevis or Mne—for *vis* is merely a Greek termination—was sumptuously lodged in the city On or Heliopolis, and this is all that we find recorded of him in ancient writers. Far more ancient than Apis, the era of his consecration is lost, and perhaps forever. The only circumstance which is of importance, save that the Israelites fell into his worship, is that he appears to have represented the zodiacal sign which was depicted yellow, while, by a curious anomaly, Apis, whose attributes all coincide with those of the sun, was black. The worship paid to him, though lasting till the downfall of the Egyptian hierarchy, gradually diminished before the more important and popular rites of Apis, and little is said of Mnevis. See IDOLATRY.

1. The most ancient and remarkable notice in the Scriptures on this head is that of the golden calf which was cast by Aaron while the Israelites were encamped at the foot of Sinai. In Exod. xxxii, 4, we are told that Aaron, constrained by the people, in the absence of Moses, made a molten calf of the golden ear-rings of the people, to represent the Elohim which brought Israel out of Egypt. He is also said to have "finished it with a graving-tool;" but the word חֶרֶט, *che'ret*, may mean a *mould* (comp. 2 Kings v, 23, Auth. Vers. "bags;" Sept. θυλάκοις). Bochart (*Hieroz.* lib. ii, cap. xxxiv) explains it to mean, "he placed the ear-rings in a bag," as Gideon did (Judg. viii, 24). Probably, however, it means that, after the calf had been cast, Aaron ornamented it with the sculptured wings, feathers, and other marks which were similarly represented on the statues of Apis, etc. (Wilkinson, iv, 348). It does not seem likely that the ear-rings would have provided the enormous quantity of gold required for a *solid* figure. More probably it was a wooden figure laminated with gold, a process which is known to have existed in Egypt. "A *gilded* ox covered with a pall" was an emblem of Osiris (Wilkinson, iv, 335). See GOLD.

1. Bronze Figure of Apis. 2. The Marks on his Back.

Ancient Egyptian sacred Calf Mnevis.

To punish the apostasy, Moses burnt the calf, and then, grinding it to powder, scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v). He probably adopted this course as the deadliest and most irreparable blow to their superstition (Jerome, *Ep.* 128; Plut. *De Is.* p. 362), or as an allegorical act (Job xv, 16),

or with reference to an Egyptian custom (Herod. ii, 41; Poli *Synopsis*, in loc.). It has always been a difficulty to explain the *process* which he used; some account for it by his supposed knowledge of a forgotten art (such as was one of the boasts of alchemy) by which he could reduce gold to dust. Goguet (*Origine des Lois*) invokes the assistance of natron, which would have had the additional advantage of making the draught nauseous. Baumgarten easily endows the fire employed with miraculous properties. Bochart and Rosenmüller merely think that he cut, ground, and filed the gold to powder, such as was used to sprinkle over the hair (Josephus, *Ant.* viii, 7, 3). There seems little doubt that the Heb. term here rendered "burnt" (שָׂרַף, Sept. κατακαίω) properly has this signification (Hävernick's *Introd. to the Pentat.* p. 292). Those commentators who have been at so great pains to explain in what manner Moses reduced the golden calf to such a state as to make it potable in water seem to have overlooked the consideration that, as the science of making gold leaf for gilding was already practised in Egypt, there could be no great difficulty, even if chemical processes had not then been discovered, in effecting the object. See METAL.

The legends about the calf are numerous. The suggestion is said by the Jews to have originated with certain Egyptian proselytes (Godwyn's *Mos. and Aar.* iv, 5); Hur, "the desert's martyr," was killed for opposing it; Abulfeda says that all except 12,000 worshipped it; when made, it was magically animated (Exod. xxxii, 24). "The devil," says Jonathan, "got into the metal and fashioned it into a calf" (Lightfoot, *Works*, v, 398). Hence the Koran (vii, 146) calls it "a corporeal calf, made of their ornaments, *which lowed.*" This was effected, not by Aaron (according to the Mohammedans), but by al-Sâmeri, a chief Israelite, whose descendants still inhabit an island of the Arabian Gulf. He took a handful of dust from the footsteps of the horse of Gabriel, who rode at the head of the host, and threw it into the mouth of the calf, which immediately began to low. No one is to be punished in hell more than forty days, being the number of days of the calf-worship (Sale's *Koran*, ed. Davenport, p. 7, note; and see Weil's *Legends*, p. 125). It was a Jewish proverb that "no punishment befalleth the Israelites in which there is not an ounce of this calf" (Godwyn, *ut sup.*). See AARON.

2. The next notice refers to an event which occurred ages after, when Jeroboam, king of Israel, returning from his long exile in Egypt, set up two idols in the form of a calf, the one in Dan (comp. Josephus, *War*, iv, i, 1) and the other in Bethel, the two extremes of his kingdom, to prevent the ten tribes from resorting to Jerusalem to worship, and so more effectually to separate them from the house of David. Temples were built and altars erected for these images; priests were appointed from all the tribes without distinction, and the priestly functions performed even by the monarch himself. The calves continued to be a snare to the people of Israel until the captivity. The calf at Dan was carried away by Tiglath-Pileser, and that of Bethel ten years after by his son Shalmaneser (1 Kings xv, 29; xvii, 13; Prideaux, *Connection*, i, 15). Jeroboam's sin is always mentioned whenever his name is used (1 Kings xi, 40; xii, 26-33; 2 Chron. xi, 15; Hos. viii, 5, 6; x, 5; xiii, 2). See JEROBOAM.

Bochart thinks that the ridiculous story of Celsus about the Christian worship of an ass-headed deity (called Θαφαβαώθ ἤ Ὀνιήλ—a story at the source of which Tertullian, Ὀνοκοίτης, *Apol.* 16; *Ad Nat.* i, 14, could only guess) sprang from some misunderstanding of such emblems as the golden calf (Minuc. Fel. *Apol.* ix). But it is much more probable, as Origen conjectured, that the Christians were confounded with the absurd mystic *Ophiani*, or Ophite Gnostics (Tacitus, *Hist.* v, 4; Merivale, *Hist. of Emp.* vi, 564). See ASS'S HEAD.

Theory of this Idolatry.—This almost incomprehensible degradation of human reason was, more particularly in the first instance, no doubt the result of the debasing influences which operated on the minds of the Israelites during their sojourn in Egypt, where, amid the daily practice of the most degrading and revolting religious ceremonies, they were accustomed to see the image of a sacred calf, surrounded by other symbols, carried in solemn pomp at the head of marching armies, such as may still be seen depicted in the processions of Rameses the Great or Sesostris. The accompanying figure is a representation of a calf-idol, copied from the original collection made by the artists of the French Institute of Cairo. It is recumbent, with human eyes, the skin flesh-colored, and the whole after-parts covered with a white and sky-blue diapered drapery; the horns are not on the head, but above it, and contain within them the symbolical globe surmounted by two feathers. Upon the neck is a blue and yellow yoke, and the flagellum, of various colors, is suspended over the back; the whole is fixed upon a broad stand for carrying, as here shown. The rendering of the Auth. Vers., which alludes to the image being finished with a graving-tool, is obviously correct, for all the lines and toolings of the covering cloth, of the eyes, and of the feathers must have required that manual operation (Exod. xxxii, 4). It is doubtful whether this idolatrous form is either Apis or Mnevis; it may perhaps represent the sun's first entrance into Taurus, or, more probably, be a symbol known to the Egyptians by an undeciphered designation, and certainly understood by the Edomites of later ages, who called it *bahumed* and *kharuf*, or the calf, the mysterious *anima mundi;* according to Von Hammer (Pref. to *Ancient Alphabets*), the Nabathæan secret of secrets, or the beginning and return of every thing. With the emblems on the back, it may have symbolized the plural Elohim long before the cabalistical additions of this mysterious type had changed the figure. At the time of the departure of the Israelites from Egypt this may have been the Moloch of their neighbors, for that idol was figured with the head of a calf or steer. A similar divinity belonged to the earliest Indian, Greek, and even Scandinavian mythologies, and therefore it may be conceived that the symbol, enduring even to this day, was at that period generally understood by the multitude, and consequently that it was afterward revived by Jeroboam without popular opposition. Egyptian paintings illustrate the contempt which the prophet Hosea (x, 5) casts upon the practice of those whom he designates as "*coming to sacrifice and kiss the calves.*" See BAAL.

Ancient Egyptian Calf-Idol.

a. Some regard the golden calf both of Aaron and Jeroboam as intended by the Jews for an Egyptian god. The arguments for this view are, 1. The ready apostasy of the Jews to Egyptian superstition (Acts vii, 39, and chap. v, passim; Lactant. *Inst.* iv, 10). 2. The fact that they had been worshippers of Apis (Josh. xxiv, 14), and their extreme familiarity with

his cultus (1 Kings xi, 40). 3. The resemblance of the feast described in Exod. xxxii, 5, to the festival in honor of Apis (Suidas, s. v. Ἄπιδες). Of the various sacred cows of Egypt, that of Isis, of Athor, and of the three kinds of sacred bulls, Apis, Basis, and Mnevis, Sir G. Wilkinson fixes on the latter as the prototype of the golden calf; "the offerings, dancings, and rejoicings practised on that occasion were doubtless in imitation of a ceremony they had witnessed in honor of Mnevis" (*Anc. Egyp.* v, 197, see pl. 35, 36). The ox was worshipped from its utility in agriculture (Plut. *De Is.* 74), and was a symbol of the sun, and consecrated to him (Hom. *Od.* i, xii, etc.; Warburton, *Div. Leg.* iv, 3, 5). Hence it is almost universally found in Oriental and other mythologies. 4. The expression, "an ox that eateth hay," etc. (Psa. cvi, 20, etc.), where some see an allusion to the Egyptian custom of bringing a bottle of hay when they consulted Apis (Godwyn's *Mos. and Aar.* iv, 5). Yet these terms of scorn are rather due to the intense hatred of the Jews both to this idolatry and that of Jeroboam. Thus, in Tob. i, 5, we have one of Jeroboam's calves called "the heifer Baal" (ἡ δάμαλις Βάαλ), which is an unquestionable calumny; just as in the Sept. version of Jer. xlvi, 15, "Apis, the chosen calf" (Ἄπις ὁ μόσχος σου ὁ ἐκλεκτός), is either a mistake or a corruption of the text (Bochart, *Hieroz.* ii, 28, 6, and Schleusner, s. v. Ἄπις). See APIS.

b. According to others, the Jews in these cases simply adopted a well-known cherubic emblem, merely applying it as a symbol of Jehovah. See CHERUB. In support of this position it may be urged, 1. That it is obvious they were aware of this symbol, since Moses finds it unnecessary to describe it (Exod. xxv, 18-22). 2. Josephus seems to imply that the calf symbolized God (*Ant.* viii, 8, 4). 3. Aaron, in proclaiming the feast (Exod. xxxii, 5), distinctly calls it a feast to Jehovah, and speaks of the god as the visible representation of Him who had led them out of Egypt. 4. It was extremely unlikely that they would so soon adopt a deity whom they had so recently seen humiliated by the judgments of Moses (Num. xxxiii, 4). 5. There was only *one* Apis, whereas Jeroboam erected *two* calves (but see Jahn, *Bibl. Arch.* § 464). 6. Jeroboam's well-understood political purpose was, not to introduce a new religion, but to provide a different form of the old, and this alone explains the fact that *this* was the only form of idolatry into which Judah never fell, since she already possessed the archetypal emblems in the Temple. 7. It appears from 1 Kings xxii, 6, etc., that the prophets of Israel, though sanctioning the calf-worship, still regarded themselves, and were regarded, as "prophets *of Jehovah.*" See GOLDEN CALF.

Calhoun, THOMAS P., a Cumberland Presbyterian minister, was born in Wilson county, Tenn., in 1823, studied theology in the seminary at Princeton, N. J., and was ordained in 1852. He was secretary for several years of the Board of Foreign and Domestic Missions of the Cumberland Presbyterian Church, and editor of the *Missionary*, a periodical of the Church. In the winter of 1858, while riding out, his horse became unmanageable, and running off a bridge, Mr. Calhoun was killed instantly.—Wilson's *Presbyt. Alm. for* 1860.

Caligŭla (so called from *caligæ*, the foot-dress of a common soldier, which he wore while his father was in the camp in Germany), properly CAIUS CÆSAR, the third of the series of Roman emperors, was the youngest son of Germanicus, the nephew of Tiberius, by Agrippina. He was born Aug. 31, A.D. 12 (Suetonius, *Claud.* 8), and, after spending his youth among the soldiers in Germany (Tacitus, *Ann.* i, 41, 69; Dio Cass. lvii, 5), he was received into favor by Tiberius after the fall of Sejanus (A.D. 32), although his mother and brothers had been disgraced by that tyrant, whom he succeeded as emperor in March, A.D. 37. See TIBERIUS. He is frequently mentioned (under the simple name "Caius") by Josephus, who speaks of his restoration of Agrippa I to his Jewish dominions (*Ant.* xviii, 7, 10) among the few acts of liberality that characterized the first months of his reign. After his recovery from illness, however, which his excesses had brought upon him, he gave way to his naturally brutal temper in so violent and irrational a manner as to be evidence of downright insanity, and was at length assassinated Jan. 24, A.D. 41. It does not appear that he molested the Christians. He commanded Petronius, governor of Syria, to place his statue in the Temple at Jerusalem for the purpose of adoration; but the Jews so vigorously opposed it that, fearing a sedition, he suspended the order (Josephus, *Ant.* xvii, 8). See Smith's *Dict. of Class. Ant.* s. v.; Conybeare and Howson's *St. Paul*, i, 110, 111.

Coin of Caligula, with his Head and that of Augustus (the latter crowned).

Cal'ītas (Καλιτάς and Καλίτας), given as the name of one of the Levites who had taken foreign wives after the restoration from Babylon (1 Esdr. ix, 23, where he is also called COLIUS), and who assisted in expounding the law to the people (ver. 48); evidently the KELITA (q. v.) of the genuine texts (Ezra x, 23; Neh. viii, 7).

Calixtines (I). In the year 1420, the Hussites divided into two great factions, the Taborites and the Calixtines. The latter, who derived their name from the chalice (*calix*), asserted that communion in both kinds was essential to the sacrament. They are not generally ranked by Romanists among heretics, for many of them were persuaded by the concessions of the Council of Basle, in 1433, to be reconciled to the Roman pontiff. The reformation they aimed at extended principally to four articles: 1. To restore the cup to the laity. 2. To subject criminal clergymen to the civil magistrate. 3. To strip the clergy of their lands, lordships, and all temporal jurisdictions. 4. To grant liberty to all priests to preach the Word of God. —Mosheim, *Ch. Hist.* ii, 459; Farrar, *Eccles. Dict.* s. v. See BOHEMIA; HUSSITES.

(II.) Followers of George Calixtus. See CALIXTUS, GEORGE.

Calixtus I (or CALLISTUS), Pope, the son of Dionysius, and a Roman, succeeded Zephyrinus in 217 or 220. According to the *Acta Martyrum*, he was put to death by being drowned in a well, after suffering a long imprisonment, Oct. 14, 222, or Oct. 12, 223, but the story is doubtful. He was succeeded by Urban I. The new MS. of Hippolytus calls him a "heretic," a "servile and deceitful profligate, and an embezzler." In doctrine, according to Hippolytus, Calixtus was a Noëtian, or worse; in practice, a violator both of the ecclesiastical and the moral law. And yet he is a saint of the Romish calendar! He is said to have built the basilica of St. Mary *Trans Tiberim*, and the cemetery on the Appian Way now called the catacomb of St. Sebastian (where 174,000 martyrs are said to lie buried). —Ughellus, *Italia Sacra*, vol. i; *Biog. Univ.; Meth. Qu. Rev.* 1851, p. 649; Schaff, *Hist. of Christian Church*, i, 291, 447. See HIPPOLYTUS.

II, Pope, son of Guillaume, count of Burgundy, was made archbishop of Vienne in 1088, and elected pope Feb. 1, 1119, while in retirement at Cluny. He was judged likely to compose the troubles about investiture, which had agitated the Church for fifty years; and even Henry V appeared to join in the general satisfac-

tion. At the council held at Rheims in 1119 nothing, however, could be concluded to effect a reconciliation between Henry and the pope, and the former was formally excommunicated. In 1122, at the Diet of Worms (Sept. 23), an accommodation was agreed upon between the two parties, the emperor reserving to himself his right of giving to the elect the investiture of the regalia, while the pope, on his part, conferred the investiture by the cross and ring. In 1120 Calixtus returned to Rome, and re-established the papacy there. In 1123 he held a Lateran council, in which the edicts of the anti-pope Gregory VIII were annulled. He died Dec. 12, 1124.—Mosheim, *Ch. Hist.* cent. xii, pt. ii, ch. ii, § 5, 6; Landon, *Eccl. Dict.* ii, 494.

III, Pope, a Spaniard of Valencia, named Alphonso Borgia, who was elevated to the papacy April 8, 1455. He granted a commission to review the proceedings on the trial of Joan of Arc, which decided that she died a martyr for her religion and country. Calixtus did not canonize her, but permitted the celebration of certain expiatory ceremonies at her tomb. Calixtus made base use of his pontificate for the aggrandizement of his own nephews (or sons?), the Borgias. He proclaimed a crusade, collected immense sums, and sent an expedition against the Turks, which failed. He died Aug. 6, 1458.—Landon, *Eccl. Dict.* ii, 494.

Calixtus, George, perhaps the most independent and influential of the Lutheran divines of his age, was born at Medelbye (or Flensborg?), Schleswig, 1586. His proper name was Kallisön; his father was pastor at Medelbye. George was first taught by his father, then went to school at Flensborg, and finally studied at the University of Helmstädt, 1603–1607. After thorough culture, especially in the Aristotelian philosophy and in theology, he travelled into England and France on literary journeys (1609–13). On his return to Germany in 1614 he was appointed divinity professor at Helmstädt. The thesis of his inaugural was that kingdoms and states cannot safely coexist with the religion of Papists or Jesuits. For nearly half a century he led a life of unwearied literary activity at Helmstädt. Peaceful himself, the aim of his studies and efforts was to settle the disputes of the Christian parties, and it led him into endless controversies. Though a Lutheran all his life, his tendencies were Melancthonian, both by nature and education. "He had adopted the opinion of the peacemakers and Remonstrants that the essential doctrines of Christianity were held by all the churches, and desired to propagate this opinion, and to bring the adherents of all the churches to some nearer understanding." He wrote against all *exclusive* claims in any of the churches. Against Rome he wrote *De Pontif. Messiæ Sacrificio* (Francf. 1614); and numerous other publications to the same end followed it. In the Calvinistic doctrine he objected to predestination and the Calvinistic view of the Eucharist; but he did not hold these errors to be fundamental (*De Præcipuis Christ. Relig. Capitibus* [Helmstädt, 1613]); nor did rigid Lutheranism find any more favor with him, and he especially rejected the doctrine of the ubiquity of the body of Christ. His first publications gave umbrage to the strict Lutherans, who regarded him as lax in theology. In 1619 he published his *Epitome Theologiæ*, which was warmly welcomed by his friends, but awakened new opponents among the rigidly orthodox. He applied Aristotle's philosophy to theology, dividing the science into three heads: (1) the *object*, man's best good, including holiness, immortality, etc.; (2) the *subject*, God, creation, apostasy, etc.; (3) the *means*, grace, redemption, the sacraments, etc. He also, in his *Epit. Theologiæ Moralis* (1634), separated theology from ethics, giving the latter the form of an independent science. On this Dr. Pusey remarks, in his *Theology of Germany*, p. 84, that "the separation by Calixtus of the system of 'Christian moral' from 'Christian doctrine,' with which it had been hitherto interwoven, though in itself greatly to the advantage of the unity of the latter science, seems to have produced at the time no effect but that of extinguishing even the sense of the necessity of presenting it in a form influential upon the Christian life." The very titles of his writings and those of his opponents would fill pages. His liberal views were styled Crypto-Papism, Philippism, Crypto-Calvinism, Babelism, and many other hard names, ending with Atheism. Especially after the Colloquy of Thorn, 1645, where he showed a strong disposition to compromise all minor differences in order to bring about a reunion of Lutherans, Reformed, and Romanists, the opposition of the high orthodox party to him and to the Helmstädt theologians, who were more or less imbued with his Syncretism, increased. See Thorn, Colloquy of. His followers were known both as *Syncretists* and *Calixtines*. The chief objection brought against him by the more candid of his opponents was that he maintained, 1. That the fundamental doctrines of Christianity, by which he meant those elementary principles whence all its truths flow, were preserved pure in all three communions (Romish, Lutheran, and Calvinistic), and were contained in that ancient form of doctrine known by the name of the Apostles' Creed. 2. That the tenets and opinions which had been constantly received by the ancient doctors during the first five centuries were to be considered as of equal truth and authority with the express declarations and doctrines of Scripture. 3. That the churches which received these points, and "held the additional tenets of the particular churches as non-essential, should at once come into peaceful relations, and thus pave the way for a future union of the churches." His opponents were legion, but the most bitter and persevering was Calovius (q. v.). Calixtus died March 19, 1656. A full list of his writings is given in his *Consultatio de tolerantia Reformatorum* (Helmst. 1697, 4to). An account of Calixtus, from the Puseyite stand-point, is given in the *Christian Remembrancer*, 1855, art. i. See also Gasz, *Georg Calixt u. d. Syncretismus* (Bresl. 1846); Gieseler, *Ch. History*, pt. iv, div. i, ch. iv; Henke, *Calixtus u. s. Zeit* (1853–56, 2 vols. 8vo); *Bibliotheca Sacra*, April, 1865, art. vi; Mosheim, *Ch. History*, cent. xvii, sec. ii, pt. ii, ch. i; Dowding, *Life and Corr. of G. Calixtus* (Lond. 1863); Gass, *Prot. Dogmatik*, ii, 68. See Syncretism.

Calker (מַחֲזִיק בֶּדֶק, *machazik' be'dek*, a *repairer of the breach*, as in 2 Kings xii, 8; xxii, 5; Sept. and Vulg. translate at random, *οὗτοι ἐνίσχυον τὴν βουλήν*, *habuerunt nautas ad ministerium variæ supellectilis*), a workman skilled in stopping the seams of the deck or sides of a vessel, which appears to be the correct idea of the passages (Ezek. xxvii, 9, 27) where the inhabitants of Gebal (or Byblus) are said to have been employed in this capacity on the Tyrian vessels. See Tyre; Navigation.

Call (usually קָרָא, *kara'*, *καλέω*, both which words evidently contain the same root as their Engl. equivalent) signifies (besides its use in giving a name), I. To cry to another for help, and hence to pray. The first passage in which we meet with this phrase is in Genesis iv, 26, "Then began men to call upon the name of the Lord" (אָז הוּחַל לִקְרֹא בְּשֵׁם יְהוָֹה, Sept. and Vulg. understand the first word as a pronoun referring to Enos, *οὗτος ἤλπισεν ἐπικαλεῖσθαι τὸ ὄνομα τοῦ Θεοῦ*, *iste cœpit invocare nomen Domini*), a phrase that has been understood by some as meaning that Jehovah's worshippers were then called *by His name*, but erroneously (comp. Gen. xii, 8; Psa. lxxix, 6; cv, 1; Isa. lxiv, 6; Jer. x, 25; Zeph. iii, 9). In both the Old and New Test., to call upon the name of the Lord imports invoking the true God in prayer, with a confession that He is Jehovah; that is, with an acknowledgment of his essential and incommunicable attributes. In this view the phrase is applied to the worship of Christ (Acts ii, 21; vii, 59; ix, 14; Rom. x, 12; 1 Cor. i, 2). See Worship.

II. Divine Call. (I.) The word "call" is used in Scripture with various significations, as applied to the Almighty with respect to men. 1. In its ordinary sense of "to name," to "designate" (of which examples are not necessary), and also in the sense of "to be," e. g. "He shall be called the Son of God" (Luke i, 35); "His name shall be called Wonderful" (Isa. ix, 6); that is, he shall be the Son of God, he shall be wonderful, and shall be thus acknowledged. 2. In the designation of individuals to some special office or function, e. g. the call of Bezaleel (Exod. xxxi, 2); the calling of the judges, prophets, etc. (e. g. Isa. xxii, 20; Acts xiii, 2). 3. In the designation of nations to certain functions, privileges, or punishments (Lam. ii, 22; Isa. v, 26), especially of Israel to be God's chosen people (Deut. vii, 6-8; Isa. xli, 9; xlii, 6; xliii, 1; xlviii, 12-15; li, 2; Hos. xi, 1). 4. To denote the invitation to sinners to accept the grace of God in the gift of His Son (Matt. ix, 13; xi, 28; xxii, 4; Luke xiv, 16, 17). 5. To denote the extent of the divine invitation, to Gentiles as well as Jews, showing the universality of the call (Rom. ix, 24, 25). 6. To denote a condition in life (1 Cor. vii, 20, etc.).

(II.) Two questions arise as to the divine *call* to men, (1.) Why do not all who receive it embrace it? and (2) Why have not *all* mankind even yet had the invitation? In view of these questions, the old Lutheran divines speak of the *vocatio ordinaria directa* (the ordinary direct call) as being, 1. *Seria*, i. e. really meant as a call on God's part, as he desires and intends the salvation of all. This is opposed to the Calvinistic view, which maintains that only such as are predestined to salvation are really called. 2. *Efficax*, or better *Sufficiens*, i. e. always adequate to the conversion, not only of those who heed the call, but of those who disregard it; and therefore, 3. *Resistibilis*, resistible, and not compulsory (Quenstedt, *Theol. Did.* iii); and also, 4. *Universalis*, universal. God called all the human race (1.) in the promise of Christ to bruise the serpent's head (Gen. iii, 15), given to the race through our first parents; (2.) in Noah, the preacher of righteousness, a call to all *his* descendants (Gen. ix, 9; 2 Pet. ii, 5); (3.) in the Gospel commission (Matt. xxviii, 19; Mark xvi, 15; comp. Rom. x, 18; Col. i, 6; Acts xvii, 30). The commission extended to "all the world," and its execution is declared to have been accomplished in Acts xvii, 30; Rom. x, 18; Col. i, 6, 23. The question whether even America was reached by the first preaching of Christianity is treated by Moebius in his essay entitled *An ab Apostolis Evangelium etiam Americanis fuerit Annunciatum.* And where the ἀποστολή did not go, the ἐπιστολή did. As to the failure of men to receive and obey the divine call, it is not God's fault, but their own. He "calls," but they "will" not. In general, it may be assumed that wherever the Church of God is set up, men receive the divine call, and their responsibility is proportional to the degree of light which shines upon them (Matt. xi, 20-24; xxiii, 37; Luke xii, 47, 48). The same *principle* applies to the case of heathen. Here also lies the duty of the Church to send missions to the heathen.

(III.) The Calvinistic doctrine of *effectual calling* is thus set forth in the *Westminster Confession:*

"1. All those whom God hath predestinated unto life, and those only, he is pleased, in his appointed and accepted time, effectually to call, by his Word and Spirit, out of that state of sin and death in which they are by nature, to grace and salvation by Jesus Christ; enlightening their minds spiritually and savingly to understand the things of God; taking away their heart of stone, and giving unto them a heart of flesh; renewing their wills, and by his *Almighty power determining them to that which is good;* and effectually drawing them to Jesus Christ, yet so as they come most freely, being made willing by his grace.

"2. This effectual call is of God's free and special grace alone, not from any thing at all foreseen in man, who is altogether passive therein, until, being quickened and renewed by the Holy Spirit, he is thereby enabled to answer this call, and to embrace the grace offered and conveyed in it.

"3. Elect infants, dying in infancy, are regenerated and saved by Christ through the Spirit, who worketh when, and where, and how he pleaseth. So also are all other elect persons, who are incapable of being outwardly called by the ministry of the Word.

"4. Others not elected, although they may be called by the ministry of the Word, and may have some *common operations* of the Spirit, yet they never truly come unto Christ, and therefore cannot be saved; *much less can men not professing the Christian religion be saved in any other manner whatsoever, be they ever so diligent to frame their lives according to the light of nature*, and the law of that religion they do profess; and to assert and maintain that they may is very pernicious, and to be detested."

The scriptural arguments for and against the doctrine are thus stated by Watson:

1. According to the Calvinistic view, "in the golden chain of spiritual blessings which the apostle enumerates in Rom. viii, 30, originating in the divine predestination, and terminating in the bestowment of eternal glory on the heirs of salvation, that of calling forms an important link. 'Moreover, whom he did predestinate, them he also called; and whom he called, them he also glorified.' Hence we read of 'the called according to his purpose,' Rom. viii, 28. There is indeed a universal call of the Gospel to all men; for wherever it comes it is the voice of God to those who hear it, calling them to repent and believe the divine testimony unto the salvation of their souls; and it leaves them inexcusable in rejecting it (John iii, 14-19); but this universal call is not inseparably connected with salvation; for it is in reference to it that Christ says, 'Many are called, but few are chosen' (Matt. xxii, 14). But the Scripture also speaks of a calling which is effectual, and which consequently is more than the outward ministry of the Word; yea, more than some of its partial and temporary effects upon many who hear it, for it is always ascribed to God's making his word effectual through the enlightening and sanctifying influences of his Holy Spirit. Thus it is said, 'Paul may plant, and Apollos water, but God giveth the increase' (1 Cor. iii, 6, 7). Again, He is said to have 'opened the heart of Lydia, that she attended to the doctrine of Paul' (Acts xvi, 14). 'No man can come unto Christ, except the Father draw him' (John vi, 44). Hence faith is said to be the gift of God (Eph. ii, 8; Phil. i, 29). The Spirit takes of the things of Christ and shows them to men (John xvi, 14), and thus opens their eyes, turning them from darkness to light, and from the power of Satan unto God (Acts xxvi, 18). And so God saves his people, not by works of righteousness which they have done, but according to his mercy, by the washing of regeneration and renewing of the Holy Spirit (Titus iii, 5). Thus they are saved, and called with a holy calling, not according to their works, but according to the divine purpose and grace which was given them in Christ Jesus before the world began (2 Tim. i, 9).

"2. To this it is replied that this whole statement respecting a believer's calling is without any support from the Scriptures. 'To call' signifies to invite to the blessings of the Gospel, to offer salvation through Christ, either by God himself, or, under his appointment, by his servants; and in the parable of the marriage of the king's son (Matt. xxii, 1-14), which appears to have given rise, in many instances, to the use of this term in the epistles, we have three descriptions of 'called' or invited persons. (1.) The disobedient, who would not come in at the call, but made light of it. (2.) The class of persons represented by the man who, when the king came in to see his guests, had not on the wedding garment, and with respect to whom

our Lord makes the general remark, 'For many are called, but few are chosen;' so that the persons thus represented by this individual culprit were not only 'called,' but actually came into the company. (3.) The approved guests—those who were both called and chosen. As far as the simple calling or invitation is concerned, all stood upon equal ground—all were invited; and it depended upon their choice and conduct whether they embraced the invitation and were admitted as guests. We have nothing here to countenance the notion of what is termed 'effectual calling.' This implies an irresistible influence exerted upon all the approved guests, but withheld from the disobedient, who could not, therefore, be otherwise than disobedient, or, at most, could only come in without that wedding garment, which it was never put into their power to take out of the king's wardrobe, and the want of which would necessarily exclude them, if not from the Church on earth, yet from the Church in heaven. The doctrine of Christ's parables is in entire contradiction to this notion of irresistible influence; for they who refused and they who complied but partially with the calling are represented, not merely as being left without the benefit of the feast, but as incurring additional guilt and condemnation for refusing the invitation. It is to this offer of salvation by the Gospel, this invitation to spiritual and eternal benefits, that St. Peter appears to refer when he says, 'For the *promise* is unto you and to your children, and to all that are afar off, even as many as the Lord our God shall *call*' (Acts ii, 39); a passage which declares 'the promise' to be as extensive as the 'calling,' in other words, as the offer or invitation. To this also St. Paul refers (Rom. i, 5, 6), 'By whom we have received grace and apostleship, for obedience to the faith among all nations, for his name;' that is, to publish his Gospel, in order to bring all nations to the obedience of faith; 'among whom ye are also the *called* of Jesus Christ;' you at Rome have heard the Gospel, and have been invited to salvation in consequence of this design. This promulgation of the Gospel, by the personal ministry of the apostle, under the name of *calling*, is also referred to in Gal. i, 6, 'I marvel that ye are so soon removed from him that *called you* into the grace of Christ,' obviously meaning that it was he himself who had called them, by his preaching, to embrace the grace of Christ. So also in chap. v, 13, 'For, brethren, ye have been *called* unto liberty.' Again (1 Thess. ii, 12), 'That ye would walk worthy of God, who hath *called* you,' invited you, 'to his kingdom and glory.'

"3. In our Lord's parable it will also be observed that the persons called are not invited as separate individuals to partake of solitary blessings; but they are called to 'a feast,' into a company or society, before whom the banquet is spread. The full revelation of the transfer of the visible Church of Christ from Jews by birth to believers of all nations, was not, however, then made. When this branch of the evangelic system was fully revealed to the apostles, and taught by them to others, that part of the meaning of our Lord's parable which was not at first developed was more particularly discovered to his inspired followers. The calling of guests to the evangelical feast, we then more fully learn, was not the mere calling of men to partake of spiritual benefits, but calling them also to form a spiritual society composed of Jews and Gentiles, the believing men of all nations, to have a common fellowship in these blessings, and to be formed into this fellowship for the purpose of increasing their number, and diffusing the benefits of salvation among the people or nation to which they respectively belonged. The invitation, 'the calling,' of the first preachers was to all who heard them in Rome, in Ephesus, in Corinth, and other places; and those who embraced it, and joined themselves to the Church by faith, baptism, and continued public profession, were named, especially and eminently, 'the called,' because of their obedience to the invitation. They not only put in their claim to the blessings of Christianity individually, but became members of the new Church, that spiritual society of believers which God now visibly owned as his people. As they were thus called into a common fellowship by the Gospel, this is sometimes termed their 'vocation;' as the object of this Church state was to promote 'holiness,' it is termed a 'holy vocation;' as sanctity was required of the members, they were said to have been 'called to be saints;' as the final result was, through the mercy of God, to be eternal life, we hear of 'the hope of their calling,' and of their being 'called to his eternal glory by Christ Jesus.'

"4. These views will abundantly explain the various passages in which the term *calling* occurs in the epistles: 'Even us whom he hath *called*, not of the Jews only, but also of the Gentiles' (Rom. ix, 24); that is, whom he hath made members of his Church through faith. 'But unto them which are *called*, both Jews and Greeks, Christ the power of God and the wisdom of God;' the wisdom and efficacy of the Gospel being, of course, acknowledged in their very profession of Christ, in opposition to those to whom the preaching of 'Christ crucified' was 'a stumbling-block' and 'foolishness' (1 Cor. i, 24). 'Is any man *called*' (brought to acknowledge Christ, and to become a member of his Church), 'being circumcised? let him not become uncircumcised. Is any *called* in uncircumcision? let him not be circumcised' (1 Cor. vii, 18). 'That ye walk worthy of the *vocation* wherewith ye are called. There is one body and one Spirit, even as ye are *called* in one hope of your calling' (Eph. iv, 1, 4). 'That ye would walk worthy of God, who hath *called* you to his kingdom and glory' (1 Thess. ii, 12). 'Through sanctification of the Spirit, and belief of the truth, whereunto he called you by our Gospel, to the obtaining of the glory of our Lord Jesus Christ' (2 Thess. ii, 13, 14). 'Who hath saved us and *called* us with a holy calling; not according to our works, but according to his own purpose and grace, which was given us in Christ Jesus before the world began, but is now made manifest by the appearing of our Saviour Jesus Christ' (2 Tim. i, 9, 10). On this passage we may remark that the 'calling' and the 'purpose' mentioned in it must of necessity be interpreted to refer to the establishment of the Church on the principle of faith, so that it might include men of all nations; and not, as formerly, be restricted to natural descent. For *personal election* and a purpose of *effectual personal calling* could not have been hidden till manifested by the 'appearing of Christ,' since every instance of true conversion to God in any age prior to the appearing of Christ would be as much a manifestation of eternal election, and an instance of personal effectual calling, according to the Calvinistic scheme, as it was after the appearance of Christ. The apostle is speaking of a purpose of God, which was kept *secret* till revealed by the Christian system; and from various other parallel passages we learn that this secret, this 'mystery,' as he often calls it, was the union of the Jews and Gentiles in 'one body,' or Church, by faith.

"5. In none of these passages is the doctrine of the exclusive calling of a set number of men contained; and the Synod of Dort, as though they felt this, only attempt to *infer* the doctrine from a text already quoted, but which we will now more fully notice: 'Whom he did predestinate, them he also *called*; and whom he *called*, them he also justified; and whom he justified, them he also glorified' (Rom. viii, 30). This is the text on which the Calvinists chiefly rest their doctrine of effectual calling; and tracing it, as they say, through its steps and links, they conclude that a set and determinate number of persons having been predestinated unto salvation, this set number only are *called effectually*, then justified, and finally glorified. But this passage was evidently nothing to the purpose,

unless it had spoken of a set and determinate number of men as predestinated and called, independent of any consideration of their faith and obedience, which number, as being determinate, would, by consequence, exclude the rest. The context declares that those who are foreknown, and predestinated to eternal glory, are true believers, those who 'love God,' as stated in a subsequent verse; for of such only the apostle speaks; and when he adds, 'Moreover, whom he did predestinate, them he also called, and whom he called, them he also justified, and whom he justified, them he also glorified,' he shows in particular how the divine purpose to glorify believers is carried into effect through all its stages. The great instrument of bringing men to 'love God' is the Gospel; they are, therefore, *called*, invited by it, to this state and benefit; the calling being obeyed, they are *justified;* and being justified, and continuing in that state of grace, they are *glorified.* Nothing, however, is here said to favor the conclusion that many others who were *called* by the Gospel, but refused, might not have been justified and glorified as well as they; nothing to distinguish this calling into common and effectual; and the very guilt which those are every where represented as contracting who despised the Gospel calling shows that they reject a grace which is sufficient, and sincerely intended, to save them."—Watson, *Institutes*, ii, 352 sq.; Herzog, *Real-Encyklopädie*, ii, 104; Nitzsch, *Christliche Lehre*, § 141; Warren, *Systemat. Theologie*, p. 147.

III. A *call to the ministry* of the Gospel is regarded by Christians generally as proceeding from God; and the Church of England, the Protestant Episcopal Church, and the Methodist Episcopal Church, require of candidates for ordination an express profession that they trust they are so moved of the Holy Ghost. See MINISTRY.

IV. MINISTERIAL CALL is an invitation on the part of a congregation to a preacher to become their settled pastor. See INSTALLATION.

Callenberg, JOHANN HEINRICH, was born January 12, 1694, in Saxe-Gotha. He studied at Halle, giving special attention to the Oriental languages, to which he was originally led by becoming a member of the *Collegium Orientale Theologicum*, which was established at Halle in 1702. He had for special tutor Solomon Negri, a learned Orientalist from Damascus. He was appointed professor (*extraord.*) of philosophy in 1727, and professor (*ordin.*) of theology in 1739. He became deeply interested in Protestant missions to the East, especially among the Jews and Mohammedans. In 1728 he organized a school for the education of missionaries; and he afterward established, at his own expense, a printing-office for the publication of works in German, Arabic, and Hebrew for the furtherance of the missionary cause. His students went out over Europe as missionaries to the Jews, and some of them even to Asia and Africa. He printed in Arabic portions of the O. T., the whole of the N. T., Luther's *Shorter Catechism*, the *Imitation of Jesus Christ* (somewhat curtailed), portions of Grotius on the *Truth of the Christian Religion*, the *Rudiments of the Arabic Language*, and other works for the use of missionaries in the East. With a view to the conversion of the Jews, he wrote a *Kurze Anleitung zur Jüdisch-Teutschen Sprache* (Short Introduction to the Speech of the German Jews, 8vo, 1733), to which he added in 1736 a short dictionary of the corrupt Hebrew spoken among themselves by the Jews of Germany. In 1728-36 he published *Berichte von einem Versuch das Jüdische Volk zur Erkenntniss des Christlichen anzuleiten* (3 vols. 8vo); in 1733, *De Conversione Muhammedanorum ad Christum expetita tentataque* (12mo). He continued writing, translating, and printing a variety of works useful for the missionaries till his death, which occurred at Halle, July 16, 1760. The mere list of his publications would fill a column, but they are not of sufficient scientific value to require enumeration here. But the name of Callenberg deserves always to be cherished in the Christian Church as that of one of the founders of Protestant missions, and of a devoted and self-sacrificing laborer in that cause.—Doering, *Die Gelehrten Theologen Deutschlands*, i, 221 sq.; Hoefer, *Nouvelle Biographie Générale*, vii, 202; Ersch und Gruber, *Allgemeine Encyclopädie*, s. v.

Callender, Elisha, minister of the first Baptist church in Boston, was the son of Ellis Callender, who officiated as pastor of the First Baptist church in Boston for many years, dying about 1726, at about eighty years of age. The son, Elisha, was born in Boston, and graduated as bachelor of arts at Harvard College in 1710. He was baptized and admitted to church membership August 10, 1713, and was ordained as a Baptist minister May 21, 1718, and Drs. Increase and Cotton Mather and Mr. Webb, though of a different denomination, gave their assistance. It is said that Thomas Hollis (a Baptist) was so impressed by this catholic procedure when he heard of it in England, that he made his well-known benefactions to Harvard College in consequence. Mr. Callender abounded in labors not only in Boston, but throughout the commonwealth, till his death, March 31, 1738. He was the first American Baptist minister who had received a college education.—Sprague, *Annals*, vi, 34; Allen, *Biographical Dict.* s. v.

Callender, John, an eminent Baptist minister, nephew of Elisha Callender, was born about 1706, and graduated at Harvard College in 1723. He was ordained colleague with Mr. Peckham as pastor of the church at Newport, Oct. 13, 1731. Here he labored usefully for seventeen years, and died Jan. 26, 1748. He collected many papers relating to the history of the Baptists in this country, which were used by Backus. He published a *Historical Discourse on Rhode Island and Providence Plantations* (1739); also a *Sermon at the Ordination of Jeremiah Condy* (1739); and a *Sermon on the Death of Mr. Clap, of Newport* (1745)— —Sprague, *Annals*, vi, 37; Allen, *Biographical Dictionary*, s. v.

Calling (κλῆσις, *vocatio*), a term used in theology to designate the divine invitation to man to share in the gift of salvation. See CALL.

Callirrhŏë (Καλλιῤῥόη, *beautiful stream*), the name given to certain warm springs on the eastern side of the Jordan, not far from, and flowing into, the Dead Sea, to which Herod the Great resorted during his last illness, by the advice of his physicians (Josephus, *Ant.* xvii, 6, 5). The same are probably meant by the *yemim'* (יֵמִים, Auth. Vers. "mules") of Gen. xxxvi, 24. See ANAH. Pliny (v, 16) also describes them ("calidus fons medicæ salubritatis") as possessing medicinal properties (Reland, *Palæst.* p. 302, 678). In May, 1818, these springs were visited by Irby and Mangles. Of the valley of Callirrhoë they say (*Travels*, p. 467-469): "The whole bottom is filled, and in a manner choked up, with a crowded thicket of canes and aspens of different species, intermixed with the palm, which is also seen rising in tufts in the recesses of the mountain's side in every place whence the springs issue. In one place a considerable stream of hot water is seen precipitating itself from a high and perpendicular shelf of rock, which is strongly tinted with the brilliant yellow of sulphur deposited upon it. On reaching the bottom, we found ourselves at what may be termed a hot river, so copious and rapid is it, and its heat so little abated. For some way the temperature is kept up by the constant supplies of water that flow into the river. In order to visit these sources in succession, we crossed over to the right bank, and, ascending by the mountain side, we passed four abundant springs, all within the distance of half a mile, discharging themselves into the stream at right angles with its course. We judged the distance from the Dead Sea, by the ravine, to be about one hour and a half. Maclean says there was a city

of the same name in the valley of Callirrhoë, in which we think he must be wrong, since there is not space for a town in the valley as far as we saw it. That Herod must have had some lodging when he visited these springs is true, and there are sufficient remains to prove that some sort of buildings have been erected." According to Josephus, the fortress of Machærus, which was rebuilt by Herod, was upon this hot-water stream, and not far from the fountains. It is supposed that John the Baptist was imprisoned and beheaded in this fortress, and that the feast was also made at Machærus, which, besides being a strong-hold, was also a palace, built by Herod the Great, and that Herod himself was now on his route toward the territory of Aretas, with whom he was at war. The ruins of this fortress still exist (Josephus, *Ant.* xvii, 6, 5; xviii, 5, 2; *War*, i, 33, 5). The Zurka Main, which empties itself into the Dead Sea, visited and described by Seetzen (*Reise*, ii, 336 sq.), is described as a sweet and thermal stream, and is doubtless the outlet of the hot streams of Callirrhoë (Ritter, *Erdk.* xv, 572, 573). Lieut. Lynch, who explored it in 1848, says: "The stream, twelve feet wide and ten inches deep, rushes in a southerly direction with great velocity into the sea. Temperature of the air, 70°; of the sea, 78°; of the stream, 94°; one mile of the chasm, 95°. It was a little sulphureous to the taste. The stream has worn its bed through the rock, and flows between the perpendicular sides of the chasm, and through the delta, bending to the south, about two furlongs, to the sea. The banks of the stream along the delta are fringed with canes, tamarisks, and the castor-bean. The chasm is 122 feet wide at the mouth, and for one mile up, as far as we traced it, does not lessen in width. The sides of the chasm are about eighty feet high where it opens upon the delta, but within they rise in altitude to upward of 150 feet on each side, where the trap formation is exhibited. In the bed of the chasm there was one stream, on the south side, eight feet wide and two deep, and two small streams in the centre, all rushing down at the rate of six knots per hour. There were no boulders in the bed of the ravine, which in the winter must, throughout its width and high up the sides, pour down an impetuous flood. The walls of the chasm are lofty and perpendicular, of red and yellow sandstone, equally majestic and imposing, but not worn in such fantastic shapes nor of so rich a hue as those of the Arnon. Waded up about a mile, and saw a few date-palm-trees growing in the chasm. The turns about 200 yards apart, at first gently rounded, but subsequently sharp and angular. There was a succession of rapids, and a cascade of four, and a perpendicular fall of five or six feet. A little above the rapid trap shows over sandstone. The current was so strong that, while bathing, I could not, with my feet against the rock, keep from being carried down the stream; and, walking where it was but two feet deep, could with difficulty retain a foothold with my shoes off. At 7 P.M., bathed first in the sea and afterward in the stream—a most delicious transition from the dense, acrid water of the sea, which made our innumerable sores smart severely, to the soft, tepid, and refreshing waters of the Callirrhoë" (*Expedition*, p. 371). See also LASHA.

Callis'thenes (Καλλισθένης, a frequent Greek name), a partisan of Nicanor, who was burnt by the Jews on the defeat of that general in revenge for his guilt in setting fire to "the sacred portals" (2 Macc. viii, 33).—Smith, s. v. See NICANOR.

Callistus. See CALIXTUS I.

Calmet, AUGUSTINE, a learned Benedictine, of the congregation of St. Vannes, born at Mesnil-la-Horgne Feb. 26, 1672. He studied at Breuil, and after having pronounced the vows in Oct., 1689, he proceeded to make his course of philosophy at the abbey of St. Evre, and afterward devoted himself to Hebrew, which he studied under Fabre, a Reformed divine. In 1704 he passed to the abbey of Munster, where he taught the young monks; and lectures which he there read to them formed the basis of his "Commentaries on the Old and New Testaments," which he wrote in Latin, but translated into French, and published in 1707 and 1716, in 23 volumes 4to. This work was followed by his *Histoire Sainte de l'Ancien et Nouveau Testament*—History of the Old and New Testaments (Paris, 1718, 2 vols. 4to), and his celebrated *Dictionary of the Bible*. In 1718 he was made abbot of St. Leopold's at Nancy, and ten years after he was removed to the abbey of Sénones, where he died (having refused a bishopric *in partibus*) Oct. 25, 1757. His *Life* was written by Fangé, his nephew (1763, 8vo), where a complete list of his numerous works will be found. The best edition (French) of the *Dictionnaire historique et critique de la Bible* is that of Paris, 1730 (4 vols. fol.). The best English editions are those of 1793 (4to, with additions) and of 1847 (edited by Taylor, 5 vols. 4to). His *Commentaire littéral sur tous les livres de l'Ancien et du Nouveau Testament* (reprinted at Paris, 1713, 26 vols. 4to, also 9 vols. fol.) was abridged, and published in 17 vols. 4to, at Avignon, 1767-1773; also translated into Latin, with the *Dissertations*, by Manse (Wirceb. 1789, 19 vols. 4to). Calmet's *Dictionary of the Bible* has, until lately, formed the basis of all subsequent works of the same kind. The best abridgment is that of Robinson, whose additions are perhaps, to the modern student, of more value than the original work.—*Biog. Univ.* vi, 559; Landon, *Eccles. Dict.* ii, 497. See DICTIONARIES (BIBLICAL).

Cal'neh (Heb. *Kalneh'*, כַּלְנֵה; Sept. Χαλάννη), the fourth of Nimrod's cities (Gen. x, 10), and probably not different from the CALNO (Heb. *Kalno'*, כַּלְנוֹ; Sept. Χαλάνη) of Isa. x, 9, or the CANNEH (Heb. *Kanneh'*, כַּנֵּה; Sept. Χαναα) of Ezek. xxvii, 23. The word is thought to mean "the fort of the god *Ana* or *Anu*," who was one of the chief objects of Babylonian worship. According to the Chaldee translation, with which Eusebius and Jerome agree, this is the same place that was subsequently called *Ctesiphon*. It lay on the Tigris, opposite Seleucia, and was for a time the capital of the Parthians, and the winter residence of the Parthian kings (Strabo, xvi, p. 812; Cellarii *Notit.* ii, 774; see Bochart, *Phaleg*, iv, 18; Michaelis, *Spicileg.* i, 228). This opinion respecting Calneh derives some support from the circumstance that the district named Ctesiphon was called by the Greeks *Chalonitis* (Pliny, *Hist. Nat.* vi, 26, 27; Polyb. v, 44); but, on the other hand, this province does not appear to have extended so far west as Calneh must have lain. Ammianus Marcellinus (xxiii, 6, 23) states that it was the Persian king Pacorus (who reigned from A.D. 71 to 107) who changed the name of the city to Ctesiphon; but that name must have been more ancient, as it is mentioned by Polybius. In the time of the prophet Amos Calneh appears to have constituted an independent principality (Amos vi, 2; Sept. omits, v. r. Καλάνη or Χαλάννη); but not long after it became, with the rest of Western Asia, a prey to the Assyrians (Isa. x, 9). About 150 years later, Calneh was still a considerable town, as may be inferred from its being mentioned by Ezekiel (xxvii, 23) among the places which traded with Tyre. We may gather from Scripture that in the eighth century B.C. Calneh was taken by one of the Assyrian kings, and never recovered its prosperity. Hence it is compared with Carchemish, Hamath, and Gath (Isa. x, 9; Amos vi, 2), and regarded as a proof of the resistless might of Assyria. The site of Ctesiphon was afterward occupied by *El-Madain*, i. e. *the* (*two*) *cities*, of which the only remains are the ruins of a remarkable palace called *Tauk-kesra*, or "Arch of Khosroes," some mounds of rubbish, and a considerable extent of massive wall toward the river. (See Smith's *Dict. of Class. Geog.* s. v. Ctesiphon.)

More recent explorers have rendered it probable that

the site of Calneh is the modern *Niffer*, which was certainly one of the early capitals, and which, under the name of *Nopher*, the Talmud identifies with Calneh (see the *Yoma*). Arab traditions made Niffer the original Babylon, and said that it was the place where Nimrod endeavored to mount on eagles' wings to heaven. Similarly the Sept. speak of Calneh or Calno as "the place where the tower was built" (Isa. x, 9). Niffer is situated about sixty miles E.S.E. of Babylon, in the marshes on the left bank of the Euphrates. It has been visited and explored by Mr. Layard (*Nin. and Bab.* p. 468 sq.), and is thus described by Mr. Loftus (*Chaldæa*, p. 101): "The present aspect of Niffer is that of a lofty platform of earth and rubbish, divided into two nearly equal parts by a deep channel—apparently the bed of a river—about 120 feet wide. Nearly in the centre of the eastern portion of this platform are the remains of a brick tower of early construction, the *debris* of which constitutes a conical mound rising seventy feet above the plain. This is a conspicuous object in the distance, and exhibits, when the brick-work is exposed, oblong perforations similar to those seen at Birs-Nimrud and other edifices of the Babylonian age. The western division of the platform has no remarkable feature, except that it is strewed with fragments of pottery, and other relics of a later period than the tower just alluded to. At the distance of a few hundred yards on the east of the ruins may be distinctly traced a low continuous mound, the remains probably of the external wall of the ancient city. As to the obelisk, the particular object of my visit, the Arabs positively declared that there was one, but none of them had seen it or could indicate its position on the mounds." See CANNEH.

Cal'no (Isa. x, 9). See CALNEH.

Calogĕri. See CALOYERS.

Calovius (or CALOV), ABRAHAM, a celebrated Lutheran divine and controversialist, was born in 1612 at Mohrungen in Prussia. He studied at Königsberg and Rostock, and became Professor of Theology at Wittemberg, where he obtained great distinction as a lecturer and controversial theologian. He died Feb. 25, 1686. He was a violent opponent of George Calixtus, whose gentleness he by no means shared. Indeed, so bitter was Calov's zeal, that it has been said of him that "he was born for an inquisitor." He wrote with great ability against the Socinians. His most important work was his *Biblia Illustrata* (Dresden, 1719, 4 vols. fol.), which contains the whole of Grotius's *Annotations*, with severe criticisms on them. In dogmatic theology he prepared a vast *Systema Locorum Theologicorum* (1655–1677, 12 tom.). In the Syncretistic controversy (q. v.) he took the most conspicuous part. His writings are very voluminous, nearly all bitterly controversial, and now little read.—Mosheim, *Ch. Hist.* ii, 241; Herzog, *Real-Encyklop.* s. v.

Caloyers or **Calogĕri.** The word *Calogeri* is from the Greek (καλόγεροι), and means *good old men*. The name *Caloyers* is of similar signification, and is generally given to the monks of the Greek Church. They are of the order of St. Basil, and consider it to be a sin to follow any other order than his. They are divided into three degrees: the novices, who are called *Archari*; the ordinary professed, called *Microchemi*; and the more perfect, called *Megalochemi*. They are likewise divided into Cœnobites, Anchorites, and Recluses. The Cœnobites are employed in reciting their offices from midnight to sunset; and as it is impossible, in so long an exercise, that they should not be overtaken with sleep, there is one monk appointed to awake them; and they are obliged to make three genuflexions at the door of the choir, and, returning, to bow to the right and left to their brethren. The Anchorites retire from the world, and live in hermitages in the neighborhood of the monasteries; they cultivate a little spot of ground, and never go out but on Sundays and holidays, to perform their devotions at the next monastery. The Recluses shut themselves up in grottoes and caverns on the tops of mountains, which they never leave, abandoning themselves entirely to Providence. They live on the alms sent them by the neighboring monasteries. The Caloyers have four Lents. The first and greatest is that of the resurrection or Easter: it lasts eight weeks, and is called the Grand Quarantain. During this Lent the monks drink no wine; and such is their abstinence that, if they are obliged, in speaking, to name milk, butter, or cheese, they always add this parenthesis, "Saving the respect due to the holy Lent." The second Lent is that of the holy apostles, which begins eight days after Whitsunday: it generally continues three weeks, sometimes longer. During this Lent the monks are allowed to drink wine. The third Lent is that of the assumption of the Virgin: it lasts fourteen days, during which they abstain from fish, except on Sundays and on the transfiguration of our Lord. The fourth Lent is that of the Advent. The Caloyers, in addition to the usual monkish habit, wear over their shoulders a square piece of stuff, on which are represented the cross and the other marks of Christ's passion, with these letters: IC. XC. NC. Ἰησοῦς Χριστὸς νικᾷ, *Jesus Christ conquers.* The inscription was sometimes written thus: IC. XC. NI KA; and we find it occasionally arranged, especially on coins, in the form of a cross, thus, IC.|XC. / NI|KA. Visitors or exarchs are placed over them, who visit the convents only to draw from them sums of money which the patriarch demands. Yet, notwithstanding these monks are compelled to pay both to their patriarch and to the Turks, their convents are very rich. They have many monasteries in Asia, on Mount Sinai, and in Palestine; in Europe, near Athens, in Chios, and in Amourgo, one of the Sporades, also on Mount Athos. Those on Mount Athos are the most celebrated, and are twenty-three in number. There are female Caloyers, or Greek nuns, who follow the rule of St. Basil. Their nunneries are always dependent on some monastery. See ATHOS; GREEK CHURCH.

Cal'phi (ὁ Χαλφί, v. r. Χαλφεί, perhaps for *Alphæus* [q. v.], Josephus Χαψαῖος, *Ant.* xiii, 5, 7), father of Judas, which latter was one of the two captains (ἄρχοντες) of Jonathan's army who remained firm at the battle of Gennesar (1 Macc. xi, 70).

Calvarists, or MISSIONARY PRIESTS OF CALVARY, a monastic congregation, established in 1630 by Hubert Charpentier, licentiate of the Sorbonne, on Mount Bethasam, in France, for propagating Romanism by missions. In 1638 they united with the Association for the Propagation of Faith, from which they separated again in 1650. In 1664 they were re-formed, and united with the congregation of St. Sulpice. The congregation disappeared in 1790, but arose again in 1826.

Cal'vary, a word occurring in the Auth. Vers. only in Luke xxiii, 33, and there not as a proper name, but arising from the translators having literally adopted the word *calvaria*, i. e. a bare *skull*, the Latin word by which the κρανίον of the evangelists is rendered in the Vulgate, κρανίον, again, being nothing but the Greek interpretation of the Hebrew GOLGOTHA (q. v.).

1. *Import of the Name.*—Many have held that Golgotha was the place of public execution, the Tyburn of Jerusalem, and that hence it was termed the "place of a skull." Another opinion is that the place took its name from its shape, being a hillock of a form like a human skull. It is true, there is no express mention of a mount in either of the narratives. See CRUCIFIXION. That the place, however, was of some such shape seems to be generally agreed, and the traditional term *mount*, applied to Calvary, appears to confirm this idea. Such a shape, too, it must be allowed, is in entire agreement with the name, that is,

"skull." To these considerations there are added certain difficulties which arise from the other explanation. So far as we know, there is no historical evidence to show that there was a place of public execution where Golgotha is commonly fixed, nor that any such place, in or near Jerusalem, bore the name Golgotha. Nor is the term Golgotha descriptive of such a place; to make it so, to any extent, the name should have been "skulls," or "the place of skulls." Equally unapt is the manner in which the writers of the Gospel speak of the place: Matthew calls it "a place called Golgotha; that is to say, a place of a skull;" Mark, "the place Golgotha, which is, being interpreted, the place of a skull;" Luke, "the place which is called Calvary;" John, "a place called of a skull, which is called in the Hebrew Golgotha." In truth, the context seems to show that the Roman guard hurried Jesus away and put him to death at the first convenient spot; and that the rather because there was no small fear of a popular insurrection, especially as he was attended by a crowd of people. This place, we may suppose, was not far from the judgment-hall, which was doubtless either near Fort Antonia or in the former palace of Herod. See PRÆTORIUM. In either case, the crucifixion would most naturally have occurred at the *north-west* of the city. Somewhere in the north, it is clear, they would execute him, as thus they would most easily effect their object. But if they chose the north, then the road to Joppa or Damascus would be most convenient, and no spot in the vicinity would probably be so suitable as the slight rounded elevation which bore the name of Calvary. That some hillock would be preferred it is easy to see, as thus the exposure of the criminal and the alleged cause of his crucifixion would be most effectually secured. Dr. Barclay is at great pains to show (*City of the Great King*, p. 78 sq.) that the vicinity of the garden of Gethsemane is the more probable location of Calvary, but his arguments are made up of a series of the most uncritical conjectures. Indeed, the very fact that of the arbitrary positions assigned by all those who (chiefly from an ultra Protestant prejudice apparently) reject the traditionary site, no two agree, while all are alike destitute of any historical basis, is an important evidence in favor of the current identification. See JERUSALEM.

2. *Scriptural Notices of the Locality.*—The account in the evangelists touching the place of the crucifixion and burial of our Lord is as follows: Having been delivered by Pilate to be crucified, Jesus was led away, followed by a great company of people and women, who bewailed his fate. On the way the soldiers met one Simeon, a Cyrenian, *coming out of the country*, who was compelled to bear Jesus's cross. When they were come to the place which is called Calvary, there they crucified him. This place was nigh to the city; and, sitting down, they watched him there. They that passed by reviled him, wagging their heads and scoffing. Likewise also the chief priests mocked him, with the scribes and elders, and the people stood beholding. The soldiers, too, mocked him. There stood by the cross of Jesus his mother, and his mother's sister, and Mary Magdalene; and all his acquaintance, and the women that followed him from Galilee, stood afar off, beholding these things. *In the place where he was crucified* there was a garden, and in the garden a new sepulchre hewn out in the rock; *there* laid they Jesus, and rolled a great stone to the door of the sepulchre. The writer of the Epistle to the Hebrews adds that Jesus suffered *without the gate*, subjoining, "Let us therefore go forth to him without the camp (or the city), bearing his reproach" (Heb. xiii, 11, 13). We thus learn that the crucifixion and burial took place out of the city, and yet nigh to the city, apparently at the north-west, and probably just on the outer side of the second wall. It is also clear that the place was one around which many persons could assemble, near which wayfarers were passing, and the sufferers in which could be seen or addressed by persons who were both near and remote; all which concurs in showing that the spot was one of some elevation, and equally proves that "this thing was not done in a corner," but at a place and under circumstances likely to make Calvary well known and well remembered alike by the foes and the friends of our Lord.

3. *Line of Tradition respecting the Spot.*—Was it likely that this recollection would perish? Surely, of all spots, Calvary would become the most sacred, the most endearing in the primitive Church. Nor did the Jew, with his warm gushing affections, feel on such a point less vividly than his fellow-men. "The tombs of the prophets," "the sepulchre of David," were, we read (Matt. xxiii, 29; Acts ii, 29), reverentially regarded and religiously preserved from age to age. That of "David's Lord" would assuredly not be neglected. It was a season of public religious festivity when our Lord suffered. Jerusalem was then crowded with visitors from foreign parts. Such, too, was the fact at the time of the effusion of the Holy Spirit. These pilgrims, however, soon returned home, and wherever they went many carried with them the news of the crucifixion of Jesus, and told of the place where he had been executed. Perhaps no one spot on earth had ever so many to remember it and know its precise locality as the place where Jesus died and rose again. First in Jerusalem, and soon in all parts of the earth, were there hearts that held the recollection among their most valued treasures. Accordingly, we learn from the passage in Hebrews that, far on in the first century, the tradition was preserved in so living a form as to be made the subject of a figurative illustration of Christian doctrine. The memory of distinguished places is among the least perishable of earthly things. Fathers would convey their knowledge and their impressions to sons; one generation and one Church to another. The passage in the Hebrews would tend to keep alive the recollection. Moreover, it was the fate of Jerusalem, after its capture by the Romans, to become a heathen city; even its name was changed into Colonia Ælia Capitolina. In the excess of their triumphant joy, the conquerors made Jupiter its patron god, and erected statues of Jupiter and Venus on the place where Jesus had been crucified (Sozomen, xi, 1). This was done perhaps not so much to insult as to conciliate. New-comers in religion have always availed themselves of established feelings, and therefore erected their sacred edifices on places already consecrated in the minds of the people. The mere fact of a temple to Venus standing on Calvary suffices to show that Calvary was the place where Jesus suffered. The temple thus takes up the tradition, and transmits it in stone and marble to coming ages. This continuation of the tradition is the more important, because it begins to operate at a time when the Christians were driven from Jerusalem. But the absence of the Christians from the Holy City was not of long duration, and even early in the third century we find pilgrimages from distant places to the Holy Land had already begun for the express purpose of viewing the spots which the presence and sufferings of the Saviour had rendered sacred and memorable (*Hist. Hierosol.* p. 591; Euseb. *Hist. Eccles.* vi, 11). A century later, Eusebius (A.D. 315) informs us that Christians visited Jerusalem from all regions of the earth for the same object. Early in the fourth century, Eusebius and Jerome write down the tradition and fix the locality of Calvary in their writings. Eusebius was born at Cæsarea in Palestine about A.D. 270. In 315 he became a bishop in his native country, and died in 340. He was a learned man, and wrote a history of the Christian Church. About 330 he composed his *Onomasticon*, which was expressly devoted to the business of determining and recording the sites of holy and other places in Palestine. This work of Eusebius, written in Greek, Jerome afterward translated into Latin, and thus added his authority to

that of Eusebius. Jerome took up his residence in the Holy Land in the latter part of the fourth century, and remained there till his death. (For an estimate of the value of these geographical authorities, see Reland, *Palæst.* p. 467 sq.) Pilgrims now streamed to Jerusalem from all parts of the world, and that site was fixed for Golgotha which has remained to the present hour.

4. *Erection of the "Church of the Holy Sepulchre" over the Site.*—The acts of the Emperor Constantine and his mother Helena gave a permanent and public expression to this tradition. This empress, when very far advanced in life, visited Jerusalem for the express purpose of erecting a church on the spot where the Lord Jesus had been crucified. The preceding details show that the preservation of the memory of the locality was any thing but impossible. Helena would naturally be solicitous to discover the true spot, whence ensues the likelihood that she was not mistaken. She had previously heard that the holy places had been heaped up and concealed by the heathen, and resolved to attempt to bring them to light, εἰς φῶς ἀγαγεῖν (Theoph. in *Chron.* p. 18). "On her arrival at Jerusalem, she inquired diligently of the inhabitants. Yet the search was uncertain and difficult, in consequence of the obstructions by which the heathen had sought to render the spot unknown. These being all removed, the sacred sepulchre was discovered, and by its side three crosses, with the tablet bearing the inscription written by Pilate" (Robinson, *Bibl. Res.* ii, 14; Theodoret, i, 17). This account of her proceedings, taken from one who labors to bring into discredit the whole of Helena's proceedings, and who is far too indiscriminate and sweeping in his hostility to the *primitive* traditions of the Church, shows sufficiently that Helena was cautious in her proceedings; that there did exist a tradition on the subject; that by that tradition the empress was guided; and that she found reason to fix the site of Calvary on the spot where the heathen had erected their temple and set up their profane rites. That no small portion of the marvellous, not to say legendary and incredible, is mixed up in the accounts which the ecclesiastical historians have given, we by no means deny; but we see no reason whatever, and we think such a course very unphilosophical, to throw doubt unsparingly over the whole, as (by no means in the best taste) does Dr. Robinson. However, on the site thus ascertained, was erected, whether by Constantine or Helena, certainly by Roman influence and treasure, a splendid and extensive Christian temple. Socrates (*Eccles. Hist.* i, 17) says, "The emperor's mother erected over the place where the sepulchre was a most magnificent church, and called it New Jerusalem, building *it opposite to that old* deserted Jerusalem" (comp. Euseb. *Vit. Const.* iii, 33). This church was completed and dedicated A.D. 335. It was a great occasion for the Christian world. In order to give it importance and add to its splendor, a council of bishops was convened, by order of the emperor, from all the provinces of the empire, which assembled first at Tyre and then at Jerusalem. Among them was Eusebius, who took part in the solemnities, and held several public discourses in the Holy City (Euseb. *Vit. Const.*; Robinson, ii, 13). The Church of the Holy Sepulchre was burnt by the Persians in A.D. 614. It was shortly after rebuilt by Modestus with resources supplied by John Eleemor, patriarch of Alexandria. The basilica or martyrion erected under Constantine remained as before. The Mohammedans next became masters of Jerusalem. At length Harûn er-Rashid made over to Charlemagne the jurisdiction of the holy sepulchre. Palestine again became the scene of battles and bloodshed. Muez, of the race of the Fatimites, transferred the seat of his empire to Cairo when Jerusalem fell into the hands of new masters, and the holy sepulchre is said to have been again set on fire. It was fully destroyed at the command of the third of the Fatimite caliphs in Egypt, the building being razed to the foundations. In the reign of his successor it was rebuilt, being completed A.D. 1048; but instead of the former magnificent basilica over the place of Golgotha, a small chapel only now graced the spot. The Crusades soon began. The Crusaders regarded the edifices connected with the sepulchre as too contracted, and erected a stately temple, the walls and general form of which are admitted to remain to the present day (Robinson, ii, 61). So recently, however, as A.D. 1808, the church of the holy sepulchre was partly consumed by fire; but, being re-

Front View of the Church of the Holy Sepulchre.

built by the Greeks, it now offers no traces of its recent desolation.

5. *Objections to the Identification.*—The sole evidence of any weight in the opposite balance is that urged by Robinson, that the place of the crucifixion and the sepulchre are now found in the midst of the modern city. But, to render this argument decisive, it should be proved that the city occupies now the same ground that it occupied in the days of Christ. It is, at least, as likely that the city should have undergone changes as that the site of the crucifixion should have been mistaken. The identity of such a spot is more likely to be preserved than the size and relative proportions of a city which has undergone more violent changes than probably any other place on earth. The present walls of Jerusalem were erected so late as A.D. 1542; and Robinson himself remarks that a part of Zion is now left out (p. 67). If, then, the city has been contracted on the south, and if, also, it was after the death of Christ expanded on the north, what should we expect but to find Golgotha in the midst of the modern city?

Jerusalem, in the days of Christ, had two walls, termed the "first" and the "second." It is with the second wall that we are here chiefly concerned. It began at a tower, named Gennath, of the first wall, curved outward to the north, and ended at the castle of Antonia. The third wall embraced a wide suburb on the north and north-west. This comprehended a sort of new city, and was built in consequence of the large population which by degrees fixed their abode in the space which falls between the second and third walls. This wall was begun under Claudius, at least forty-one years after Christ (Josephus, *War*, v, 4, 2; comp. Tacit. *Hist.* v, 12). This third wall, then, did not exist in the time of our Lord; and Robinson allows that if the present site of the sepulchre fell without the second wall, all the conditions of the general question would be satisfied. Many travellers and antiquarians have decided that this was the case, while others, more numerous perhaps, but not better qualified to judge, have come to the opposite conclusion. See JERUSALEM (*Topography*). (It is worthy of remark that Dr. Kiepert, of Berlin, the most experienced cartographer probably, especially on this and kindred subjects, has vacillated on this point in the maps of his own construction, some of them including and others excluding the contested site along the course of the wall in question.) The whole question turns upon the position of the gate Gennath: if this was at the extreme north-west angle of Zion, then the second wall, in order to be at all "circling" (*κυκλούμενον*), could not well have excluded the site in question; but if, as is more probable, it was some distance east of the tower Hippicus (for while Josephus, *ut sup.*, expressly begins the first and third walls from this *tower*, he begins the second from this *gate*, situated along the northern part of the first wall), then the second wall could hardly have bent sufficiently to the west to include it. See GENNATH. The city bulged out on the north, as it contracted on the south, thus bringing Golgotha into its central parts. Robinson, however, asserts that the second wall must either have excluded the Pool of Hezekiah, which (as he thinks) was in the city, or included the site of the sepulchre, which was out of the city. This alternative, however, although by no means a fatal objection, is not absolutely necessary, as may be seen on reference to various plans of the city that have been constructed, in which the second wall leaves both where the Scriptures place them. See HEZEKIAH'S POOL. But the distance from the western point of the Temple to the present site of the sepulchre Robinson considers insufficient, it being only about a quarter of a mile. We know not that there is any thing in scriptural account which gives support to this notion. A distance of a quarter of a mile appears quite enough for the recorded events, to say nothing of the essential weakness of such a position; for how can Robinson know that his measures extended along the same ground as our Lord was hurried over? But reason has already been given why the Jews should have taken no very protracted course.

Two or three additional facts in confirmation of the identity of the present place may finally be adduced. Buckingham (*Palest.* p. 283) says, "The present rock called Calvary, and inclosed within the Church of the Holy Sepulchre, bears marks in every part that is naked of its having been a round nodule of rock standing above the common level of the surface." Scholz (*De Golgotha situ*, p. 9) states that he traced the remains of a wall, which ran as the second wall on the plan runs, excluding Golgotha, and taking in the Pool of Hezekiah (Raumer, p. 352). It may also be remarked that, since the publication of Robinson's work, Raumer has put forth a piece (*Beiträge zur Bib. Geog.* 1843), in which he revises his *Palästina* so far as Robinson's ascertained results render necessary; but he remains of the same opinion in regard to the possibility of the present Church of the Sepulchre being out of the city. At most, a very few hundred yards only can the original Golgotha have lain from the present site, and the evidence in favor of its identity, if not decisive, is far stronger than any that has been adduced against it. At the best, then, very small is the reason for disturbing the convictions and distressing the hearts of the sincere believers who visit the Holy Sepulchre in order to give vent to their tearful gratitude and cherish their pious faith. A similar conclusion is warmly contended for by Dr. Olin (*Travels in the East*, ii, 276 sq.), and still more at length by Mr. Williams (*Holy City*, vol. ii, ch. i and ii). It is also ably examined and maintained by Thrupp (*Ancient Jerusalem*, Lond. 1855). It has, however, been either stoutly denied or lightly sneered at by many other writers, who may be styled as belonging to the modern anti-traditionary school. At the head of these is Dr. Robinson, who takes every occasion to impugn the authenticity of scriptural localities in general, as now pointed out. See GOLGOTHA; SEPULCHRE OF CHRIST.

CALVARY, THE, a name given in Roman Catholic countries to "a representation of the various scenes of the passion and crucifixion of our Lord, either in a chapel, or external to the church, as at St. Jacques, at Antwerp. It consists of three crosses with the figures of Christ and the thieves, usually as large as life, surrounded by a number of figures, representing the various personages who took part in the crucifixion. At Aix-la-Chapelle, the Calvary is a church on the top of a hill, surrounded by twelve sculptured stones, each marking an event which took place on the journey of the Saviour to Mount Calvary. The approach to the Calvary is called the *Via Dolorosa*, each of the stones marking what is called a station, at which the pious say a prayer in passing."

Calvary, Congregation of Our Lady of, an order of Benedictine nuns, originally founded at Poitiers by Antoinette of Orleans, of the house of Longueville. Pope Paul V confirmed this order in 1617; and in the same year the foundress took possession of a convent newly built at Poitiers, with twenty-four nuns of the order of Fontevrault. In 1620 Mary de Medicis removed these nuns to Paris, and established them near the Luxembourg Palace. The design of their establishment was to honor the mystery of the sorrows of the Virgin for the sufferings of Christ, and some or other of the nuns were compelled to be day and night before the cross. Toward the close of the last century the order counted about twenty convents, all of which were destroyed by the French Revolution. Since that time, a convent in Paris, and several more in other parts of France, have been restored.

Calvert, JOHN P., a Methodist Episcopal minister,

was born in Belmont county, Ohio, October 23, 1833; studied at the Ohio University, and was admitted on trial as a preacher in the Ohio Conference in 1858. When the American civil war broke out in 1861, no less than six of his brothers entered the army, and he soon after felt it his duty to follow them. At the battle of Shiloh, Aug. 7, 1862, he was wounded, and on the following Sunday he died. He had been very useful in the army, preaching and holding prayer-meetings whenever opportunity afforded.—*Minutes of Conferences*, 1862, p. 138.

Calves. See CALF.

Calvin, JOHN, one of the most eminent of the Reformers.

I. *Sketch of his Life.*—He was born at Noyon, July 10th, 1509, his father, Gerard Chauvin, being a notary. He was from the first educated for the Church, and before he was twelve years old was presented to a benefice in the Cathedral of Noyon. Six years after this he was appointed to a cure of souls at Montville, and thus, although not yet twenty, and not even in the minor orders, he was enjoying the title and revenues of a cure. "His father now changed his mind as to the destination of his son, and desired him to turn his attention to the law as the road to wealth. This change was not unacceptable to Calvin, who, from his perusal of the Scriptures—a copy of which was furnished him by Robert Olivetan, who was his fellow-scholar at Paris, and likewise a native of Noyon—had already been convinced of many of the errors of the Romish Church. He accordingly repaired to Orléans, where he studied under Peter Stella, and then to Bruges, where Andrew Alciat filled the chair of law, and where also *Melchior Wolmar*, the Reformer, taught him Greek. Here Calvin was confirmed in the doctrines of the Reformation, and began indeed to preach them in the villages. His father, however, dying, he returned to Noyon, but after a short period went to Paris, where, in 1532, he published commentaries on Seneca's two books, *De Clementia*.

"He now resigned his benefices, and devoted himself to divinity. In 1533, Cop, the rector of the University of Paris, having occasion to read a discourse on the festival of All Saints, Calvin persuaded him to declare his opinion on the new doctrines. This brought upon them both the indignation of the Sorbonne, and they were forced to leave the city. Calvin went to several places, and at length to Angoulême, where he got shelter in the house of Louis du Tullet, a canon of Angoulême, and supported himself some time by teaching Greek. There he composed the greater part of his *Institutes of the Christian Religion*, which were published in 1536. The Queen of Navarre, sister to Francis I, having shown him some countenance in respect for his learning and abilities, he returned to Paris in 1534 under her protection, but quitted France the same year, having first published *Psychopannychia*, to confute the error of those who held that the soul remained in a state of sleep between death and the resurrection. He retired to Basle, where he published the *Institutes* (1536), dedicated to Francis I in an elegant Latin epistle. The design of the *Institutes* was to exhibit a full view of the doctrines of the Reformers; and as no similar work had appeared since the Reformation, and the peculiarities of the Romish Church were attacked in it with great force, it immediately became popular. It soon went through several editions, was translated by Calvin himself into French, and has since been translated into all the principal modern languages. Its effect upon the Christian world has been so remarkable as to entitle it to be looked upon as one of those books that have changed the face of society. After this publication Calvin went to Italy, and was received with distinction by the Duchess of Ferrara, daughter of Louis XII. But, notwithstanding her protection, he was obliged to return to France, but soon left it again, and in the month of August, 1536, arrived at Geneva, where the Reformed religion had been the same year publicly established. There, at the request of Farel, Viret, and other eminent Reformers, by whom that revolution had been achieved, he became a preacher of the Gospel, and professor, or rather lecturer on divinity. Farel was then twenty years older than Calvin, but their objects were the same, and their learning, virtue, and zeal alike, and these were now combined for the complete reformation of Geneva, and the diffusion of their principles throughout Europe. In the month of November a plan of Church government and a confession of faith were laid before the public authorities for their approval. Beza makes Calvin the author of these productions; but others, with perhaps greater reason, attribute them to Farel. There is little doubt, however, that Calvin was consulted in their composition, and still less that he lent his powerful aid to secure their sanction and approval by the people in the month of July, 1537. The same year the Council of Geneva conferred on Farel the honor of a burgess of the city, in token of their respect and gratitude. But the popular will was not prepared for the severe discipline of the Reformers, and in a short time the people, under the direction of a faction, met in a public assembly and expelled Farel and Calvin from the place. Calvin repaired to Bern, and then to Strasburg, where he was appointed professor of divinity and minister of a French church, into which he introduced his own form of church government and discipline. In his absence great efforts were made to get the Genevese to return to the communion of the Church of Rome, particularly by Cardinal Sadolet, who wrote to them earnestly to that effect; but Calvin, ever alive to the maintenance of the principles of the Reformation, disappointed all the expectations of his enemies, and confirmed the Genevese in the new faith, addressing to them two powerful and affectionate letters, and replying to that written by Sadolet. While at Strasburg Calvin also published a treatise on the Lord's Supper (*Traité de la Sainte Cène*), in which he combated the opinions both of the Roman Catholics and Lutherans, and at the same time explained his own views of that ordinance. Here, too, he published his *Commentary on the Epistle to the Romans*. Calvin became acquainted with Castalio during his residence at Strasburg, and procured for him the situation of a regent at Geneva; and it was during his stay in this city that, by the advice of his friend Bucer, he married Idellet, the widow of a converted Anabaptist.

"In November of the same year he and Farel were solicited by the Council of Geneva to return to their former charge in that city; in May, 1541, their banishment was revoked, and in September following Calvin was received into the city amid the congratulations of his flock, Farel remaining at Neufchâtel. He immediately laid before the council his scheme of church government, and after it was adopted and published by authority (20th of November, 1541), he was unhesitating in its enforcement. His promptitude and firmness were now conspicuous; he was the ruling spirit in Geneva; and the Church which he had established there he wished to make the mother and seminary of all the Reformed churches. His personal labors were unceasing. Geneva, however, was the common centre of all his exertions, and its prosperity peculiarly interested him, though less for its own sake than to make it a fountain for the supply of the world. He established an academy there, the high character of which was long maintained; he made the city a literary mart, and encouraged the French refugees and others who sought his advice to apply themselves to the occupation of a printer or librarian; and having finished the ecclesiastical regimen, he directed his attention to the improvement of the municipal government of the place. That Calvin

should, in the circumstances in which he was now placed, show marks of intolerance toward others, is not surprising; and to seek a palliation of his guilt, we need not go back to the time when he belonged to the Church of Rome, nor yet to the notions of civil and religious liberty prevalent in his age. We have only to reflect on the constitution of the human mind, and the constant care necessary to prevent power in any hands from degenerating into tyranny. His conduct toward Servetus [see SERVETUS] has been justly condemned, yet the punishment of Servetus was approved of by men of undoubted worth, and even by the mild Melancthon. Nor was his treatment of Bolsec (q. v.) without reproach. In 1554 Calvin published a work in defence of the doctrine of the Trinity against Servetus (*Fidelis Expositio Errorum M. Serveti*), and to prove the right of the civil magistrate to punish heresy; Beza the same year published a work on the like subject, in reply to the treatise of Castalio. The state of Calvin's health prevented him going in 1561 to the Conference of Poissy (q. v.), an assembly which in his view promised to be of great consequence, and which was indeed remarkable in this respect, that from that time the followers of Calvin became known as a distinct sect, bearing the name of their leader. To the last he maintained the same firmness of character which had distinguished him through life. On his death-bed he took God to witness that he had preached the Gospel purely, and exhorted all about him to walk worthy of the divine goodness: his slender frame gradually became quite emaciated, and on the 27th of May, 1564, he died without a struggle, in the fifty-fifth year of his age. The person of Calvin was middle-sized and naturally delicate; his habits were frugal and unostentatious; and he was so sparing in his food that for many years he took only one meal in the day. He had a clear understanding, an extraordinary memory, and a firmness and inflexibility of purpose which no opposition could overcome, no variety of objects defeat, no vicissitude shake. In his principles he was devout and sincere, and the purity of his character in private life was without a stain."—*English Cyclopædia.*

It is impossible to contemplate without astonishment the labors of Calvin during the last twenty years of his life. He presided over the ecclesiastical and political affairs of Geneva; he preached every day, lectured thrice a week, was present at every meeting of the Consistory, and yet found time for a vast correspondence, and to continue his voluminous literary labors. Besides his printed works, there are now in the library of Geneva 2025 sermons in MS. His health during all this period was feeble, yet he continued his various toils almost up to the very day of his death. He chose to be poor, refusing on several occasions proposed additions to his very moderate salary, and is said uniformly to have declined receiving presents, unless for the sake of giving them to the poor. From his numerous publications it is believed that he derived no pecuniary profit; and yet, as was the case with Wesley, he was assailed on all sides as having amassed great wealth. "I see," said he, "what incites my enemies to urge these falsehoods. They measure me according to their own dispositions, believing that I must be heaping up money on all sides because I enjoy such favorable opportunities for doing so. But assuredly, if I have not been able to avoid the reputation of being rich during my life, death will at last free me from this stain." And so it was. By his last will Calvin disposes of his entire property, amounting to about two hundred and twenty-five dollars, and on the 27th day of May, 1564, being within a few weeks of fifty-five years of age, he calmly breathed his last in the arms of his friend Beza. He was buried, according to his own request, without pomp, and no monument marks his last resting-place. Calvin's intellect was of the very first class, at once acute, penetrating, profound, and comprehensive. His cultivation was in harmony with it. Scaliger declares that at twenty-two Calvin was the most learned man in Europe.

"The first edition of his great work, *The Institutes of the Christian Religion*, was published when he was twenty-seven years of age; and it is a most extraordinary proof of the maturity and vigor of his mind, of the care with which he had studied the Word of God, and of the depth and comprehensiveness of his meditations upon divine things, that, though the work was afterward greatly enlarged, and though some alterations were even made in the arrangement of the topics discussed, yet no change of any importance was made in the actual doctrines which it set forth. The first edition, produced at that early age, contained the substance of the whole system of doctrine which has since been commonly associated with his name, the development and exposition of which has been regarded by many as constituting a strong claim upon the esteem and gratitude of the Church of Christ, and by many others as rendering him worthy of execration and every opprobrium. He lived twenty-seven years more after the publication of the first edition of the *Institutes*, and a large portion of his time during the remainder of his life was devoted to the examination of the Word of God and the investigation of divine truth. But he saw no reason to make any material change in the views which he had put forth; and a large proportion of the most pious, able, and learned men and most careful students of the sacred Scriptures, who have since adorned the Church of Christ, have received all his leading doctrines as accordant with the teaching of God's Word."—*Brit. and For. Evang. Review*, No. xxxiii.

As an expositor of the Scriptures and as a writer of systematic theology Calvin has had few rivals in the Christian Church. His Latin style is better than that of any Christian writer since Tertullian. Even the Roman Catholic Audin says, "Never does the proper word fail him; he calls it, and it comes." In brevity, clearness, and good sense, his commentaries are unsurpassed. As a civilian, "he had few equals among his contemporaries. In short, he exhibited, in strong and decided development, moral and intellectual qualities which marked him out for one who was competent to guide the opinions and control the commotions of inquiring and agitated nations. Through the most trying and hazardous period of the Reformation he exhibited invariably a wisdom in counsel, a prudence of zeal, and, at the same time, a decision and intrepidity of character which were truly astonishing. In the full import of the phrase, he may be styled a benefactor of the world. Most intensely and effectually, too, did he labor for the highest temporal, and especially for the eternal interests of his fellow-men. He evidently brought to the great enterprise of the age a larger amount of moral and intellectual power than did any other of the Reformers." In the just language of the archbishop of Cashel (Dr. Lawrence), "Calvin himself was both a wise and a good man; inferior to none of his contemporaries in general ability, and superior to almost all in the art, as well as elegance of composition, in the perspicuity and arrangement of his ideas, the structure of his periods, and the Latinity of his diction. Although attached to a theory which he found it difficult in the extreme to free from the suspicion of blasphemy against God as the author of sin, he certainly was no blasphemer, but, on the contrary, adopted that very theory from an anxiety not to commit, but, as he conceived, to avoid blasphemy—that of ascribing to human what he deemed alone imputable to Divine agency."

II. *Calvin's theological Views.*—The following statements of Calvin's theology, which are believed to be impartial, are taken from Neander, *History of Dogmas*, vol. ii. (1) As to the *Church*, he says, "By the Church we understand not merely the *ecclesia visibilis*, but the

elect of God, to whom even the dead belong." Hence he distinguishes the idea of the outward Church as the peculiar Christian community through which alone we can obtain entrance to eternal life; out of its pale there is no forgiveness of sins, no salvation. The marks of this Church are, that it publishes the Word of God in its purity, and administers the sacraments purely according to their institution. The universal Church is so called inasmuch as it includes believers of all nations. Here the important point is not agreement in all things, but only in essential doctrines (*Instit.* lib. iv). (2) As to the *Sacraments* Calvin occupied a middle position. "On the one hand he protested against the notion of a magical influence, and on the other he held firmly to the objective. The sacraments are not mere signs, but signs instituted by God, which notify to men the Divine promise. They are the outward symbols by which God seals the promises of his grace to our conscience; they attest the weakness of our faith, and at the same time our love to Him. The sacraments effect this, not by any secret magical power, but because they are instituted for this end by the Lord; and they can only attain it when the inward agency of the Holy Spirit is added, whereby alone the sacraments find their way to the heart; they are therefore efficacious only for the predestinated." "*Baptism* is a seal of a covenant. Christ blessed children, commended them to their heavenly Father, and said that of such was the kingdom of heaven. If children ought to be brought to Christ, why should they not receive the symbol of communion with Christ? Also in the New Testament mention is made of the baptism of whole families, and the early use of infant baptism allows the conclusion that it had come down from the time of the apostles. Infant baptism is also important for the parents, as a seal of the Divine promise which is continued from them to their children; another reason is, that by baptism children are incorporated in the Church, and are so much the more commended to the other members. He believed in a certain influence in infant baptism, and answers the objection to it by saying that, although we cannot understand this effect, it does not follow that it does not take place. He appealed to the fact that John was filled with the Holy Spirit from his birth, and Christ from the beginning with the Divine nature. From his humanity the principle of sanctification must overflow to men, and this would hold good of children" (*Institutes*, bk. iv, ch. xvi). On the doctrine of the *Lord's Supper*, "he opposed those who explained the words 'eating the flesh of Christ and drinking his blood,' only of faith in Christ, and the right knowledge of him (*Institutes*, bk. iv, ch. xvii). Whoever received the Supper in faith was truly and perfectly a partaker of Christ. This communion was not merely a communion of spirit; the body of Christ, by its connection with the Divine nature, received a fulness of life which flowed over to believers. Calvin therefore admitted something supernatural, but thought that the event took place, not by virtue of the body of Christ, which, as such, could not be in several places, but by virtue of the power of the Holy Ghost—a supernatural communication which no human understanding could explain. This communion with Christ, by which he communicates himself and all his blessings, the Supper symbolically represents. The outward is indeed merely a sign, but not an empty sign; it really presents that which is signified by it, namely, the actual participation of the body of Christ by the power of the Holy Spirit. He explains the words of the institutions metonymically, in the sense that the sign is used for the thing signified; he denied any bodily presence of Christ; Christ does not descend to earth, but believers by the power of the Holy Spirit are raised to communion with him in heaven. Christ also descends to them not only by virtue of his Spirit, but also by the outward symbol; the organ by which communion is attained is faith. he is presented to all, but received only by believers. The mere symbolical view depreciates the sign too much, and separates it from the sacrament; but by the other view the sign is exalted too much, and thereby the nature of the mystery itself is obscured." (3) Calvin's views on *Grace and Predestination* were so strongly pronounced that his name is now used to designate an entire system. He maintained the "doctrine of absolute predestination, which in him was connected with a one-sided tendency of Christian feeling and a rigid logical consequence.* Like Zuingle, he regarded prescience and predestination as of equal extent, and even established the former by the latter; God in no other way foresees the future but as he has decreed. Hence Calvin allowed no contingency even in the fall; he says, How could God, who effects all things, have formed the noblest of his creatures for an uncertain end? What then would become of his omnipotence? The Infralapsarians must still allow such a predestination in the case of Adam's descendants. It cannot have been in a natural way that all lost salvation through the guilt of one. Yet he himself feels shocked at the thought; *decretum quidem horribile fateor*,† he says. Consequently, God created the greatest part of mankind in order to glorify himself in them by his punitive justice, and the smaller by the revelation of his love.‡ His opponents might give a reason why God, who could have made them dogs, created them in his own image. Ought irrational brutes also to argue with God? All doubts may be silenced by the thought that God's will is the highest law and cause. Yet he did not rest here. The idea of an absolute omnipotence of God, not conditioned by holiness, he looked upon as profane, and appealed to the incomprehensibility of this mystery. It is to be acknowledged that Calvin sought to evade the practically injurious consequences of the doctrine of absolute predestination, and especially exalted the revealed grace of God in the work of redemption. 'Men ought to keep to the Word of God alone; and, instead of inquiring respecting their own election, look to Christ, and seek in him God's fatherly grace.' Calvin labored very much to procure the universal acknowledgment of this doctrine in Switzerland, but met with serious opposition, among others, from the learned Sebastian Castalio (q. v.). In Geneva Calvin at last obtained the victory, and then soon came to an understanding respecting it with other Swiss theologians. He attempted, but in vain, to get Me-

* III, 21, 1.—Numquam liquido ut decet persuasi erimus salutem nostram ex fonte gratuitæ misericordiæ Dei fluere, donec innotuerit nobis æterna ejus electio, quæ hac comparatione gratiam Dei illustrat quod non omnes promiscue adoptat in spem salutis, sed dat aliis, quod aliis negat. Hujus principii ignorantia quantum ex gloria Dei imminuat, quantum veræ humilitati detrahat, palam est.

† III, 23, 7.—Iterum quæro, unde factum est, ut tot gentes, una cum liberis eorum infantibus æternæ morti involveret lapsus Adæ absque remedio, nisi quia Deo ita verum est? Hic obmutescere oportet tam dicaces alloqui linguas. Decretum quidem horribile, fateor; inficiari tamen nemo poterit, quin præsciverit Deus, quem exitum esset habiturus homo, antequam ipsum conderet, et ideo præsciverit, quia decreto suo ita ordinarat. In præscientiam Dei si quis hic invehatur, temere et inconsulte impingit. Quid enim, quæso, est cur reus agatur cælestis judex, quia non ignoraverit quod futurum erat? In prædestinationem competit in quid est vel justæ vel speciosæ querimoniæ. Nec absurdum videri debet quod dico, Deum non modo primi hominis casum et in eo posterorum ruinam prævidisse; sed arbitrio quoque suo dispensasse. Ut enim ad ejus sapientiam pertinet omnium quæ futura sunt esse præscium sic ad potentiam, omnia manu sua regere ac moderari.

‡ III, 23, 1.—Contenta sit fidei sobrietas hac Pauli admonitione (Rom. ix, 22) non esse causam litigandi cum Deo, si ab una parte volens ostendere iram et notam facere potentiam suam ferat in multa tolerantia et lenitate vasa iræ apparata in interitum; ab altera autem notas faciat divitias gloriæ suæ erga vasa misericordiæ, quæ præparavit in gloriam. Minime tamen consentaneum est præparationem ad interitum alio transferre, quam ad arcanum consilium Dei; quod etiam paullo ante in contextu aperitur, quod Deus excitaverit Pharaonem. deinde quos vult induret. Unde sequitur absconditum Dei consilium obdurationis esse causam.

lancthon on his side. Melancthon called him the modern Zeno, who wanted to introduce a stoical necessity into the Church, and expressed himself very warmly against him (*Corpus Reformat.* vii, 932). When Calvin sent Melancthon his Confession of Faith, the latter was so excited that he struck his pen through the whole passage on predestination. Calvin remarked that this was very unlike his *ingenita mansuetudo;* that he could not imagine how a man of Melancthon's acuteness could reject this doctrine, and said, reproachfully, that he could not believe that he held the doctrines he professed with a sincere heart. On account of a doctrine to which speculation had by no means led him, he reproached him with judging *nimis philosophice* concerning free will."

Calvin professes to be only a *borrower* from St. Augustine (*Inst.* bk. iii, ch. xxiii, § 13); and he repudiates the consequences that have been charged upon his doctrine. For instance, he strenuously maintains that God is not the author of sin, that men act freely and accountably, and that election is a stimulus to good works rather than an opiate to inaction (*Inst.* bk. iii, ch. xxiii, § 3, 9, 12). See CALVINISM; PREDESTINATION.

III. *Literature.*—The best edition of the Latin works of Calvin is that of Amsterdam (1671, 9 vols. fol.). A new edition is now going on in the *Corpus Reformatorum*, under the title *Calvini Opera quæ supersunt omnia* (vols. i-v, Brunswick, 1864, 1867). An excellent and very cheap edition of the *Commentarii in N. T.*, edited by Tholuck, was published at Halle (1833-38, 7 vols. 8vo); one of the *Comm. in Psalmos* (1836, 2 vols.) and of the *Institutiones Religionis Christianæ* was likewise edited by Tholuck (Halle, 1834, 1835, 2 vols. 8vo); one of the *Comm. in lib. Geneseos* (1838, 8vo) by Hengstenberg. Most of Calvin's writings have been translated into English; and a new and revised edition has been issued under the auspices of the "Calvin Translation Society," in very handsome style, yet cheap (Edinb. 51 vols. 8vo). Its contents are as follows: *Institutes of the Christian Religion*, 3 vols.; *Tracts on the Reformation*, 3 vols.; *Commentary on Genesis*, 2 vols.; *Harmony of the last Four Books of the Pentateuch*, 4 vols.; *Commentary on Joshua*, 1 vol.; *Commentary on the Psalms*, 5 vols.; *Commentary on Isaiah*, 4 vols.; *Commentary on Jeremiah and Lamentations*, 5 vols.; *Commentary on Ezekiel*, 2 vols.; *Commentary on Daniel*, 2 vols.; *Commentary on Hosea*, 1 vol.; *Commentary on Joel, Amos, and Obadiah*, 1 vol.; *Commentary on Jonah, Micah, and Nahum*, 1 vol.; *Commentary on Habakkuk, Zephaniah, and Haggai*, 1 vol.; *Commentary on Zechariah and Malachi*, 1 vol.; *Harmony of the Synoptical Evangelists*, 3 vols.; *Commentary on John's Gospel*, 2 vols.; *Commentary on Acts of the Apostles*, 2 vols.; *Commentary on Romans*, 1 vol.; *Commentary on Corinthians*, 2 vols.; *Commentary on Galatians and Ephesians*, 1 vol.; *Commentary on Philippians, Colossians, and Thessalonians*, 1 vol.; *Commentary on Timothy, Titus, and Philemon*, 1 vol.; *Commentary on Hebrews*, 1 vol.; *Commentary on Peter, John, James, and Jude*, 1 vol. There are English translations of his *Institutiones* by John Allen (Lond. 1813, reprinted in several editions by the Philadelphia Presbyterian Board of Publication), and by Beveridge (Edinb. 1863, 8vo). Calvin's life was written in brief by Beza (Eng. ed. 1844, Edinb. Trans. Soc.; also Phila. 1836, 12mo) and Farel; but within the last few years several biographies have appeared. The most copious and elaborate is *Leben J. Calvin's*, von Paul Henry, D.D. (Hamb. 1835-1844, 3 vols. 8vo). The author procured for his work the inedited letters of Calvin, which are preserved in Geneva, and gives the most important of them in the appendices. A poor translation has been published, entitled *The Life of Calvin, translated from the German of Dr. Henry*, by H. Stebbing, D.D. (Lond. 1849, 2 vols. 8vo); it omits most of the notes and appendices which make up great part of Henry's work. A Roman Catholic biography by Audin (*Histoire, etc., de J. Calvin, par* J. M. V. Audin, Paris, 2 vols. 1841) has the sole merit of a lively and piquant style. An English translation has been published in Baltimore (*History, etc., of John Calvin, translated from Audin*, by John M'Gill, 8vo); and it has also been translated into German (Augsb. 1843-44, 2 vols.), into Italian (in Pirotta's *Bibliot. Eccles.* vols. ix and x, Milan, 1843), and into other languages. A graphic but superficial biography has been published by Thomas H. Dyer (Lond. 1850; N. Y., Harpers, 1851). A biography, together with select writings of Calvin, was published by Stähelin (*J. Calvin. Leb. u. ausgewählte Schriften*, Elberfeld, 2 vols. 1860, 1863). There is a good sketch of Calvin's life, by Robbins, in the *Bibliotheca Sacra*, vol. ii, for 1845. On the theology of Calvin, see Gass, *Prot. Dogmatik*, vol. i, bk. i; art. CALVINISM; and *Revue Chrétienne*, 1863, p. 720; Cunningham, *The Reformers and Theology of the Reformation*, Essays, vi-x. See also Tulloch, *Leaders of the Reformation* (new ed. Lond. 1861); Bungener, *Calvin, his Life and Works* (Edinb. 1862, 8vo). *The Letters of Calvin*, from original MSS., were first edited by Bonnet and translated by Constable (Edinb. 1855, 4 vols. 8vo, repub. by Presbyterian Board [Philadelphia]). A new edition of the *Institutes* in French, *Institution de la Religion Chrétienne, en quatre livres*, appeared in Paris, 1859 (2 vols. 8vo). It contains an introduction by the editors, with a history of previous editions. See *Meth. Quart. Review*, Oct. 1850, art. iii; *Amer. Theol. Review*, Feb. 1860, p. 129; *North Brit. Review*, vol. xiii; *Brit. and Foreign Evang. Review*, No. xxxiii; *Biblioth. Sacra*, xiv, p. 125; Köstlin, in *Studien u. Kritiken*, 1868, i, ii.

Calvinism, properly, the whole system of theology taught by John Calvin, including his doctrine of the sacraments, etc. It is now, however, generally used to denote the theory of grace and predestination set forth in Calvin's *Institutes*, and adopted, with more or less modification, by several of the Protestant churches. See CALVINISTS.

I. *Calvin's own Views* (Supralapsarian).—These are set forth (from Neander) under the article CALVIN (q. v.). We give here simply such farther extracts from Calvin's own writings as are necessary to show his system.

(1.) "Predestination, by which God adopts some to the hope of life, and adjudges others to eternal death, no one desirous of the credit of piety dares absolutely to deny. But it is involved in many cavils, especially by those who make foreknowledge the cause of it. We maintain that both belong to God; but it is preposterous to represent one as dependent on the other. Predestination we call the eternal decree of God, by which he hath determined in himself what he would have to become of every individual of mankind. For they are not all created with a similar destiny; but eternal life is foreordained for some, and eternal damnation for others. Every man, therefore, being created for one or the other of these ends, we say he is predestinated either to life or to death." After having spoken of the election of the race of Abraham, and then of particular branches of that race, he proceeds: "Though it is sufficiently clear that God, in his secret counsel, freely chooses whom he will, and rejects others, his gratuitous election is but half displayed till we come to particular individuals, to whom God not only offers salvation, but *assigns* it in such a manner that the certainty of the effect is liable to no suspense or doubt." He sums up the chapter in which he thus generally states the doctrine in these words: "In conformity, therefore, to the clear doctrine of the Scripture, we assert that, by an eternal and immutable counsel, God hath once for all determined both whom he would admit to salvation, and whom he would condemn to destruction. We affirm that this counsel, as far as concerns the elect, is founded on his gratuitous mercy, totally irrespective of human merit; but that to those whom he devotes to condemnation, the gate

of life is closed by a just and irreprehensible, but *incomprehensible* judgment. In the elect, we consider calling as an evidence of election; and justification as another token of its manifestation, till they arrive in glory, which constitutes its completion. As God seals his elect by vocation and justification, so, by *excluding* the reprobate from the knowledge of his name and sanctification of his Spirit, he affords another indication of the judgment that awaits them."—*Institutes*, bk. iii, ch. xxi.

(2.) As to the theory that predestination depends on foreknowledge of holiness, Calvin says: "It is a notion commonly entertained that God, foreseeing what would be the respective merits of every individual, makes a correspondent distinction between different persons: that he adopts as his children such as he foreknows will be deserving of his grace, and devotes to the damnation of death others whose dispositions he sees will be inclined to wickedness and impiety. Thus they not only obscure election by covering it with the veil of foreknowledge, but pretend that it originates in another cause" (bk. iii, ch. xxii). Consistently with this, he a little further on asserts that election does not flow from holiness, but holiness from election: "For when it is said that the faithful are elected that they should be holy, it is fully implied that the holiness they were in future to possess had its origin in election." He proceeds to quote the example of Jacob and Esau, as loved and hated before they had done good or evil, to show that the only reason of election and reprobation is to be placed in God's "secret counsel." (Bk. iii, ch. xxiii.)

(3.) So, as to the ground of reprobation: "'God hath mercy on whom he will have mercy, and whom he will he hardeneth.' You see how he (the apostle) attributes *both* to the *mere will* of God. If, therefore, we can assign no reason why he grants mercy to his people but because such is his pleasure, neither shall we find any other cause but *his will* for the reprobation of others. For when God is said to harden, or show mercy to whom he pleases, men are taught by this declaration to seek *no cause beside his will.*" (Ibid.) "Many, indeed, as if they wished to avert odium from God, admit election in such a way as to deny that any one is reprobated. But this is puerile and absurd, because election itself could not exist without being opposed to reprobation: whom God *passes by he therefore reprobates;* and *from no other cause* than his determination to exclude them from the inheritance which he predestines for his children." (Bk. iii, ch. xxiii.)

(4.) Calvin denies that his doctrine makes God the author of sin, asserting that the ruin of sinners is their own work: "Their perdition depends on the divine predestination in such a manner that the *cause* and *matter* of it are found *in themselves. For the first man fell because the Lord had determined it should so happen.* The reason of this determination is unknown to us. Man, therefore, falls according to the *appointment* of Divine Providence, but he falls by *his own fault.* The Lord had a little before pronounced every thing that he had made to be 'very good.' Whence, then, comes the depravity of man to revolt from his God? Lest it should be thought to come from creation, God approved and commended what had proceeded from himself. By his own wickedness, therefore, man corrupted the nature he had received pure from the Lord, and by his fall he drew all his posterity with him to destruction."

(5.) In much the same manner he contends that the necessity of sinning is laid upon the reprobate by the ordination of God, and yet denies God to be the author of their sinful acts, since the corruption of men was derived from Adam, by his own fault, and not from God. He exhorts us "rather to contemplate the evident cause of condemnation, which is nearer to us, in the corrupt nature of mankind, than search after a hidden and altogether incomprehensible one, in the predestination of God." "For though, by the eternal providence of God, man was *created* to that misery to which he is subject, yet the *ground* of it he has derived from himself, not God, since he is thus ruined solely in consequence of his having degenerated from the pure creation of God to vicious and impure depravity." See especially *Institutes*, bk. iii, ch. xxiii, § 27, and ch. xxiv, § 8.

From the above passages it will be seen that Calvin went beyond the Augustinian theory of predestination, and held to the supralapsarian view. Supralapsarianism regards man, *before* the fall, as the object of the unconditional decree of salvation or damnation; Sublapsarianism, on the other hand, makes the decree subordinate to the creation and fall of man. According to Dr. Shedd's definition, "supralapsarianism holds that the decree to eternal bliss or woe precedes, in the order of nature, the decree to apostasy; infralapsarianism holds that it succeeds it" (*History of Doctrines*, ii, 192). The Supralapsarians hold that God *decreed* the fall of Adam; the Sublapsarians, that he *permitted* it. Some writers have maintained that Calvin was not a supralapsarian, but that view of his teaching is hardly tenable. Calvin terms "the exclusion of the fall of the first man from the divine predestination a *frigidum commentum*" (iii, ch. xxiii, § 7). So also, § 4, he says, "Quum ergo in sua corruptione pereunt (homines), nihil aliud quam pœnas luunt ejusdem calamitatis, in quam *ipsius prædestinationem lapsus est Adam*, ac posteros suos præcipites secum traxit. It is on this particular point that Calvin goes farther than Augustine, who did not include the fall of Adam in the divine decree" (Smith's Hagenbach's *History of Doctrines*, § 249). Amyraldus (q. v.) sought to reduce Calvin's system to sublapsarianism, but was effectually answered by Curcellæus in his tractate *de jure Dei in Creaturas.* But Fisher (*New Englander*, April, 1868, p. 305) holds that Calvin was *not* a supralapsarian. (See *Christ. Remembrancer*, Jan. 1856, art. iv; Warren, in *Methodist Quarterly Review*, July, 1857, art. i; Möhler, *Symbolism*, § 4.)

II. *Doctrines of Dort* (Infralapsarian).—The controversy with the Remonstrants on the five points (see Arminianism; Remonstrants) led to the clearer definition of the doctrines in question by the Synod of Dort, which refused to accept the supralapsarian view, at least in terms. See the *Confessions and Canons of the Synod of Dort* for the full statement. The following summing up is given by Watson, from Scott's *Synod of Dort*, of the five articles which constitute the standard of what is now generally called strict Calvinism:

(1.) "*Of Predestination.*—As all men have sinned in Adam, and have become exposed to the curse and eternal death, God would have done no injustice to any one if he had determined to leave the whole human race under sin and the curse, and to condemn them on account of sin; according to those words of the apostle, 'All the world is become guilty before God' (Rom. iii, 19, 23; vi, 23). That some, *in time*, have faith given them by God, and others have it not given, proceeds from his eternal decree; for 'known unto God are all his works from the beginning,' etc. (Acts xv, 18; Eph. i, 11). According to which decree he graciously softens the hearts of the elect, however hard, and he bends them to believe; but the non-elect he leaves, in his judgment, to their own perversity and hardness. And here, especially, a deep discrimination, at the same time both merciful and just; a discrimination of men equally lost, opens itself to us; or that decree of election and reprobation which is revealed in the word of God, which, as perverse, impure, and unstable persons do wrest to their own destruction, so it affords ineffable consolation to holy and pious souls. But election is the immutable purpose of God, by which, before the foundations of the world were laid, he chose, out of the whole human race, fall-

en by their own fault from their primeval integrity into sin and destruction, according to the most free *good pleasure* of his own will, and of *mere grace*, a certain number of men, neither better nor worthier than others, but lying in the same misery with the rest, to salvation in Christ, whom he had, even from eternity, constituted Mediator and head of all the elect, and the foundation of salvation; and therefore he decreed to give them unto him to be saved, and effectually to call and draw them into communion with him by his word and Spirit; or he decreed himself to give unto them true faith, to justify, to sanctify, and at length powerfully to glorify them, etc. (Eph. i, 4-6; Rom. viii, 30). This same election is not made from any *foreseen* faith, obedience of faith, holiness, or any other good quality and disposition, as a *prerequisite* cause or condition in the man who should be elected, etc. 'He hath chosen us,' not because we *were*, but 'that we *might* be holy,' (Eph. i, 4; Rom. ix, 11-13; Acts xiii, 48). Moreover, holy Scripture doth illustrate and commend to us this eternal and free grace of our election, in this more especially, that it doth testify all men not to be elected; but that some are non-elect, or *passed by*, in the eternal election of God, whom truly God, from most free, just, irreprehensible, and immutable good pleasure, decreed to leave in the *common misery* into which they had, by *their own fault*, cast themselves; and not to bestow on them living faith, and the grace of conversion; but having been left in their own ways, and under just judgment, at length, not only on account of their unbelief, but also of all their other sins, to condemn and eternally punish them, to the manifestation of his own justice. And this is the decree of *reprobation*, which determines that God is in no wise the author of sin (which, to be thought of, is blasphemy), but a tremendous, incomprehensible, just judge and avenger."

(2.) "*Of the Death of Christ.*"—Passing over, for brevity's sake, what is said of the necessity of atonement in order to pardon, and of Christ having offered that atonement and satisfaction, it is added, "This death of the Son of God is a single and most perfect sacrifice and satisfaction for sins, of infinite value and price, abundantly sufficient to expiate the sins of the whole world; but because many who are called by the Gospel do not repent, nor believe in Christ, but perish in unbelief; this doth not arise from defect or insufficiency of the sacrifice offered by Christ upon the cross, but from their own fault. God willed that Christ, through the blood of the cross, should out of every people, tribe, nation, and language, *efficaciously* redeem all those, and those *only*, who were from eternity chosen to salvation, and given to him by the Father; that he should confer on them the gift of faith," etc.

(3.) "*Of Man's Corruption, etc.*—All men are conceived in sin, and born the children of wrath, indisposed (*inepti*) to all saving good, propense to evil, dead in sin, and the slaves of sin; and without the regenerating grace of the Holy Spirit, they neither are willing nor able to return to God, to correct their depraved nature, or to dispose themselves to the correction of it."

(4.) "*Of Grace and Free-will.*—But in like manner as, by the fall, man does not cease to be man, endowed with intellect and will, neither hath sin, which hath pervaded the whole human race, taken away the nature of the human species, but it hath depraved and spiritually stained it; so that even this divine grace of regeneration does not act upon men like stocks and trees, nor take away the properties of his will, or violently compel it while unwilling; but it spiritually quickens, heals, corrects, and sweetly, and at the same time powerfully, inclines it; so that whereas before it was wholly governed by the rebellion and resistance of the *flesh*, now prompt and sincere obedience of the Spirit may begin to reign; in which the renewal of our spiritual will, and our liberty, truly consist; in which manner (or for which reason), unless the admirable Author of all good should work in us, there could be no hope to man of rising from the fall by that *free will* by which, when standing, he fell into ruin."

(5.) "*On Perseverance.*—God, who is rich in mercy, from his immutable purpose of election, does not wholly take away his Holy Spirit from his own, even in lamentable falls; nor does he so permit them to glide down (*prolabi*) that they should fall from the grace of adoption and the state of justification; or commit the 'sin unto death,' or against the Holy Spirit; that, being deserted by him, they should cast themselves headlong into eternal destruction. So that not by their own merits or strength, but by the gratuitous mercy of God, they obtain it, that they neither *totally fall* from faith and grace, nor *finally continue* in their falls and perish."

The Confessions of the Reformed Church agree more or less closely with the statements of Dort, whether they preceded or followed it in date. See the *Confessio Gallica*, art. 12; *Confessio Belgica*, art. 16; *Form. Consensus Helvet.* arts. 4 and 19; *Conf. Helvet.* ii, 10. (See Winer, *Comp. Darstellung*, ix, 1; Hagenbach, *History of Doctrines*, § 249.) The *Westminster Confession* is the standard of the Church of Scotland, and of the various Presbyterian Churches in Europe and America. Its 3d article states *God's Eternal Decree* as follows:

"*Of God's Eternal Decree.*—God from all eternity did, by the most wise and holy counsel of his own will, freely and unchangeably ordain whatsoever comes to pass; yet so as thereby neither is God the author of sin, nor is violence offered to the will of the creatures, nor is the liberty or contingency of second causes taken away, but rather established. Although God knows whatsoever may or can come to pass upon all supposed conditions, yet hath he not decreed anything because he foresaw its future, or as that which would come to pass upon such conditions. By the decree of God, for the manifestation of his glory, some men and angels are predestinated unto everlasting life, and others foreordained to everlasting death. These angels and men, thus predestinated and foreordained, are particularly and unchangeably designed, and their number is so certain and definite that it cannot be either increased or diminished. Those of mankind that are predestinated unto life, God, before the foundation of the world was laid, according to his eternal and immutable purpose, and the secret counsel and good pleasure of his will, hath chosen, in Christ, unto everlasting glory, out of his mere free grace and love, without any foresight of faith, or good works, or perseverance in either of them, or any other thing in the creature, as conditions, or causes moving him thereunto; and all to the praise of his glorious grace. As God hath appointed the elect unto glory, so hath he, by the eternal and most free purpose of his will, foreordained all the means thereunto. Wherefore they who are elected, being fallen in Adam, are redeemed by Christ, are effectually called unto faith in Christ, by his Spirit working in due season; are justified, adopted, sanctified, and kept by his power through faith unto salvation. Neither are any other redeemed by Christ, effectually called, justified, adopted, sanctified, and saved, but the elect only. The rest of mankind God was pleased, according to the unsearchable counsel of his own will, whereby he extendeth or withholdeth mercy, as he pleaseth, for the glory of his sovereign power over his creatures, to pass by, and to ordain them to dishonor and wrath for their sin, to the praise of his glorious justice."

The 17th article of the *Church of England* is as follows:

"*Of Predestination and Election.*—Predestination to life is the everlasting purpose of God, whereby (before the foundations of the world were laid) he hath constantly decreed, by his counsel, secret to us, to deliver from curse and damnation those whom he hath chosen

in Christ out of mankind, and to bring them by Christ to everlasting salvation, as vessels made to honor. Wherefore they which be endued with so excellent a benefit of God be called according to God's purpose, by his Spirit working in due season: they, through grace, obey the calling: they be justified freely: they be made sons of God by adoption: they be made like the image of his only-begotten Son Jesus Christ: they walk religiously in good works; and at length, by God's grace, they attain to everlasting felicity. As the godly consideration of predestination and our election in Christ is full of sweet, pleasant, and unspeakable comfort to godly persons, and such as feel in themselves the working of the Spirit of Christ, mortifying the works of the flesh and their earthly members, and drawing up their mind to high and heavenly things, as well because it doth greatly establish and confirm their faith of eternal salvation to be enjoyed through Christ, as because it doth fervently kindle their love toward God; so, for curious and carnal persons, lacking the Spirit of Christ, to have continually before their eyes the sentence of God's predestination is a most dangerous downfall, whereby the devil doth thrust them either into desperation, or into wretchedness of most unclean living, no less perilous than desperation. Furthermore, we must receive God's promises in such wise as they be generally set forth to us in holy Scripture. And in our doings, that will of God is to be followed which we have expressly declared unto us in the Word of God."

It has always been a question in the Church of England whether the Articles are or are not Calvinistic. On this question, see Toplady, *Doctrinal Calvinism of the Church of England* (Works, vol. i and ii); Overton, *True Churchman* (2d ed. York, 1801); Laurence, *Bampton Lecture* for 1804 (Oxford, 1805, 8vo); Cunningham, *The Reformers*, Essay iv (Edinb. 1862, 8vo); printed also in the *Brit. and For. Evang. Rev.* (No. 35); reprinted in the *Am. Theol. Review* (October, 1861, art. v); Hardwick, *History of Reformation*, ch. iv, p. 260.

The Lutheran Church never adopted the Calvinistic system. In the beginning, both Luther and Melancthon received the Augustinian theology; but as early as 1529 Melancthon expunged the passages supporting it from his *Loci Theologici*. Luther bestowed the highest praise on the last editions of the *Loci* (Luther's *Works*, 1546, vol. i, preface; see Laurence, *Bampton Lect.* Sermon ii, note 21). The Augsburg *Confessio Variata* (xx) says: "Non est hic opus disputationibus de predestinatione et similibus. Nam promissio est universalis et nihil detrahit operibus, sed exsuscitat ad fidem et vere bona opera" (see Gieseler, *Church History*, iv, §§ 36, 37). In the German Reformed Church the strictly Calvinistic doctrine "never, as such, received any symbolical authority; and it was significantly left out of the Heidelberg Catechism, and handed over to the schools and scientific theology. At the same time, it was never rejected by the German Church, nor regarded with any thing like hostility." Appel, in the *Tercentenary Monument of the Heidelberg Catechism*, p. 327; Hase, *Church History*, § 354.

III. The Calvinistic system was still farther modified by the Federal Theology, or the THEOLOGY OF THE COVENANTS. Under the too exclusive influence of the doctrine of Predestination, it had assumed a scholastic character, from which it was in part relieved by the introduction of the idea of the *Covenant*, as a constructive principle of the system. John Cocceius, trained in the German Reformed theology (born at Bremen 1603, died 1699), first developed the system under this point of view, the effect of which was to introduce historical facts and elements, and a distinctive ethical idea (a covenant implying mutual rights), into the heart of the system, and to banish the idea of the divine sovereignty as mere will. Cocceius distinguished between, 1. The covenant before the Fall, the covenant of works; and, 2. The covenant after the Fall, the covenant of grace. The latter covenant embraces a threefold economy: (1) The economy before the law; (2) The economy under the law; (3) The economy of the Gospel. See his *Summa Doctrinæ de Fœdere et Testamentis Dei*, 1648. Heppe says: "The fruit of his influence was to lead the Reformed theologians back to the freedom of the Word of God, delivering it from the bondage of a traditional scholasticism." This type of Calvinism was still farther developed in the writings of Braun, *Doctrina Fœderum*, 1698; of Burmann of Utrecht († 1679), *Synopsis Theologiæ et Œconomiæ Fœderum Dei*, 1671; Heidanus of Leyden († 1678), *Corpus Theol. Christ.* 1687; and especially of Witsius of Leyden († 1708), whose *Economy of the Covenants* (1694) was translated into English (Lond. 1763; revised ed. Edinb. 1771, 1803; New York, 3 vols. 1798). This theology of the covenants also shaped, to a considerable extent, the Reformed system as it was adopted in England, Scotland, and America. It is clearly recognised in the Westminster Confession of Faith and Catechisms. Later writers divide the covenant of grace into two parts, viz. the covenant of redemption between the Father and the Son, and the covenant of grace between God and his people in Christ. On this important phase of the Calvinistic theology, see Ebrard, *Dogmatik*, i, 60 sq.; Gass, *Geschichte der Protest. Dogmatik*, Bd. 2, 1857; Schweizer, *Glaubenslehre der evang.-reformirten Kirche*, 2 Bde. 1844, and also his *Protestantische Centraldogmen*, 2 Bde. 1854; Schneckenburger, *Vergleichende Darstellung der lutherischen und reformirten Lehrbegriffe*, 1855; G. Frank, *Geschichte der Protest. Theol.* 2 Bde. 1865; also Heppe, *Dogmatik d. deutschen Protestantismus*, i, 204; *Dogmatik der evang.-ref. Kirche*, i, 278; and the article FEDERAL THEOLOGY.

IV. *Moderate Calvinists.*—This phrase designates those, especially in England and America, who, while adhering to the Calvinistic as contrasted with the Arminian system, have yet receded from some of the extreme statements of the former, especially upon the two articles of Reprobation and the Extent of the Atonement. See Dr. E. Williams, *Defence of Modern Calvinism*, 1812; *Sermon and Charges*, p. 128, and Appendix, p. 399. Dr. Williams says: "Reprobation, or 'predestination to death or misery as the end, and to sin as the means,' I call an '*impure mixture*' with Calvinism, as having no foundation either in the real meaning of Holy Writ, or in the nature of things; except, indeed, we mean by it, what no one questions, a determination to punish the guilty." He calls this a "'*mixture*,' because its connection with predestination to life is arbitrary and forced; '*impure*,' because the supposition itself is a foul aspersion upon the divine character."

The other point on which the moderate Calvinists modified the system is the nature and extent of the atoning work of Christ. Strict Calvinism asserts that the Lord Jesus Christ made atonement to God by his death only for the sins of those to whom, in the sovereign good pleasure of the Almighty, the benefits of his death shall be finally applied. By this definition, the extent of Christ's atonement, as a provision, is limited to those who ultimately enjoy its fruits; it is restricted to the elect of God. Both Strict and Moderate Calvinists agree as to the intrinsic worth of the atonement, and as to its final application. It has been asserted (e. g. by Amyraut, q. v.) that Calvin himself held to general redemption; and certainly his language in his *Comm. in Job*, iii, 15, 16, and in 1 *Tim.* ii, 5, seems fairly to assert the doctrine. Comp. Fletcher, *Works* (N. Y. ed. ii, 71); but see also Cunningham, *The Reformers* (Essay vii). As to the variations of the Calvinistic confessions, see Smith's Hagenbach, *History of Doctrines*, § 249. In the French Reformed Church, the divines of Saumur, Camero, Amyraldus, and Placæus maintained universal grace (see articles on these names). The English divines who attended

the Synod of Dort (Hall, Hale, Davenant) all advocated general atonement, in which they were followed by Baxter (*Universal Redemption; Methodus Theologica*; Orme, *Life of Baxter*, ii, 64). The "moderate" doctrine as to the nature of the atonement is, in brief, that it consists in "that satisfaction for sin which was rendered to God as moral governor of the world by the obedience unto death of his son Jesus Christ. This satisfaction preserves the authority of the moral government of God, and yet enables him to forgive sinners. That this forgiveness could not be given by God without atonement constitutes its necessity." See ATONEMENT. That Christ's atonement was sufficient for all, that it is actually applied only to the elect, and that it enhances the guilt of those who reject it, is now almost universally conceded by the different schools. But its universality, as a provision, is also asserted by the moderate Calvinists, with some modifications in the statement of its nature. The English views as to the nature of the atonement are presented in the following extracts: Dr. Magee (*On the Atonement*) says, "The sacrifice of Christ was never deemed by any, who did not wish to calumniate the doctrine of atonement, to have *made God placable*, but merely viewed as the *means* appointed by divine wisdom by which to bestow forgiveness. But still it is demanded, in what way can the death of Christ, considered as a sacrifice of expiation, be conceived to operate to the remission of sin, unless by the appeasing of a Being who otherwise would not have forgiven us? To this the answer of the Christian is, I know not, nor does it concern me to know, *in what manner* the sacrifice of Christ is connected with the forgiveness of sins; it is enough that this is declared by God to be the *medium* through which my salvation is effected: I pretend not to dive into the councils of the Almighty. I submit to his wisdom, and I will not reject his grace because his mode of vouchsafing it is not within my comprehension." Andrew Fuller, in his *Calvinistic and Socinian Systems compared* (Letter vii), strongly reprobates the idea of placating the Divine Being by an atonement, "contending that the atonement is the *effect*, and not the *cause* of divine love" to men; and insists "that the contrary is a gross misrepresentation of the Calvinists in general," though it must be confessed some Calvinists have given too much countenance to such an idea. Mr. Fuller adds, "If we say a way was opened by the death of Christ for the free and consistent exercise of mercy in all the methods which sovereign wisdom saw fit to adopt, perhaps we shall include every material idea which the Scriptures give us of that important event."

V. Farther modifications in the Calvinistic system have been made in this country through the influence of the so-called NEW-ENGLAND THEOLOGY, especially as set forth in the writings of Jonathan Edwards and his successors. In respect to original sin, the elder Edwards, in his work on that subject, advocated the mediate rather than the immediate imputation of Adam's first sin to his posterity. On the nature of virtue he introduced an important modification, in making *love to being* (in the two forms of love of benevolence and love of complacency) to constitute the essence of virtue. On the nature of the atonement he made no modification. He also distinguished more carefully than had previously been done between natural ability and moral inability, and this distinction was farther elaborated by the younger Edwards, who also represented the atonement as consisting in a satisfaction to the general rather than the distributive justice of God. Hopkins and Emmons carried out these views still farther, but under the influence (especially in the case of Emmons) of the supralapsarian scheme. These discussions extended from New England into the Presbyterian Church. The parties there known as Old and New School differ chiefly on the following articles: 1. Imputation of sin, whether it be immediate or mediate; 2. The nature and extent of the atonement; 3. Ability and inability.

For the history of the development of Calvinism, see REFORMED CHURCH. For the Antinomian and extreme supralapsarian developments of Calvinism, see ANTINOMIANISM; CRISP; HOPKINSIANS. For certain mitigated schemes of Calvinism, see AMYRALDISM; BAXTER; CAMERO. On two of the principles which distinguish the so-called Moderate Calvinism, viz. (1.) the universality of the atonement, see ATONEMENT; REDEMPTION; (2.) The natural ability of all men to repent, see INABILITY; THEOLOGY.

VI. *Literature.*—The literature of the Calvinistic controversy is enormous. The principal books only can be named here: Calvin, *Institutiones*; Zwinglius, *Brevis Isagoge*; *Comm. de vera et falsa religione*; the Confessions of the Reformed Churches, given in Augusti, *Corpus Librorum Symbolicorum* (1828), or in Niemeyer, *Collectio Confessionum* (1840); the Westminster Confession (1648); the Decrees of the Synod of Dort (1619). The chief Calvinistic writers of the 16th and 17th centuries were Beza, Bullinger, Alstedt, Whitgift, Cartwright, Crisp, Perkins, Leighton, Baxter (moderate), Owen, Howe, Ridgely, Gomar, Alting, Rivetus, Heidegger, Turretin, Pictet. Of the 18th and 19th centuries the following are selected: Stapfer, Wyttenbach, Gill, Toplady, Erskine, Dick, Hill, Breckinridge, Krummacher. Of the new American school: Edwards, Bellamy, Emmons, Dwight, West, Smalley, etc., whose influence was seen in England in the writings of Fuller, Ryland, Hall, Jay, Pye Smith, and Chalmers. The so-called Old Calvinism has produced few writers of late in England. It is ably defended in America by the Princeton theologians. For the historical treatment of the subject, see Gill, *Cause of God and Truth*, pt. iv; Neander, *History of Dogmas* (l. c.); Hagenbach, *Hist. of Doctrines* (ed. by Smith, § 219–222); Ebrard, *Christl. Dogmatik*, § 17-51, and § 556–565; Womack, *Calvinistic Cabinet Unlocked*; Watson, *Theolog. Institutes*, pt. ii, ch. xxviii; Herrmann, *Geschichte der Prot. Dogmatik* (Leips. 1842); Gass, *Geschichte der Prot. Dogmatik* (Berlin, 1854); Heppe, *Dogmatik der evang.-reform. Kirche* (Elberfeld, 1861); Mozley, *Augustinian Doctrine of Predestination* (Lond. 1855); *Christian Remembrancer*, Jan. 1856, 170 sq.; Nicholls, *Calvinism and Arminianism compared* (Lond. 1824, 2 vols. 8vo) is very full as to English writers, and abounds in valuable citations, but is destitute of scientific arrangement; Cunningham, *Historical Theology* (1862); Ditto, *Theology of the Reformation* (1862); Hill, *Lectures on Divinity*, chap. xi. For the later forms of Calvinism, especially in America, see Tyler, *History of the New Haven Theology* (1837); Beecher, *Views in Theology*; Rice, *Old and New Schools* (1853); Bangs, *Errors of Hopkinsianism* 1815); Hodgson, *New Divinity* (1839); Fisk, *The Calvinistic Controversy*; and especially, on the whole subject, Warren, *Systematische Theologie*, § 24 (Bremen, 1865, 8vo). Polemical works against Calvinism: (a) *Lutheran*, Chemnitz, in his *Loci Theologici*; Dannhauer, *Hodomoria Spiritus Calvin* (1654); Feuerborn, *Epitome Error. Calv.* (1651); (b) *Arminian and Methodist* (besides those above named): Arminius, Episcopius, Limborch, Curcellæus (writings generally); Wesley (*Works*, see Index); Fletcher, *Checks to Antinomianism*, etc.; Watson, *Theol. Institutes*, vol. ii; Goodwin, *Redemption Redeemed*; Foster, *Calvinism as it is*; (c) *Later German writers*: Ebrard, in his *Dogmatik* (Königsberg, 1851, 2 vols. 8vo); Lange, *Die Lehre der heil. Schriften von der freien und allgemeinen Gnade Gottes* (Elberf. 1631, 8vo). Writers on special topics, e. g. Election, Redemption, Predestination, etc., will be named under those heads respectively. See ARMINIANISM; ELECTION; FEDERAL THEOLOGY; GRACE; PREDESTINATION; SACRAMENTS.

Calvinists, (1.) a name formerly used on the Continent of Europe to designate all members of the so-

called *Reformed* churches, as distinguished from the *Lutheran* Church. It is still so used to a certain extent, especially in France and Austria.

(2.) It is now generally in use to designate those who receive the theological tenets of Calvin, without regard to Church or sect. See CALVIN; CALVINISM. In the early part of the 16th century the *Reformed* churches of Switzerland, Hungary, France, Germany, and Holland were all Calvinistic in this sense; now the proportion of Calvinists in some of them is small. The Presbyterian churches of England, Scotland, Ireland, and America are, with few exceptions, Calvinistic. So also are many of the Independent and Congregational churches, both in England and America. In the Church of England, and the Protestant Episcopal Church of the United States, Calvinism prevails to a certain extent, but statistics are wanting. Bishop Burgess remarks that "although the Church of England had been represented at the Synod of Dort, its clergy acquiesced not at all in the determination of that assembly, and the bishops who were there were among the last of their order who have written upon the side which was there triumphant. The Calvinism of the Church grew fainter till it scarcely struggled. It was not so much overcome by direct assaults as supplanted through the more ecclesiastical spirit which predominated at the Restoration. For a century after, its voice was almost unheard, except along with the irregularities of Whitefield, and then it was much more than overbalanced by the Arminianism of Wesley. Within the last century it has been revived in the writings of many pious men, but can scarcely be viewed as having very largely affected the prevalent teaching of Episcopalians, either in Great Britain or in America" (*Bibliotheca Sacra*, 1863, p. 863). The Dutch Reformed Church, the larger part of the Baptists and of the Welsh Methodists, are also Calvinists.

Calvisius, SETH, or **Kalwitz**, a celebrated chronologist, was born at Gorschleben, Thuringia, Feb. 20, 1556. He studied at Frankenhausen and Magdeburg, where he gained his bread by singing in the streets, and laid by enough to support him at the Academy of Helmstädt, whither he went in 1579, and thence to Leipsic. He gained a profound knowledge of music, chronology, astronomy, and Hebrew. He died at Leipsic Nov. 23, 1615, leaving, besides other works, *Enodatio duarum quæstionum circa annum Nativitatis et tempus Ministerii Christi* (Erfurdt, 1610, 4to); also, *Elenchus Calendarii Gregoriani* (Heidelberg, 1612). But his principal work is entitled *Opus Chronologicum*, "ex auctoritate potissimum Sanct. Scripturæ et historicorum fide dignissimorum, ad motum luminarium cœlestium tempora et annos distinguentium" (Frankfort, folio, 1604 and 1684). In this work he endeavored to supply the defects and correct the errors of Scaliger and other chronologists, by having recourse to astronomical calculations, in order to fix the precise time of different events. For this purpose he calculated more than one hundred and fifty eclipses. John Kepler, David Pareus, and others warmly attacked his work on its appearance, but Scaliger spoke of it in the highest terms, declaring it, in a letter to Isaac Casaubon, to be *accuratissimum chronicon*. Calvisius's works are inserted in the Roman Index.—Hoefer, *Biog. Générale*, viii, 278; Landon, *Eccles. Dictionary*, ii, 505.

Camaldules (*Camaldulani*, *Camaldulenses*, *Ordo Camaldulanus*), a religious order founded about 1009 by Romualdus, who built a monastery at Campo Maldoli, or Camaldoli, a village thirty miles east of Florence, and belonging to a lord named Maldoli, whence the order, some time after the death of Romualdus, took its name. Up to the end of the eleventh century they bore the name of their founder, and were called Romualdines. The monks observe the rule of St. Benedict, with some alterations and additions, and combine the cœnobitic and eremitical life. At first they wore a black dress; but Romualdus, having seen a vision of his monks mounting a ladder toward heaven, and all clothed in white, changed their habit from black to white. In the seventeenth and eighteenth centuries, the order was divided into five congregations, under so many generals or "majors," with about 2000 members. The life of these hermits was originally very severe; but, like most other orders, as it grew rich, it became corrupt. They were re-formed in 1431 by Eugene IV, and again in 1513. A new order, with a stricter rule, was formed by Gustiniani in 1520, and since that time both divisions exist independently. They appear never to have had an establishment in England. In France there was but one convent of Camaldules or Camaldoli, viz., at Grosbois, near Paris. They were of the congregation of "Our Lady of Consolation." The Camaldule cœnobites, to whom Pope Gregory XVI belonged, have their principal convent at Rome, and a few more houses in Italy, with about one hundred members. The hermits are a little more numerous, counting upward of two hundred members, with two majors at Camaldoli and Monte Corona, near Perugia. Their convents are likewise all in Italy, with the exception of one in Poland. There was also a congregation of Camaldule nuns, founded by the fourth general of Camaldules, Rudolphus, in 1086, at Mucellano, in Tuscany. They had in the seventeenth century twenty-four convents, of which, in 1860, only two were left, at Rome and at Florence.—Fehr, *Gesch. der Mönchsorden*, i, 68 sq.; Helyot, *Ord. Relig.* i, 577; Landon, *Eccl. Dict.* ii, 506.

Cambridge Manuscript (CODEX CANTABRIGIENSIS, from its present place of deposit), called also CODEX BEZÆ (from its depositor), usually designated as D of the Gospels and Acts, is one of the most important uncial MSS. of the N. T. It contains the Greek text, with a Latin translation on the opposite page, of the entire four Gospels (in the order Matthew, John, Mark, Luke) and Acts, with several gaps (Matt. i, 1 20; vi, 20-ix, 2; xxvii, 2 12; John i, 16-iii, 26; Acts viii, 29-x, 14; xxi, 2-10, 15-18 [which passage seems to have been extant in Wetstein's time]; xxii, 10-20, 29-xxviii, 31, in all which the *Greek* is wholly absent; and Matt. iii, 7-16; Mark xvi, 15-20; John xviii, 14-xx, 13, where the Greek has been supplied by a scribe not earlier than the tenth century; besides about as numerous omissions and similar restorations of the *Latin*, but mostly at different places from the foregoing), and a few verses of the catholic Epistles (John iii, 11-15, in the Latin only), which once stood entire between the Gospels and Acts. The MS. is a quarto volume, 10 inches high by 8 broad, consisting of 414 leaves (11 of them more or less mutilated, and 9 others by later hands), with but one column on each page, the Greek being on the left page and the Latin on the right. The vellum is not very fine. There are 33 lines on each page, and these are of unequal length, the MS. being arranged in clauses or στίχοι, and the corresponding ones in the Lat. and Gr. as nearly as possible opposite each other. It has not the large κεφάλαια or Eusebian canons, but only the Ammonian sections, and these often incorrectly placed, obviously by a later hand. The leaves are arranged in quires of 4 sheets (8 leaves) each, the numeral "signatures" of which are set by the first hand low in the margin at the foot of the last page of each. It originally consisted of upward of 64 quires, and one of the gaps, which omits 67, ending with 3 John, 11, would be too great a space for all the canonical Epistles merely. The first three lines of each book were written in bright red ink, which was also occasionally employed elsewhere by way of ornament. The characters betray a later age than Codices Alexandrinus, Vaticanus, and Ephraemi (A, B, and C), and capitals occur as in Codex Sinaiticus (ℵ). Its Alexandrine forms would argue an Egyptian origin, but the fact of

Specimen of the Codex Cantabrigiensis, from the fac-simile types of Kipling's edition (the Greek of Matt. xxv, 1: τοτε ὁμοιωθησεται ἡ βασιλεια των ουρανων | δεκα παρθενοις αἱτινες λαβουσαι | τας λαμπαδας αυτων | εξηλθον εις απαντησιν του νυμφιου |).

the Latin translation shows that it is a Western copy. It is assigned with great probability to the sixth century. It is chiefly remarkable for its bold and extensive interpolations, amounting to some six hundred in the Acts alone, on which account it has been cautiously employed by critics, notwithstanding its great antiquity. See CRITICISM (BIBLICAL).

This MS. was presented to Cambridge University in 1581 by Theodore Beza, who says he obtained it during the French wars in 1562, when it was found in the monastery of St. Irenæus at Lyons, and doubtless rescued by some Huguenot soldier. It seems to have been the same noted as β in the margin of Stephens's third edition. It was first completely examined by Patrick Young, the librarian of Charles I, and next collated by Usher for Walton's *Polyglot*. Dr. Kipling published it in full from fac-simile types, but with the uncritical insertion of many of the marginal readings by the second hand into the text (*Codex Theodori Bezæ Cantabrigiensis*, 1793, 2 vols. fol.). Scrivener has since reprinted it more carefully in ordinary types, with introduction, annotations, and exact fac-similes (*Codex Bezæ*, etc., Lond. 1864, 8vo).—Scrivener, *Introd.* p. 96 sq.; Tregelles in Horne's *Introd.* (new ed.), iv, p. 169 sq. See MANUSCRIPTS (BIBLICAL).

Cambridge Platform, a system of Church discipline agreed upon by the elders and messengers of the New England churches, assembled in synod at Cambridge, 1648. The object of the synod was to define accurately the ecclesiastical position of the New England churches. In matters of faith they were agreed, but there were differences in regard to Church government, some being inclined to a more strict Presbyterianism, some to a more loose Independency, while the great majority were Congregationalists.

As regards *doctrine*, the synod declared their adhesion to the Westminster Confession; but they did not accept that confession in regard to discipline, but proceeded to construct a platform, of which we give the following abstract: It declares that the *form* of Church government is one, immutable, and prescribed in the Word of God. The Church in general consists of the whole company of the redeemed, but the state of the visible Church militant, walking in order, was before the law economical, or in families; under the law, national; since Christ, only congregational. "The matter of the visible Church in quality consists of saints by calling;" and in quantity "a church ought not to be of greater number than may ordinarily meet together conveniently in one place, nor fewer than can conveniently carry on church work." The saints must have a visible political union among themselves, and this form is the visible covenant whereby they give themselves up to the Lord, to the observing of the ordinances of Christ together in the same society. The *supreme power* in the Church belongs to Jesus Christ; subordinate power, as extraordinary, to apostles, etc.; as ordinary, to every particular church. The *officers* in a church are necessary to its well-being, but not to its existence. The extraordinary, as apostles, are temporary; the ordinary, which are elders (or bishops) and deacons, are perpetual. There is a difference between teaching and ruling *elders*. The ruling elder is to assist the teaching elder in ruling. The *deacon's* office is confined to temporalities. Church *officers* are elected by the church in which they are to minister, and the church may depose, as well as elect them, though the advice of neighboring churches in such case should be sought. Church officers are to be ordained *after* their election by the church; ordination is the solemn putting a man into his place, but does not constitute an officer. As the people may elect, they may also ordain; though, where there are elders, these, as representing the church, are to perform the service of imposition of hands. In respect to Christ, the head, the Church is a monarchy; in respect to the brotherhood, the body, it resembles a democracy; in respect to the Presbytery, it is an aristocracy. Church government or rule is placed by Christ in the officers of the church, who are subject to the power of the church, and who pronounce sentence with consent of the church.

In a right administration, all church acts proceed after the manner of a mixed administration. There are rules also for the support of church officers, admission and dismission of members, excommunication, etc., all based on the preceding principles; and it is declared that churches, though distinct and equal, ought to preserve church communion with each other, 1st, by way of mutual care; 2d, by way of consultation; 3d, by way of admonition; 4th, by way of participation in acts of worship, etc.; 5th, by way of recommendation; 6th, by way of relief and succor. In gathering a church, this communion should always be attended to.

Synods according to the pattern of Acts xv, though not necessary to the being, are useful for the well-being of the churches. They are constituted by the churches sending forth elders and other messengers to meet together in the name of Christ. A magistrate has power to call a synod, but the constituting of a synod is a church act. Synods are not to exercise church censures by way of discipline, but to debate and determine the principles on which such acts are based, and, so far as consonant with God's Word, they are to be received with reverence and submission. Synods are not permanent ecclesiastical bodies. An article on the power of civil magistrates in matters ecclesiastical completes the platform.—Savage's *Winthrop*, vol. ii; Boston ed. *Cambridge and Saybrook Platforms;* Shedd, *Hist. of Doctrines*, ii, 482. See CONGREGATIONALISTS.

Cambyses (Καμβύσης, a Græcized form of the old Persic *Kabujiya*, a "bard," Rawlinson, *Herodotus*, iii, 455), the second Persian monarch of the name, was the son of Cyrus the Great (but by what mother is disputed), whom he succeeded, B.C. 530. In the fifth year of his reign he invaded Egypt, taking offence, according to Herodotus (iii, 1), at the refusal of Amasis, the father of Psammenitus, the then reigning Egyptian

king, to give him his daughter in marriage; but the real cause of the campaign (comp. Herodotus, i, 77) was the ambition of Cambyses (see Dahlmann, *Herod.* p. 148) to accomplish the design of his father in recovering this portion of Nebuchadnezzar's conquests (see Jer. xliii; xlvi; Ezek. xxix-xxxii; comp. Newton, *On the Prophecies*, i, 357). See CYRUS. Egypt was subdued, according to Ctesias, through treachery; according to Pantænus (vii, 9), by intrigue; but according to Herodotus, in a pitched battle, after which the whole country, as also the Cyrenians and Barcans, submitted to him. He proceeded to execute his design of reducing Ethiopia also, but was compelled to retreat for want of provisions, his attack on Carthage having likewise failed through the refusal of his Phœnician allies to co-operate with him against their own colony. He was thus defeated in his plans, which doubtless contemplated the securing to Persia the caravan trade of the Desert (Herod. ii, 1; iii, 1-26; Ctesias, *Pers.* 9; Justin. i, 9; comp. Heeren's *African Nations*, i, 6). Diodorus says, indeed, that he penetrated as far as Meroë, and even founded that city, naming it after his mother; but this statement is equally incorrect (see Strabo, p. 790) with that of Josephus, who says he changed its name to Meroë in honor of his sister (*Ant.* ii, 10, 2). The conduct of Cambyses after this exhibited the darkest character of tyranny to such an extent that the Egyptians, whom he ruled with an iron sway (comp. Isa. xix, 4), attributed to him madness as the punishment of his impiety, and even the Persians ever after styled him the "despot" (δεσπότης, Herod. iii, 89). Indeed, he appears to have been subject to epileptic fits from his birth (Herod. iii, 8), and his behavior evinced a violence of temper bordering upon frenzy. He is said to have married his own sisters, and to have brutally killed one of them for bewailing the execution of his own brother Smerdis by his order. His atrocities provoked an insurrection, headed by one of the Magian priests, who assumed the name of the murdered prince "Smerdis" (q. v.); and, as Cambyses was marching to put down the pretender, he died at Ecbatana of an accidental wound in the thigh, B.C. 521, leaving no heir (Herod. iii, 61 sq. Ctesias, *Excerpt. Pers.*, gives a somewhat different account of his end, and also makes his reign eighteen years; but Clemens Alexandrinus, *Strom.* i, 395, says he reigned ten years). See PERSIA. He is named *Kabujiya* on the Persian tablet of the Behistun inscription (Rawlinson, *Herod.* ii, 492, 493). See CUNEIFORM INSCRIPTIONS. His name also appears on the Egyptian monuments in a royal cartouch. See HIEROGLYPHICS.

K a n b o th

Hieroglyph of *Cambyses.*

Cambyses is probably the "Ahasuerus" mentioned in Ezra iv, 6, as the Persian king addressed by the enemies of the Jews for the purpose of frustrating the rebuilding of the Temple, B.C. 529. Josephus also calls this monarch *Cambyses, the son of Cyrus*, and he gives the correspondence between the king and his Syrian viceroys in detail (*Ant.* xi, ii, 1 and 2), which he has evidently blended with that which took place with his successor, the pseudo-Smerdis ("Artaxerxes," Ezra iv, 7 sq.), since he does not name the latter, but only alludes to the usurpation of the Magians in the interval before the accession of Darius Hystaspis (*ib.* iii, 1). See AHASUERUS.

Camel (a word found in essentially the same form in all the Shemitic languages [Heb. גָּמָל, *gamal';* Syriac, the same; Chald. *gamala;* ancient Arabic, *jemel*, modern, *jammel*]; in the Greek [κάμηλος] and Latin [*camelus*], whence it has passed into the languages of Western Europe; also in the Coptic *kamoul*. In Sanscrit it occurs as *kramêla* and *kramêlaka;* and hence Schlegel traces the word to the root *kram* = *to step*. Bochart derives it from the root גָּמַל, *to revenge*, because the camel is vindictive and retains the memory of injuries [*animal μνησίκακον*]; but Gesenius considers it more likely that גָּמַל should have assumed the force of the cognate Arabic root *jamal, to carry*), an animal of the order *Ruminantia*, and genus *Camelus*. As constituted by most modern naturalists, it comprises two species positively distinct, but still possessing the common characters of being ruminants without horns, without muzzle, with nostrils forming oblique slits, the upper lip divided, and separately movable and extensile, the soles of the feet horny, with two toes covered by unguiculated claws, the limbs long, the abdomen drawn up, while the neck, long and slender, is bent down and up, the reverse of that of a horse, which is arched. According to other naturalists, however, the two-humped camel, sometimes called the Bactrian camel, is a variety only, not a distinct species (Patterson, *Introd. to Zoology*, p. 417). Camels have thirty-six teeth in all, of which three cuspidate on each side above, six incisors, and two cuspidate on each side below, though differently named, still have all more or less the character of tushes. They have callosities on the breast-bone and on the flexures of the joints. Of the four stomachs, which they have in common with other animals chewing the cud, the ventriculus, or paunch, is provided with membranous cells to contain an extra provision of water, enabling the species to subsist for four or more days without drinking. But when in the desert, the camel has the faculty of smelling it afar off, and then, breaking through all control, he rushes onward to drink, stirring the element previously with a fore-foot until quite muddy. Camels are temperate animals, being fed on a march only once in twenty-four hours, with about a pound weight of dates, beans, or barley, and are enabled in the wilderness, by means of their long flexible necks and strong cuspidate teeth, to snap as they pass at thistles and thorny plants, mimosas and caper-trees. They are emphatically called "the ships of the desert;" having to cross regions where no vegetation whatever is met with, and where they could not be enabled to continue their march but for the aid of the double or single hunch on the back, which, being composed of muscular fibre, and cellular substance highly adapted for the accumulation of fat, swells in proportion as the animal is healthy and well fed, or sinks by absorption as it supplies the want of sustenance under fatigue and scarcity; thus giving an extra stock of food without eating, till by exhaustion the skin of the prominences, instead of standing up, falls over, and hangs like empty bags on the side of the dorsal ridge. Now when to these endowments are added a lofty stature and great agility; eyes that discover minute objects at a distance; a sense of smelling of prodigious acuteness, ever kept in a state of sensibility by the animal's power of closing the nostrils to exclude the acrid particles of the sandy deserts; a spirit, moreover, of patience, not the result of fear, but of forbearance, carried to the length of self-sacrifice in the practice of obedience, so often exemplified by the camel's bones in great numbers strewing the surface of the desert; when we perceive it furnished with a dense wool to avert the solar heat and nightly cold while on the animal, and to clothe and lodge his master when manufactured, and know that the female carries milk to feed him, we have one of the most incontrovertible examples of Almighty power and beneficence in the adaptation of means to a direct purpose that can well be submitted to the apprehension of man; for, without the existence of the camel, immense portions of the surface of the earth would be uninhabitable, and even impassable. Surely the Arabs

are right: "Job's beast is a monument of God's mercy!"

1. The Bactrian camel (*camelus Bactrianus* of authors) is large and robust; naturally with two hunches, and originally a native of the highest table-lands

Bactrian Camel.

of Central Asia, where even now wild individuals may be found. The species extends through China, Tartary, and Russia, and is principally imported across the mountains into Asia Minor, Syria, and Persia. It is seldom seen at Aleppo (Russel, *N. H. Aleppo*, ii, 170). One appears figured in the processions of the ancient Persian satrapies among the bas-reliefs of Chehel Minar, where the Arabian species is not seen. It is also this species which, according to the researches of Burckhardt, constitutes the brown Taous variety of single-hunched Turkish or Turkî camels commonly seen at Constantinople, there being a very ancient practice among breeders, not, it appears, attended with danger, of extirpating with a knife the foremost hunch of the animal soon after birth, thereby procuring more space for the pack-saddle and load. It seems that this mode of rendering the Bactrian cross-breed similar to the Arabian camel or dromedary (for Burckhardt misapplies the last name) is one of the principal causes of the confusion and contradictions which occur in the descriptions of the two species, and that the various other intermixtures of races in Asia Minor and Syria, having for their object either to create greater powers of endurance of cold or of heat, of body to carry weight, or to move with speed, have still more perplexed the question. From these causes a variety of names has arisen, which, when added to the Arabian distinctions for each sex, and for the young during every year of its growth, and even for the camels nursing horse-foals, has made the appellatives exceedingly numerous. We notice only—

2. The Arabian camel or *dromedary* (*camelus dromedarius* or *Arabicus* of naturalists, בֶּכֶר, *be'ker;* and female and young בִּכְרָה, *bikrah'*, both "dromedary," Isa. lx, 6; Jer. ii, 23) is properly the species having naturally but one hunch, and considered as of Western Asiatic or of African origin, although no kind of camel is figured on any monument of Egypt (Wilkinson, *Anc. Eg.* i, 234), not even where there are representations of live-stock such as that found in a most ancient tomb beneath the pyramid of Gizeh, which shows herdsmen bringing their cattle and domesticated animals to be numbered before a steward and his scribe, and in which we see oxen, goats, sheep, asses, geese, and ducks, but neither horses nor camels. That they were not indigenous in the early history of Egypt is countenanced by the mythical tale of the priests describing "the flight of Typhon, seven days' journey upon an ass." We find, however, camels mentioned in Genesis xii; but being placed last among the cattle given by Pharaoh to Abraham, the fact seems to show that they were not considered as the most important part of his donation. This can be true only upon the supposition that but a few of these animals were delivered to him, and therefore that they were still rare in the valley of the Nile, though soon after there is abundant evidence of the nations of Syria and Palestine having whole herds of them fully domesticated. These seem to imply that the genus Camelus was originally an inhabitant of the elevated deserts of Central Asia, its dense fur showing that a cold but dry atmosphere was to be encountered, and that it came already domesticated, toward the south and west, with the oldest colonies of mountaineers, who are to be distinguished from earlier tribes that subdued the ass, and perhaps from others still more ancient, who, taking to the rivers, descended by water, and afterward coasted and crossed narrow seas. Of the Arabian species two very distinct races are noticed; those of stronger frame but slower pace used to carry burdens varying from 500 to 700 weight, and travelling little more than twenty-four miles per day; and those of lighter form, bred for the saddle with single riders, the fleetest serving to convey intelligence, etc., and travelling at the rate of 100 miles in twenty-four hours. They are designated by several appellations, such as *Deloul*, the best coming

Arabian Camel.

from Oman, or from the Bishareens in Upper Egypt; also *Hejin* by the Turks, and still other names (e. g. *Ashaary*, *Maherry*, *Reches*, *Badees* at Herat, Rawabel, and Racambel) in India, all names more or less implying swiftness, the same as δρομάς, *swift;* the difference between them and a common camel being as great as that between a high-bred Arab mare and an English cart-horse (Layard, *Nineveh and Bab.* p. 292). Caravans of loaded camels have always scouts and flankers mounted on these light animals, and in earlier ages Cyrus and others employed them in the line of battle, each carrying two archers. The Romans of the third and fourth centuries of our era, as appears from the "*Notitia*," maintained in Egypt and Palestine several *alæ* or squadrons mounted on dromedaries; probably the wars of Belisarius with the northern Africans had shown their importance in protecting the provinces bordering on the desert; such was the *ala dromedariorum Antana* at Ammata in the tribe of Judah, and three others in the Thebais (comp. 1 Sam. xxx, 17). Bonaparte formed a similar corps, and in China and India the native princes and the East India Company have them also.

It is likely the word אֲחַשְׁתְּרָנִים, *achashteranim'* (Esth. viii, 10, 14), rendered "camels," more properly signifies *mules* (being explained by the addition "sons of mares," mistranslated "young dromedaries"), and implies the swift postage or conveyance of orders, the whole verse showing that all the means of dispatch were set in motion at the disposal of government (see the dissertation on this word by Schelhorn, in the *Misc. Lips.* x, 231-44). On the other hand, רֶכֶשׁ, *re'kesh* (translated "mules" in the above pas-

sage, and rendered "dromedary" in 1 Kings iv, 28; "swift beast" in Mic. i, 13), we take to be one of the many names for running camels (as above), used to carry expresses; or post-horses, anciently *Asiandi* or *Astandi*, now *Chupper* or *Chuppaw*, which, according to Xenophon, existed in Persia in the time of Cyrus, and are still in use under different appellations over all Asia. The *kirkaroth'* (כִּרְכָּרוֹת, rendered "swift beasts") of Isa. lxvi, 20, were probably also a kind of dromedary.

Camel for Baggage.

All camels, from their very birth, are taught to bend their limbs and lie down to receive a load or a rider. They are often placed circularly in a recumbent posture, and, together with their loads, form a sufficient rampart of defence against robbers on horseback. The milk of she-camels is still considered a very nutritive cooling drink (Aristot. *Hist. Anim.* vi, 25, 1; Pliny, *N. H.* xi, 41; xxviii, 9), and when turned it becomes intoxicating (such, according to the Rabbins [Rosenmüller, *Not.* ad *Hieroz.* i, 10], was the drink offered [Judg. iv, 19] by Jael to Sisera [comp. Josephus, *Ant.* v, 5, 4]). Their dung supplies fuel in the desert and in sandy regions where wood is scarce; and occasionally it is a kind of resource for horses when other food is wanting in the wilderness. Their flesh, particularly the hunch, is in request among the Arabs (comp. Prosp. Alp. *H. N. Æg.* i, 226), although forbidden to the Hebrews, more perhaps from motives of economy, and to keep the people from again becoming wanderers, than from any real uncleanness. Camels were early a source of riches to the patriarchs, and from that period became an increasing object of rural importance to the several tribes of Israel, who inhabited the grazing and border districts, but still they never equalled the numbers possessed by the Arabs of the desert. In what manner the Hebrews derived the valuable remunerations obtainable from them does not directly appear, but it may be surmised that by means of their camels they were in possession of the whole trade that passed by land from Asia Minor and Syria to the Red Sea and Egypt, and from the Red Sea and Arabia toward the north and to the Phœnician sea-ports. On swift dromedaries the trotting motion is so hard that to endure it the rider requires a severe apprenticeship; but riding upon slow camels is not disagreeable, on account of the measured step of their walk; ladies and women in general are conveyed upon them in a kind of wicker-work sedan, known as the takht-ravan of India and Persia. In some cases this piece of female equipage presents almost a formidable appearance.

A Shammar Lady on a Camel.

The camels which carried the king's servants or guests, according to Philostratus, were always distinguished by a gilded boss on the forehead. The camel, being a native of Asia, from the earliest ages to the present day has been the chief means of communication between the different regions of the East, and from its wonderful powers of endurance in the desert has enabled routes to be opened which would otherwise have been impracticable. "Their home is the desert; and they were made, in the wisdom of the Creator, to be the carriers of the desert. The coarse and prickly shrubs of the wastes are to them the most delicious food, and even of these they eat but little. So few are the wants of their nature, that their power of going without food, as well as without water, is wonderful. Their well-known habit of lying down upon the breast to receive their burdens is not, as is often supposed, merely the result of training; it is an admirable adaptation of their nature to their destiny as carriers. This is their natural position of repose, as is shown, too, by the callosities upon the joints of the legs, and especially by that upon the breast. Hardly less wonderful is the adaptation of their broad cushioned foot to the arid sands and gravelly soil which it is their lot chiefly to traverse . . . . As the carriers of the East, the 'ships of the desert,' another important quality of the camel is their sure-footedness" (Robinson, *Researches*, ii, 632-635). The present geograph-

ical distribution of the camel extends over Arabia, Syria, Asia Minor to the foot of the Caucasus, the south of Tartary, and part of India. In Africa it is found in the countries extending from the Mediterranean to the Senegal, and from Egypt and Abyssinia to Algiers and Morocco. A number of camels have lately been imported into the United States, designed for transportation in the arid plains of the extreme southwestern territories; but the result of the experiment is yet doubtful (Marsh, *The Camel*, etc. Bost. 1856). (For a farther view of the natural history of the camel, see the *Penny Cyclopædia*, s. v.) See DROMEDARY.

The camel is frequently mentioned in Holy Scripture. It was used not only in Palestine, but also in Arabia (Jud. vii, 12), in Egypt (Exod. ix, 3), in Syria (2 Kings viii, 9), and in Assyria, as appears from the sculptures of Nineveh (see Layard, *Nineveh and Bab.* p. 582). It was used at an early date both as a riding animal and as a beast of burden (Gen. xxiv, 64; xxxvii, 25). It was likewise used in war (1 Sam. xxx, 17; Isa. xxi, 7; comp. Pliny, *N. H.* viii, 18; Xenoph. *Cyrop.* vii, 1, 27; Herod. i, 80; vii, 86; Livy, xxxvii, 40). Of its hair coarse garments were manufactured (Matt. iii, 4; Mark i, 6). The Jews were not allowed to eat its flesh (Lev. xi, 4; Deut. xiv, 7). The prophet Isaiah foretells the great increase and flourishing state of the Messiah's kingdom, by the conversion and accession of the Gentile nations, by comparing the happy and glorious concourse to a vast assemblage of camels (lx, 6). He also predicts the march of the army of Cyrus to the conquest and destruction of Babylon by an allusion to a chariot of camels (xxi, 7); and the folly and presumption of those is remarked upon (xxx, 6) who, in the time of their trouble, carried treasures on camels into Egypt to purchase the assistance of that people, and acknowledged not the Lord their God, who alone could save and deliver them.

In the history of the Hebrews, however, the camel was used only by nomad tribes. This is because the desert is the home of the Arabian species, and it cannot thrive in even so fine a climate as that of the valley of the Nile in Egypt. The Hebrews in the patriarchal age had camels as late as Jacob's journey from Padan-aram, until which time they mainly led a very wandering life. With Jacob's sojourn in Palestine, and, still more, his settlement in Egypt, they became a fixed population, and thenceforward their beast of burden was the ass rather than the camel. The camel is first mentioned in a passage which seems rather to tell of Abraham's wealth (Gen. xii, 16, as xxiv, 35), to which Pharaoh doubtless added, than to recount the king's gifts. If the meaning, however, is that Pharaoh gave camels, it must be remembered that this king was probably one of the shepherds who partly lived at Avaris, the Zoan of Scripture; so that the passage would not prove that the Egyptians then kept camels, nor that they were kept beyond a tract, at this time, and long after, inhabited by strangers. The narrative of the journey of Abraham's servant to fetch a wife for Isaac portrays the habits of a nomad people, perhaps most of all when Rebekah, like an Arab damsel, lights off her camel to meet Isaac (xxiv). Jacob, like Abraham, had camels (xxx, 43): when he left Padan-aram he "set his sons and his wives upon camels" (xxxi, 17); in the present he made to Esau there were "thirty milch camels with their colts" (xxxii, 15). In Palestine, after his return, he seems no longer to have kept them. When his sons went down to Egypt to buy corn, they took asses. Joseph sent wagons for his father and the women and children of his house (xlv, 19, 27; xlvi, 5). After the conquest of Canaan, this beast seems to have been but little used by the Israelites, and it was probably kept only by the tribes bordering on the desert. It is noticeable that an Ishmaelite was overseer of David's camels (1 Chron. xxvii, 30). On the return from Babylon the people had camels, perhaps purchased for the journey to Palestine, but a far greater number of asses (Ezra ii, 67; Neh. vii, 69). There is one distinct notice of the camel being kept in Egypt. It should be observed, that when we read of Joseph's buying the cattle of Egypt, though horses, flocks, herds, and asses are spoken of (Gen. xlvii, 17), camels do not occur: they are mentioned as held by the Pharaoh of the exodus (Exod. ix, 3), but this may only have been in the most eastern part of Lower Egypt, for the wonders were wrought in the field of Zoan, at which city this king then doubtless dwelt. It is in the notices of the marauding nomad tribes that wandered to the east and south of Palestine that we chiefly read of the camel in Scripture. In the time of Jacob there seems to have been a regular traffic between Palestine, and perhaps Arabia, and Egypt, by camel caravans, like that of the Ishmaelites or Midianites who bought Joseph (Gen. xxxvii, 25, 28). In the terrible inroad of the Midianites, the Amalekites, and the Bene-Kedem, or children of the East, "both they and their camels were without number; and they entered into the land to destroy it" (Judg. vi, 5; comp. vii, 12). When Gideon slew Zebah and Zalmunna, kings of Midian, he "took away the ornaments [or "little moons"] that [were] on their camels' necks" (viii, 21), afterward mentioned, with neck-chains (see Kitto, *Phys. Hist. of Pal.* p. 391; comp. Stat. *Thebaid*, ix, 687), both probably of gold (ver. 26). We also find other notices of the camels of the Amalekites (1 Sam. xv, 3; xxx, 17), and of them and other and probably kindred peoples of the same region (xxvii, 8, 9). In the account of the conquest by the Reubenites, the Gadites, and the half tribe of Manasseh, of the Hagarites beyond Jordan, we read that fifty thousand camels were taken (1 Chron. v, 18-23). It is not surprising that Job, whose life resembles that of an Arab of the desert, though the modern Arab is not to be taken as the inheritor of his character, should have had a great number of camels (Job i, 3; xlii, 12; comp. Aristot. *Hist. Anim.* ix, 37, 5). The Arabian Queen of Sheba came with a caravan of camels bearing the precious things of her native land (1 Kings x, 2; 2 Chron. ix, 1). We read also of Benhadad's sending a present to Elisha "of every good thing of Damascus, forty camels' burden" (2 Kings viii, 9). Damascus, be it remembered, is close to the desert. In the prophets, likewise, the few mentions of the camel seem to refer wholly to foreign nations, excepting where Isaiah speaks of their use, with asses, in a caravan bearing presents from the Israelites to the Egyptians (xxx, 6). He alludes

Two-humped Camels. From the Black Obelisk at Nimrud.

to the camels of Midian, Ephah, and Sheba, as in the future to bring wealth to Zion (lx, 6). The "chariot of camels" may be symbolical (xxi, 7), or it may refer to the mixed nature of the Persian army. Jeremiah makes mention of the camels of Kedar, Hazor, and the Bene-Kedem (xlix, 28-33). Ezekiel prophesies that the Bene-Kedem should take the land of the Ammonites, and Rabbah itself should be "a resting-place for camels" (xxv, 1-5; see Buckingham, *Trav.* p. 329). See CARAVAN.

The camel is classed by Moses among unclean animals (Lev. xi, 4), "because he cheweth the cud, but divideth not the hoof." Michaelis justly remarks, that in the case of certain quadrupeds a doubt may arise whether they do fully divide the hoof or ruminate. "In such cases," he says, "to prevent difficulties, a legislator must authoritatively decide: by which I do not mean that he should prescribe to naturalists what their belief should be, but only to determine, for the sake of expounders or judges of the law, what animals are to be regarded as ruminating or parting the hoof." This doubt arises in the case of the camel, which does ruminate, and does in some sort divide the hoof; that is, the foot is divided into two toes, which are very

Inside of a Camel's Foot. A is the cushion on which the animal treads, shown as lifted out of its bed.

distinctly marked above, but below the division is limited to the anterior portion of the foot, the toes being cushioned upon and confined by the elastic pad upon which the camel goes. This peculiar conformation of the foot renders the division incomplete, and Moses, for the purposes of the law, therefore decides that it divides not the hoof. Perhaps in this nicely balanced question the determination against the use of the camel for food was made with the view of keeping the Israelites distinct from the other descendants of Abraham, with whom their connection and coincidence in manners were otherwise so close. The interdiction of the camel, and, of course, its milk, was well calculated to prevent them from entertaining any desire to continue in Arabia, or from again devoting themselves to the favorite occupation of nomade herdsmen, from which it was obviously the intention of many of the laws to wean them. In Arabia a people would be in a very uncomfortable condition who could neither eat camel's flesh nor drink its milk. Of the constant use of its milk by the Arabs travellers frequently speak; and if we wanted a medical reason for its interdiction, it might be found in the fact that to its constant use is attributed the obstructions and indurations of the stomach, which form one of the most common complaints of the Arabs. They do not kill the camel, or any other animal, for ordinary food; but when a camel happens to be lamed in a caravan, it is killed, and a general feast is made on its flesh. Camels are also killed on great festival occasions, and sometimes to give a large entertainment in honor of a distinguished guest. Sometimes also a man vows to sacrifice a camel if he obtain this or that blessing, as, for instance, if his mare brings forth a female; and in that case he slaughters the animal, and feasts his friends on the flesh. Burckhardt (*Notes on the Bedouins*) mentions the rather remarkable fact that the Arabs know no remedy against the three most dangerous diseases to which camels are subject; but they believ that the Jews in their sacred books have remedies mentioned, which they withhold through hatred and malice. The flesh of the camel is coarse grained, but is rather juicy and palatable when the animal is young and not poorly fed. It is inferior to good beef, although at first it might readily be mistaken for beef; but it is at least equal, if not superior, to horse-flesh (Kitto, *Pict. Bible*, note in loc.).

To *pass a camel through the eye of a needle* was a proverbial expression which our Lord employed in his discourse to the disciples to show how extremely difficult it is for a rich man to forsake all for his cause and obtain the blessings of salvation (Matt. xix, 24; Mark x, 25; Luke xviii, 25; see the treatises on this passage, in Latin, of Clodius [Viteb. 1665], Pfeiffer [Regiom. 1679], Fetzlen [Viteb. 1673]). Many expositors are of opinion that the allusion is not to the camel, but to the cable by which an anchor is made fast to the ship, changing *κάμηλος, a camel*, to *κάμιλος, a cable*; but for this there is no critical foundation; and Lightfoot and others have shown that to speak of a camel, or any other large animal, as going through the eye of a needle was a proverbial expression, much used in the Jewish schools, to denote a thing very unusual or very difficult. There is a similar expression in the Koran: "The impious, who, in his arrogancy, shall accuse our doctrine of falsity, shall find the gates of heaven shut; nor shall he enter there till a camel shall pass through the eye of a needle. It is thus that we shall recompense the wicked." Roberts mentions a parallel proverb used in India to show the difficulty of accomplishing any thing: "Just as soon will the elephant pass through the spout of a kettle."

Another proverbial expression occurs in Matt. xxiii, 24: "Strain at (διυλίζω) a gnat and swallow a camel." Dr. Adam Clarke proves that "at" has been substituted for "out," by a typographical error in the edition of 1611, in our version, "out" occurring in Archbishop Parker's of 1568. The reference is to a custom the Jews had of filtering their wine, for fear of swallowing any insect forbidden by the law as unclean. The expression is, therefore, to be taken hyperbolically, and, to make the antithesis as strong as possible, two things are selected, the smallest insect and the largest animal. The proverb is applied to those who are superstitiously anxious to avoid small faults, and yet do not scruple to commit the greatest sins.

CAMELS' HAIR (τρίχες καμήλου), a material of clothing. John the Baptist was habited in raiment of camels' hair (Matt. iii, 4; Mark i, 6), and Chardin states that such garments are worn by the modern dervishes. There is a coarse cloth made of camels' hair in the East, which is used for manufacturing the coats of shepherds and camel-drivers, and also for the covering of tents (Harmar, *Obs.* ii, 487; comp. Ælian, *Nat. Hist.* xvii, 34). It was doubtless this coarse kind which was adopted by John. By this he was distinguished from those residents in royal palaces who wore *soft* raiment. Elijah is said in the English Bible to have been "a hairy man" (2 Kings i, 8); but it may mean "a man dressed in hair"—that is, camels' hair. In Zech. xiii, 4, "a rough garment"—that is, a garment of a hairy manufacture—is characteristic of a prophet. (See *Manufactures of the Ancients*, N. Y. 1848, p. 312 sq.; Hackett's *Illustra. of Script.* p. 96.)

Cameleon. See CHAMELEON.

Camerarius, JOACHIM, one of the most scholarly men of the sixteenth century, was born at Bamberg, April 12, 1500. The original name of his family was Liebhard, which was changed into the Latin Camerarius (Chamberlain) because his ancestors had been chamberlains at the court of the bishops of Bamberg. He was sent to the University of Leipzic, where he studied Greek under Richard Croke

and Peter Mosellanus. He evinced an extraordinary passion for that language, and in 1524 put forth his first work, a Latin translation of one of the Orations of Demosthenes. He was at that period at Wittenberg, whither he had been drawn by the fame of Luther and Melancthon. In 1526 he went into Prussia, and in the year following was nominated by Melancthon to fill the office of Greek and Latin professor in the new college at Nuremberg. The senate of Nuremberg deputed him, in 1530, to attend the diet of Augsburg, where he aided Melancthon in the disputes, and in preparing the material afterward used in the *Apologia Confessionis*. See CONFESSIONS. In 1535 the Duke of Würtemberg gave him the direction of the new University of Tübingen. In 1541 he was charged by Henry of Saxony with reforming the University of Leipzic, of which he was afterward appointed rector. Here he laboured zealously for the Reformation, and at the same time was one of the most laborious classical and theological teachers of the age. With his friend Melancthon he took an active part in the negotiations concerning the Interim, and for his willingness to make concessions was severely censured by the opponents of the Interim. In 1554 he was a deputy to the Diet of Naumburg, and in 1555 to the Diet of Augsburg, from where he went to Nuremberg to aid in adjusting the Osiandrian controversy. In 1568 the Emperor Maximilian, who had called him to Vienna to consult him about some important state affairs, wished to retain him as his councillor, but Camerarius declined the offer on account of his infirmities. He died at Leipzic in April, 1574. Camerarius was grave and reserved even toward his own children. He hated nothing so much as untruthfulness, and did not even tolerate it in jests. The extent of his knowledge, the purity of his morals, the energy of his character, his sweet and persuasive eloquence, obtained for him the esteem of all those who knew him. He left five sons, all of whom distinguished themselves as scholars or in other high positions. A list of his numerous writings will be found in Niceron, *Mémoires*, t. xix. Among his works in theology and exegesis are, 1. *Synodica*, i. e. *de Nicænâ Synodo* (Leipz. 1543, 4to):—2. *Disputatio de piis et catholicis atq. orthodoxis precibus et invocationibus Numinis Divini* (Argentor. 1560, 8vo):—3. *Chronologia secundum Græcorum rationem, temporibus expositis, autore Nicephoro Archiep. Constantino, conversa in linguam Lat.* (Basle, 1561, fol.; Leipz. 1574 and 1583, 4to):—4. *Historia de Jesu Christi ad mortem pro genere humano accessione*, etc. (Leipz. 1563):—5. *Narrat. de P. Melancthonis ortu, vita*, etc., which contains an entire history of the Reformation (1566; best ed. by Strobel, Halle, 1777, 8vo):—6. *Notatio figurarum sermonis in iv libris Evangeliorum*, etc.: *Notatio in Apostolicis scriptis et in librum Actuum et Apocalyp eos* (these two works were published together at Cambridge in 1642, under the title *Commentarius in Novum Fœdus*; and at Frankfort in 1712, with the title *Exegesis Nov. Test.*):—7. *Homiliæ* (Leipz. 1573):—8. *Historica narratio de Fratrum orthodoxorum ecclesiis in Bohemia, Moravia et Polonia* (Heidelb. 1605, 8vo). He also published a collection of the letters of Melancthon (Leipz. 1569), which contain much valuable information of the times of the Reformation.—Hoefer, *Nouv. Biog. Générale*, viii, 319; Landon, *Eccl. Dictionary*, ii, 506.

Camero, or Cameron, John, one of the greatest Protestant divines of France in the seventeenth century, and founder of the "moderate" school of Calvinism, was born in Glasgow 1579 or 1580. Before he was twenty he began to lecture in Greek at the University of Glasgow; in 1600 he went to France; and in 1602 he was made professor of philosophy at Sedan. The Church of Bordeaux defrayed his expenses for four years in studying theology at Paris, Geneva, and Heidelberg. In 1608 he became pastor at Bordeaux, where he preached with great success until 1618, when he became professor of theology at Saumur; but on the dispersion of the University in 1621 by the civil wars he returned to Glasgow, where he taught a short time, and in 1624 was chosen professor of theology at Montauban, France, where he was killed, in a political tumult, in 1625.

Camero's theology was modified Calvinism. He opposed "the imputation of the active righteousness of Christ," and "the non-concurrence of the human will with the grace of God in man's conversion." He "adopted from Arminius the doctrine of universal redemption, and the duty of presenting the offer of salvation, without restriction, to all men." His views were adopted and developed by Amyraut, Placæus, and Cappellus (q. v.), especially the view that God does not "move the will physically, but only morally, in virtue of its relations to the judgment and intellect." His doctrine, however, is far removed from Arminianism, as is shown by his colloquy with Tilenus—*Amica Collatio de Gratiæ et Volunt. Humanæ concursu* (Leyden, 1621) [see TILENUS]—and also by his *Defensio de Gratia et Libero Arbitrio* (Saumur, 1624, 8vo). His doctrine of universal grace may be thus summed up: (1) "that God desires the happiness of all men, and that no mortal is excluded by any *divine decree* from the benefits that are procured by the death, sufferings, and gospel of Christ; (2) that, however, none can be made a partaker of the blessings of the Gospel, and of eternal salvation, unless he *believe* in Jesus Christ; (3) that such, indeed, is the immense and universal goodness of the Supreme Being, that He refuses to *none* the power of believing, though he does not grant unto *all* His assistance and succor, that they may wisely improve this power to the attainment of everlasting salvation; and that, in consequence of this, multitudes perish through their own fault, and not from any want of goodness in God." Those who embraced this doctrine were called *Universalists*, because they represented God as willing to show mercy to *all* mankind; and *Hypothetical Universalists*, because the *condition* of faith in Christ was necessary to render them the objects of this mercy. See AMYRAUT. His writings are collected under the title *Opera, partim ab auct. edita, partim post ej. obit. vulgata* (Genev. 1658, fol.).—Calder, *Life of Episcopius*, 456; Hook, *Eccl. Biog.* ii, 407; Nichols, *Calvinism and Arminianism*. i, 202 sq.; Watson, *Theol. Inst.* ii, 215, 411; Smith's Hagenbach, *Hist. of Doctrines*, § 225, *a*.

Cameron, Archibald, a Presbyterian minister, was born in Scotland in 1771 or 1772. When young, he migrated with his parents to America. Little is known of his early years but that he spent some time at the Transylvania University (Kentucky), and completed his studies at Bardstown, when he connected himself with the Prebyterian Church. In 1795 he was licensed, and, as a missionary, distributed his labors in the counties of Nelson, Shelby, and Jefferson. He was installed in 1796 over the churches of Akron and Fox Run, Shelby, and Big Spring in Nelson, and for several years the field of his labors embraced a circuit of from thirty to forty miles. Seven churches were organized by his instrumentality, and he was often obliged to swim the swollen streams to do his duty. During a revival in 1828 large additions were made to his churches, and from this time he supplied the congregations of Shelbyville and Mulberry. He died December 4, 1836. He published *The Faithful Steward* (1806):—*The Monitor, on Religious Liberty*, etc. (1806):—*An Appeal to the Scriptures*, etc. (1811):—*A Discourse between the Confession of Faith of the Presbyterian Church and a Preacher who holds the Doctrine of an Indefinite and Universal Atonement* (1814):—*A Defence of the Doctrines of Grace* (a series of Letters, 1816):—*A Reply to Questions on Predestination*, etc. (1822).—Sprague, *Annals*, iv, 168.

Cameron, Richard, founder of the "Cameronians" or "Covenanters," was born at Falkland, in the

county of Fife. He first acquired notice by his bold opposition to the measures of Charles II for enforcing the Episcopal form of worship on the Scottish people. The measures adopted by the government roused the people, and among those who gave fullest expression to the popular sentiments was Richard Cameron. He belonged to the extreme party, who held by the perpetually binding obligations of the Solemn League and Covenant [see COVENANTS], which were set aside at the restoration of Charles II. Along with some others, he strenuously resisted the measures that reinstated the Episcopal Church in Scotland, and that proscribed the meetings for public worship of unauthorized religious bodies. Contrary to law, he persisted in preaching in the fields, and became obnoxious to government, to which, indeed, he finally assumed an attitude of defiance. Not only were his doctrines obnoxious to the government, but many of his brethren of the clergy dreaded his zeal, which they considered extreme, and at a meeting held in Edinburgh in 1677 they formally reproved him. He retired to Holland, but soon returned; and on the 22d of June, 1680, in company with about twenty other persons, he entered the town of Sanquhar in Dumfriesshire, and at the market-cross proclaimed that Charles Stuart had, by his perjuries, his tyrannical government, and his usurpation, forfeited all right and title to the crown. The party kept together in arms for a month; but on the 20th of July, while lying at Airdsmoss in Kyle, they were surprised by a large body of horse and foot, and in the skirmish which followed Cameron was killed, and his followers were dispersed or taken prisoners. A neat monument has been recently placed on the spot where Cameron fell, replacing an old and plainer structure. —*English Cyclopædia*; Chambers' *Encyclopædia*; Hetherington, *Hist. of Church of Scotland*, ii, 106 sq.; *Biog. Presbyteriana* (Edinb. 1835, vol. i). See COVENANTERS.

Cameronists. See CAMERONIANS.

Camisards (from the French *camise*, a peasant's jacket), a sect of fanatics (made such by oppression) in France toward the end of the seventeenth century. The predictions of Brousson (q. v.) and Jurieu, as to the coming downfall of the papacy and the end of the world seem to have given a bent to the minds of the Protestants of Dauphiné and Vivarais. "In 1688 five or six hundred Protestants of both sexes gave themselves out to be prophets, and inspired of the Holy Ghost. They had strange fits, which came upon them with faintings, as in a swoon, which made them stretch out their arms and legs, and stagger. They struck themselves with their hands; they fell on their backs, shut their eyes, and heaved their breasts. The symptoms answer to those produced by inspiring nitrous oxide, and, were the fact then discovered, we should have been tempted to suspect imposture. They remained a while in trances, and, coming out of them, declared that they saw the heavens open, the angels, paradise, and hell. Those who were just on the point of receiving the spirit of prophecy dropped down, not only in the assemblies, but in the fields, and in their own houses, crying out *Mercy*. The least of their assemblies made up four or five hundred, and some of them amounted to even three or four thousand. The hills resounded with their loud cries for mercy, and with imprecations against the priests, the pope, and his anti-Christian dominion, with predictions of the approaching fall of popery. All they said at these times was heard and received with reverence and awe." The government finally interfered with a violence which naturally increased the disorder. In 1702 a number of the Camisards were put to death with torture. A war arose, in which Cavalier, a young baker, became prominent as an able leader. The Marshal de Montrevel was sent by the court to quell these disturbances, and, after him, Marshal Villars; and, after a long series of the most barbarous massacres and perfidious cruelties, these wretched people were finally, in 1705, put down. Cavalier submitted, and afterward went to England. Ravance, Catinat, and Francézé, three of their leaders, were burned alive, and Vilas and Jonquet, also commanders of their forces, together with two merchants who assisted them, broken on the wheel. Many of these Camisards fled to England. See Smedley, *Reformed Religion in France*, vol. iii, ch. xxv; *Theatre Sacré des Cévennes* (London, 1707, by Max Misson, the chief source of information); *The Wars of the Cevennes under Cavalier* (Dublin, 1726); Schulz, *Geschichte der Camisarden* (Weimar, 1790); Court, *Hist. des troubles des Cévennes* (Villefranche, 1760); *Histoire des Camisards* (Lond. 1744); Peyrat, *Hist. des Pasteurs du Desert* (Paris, 1842); Hoffmann, *Gesch. des Aufruhrs in den Cevennen* (Nördlingen, 1837). See FRENCH PROPHETS.

Cammerhof, JOHN FREDERICK, one of the first bishops of the Moravian Church in America, was born near Magdeburg, Germany, July 28, 1721. Entering the Moravian ministry, he was sent to America as assistant to the presiding bishop, and arrived at a time when the Church at Bethlehem was a centre of missionary activity among the American Indians. "In all the mission stations in Pennsylvania and New York Cammerhof was active, proclaiming the crucified one with great power to the wild warriors, and through the agency of faithful interpreters, among whom was the famous missionary David Zeisberger, inviting them in eloquent appeals to look up and see their salvation finished." He won the confidence of the Indians, especially of the Delawares and the Six Nations, and in 1748 he was formally adopted by the Oneidas as a member of their tribe. In 1750 he attended an Iroquois council at Onondago, N. Y., travelling by canoes up the Susquehanna for 13 days, and thence on foot through the wild mountain regions of Southern New York a fortnight more. The journey broke down his constitution, and he died at Bethlehem, April 28, 1771.—*The Moravian*, Sept. 26, 1861.

Ca'mon (Heb. *Kamon'*, קָמוֹן, perhaps *full of stalks* or grain; Sept. Καμών v. r. Ῥαμνών), the place in which Jair (q. v.) the Judge was buried (Judg. x, 5). As the scriptural notices of him all refer to the country east of Jordan, there is no reason against accepting the statement of Josephus (*Ant.* v, 7, 6) that Camon (Καμῶν) was a city of Gilead. In support of this is the mention by Polybius (v, 70, 12) of a *Camus* (Καμοῦς, for Καμοῦν) in company with Pella and other trans-Jordanic places taken by Antiochus (Reland, *Palæst.* p. 679; Ritter, *Erdk.* xv, 1026). Eusebius and Jerome (*Onomast.* s. v. Καμών, Camon) evidently confound it with the *Cyamon* (Judith vii, 3) in the plain of Esdraelon; and this has misled Schwarz (*Palest.* p. 233). It is possibly the modern *Reimun* (comp. the Sept. reading *Rhamon*), four and a half miles west-north-west of Jerash or Gerasa (Van de Velde's *Map*).

Camp (מַחֲנֶה, *machaneh'*, an *encampment*, whether of troops or nomades, especially of the Israelites in the desert; hence also put for *troops* or a *company* itself; once מַחֲנוֹת, *machanoth'*, *camps*, i. e. place of encampment, 2 Kings vi, 8; παρεμβολή, Heb. xiii, 11, 13; Rev. xx, 9; elsewhere "castle"). Of the Jewish system of encampment the Mosaic books have left a detailed description. From the period of the sojourn in the wilderness to the crossing of the Jordan the twelve tribes were formed into four great armies, encamping in as many fronts, or forming a square, with a great space in the rear, where the tabernacle of the Lord was placed, surrounded by the tribe of

Levi and the bodies of carriers, etc., by the stalls of the cattle and the baggage: the four fronts faced the cardinal points while the march was eastward, but, as Judah continued to lead the van, it follows that, when the Jordan was to be crossed, the direction became westward, and therefore the general arrangement, so far as the cardinal points were concerned, was reversed. It does not appear that, during this time, Israel ever had lines of defence thrown up; but in after ages, when only single armies came into the field, it is probable that the castral disposition was not invariably quadrangular; and, from the many positions indicated on the crests of steep mountains, the fronts were clearly adapted to the ground and to the space which it was necessary to occupy. The rear of such positions, or the square camps in the plain, appear from the marginal reading of 1 Sam. xvii, 20, and xxvi, 5, to have been enclosed with a line of carts or chariots, which, from the remotest period, was a practice among all the nomade nations of the north. (D'Aquine, *Le Camp des Israelites*, Par. 1623, 1624.) For a more general treatment of the subject, from a military point of view, see Encamp.

Campanarium or Campanile (Lat. *campana*, bell), a bell-tower. The most striking campaniles are found in Italy, and they are those generally detached from the church, e. g. those of Florence, Cremona, Bologna, and Pisa. That of Florence, built by Giotto (1334), is a square 45 feet on each side and 267 feet high, in Italian Gothic, simple in design, but richly ornamented. In some instances these towers, on account of their great elevation and the narrowness of their base, have considerably deviated from the original perpendicular. The Campanile of Pisa, called *Torre Pendente* ("the leaning tower"), is the most remarkable of these, having a deviation of nearly 13 feet in a height of 150 feet. See Bell.

Campanella, Thomas, was born in Calabria 1568, and entered the Dominican order 1594. He applied himself chiefly to metaphysics, and followed his countryman Telesio, who died in 1588 at Cosenza, in his opposition to what was then taught in the schools under the name of Aristotelian philosophy. Campanella published his first work at Naples in 1591, entitled *Philosophia Sensibus demonstrata*. The schoolmen, and the monks especially, raised such a storm against Campanella that he left his native country. He was accused of sorcery, of being an adept of Raymond Lullus and of some cabalistic rabbins. His works were seized and submitted to the Inquisition at Rome, which, however, gave him little trouble; but some time afterward (in 1598), being at Naples, he incautiously spoke against the government of the Spaniards, and, being thrown into prison, was put to the rack, and condemned to perpetual confinement. In 1626 Pope Urban VIII obtained for him his liberty, whereupon he repaired to Rome, and continued there some years; but finding that the Spaniards were preparing fresh troubles for him, he fled into France, and landed at Marseilles in 1634. He passed the latter part of his life in the Dominican monastery at Paris, and died March 21, 1639. The number of his works is immense. Echard has given several catalogues, one of which contains eighty-two distinct works. Campanella was a man in whom every thing seems to have been extraordinary: his conduct, adventures, genius, habits of thought, style of writing, every thing was out of the usual track; hence he has been extravagantly praised, and as extravagantly abused and found fault with. In his moral character he was altogether beyond reproach; in his literary pursuits he was unwearied, excessively curious, and greedy of knowledge. He left many MSS. Among those that have been published, the following are deserving of notice: *Prodromus Philosophiæ Instaurandæ, seu de Natura Rerum* (Frankf. 1617):—*De Sensu Rerum et Magia Libri IV* (Frankf. 1620.) This work was composed, as well as several others, by Campanella during his Neapolitan captivity, and was published in Germany by Adami, but the author published a second edition of it at Paris in 1636, which he dedicated to Richelieu. Father Mersenne wrote to refute the book as heretical, and Athanasius of Constantinople wrote against it in his *Anti-Campanella* (Paris, 1655):—*Realis Philosophiæ Epilogisticæ Partes IV* (Frankf. 1620):—The *Civitas Solis*, often reprinted separately, and translated into various languages:—*Apologia pro Galileo* (Frankf. 1662):—*De Prædestinatione, Electione, Reprobatione, et auxiliis Divinæ Gratiæ, Cento Thomisticus* (Paris, 1636). The author discusses some of the opinions of Thomas Aquinas, and supports those of Origen:—*Universalis Philosophiæ, Libri XVIII* (Paris, 1638). The following works of Campanella were published after his death, namely: *De Libris propriis et recta Ratione Studendi* (Paris, 1642, in which the author speaks of himself, his studies, and his works. It was edited by Naudé, who knew Campanella, and who speaks of him and his imprisonment in his *Considérations Politiques sur les Coups d'Etats*):—*De Monarchia Hispanica Discursus* (Amsterd. 1640). This, perhaps the most remarkable work of Campanella, was written by him during his confinement at Naples. It is an able sketch of the political world of that time (translated, *A Discourse touching the Spanish Monarchy*, Lond. 1654).—Tennemann, *Man. Hist. Phil.* § 317-319.

Campanile, a name adopted from the Italian for a bell-tower. See Campanarium.

Campanites, a Socinian sect in Hungary, so named from Johannes Campanus (q. v.).

Campanus, Johannes, an anti-Trinitarian theologian of the 16th century. He was a native of the duchy of Julich, and in 1528 was appointed lecturer on theology at the University of Wittenberg. Here he seems to have imbibed Arian opinions, which he afterward developed openly. He avowed his opposition to Luther, and left Saxony for Julich. The Roman Catholic authorities imprisoned him at Cleves on a charge of having excited the peasantry by his preaching that the world was soon coming to an end, about 1585, and he is said to have remained in prison 25 years, and to have died between 1575 and 1580, out of his mind. He wrote a number of books, among which are *Wider alle Welt nach den Aposteln*, in which his peculiar views are set forth; reproduced in his *Göttliche und Heil. Schrift.*

He rejected the divinity of the Holy Spirit, and taught that the Son of God is of the same substance with the Father, but not coeternal. See Schelhorn, *Diss. de J. Campano*, in his *Amœnit. Litterarum*, t. xi, 1; Mosheim, *Ch. History*, cent. xvi, § iii, pt. ii, ch. iv; Herzog, *Real-Encyklopädie*, i, 192; Dorner, *Person of Christ*, div. ii, vol. ii, p. 160.

Campbell, Alexander, founder of the Campbellites, or Disciples of Christ (q. v.), was born in the county of Antrim, Ireland, about the year 1788, and was educated, as was his father before him, at the University of Glasgow, Scotland—both of them as Presbyterian clergymen. Thomas Campbell, the poet, was a relative and classmate of his father. On the one side his ancestry was of Scotch origin, and on the other Huguenot French. He emigrated to America in 1809, two years after his father, and settled at first in Washington county, Penn., near the spot in West Virginia to which he soon afterward removed, and on which he lived during the remainder of his life. That spot, now the village of Bethany, was then a wild and secluded locality amid the hills. He was at first a minister of the "Secession" branch of Presbyterians, but was early led to the belief that "Christian union can result from nothing short of the destruction of creeds and confessions of faith, inasmuch as human creeds and confessions have destroyed Christian union;" and "that nothing ought to be received into the faith or worship of the Church, or be made a term of communion among Christians, that is not as old as the New Testament. Nor ought anything to be admitted as of divine obligation in the Church constitution or management save what is enjoined by the authority of our Lord Jesus Christ and his apostles upon the New Testament Church, either in express terms or by approved precedent." The promulgation of these opinions causing disturbance in the Presbyterian Church, he and his father abandoned it in 1810, and formed a new society at Brush Run, Penn. In 1812 he became convinced that immersion is the proper form of baptism, and he and his congregation were immersed. In connection with his father, the Rev. Thomas Campbell, he formed several congregations, which united with the Redstone Baptist Association, but protested against all human creeds as a bond of union, accepting the Bible alone as the rule of faith and practice. Being excluded from the fellowship of the Baptist churches in 1827, his followers began to organize into a separate body, which has since spread in all parts of the United States, especially in Virginia, Tennessee, and Kentucky. The number of disciples was estimated in 1864, altogether, at about 350,000 members, of whom only a small number belonged to Great Britain. See DISCIPLES OF CHRIST. In 1823 Mr. Campbell began the publication of *The Christian Baptist*, afterward merged in the *Millennial Harbinger*, of which he remained editor during his life. In 1840 he founded Bethany College, and he was its president to the day of his death. He was a member of the Virginia Constitutional Convention of 1829 30. It was in that body that he gave prophetic notice of what would ultimately be the course of Western Virginia, and of what he lived to see accomplished. In 1847 he visited Europe, receiving marked attentions from many of the political and religious leaders. On the slavery conflict he was "conservative." "Mr. Campbell never was the champion of American slavery. He believed, however, that the relation of master and slave had existed in Biblical times under the divine sanction, or, at all events, tolerance; and while he did not desire to be regarded as the apologist of American slavery, he contended that it should not be a test question of communion in the churches. His own slaves he had emancipated many years before."

His life was full of labors, well supported by a physical frame of athletic vigor. But in 1865 he began to fail, and he died at Bethany, March 4, 1866. He had many of the great qualities of a reformer, and among them were personal energy and pugnacity. His career led him frequently into public "debates," the most important of which were as follows: "With the Rev. John Walker, a minister of the Secession-Presbyterian church in the State of Ohio, held at Mt. Pleasant in the year 1820. This debate created a great local interest throughout all that section of country, and was attended by a vast concourse of people. Next followed his debate with the Rev. William McCalla, on 'Christian Baptism,' held in Washington, Ky., in the year 1823; next his debate with Robert Owen, at Cincinnati, in the year 1828, on the Truth of Christianity; next his debate, in the same city, in the year 1836, with Archbishop Purcell, on the infallibility of the Church of Rome; and finally, in the year 1843, his debate with the Rev. Dr. N. L. Rice, held in the city of Lexington, Ky., the specific points of which were 'the action, subject, design, and administration of Christian baptism;' also, the 'character of spiritual influence in conversion and sanctification,' and the 'expediency and tendency of ecclesiastical creeds as terms of union and communion.'" Dr. Campbell was highly endowed as an orator; a noble presence, and a sonorous and powerful voice, gave effect to his vigorous thought, and fluent, energetic speech. Vast audiences gathered to hear him in his journeys through the West. He wrote largely, chiefly in his *Harbinger*; but he published also a summary of theology called the *Christian System* (often reprinted); a treatise on *Remission of Sin* (3d ed. 1846); *Memoirs of Thomas Campbell* (Cincinnati, 1861, 8vo). See also the article DISCIPLES OF CHRIST.—*Methodist* (N.Y.), No. 328; *Amer. Christ. Rec.* 42 sq.; *Cincinnati Gaz.* March, 1866; Landis, *Rabbah Taken* (N. Y. 1844, 8vo); Richardson, *Mem. of A. Campbell* (Phil. 1868). See CAMPBELL, THOMAS.

Campbell, Alexander Augustus, a Presbyterian minister, was born in Amherst county, Va., Dec. 30, 1789. He first studied medicine, and in 1811 graduated M.D. at Philadelphia. A violent attack of yellow fever was the means of his conversion, and he gave up the practice of medicine and applied himself to theology. He was licensed to preach by the Presbytery of North Alabama, April 2, 1822, and ordained as an evangelist Sept. 29, 1823. He was at first an itinerant, then for four years, from 1824, pastor at Tuscumbia and Russellsville, Ala.; declining a call from the Church of Florence, Ala., he however remained there two years with great success, removing to Haywood county, West Tenn., in 1829-30, where he preached as a missionary. Having received a call from the Church in Jackson, Tenn., he was installed pastor Oct. 3, 1833; there he preached, lectured, edited a newspaper, and practiced medicine, principally among the Cherokee and Creek missionaries, at the same time, laboring faithfully until his death, May 27th, 1846. Mr. Campbell published a treatise on *Scripture Baptism* (1844).—Sprague, *Annals*, iv, 651.

Campbell, the HON. **Archibald**, a bishop of the Scottish Episcopal Church, consecrated in 1711 at Dundee. On account of difficulties with his clergy as to "usages," he left Scotland in 1724 and returned to London, where he spent most of the remainder of his life. In his latter days he carried his nonjuring principles out by consecrating a bishop without any assistance. The date of his death is unknown. He is the author of several theological works, which are strongly Romanizing. Among them are, *The Doctrines of a Middle State between Death and the Resurrection, Of Prayers for the Dead*, etc. (Lond. 1713, fol.), and *The Necessity of Revelation* (Lond. 1739, 8vo). In his work on the Middle State, he teaches "that there is an intermediate or middle state for departed souls to abide in, between death and the resurrection, far different from what they are afterward to be in when our blessed Lord Jesus Christ shall appear at his second coming;

that there is no immediate judgment after death; that to pray and offer for, and to commemorate our deceased brethren, is not only lawful and useful, but also our bounden duty; that the intermediate state between death and the resurrection is a state of purification in its lower, as well as of fixed joy and enjoyment in its higher mansions; and that the full perfection of purity and holiness is not so to be attained in any mansion of Hades, higher or lower, as that any soul of mere man can be admitted to enter into the beatific vision, in the highest heavens, before the resurrection, and the trial by fire, which it must then go through."—Hook, *Eccl. Biography*, ii, 414.

Campbell, George, D.D., was born at Aberdeen, Dec. 25, 1719, and was educated at the Marischal College at Aberdeen. After leaving college he studied law, and was apprenticed to a writer to the Signet at Edinburgh; but, having a strong bent to theology, he obtained a release from his master, and studied theology at Edinburgh. In 1748 he was appointed to the pastoral charge of the parish of Banchory Ternan, near Aberdeen, and in 1755 he obtained a parish in Aberdeen. In 1759 he was made principal of the Marischal College. In 1763 he published his *Dissertation on Miracles*, in opposition to Hume, which was translated into several Continental languages (new ed. Edinb. 1823, 8vo). The book had an immense success, and procured for its author the degree of D.D. After his death appeared his *Lectures on Ecclesiastical History* (new ed. Lond. 1840, 8vo), which was answered by Skinner, bishop of Aberdeen. His most important work was his *Translation of the Four Gospels, with a Commentary*, which appeared not long before his death, and has been repeatedly republished. The best edition is that of Aberdeen (1814, 4 vols. 8vo); but there is a very good and cheap American edition (1837, 2 vols.). He wrote also *Lectures on the Pastoral Character* (Lond. 1811, 8vo); *Philosophy of Rhetoric* (1776, 8vo, numerous editions); *Lectures on Systematic Theology and Pulpit Eloquence* (Lond. 1807, 8vo, numerous editions). He retired from his college duties some years before his death, and received a pension of £300 a year from George III. He died April 6, 1796. The life of Dr. Campbell has been written by the Rev. G. S. Keith.—Darling, *Cyclopædia Bibliographica*, i, 567; Jamieson, *Cyclop. of Modern Religious Biography*, i, 99; Jones, *Christian Biography*, s. v.

Campbell, John, LL.D., was born in Edinburgh, March 8, 1708. His life was devoted to literature, and his publications were very numerous. He edited the "Biographia Britannica," and was one of the writers of the "Universal History." His title to mention in this work rests on the publication of *A Discourse on Providence* (1748, 3d ed. 8vo); *Thoughts on Moral and Religious Subjects* (1749, 8vo); *A new and complete History of the Holy Bible* (1733, 2 vols. folio).—*General Biog. Dictionary*, i, 119; Darling, *Cyclopædia Bibliographica*, i, 569.

Campbell, John, an Independent minister, was born at Edinburgh in March, 1766, and apprenticed to a goldsmith. About 1789, at which time he was actively engaged in measures for the extension of Sunday-schools, he began to prepare himself for the Christian ministry. He subsequently visited London to take charge of twenty-four young natives of Africa, who were brought from Sierra Leone to be instructed in Christianity, with a view to its introduction into their native land; and in 1804 he became pastor of the Independent Church in Kingsland, a charge which he retained until his death, April 4th, 1840. Mr. Campbell took an active part in the formation of the British and Foreign Bible Society, and several other important religious associations. In 1812 he made a journey to the stations of the London Missionary Society in South Africa, from which he returned in 1814. Of this journey he published an account (1815, 8vo). In 1818-21 he revisited Africa, and found some interesting changes produced by the civilization introduced by the missionaries. The journal of his second visit appeared in 1822 (2 vols. 8vo). Mr. Campbell published numerous works, chiefly for the instruction of youth, and he was the founder, and for eighteen years the editor of the *Youth's Magazine*, a religious periodical of great utility.—Jamieson, *Religious Biog.* p. 100.

Campbell, Thomas, one of the founders of the religious denomination generally called "Disciples," was born Feb. 1, 1763, in Ireland, and descended from a family—the Campbells of Argyle—which makes a prominent figure in Scottish history. In 1798 he entered the ministry in connection with that branch of the Presbyterian Church which is known as Seceders, or Seceding Presbyteries. See PRESBYTERIANISM. In 1807 he emigrated to the United States, and was received at Philadelphia into the communion of the Associate Synod of North America. For about two years he supplied with ministerial labor the destitute churches of this connection in Western Pennsylvania. Shortly after, in 1809, he was joined by his son, Alexander Campbell (q. v.). Both father and son soon declared against the use of any human creed, confession of faith, or formularies of doctrine and church government; and when their views were rejected by the Seceders as a body, they drew up a "declaration and address," in which the pious of all the denominations in the vicinity were invited to form a union, with the word of the Bible as their only creed. A congregation on the basis of these principles was organized at Brush Run. See CAMPBELL, ALEXANDER. Thomas Campbell retained at first infant baptism, although his son Alexander pressed upon his attention "the incongruity of demanding an express precept or precedent for any positive church ordinance, and yet practicing infant baptism, for which neither the one nor the other could be produced." Gradually Thomas Campbell changed his views on the question of baptism; and on June 12, 1812, both he and his son Alexander, together with the members of their congregation, were immersed by Elder Luse, of the Baptist community. In 1813 they were received into Redstone Baptist Association, stipulating in writing that "no terms of union or communion other than the Holy Scriptures should be required." Henceforth Alexander Campbell took, instead of his father Thomas, the lead in the religious movement which at length eventuated in the formation of those who sympathized with them into a separate denominational connection. Thomas Campbell labored with great zeal, as an itinerant minister, for the dissemination of his views, until 1846, when old age compelled him to rest. He spent the remainder of his life at Bethany with his son Alexander. In 1850 he was deprived of his sight, but his intellect remained unclouded. He died January 4, 1854. See Alexander Campbell, *Memoirs of Elder Thomas Campbell* (Cincinnati, 1861, 8vo); and the articles CAMPBELL, ALEXANDER; DISCIPLES OF CHRIST.

Campbellism. See DISCIPLES OF CHRIST.

Campe, JOACHIM HEINRICH, a German clergyman and author, was born in 1746 at Deensen, in Brunswick: became, in 1773, military chaplain at Potsdam; in 1776, director of an educational institution in Dessau. In 1777 he established his own educational school at Trittow, near Hamburg, which he sold in 1783. In 1787 he was appointed school-councillor in Brunswick, and in 1805, canon. He died at Brunswick in 1818. He is one of the most famous German authors of juvenile works, especially works of travel. His work *Robinson der Jüngere* (Robinson the Younger) has been translated into all European languages, and its immense popularity in Germany may be inferred from the fact that a 60th edition of it was published in 1861. His writings, prepared in a rationalistic spirit, contributed largely to lead away

the youth of Germany from simple faith in Christianity. The complete edition of his juvenile works fills 37 volumes (*Sämmtliche Kinderund Jugendschriften*, 4th ed. Brunswick, 1829–32).—Pierer, *Universal-Lexikon*, s. v.; Hurst, *History of Rationalism*, p. 188.

Campegio (otherwise Campeggio, Campejus), Lorenzo, Cardinal, was born in 1474, became professor of law at Padua, and, on the death of his wife, took orders as a priest. He became auditor of the Rota, bishop of Feltri, and nuncio in Germany. Leo X elevated him to the purple. In 1524 he was legate at the Nuremberg Diet, and there and elsewhere he exerted all his skill of intrigue against the Reformation with great success. In 1528 he was sent legate to Henry VIII (who, in a former mission, had made him bishop of Salisbury) to effect some settlement of the question of the divorce. Upon this occasion he was the bearer of a bull bestowing upon Wolsey the most ample powers to effect the divorce. These powers, however, were shortly withdrawn, and Campegio returned to Rome shorn of his bishopric of Salisbury. He was a man of great talents, and intimate knowledge of the ecclesiastical law. His letters are preserved in the collection entitled *Epistolarum miscellanearum Singularium Libri X* (Basle, 1555, folio). There were *seven* prelates of this family.—*Biog. Univ.* vi, 633. See Burnet, *Hist. of Engl. Reformation*, vol. iii, passim.

Campen, James Van, one of the chiefs of the Anabaptists. After the expulsion of the sect from Germany he went to the Netherlands, and John Boccold (q. v.) appointed him, in 1534, bishop of Amsterdam. He was executed in 1534.

Campen, John de, was born at Campen, in Overyssel, about 1490. He studied Hebrew under Reuchlin, and filled the Hebrew professorship at Louvain from 1519 to 1531, after which he travelled into Italy, Germany, and Poland. At Rome he was enrolled among the Hebraists of the pope. On his way back to Louvain he died of the plague, Sept. 7, 1538. He published *De naturâ litterarum et punctorum Hebraicorum ex variis Eliæ Levitæ opusculis libellus* (1520, 12mo); also *Psalmorum omnium juxta Hebraicam veritatem paraphrastica interpretatio* (1532, 16mo; trans. into English, Lond. 1535, 24mo):—*Paraphrasis in Salmonis Ecclesiastem*, and *Commentarioli in Epist. Pauli ad Rom. et Gal.* (Venice, 1534).—*Biog. Univ.* vi, 687; Landon, *Eccl. Dictionary*, i, 525.

Campen, Thomas Van. See Kempis, Thomas à.

Camphire (כֹּפֶר, *ko'pher*; Sept. κύπρος; Lat. *cyprus*, the *cyprus*-flower), rendered in our margin *cypress* (Cant. i, 14; iv, 13).

It is entirely different from the modern *gum camphor*, although the names appear to be etymologically connected. The latter is a product of a tree largely cultivated in the island of Formosa, the *Camphora officinarum*, of the Nat. order *Lauraceæ*. There is another tree, the *Dryobalanops aromatica* of Sumatra, which also yields camphor; but it is improbable that the substance secreted by either of these trees was known to the ancients. The plant in question is conceded to be the *el-Henna* of the Arabs (*Lawsonia inermis* and *spinosa* of Linnæus, which Lamarck and some other naturalists regard as the same species, and name it *Lawsonia alba*, alleging that the thorny ends of the branches characteristic of the latter are due only to old age; but each seems to retain its peculiar traits under cultivation), described by Dioscorides (i, 125) and Pliny (xii, 24) as growing in Egypt, and producing odoriferous flowers, from which was made the *oleum Cyprineum*. Mariti remarks that "the shrub known in the Hebrew language by the name of *kôpher* is common in the island of Cyprus, and thence had its Latin name;" also, that "the *Botrus Cypri* has been supposed to be a kind of rare and exquisite grapes, transplanted from Cyprus to Engaddi; but the *Botrus* is known to the natives of Cyprus as an odoriferous shrub called *henna*, or *alkanna*." So R. Ben Melek (*ad Cant.* i, 14), as quoted and translated by Celsius (*Hierobot.* i, 223). If we refer to the works of the Arabs, we find both in Serapion and Avicenna reference from their *Hinna* to the description by Dioscorides and Galen of *Kupros* or *Cypros*. Sprengel states (*Comment. on Dioscor.* i, 124, note) that the inhabitants of Nubia call the henna-plant *Khofreh;* he refers to Delisle (*Flor. Ægypt.* p. 12). If we examine the works of Oriental travellers and naturalists, we shall find that this plant is universally esteemed in Eastern countries, and appears to have been so from the earliest times, both on account of the fragrance of its flowers and the coloring properties of its leaves (see Prosp. Alpin. c. 13). It

Stem of the *Lawsonia Inermis*, with enlarged View of the Flower, Pericarp, and Seed.

was especially abundant near Ashkelon (Pliny, xii, 51; Josephus, *War*, iv, 8, 3). Thus Rauwolff, when at Tripoli (*Travels*, iv), "found there another tree, not unlike unto our privet, by the Arabians called *Alcana* or *Henna*, and by the Grecians, in their vulgar tongue, *Schenna*, which they have from Egypt, where, but above all in Cayre, they grow in abundance. The Turks and Moors nurse these up with great care and diligence because of their sweet-smelling flowers. They also, as I am informed, keep their leaves all winter, which leaves they powder and mix with the juice of citrons, and stain therewith against great holidays the hair and nails of their children of a red color, which color may perhaps be seen with us on the manes and tails of Turkish horses" (see also Belon, ii, 74). The variety called *Lawsonia spinosa* is larger than the other, growing to a height of from four to six feet; its flowers are less abundant and less fragrant, but have a more powerfully coloring property. In appearance both plants resemble myrtle; the flowers (which grow in clusters) are small and beautifully white, and exhale an agreeable odor. The women take great pleasure in them. They hold them in their hand, carry them in their bosom, and keep them in their apartments to perfume the air (comp. Cant. i, 13). To prepare the leaves for the use to which the plant is so generally applied by the women of Egypt, they are gathered about the commencement of spring, and, having been exposed to the air till thoroughly dry, are reduced to

Lawsonia Spinosa.

powder, which being afterward made into a paste, is then fit for use. This paste requires about five hours to dry upon whatever part it may be laid, and the red tinge it imparts is durable. It was anciently applied to the nails of the hands and feet, to the soles of the feet and the palms of the hands, and sometimes to the hair. Brides in Persia are still thus ornamented on the night before marriage (Sir Wm. Ouseley's *Travels in Persia*, iii, 565). From the appearance of the nails of mummies, there can be no doubt that it was used in the same manner by the Egyptians as it is by their descendants in the present day. The expression rendered in Deut. xxi, 12, in directing the treatment of a female captive, "pare her nails," is supposed to mean "adorn her nails," and would imply the antiquity of this practice, although others are of opinion that the marginal reading, "suffer to grow," is the more correct sense, as an act of mourning. See PAINT.

For the scientific classification of this plant, see the *Penny Cyclopædia*, s. v. Lawsonia. The shrub is figured and described by Sonnini, *Trave's*, i, 164; see also Oedmann, *Samml.* i, 91; vi, 102 sq.; Hasselquist, *Trav.* p. 503; Shaw, *Trav.* p. 103; Hartmann, *Hebräer.* ii, 356 sq.; Russel, *Aleppo*, i, 134; Mariti, p. 541; Forskal. *Flor.* p. 55; Burckhardt, *Arabia*, p. 442; Lane, *Mod. Eg.* i, 52; Rosenmüller, *Bib. Bot.* p. 133; Wilkinson, *Anc. Eg.* ii, 345. See BOTANY.

Camphuysen, THEODOR RAPHELSZ, a Dutch theologian, was born in 1586 at Gorkum. He was first a landscape painter, and rose to eminence in his art. Afterward, having devoted himself to theological studies, he became one of the leaders of the Socinians. He was expelled from his parish, Vleuten, and died at Doccum in 1627. He published *Theologische Wercke* (Amst. 1657, 8vo; 1672, 4to), and a rhymed translation of the Psalms in Dutch, 1680. A biography of Camphuysen was published by Kropman (Amsterdam, 1804).—Hoefer, *Biog. Générale*, viii, 399.

Campian, EDMUND, an English apostate and Jesuit, was born in London in 1540, and was educated at Christ's Hospital. He took his degrees at Oxford, where he made an oration before Queen Elizabeth on her visit to that University. Afterward he passed over into Ireland, and about 1571 proceeded to Douai, where he openly renounced the Reformed faith. He went to Rome, and was admitted a Jesuit in 1578. He was sent by Gregory XIII, along with the Jesuit Parsons, into England, in June, 1580. Here he performed all the duties of a zealous provincial, and diligently propagated his opinions. In 1581 he printed *Rationes 10 oblati certaminis in causâ fidei redditæ Academicis Angliæ*. It was afterward printed in English, and ably refuted by Whitaker. His activity at length drew upon him the attention of Walsingham, the Secretary of State, and he was arrested, carried to the Tower, and put cruelly to the torture, which he bore courageously. On the 1st of December, 1581, he, together with several other Romish priests, was hanged at Tyburn on the charge of high treason. Other works of Campian are *Narratio de Divortio Henrici VIII* (Douai, 1622); *Epistolæ ad Mercurianum* (the general of the Jesuits; Antwerp, 1631); a *History of Ireland* (Dublin, 1633, fol.). A volume of *Orationes*, *Epistolæ*, and his treatise *De Imitatione Rhetorica*, were published in one volume at Ingolstadt (1602). His life was written by Paul Bombino, a Jesuit (best edition, Mantua, 1620, 8vo).—Hume, *History of England*, ch. xli; Hook, *Eccl. Biog.* iii, 428.

Campian Manuscript (CODEX CAMPIĀNUS, so called from the Abbé des Camps, who presented it to Louis XIV in 1707), a beautiful little Greek MS. of the four Gospels in very neat uncial letters, supposed to belong to the ninth or tenth century. It was used by Wetstein, re-examined by Scholz, copied by Tischendorf, and collated by Tregelles. It contains many good readings. Besides the indications of sections in the margin, there are also scholia, some of them in the most minute writing. Besides accents and breathings, the words are marked with a musical notation. The MS. is now in the Imperial Library at Paris (where it is numbered 48), and is known as M of the Gospels.—Scrivener, *Introd. to N. T.* p. 110. See MANUSCRIPTS, BIBLICAL.

Specimen of the Codex Campianus (containing Matt. iii, 11: Ἐγὼ μὲν· βαπτίζω | ὑμᾶσ ἐν ὕδατι ἐισ | μετάνοιαν + ὁ δὲ ὀ | πίσω μου ἔρχομε).

Camp-meeting, a name given to a certain class of religious meetings held in the open air. "The first camp-meeting in the United States was held in 1799, on the banks of Red River, in Kentucky. Two brothers by the name of M'Gee, one a Presbyterian and one a Methodist, being on a religious tour from Tennessee, where the former was settled, to a place called the 'Barrens,' near Ohio, stopped at a settlement on the river to attend a sacramental occasion with the Rev. Mr. M'Greedy, a Presbyterian. John M'Gee, the Methodist, was invited to preach first, and did so with great liberty and power. His brother and Rev. Mr. Hoge followed him with sermons, with remarkable effect. The Spirit was copiously poured forth upon the people, and produced tears of contrition and shouts of joy. Rev. Messrs. M'Greedy, Hoge, and Rankins, all Presbyterians, left the house, but the M'Gees were too powerfully affected themselves to flee, under circumstances of so much interest. John was expected to preach again; but when the time arrived, he arose and informed the people that the overpowering nature of his feelings would not allow of his preaching, and exhorted them to surrender their hearts to God. Cries and sobs were heard in every part of the house. The excitement was indescribable. When the noise of this extraordinary movement reached the surrounding country, the people rushed to see what these things meant, for they had never heard of the like before. By this means the meeting-house was immediately overflowed. An altar was therefore erected unto the Lord in the forest. This gave a new impulse to public interest, and many came from every direction, with provisions and other necessaries for encampment, and

remained several days, dwelling in tents. It was a wonderful occasion. Sectarian divisions seemed to have been forgotten in the general concern for the prevalence of spiritual religion. The services were conducted by Presbyterians, Baptists, and Methodists. The result was unparalleled, and suggested another meeting of the kind, which was held on the Muddy River; and still another, on what was called the Ridge, both of which were attended by immense throngs. By a prudent estimate, it was reckoned that one hundred souls were 'added to the Lord' at the last-named meeting. From this unpremeditated beginning these meetings were extended, increasing in power and usefulness, under the special direction of Presbyterians and Methodists. Because of this union of sects in their support, they were called 'general camp-meetings.' It is said that the roads leading to the grove where they were held were literally crowded, and that entire neighborhoods were forsaken of their inhabitants. A Presbyterian minister calculated that there were at least twenty thousand persons present at one meeting held in Kentucky. At length, however, the Presbyterians gradually retired from the field; but the Methodists carried them into other parts of the country, till they became general in the connection. With more or less efficacy, they have been continued to the present time, not, however, without opposition on the part of some, and misgivings with many others in regard to their expediency" (*Essay on Camp-meetings*, p. 7-11).

The camp-meetings were introduced into England by Rev. Lorenzo Dow (q. v.), an earnest Methodist preacher, who, after laboring for some time in England as an independent itinerant, and finding, in 1807, a general religious interest in Staffordshire, suggested to the people the plan of camp-meetings. The people immediately adopted it. A flag was hoisted on Mow Hill; the population gathered to it from all the surrounding regions, and the first English camp-meeting was held. William Clowes and Hugh Bourne, who were among the most zealous and useful laymen in the revivals of that period, took an active part in the first meetings. Bourne vindicated them in a pamphlet, which called forth counter publications from the preachers of Burslem and Macclesfield circuits. As it was alleged that many excesses attended such out-door services, the Wesleyan Conference, in 1807, declared, "It is our judgment that, even supposing such meetings to be allowable in America, they are highly improper in England, and likely to be productive of considerable mischief, and we disclaim connection with them." Their advocates, however, continued to hold them. Hugh Bourne, who aroused the people of Lancashire, Cheshire, and Staffordshire with his exhortations and prayers, was expelled in 1808 from the connection by the Burslem Quarterly Meeting; and, two years later, Clowes, who continued to attend the camp-meetings, was also expelled. Clowes commenced a course of home-missionary labors, giving up his business for the purpose. In 1810 the "Primitive Methodist" denomination was organized, which sanctioned the habit of preaching in camp-meetings, as well as in market-places and on the highways. See METHODISTS, PRIMITIVE. The Wesleyan Conference has never taken back its disapproval of the camp-meetings; but the Wesleyans in Ireland commenced to hold camp-meetings in 1860, and their organ, *The Irish Evangelist*, took ground in favor of them. See *An Essay on Camp-meetings* (N. Y. 1849); Stevens, *Hist. of Methodism*, iii, 224; Bangs, *History of M. E. Church*, ii, 101; Porter, *Compendium of Methodism*, p. 146, 468; Porter, *Camp-Meetings* (N.Y. 24mo); *Meth. Quart. Review*, 1861, p. 582.

Camus, JEAN PIERRE, Bishop of Belley, was born at Paris in 1582, and was consecrated bishop Aug. 31, 1609. He devoted all his energies to the duties of his diocese, especially in reforming abuses, and endeavoring to bring back the monks and nuns to a regular life. On the latter point he was rigid. In 1629 he resigned his see, and retired into the abbey of Aulnai, given to him by the king upon his resignation of his bishopric. He afterward entered the Hospital of Incurables of Paris, where he died, April 26, 1653. The number of his writings is immense; the Abbé Le Clerc attributes to him more than two hundred volumes, consisting of controversial, moral, and devout treatises, sermons, letters, and religious novels. He was a bitter and sarcastic foe of the Mendicant orders.—Landon, *Eccl. Dictionary*, ii, 526; Niceron, *Mémoires*, xxxvi, 92.

Cana (Κανᾶ), a town in Galilee, not far from Capernaum, and on higher ground; it is memorable as the scene of Christ's first miracle (John ii, 1-11; iv, 46), as well as of a subsequent one (iv, 46-54), and also as the native place of the apostle Nathanael (xxi, 2). *This* Cana is not named in the Old Testament, but is mentioned by Josephus as a village of Galilee (*Life*, § 16, 64; *War*, i, 17, 5). The site has usually been identified with the present *Kefr Kenna*, a small place about four miles north-east from Nazareth, on one of the roads to Tiberias. It is a neat village, pleasantly situated on the descent of a hill looking to the south-west, and surrounded by plantations of olive and other fruit-trees. There is a large spring in the neighborhood, enclosed by a wall, which, if this be the Cana of the New Testament, is doubtless that from which water was drawn at the time of our Lord's visit. It is also observable that water-pots of compact limestone are still used in this neighborhood, and some old ones are, as might be expected, shown as those which once contained the miraculous wine. Here are also the remains of a Greek church, said to stand over the house in which the miracle was performed, and—doubtless much older—the fountain from which the water for the miracle was brought (Mislin, iii, 443-446). The Christians of the village are entirely of the Greek Church. The "water-pots of stone" were shown to M. Lamartine, though at Willibald's visit, centuries before, there had been but one remaining (*Early Trav.* p. 16). In the time of the Crusades the six jars were brought to France, where one of them is said still to exist in the Musée d'Angers (see M. Didron's Essays in the *Annales Archéologiques*, xi, 5; xiii, 2). There is also shown a house said to be that of Nathaniel. Kefr Kenna has been visited and described by most travellers in Palestine. The tradition identifying this village with Cana is certainly of considerable age (see Hegesippus, p. 5). It existed in the time of Willibald (the latter half of the eighth century), who visited it in passing from Nazareth to Tabor; and again in that of Phocas (twelfth century; see Reland, p. 680). Saewulf, who visited Palestine in A.D. 1102, says, "Six miles to the N.E. of Nazareth, on a hill, is Cana of Galilee" (*Early Trav. in Pal.* p. 47). Marinus Sanutus, in the fourteenth century, describes Cana as lying north of Sepphoris, on the side of a high hill, with a broad fertile plain in front (*Gesta Dei*, p. 253). Quaresmius states that in his time (A.D. 1620) two Canas were pointed out (*Elucid.* ii, 852). See *Quar. Statement* of "Pal. Explor. Fund," April 1878, p. 67.

There is a ruined place called *Kana el-Jelil*, about eight miles N. ½ E. from Nazareth, which Dr. Robinson is inclined to regard as the more probable site of Cana. His reasons, which are certainly of considerable weight (especially the strict agreement of the name, "Cana of Galilee"), may be seen in *Biblical Researches*, iii, 204-208. They are combated by De Saulcy (*Narrative*, ii, 320). According to Thomson (*Land and Book*, ii, 121), few Moslems of the vicinity know of the epithet el-Jelil as applied to the place. Dr. Robinson says, "It is situated on the left side of the wady coming down from Jefat, just where the latter enters the plain el-Buttauf, on the southern declivity of a projecting tell, and overlooking the plain. The situation is fine.

It was once a considerable village of well-built houses, now deserted. Many of the dwellings are in ruins. There are also several arches belonging to modern houses, but we could discover no traces of antiquity" (*Later Bib. Researches*, p. 108).

The Old Testament mentions two other places by the same name (KANAH), one on the boundary between Manasseh and Ephraim (Josh. xvi, 8; xvii, 9, 10), the other in the tribe of Asher (Josh. xix, 28). The Syriac has Katna for the Cana of the Gospels; and this compares somewhat with the *Ittah-kazin* (q. v.) on the border of Zebulon (Josh. xix, 13), which appears to have occupied the site of the present Kefr Kenna. Whether the Galilean village *Kanah* (קָנָה) mentioned in the Talmud (*Yuchas.* 57) is the same with Cana of Galilee, is uncertain (comp. Otho, *Lex. Rabb.* p. 115).

There are treatises on various points connected with Christ's first miracle at Cana, in Latin, by Brendel (Isenb. 1785), Bashuysen (Serv. 1726), Georgius (Viteb. 1744), Hebenstreit (Jen. 1693), Hoheisel (Gedan. 1732), Mayer (Gryph. 1703), Oeder (Onold. 1721), Sommel (Lund. 1773), Tabing (Brem. 1693), Vechner (Helm. 1640); and in German by Flatt (in Süskind's *Magaz.* xiv, 73 sq.); Brückner (in *Bibl. Stud.* iv, Berl. 1867).

Ca'naän (Heb. *Kena'än*, כְּנַעַן, perhaps *low;* Sept. and N. T. Χαναάν; Josephus Χανάανος), the name of a man and of a country peopled by his descendants.

1. The fourth son of Ham, and grandson of Noah (Gen. x, 6; 1 Chron. i, 8; comp. Josephus, *Ant.* i, 6, 4). B.C. post 2514. The transgression of his father Ham (Gen. ix, 22-27), to which some suppose Canaan to have been in some way a party, gave occasion to Noah to pronounce that doom on the descendants of Canaan which was, perhaps, at that moment made known to him by one of those extemporaneous inspirations with which the patriarchal fathers appear in other instances to have been favored. See BLESSING. That there is no just ground for the conclusion that the descendants of Canaan were cursed as an immediate *consequence* of the transgression of Ham, is shown by Professor Bush, who, in his *Notes on Genesis*, has fairly met the difficulties of the subject. See HAM.

The posterity of Canaan was numerous. His eldest son, Zidon, founded the city of the same name, and was father of the Sidonians and Phoenicians. Canaan had ten other sons, who were fathers of as many tribes, dwelling in Palestine and Syria (Gen. x, 15-19; 1 Chron. i, 13). It is believed that Canaan lived and died in Palestine, which from him was called the land of Canaan. See CANAANITE.

2. The simple name "Canaan" is sometimes employed for the country itself — more generally styled "the land of C." It is so in Zeph. ii, 5; and we also find "Language of C." (Isa. xix, 18); "Wars of C." (Judg. iii. 1); "Inhabitants of C." (Exod. xv, 15); "King of C." (Judg. iv, 2, 23, 24; v, 19); "Daughters of C." (Gen. xxviii, 1, 6, 8; xxxvi, 2); "Kingdoms of C." (Psa. cxxxv, 11). In addition to the above, the word occurs in several passages where it is concealed in the Auth. Vers. by being translated. These are, Isa. xxiii, 8, "traffickers," and xxiii, 11, "the merchant city;" Hos. xii, 2, "He is a merchant;" Zeph. i, 11, "merchant-people." See COMMERCE.

LAND OF CANAAN (אֶרֶץ כְּנַעַן, according to some, from its being *low;* see 2 Chron. xxviii, 19; Job xl, 12, among other passages in which the verb is used), a name denoting the country west of the Jordan and Dead Sea (Gen. xiii, 12; Deut. xi, 30), and between those waters and the Mediterranean; specially opposed to the "land of Gilead"—that is, the high table-land on the east of the Jordan (Num. xxxii, 26, 32; xxxiii, 51; Josh. xxii, 32; see also Gen. xii, 5; xxiii, 2, 19; xxxi, 18; xxxiii, 18; xxxv, 6; xxxvii, 1; xlviii, 4, 7; xlix, 30; Num. xiii, 2, 17; xxxiii, 40, 51; Josh. xvi, 2; Judg. xxi, 12). True, the district to which the name of "low land" is thus applied contained many very elevated spots: Shechem (Gen. xxxiii, 18), Hebron (xxiii, 19), Bethel (xxxv, 6), Bethlehem (xlviii, 7), Shiloh (Josh. xxi, 2; Judg. xxi, 12), which are all stated to be in the "land of Canaan." But, high as the level of much of the country west of the Jordan undoubtedly is, there are several things which must always have prevented it from leaving a marked impression of general elevation. These are, (1), that remarkable, wide, maritime plain over which the eye ranges for miles from the central hills, a feature of the country which cannot be overlooked by the most casual observer, and which impresses itself most indelibly on the recollection; (2), the still deeper and more remarkable and impressive hollow of the Jordan valley, a view into which may be commanded from almost any of the heights of Central Palestine; and, (3), there is the almost constant presence of the long high line of the mountains east of the Jordan, which, from their distance, have the effect more of an enormous cliff than of a mountain range — looking down on the more broken and isolated hills of Canaan, and furnishing a constant standard of height before which every thing is dwarfed. These considerations are based upon the supposition that the name was derived from the natural features of the country. But this is not countenanced by Scripture. Canaan was the son of Ham. He and his whole family colonized Western Syria, and while the whole region took his name, different sections of it were called after his sons (Gen. x, 15-20). Aram was a son of Shem, and his descendants colonized the country of Aram (Gen. x, 21-31). On the other hand, Aram cannot, at least absolutely, be termed a "highland region." It comprised the vast plains along the banks of the Euphrates, and westward to the Orontes and Anti-Libanus. Canaan, on the whole, however, is rather a hilly country, with strips of plain along the coast. In one passage it is distinguished from the low valley of the Jordan (Gen. xiii, 12). In short, the terms Aram and Canaan, if bestowed with any reference to the comparative elevation of the respective countries, have a merely relative significance; the latter lying nearer the sea-coast, while the former—especially that part of it where the Hebrew patriarchs originated—is situated toward the interior head-waters of the great river Euphrates. See ARAM.

The extent and boundaries of Canaan are given with tolerable exactness in the Bible. On the west the sea was its border from Sidon to Gaza (Gen. x, 19). On the south it was bounded by a line running from Gaza to the southern end of the Dead Sea, including the Judæan hills, but excluding the country of the Amalekites (Gen. x, 19; Num. xiii, 29). The Jordan was the eastern boundary; no part of Canaan lay beyond that river (Num. xxxiii, 51; Exod. xvi, 35, with Josh. v, 12; xxii, 11. See Reland, *Palæst.* p. 3 sq.). On the north, Canaan extended as far as Hamath, which was also the utmost boundary of the "land of promise" (Gen. xvii, 8; Num. xxxiv, 8). The coast from Sidon northward to Arvad, and the ridge of Lebanon, were inhabited by Canaanites, though they do not appear to have been included in Canaan proper (Gen. x, 15-19. See Bochart, *Opp.* i, 308 sq.; Reland, *Palæst.* p. 3 sq.). For geographical and other details, see PALESTINE.

The word "Canaan," in a few instances, such as Zeph. ii, 5, and Matt. xv, 22, was applied to the low maritime plains of Philistia and Phœnicia (comp. Mark vii, 26; and see Gesenius on Isa. xxiii, 11). In the same manner, by the Greeks, the name Χνᾶ was used for Phœnicia, i. e. the sea-side plain north of the "Tyrian ladder" (see the extract in Reland, *Palæst.* p. 7, and Gesenius, *Thesaur.* p. 696), and by the later Phœnicians, both of Phœnicia proper and of the Punic col-

onies in Africa (Kenrick, *Phœnicia*, p. 40, 42, 460). The name occurs in this sense on the Egyptian mon-

K a n a n a . land

Hieroglyph of Canaan.

uments as well as on Phœnician coins (Eckhel, *Doctr. Num.* iv, 409), and was not even unknown to the Carthaginians (Gesenius, *Gesch. d. Heb. Sprach.* p. 16). The Sept. in two cases, in like manner, renders the Hebrew by χώρα τῶν Φοινίκων (Exod. xvi, 35; Josh. v, 12; comp. v, 1), as they do "Canaanites" by Φοίνικες. Again, in Num. xiii, 29, "The Hittites, and the Jebusites, and the Amorites dwell in the mountains; *and the Canaanites dwell by the sea, and by the coast of the Jordan.*" In 2 Sam. xxiv, 7, the Canaanites are distinguished from the Hivites, though the latter were descended from Canaan; and in several passages the Canaanites are mentioned with the Hittites, Amorites, Jebusites, etc., as if they constituted a special portion of the population (Exod. iii, 8; Deut. vii, 1; Josh. iii, 10). The most probable explanation of these limited applications of the name is, that while some of the tribes which inhabited Syria retained for their territories the name of their common ancestor Canaan, others preferred taking, as a distinctive appellation, the name of some subsequent head or chief of the tribe. The very same practice prevails to this day among the great tribes of Arabia. See CANAANITE.

Map of Canaan, with the Aboriginal Nations.

CANAAN, LANGUAGE OF (שְׂפַת כְּנַעַן, *lip of Canaan*), occurs Isa. xix, 18, where it undoubtedly designates the language spoken by the Jews dwelling in Palestine. That the language spoken by the Canaanites was substantially identical with Hebrew appears, 1. From the fact that the proper names of Canaanitish persons and places are Hebrew, and can be accounted for etymologically from the Hebrew as readily as Hebrew proper names themselves (thus we have Abimelech, Kirjath-Sapher, etc.); 2. Close as was the intercourse of the Hebrews with the Canaanites, there is no hint of their needing any interpreter to mediate between them, which renders it probable that their respective languages were so nearly allied to each other as to be substantially the same; 3. The remains of the Phœnician language, which was undoubtedly Canaanitish, bear the closest analogy to the Hebrew, and are best explained from it, which proves them to be substantially the same language (Bochart, *Geogr. Sacr.* ii, col. 699 sq., ed. 1682).

To account for this, some have supposed that the Canaanites and the Hebrews were of the same original stock, and that the account in Genesis of their being descended from different branches of the Noachic family is a fiction to be put to the account of national bigotry on the part of the writer. But this is a hypothesis utterly without foundation, and which carries its own confutation in itself; for, had national bigotry directed the writer, he would have excluded the Edomites, the Ammonites, the Moabites, from the Shemitic family, as well as the Canaanites; nay, he would hardly have allowed the Canaanites to claim descent from the righteous Noah. The list of the nations in Gen. xi is accepted by some of the most learned and unfettered scholars of Germany as a valuable and trustworthy document (Knobel, *Völkertafel der Genesis*, 1850; Bertheau, *Beiträge*, p. 174, 179). See ETHNOGRAPHY. But if these were different races, how came they to have the same language? Knobel thinks that the country was first occupied by a Shemitic race, the descendants of Lud, and that the Hamites were immigrants who adopted the language of the country into which they came (p. 204 sq.). On the other hand, Grotius, Le Clerc, and others, are of opinion that Abraham acquired the language of the country into which he came, and that Hebrew is consequently a Hamitic and not a Shemitic language (Grotius, *Dissert. de Ling. Heb.*, prefixed to his *Commentary;* Le Clerc, *De Ling. Heb.;* Beke, *Origines Biblicæ*, p. 2?0; Winning, *Manual of Compar. Philology*, p. 275): by some later writers Abraham's native tongue is supposed to have been Indo-Germanic or Arian. On the contrary, most maintain that Abraham retained the use of the primeval language, and brought it with him to Canaan; contending that, had he borrowed the language of the country into which he came, the result would have been a less pure language than the Hebrew, and we should have found in it traces of idolatrous notions and usages (Hävernick, *Einleit.* 151, E. T. p. 183; Pareau, *Inst. Interp.* p. 25, E. T. i, 27). This last is the oldest opinion, and there is much to be urged in its favor. It leaves, however, the close affinity of the language of Abraham and that of the Canaanites unaccounted for. The hypothesis that Abraham acquired the language of the Canaanites, and that this remained in his family, if admissible, would account not only for the affinity of the Hebrew and Phœnician tongues, but for the ease with which Abraham and his son made themselves understood in Egypt, and for the affinity of the ancient Egyptian and several modern African languages with the Hebrew. (See Bleek, *Einleit. ins A. T.* p. 61 sq.; J. G. Müller, in Herzog's *Real-Encyklop.* vii, 240.)—Kitto, s. v.

Ca'naänite (Heb., usually in the sing., and with the art., *hak-Kenaäni'*, הַכְּנַעֲנִי, i.e. accurately according to Hebrew usage [Gesenius, *Heb. Gram.* § 107], "the Canaanite;" but in the Auth. Vers., with few exceptions, rendered as plural, and therefore indistinguishable from כְּנַעֲנִים, *Kenaänim'*, which also, but unfrequently, occurs; Sept. generally Χαναναῖος [or Χαναναῖοι]; but Φοίνιξ, Exod. vi, 15; comp. Josh. v, 1; Vulg. *Chananeus*), properly a designation of the descendants of Canaan, the son of Ham and grandson of Noah, inhabitants of the land of Canaan and the adjoining districts. See CANAAN.

I. *Component Tribes*.—1. These are most frequently enumerated in the formula used in the command and statement of their extermination by the Israelites, which, however, assumes the following different shapes:

(1.) Six nations: the Canaanites, Hittites, Amorites, Perizzites, Hivites, and Jebusites. This is the usual form, and, with some variation in the order of the names, it is found in Exod. iii, 8, 17; xxiii, 23; xxxiii, 2; xxxiv, 11; Deut. xx, 17; Josh. ix, 1; xii, 8; Judg. iii, 5. In Exod. xiii, 5, the same names are given with the omission of the Perizzites.

(2.) With the addition of the Girgashites, making up the mystic number seven (Deut. vii, 1; Josh. iii, 10; xxiv, 11). The Girgashites are retained and the Hivites omitted in Neh. ix, 8 (comp. Ezr. ix, 1).

(3.) In Exod. xxiii, 28, we find the Canaanite, the Hittite, and the Hivite.

(4.) The list of ten nations in Gen. xv, 19-21 (where the Kenites, the Kenizzites, and the Kadmonites are added), includes some on the east of Jordan, and probably some on the south of Palestine.

(5.) In 1 Kings ix, 20, the Canaanites are omitted from the list.

2. Besides these there were several tribes of the Canaanites who lived beyond the borders of the Promised Land northward. These were the Arkites, Sinites, Arvadites, Zemarites, and Hamathites (Gen. x, 17, 18), with whom, of course, the Israelites had no concern. There were also other tribes of Canaanitish origin (or possibly other names given to some of those already mentioned), who were dispossessed by the Israelites. The chief of these were the Amalekites, the Anakites, and the Rephaim (or "giants," as they are frequently called in our translation). See each of these, as well as the foregoing, in their alphabetical place.

II. *Geographical Distribution*.—In this respect the term "Canaanite" is used in two senses, a limited and a wide application.

1. For the tribe of "the Canaanites" only—the dwellers in the lowland, i. e. "who dwelt by the sea and by the coasts of Jordan" (Num. xiii, 29). The whole of the country west of Jordan might, as we have seen, be in some sense called a "lowland" as compared with the loftier and more extended tracts on the east; but there was a part of this western country which was still more emphatically a "lowland." (*a*.) There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim—the Shephelah, or plain of Philistia, on the south; that of Sharon, between Jaffa and Carmel; the great plain of Esdraelon, in the rear of the bay of Akka; and, lastly, the plain of Phœnicia, containing Tyre, Sidon, and all the other cities of that nation. (*b*.) But separated entirely from these was the still lower region of the Jordan Valley, or Arabah (q. v.), the modern *Ghôr*, a region which extended in length from the sea of Cinneroth (Gennesareth) to the south of the Dead Sea about 120 miles, with a width of from 8 to 14. The climate of these sunken regions, especially of the valley of the Jordan, is so peculiar, that it is natural to find them the special possession of one tribe. "Amalek"—so runs one of the earliest and most precise statements in the ancient records of Scripture—"Amalek dwells in the land of the south; and the Hittite, and the Jebusite, and the Amorite dwell in the mountains; and the Canaanite dwells by the sea, and by the side of Jordan" (Num. xiii, 29). This describes the division of the country a few years only before the conquest. But there had been little or no variation for centuries. In the notice which purports to be the earliest of all, the seats of the Canaanite tribe—as distinguished from the sister tribes of Zidon, the Hittites, Amorites, and the other descendants of Canaan—are given as on the sea-shore from Zidon to Gaza, and in the Jordan Valley to Sodom, Gomorrah, and Lasha (afterward Callirrhoe), on the shore of the present Dead Sea (Gen. x, 18-20). In Josh. xi, 3, at a time when the Israelites were actually in the western country, this is expressed more broadly. "The Canaanite on the east and the west" is carefully distinguished from the Amorite who held "the mountain" in the centre of the country. In Josh. xiii, 2, 3, we are told with more detail that "all the 'circles' (גְּלִילוֹת) of the Philistines ... from Sihor (? the *Wady el-Arish*) unto Ekron northward, is counted to the Canaanite." Later still, the Canaanites are still dwelling in the upper part of the Jordan Valley—Bethshean; the plain of Esdraelon—Taanach, Ibleam, and Megiddo; the plain of Sharon—Dor; and also on the plain of Phœnicia—Accho and Zidon. Here were collected the chariots which formed a prominent part of their armies (Judg. i, 19; iv, 3; Josh. xvii, 16), and which could indeed be driven nowhere but in these level lowlands (Stanley, *Sinai and Palest.* p. 134).

The plains which thus appear to have been in possession of the Canaanites, specially so called, were not only of great extent; they were also the richest and most important parts of the country, and it is not unlikely that this was one of the reasons why—

2. The name "Canaanite" is also applied as a general name for the non-Israelite inhabitants of the land, as we have already seen was the case with "Canaan." Instances of this are Gen. xii, 6; Num. xxi, 3, where the name is applied to dwellers in the south, who in xiii, 29, are called Amalekites; Judg. i, 10, with which comp. Gen. xiv, 13, and xiii, 18, and Josh. x, 5, where Hebron, the highest land in Palestine, is stated to be Amorite; and Gen. xiii, 12, where the "land of Canaan" is distinguished from the very Jordan Valley itself. See also Gen. xxiv, 3, 37; comp. xxviii, 2, 6; Exod. xiii, 11; comp. 5. But in many of its occurrences it is difficult to know in which category to place the word. Thus, in Gen. l, 11: if the floor of Atad was at Bethhogla, close to the west side of the Jordan, "the Canaanites" must be intended in the narrower and stricter sense; but the expression "inhabitants of the land" appears as if intended to be more general. Again, in Gen. x, 18, 19, where some believe the tribe to be intended, Gesenius takes it to apply to the whole of the Canaanite nations. But in these and other similar instances, allowance must surely be made for the different dates at which the various records thus compared were composed; and, besides this, it is difficult to estimate how accurate a knowledge the Israelites may have possessed of a set of petty nations, from whom they had been entirely removed for four hundred years, and with whom they were now again brought into contact only that they might exterminate them as soon as possible. Again, before we can solve such questions, we ought also to know more than we do of the usages and circumstances of people who differed not only from ourselves, but also possibly in a material degree from the Orientals of the present day. The tribe who possessed the ancient city of Hebron, besides being, as shown above, called interchangeably Canaanites and Amorites, are in a third passage (Gen. xxiii) called the children of Heth, or Hittites (comp. also xxvii, 46, with xxviii, 1, 6). The Canaanites

who were dwelling in the land of the south when the Israelites made their attack on it may have been driven to these higher and more barren grounds by some other tribes, possibly by the Philistines who displaced the Avites, also dwellers in the low country (Deut. ii, 23). See Kurtz, *Hist. of the Old Covenant*, vol. i, § 45.

III. *History of the Canaanitish Race.*—The Israelites were delivered from Egypt under Moses, in order that they might take possession of the land which God had promised to their fathers. This country was then inhabited by the descendants of Canaan, as described above. These nations, and especially the six or seven so frequently mentioned by name, the Israelites were commanded to dispossess and utterly to destroy (Exod. xxiii, 23; Num. xxxiii, 53; Deut. xx, 16, 17). The destruction, however, was not to be accomplished at once. The promise on the part of God was that he would "put out those nations by little and little," and the command to the Israelites corresponded with it; the reason given being "lest the beasts of the field increase upon thee" (Exod. xxiii, 29; Deut. vii, 22).

The destructive war commenced with an attack on the Israelites by Arad, king of the Canaanites, which issued in the destruction of several cities in the extreme south of Palestine, to which the name of Hormah was given (Num. xxi, 1-3). The Israelites, however, did not follow up this victory, which was simply the consequence of an unprovoked assault on them; but turning back, and compassing the land of Edom, they attempted to pass through the country on the other side of the Jordan, inhabited by a tribe of the Amorites. Their passage being refused, and an attack made on them by Sihon, king of the Amorites, they not only forced their way through his land, but destroyed its inhabitants, and, proceeding onward toward the adjoining kingdom of Bashan, they in like manner destroyed the inhabitants of that district, and slew Og, their king, who was the last of the Rephaim, or giants (Deut. iii, 11). The tract of which they thus became possessed was subsequently allotted to the tribes of Reuben and Gad, and the half tribe of Manasseh. See EXODE.

After the death of Moses, the Israelites crossed the Jordan, and, under the conduct of Joshua, took possession of the greater part of the Promised Land, and destroyed its inhabitants. Several cities, however, still held out, particularly Jebus, afterward Jerusalem, which was not taken till the time of David (2 Sam. v, 6), and Sidon, which seems never to have yielded to the tribe of Asher, to whom it was nominally allotted (Judg. i, 31). Scattered portions also of the Canaanitish nations escaped, and were frequently strong enough to harass, though not to dispossess, the Israelites. The inhabitants of Gibeon, a tribe of the Hivites, made peace by stratagem, and thus escaped the destruction of their fellow-countrymen. Individuals from among the Canaanites seem, in later times, to have united themselves, in some way, to the Israelites, and not only to have lived in peace, but to have been capable of holding places of honor and power: thus Uriah, one of David's captains, was a Hittite (1 Chron. xi, 41). In the time of Solomon, when the kingdom had attained its highest glory and greatest power, all the remnants of these nations were made tributary, and bond-service was exacted from them (1 Kings ix, 20). The Girgashites seem to have been either wholly destroyed or absorbed in other tribes. We find no mention of them subsequent to the book of Joshua; and the opinion that the Gergesenes, or Gadarenes, in the time of our Lord, were their descendants, has little evidence, except the similarity of names, to support it (Rosenmüller, *Scholia in Gen.* x, 16; Reland, *Palæstina*, i, 27, p. 138). The Anakites were completely destroyed by Joshua except in three cities, Gaza, Gath, and Ashdod (Josh. xi, 21-23); and the powerful nation of the Amalekites, many times defeated and continually harassing the Israelites, were at last totally destroyed by the tribe of Simeon (1 Chron. iv, 43). Even after the return of the Jews from the Babylonian captivity there were survivors of five of the Canaanitish nations, with whom alliances had been made by the Jews, contrary to the commands which had been given them. Some of the Canaanites, according to ancient tradition (see D'Herbelot, *Biblioth. Orient.* s. v. Falasthin), left the land of Canaan on the approach of Joshua, and emigrated to the coast of Africa (to Armenia, according to Ritter, *Erdk.* vii, 585). Procopius (*De Bello Vandalico*, ii, 10) relates that there were in Numidia, at Tigisis (*Tingis*), two columns, on which were inscribed, in Phœnician characters, "We are those who fled from the face of Joshua, the robber, the son of Naue." (See Bochart, *Phaleg*, i, 24; Michaelis, *Laws of Moses*, art. 31, vol. i, p. 176, Smith's transl.; Bachiene, I, ii, 1 sq.; Michaelis, *Spicileg.* i, 166 sq.; Hamelsveld, iii, 31 sq.) See PHŒNICIA.

IV. *Characteristics.*—Beyond their chariots (see above) we have no clew to any manners or customs of the Canaanites. Like the Phœnicians, they were probably given to commerce, and thus the name doubtless became in later times an occasional synonym for a merchant (Job xli, 6; Prov. xxxi, 24; comp. Isa. xxiii, 8, 11; Hos. xii, 2; Zeph. i, 11. See Kenrick, *Phœnicia*, p. 232). Under the name *Kan na* they appear on the Egyptian monuments, distinguished by a coat of mail and helmet, and the use of spears, javelins, and a battle-axe similar to that of Egypt (Wilkinson, i, 403, abridgm.).

Canaanitish Enemies of the Ancient Egyptians.

Of the language of the Canaanites little can be said. On the one hand, being—if the genealogy of Gen. x be rightly understood—Hamites, there could be no affinity between their language and that of the Israelites who were descendants of Shem. On the other is the fact that Abram and Jacob, shortly after their entrance to the country, seem able to hold converse with them, and also that the names of Canaanite persons and places which we possess are translatable into Hebrew. Such are Melchizedek, Hamor, Shechem, Sisera, Ephrath, and also a great number of the names of places. (For an examination of this interesting but obscure subject, see Gesenius, *Hebr. Spr.* p. 223-225.) See CANAAN, LANGUAGE OF.

The "Nethinim," or servants of the Temple, seem to have originated in the dedication of captives taken in war from the petty states surrounding the Israelites. See NETHINIM. If this was the case, and if they were maintained in number from similar sources, there must be many non-Israelite names in the lists of their families which we possess in Ezra ii, 43-54; Neh. vii, 46-56. Several of the names in these catalogues, such as Sisera, Mehunim, Nephushim, are the same as those which we know to be foreign, and doubtless others would be found on examination. The Gibeonites especially were native Canaanites, who, although reduced to a state of serfdom, were allowed to exist among the Israelites. See GIBEONITE.

V. *Conquest of Canaan.*—The arbitrary and forcible invasion of the land of Canaan by the Israelites, the violent and absolute dispossession of its inhabitants by them, and the appropriation of their property—above all, the avowed purpose and actual warfare of utter extermination on their part respecting those who had never misused them, against whom they

could neither exhibit nor pretend to any such claim as is acknowledged as a cause of hostility or right to the soil among civilized nations, has given grave offence to modern rationalists, and occasioned no little difficulty to pious believers in the economy of the Old Testament. The example has even been pleaded in justification of the shameful outrages committed by Christians upon the North-American Indians, as it was by the Spaniards in their savage campaigns against the peaceful and highly cultivated Mexicans and Peruvians; nor can it be doubted that the relentless spirit evinced in the sanguinary history of the Exode was largely reflected in the stern and martial zeal of Cromwell and the Puritans. Without attempting to vindicate all the details of the war under Joshua, which in some instances (e. g. in the circumstances attending the punishment of Achan [q. v.], who, by reason of his complicity with the Canaanites in respect to the ban against them, was regarded as a traitor, and dealt with summarily, as by a court-martial, or rather by "lynch-law") appears to have transcended even the rigorous programme contemplated in its inception, although it probably went no farther in severity than the rude judgment of those charged with or engaged in the execution of the scheme deemed needful for the ends in view, we are yet called upon to investigate the grounds upon which the measure, as a whole, has been defended or may be justified; and this is the more imperative, inasmuch as the warfare and occupation themselves were not simply *suffered* while in progress, or passed over as unavoidable after their occurrence, but positively, repeatedly, and strictly enjoined, with all their essential features of so-called atrocity or injustice, by special divine command, accompanied by the most awful sanctions direct from heaven itself. The question properly relates to two somewhat distinct points: 1. The right of the Israelites to the territory itself, and, 2. The morality of warfare in which no quarter was to be given, and no property of the enemy to be spared; the consideration of these, however, is so connected, both in the similarity of the objections and the common ground of vindication, that we may most conveniently treat them together.

"Many have asserted, in order to alleviate the difficulty, that an allotment of the world was made by Noah to his three sons, and that by this allotment the Land of Promise fell to the share of Shem; that the descendants of Ham were therefore usurpers and interlopers, and that, on this ground, the Israelites, as the descendants of Shem, had the right to dispossess them. This explanation is as old as Epiphanius, who thus answered the objection of the Manichæans. Others justify the war on the ground that the Canaanites were the first aggressors—a justification which applies only to the territory on the other side of the Jordan. Michaelis, to whom we must refer for a lengthened investigation of the subject (*Laws of Moses*, § 29, vol. i, p. 111-179, Smith's transl.), dissatisfied with these and other attempted apologies, asserts that the Israelites had a right to the land of Canaan as the common pasture-land of their herdsmen, in consequence of the undisturbed possession and appropriation of it from the time of Abraham till the departure of Jacob into Egypt; that this claim had never been relinquished, and was well known to the Canaanites, and that therefore the Israelites only took possession of that which belonged to them. The same hypothesis is maintained by Jahn (*Hebrew Commonwealth*, ch. ii, § x, Stowe's transl.). In the Fragments attached to Taylor's edition of Calmet's *Dictionary* (iv, 95, 96) another ground of justification is sought in the supposed identity of race of the Egyptian dynasty under which the Israelites were oppressed with the tribes that overran Canaan, so that the destruction of the latter was merely an act of retributive justice for the injuries which their compatriots in Egypt had inflicted on the Israelites. To all these and similar attempts to justify, on the ground of *legal right*, the forcible occupation of the land by the Israelites, and the extermination (at least to a great extent) of the existing occupants, it is to be objected that no such reason as any of these is hinted at in the sacred record. The right to carry on a war of extermination is there rested simply on the divine command to do so. That the Israelites were instruments in God's hand is a lesson not only continually impressed on their minds by the teaching of Moses, but enforced by their defeat whenever they relied on their own strength. That there *may* have been grounds of justification, on the plea of human or legal right, ought not, indeed, to be denied; but it is, we imagine, quite clear, from the numerous attempts to find what these grounds were, that they are not stated in the Old Testament; and to seek for them as though they were necessary to the justification of the Israelites, seems to be an abandonment of the high ground on which alone their justification can be safely rested—the express command of God.

"It may be said that this is only shifting the difficulty, and that just in proportion as we exculpate the Israelites from the charges of robbery and murder, in their making war without *legal* ground, we lower the character of the Being whose commands they obeyed, and throw doubt on those commands being really given by God. This has indeed been a favorite objection of infidels to the divine authority of the Old Testament. Such objectors would do well to consider whether God has not an absolute right to dispose of men as he sees fit, and whether an exterminating war, from which there was at least an opportunity of escape by flight, is at all more opposed to our notions of justice than a destroying flood, or earthquake, or pestilence. Again, whether the fact of making a chosen nation of *His* worshippers the instrument of punishing those whose wickedness was notoriously great, did not much more impressively vindicate his character as the only God, who 'will not give his glory to another, nor his praise to graven images,' than if the punishment had been brought about by natural causes. Such considerations as these must, we apprehend, silence those who complain of injustice done to the Canaanites. But then it is objected further that such an arrangement is fraught with evil to those who are made the instruments of punishment, and, as an example, is peculiarly liable to be abused by all who have the power to persecute. As to the first of these objections, it must be remembered that the conduct of the war was never put into the hands of the Israelites; that they were continually reminded that it was for the wickedness of those nations that they were driven out; and, above all, that they themselves would be exposed to similar punishment if they were seduced into idolatry, an evil to which they were especially prone. As to the example, it can apply to no case where there is not an equally clear expression of God's will. A person without such a commission has no more right to plead the example of the Israelites in justification of his exterminating or even harassing those whom he imagines to be God's enemies, than to plead the example of Moses in justification of his promulgating a new law purporting to come from God. In a word, the justification of the Israelites, as it appears to us, is to be sought in this alone, that they were clearly commissioned by God to accomplish this work of judgment, thus at once giving public testimony to, and receiving an awful impression of His power and authority, so as in some measure to check the outrageous idolatry into which almost the whole world had sunk."

CANAANITE, or rather CANANITE (Received Text [with the Codex Sinaiticus], ὁ Κανανίτης; Codex A, Καναντίτης; Lachm. with B C, ὁ Καναναῖος; D, Χαναναῖος; Vulg. *Chananeus*), the designation of the apostle SIMON, otherwise known as "Simon Zelotes." It occurs in Matt. x, 4; Mark iii, 18. This word does not signify a descendant of Canaan, that being in the Greek both of the Sept. and the N. T. Χαναναῖος = כְּנַעֲנִי (comp. Matt. xv, 22 with Mark vii, 26). Nor does it signify, as has been suggested, a native of Kana, since that would probably be Κανίτης. But it comes from the Heb. קַנָּא, *kanna'*, *zealous*, or rather from the Chaldee קַנְאָן, *Kanan'*, or Syriac *Kanenyeh*, by which the Jewish sect or faction of "the Zealots"—so prominent in the last days of Jerusalem—was designated (see Buxtorf, *Lex. Talm.* col. 2060). This Syriac word is the reading of the Peshito version. The Greek equivalent is Ζηλωτής, *Zelotes*, and this Luke (vi, 15; Acts i, 13) has correctly preserved. Matthew and Mark, on the other hand, have literally transferred the Syriac word, as the Sept. did frequently before them. There is no necessity to suppose, as Mr. Cureton does (*Nitrian Rec.* lxxxvii), that they mistook the word for *Kena'anyeh* = Χαναναῖος, a Canaanite or descendant of Canaan. The Evangelists could hardly commit such an error, whatever subsequent transcribers of their works may have done. But that this meaning was afterward attached to the word is plain from the readings of the Codex Bezæ (D) and the Vulgate above. The spelling of the A. V. has doubtless led many to the same conclusion; and it would be well if it were altered to "Kananite," or some other form (as was done in the late revision by the Am. Bib. Society, whose "standard" text had "Cananite") distinguished from the well-known one in which it now stands. See ZELOTES.

Cancellarii (CHANCELLORS, LAY), one of the inferior classes of servants of the ancient Church and clergy. "The precise nature of their duties is doubtful. Bingham supposes them to have had some such office in the Church as those of the same name in the state, and that they acted as guards of the judge's consistory. Others suppose them to have been identical with the *syndici* or *defensores*, whose duty it was to watch over the rights of the Church, to act as superintendents of the *copiatæ*, and to see that all clerks attended the celebration of morning and evening service in the Church."—Bingham, *Orig. Eccles.* bk. iii, ch. xi, § 6; Farrar, *Eccl. Dict.* s. v.

Cancelli, a lattice or balustrade; the rail separating the altar from the nave, in ancient churches, was called *cancelli*. See CHANCEL.

Cancellus, a word occasionally used in the meaning of *pulpit*. As the size of churches increased, preaching in the chancel became very difficult, and it often happened that the officiating bishop or presbyter was inaudible on account of his great distance from the people. Hence a custom was introduced of placing a *suggestum*, or pulpit, from which the preacher delivered the sermon, in front of the partition which divided the chancel from the nave. It was therefore called, in consequence of its position, *cancellus*.—Farrar, *Eccl. Dict.* s. v.

Can'dacè (Κανδάκη: Hiller compares the Ethiopic קנד, *he ruled*, and דק, *a slave*, as the Ethiopian kings are still in Oriental phrase styled "prince of servants" [Simonis, *Onom. N. T.* p. 88]; but the name itself is written חנדכי, *chandaki*, in Ethiopic; comp. Ludolf, *Hist. Æth.* iii, 2, 7), was the name of that queen of the Ethiopians (ἡ βασίλισσα Αἰθιόπων) whose high treasurer (εὐνοῦχος, "eunuch," i. e. chamberlain) was converted to Christianity under the preaching of Philip the Evangelist (Acts viii, 27), A.D. 30. The country over which she ruled was not, as some writers allege, what is known to us as Abyssinia; it was that region in Upper Nubia which was called by the Greeks *Meroë*, and is supposed to correspond to the present province of Atbara, lying between 13° and 18° north latitude. From the circumstance of its being nearly enclosed by the Atbara (Astaboras or Tacazze) on the right, and the Bahr el-Abiad, or White River, and the Nile on the left, it was sometimes designated the "island" of Meroë; but the ancient kingdom appears to have extended at one period to the north of the island as far as Mount Berkal. The city of Meroë stood near the present Assour, about twenty miles north of Shendy; and the extensive and magnificent ruins found not only there, but along the upper valley of the Nile, attest the art and civilization of the ancient Ethiopians. These ruins, seen only at a distance by Bruce and Burckhardt, have since been minutely examined and accurately described by Cailliaud (*Voyage à Meroë*), Rüppel (*Reisen in Nubien, etc.*), and other travellers. Meroë, from being long the centre of commercial intercourse between Africa and the south of Asia, became one of the richest countries upon earth; the "merchandise" and wealth of Ethiopia (Isa. xlv, 14) was the theme of the poets both of Palestine and Greece; and, since much of that affluence would find its way into the royal coffers, the circumstance gives emphasis to the phrase πάσης τῆς γάζης, "*all* the treasure" of Queen Candace. It is further interesting to know, from the testimonies of various authors (comp. the "Queen of Sheba," who visited Solomon, and see Josephus, *Ant.* viii, 6, 5), that for some time both before and after the Christian era, Ethiopia Proper was under the rule of female sovereigns, who all bore the appellation of "Candace," which was not so much a proper name as a distinctive title, common to every successive queen, like "Pharaoh" and "Ptolemy" to the kings of Egypt, and "Cæsar" to the emperors of Rome. Thus Pliny (*Hist. Nat.* vi, 29) says that the centurions whom Nero sent to explore the country reported "that a woman reigned over Meroë called *Candace*, a name which had descended to the queens for many years." Strabo also (p. 820, ed. Casaub.) speaks of a warrior-queen of Ethiopia called Candace, in the reign of Augustus, the same whom Dion Cassius (liv, 5) describes as queen of the "Ethiopians living above (ὑπέρ) Egypt." In B.C. 22 she had invaded Egypt, and soon afterward insulted the Romans on the Ethiopian frontier of Egypt. Caius Petronius, the governor of the latter province, marched against the Ethiopians, and, having defeated them in the field, took Pselca, and then crossing the sands which had long before proved fatal to Cambyses, advanced to Premnis, a strong position. He next attacked Napata, the capital of Queen Candace, took and destroyed it; but then retired to Premnis, where he left a garrison, whom the warlike queen assailed, but they were relieved by Petronius. She was still later treated favorably by Augustus. She is said to have lost one eye (see Smith's *Dict. of Class. Biog.* s. v.). This Napata, by Dion called Tenape, is supposed to have stood near Mount Berkal, and to have been a kind of second Meroë; and there is still in that neighborhood (where there are likewise many splendid ruins) a village which bears the very similar name of *Merawé*. Eusebius, who flourished in

the fourth century, says that in his day the queens of Ethiopia continued to be called Candace (*Hist. Eccl.* ii, 1, 10). A curious confirmation of the fact of female sovereignty having prevailed in Ethiopia has been remarked on the existing monuments of the country.

Ancient Ethiopian Queen triumphing over Captives.

Thus, on the largest sepulchral pyramid near Assour, the ancient Meroë (see Cailliaud, plate xlvi), a female warrior, with the royal ensigns on her head, drags forward a number of captives as offerings to the gods; on another compartment she is in a warlike habit, about to destroy the same group. Heeren, after describing the monuments at Naga, or Naka, southeast of Shendy, says, "It is evident that these representations possess many peculiarities, and that they are not pure Egyptian. The most remarkable difference appears in the persons offering. The queens appear with the kings; and not merely as presenting offerings, but as heroines and conquerors. Nothing of this kind has yet been discovered on the Egyptian reliefs, either in Egypt or Nubia. It may therefore with certainty be concluded that they are subjects peculiar to Ethiopia. Among the Ethiopians, says Strabo (p. 1177), the women also are armed. Herodotus (ii, 100) mentions a Nitocris among the ancient queens of Ethiopia. Upon the relief [on the monument at Kalabshé] representing the conquest of Ethiopia by Sesostris, there is a queen, with her sons, who appears before him as a captive" (Heeren, *On the Nations of Africa*, ii, 399). The name Candace, or *Kandahai*, appears on the Egyptian mon-

K n d a hh a i. f.m.
Hieroglyph for *Candace.*

uments on a royal cartouche, followed by the determinative sign for a woman. It is singular enough, that when Bruce was at Shendy, the government of the district was in the hands of a female called *Sittina*, i. e. the lady or mistress. He says, "There is a tradition there that a woman, whose name was Hendaqué, once governed all that country, whence we might imagine that this was part of the kingdom of Candace; for, writing this name in Greek letters, it will come to be no other than Hendaqué, the native or mistress of Chendi or Chandi" (*Travels to discover the Source of the Nile*, iv, 529; comp. i, 505). It is true that, the name Kandaké being foreign to the Jews, it is in vain to seek with Calmet for its etymology in Hebrew, but the conjectural derivation proposed by Bruce is wholly inadmissible; nor is the attempt (see above) of Hiller to trace its meaning in the Ethiopic language much more satisfactory. De Dieu asserts, on the authority of ecclesiastical tradition, that the proper name of the queen mentioned in the Acts was *Lacasa*, and that of her chamberlain *Judich*. It is not unlikely that some form of Judaism was at this period professed to a certain extent in Ethiopia, as well as in the neighboring country of Abyssinia. Irenæus (iii, 12) and Eusebius (*Hist. Eccl.* ii, 1) ascribe to Candace's minister her own conversion to Christianity, and the promulgation of the Gospel throughout her kingdom; and with this agrees the Abyssinian tradition that he was likewise the apostle of Tigré, that part of Abyssinia which lay nearest to Meroë; it is added that he afterward preached the Gospel in Arabia Felix, and also in the island of Ceylon, where he suffered martyrdom. (See Tillemont, *Mem. Hist. Eccl.* tom. ii.; Basnage, *Exercitatt. anti-Baron.* p. 118; Ludolf, *Comment. ad Hist. Æthiop.* p. 89; Wolf, *Curæ*, ii, 113; *American Presb. Review*, April, 1865.) See ETHIOPIAN EUNUCH.

Candĭdus, an Arian writer, who flourished about 364, and is the author of a book addressed to Marius Victorinus, *de Generatione Divinâ*, which, together with the answer of Victorinus, is extant. It will be found in Zeigler's Commentary on Genesis (Basle, 1548, fol.). A fragment of an epistle of Candidus to Victorinus is preserved by Mabillon, *Analecta*, iv, 155.—Cave, *Hist. Lit.*, *Anno* 364; Landon, *Eccl. Dict.* s. v.

Candle, נֵר, *ner*, a *lamp*, as elsewhere rendered; λύχνος, a *light*, as elsewhere.

I. Houses in the East were, from the earliest times, lighted up with lamps, and those of the Hebrews probably resembled such as we find depicted in the tombs at Thebes. Job, describing the destruction of a family among the Arabs, and the rendering one of their habitations desolate, says, "The light shall be dark in his tabernacle, and his candle shall be put out with him" (xviii, 6; xxi, 17). On the other hand, when God promises to give David a lamp always in Jerusalem, it is an assurance that his house should never become desolate. In the language of Jeremiah, to extinguish the light in an apartment is a convertible phrase for total destruction (Job xxv, 10). A burning lamp is, on the other hand, a symbol of prosperity (Job xxix, 3). Maillet, in his *Lettres d'Egypte*, says, "The houses in Egypt are never without lights; they burn lamps all the night long, and in every occupied apartment. So requisite to the comfort of a family is this custom reckoned, that the poorest people would rather retrench a part of their food than neglect it." Roberts, in illustration of the passage, "I will search Jerusalem with candles" (Zeph. i, 12), remarks, "Does a man declare his innocence of any crime, the accusers say, 'We will search thee with lamps;' 'Yes, yes, I will look into that affair with lamps;' 'What, have your lamps gone out? You see I am not guilty.'" See LAMP.

There are monographs bearing on this subject as follows: D. W. Müller, *De perennibus vet. lucernis* (Altorf, 1705); J. J. Müller, *De vet.* λυχνοκαιᾳ (Jen. 1661); Schurzfleisch, *De luminibus sacris* (in his *Controv.* xxv); Stockhausen, *De cultu et usu luminum antiquo* (Tr. ad Rh. 1726). See CANDLESTICK.

II. *Candles in Christian Worship.*—1. *Roman Church.*—The practice was probably derived from heathen and Jewish worship. Some Roman writers ascribe its origin to the early Christians, who, prevented by persecution from worshipping in daylight, held their meetings under ground, where artificial light was needed (Claude de Vert, *Explication des Cérémonies de l'église*). Others (e. g. Bergier, *Dict. de Théologie*, s. v.) quote the book of Revelation, wherein mention is made of "candles" and golden "candlesticks," in support of the usage, and also the *Apostolical Canons* (Can. 4), where mention is made of "oil for the holy lamp." Bergier also cites Jerome (*contra Vigilantium*, c. 8) in support of the use of lights in worship; but the pas-

sage cited simply speaks of a usage in the Eastern Church of lighting candles when the Gospels were read as a symbol of joy at receiving the light. Jerome expressly says the usage did not exist in the West, though he seems to justify the lighting of candles and lamps before the tombs of the martyrs. See LAMPS. The use of candles in the worship of the Roman Church is defended on the ground that they symbolize Christ as the "true light," and also of the injunction of Christ to his followers to be "the lights of men" (Matt. v, 14, 16).

The principal solemnities in the Roman Church at which candles are used are the mass, the administrations of the sacraments, the benedictions and processions. They are also frequently employed before the statues and images of the saints, and many use them at their private devotions, especially while praying for the dead. Numerous liturgical prescriptions regulate their use. They must be, except in cases of emergency, of wax, and their color is generally white or yellow, but rarely red. The *Paschal candle* is a large candle to which five grains of incense are attached in the form of a cross; in most Roman Catholic churches it is lighted with a newly-made fire on Easter eve. Alban Butler says that "Ennodius, bishop of Pavia (6th century), has left us two forms of prayer for the blessing of this candle. From him we learn that droppings or particles of the wax thereof, after Low Sunday, were distributed among the people, who burnt them in their houses against the influence of evil spirits, in which there was no superstition if the effect was not certainly expected, because it was hoped for and asked of God through the public prayers and blessings of the Church, directed for that end (!) The paschal candle is an emblem of Christ rising from the dead, the light of the world, and is a sign which announces to us the joy and glory of his resurrection. The five grains of frankincense fixed in it symbolically represent his five precious wounds, and the embalming of his body at his burial, and again in the grave, by the devout persons who brought spices to his monument. This great candle anciently gave light during the watching in the church on Easter-eve in the night. The *triple candle* arising from one stock signifies the Trinity of persons in one God, or the light of the Triune God shining to the world through Christ. This only burns during the office of holy Saturday morning; after which it is taken away, and no more made use of, not even on Easter-day."—Butler, *Feasts and Fasts* (Treat. vi, ch. viii).

2. *In the Protestant Churches.*—The Lutheran Church, after the Reformation, retained the use of lights on the altar; the Reformed churches abolished it. In the Church of England, the "Injunctions of Edward VI" (1547) forbade the use of lights, "except of two lights upon the high altar before the sacrament, which, for the signification that Christ is the very true light of the world, they shall suffer to remain still." In cathedral churches these two lights were generally kept on the altar, but not lighted; and the great writers and leaders of the Church of England wrote against the use of lights as tending to idolatry. So the Homily "On the Peril of Idolatry" quotes Lactantius as follows: "Seemeth he to be in his right mind who offereth up to the Giver of all light the light of a wax candle for a gift? He requireth another light of us, which is not smoky, but bright and clear, even the light of the mind and understanding. Their (the heathen) gods, because they be earthly, have need of light, lest they remain in darkness; whose worshippers, because they understand no heavenly thing, do draw religion, which they use, down to the earth." The Homily adds: "Thus far Lactantius, and much more, too long here to write, of candle-lighting in temples before images and idols for religion; whereby appeareth both the foolishness thereof, and also that in opinion and act we do agree altogether in our candle religion with the Gentile idolaters." The Homily goes on to show that this candle worship is closely connected with superstition and idolatry. Jeremy Taylor says of the Papists: "This is plain by their public and authorized treatment of their images; they consecrate them; they hope in them; they expect gifts and graces from them; they clothe them and crown them; they erect altars and temples to them; they kiss them; they bow their head and knee before them; *they light up tapers and lamps to them, which is a direct consumptive sacrifice;* they do to their images as the heathen do to theirs; these are the words of Irenæus, by which he reproves the folly of some that had got the pictures of Christ and Pythagoras, and other eminent persons." In the so-called "Tractarian" revival of Romish usages in 1832 and the following years, the practice of putting candles on "the altar," and lighting them on certain festival days, was resumed. In the recent "Ritualistic" revival (1865) the practice has become quite common in the hands especially of young curates of a Romanizing turn. They defend the legality of the practice on the ground that the rubric preceding the "order for morning and evening prayer throughout the year" admits the use of "all ornaments of the church that were in this Church of England by the authority of Parliament in the second year of the reign of Edward VI;" while the Injunction, cited above, allows *two* lights to be kept on the altar. On the other side it is argued (1) that in the Church of England there is properly no altar, but only a communion table; (2) that, in fact, the two lights spoken of were never lighted in the early days after the Reformation, even in the cathedrals in which they were retained; and (3) that the use of candles is only a part of an idolatrous system of worship. See LAMPS; CANDLEMAS.

III. For the popish ceremony of "cursing with bell, book, and candle," see BELL.—Boissonnet, *Dictionnaire des Cérémonies*, s. v. *Cierge, Chandelier;* Martigny, *Dict. des Antiquités Chrétiennes*, s. v. *Cierge;* Bingham, *Orig. Eccles.* bk. xiv, ch. iii, § 11; Goode, *Ceremonial of the Church of England*, § 9; Hook. *Church Dictionary* (defends candles), s. v. *Lights on the Altar.*

Candlemas, in the Roman Church, the feast of the purification of the Virgin Mary, held on the 2d of February, the fortieth after Christmas, and therefore celebrated as that on which the purification of the Virgin took place (Luke ii, 22). The Greek Church called it ὑπαπαντή, *festum occursus*, the feast of the meeting (see Luke ii, 25); also *festum presentationis Simeonis et Annæ; festum Simeonis;* the feast of the presentation of Simeon and Anna, or simply of Simeon. The name *festum candelarum* or *luminum*, the feast of lights (or Candlemas), came into use at a later period, after the introduction of candles into the service of the processions in honor of the Virgin. On this day the Romanists consecrate all the candles and tapers which they use in their churches during the whole year. At Rome the pope performs that ceremony himself, and distributes wax candles to the cardinals and others, who carry them in procession through the great hall of the pope's palace. Luther retained the festival as "a festival of our Lord Jesus Christ, who on this day manifested himself when he was borne into the Temple at Jerusalem and presented to the Lord." In many Lutheran churches it is still celebrated. In the Church of England the festival was abandoned in the second year of Edward VI.

The ceremonies observed on this festival are probably derived from the Februan or purificatory rites of paganism, which occurred on the same day, and which are briefly described by Ovid (*Fast.* ii). Pope Sergius (A.D. 641) has the credit of transferring this "false maumetry and untrue belief," as it is styled by Becon, in his *Reliques of Rome*, to "God's worship." This pontiff hallowed the feast "thorowe all Christendome; and every Christian man and woman of covenable age

is bound to come to church and offer up their candles, as though they were bodily with our Ladye; hoping for this reverence and worship that they do to our Ladye to have a great reward in heaven." The following explanation is given by Pope Innocent III: "Why do we carry lighted candles at this festival? The answer may be derived from the book of Wisdom, where it is said (ch. xiv, 23) that the heathen offered sacrifices at night (*sacrificia obscura*). The Gentiles, indeed, had devoted the month of February to the infernal deities, because, as they ignorantly believed, it was at the beginning of this month that Pluto had ravished Proserpine. Ceres, her mother, had, according to their belief, sought her through Sicily for a whole night by the light of torches kindled at the flames of Ætna. In commemoration of this, they every year, at the beginning of February, travelled the city during the night bearing lighted torches, whence this festival was called *amburbale*. But the holy fathers, being unable to abolish this custom, decided that lighted candles should be carried in honor of the blessed Virgin Mary; and thus what was formerly done for Ceres is done to-day in honor of the Virgin, and what was done formerly for Proserpine is now done in the praise of Mary" (Innocent III, *Opera*, "Serm. I. in fest. purif. Mariæ," fol. xlvii, col. 2, ed. Coloniæ, 1552).

The following are the prayers for the hallowing of candles upon Candlemas-day, copied from "The Doctrine of the Mass-book," 1554. The asterisks indicate crossings: "O Lord Jesus Christ, * bless thou this creature of a *waxen taper* at our humble supplication, and by the virtue of the holy cross pour thou into it an heavenly benediction; that as thou hast granted it unto man's use for the expelling of darkness, it may receive such a strength and blessing, through the token of thy holy cross, that in what places soever it be lighted or set, the Devil may avoid out of those habitations, and tremble for fear, and fly away discouraged, and presume no more to unquiet them that serve thee, who with God," etc. Then follow other prayers, in one of which occur these passages: "We humbly beseech thee that thou wilt vouchsafe to * bless and sanctify these candles prepared unto the uses of men, and health of bodies and souls, as well on the land as the waters." "Vouchsafe * to bless and * sanctify, and with the candle of heavenly benediction to lighten these tapers; which we thy servants taking in the honor of thy name (when they are lighted), desire to bear," etc. "Here let the candles be sprinkled with holy water." The service concludes with this Rubric: "When the hallowing of the candle is done, let the candles be lighted and distributed."

"The festival of St. Agatha, which commences on Candlemas-day in Sicily, strongly resembles the Februan rites. Lighted tapers form a distinguishing part of the ceremonial; and the memory of Proserpine is still cherished, though under another superstition, by kindling a blazing pine torch near the very spot to which the mythological legend assigned the scene of Pluto's amorous force. An account of this festival will be found in Blunt's *Vestiges of Ancient Manners in Italy*."—Bingham, *Orig. Eccles.* bk. xx, c. viii, § 4; Augusti, *Denkwürdigkeiten*, Thl. iii, p. 79; Siegel, *Alterthümer*, iii, p. 326; Eadie, *Eccles. Dictionary*, s. v.; Chambers, *Book of Days*, i, 212 sq.; Brand, *Popular Antiquities*, i, 24 sq.

Candlestick (מְנוֹרָה, *menorah'*; Chald. נֶבְרַשְׁתָּה, *nebrashtah'*; Sept. and N. T. λυχνία, properly a *lampstand*, as in Matt. v, 15), the candelabrum which Moses was commanded to make for the tabernacle, after the model shown him in the mount. Its form is chiefly known to us by the passages in Exod. xxv, 31–40; xxxvii, 17–24; on which some additional light is thrown by the Jewish writers, and by the representation of the spoils of the Temple on the arch (q. v.) of Titus at Rome, the only veritable monument extant

The Golden "Candlestick" as it now appears on the Arch of Titus.

of the kind (Prideaux, *Connection*, i, 166). It is called in Lev. xxiv, 4, "the pure," and in Ecclus. xxvi, 19, "the holy candlestick." So Diodorus Siculus describes it (x, 100, ed. Bip.) as "the so-called immortal light perpetually burning in the fane" (ὁ ἀθάνατος—λεγόμενος λύχνος καὶ καιόμενος ἀδιαλείπτως ἐν τῷ ναῷ).

The material of which it was made was fine (טָהוֹר, "*pure*") gold, of which an entire talent was expended on the candelabrum itself and its appendages. The mode in which the metal was to be worked is described by a term (מִקְשָׁה, "beaten [rather *turned*] work," Sept. τορευτή, Vulg. *ductile*) which appears to mean *wrought* with the hammer, as opposed to *cast* by fusion. Josephus, however, says (*Ant.* iii, 6, 7) that it was of *cast* gold (κεχωνευμένη), and hollow. The structure of the candelabrum, as far as it is defined in the passages referred to, consisted of a base (יָרֵךְ, Joseph. βάσις; according to Maimonides, three feet high); of a shaft (קָנֶה, *reed*, i. e. stem) rising out of it; of six arms, which came out by threes from two opposite sides of the shaft; of seven lamps, which were supported on the summits of the central shaft and the six arms, terminating in seven heads all in one row [?], standing parallel to one another, one by one, in imitation of the planets (Whiston's *Josephus*, l. c.); and of three different kinds of ornaments belonging to the shaft and arms. These ornaments are called by names which mean *cups*, *circlets*, and *blossoms*: "four bowls made like unto almonds, with their knops and their flowers." The cups (גְּבִיעִים, Sept. κρατῆρες, Vulg. *scyphi*) receive, in verse 33, the epithet *almond-shaped* (it being uncertain whether the resemblance was to the *fruit* or to the *flowers*). Three such cups are allotted to every arm, but four to the shaft: two-and-twenty in all. See Bowl. Of the four on the shaft, three are mentioned as if set severally under the spots where the three pairs of arms set out from the shaft. The place of the fourth is not assigned; but we may conceive it to have been either between the base and the cup below the lowest tier of arms, or, as Bähr prefers, to have been near the summit of the shaft. As for the name of the second ornament, the circlets (כַּפְתֹּרִים), the word only occurs in two other places in the Old Testament (Am. ix, 1; Zeph. ii, 14), in which it appears to mean the *capital* of a column; but the Jewish writers generally (cited in Ugolini *Thesaur.* xi, 917) concur in considering it to mean *apples* in this place. Josephus, as he enumerates *four* kinds of ornaments, and therefore two of his terms must be considered identical, may be supposed to have understood *globes*, or *pomegranates* (σφαιρία, ῥοΐσκοι,

Antiq. iii, 6). But as the term here used is not the common name for pomegranates, and as the Sept. and Vulgate render it σφαιρωτῆρες and *sphærulæ*, it is safest to assume that it denotes bodies of a spherical shape, and to leave the precise kind undefined. Bähr, however, is in favor of *apples* (*Symbolik*, i, 414). See KNOP. The name of the third ornament (פְּרָחִים, κρίνα, *lilia*) means *blossom, bud;* but it is so general a term that it may apply to any flower. The Sept., Vulg., Josephus, and Maimonides understand it of the lily, and Bähr prefers the flower of the almond. It now remains to consider the manner in which these three ornaments were attached to the candelabrum. The obscurity of verse 33, which orders that there shall be "three almond-shaped cups on one arm, globe and blossom, and three almond-shaped cups on the other arm, globe and blossom, and so on all the arms which come out of the shaft," has led some to suppose that there was only one globe and blossom to every three cups. However, the fact that, according to verse 34, the shaft (which, as being the principal part of the whole, is here called the *candelabrum* itself), which had only four cups, is ordered to have globes and blossoms (in the plural), is a sufficient proof to the contrary. According to Josephus, the ornaments on the shaft and branches were 70 in number, and this was a notion in which the Jews, with their peculiar reverence for that number, would readily coincide; but it seems difficult, from the description in Exodus, to confirm the statement. It is to be observed that the original text does not define the height and breadth of any part of the candelabrum; nor whether the shaft and arms were of equal height; nor whether the arms were curved round the shaft, or left it at a right angle, and then ran parallel with it. The Jewish authorities maintain that the height of the candelabrum was eighteen palms, or about five feet; and that the distance between the outer lamps on each side was about 3½ feet (Jahn, *Bibl. Arch.* § 329). Bähr, however, on the ground of harmonical proportion with the altar of incense and table of shew-bread, the dimensions of which are assigned, conjectures that the candelabrum was only an ell and a half high and broad. The Jewish tradition uniformly supports the opinion that the arms and shaft were of equal height, as do also Josephus and Philo (*l. c.; Quis Rer. Div. Hær.* § 44), as well as the representation on the Arch of Titus. Scacchius has, however, maintained that they formed a pyramid, of which the shaft was the apex. The lamps themselves were doubtless simply set upon the summits of the shafts, and removed for the purpose of cleaning. As the description given in Exodus is not very clear, we abbreviate Lightfoot's explanation of it. "The foot of it was gold, from which went up a shaft straight, which was the middle light. Near the foot was a golden dish wrought almondwise, and a little above that a golden knop, and above that a golden flower. Then two branches, one on each side, bowed, and coming up as high as the middle shaft. On each of them were three golden cups placed almondwise on sharp, scallop-shell fashion, above which was a golden knop, a golden flower, and the socket. Above the branches on the middle shaft was a golden boss, above which rose two shafts more; above the coming out of these was another boss, and two more shafts, and then on the shaft upward were three golden scallop-cups, a knop, and a flower, so that the heads of the branches stood an equal height" (*Works*, ii, 397, ed. Pitman). Calmet remarks that "the number 7 might remind them of the Sabbath:" we have seen that Josephus gives it a somewhat Egyptian reference to the number of the planets, but elsewhere (*War*, vii, 5, 5) he assigns to the 7 branches a merely general reference to the Jewish hebdomadal division of time. The whole weight of the candlestick was 100 minæ (see Lamy, *De Tab. Fœd.*). It has been calculated to have been worth $25,380, exclusive of workmanship. See TABERNACLE.

Usual representation of the "Golden Candlestick," the arms being all in the same plane.

Different arrangement of the branches of the "Golden Candlestick." 1. Plan, 2. Elevation.

This candelabrum was placed in the Holy Place, on the *south* side (*i. e.* to the *left* of a person entering the tabernacle), opposite the table of shew-bread (Exod. xxvi, 35). Its lamps, which were supplied with wick (? of cotton) and half a log (about two wine-glasses) of pure olive oil only, were lighted every evening, and extinguished (as it seems) every morning (Exod. xxvii, 21; xxx, 7, 8; Lev. xxiv, 3; 1 Sam. iii, 3; 2 Chron. xiii, 11). Although the tabernacle had no windows (Exod. xxx, 8; Macc. iv, 50), there is no good ground for believing that the lamps burnt by day in it, whatever may have been the usage of the second Temple. It has also been much disputed whether the candelabrum stood lengthwise or diagonally as regards the tabernacle; but no conclusive argument can be adduced for either view. According to Josephus, it was placed in an oblique position (λοξῶς), so that the lamps looked to the east and south (*Ant.* iii, 6, 7; Exod. xxv, 37). As the lamp on the central shaft was by the Jewish writers called *the western*, or *evening lamp*, some maintain that the former name could not be applicable unless the candelabrum stood across the tabernacle, as then only would the central lamp point to the west. Others, again, adhere to the latter signification, and build on a tradition that the central lamp alone burnt from evening to evening, the other six being extinguished by day (Reland, *Antiq.* i., 5, 8). The priest in the morning trimmed the lamps with

golden snuffers (מֶלְקָחַיִם; ἐπαρυστῆρες; *forcipes*), and carried away the snuff in golden dishes (מַחְתּוֹת; ὑποθέματα; *acerræ*, Exod. xxv, 38). When carried about, the candlestick was covered with a cloth of blue, and put with its appendages in badger-skin bags, which were supported on a bar (Num. iv, 9).

In Solomon's Temple, instead of this single candelabrum (or besides it, as the Rabbins say, but what became of it is not known; see Keil, *Tempel Sol.* p. 109), there were ten of pure gold (whose structure is not described, although *flowers* are mentioned: 1 Kings vii, 49; 2 Chron. iv, 7), one half of which stood on the north and the other on the south side of the Holy Place. These are said to have formed a sort of railing before the vail, and to have been connected by golden chains, *under* which, on the day of atonement, the high priest crept. They were carried away to Babylon (Jer. lii, 19). In the Temple of Zerubbabel there appears to have been only one candelabrum again (1 Macc. i, 21; iv, 49, 50). It is probable that it also had only seven lamps. At least, that was the case in the candelabrum of the Herodian temple, according to the description of Josephus (*War*, vii, 5). This candelabrum is the one which, after the destruction of Jerusalem, was carried with other spoils to Rome, where, after the triumph of Titus, it was deposited in the Temple of Peace, and, according to one story, fell into the Tiber from the Milvian bridge during the flight of Maxentius from Constantine, Oct. 28, 312 A.D.; but it probably, in A.D. 455, became a part of the plunder which Genseric transported to Carthage (Gibbon, iii, 291). It was, however, again, about A.D. 533, recaptured from the Vandals by Belisarius, and carried to Constantinople, and was thence sent off to Jerusalem (*ib.* iv, 24), from which time it has disappeared altogether. It is to this candelabrum that the representation on the Arch of Titus at Rome (see Fleck, *Wissenschaftl. Reise*, I, i, pl. 1) was intended to apply; and although the existence of the figures of eagles and marine monsters on the pediment of that lamp tends, with other minor objections, to render the accuracy of that copy questionable (as it is unlikely that the Jews should have admitted any such graven images into their temple), yet there is reason to believe that in other points it may be relied upon as a reasonably correct representation of the Herodian candelabrum. Reland has almost devoted a valuable little work to this subject, *De Spoliis Templi Hierosolym. in Arcu Titiano* (2d ed. by Schulze, 1775), p. 82 sq. See also Stellmann, *De candelabro aureo* (Brem. 1700); Schlichter, *De Lychnucho sacro* (Hal. 1740); Döderlein, *De Candelabris Judæorum sacris* (Viteb. 1711); Ugolino, *De Candelabro* (*Thesaur.* xi). See CANDLE.

From the fact that the golden candelabrum was expressly made "after the pattern shown in the mount," many have endeavored to find a symbolical meaning in all its ornaments, especially Meyer and Bähr (*Symbol.* i, 416, sq.). Generally it was "a type of preaching" (Godwyn's *Moses and Aaron*, ii, 1), or of "the light of the law" (Lightfoot, l. c.). Similarly candlesticks are elsewhere made types of the Spirit, of the Church, of witnesses (Zech. iv [see Scholze, *De Lychnucho*, Altona, 1741]; Rev. ii, 5; xi, 4; comp. Wemyss, *Clav. Symbol.* s. v.). When our Lord cried "I am the light of the World" (John viii, 12), the allusion was probably suggested by the two large golden chandeliers, lighted in the court of the women during the Feast of Tabernacles, which illuminated all Jerusalem (Wetstein, *ad loc.*), or perhaps to the lighting of this colossal candlestick, "the more remarkable in the profound darkness of an Oriental town" (Stanley, *Sinai and Palest.* p. 420). The figure of LIGHT, however, is common in all languages to express mental and moral illumination.

Cane, the rendering in only two passages (Isa. xliii, 24; Jer. vi, 20) of the Heb. word קָנֶה, *kaneh'*, from which, indeed, the modern term (Chald., Syr., and Arab. essentially the same; Gr. κάννη, Lat. *canna*) appears to have been derived, signifying properly a *reed* (as usually translated), *i. e.* the tall sedgy plant with a hollow stem (from קָנָה, to *erect*), growing in moist places (1 Kings xiv, 15; Job xl, 21; Isa. xix, 6; xxxv, 7; so Psa. lxviii, 31, *beast of the reeds* [A. V. "multitude of spearmen,"], *i. e.* the crocodile); also the sweet-flag (Ezek. xxvii, 19; Cant. iv, 14; fully Exod. xxx, 23); also the cultivated reed used as a staff (Ezek. xxix, 6; Isa. xxxvi, 6); hence a measuring reed or *rod* (Ezek. xl, 3, 5; xlii, 16-19); also a simple *stalk* of grain (Gen. xli, 5, 22); likewise the upper *bone* of the arm (Job xxxi, 22); the *rod* or beam of a balance, put for the balance itself (Isa. xlvi, 6); the shaft or *stem* of the sacred candelabrum (Exod. xxx, 31; xxxvii, 17), as well as its branches or *tubes* (Exod. xxv, 32, 33, 35, etc.). As the name of a plant, the word designates in Scripture three kinds of the genus *Arundo*, of which we accordingly give here a detailed description.

1. *Common Cane.*—In most of the passages of the Old Testament the word *kaneh* seems to be applied strictly to reeds of different kinds growing in water—that is, to the hollow stems or culms of grasses, which are usually weak, easily shaken about by wind or by water, fragile, and breaking into sharp-pointed splinters. Thus, in 1 Kings xiv, 15, "As a *reed* is shaken in the water;" Job xl, 21, "He lieth in the covert of the *reed;*" Isa. xix, 6, "And they shall turn the rivers far away; and the *reeds* and flags shall wither." Also in ch. xxxv, 7; while in 2 Kings xviii, 21; Isa. xxxvi, 6; and Ezek. xxix, 7, there is reference to the weak and fragile nature of the reed: "Lo, thou trustest in the staff of this broken *reed*, on Egypt, whereon if a man lean, it will go into his hand, and pierce it."

The Greek word κάλαμος appears to have been considered the proper equivalent for the Hebrew *kaneh*, being the term used by Matthew (xii, 20) when quoting the words of Isaiah (xlii, 3), "A bruised *reed* shall he not break." The Greek word Latinized is well known in the forms of *calamus* and *culmus*. Both seem to have been derived from the Arabic *kalm*, signifying a "reed" or "pen," and forming numerous compounds, with the latter signification, in the languages of the East. It also denotes a weaver's reed, and even cuttings of trees for planting or grafting. Or they may all be derived from the Sanscrit *kalm*, having the same signification. The German *halm*, and the English *haulm*, usually applied to the straw or stems of grasses, would seem to have the same origin. The Greek κάλαμος and the Latin *calamus* were used with as wide a signification as the Oriental *kalm*, and denoted a reed, the stalk or stem of corn, or any thing made therefrom, as a pen, an arrow, a reed pipe. Κάλαμος is also applied to any plant which is neither shrub, bush (ὕλη), nor tree (δένδρον) (see Liddell and Scott's *Greek Lex.*). So *calamus* means any twig, sprig, or scion (Pliny, xvi, 14, 24). The term κάλαμος occurs very frequently in the New Testament, and apparently with the same latitude of meaning: thus, in the sense of a reed or culm of a grass, Matt. xi, 7; Luke vii, 24, "A *reed* shaken by the wind;" of a pen in 3 John 13, "But I will not with *pen* and ink write unto thee;" Matt. xxvii, 29, "Put a *reed* in his right hand;" ver. 30, "Took the *reed* and smote him on the head;" and in Mark xv, 19, it may mean a reed or twig of any kind. So also in Matt. xxvii, 48, and Mark xv, 36, where it is said that they filled a sponge with vinegar, and put it on a *reed*, while in the parallel passage, John xix, 29, it is said that they filled a sponge with vinegar, and put it upon *hyssop*, and put it to his mouth; from which it is probable that the term κάλαμος was applied by both the Evangelists to the stem of the plant named hyssop, whatever this may have been, in like manner as Pliny

(xxiv, 14, 75) applies the term *calamus* to the stem of a bramble.

In later times the term cane has been applied more particularly to the stems of the *Calamus rotang*, and other species of ratan canes, which we have good grounds for believing were unknown to the ancients, notwithstanding the opinion of Sprengel (*Hist. Rei Herb.* i, 171), "Ctesias makes two kinds of 'calamus,' the male without pith, the female with it, the latter without doubt the *Calamus rotang*, the other our *Bambusca*, as Pliny restates (xvi, 36)." See FLAG.

2. *Cultivated Cane.*—Of this Dioscorides describes the different kinds in his chapter περὶ καλάμου (i, 114). 1. Κάλαμος ὁ ναστός, or the *Arundo farcta*, of which arrows are made (*Arundo arenaria?*). 2. The female, of which reed pipes were made (*A. donax?*). 3. Hollow, with frequent knots, fitted for writing, probably a species of *Saccharum*. 4. Thick and hollow, growing in rivers, which is called *donax*, and also *Cypria* (*Arundo donax*). 5. *Phragmites* (*Arundo phragmites*), slender, light-colored, and well known. 6. The reed called *Phleos* (*Arundo ampelodesmos Cyrillii*). (*Flora Neapol.* t. xii.) These are all described (l. c.) immediately before the papyrus, while κάλαμος ἀρωματικός is described in a different part of the book, namely, in ch. 17, along with spices and perfumes. The Arabs describe the different kinds of reed under the head of *Kusb*, or *Kussub*, of which they give *Kalamus* as the synonymous Greek term.

Arundo Donax.

From the context of several of the above passages of Scripture in which *kaneh* is mentioned, it is evident that it was a plant growing in water; and we have seen, from the meaning of the word in other languages, that it must have been applied to one of the true reeds, as, for instance, *Arundo Ægyptiaca* (perhaps only a variety of *A. donax*), growing on the banks of the Nile. In the New Testament κάλαμος seems to be applied chiefly to plants growing in dry and even barren situations, as in Luke vii, 24, "What went ye into the wilderness to see—a reed shaken by the wind?" To such passages, some of the species of reed-like grasses, with slender stems and light flocculent inflorescence, formerly referred to *Saccharum*, but now separated as distinct genera, are well suited. See REED.

3. *Sweet Cane.*—This is designated in Heb. by KENEH' BO'SEM (קְנֵה בֹשֶׂם, *reed of fragrance*, Exod. xxx, 23), or KANEH' HAT-TOB' (קְנֵה הַטּוֹב, *good* or fragrant *reed*, Jer. vi, 20). It is probably intended also by *kaneh* ("reed") simply in Cant. iv, 14; Isa. xliii, 24; and Ezek. xxvii, 17, as it is enumerated with other fragrant and aromatic substances. Finally, it was brought from a far country (Jer. vi, 20; Ezek. xxvii, 19): Dan also, and Javan, going to and fro, carried bright iron, cassia, and calamus to the markets of Tyre.

The best description by ancient writers of this plant is that of Dioscorides (i, 17), who calls it the *aromatic reed* (κάλαμος ἀρωματικός), and immediately after as a *rush* (σχοῖνος). He states it to be a produce of India, of a tawny color, much jointed, breaking into splinters, and having the hollow stem filled with pith like the web of a spider; also that it is mixed with ointments and fumigations on account of its odor. Hippocrates was acquainted with apparently the same substance (κάλαμος εὐώδης and σχοῖνος εὔοσμος), which Theophrastus, Polybius (v, 46), and Strabo (xvi, 2) describe as growing in Cœle-Syria, where modern travelers, however, have observed only common or scentless flags. Bochart, indeed, doubts whether the Scriptural plant could have been brought from India (*Hieroz.* pt. ii, l. v, c. 6); but Dr. Vincent maintains that this trade was then fully open (*Periplus of the Erythræan Sea*, ii, 365). Hence Dr. Royle (*Illustr. of Himal. Botany*, p. 425) identifies the "sweet cane" of Scripture with the *Andropogon calamus* (*aromaticus*), a plant extensively cultivated in India, from which an oil, deemed to be the famous *spikenard* of antiquity, is extracted (Royle, *Essay on Hindoo Medicine*, p. 33, 142; Hackett, *On the Spikenard of the Ancients*, p. 34; *Calcutta Med. Trans.* i, 367). See CALAMUS.

Andropogon Calamus Aromaticus.

Cange, Du. See DUCANGE.

Canisius, Henricus, or *de Hondt*, nephew of Petrus, was born at Nimeguen, studied at Louvain, and taught the canon law in the University of Ingolstadt, where he died in 1610. The work by which he is best known is his *Antiquæ Lectiones* (1601, 1602, 1603, 6 vols.), republished by Basnage in 1725 (7 vols.), with notes, and with the Greek text in addition to the Latin version, which Canisius had given alone. Canisius also published *Summa Juris Canonici; Commentarium in Regulas Juris; Prælectiones academicæ; De decimis primitiis, et usuris; De sponsalibus et matrimonio:* all collected and published by Bouvet in his *Opera Ca-*

nonica Canisii (Louvain, 1649).—*Biog. Univ.* vii, 12; Landon, *Eccl. Dictionary*, ii, 534.

Canisius, Petrus, of Nimeguen, a Jesuit, born May 8, 1524, entered the order of the Jesuits in 1548, became professor and rector of the University of Ingolstadt in 1549, and rector of the college of the Jesuits in Vienna in 1551. He used his influence with the emperor Ferdinand I for the suppression of Protestantism. As the first German "provincial" of the Jesuits, he established colleges of the order at Prague, Augsburg, Dillingen, and Fribourg (in Switzerland), at which latter place he died, Dec. 21, 1597. Canisius was one of the most prominent opponents of the Reformation in Germany, and the arrest of the reformatory movement in Austria and Bavaria is for a large part owing to his labors and his influence. In order to counteract the influence of the catechisms of Luther, and other works of the founders of Protestantism, he wrote his *Summa Doctrinæ Christianæ* (1584; with a commentary by P. Busæus, Cologne, 1586, and Augsburg, 1833 sq. 4 vols.; new edition, Landshut, 1842), which was translated into nearly all languages (Greek, Prague, 1612; Greek-Latin, Augsburg, 1612), and a shorter catechism, entitled *Institutiones Christ. pietatis* (1566), which, until the middle of the 18th century, served as the basis of popular instruction in the Catholic schools of Germany, and has, even in modern times, again come into use (new editions: Landshut, 1833; Mainz, 1840). See CATECHISM; also *Theol. Quartalschrift*, 1863, Heft 3, p. 446. Canisius also edited the letters of Jerome, Leo the Great, and Cyril of Alexandria, and compiled a Catholic Prayer-book (*Manuale Catholicum*, Antwerp, 1530; Augsburg, 1841; German, 8th edit. Landshut, 1829). The Protestants called him "the Austrian Dog," while the Jesuits praised him as the second apostle of Germany, and even endeavored to obtain his beatification. Their efforts, for a long time unfruitful, were at length crowned with success during the pontificate of Pius IX, who placed Canisius on the list of the "Beati." Biographies of Canisius were published in Latin by Raderus and Sacchini (Munich, 1623); in French by Dorigny (Paris, 1708); in Italian by Langore and Foligatti; in German by Werfer (in *Leben ausgezeichneter Catholiken*, Schaffhausen, 1852, 2 vols.).

Canker (γάγγραινα), a *gangrene* (2 Tim. ii, 17), *mortification*; a disease which spreads by degrees over the whole body. To such a putrid state of the system the apostle compares the corrupt doctrines of Hymenæus and Philetus.

Canker-worm (יֶלֶק, *ye'lek*, *feeding*, Joel i, 4; ii, 25; "caterpillar," Psa. cv, 34; Jer. li, 14, 27; Sept. βροῦχος, *i. e.* locust-grub; but ἀκρὶς, locust, in Jer.; Chald. פִּרְחָא, winged locust; Syr. creeping locust) is generally referred to some hairy or caterpillar-like species of locust (Jer. li, 27, סָמָר, *bristly*, Auth. Ver. "rough"). Possibly it merely describes the *locust* in a certain stage of its growth, viz. just when it emerges from the caterpillar state and obtains the use of its wings; see Nah. iii, 16, "*the canker-worm has thrown off* (פָּשַׁט, A. V. *spoileth*) its scales [or "*expanded* its wings"] and *flown away*;" thus corresponding to the description by Jerome (in loc. Nah.) of the *attelabus* (ἀττέλαβος), or "wingless locust" (Credner, *Joel*, p. 305; see Bochart, *Hieroz.* ii, 445). See LOCUST.

Canne, JOHN, a Baptist minister, was born in England about the year 1590 or 1600. In early life he was a minister in the Established Church, but joined the Baptists not far from 1630. He was for some time pastor of the church in Southwark, London, being successor to Mr. Hubbard, its first pastor. He was banished to Holland, where (not considering baptism a prerequisite to communion) he succeeded Ainsworth (q. v.) as pastor of his church in Amsterdam, and was deservedly popular. While in banishment in 1634, he published a work on the *Necessity of Separation from the Church of England*. In 1640 he returned on a visit to England, and founded the Baptist Church in Broadmead, Bristol. Mr. Canne was equally eminent for learning, piety, knowledge of the Scriptures, and zeal for reformation. Canne's most important labor is his selection of marginal references to the Bible. He was the author of *three* sets of notes, which accompanied three editions of the Bible. His great ambition was "to make the Bible its own interpreter."—Ivimey, *English Baptists*; Jamieson, *Cyclop. of Biography*, 105; Neal, *History of the Puritans*.

Can'neh (Heb. *Kanneh'*, כַּנֵּה, one codex fully כלנה; Sept. Χαναά, v. r. Χαναάν; Vulg. *Chene*), doubtless a contracted form (Ezek. xxvii, 23) for the earlier CALNEH (q. v.) of Gen. x, 10.

Cannon JAMES S., D.D., an eminent minister of the Reformed Dutch Church, was born in Curaçoa, Jan. 28, 1776, and was educated under Dr. Peter Wilson and Rev. Alex. Miller at Hackensack, N. J. He was licensed to preach in 1796 by the Classis of Hackensack, and shortly after became pastor of the Reformed Dutch Church of Millstone and Six-mile Run, finally devoting his whole service to the latter church. His pastoral industry was remarkable, yet he wrote and committed to memory all his sermons. During part of his pastoral work he had to preach one sermon in Dutch and one in English every Sunday. In 1826 he was chosen Professor of Pastoral Theology and Ecclesiastical History in the Seminary at New Brunswick, and here he spent the remainder of his life, a laborious student, and a faithful and successful teacher. "His views of truth were more distinguished by exactness and solidity than by any far-reaching power; and yet, when he had discussed a subject, there was little left to be said." A large number of ministers were trained by Dr. Cannon. He died in great peace, July 25, 1852. After his death, the substance of his course of instruction was published under the title *Lectures on Pastoral Theology* (New York, 1853, 8vo). "The subjects embraced in the lectures are: 'The qualifications for the pastoral office,' 'pastoral duties,' 'the administration of the sacraments,' 'catechetical instruction,' 'visitation of the sick,' 'pastoral visitation,' 'religious declension,' 'extension of the Church,' 'instruction by example.' Dr. Cannon's discussion of the sacraments is particularly able, clear, and conclusive."—*N. Brunswick Review*, May, 1854, p. 104; *Bibliotheca Sacra*, April, 1854, p. 420.

Canon OF SCRIPTURE, as the phrase is usually employed, may be defined as "the Authoritative Standard of Religion and Morals, composed of those writings which have been given for this purpose by God to men." A definition frequently given of the Canon is, that it is "the Catalogue of the Sacred Books;" while Semler (*Von Freier Untersuchungen des Canons*), Doederlein (*Institutio Theol. Christ.* i, 83), and others, define it as "the List of the Books publicly read in the meetings of the early Christians;" both these, however, are defective, and the latter is not only historically incorrect, but omits the essential idea of the divine authority of these Scriptures. We here give a copious account of the subject in general, referring our readers to special articles for more details on the several books of the Bible.

I. *Origin and uses of the term "Canon."*—1. In *classical* Greek, the word (Κανών, akin to קָנֶה, a "reed," [comp. Gesen. *Thes.* s. v.] κάνη, κάννα, *canna* [*canalis, channel*], CANE, *cannon*) signifies, (1) Properly, a *straight rod*, as the rod of a shield, or that used in weaving (*liciatorium*), or a carpenter's rule. (2) Metaphorically, a *testing rule* in ethics (comp. Aristot. *Eth. Nic.* iii, 4, 5), or in art (the *Canon* of Polycletus; Luc. *de Salt.* p. 946 B), or in language (the *Canons* of

Grammar). The gift of tongues (Acts ii, 7) was regarded as the "canon" or test which determined the direction of the labors of the several apostles (Severian. ap. Cram. *Cat. in Act.* ii, 7). Chronological tables were called "canons of time" (Plut. *Sol.* 27); and the summary of a book was called κανών, as giving the "rule," as it were, of its composition. The Alexandrine grammarians applied the word in this sense to the great "classical" writers, who were styled "the rule" (ὁ Κανών), or the perfect model of style and language. (3) But, in addition to these active meanings, the word was also used passively for a measured space (at Olympia), and, in later times, for a fixed tax (Du Cange, s. v.).

2. In *ecclesiastical* usage, the word occurs in the Sept. in its literal sense (Jud. xiii, 6), and again in Aquila (Job xxxviii, 5). In the N. T. it is found in two places in Paul's epistles (Gal. vi, 16; 2 Cor. x, 13–16), and in the second place the transition from an active to a passive sense is worthy of notice. In patristic writings the word is commonly used both as a rule in the widest sense, and especially in the phrases "the rule of the Church," "the rule of faith," "the rule of truth." In the fourth century, when the practice of the Church was farther systematized, the decisions of synods were styled "Canons," and the discipline by which ministers were bound was technically "the Rule," and those who were thus bound were styled *Canonici* ("Canons"). In the phrase "the canon (i. e. fixed part) of the mass," from which the popular sense of "canonize" is derived, the passive sense again prevailed. (See below.)

3. As applied to *Scripture*, the derivatives of κανών are used long before the simple word. The Latin translation of Origen speaks of *Scripturæ Canonicæ* (*de Princ.* iv, 33), *libri regulares* (*Comm. in Matt.* § 117), and *libri canonizati* (id. § 28). In another place the phrase *haberi in Canone* (*Prol. in Cant.* s. f.) occurs, but probably only as a translation of κανονίζεσθαι, which is used in this and cognate senses in Athanasius (*Ep. Fest.*), the Laodicene Canons (ἀκανόνιστα, Can. lix), and later writers (Isid. Pelus. *Ep.* cxiv; comp. Aug. *de doctr. Chr.* iv, 9 [6]; and as a contrast, *Anon.* ap. Euseb. *H. E.* v, 28).

The first direct application of the term κανών to the Scriptures seems to be by Amphilochius (cir. 380), in his Catalogue of the Scriptures, where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers the word is commonly found from the time of Jerome (*Prol. Gal.*) and Augustine (*De Civ.* xvii, 24; xviii, 38), and their usage of the word, which is wider than that of Greek writers, is the source of its modern acceptation.

The uncanonical books were described simply as "those without," or "those uncanonized" (ἀκανόνιστα, *Conc. Laod.* lix). The apocryphal books, which were supposed to occupy an intermediate position, were called "books read" (ἀναγιγνωσκόμενα, Athan. *Ep. Fest.*), or "ecclesiastical" (*ecclesiastici*, Rufin. *in Symb. Apost.* § 38), though the latter title was also applied to the canonical Scriptures, which (Leont. *de Sect.* ii) were also called "books of the Testament" (ἐνδιάθηκα βιβλία), and Jerome styled the whole collection by the striking name of "the holy library" (*Bibliotheca sancta*), which happily expresses the unity and variety of the Bible (Credner, *Zur Gesch. d. Kan.* § 1; Westcott, *Hist. of Canon of N. T.* App. D).

II. *The Jewish Canon.*—1. According to the command of Moses, the "book of the law" was "put in the side of the ark" (Deut. xxxi, 25 seq.), but not *in* it (1 Kings viii, 9; comp. Joseph. *Ant.* iii, 1, 7; v, 1, 17); and thus, in the reign of Josiah, Hilkiah is said to have "found the book of the law in the house of the Lord" (2 Kings xxii, 8; comp. 2 Chron. xxxiv, 14). This "book of the law," which, in addition to the direct precepts (Exod. xxiv, 7), contained general exhortations (Deut. xxviii, 61) and historical narratives (Exod. xvii, 14), was farther increased by the records of Joshua (Josh. xxiv, 26), and other writings (1 Sam. x, 25). From these sacredly guarded autographs copies were taken and circulated among the people (2 Chron. xvii, 9). At a subsequent time collections of proverbs were made (Prov. xxv, 1), and the later prophets (especially Jeremiah; comp. Kueper, *Jerem. Libror. ss. interp. et vindex*, Berol. 1837) were familiar with the writings of their predecessors, a circumstance which may naturally be connected with the training of "the prophetic schools." It perhaps marks a farther step in the formation of the Canon when "the book of the Lord" is mentioned by Isaiah as a general collection of sacred teaching (xxxiv, 16 [where it is implied that his own writings were to be added to those previously regarded as sacred; see Gesenius, *Comment.* in loc.]; comp. xxix, 18) at once familiar and authoritative; but it is unlikely that any definite collection either of "the Psalms" or of "the Prophets" existed before the Captivity. At that time Zechariah speaks of "the law" and "the former prophets" as in some measure co-ordinate (Zech. vii, 12); and Daniel refers to "*the books*" (Dan. ix, 2) in a manner which seems to mark the prophetic writings as already collected into a whole. Shortly after the return from Babylon, the Levites read and expounded the word of the Lord to the people (Neh. viii, 1–8; ix, 1–3).

2. Popular belief assigned to Ezra and "the great synagogue" the task of collecting and promulgating the Scriptures as part of their work in organizing the Jewish Church. Doubts have been thrown upon this belief (Rau, *De Synag. magnâ*, 1726; comp. Ewald, *Gesch. d. V. Isr.* iv, 191 [see below]); but the statement is in every way consistent with the history of Judaism, and with the internal evidence of the books themselves. The later embellishments of the tradition, which represent Ezra as the second author of all the books (2 Esdras), or define more exactly the nature of his work, can only be accepted as signs of the universal belief in his labors, and ought not to cast discredit upon the simple fact that the foundation of the present Canon is due to him. Nor can it be supposed that the work was completed at once; so that the account (2 Macc. ii, 13) which assigns a collection of books to Nehemiah is in itself a confirmation of the general truth of the gradual formation of the Canon during the Persian period. The work of Nehemiah is not described as initiatory or final. The tradition omits all mention of the law, which may be supposed to have assumed its final shape under Ezra, but says that Nehemiah "gathered together the [writings] concerning the kings and prophets, and the [writings] of David, and letters of kings concerning offerings," while "founding a library" (2 Macc. l. c.). The various classes of books were thus completed in succession; and this view harmonizes with what must have been the natural development of the Jewish faith after the Return. The constitution of the Church and the formation of the Canon were both, from their nature, gradual and mutually dependent. The construction of an ecclesiastical polity involved the practical determination of the divine rule of truth, though, as in the parallel case of the Christian Scriptures, open persecution first gave a clear and distinct expression to the implicit faith.

The foregoing tradition occurs in one of the oldest books of the Talmud, the *Pirke Aboth;* and it is repeated, with greater minuteness, in the Babylonian Gemara (*Baba Bathra*, fol. 13, 2. See the passages in Buxtorf's *Tiberias*, lib. i, c. 10; comp. Wachner, *Antiq. Heb.* i, 13). The substance of it is that, after Moses and the elders, the sacred books were watched over by the prophets, and that the Canon was completed by Ezra, Nehemiah, and the men of the Great Synagogue. The earliest form in which this appears is in the fourth book of Esdras, a work dating from the end of the first

or beginning of the second century after Christ. Here it is asserted that Ezra, by divine command and by divine aid, caused to be composed 94 books by three men (Vulg. 204 books by five men) in forty days, 70 of which, wherein "is a vein of understanding, a fountain of wisdom, and a stream of knowledge," were to be given to the wise of the people, while the rest were to be made public, that "both the worthy and the unworthy might read them" (xiv, 42-47). These twenty-four thus made public are doubtless the canonical books. The statement is very vague; but that this is its reference is rendered probable by the appearance in the writings of some of the Christian fathers of a tradition that the sacred writings, which had been lost during the exile, were restored by Ezra in the time of Artaxerxes by inspiration (Clemens Alex., *Strom.* I, 22, p. 410; Potter; Tertullian, *De cultu fœm.* i, 3; Irenæus, *adv. Hær.* iii, 21 [25], etc.). Against this tradition it has been objected that it proves too much, for it says that the men of the Great Synagogue *wrote* the later books, such as the twelve minor prophets, etc. But that by *writing* is here meant, not the original composing of these books, but the *ascription* (the *to*-writing) of them to the sacred Canon, may be inferred, partly from the circumstance that, in the same tradition, the men of Hezekiah are said to have *written* the Proverbs, which can only mean that they *copied* them (see Prov. xxv, 1) for the purpose of inserting them in the Canon, and partly from the fact that the word here used (כתבן) is used by the Targumist on Prov. xxv, 1 as equivalent to the Heb. הֶעְתִּיק, *to transcribe*. An attempt has also been made to discredit this tradition by adducing the circumstance that Simon the Just, who lived long after Ezra, is said, in the *Pirke Aboth*, to have been one of the members of the Great Synagogue; but to this much weight cannot be allowed, partly because Simon is, in the passage referred to, said to have been one of the *remnants* of the Great Synagogue, which indicates his having outlived it, and principally because the same body of tradition which states this opinion makes him the *successor* of Ezra; so that either the whole is a mistake, or the Simon referred to must have been a different person from the Simon who is commonly known by the title of "Just" (comp. Othonis *Lex. Rabbin. Philol.* p. 604, Gen. 1675; Håvernick's *Einleitung in das A. T.* Th. i. Abt. I, i, 43). Or we may adopt the opinion of Hartmann (*Die enge Verbindung des Alt. Test. mit d. Neuen*, p. 127) that the college of men learned in the law, which gathered round Ezra and Nehemiah, and which properly was the Synagogue, continued to receive accessions for many years after their death, by means of which it existed till the time of the Maccabees, without our being required to suppose that what is affirmed concerning its doings in the time of Ezra is meant to refer to it during the entire period of its existence. Suspicions have also been cast upon this tradition from the multitude of extravagant wonders narrated by the Jews respecting the Great Synagogue. But such are found in almost every traditionary record attaching to persons or bodies which possess a nationally heroic character; and it is surely unreasonable, because a chronicler tells one or two things which are incredible, that we should disbelieve all besides that he records, however possible or even probable it may be. To this it may be added that there are some things, such as the order of daily prayer, the settling of the text of the Old Testament, the establishment of the traditional interpretation of Scripture, etc., which must be assigned to the period immediately after the Captivity, and which presuppose the existence of some institute such as the Great Synagogue, whether this be regarded as formally constituted by Ezra or as a voluntary association of priests and scribes (Zunz, *Die Gottesdienstlichen Vortr. d. Juden*, p. 33). Moreover there are some passages of Scripture (e. g. 1 Chron. iii, 23, 24) which belong to a period somewhat later than any of the canonical writers. See EZRA.

This tradition, again, is confirmed by the following circumstances: (*a*.) The time in question was the latest at which this could be done. As the duty to be performed was not merely that of determining the genuineness of certain books, but of pointing out those which had been divinely ordained as a rule of faith and morals to the Church, it was one which none but a prophet could discharge. Now in the days of Nehemiah and Ezra there were several prophets living, among whom we know the names of Haggai, Zechariah, and Malachi; but with that age expired the line of prophets which God had appointed "to comfort Jacob, and deliver them by assured hope" (Ecclus. xlix, 10). On this point the evidence of Josephus, the apocryphal books, and Jewish tradition, is harmonious (comp. Joseph. *cont. Apion.* i, 8; 1 Macc. iv, 46; ix, 27; xiv, 41; Jerome, *ad Jes.* xlix, 21; Vitringa, *Obs. Sac.* lib. vi, cap. 6, 7; Hävernick, *Einleit.* i, 1, 27; Hengstenberg, *Beiträge zur Einleit. ins A. T.* i, 245). As the men of the Great Synagogue were thus the last of the prophets, if the Canon was not fixed by them, the time was passed when it could be fixed at all. (*b*.) That it was fixed at that time appears from the fact that all *subsequent* references to the sacred writings presuppose the existence of the complete Canon, as well as from the fact that of no one among the apocryphal books is it so much as hinted, either by the author or by any other Jewish writer, that it was worthy of a place among the sacred books, though of some of them the pretensions are in other respects sufficiently high (e. g. Ecclus. xxxiii, 16-18; l, 28). Josephus, indeed, distinctly affirms (*cont. Ap.* l. c.) that, during the long period that had elapsed between the time of the close of the Canon and his day, no one had dared either to add to, or to take from, or to alter any thing in the sacred books. This plainly shows that about the time of Artaxerxes, to which Josephus refers, and which was the age of Ezra and Nehemiah, the collection of the sacred books was completed by an authority which thenceforward ceased to exist. See SYNAGOGUE, GREAT.

3. The persecution of Antiochus (B.C. 168) was for the Old Testament what the persecution of Diocletian was for the New, the final crisis which stamped the sacred writings with their peculiar character. The king sought out "the books of the law" (τὰ βιβλία τοῦ νόμου, 1 Macc. i, 56) and burnt them; and the possession of a "book of the covenant" (βιβλίον διαθήκης) was a capital crime (Joseph. *Ant.* xii, 5, 4). But this proscription of "the law" naturally served only to direct the attention of the people more closely to these sacred books themselves. After the Maccabæan persecution the history of the formation of the Canon is merged in the history of its contents. The Bible appears from that time as a whole, though it was natural that the several parts were not yet placed on an equal footing, nor regarded universally and in every respect with equal reverence (comp. Zunz, *D. Gottesd. Vortr. d. Jud.* p. 14, 25, etc.).

But while the combined evidence of tradition and of the general course of Jewish history leads to the conclusion that the Canon in its present shape was formed gradually during a lengthened interval, beginning with Ezra and extending through a part or even the whole (Neh. xii, 11, 22) of the Persian period (B.C. 458-332), when the cessation of the prophetic gift pointed out the necessity and defined the limits of the collection, it is of the utmost importance to notice that the collection was peculiar in character and circumscribed in contents. All the evidence which can be obtained tends to show that it is false, both in theory and fact, to describe the O. T. as "all the relics of the Hebræo-Chaldaic literature up to a certain epoch" (De Wette, *Einl.* § 8), if the phrase is intended to refer to the time when the Canon was completed

The epilogue of Ecclesiastes (xii, 11 sq.) speaks of an extensive literature, with which the teaching of Wisdom is contrasted, and "weariness of the flesh" is described as the result of the study bestowed upon it. It is impossible that these "many writings" can have perished in the interval between the composition of Ecclesiastes and the Greek invasion, and the Apocrypha includes several fragments which must be referred to the Persian period (Buxtorf, *Tiberias*, c. 10 sq.; Hottinger, *Thes. Phil.*; Hengstenberg, *Beiträge*, i; Hävernick, *Einl.* i; Oehler, art. *Kanon d. A. T.* in Herzog's *Encyklop.*).

4. The division of the O.-T. Canon into three parts, "the Law," "the Prophets," and "the Writings" (תּוֹרָה נְבִיאִים וּכְתוּבִים), is very ancient; it appears in the prologue to Ecclesiasticus, in the New Testament, in Philo, in Josephus, and in the Talmud (Surenhusii Βιβ. Καταλλ. p. 49). Respecting the *principle* on which the division has been made, there is considerable difference of opinion. All are agreed that the first part, the Law, which embraces the Pentateuch, was so named from its containing the national laws and regulations. The *second* embraces the rest of the historical books, with the exception of Ruth, Esther, Ezra, Nehemiah, and the Chronicles; and the writings of the prophets, except Daniel and Lamentations. It is probable that it received its name *a parte potiori*, the majority of the books it contains being the production of men who were *professionally* prophets. That this criterion, however, *determined* the omission or insertion of a book in this second division, as asserted by Hengstenberg (*Authent. des Daniel*, p. 27), and by Hävernick (*Einl.* I, sec. 11), cannot be admitted; for, on the one hand, we find inserted in this division the book of Amos, who was "neither a prophet nor a prophet's son;" and on the other, there is omitted from it the Book of Lamentations, which was unquestionably the production of a prophet. The insertion of this book in the last rather than in the second division has its source probably in some liturgical reason, in order that it might stand beside the Psalms and other lyric poetry of the sacred books. It is more difficult to account for the insertion of the book of Daniel in the third rather than in the second division; and much stress has been laid on this circumstance, as affording evidence unfavorable to the canonical claims of this book. But it is not certain that this book *always* occupied its present position. Is it not possible that for some reason of a mystical or controversial kind, to both of which sources of influence the Jews during the early ages of Christianity were much exposed, they may have altered the position of Daniel from the second to the third division? What renders this probable is, that the Talmudists stand alone in this arrangement. Josephus, Siracides, Philo, the New Testament, all refer to the Hagiographa in such a way as to induce the belief that it comprised only the *poetical* portions of the Old Testament—the psalms, hymns, and songs; while in all the catalogues of the Old-Testament writers given by the early fathers, up to the time of Jerome, Daniel is ranked among the prophets, generally in the position he occupies in our common version. In the version of the Sept., also, he is ranked with the prophets next to Ezekiel. Nor does Jerome agree with the Talmud in all respects, nor does one class of Jewish rabbis agree with another in the arrangement of the sacred books. All this shows that no such fixed and unalterable arrangement of the sacred books, as that which is commonly assumed, existed anterior to the fifth century of the Christian æra, and proves very distinctly that the place then assigned to Daniel by the Talmudists was *not* the place he had during the preceding period, or originally occupied. See DANIEL, BOOK OF. As respects the name given to the *third* division, the most probable account of it is, that at first it was fuller—viz., "the *other* writings," as distinguished from the Law and the Prophets (comp. the expression τὰ ἄλλα βιβλία, used by the Son of Sirach, *Ecclus.* Prol.); and that in process of time it was abbreviated into "the writings." This part is commonly cited under the title *Hagiographa* (q. v.).

5. The O.-T. Canon, as established in the time of Ezra, has remained unaltered to the present day. Some, indeed, have supposed that, because the Sept. version contains some books not in the Hebrew, there must have been a double Canon, a Palestinian and an Egyptian (Semler, *Apparat. ad liberaliorem V. T. interpret.* § 9, 10; Corrodi, *Beleuchtung der Gesch. des Jüd'sch. u. Christlich. Kanons*, p. 155-184; Augusti, *Einleit. ins. A. T.* p. 79); but this notion has been completely disproved by Eichhorn (*Einleit.* i, 23), Hävernick (*Einl.* i, § 16), and others. All extant evidence is against it. The Son of Sirach, and Philo, both Alexandrian Jews, make no allusion to it; and Josephus, who evidently used the Greek version, expressly declares against it in the passage above referred to (*Ap.* i, 8). The earlier notices of the Canon simply designate it by the threefold division already considered. The Son of Sirach mentions "the Law, the Prophets, and the other books of the fathers;" and again, "the Law, the Prophecies, and the rest of the books;" expressions which clearly indicate that in his day the Canon was fixed. In the New Test. our Lord frequently refers to the Old Test. under the title of "The Scriptures," or of "The Law" (Matt. xxi, 42; xxii, 29; John x, 30, etc.); and in one place he speaks of "the Law of Moses, the Prophets, and the Psalms" (Luke xxiv, 44); by the third of these titles intending, doubtless, to designate the Hagiographa, either after the Jewish custom of denoting a collection of books by the title of that with which it commenced, or, as Hävernick suggests, using the term ψαλμοί as a general designation of these books, because of the larger comparative amount of lyric poetry contained in them (*Einl.* § 14). Paul applies to the Old Test. the appellations "the Holy Writings" (γραφαὶ ἁγίαι, Rom. i, 2); "the Sacred Letters" (ἱερὰ γράμματα, 2 Tim. iii, 15), and "the Old Covenant" (ἡ παλαιὰ διαθήκη, 2 Cor. iii, 14). Both our Lord and his apostles ascribe divine authority to the ancient Canon (Matt. xv, 3; John x, 34-36; 2 Tim. iii, 16; 2 Peter i, 19-21, etc.); and in the course of the New Test. quotations are made from all the books of the Old except Ruth, Ezra, Nehemiah, Esther, Canticles, Lamentations, and Ezekiel, the omission of which may be accounted for on the simple principle that the writers had no occasion to quote from them. Coincidences of language show that the apostles were familiar with several of the apocryphal books (Bleek, *Ueber d. Stellung d. Apokr.* in the *Stud. u. Krit.* 1853, p. 267 sq.), but they do not contain one authoritative or direct quotation from them, while, with the exception of Judges, Eccles., Cant., Esther, Ezra, and Nehemiah, every other book in the Hebrew Canon is used either for illustration or proof. Philo attests the existence in his time of the ἱερὰ γράμματα, describes them as comprising laws, oracles uttered by the prophets, hymns, and the other books by which knowledge and godliness may be increased and perfected (*De Vita Contemplat.* in *Opp.* ii, 275, ed Mangey); and quotations from or references to the most of the books are scattered through his writings. The evidence of Josephus is very important; for, besides general references to the sacred books, he gives a formal account of the Canon as it was acknowledged in his day, ascribing five books, containing laws and an account of the origin of man, to Moses, thirteen to the Prophets, and four, containing songs of praise to God and ethical precepts for men, to different writers, and affirming that the faith of the Jews in these books is such that for them they would suffer all tortures and death itself (*cont. Apion.* i, 7, 8; Eichhorn, *Einleit.* i, § 50; Jahn, *Introductio*, p. 50). The popular belief

that the Sadducees received only the books of Moses (Tertull. *De præscr. hæret.* 45; Jerome, *in Matth.* xxii, 31, p. 181; Origen, *c. Cels.* i, 49), rests on no sufficient authority; and if they had done so, Josephus could not have failed to notice the fact in his account of the different sects. See SADDUCEES. In the traditions of the Talmud, on the other hand, Gamaliel is represented as using passages from the Prophets and the Hagiographa in his controversies with them, and they reply with quotations from the same sources without scruple or objection. (See Eichhorn, *Einl.* § 35; Lightfoot, *Horæ Hebr. et Talm.* ii, 616; Schmid, *Enarr. Sent. Fl. Josephi de Libris V. T.* 1777; Güldenapfel. *Dissert. Josephi de Sadd. Can. Sent. exhibens*, 1804.) In the Talmudic Tract entitled *Baba Bathra*, a catalogue of the books of the sacred Canon is given, which exactly corresponds with that now found in the Hebrew Bible (Buxtorf, *Tiberias*, c. 11).

III. *The Christian Canon of the Old Testament.*—Melito, bishop of Sardis in the second century of the Christian æra, gives, as the result of careful inquiry, the same books in the Old-Testament Canon as we have now, with the exception of Nehemiah, Esther, and Lamentations; the first two of which, however, he probably included in Ezra, and the last in Jeremiah (Euseb. *Hist. Eccles.* iv, 26; Eichhorn, *Einl.* i, § 52). The catalogues of Origen (Euseb. *Hist. Eccles.* vi, 2, 5), of Jerome (*Prol. Galeat.* in *Opp.* iii), and of others of the fathers, give substantially the same list (Eichhorn, l. c.; Augusti, *Einl.* § 54; Cosins, *Scholastical Hist. of the Canon*, ch. iii, vi; Henderson, *On Inspiration*, p. 449).

The general use of the Septuagint (enlarged by apocryphal additions) produced effects which are plainly visible in the history of the O.-T. Canon among the early Christian writers. In proportion as the fathers were more or less absolutely dependent on that version for their knowledge of the Old-Testament Scriptures, they gradually lost in common practice the sense of the difference between the books of the Hebrew Canon and the Apocrypha. The custom of individuals grew into the custom of the Church; and the public use of the apocryphal books obliterated in popular regard the characteristic marks of their origin and value, which could only be discovered by the scholar. But the custom of the Church was not fixed in an absolute judgment. The same remark applies to the details of patristic evidence on the contents of the Canon. Their habit must be distinguished from their judgment.

1. From what has been said, it is evident that the history of the Christian Canon is to be sought, in the first instance, from definite catalogues rather than from isolated quotations. But even this evidence is incomplete and unsatisfactory. (See the Tables I. and II.) During the first four centuries this Hebrew Canon is the only one which is distinctly recognised, and it is supported by the combined authority of those fathers whose critical judgment is entitled to the greatest weight. The real divergence as to the contents of the Old-Testament Canon is to be traced to Augustine, who enumerates the books contained in "the whole Canon of Scripture," including the Apocrypha, without any special mark of distinction, although it may be reasonably doubted whether he differed intentionally from Jerome except in language (*De Doctr. Christ.* ii, 8 [13]; comp. *De Civ.* xviii, 36; *Gaud.* i, 38).

The enlarged Canon of Augustine, though wholly unsupported by any Greek authority, was adopted at the Council of Carthage (A.D. 397 ?), though with a reservation (Can. 47, "*de confirmando isto Canone transmarina ecclesia consulatur*"), and afterward published in the decretals which bear the name of Innocent, Damasus, and Gelasius (comp. Credner, *Zur Gesch. d. Kan.* p. 151 sq.); and it recurs in many later writers. But, nevertheless, a continuous succession of the more learned fathers in the West maintained the distinctive authority of the Hebrew Canon up to the period of the Reformation. In the 6th century Primasius (*Comm. in Apoc.* iv, Cosin, § 92 ?), in the 7th Gregory the Great (*Moral.* xix, 21, p. 622), in the 8th Bede (*In Apoc.* iv ?), in the 9th Alcuin (*ap.* Hody, p. 654; yet see *Carm.* vi, vii), in the 10th Radulphus Flav. (*In Levit.* xiv, Hody, p. 655), in the 12th Peter of Clugni (*Ep. c. Petr.* Hody, l. c.), Hugo de S. Victore (*de Script.* 6), and John of Salisbury (Hody, p. 656; Cosin, § 130), in the 13th Hugo Cardinalis (Hody, p. 656), in the 14th Nicholas Liranus (Hody, p. 657; Cosin, § 146), Wiclif (? comp. Hody, p. 658), and Occam (Hody, p. 657; Cosin, § 147), in the 15th Thomas Anglicus (Cosin, § 150), and Thomas de Walden (Id. § 151), in the 16th Card. Ximenes (*Ed. Compl. Praf.*), Sixtus Senensis (*Biblioth.* i, 1), and Card. Cajetan (Hody, p. 662; Cosin, § 173), repeat with approval the decision of Jerome, and draw a clear line between the canonical and apocryphal books (Cosin, *Scholastical History of the Canon*; Reuss, *Die Gesch. d. heiligen Schriften d. N. T.* ed. 2, § 328).

TABLE I.—CHRISTIAN CATALOGUES OF THE BOOKS OF THE OLD TESTAMENT.

The list extends only to such books as are disputed. Of the signs, * indicates that the book is expressly reckoned as *Holy Scripture*; † that it is placed expressly in a *second* rank; ? that it is mentioned with *doubt*. A blank marks the silence of the author as to the book in question.

	Lamentations.	Baruch.	Esther.	Ecclesiasticus.	Wisdom.	Tobit.	Judith.	1, 2 Maccabees.

2. Up to the date of the Council of Trent (q. v.), the Romanists allow that the question of the Canon was open, but one of the first labors of that assembly was to circumscribe a freedom which the growth of literature seemed to render perilous. The decree of the Council "on the Canonical Scriptures," which was made at the 4th session (April 8th, 1546), at which about 53 representatives were present, pronounced the enlarged Canon, including the apocryphal books, to be deserving in all its parts of "equal veneration" (pari pietatis affectu), and added a list of books "to prevent the possibility of doubt" (ne cui dubitatio suboriri possit). This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should "not receive the entire books, with all their parts, as sacred and canonical" (Si quis autem libros ipsos integros cum omnibus suis partibus, prout in ecclesia catholica legi consueverunt et in veteri vulgata Latina editione habentur, pro sacris et canonicis non susceperit . . . . anathema esto, *Conc. Trid. Sess.* iv). This decree was not, however, passed without opposition (Sarpi, p. 159 sq. ed. 1655, though Pallavacino denies this); and, in spite of the absolute terms in which it is expressed, later Romanists have sought to find a method of escaping from the definite equalization of the two classes of sacred writings by a forced interpretation of the subsidiary clauses. Du Pin (*Dissert. prelim.* i, 1), Lamy (*App. Bibl.* ii, 5), and Jahn (*Einl. in d. A. T.* i, 141 sq. *ap.* Reuss, § 337) endeavored to establish two classes of proto-canonical and deutero-canonical books, attributing to the first a dogmatic, and to the second only an ethical authority. But such a classification, however true it may be, is obviously at variance with the terms of the Tridentine decision, and has found comparatively little favor among Romish writers (comp. [Herbst] Welte, *Einl.* ii, 1 sq.). See DEUTERO-CANONICAL.

3. The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the apocryphal books, but the form in which this judgment was expressed varied considerably in the different confessions. The Lutheran formularies contain no definite article on the subject, but the note which Luther placed in the front of his German translation of the Apocrypha (ed. 1534) is an adequate declaration of the later judgment of the Communion: "Apocrypha, that is, books which are not placed on an equal footing (*nicht gleich gehalten*) with Holy Scripture, and yet are profitable and good for reading." This general view was further expanded in the special prefaces to the separate books, in which Luther freely criticised their individual worth, and wholly rejected 3 and 4 Esdras as unworthy of translation. At an earlier period Carlstadt (1520) published a critical essay, *De canonicis scripturis*

libellus (reprinted in Credner, *Zur Gesch. d. Kan.* p. 291 sq.), in which he followed the Hebrew division of the canonical books into three ranks, and added Wisd., Ecclus., Judith, Tobit, 1 and 2 Macc., as Hagiographa, though not included in the Hebrew collection, while he rejected the remainder of the Apocrypha, with considerable parts of Daniel, as "utterly apocryphal" (*plane apocryphi;* Credn. p. 389, 410 sq.).

4. The Calvinistic churches generally treated the question with more precision, and introduced into their symbolic documents a distinction between the "canonical" and "apocryphal," or "ecclesiastical" books. The Gallican Confession (1561), after an enumeration of the Hieronymian Canon (Art. 3), adds (Art. 4) "that the other ecclesiastical books are useful, yet not such that any article of faith could be established out of them" (*quo* [sc. *Spiritu Sancto*] *suggerente docemur, illos* [sc. *libros Canonicos*] *ab aliis libris ecclesiasticis discernere, qui, ut sint utiles, non sunt tamen ejusmodi, ut ex iis constitui possit aliquis fidei articulus*). The Belgic Confession (1561 ?) contains a similar enumeration of the canonical books (Art. 4), and allows their public use by the Church, but denies to them all independent authority in matters of faith (Art. 6). The later Helvetic Confession (1562, Bullinger) notices the distinction between the canonical and apocryphal books, without pronouncing any judgment on the question (Niemeyer, *Libr. Symb. Eccles. Ref.* p. 468). The Westminster Confession (Art. 3) places the apocryphal books on a level with other human writings, and concedes to them no other authority in the Church.

5. The English Church (Art. 6) appeals directly to the opinion of St. Jerome, and concedes to the apocryphal books (including [1571] 4 Esdras and the Prayer of Manasses) a use "for example of life and instruction of manners," but not for the establishment of doctrine; and a similar decision is given in the Irish Articles of 1615 (Hardwick, *ut sup.* p. 341 sq.). The original English Articles of 1552 contained no catalogue (Art. 5) of the contents of "Holy Scripture," and no mention of the Apocrypha, although the Tridentine decree (1546) might seem to have rendered this necessary. The example of foreign churches may have led to the addition upon the later revision. The Methodist Episcopal Church has adopted the same Canon of Scripture, but entirely omits the Apocrypha (*Discipline*, pt. i, ch. 1, § 2, Art. 5); and those books, as they stand in the Hebrew Canon and Greek Testament, are alone received by the evangelical churches of America.

6. The expressed opinion of the later Greek Church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The "Confession" of Cyril Lucar, who was most favorably disposed toward the Protestant churches, confirms the Laodicene Catalogue, and marks the apocryphal books as not possessing the same divine authority as those whose canonicity is unquestioned (Kimmel, *Mon. Fid. Eccles. Or.* i, 42). In this judgment Cyril Lucar was followed by his friend Metrophanes Critopulus, in whose confession a complete list of the books of the Hebrew Canon is given (Kimmel, ii, 105 sq.), while some value is assigned to the apocryphal books in consideration of their ethical value; and the detailed decision of Metrophanes is quoted with approval in the "Orthodox Teaching" of Platon, Metropolitan of Moscow (ed. Athens, 1836, p. 59). The "Orthodox Confession" simply refers the subject of Scripture to the Church (Kimmel, p. 159; comp. p. 123). On the other hand, the Synod at Jerusalem, held in 1672, "against the Calvinists," which is commonly said to have been led by Romish influence (yet comp. Kimmel, p. lxxxviii), pronounced that the books which Cyril Lucar "ignorantly or maliciously called apocryphal" are "canonical and Holy Scripture," on the authority of the testimony of the ancient Church ([Kimmel,] Weissenborn, *Dosith. Confess.* p. 467 sq.). The Constantinopolitan Synod, which was held in the same year, notices the difference existing between the Apostolic, Laodicene, and Carthaginian Catalogues, and appears to distinguish the apocryphal books as not wholly to be rejected. The authorized Russian Catechism (*The Doctrine of the Russian Church*, etc., by Rev. W. Blackmore, Aberd. 1845, p. 37 sq.) distinctly quotes and defends the Hebrew Canon on the authority of the Greek fathers, and repeats the judgment of Athanasius on the usefulness of the apocryphal books as a preparatory study in the Bible; and there can be no doubt that the current of Greek opinion, in accordance with the unanimous agreement of the ancient Greek Catalogues, coincides with this judgment.

7. The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshito was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the Sept. was used afterward in revising the version, many of the apocryphal books were translated from the Greek at an early period, and added to the original collection (Assemani, *Bibl. Or.* i, 71). Yet this change was only made gradually. In the time of Ephrem (cir. A.D. 370) the apocryphal additions to Daniel were yet wanting, and his commentaries were confined to the books of the Hebrew Canon, though he was acquainted with the Apocrypha (Lardner, *Credibility*, iv, 427 sq.; see Lengerke, *Daniel*, p. cxii). The later Syrian writers do not throw much light upon the question. Gregory Bar Hebræus, in his short commentary on Scripture, treats of the books in the following order (Assemani, *Bibl. Orient.* ii, 282): the Pentateuch, Josh., Judg., 1 and 2 Sam., Psa., 1 and 2 Kings, Prov., *Ecclus.*, Eccl., Cant., *Wisd.*, Ruth, *Hist. Sus.*, Job, Isa., 12 Proph., Jer., Lam., Ezek., Dan., *Bel*, 4 Gosp., Acts . . . 14 Epist. of Paul; omitting 1 and 2 Chron., Ezra, Neh., Esther, *Tobit*, 1 and 2 *Macc.*, *Judith*, (*Baruch ?*), *Apocalypse*, Epist. *James*, 1 Pet., 1 John.

In the Scriptural Vocabulary of Jacob of Edessa (Assemani, ii, 499), the order and number of the books commented upon is somewhat different: Pent., Josh., Judg., Job, 1 and 2 Sam., David (i. e. Psa.), 1 and 2 Kings, Isa., 12 Proph., Jer., Lam., *Baruch*, Ezek., Dan., Prov., *Wisd.*, Cant., Ruth, Esth., *Judith*, *Ecclus.*, Acts, Epist. *James*, 1 Pet., 1 John, 14 Epist. of Paul, 4 Gosp.; omitting 1 and 2 Chron., Ezra, Neh., Eccl., *Tobit*, 1 and 2 *Macc.*, *Apoc.* (comp. Assemani, *Bibl. Orient.* iii, 4, note).

The Catalogue of Ebed-Jesu (Assemani, *Bibl. Orient.* iii, 5 sq.) is rather a general survey of all the Hebrew and Christian literature with which he was acquainted (Catalogus librorum omnium Ecclesiasticorum) than a Canon of Scripture. After enumerating the books of the Hebrew Canon, together with *Ecclus.*, *Wisd.*, *Judith*, *add. to Dan.*, and *Baruch*, he adds, without any break, "the traditions of the Elders" (Mishna), the works of Josephus, including the Fables of Æsop which were popularly ascribed to him, and at the end mentions the "book of *Tobias and Tobit.*" In like manner, after enumerating the 4 Gosp., Acts, 3 Cath. Epist. and 14 Epist. of Paul, he passes at once to the Diatessaron of Tatian, and the writings of "the disciples of the apostles." Little dependence, however, can be placed on these lists, as they rest on no critical foundation, and it is known from other sources that varieties of opinion on the subject of the Canon existed in the Syrian Church (Assemani, *Bibl. Orient.* iii, 6, note).

One testimony, however, which derives its origin from the Syrian Church, is specially worthy of notice. Junilius, an African bishop of the 6th century, has preserved a full and interesting account of the teachings of Paulus, a Persian, on Holy Scripture, who was educated at Nisibis, where "the Divine Law was regularly explained by public masters" as a branch of

common education (Junil. *De part. leg. Praef.*). He divides the books of the Bible into two classes, those of "perfect" and those of "mean" authority. The first class includes all the books of the Hebrew Canon with the exception of 1 and 2 Chron., Job, Canticles, and Esther, and with the addition of *Ecclesiasticus*. The second class consists of Chronicles (2), Job, Esdras (2), *Judith*, Esther, and *Maccabees* (2), which are added by "very many" (*plurimi*) to the canonical books. The remaining books are pronounced to be of no authority, and of these Canticles and Wisdom are said to be added by "some" (*quidam*) to the Canon. The classification as it stands is not without difficulties, but it deserves more attention than it has received (comp. Hody, p. 653; Gallandi *Biblioth.* xii, 79 sq. The reprint in Wordsworth, *On the Canon*, App. A, p. 42 sq., is very imperfect).

8. The Armenian Canon, as far as it can be ascertained from editions, follows that of the Sept., but it is of no critical authority; and a similar remark applies to the Ethiopic Canon, though it is more easy in this case to trace the changes through which it has passed (Dillmann, *Ueber d. Aeth. Kan.*, in Ewald's *Jahrbuch*, 1853, p. 144 sq.).

See, on this branch of the subject, in addition to the works above, Schmid, *Hist. ant. et vindic. Can. S. Vet. et Nov. Test.* (Lips. 1775); [H. Corrodi], *Versuch einer Beleuchtung . . . d. Bibl. Kanons* (Halle, 1792); Movers, *Loci quidam Hist. Can. V. T. illustrati* (Breslau, 1842). The great work of Hody (*De biblior. text.* Oxon. 1705) contains a rich store of materials, though even this is not free from minor errors. Stuart's *Critical History and Defence of the Old-Test. Canon* is rather an apology than a history. See APOCRYPHA.

IV. *The Canon of the New Testament.*—The history of the N.-T. Canon presents a remarkable analogy to that of the Canon of the O. T. The beginnings of both Canons are obscure from the circumstances under which they arose; both grew silently under the guidance of an inward instinct rather than by the force of external authority; both were connected with other religious literature by a series of books which claimed a partial and questionable authority; both gained definiteness in times of persecution. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O.-T. Apocrypha.

1. An ecclesiastical tradition (Photius, *Bibl. Cod.* p. 254) ascribes to the apostle John the work of collecting and sanctioning the writings which were worthy of a place in the Canon; but this tradition is too late, too unsupported by collateral evidence, and too much opposed by certain facts, such as the existence of doubt in some of the early churches as to the canonicity of certain books, the different arrangement of the books apparent in catalogues of the Canon still extant, etc., for any weight to be allowed to it. A much more probable opinion, and one in which nearly all the modern writers who are favorable to the claims of the Canon are agreed, is, that each of the original churches, especially those of larger size and greater ability, collected for itself a complete set of those writings which could be proved, by competent testimony, to be the production of inspired men, and to have been communicated by them to any of the churches as part of the written word of God; so that in this way a great many complete collections of the N.-T. Scriptures came to be extant, the accordance of which with each other, as to the books admitted, furnishes irrefragable evidence of the correctness of the Canon as we now have it. This opinion, which in itself is highly probable, is rendered still more so when we consider the scrupulous care which the early churches took to discriminate spurious compositions from such as were authentic—the existence, among some, of doubt regarding certain of the N.-T. books, indicating that each Church claimed the right of satisfying itself in this matter—their high veneration for the genuine apostolic writings—their anxious regard for each other's prosperity leading to the free communication from one to another of whatever could promote this, and, of course, among other things, of those writings which had been intrusted to any one of them, and by which, more than by any other means, the spiritual welfare of the whole would be promoted—the practice of the fathers of arguing the canonicity of any book, from its reception by the churches, as a sufficient proof of this—and the reason assigned by Eusebius (*Hist. Eccles.* iii, 25) for dividing the books of the N. T. into ὁμολογούμενοι and ἀντιλεγόμενοι, viz. that the former class was composed of those which the universal tradition of the churches authenticated, while the latter contained such as had been received by the majority, but not by all (Storch, *Comment. Hist. Crit. de Libb. N. Testamenti Canone*, etc. p. 112 sq.; Olshausen's *Echtheit der IV. Evang.* p. 439). In this way we may readily believe that, without the intervention of any authoritative decision, either from an individual or a council, but by the natural process of each body of Christians seeking to procure for themselves and to convey to their brethren authentic copies of writings in which all were deeply interested, the Canon of the New Testament was formed.

2. The first certain notice which we have of the existence of any of the New-Testament writings in a collected form occurs in 2 Pet. iii, 16, where the writer speaks of the epistles of Paul in such a way as to lead us to infer that at that time the whole or the greater part of these were collected together, were known among the churches generally (for Peter is not addressing any particular church), and were regarded as on a par with "the other Scriptures," by which latter expression Peter plainly means the sacred writings both of the Old and the New Testament, as far as then extant.—That John must have had before him copies of the other evangelists is probable from the *supplementary* character of his own gospel.—In the anonymous Epistle to Diognetus, which is, on good grounds, supposed to be one of the earliest of the uninspired Christian writings, the writer speaks of the Law, the Prophets, the Gospels, and the Apostles (§ xi, ed. Hefele).—Ignatius speaks of "betaking himself to the Gospel as the flesh of Jesus, and to the apostles as the presbytery of the Church," and adds, "the prophets also we love," thus showing that it was to the Scriptures he was referring (*Ep. ad Philadelphenos*, § v, ed. Hefele).—Theophilus of Antioch speaks frequently of the New-Testament writings under the appellation of αἱ ἅγιαι γραφαί, or ὁ θεῖος λόγος, and in one place mentions the Law, the Prophets, and the Gospels as alike divinely inspired (*ad. Autol.* iii, 11).—Clement of Alexandria frequently refers to the books of the New Testament, and distinguishes them into "the Gospels and Apostolic Discourses" (*Quis Dives Salvus?* prope fin.: *Stromat.* sæpissime).—Tertullian distinctly intimates the existence of the New-Testament Canon in a complete form in his day by calling it "Evangelicum Instrumentum" (*adv. Marc.* iv, 2), by describing the whole Bible as "totum instrumentum utriusque Testamenti" (*adv. Prax.* c. 20), and by distinguishing between the "Scriptura Vetus" and the "Novum Testamentum" (*Ibid.* c. 13).—Irenæus repeatedly calls the writings of the New Testament "the Holy Scriptures," "the Oracles of God" (*adv. Hær.* ii, 27; i, 8, etc.), and in one place he puts the evangelical and apostolical writings on a par with the Law and the Prophets (*Ibid.* i, 3, § 6). From these allusions we may justly infer that before the middle of the third century the New-Testament Scriptures were generally known by the Christians in a collected form, and reverenced as the word of God. That the books they received were the same as those now possessed by us is evident from the quotations from them furnished by the early fa-

there, and which have been so carefully collected by the learned and laborious Lardner in his *Credibility of the Gospel History*. The same thing appears from the researches of Origen and Eusebius, both of whom carefully inquired, and have accurately recorded what books were received as canonical by the tradition of the churches or the church writers (ἐκκλησιαστικὴ παράδοσις), and both of whom enumerate the same books as are in our present Canon, though some of them, such as the Epistles of James and Jude, the 2d Ep. of Peter, the 2d and 3d of John, and the Apocalypse, they mention that though received by the majority, they were doubted by some (Euseb. *H. E.* iii, 25; vi, 24). Besides these sources of information, we have no fewer than ten ancient catalogues of the New-Testament books still extant. Of these, *six* accord exactly with our present Canon, while of the rest *three* omit only the Apocalypse, and *one* omits, with this, the Epistle to the Hebrews (Lardner's *Works*, vol. iv and v, 8vo; Horne's *Introduction*, i, 70, 8th edition).

3. The history of the N.-T. Canon may be conveniently divided into three periods. The first extends to the time of Hegesippus (c. A.D. 170), and includes the æra of the separate circulation and gradual collection of the apostolic writings. The second is closed by the persecution of Diocletian (A.D. 303), and marks the separation of the sacred writings from the remaining ecclesiastical literature. The third may be defined by the third Council of Carthage (A.D. 397), in which a catalogue of the books of Scripture was formally ratified by conciliar authority. The first is characteristically a period of tradition, the second of speculation, the third of authority; and it would not be difficult to trace the features of the successive ages in the course of the history of the Canon. For this, however, we have not room in detail, but must refer to the foregoing statements in support of this remark, the truth of which is farther sustained by the history of the times.

The persecution of Diocletian was directed in a great measure against the Christian writings (Lact. *Instit.* v, 2; *de mort. persec.* 16). The influence of the Scriptures was already so great and so notorious that the surest method of destroying the faith seemed to be the destruction of the records on which it was supported. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the sacred books, and at a later time the question of the readmission of these "traitors" (*traditores*), as they were emphatically called, created a schism in the Church. The Donatists, who maintained the sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the dissension; and Augustine allows that they held, in common with the Catholics, the same "canonical Scriptures," and were alike "bound by the authority of both Testaments" (August. *c. Cresc.* i, 31, 57; *Ep.* 129, 3). The only doubt which can be raised as to the integrity of the Donatist Canon arises from the uncertain language that Augustine himself uses as to the Epistle to the Hebrews, which the Donatists may also have countenanced. But, however this may have been, the complete Canon of the N. T., as commonly received at present, was ratified at the third Council of Carthage (A.D. 397), and from that time was accepted throughout the Latin Church (Jerome, Innocent, Rufinus, Philastrius), though occasional doubts as to the Epistle to the Hebrews still remained (Isid. Hisp. *Proœm.* § 85-109). It will be perceived that there was no dispute as to the authentic and inspired character of most of the books, and as to the remainder there exist very respectable testimonies even in this early age (see Table IV). See ANTILEGOMENA.

4. At the era of the Reformation the question of the N.-T. Canon again assumed great importance. The hasty decree of the Council of Trent, which affirmed the authority of all the books commonly received, called out the opposition of controversialists, who quoted and enforced the early doubts. Erasmus, with characteristic moderation, denied the apostolic origin of the *Epistle to the Hebrews*, *2 Peter*, and the *Apocalypse*, but left their canonical authority unquestioned (*Præf. ad Antilegom.*). Luther, on the other hand, with bold self-reliance, created a purely subjective standard for the canonicity of the Scriptures in the character of their "teaching of Christ," and while he placed the Gospel and first Epistle of John, the Epistles of Paul to the Romans, Galatians, Ephesians, and the first Epistle of Peter, in the first rank as containing the "kernel of Christianity," he set aside the *Epistle to the Hebrews*, *Jude*, *James*, and the *Apocalypse* at the end of his version, and spoke of them and the remain-

ing Antilegomena with varying degrees of disrespect, though he did not separate 2 *Peter* and 2, 3 *John* from the other Epistles (comp. Landerer, art. *Kanon* in Herzog's *Encyklop.* p. 295 sq.). The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers (Melancthon, *Centur. Magdeb.*, Flacius, Gerhard; comp. Reuss, § 334); and especially with a polemical aim against the Romish Church by Chemnitz (*Exam. Conc. Trid.* i, 73). But while the tendency of the Lutheran writers was to place the Antilegomena on a lower stage of authority, their views received no direct sanction in any of the Lutheran symbolic books which admit the "prophetic and apostolic writings of the Old and New Testaments" as a whole, without further classification or detail. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. Carlstadt, who was originally a friend of Luther and afterward professor at Zurich, endeavored to bring back the question to a critical discussion of evidence, and placed the Antilegomena in a third class "on account of the controversy as to the books, or rather (ut certius loquar) as to their authors" (*De Can. Script.* p. 410–12, ed Credn.). Calvin, while he denied the Pauline authorship of the *Epistle to the Hebrews*, and at least questioned the authenticity of 2 *Peter*, did not set aside their canonicity (*Præf. ad Hebr.*; *ad 2 Petr.*); and he notices the doubts as to *James* and *Jude* only to dismiss them.

5. The language of the Articles of the Church of England with regard to the N. T. is remarkable. In the Articles of 1552 no list of the books of Scripture is given; but in the Elizabethan Articles (1562, 1571) a definition of Holy Scripture is given as "the canonical books of the Old and New Testament, *of whose authority was never any doubt in the Church*" (Art. vi). This definition is followed by an enumeration of the books of the O. T. and of the Apocrypha; and then it is said summarily, without a detailed catalogue, "all the books of the N. T., as they are commonly received, we do receive and account them for canonical" (pro canonicis habemus). A distinction thus remains between the "canonical books" and such "canonical books as have never been doubted in the Church;" and it seems impossible to avoid the conclusion that the framers of the Articles intended to leave a freedom of judgment on a point on which the greatest of the Continental reformers, and even of Romish scholars (Sixtus Sen. *Biblioth. S.* i, 1; Cajetan, *Præf. ad Epp. ad Hebr., Jac.*, 2, 3 *John, Jud.*) were divided. The omission cannot have arisen solely from the fact that the Article in question was framed with reference to the Church of Rome, with which the Church of England was agreed on the N.-T. Canon, for all the other Protestant confessions which contain any list of books give a list of the books of the New as well as of the Old Testament (*Conf. Belg.* 4; *Conf. Gall.* 3; *Conf. Fid.* 1). But, if this license is rightly conceded by the Anglican Articles, the great writers of the Church of England have not availed themselves of it. The early commentators on the Articles take little (Burnet) or no notice (Beveridge) of the doubts as to the Antilegomena; and the chief controversialists of the Reformation accepted the full Canon with emphatic avowal (Whitaker, *Disp. on Scripture*, cxiv, p. 105; Fulke's *Defence of Eng. Trans.* p. 8; Jewel, *Defence of Apol.* ii, 9, 1).

6. The judgment of the Greek Church in the case of the O. T. was seen to be little more than a reflection of the opinions of the West. The difference between the Roman and Reformed churches on the N. T. were less marked; and the two conflicting Greek confessions confirm, in general terms, without any distinct enumeration of books, the popular Canon of the N. T. (Cyr. Luc. *Conf.* i, p. 42; Dosith. *Confess.* i, p. 467). The Confession of Metrophanes gives a complete list of the books, and compares their number—thirty-three—with the years of the Savior's life, that "not even the number of the sacred books might be devoid of a divine mystery" (Metroph. Critop. *Conf.* ii, 105, ed. Kimm. et Weissenb.). At present, as was already the case at the close of the 17th century (Leo Allatius, ap. Fabric. *Bibl. Græc.* v, App. p. 38), the Antilegomena are reckoned by the Greek Church as equal in canonical authority in all respects with the remaining books (*Catechism*, ut sup.).

V. *Authority of the present Canon of Scripture.*—1. The assaults which have been made, especially during the present century, upon the authenticity of the separate books of the O. and N. Test., are noticed under the special articles. The general course which they have taken is simple and natural. Semler (*Untersuch. d. Kan.* 1771–5) first led the way toward the later subjective criticism, though he rightly connected the formation of the Canon with the formation of the Catholic Church, but without any clear recognition of the providential power which wrought in both. Next followed a series of special essays, in which the several books were discussed individually, with little regard to the place which they occupy in the whole collection (Schleiermacher, Bretschneider, De Wette, etc.). At last an ideal view of the early history of Christianity was used as the standard by which the books were to be tried, and the books were regarded as results of typical forms of doctrine, and not the sources of them (F. C. Baur, Schwegler, Zeller). All true sense of historic evidence was thus lost. The growth of the Church was left without explanation, and the original relations and organic unity of the N. T. were disregarded.

2. In order to establish the Canon of Scripture, it is necessary to show that all the books of which it is composed are of divine authority; that they are entire and incorrupt; that, having them, it is complete without any addition from any other source; and that it comprises the whole of those books for which divine authority can be proved. It is obvious that, if any of these four particulars be not true, Scripture cannot be *the sole and supreme* standard of religious truth and duty. If any of the books of which it is composed be not of divine authority, then part of it we are not bound to submit to, and consequently, *as a whole*, it is not the standard of truth and morals. If its separate parts be not in the state in which they left the hands of their authors, but have been mutilated, interpolated, or altered, then it can form no safe standard; for, in appealing to it, one cannot be sure that the appeal is not made to what is spurious, and what, consequently, may be erroneous. If it require or admit of supplementary revelations from God, whether preserved by tradition or communicated from time to time to the Church, it obviously would be a mere contradiction in terms to call it *complete*, as a standard of the divine will. And if any other books were extant, having an equal claim, with the books of which it is composed, to be regarded as of divine authority, it would be absurd to call it the *sole* standard of truth, for in this case the one class of books would be quite as deserving of our reverence as the other.

3. Respecting the *evidence* by which the Canon is thus to be established, there exists considerable difference of opinion among Christians. Some contend, with the Romanists, that the authoritative decision of the Church is alone competent to determine the Canon; others appeal to the concurrent testimony of the Jewish and early Christian writers; and others rest their strongest reliance on the internal evidence furnished by the books of Scripture themselves. We cannot say that we are satisfied with any of these sources of evidence exclusively. As Michaelis remarks, the first is one to which no consistent Protestant can appeal, for the matter to be determined is of such a kind that, unless we grant the Church to be infallible, it is quite possible that she may, at any given period of her existence, determine erroneously; and one sees not why the question may not be as successfully investigated by a private individual as by a Church. The concurrent testimony of the ancient witnesses is invaluable as far as it goes; but it may be doubted if it be sufficient of itself to *settle* this question, for the question is not *entirely* one of facts, and testimony is good proof only for *facts*. As for the internal evidence, one needs only to look at the havoc which Semler and his school have made of the Canon, to be satisfied that where dogmatical considerations are allowed to determine exclusively such questions, each man will extend or curtail the Canon so as to adjust it to his own preconceived notions. As the question is one partly of fact and partly of opinion, the appropriate grounds of decision will be best secured by a combination of authentic testimony with the evidence supplied by the books themselves. We want to know that these books were really written by the persons whose names they bear; we want to be satisfied that these persons were commonly reputed and held by their contemporaries to be assisted by the Divine Spirit in what they wrote; and we want to be sure that care was taken by those to whom their writings were first addressed, that these should be preserved entire and uncorrupt. For all this we must appeal to the testimony of competent witnesses as the only suitable evidence for such matters. But, after we have ascertained these points affirmatively, we still require to be satisfied that the books themselves contain nothing obviously incompatible with the ascription to their authors of the divine assistance, but,

on the contrary, are in all respects favorable to this supposition. We want to see that they are in harmony with each other; that the statements they contain are credible; that the doctrines they teach are not foolish, immoral, or self-contradictory; that their authors really assumed to be under the divine direction in what they wrote, and afforded competent proofs of this to those around them; and that all the circumstances of the case, such as the style of the writers, the allusions made by them to places and events, etc., are in keeping with the conclusion to which the external evidence has already led. In this way we advance to a complete moral proof of the divine authority and canonical claims of the sacred writings. See EVIDENCES.

(1.) The external evidence of the several books, in turn, relates to three principal points: (*a*.) Their *genuineness;* in other words, the fact that we have the actual works which have heretofore been known by these names, without essential defect, corruption, or interpolation. This is the province of criticism (q. v.) to show, as has been done by an irrefragable chain of documentary testimony. (*b*.) Their *authenticity* (q. v.), or that they are the productions of the respective authors asserted or believed, which is a question wholly of historical investigation, aided by grammatical comparison; and this has been shown respecting the most of them in as positive a manner as in the case of any other equally ancient writings. (*c*.) Their *inspiration* (q. v.); the most essential point of the three is this relation, an element which, although confessedly obscure and difficult to adjust in every respect with their human features, especially in the absence of any similar experience in modern times, is yet capable of twofold proof: 1st, from statements and implication of revelation contained in the books themselves, showing that they are a divine communication; and, 2dly, from the concurrent voice of the ancient as well as modern body of believers. This last argument is undoubtedly the chief one, of an external character, that must be relied upon in defence of the authority of the Holy Scriptures, and it may well be claimed as a sufficient satisfaction to all rightly constituted minds, [1] that these books, both singly and as a whole, were so generally and early recognised as of divine authority by those who had the best opportunity to judge of their claims, by reason of proximity in time and place to their origin and intimacy with their authors, while, at the same time, they exhibited their caution and freedom from prejudice by rejecting many other more pretentious ones as unworthy their acceptance; and [2] that the universal Church, with few and unimportant exceptions, has ever since not only cordially acquiesced, but firmly retained, in the face of almost every conceivable effort that the ingenuity or force of those of an opposite opinion could bring to bear upon the question, the same traditionary persuasion; nor [3] has any really unanswerable difficulty yet been alleged in the way of such a belief.

(2.) With the external evidence furnished above in favor of the sacred Canon, the internal fully accords. In the Old Testament all is in keeping with the assumption that its books were written by Jews, sustaining the character, surrounded by the circumstances, and living at the time ascribed to their authors; or, if any apparent discrepancies have been found in any of them, they are of such a kind as farther inquiry has served to explain and reconcile. The literary peculiarities of the New Testament, its language, its idioms, its style, its allusions, all are accordant with the hypothesis that its authors were exactly what they profess to have been — Jews converted to Christianity, and living at the commencement of the Christian era. Of both Testaments the theological and ethical systems are in harmony, while all that they contain tends to one grand result — the manifestation of the power and perfection of Deity, and the restoration of man to the image, service, and love of his Creator. The conclusion from the whole facts of the case can be none other than that the Bible is entitled to that implicit and undivided reverence which it demands as the only divinely appointed *Canon* of religious truth and duty.

VI. *Literature.*—For the later period of the history of the N.-T. Canon, from the close of the second century, the great work of Lardner (*Credibility of the Gospel History*, in his *Works*, i-vi, ed. Kippis, 1788; also 1838, 10 vols. 8vo) furnishes copious materials. For the earlier period his criticism is necessarily imperfect, and requires to be combined with the results of later inquiries. Kirchhofer's collection of the original passages which bear on the history of the Canon (*Quellensammlung*, etc., Zürich, 1844) is useful and fairly complete, but frequently inaccurate. The writings of F. C. Baur and his followers often contain very valuable hints as to the characteristics of the several books in relation to later teaching, however perverse their conclusions may be. In opposition to them Thiersch has vindicated, perhaps with an excess of zeal, but yet, in the main, rightly, the position of the apostolic writings in relation to the first age (*Versuch zur Herstellung*, etc., Erlangen, 1845; and *Erwiederung*, etc., Erlang. 1846). The section of Reuss on the subject (*Die Gesch. d. heil. Schriften d. N. T.*, 2d ed. Braunschw. 1853; also in French, *Histoire du Canon*, Strasbourg, 1863, 8vo), and the article of Landerer (Herzog's *Encyklop.* s. v.), contain valuable summaries of the evidence. Other references and a fuller discussion of the chief points are given by Westcott in *The History of the Canon of the N. T.* (Cambr. 1855). In addition to the works named throughout this article, the following may also be consulted: Cosin, *Scholastical History of the Canon* (4to, London, 1657, 1672, 1683; also *Works*, iii; iv, 410); Du Pin, *History of the Canon and Writers of the Books of the Old and New Test.* (2 vols. folio, London, 1699, 1700); Ens, *Bibliotheca Sacra, sive Diatribe de Librorum Nov. Test. Canone* (12mo, Amstel. 1710); Storch, *Comment. Hist. Crit. de Libb. Nov. Test. Canone* (8vo, Fr. ad Vi. 1755); Schmid, *Hist. Antiq. et Vindicatio Canonis V. et N. Test.* (8vo, Lips. 1775); Jones, *New and full Method of settling the Canonical Authority of the New Test.* (3 vols. Oxf. 1827); Alexander, *Canon of the Old and New Test. ascertained* (12mo, Princeton, 1826; Lond. 1828, 1831); Stuart, *Old-Test. Canon* (12mo, Andover, 1845; Edinb. and Lond. 1849); Wordsworth, *Hulsean Lectures* (8vo, London, 1848); Gaussen, *Le Canon des Saintes écritures au double point de vue de la science et de la foi* (Lausanne, 1860, 2 vols.; Engl. translation, *The Canon of Scripture*, etc. [London, 1862, 8vo]); *Bibliotheca Sacra*, xi, 278; Credner, *Gesch. d. neutest. Kanon* (edit. Volkmar, Berlin, 1860); Hilgenfeld, *Kan. des N. T.* (Halle, 1863); Hofmann, *Die heiligen Schrift. d. N. T.*, etc. (Nördlingen, 1862, pt. i). See BIBLE.

Canon, ECCLESIASTICAL (*κανών*, *rule*, see the foregoing article, § i), a term used in various senses, as follows:

CANON, a clerical title.

1. The roll or church register in which, in the ancient Church, the names of the clergy were written was called the *canon;* and the clergy were hence called *canonici* (Bingham, *Orig. Eccl.* bk. i, ch. v, § 10). In Cyril (*Præf. Catech.* n. 3), the presence of the clergy is expressed by the words *κανονικῶν παρουσια*. See also CANONICÆ.

2. *Cathedral Canons.* — Chrodegangus, bishop of Metz, about A.D. 755, gave a common cloister-life law to his clergy, and thus originated the proper *vita canonica*, as attached to a cathedral church. (See CHAPTER.) Originally canons were only priests or inferior ecclesiastics who lived in community, residing near the cathedral church to assist the bishop, depending entirely on his will, supported by the reve-

nues of the bishopric, and living in the same house, as his counsellors or domestics. They even inherited his movables till A.D. 817, when this was prohibited by the Council of Aix-la-Chapelle. By degrees these communities of priests, shaking off their dependence, formed separate bodies, of which the bishops were still the head. In the tenth century there were communities of the same kind, established even in cities where there were no bishops: these were called collegiates, as the terms "college" and "congregation" were used indifferently. Under the second race of French kings the canonical life spread over the country, and each cathedral had its *chapter* distinct from the rest of the clergy (Farrar, s. v.). Benedict XII (1339) endeavored to secure a general adoption of the rule of Augustine by the canons, which gave rise to the distinction between *canons regular* (i. e. those who follow that rule) and *canons secular* (those who do not). See CANONS, REGULAR. As demoralization increased, the canonries were filled by younger sons of nobles, without ordination, for the sake of the revenues. The *expectancies* (q. v.) of canonries became objects of traffic, as advowsons (q. v.) now are in the English Church. The Reformation abolished most of the chapters and canonries in Germany: a few remain at Brandenburg, Merseburg, Naumburg, and Meissen.

In the Church of England, *canons* or *prebendaries* are clergymen who receive a stipend for the performance of divine service in a cathedral or collegiate church. See CHAPTER; DEAN.

CANON OF THE MASS (*canon Missæ*), a part of the mass or communion service of the Church of Rome. The office of the mass is divided into three parts: (1) from the introit to the preface; (2) which contains *the canon*, from the *Sanctus* to the time of communion; and (3) the thanksgiving. The second is considered the *essential* part, being that which contains the consecration of the elements. The Greeks call it ἀναφορά, probably because of the exhortation of the priest at the commencement to the people, *sursum corda*. In the Roman liturgy the canon begins at the words *Te igitur*, etc. In the Roman Church the form of the canon remains the same at every mass. It is sometimes, by ancient writers, called the actio. It is also known by the name *secreta*, or *secretum*, because the priest is ordered to say it in a low voice; and, according to Goar, the same practice is observed in the East. (See *Conc. Trident.* sess. 22, can. 9.)—Martene, *De ant. Rit.* i, 144; Landon, *Eccl. Dict.* s. v.; Procter *On Common Prayer*, 319. See MASS.

CANON LAW, CANONS OF DISCIPLINE, CANONS AND DECRETALS OF ROME. The canons or rules of discipline of the Romish Church form a body of law which has been accumulating for centuries. They are made up of the so-called Apostolical Canons, of decrees of councils, and of decrees and rules promulgated by the popes. The different collections of these are, 1. For the early ages, the so-called "Apostolical Canons," the Greek "Collections" in the *Codex Canonum*; 2. For the Middle Age, up to Gratian's time, a number of collections; 3. From the twelfth century onward, the decretals of Gratian, of Gregory IX, and Boniface VIII, the Clementines, the Extravagants, and the *Corpus Juris Canonici*.

I. *Early Ages.*—(I.) CANONS APOSTOLICAL, a collection of canons (in number seventy-six or eighty-five, according to the different methods of division), *not* to be attributed, as the name implies, to the apostles. Beveridge, in his *Codex Can. Eccl. Prim.*, seeks to show that these canons are the synodal rules and regulations made in councils anterior to the Council of Nicæa, in which view Petrus de Marca, Dupin, and others agree. Daillé (*De Pseudepigraphis Apostolicis*) considers them the work of the fifth century. That they are not of apostolical origin is very clear from the use in them of terms and mention of ceremonies quite unknown in the apostolic age, as well as from the fact that they were never even cited under the name of apostolical before the Council of Ephesus, if, indeed, we ought not, as some think, to read in the acts of that council, instead of "the canons of the apostles," "the canons of the fathers." Previously to this synod they are cited as *Canones Patrum*, *Canones antiqui* or *ecclesiastici*. Bellarmine and Baronius claim apostolical authority for only the first fifty canons. Pope Gelasius (*Distinct.* xv, can. *Sancta Romana*) plainly declares, *Liber Canonum Apostolorum apocryphus est*; but the authenticity of the passage is doubted. It is the opinion of Beveridge (*Cod. Canonum Eccles. Primitivæ*, Lond. 1678) that the Apost. Canons were enacted in different synods about the close of the second century and beginning of the third; and that the collection was made soon after, but since that time interpolated; and that the compiler of the collection cannot be ascertained. Dr. Schaff sums up the whole case in the following judicious passages: "The contents of the so-called Apostolical Canons are borrowed partly from the Scriptures, especially the Pastoral Epistles, partly from tradition, and partly from the decrees of early councils at Antioch, Neo-Cæsarea, Nice, Laodicea, etc. (but probably not Chalcedon, 451). They are therefore evidently of gradual growth, and were collected either after the middle of the fourth century or not till the latter part of the fifth, by some unknown hand, probably also in Syria. They are designed to furnish a complete system of discipline for the clergy. Of the laity they say scarcely a word. The eighty-fifth and last canon settles the canon of the Scripture, but reckons among the New Testament books two epistles of Clement and the genuine books of the pseudo-Apostolic Constitutions. The Greek Church, at the Trullan Council of 692, adopted the whole collection of eighty-five canons as authentic and binding, and John of Damascus even placed it on a parallel with the epistles of the apostle Paul, thus showing that he had no sense of the infinite superiority of the inspired writings. The Latin Church rejected it at first, but subsequently decided for the smaller collection of fifty canons, which Dionysius Exiguus, about the year 500, translated from a Greek manuscript."—Schaff, *Church History*, vol. i, § 114.

Although these canons have special reference to discipline, they are not entirely silent on the subject of dogmas, morals, and the ceremonial of worship. They clearly distinguish between the orders of bishop and priest, affirm the superiority of the former, speak of an altar and a sacrifice in the Church of Christ, and prescribe matters to be observed in the administration of baptism, the eucharist, penance, ordination, with many other things evincing a late date. They may be found in Labbei *Concilia*, vol. i, and in Cotelerii *Patr. Opera*, i, 199; also in Ultzen, *Constitutiones Apostolicæ* (Rostock, 1853, 8vo); in English, in Chase, *Constitutions and Canons of the Apostles* (New York, 1848, 8vo), and in Hammond, *Canons of the Church* (N. Y. 1844, p. 188 sq.). See Krabbe, *De Codice Canonum*, etc., translated by Chase, in *Bibliotheca Sacra*, iv, 1; Mosheim, *Commentaries*, cent. i, § 51; Bunsen, *Hippolytus* (Engl. transl. vols. v–vii); and the article CLEMENTINES.

(II.) *Greek Collections:* CODEX CANONUM. 1. The first mention of a *Codex Canonum* is found in the Acts of the Council of Chalcedon (A.D. 451), where a number of canons of previous councils (Nice, Ancyra, Antioch, Laodicea, and Constantinople) were approved. Other collections existed at the time, and others, again, followed, but none were considered as law for the whole Church. The so-called *Codex Canonum Ecclesiæ Universæ* (Book of the Canons) was first published by Justellus (Paris, 1610, 8vo), reproduced in the *Bibliotheca Juris Canon. Vet.*, op. *Voelli et Justelli* (Paris, 1661, vol. i), and also in Migne, *Patrol. Curs. Complet.* (Paris, 1848, vol. lxvii). It is not authentic; the title and arrangement are Justeau's, and the work is only

an unsuccessful attempt of his to make an authentic Greek Codex from the old collections and MSS.

2. In the fifth century we find the *Western Church* recognizing the authority of the Greek canons, and there are *three* principal collections of them, viz.:

(1) The *Spanish* or *Isidorian* (erroneously so called because found in Isidor of Seville's later collection). It contained the canons of Nice, Ancyra, Neo-Cæsarea, and Gangra. As to its date, we know for certain only this much, that this translation of the Nicene canons was known in Gaul A.D. 439 (*Concil. Regense*, c. 8), and that of the Ancyran canons was quoted in the *Concil. Epaonens*, A.D. 517. A later translation, adding the canons of Antioch, Constantinople, and Chalcedon to those above named, was compiled toward the end of the fifth century. It was first published from an Oxford MS. under the title *Codex Ecclesiæ Romanæ* (ed. Paschas. Quesnell, in *Opp. Leonis*, Par. 1675, t. ii.)

(2) The so-called *Versio* or *translatio prisca*, first published by Justellus in the *Bibliotheca jur. Canon*, i, 275, from an incomplete MS., and afterward, in more complete form, by Ballerini (*Opp. Leonis*, iii, 473).

(3) The translation and collection made by Dionysius Exiguus (q. v.), made probably at Rome toward the end of the fifth century. He afterward (about A.D. 510?) made a second collection, adding a number of papal decretals. These were merged into one, and the *codex* thus formed was generally accepted throughout the Church. Pope Adrian (A.D. 774) presented an enlarged copy of it to Charlemagne, and it became the basis of the French canon law. In this enlarged form it is designated as the *Adriano-Dionysian* Codex. It may be found in the *Biblioth. Jur. Can.* i, 101, and in Migne's *Patrol. Lat.* (Par. 1848, vol. lxvii).

II. *Middle Age.*—1. In *Africa* the Nicene canons were supplemented by those of native councils, especially of Carthage (q. v.). Fulgentius Ferrandus (q. v.), in 547, composed the *Breviatio Canonum*, adding African decisions up to 427: it was published by Pithou (Paris, 1588), and in Migne, *Patrolog.* (1848, vol. lxvii, p. 949). Cresconius, an African bishop, about 690 issued a *Concordia Canonum* (*Bibl. Jur. Can.* i, App. p. 33). 2. In *Spain* a Codex existed in the sixth century, which was afterward the basis of the pseudo-Isidorian Decretals. In the seventh century it assumed the form in which we know it (*Codex Canonum Eccl. Hisp.* (Madrid, 1808, fol.); and part ii. *Epistolæ decretales*, etc. *Rom. Pontificum* (Madrid, 1821, fol.). It contains canons of the Greek, African, French, and Spanish councils and synods, with Papal decrees from Damasus to Gregory I. It does not appear that Isidor of Seville really had any share in preparing the collection which, after the discovery of the fraudulent decretals (see PSEUDO-ISIDORIAN), was known by his name. A new edition of the fraudulent decretals appeared in 1863, viz. *Decretales Pseudo-Isidorianæ*, etc., ed. Paulus Hinschius (Leipsic, 2 vols. 8vo).

3. In the *British Islands* and in the *Anglo-Saxon* Church native canons prevailed, of which we have no early records. D'Achery has gathered the fragments of an *Irish* Codex of the eighth century in his *Spicilegium*, i, 491 sq., which contains Greek, African, Gallic, and Spanish canons, as well as native ones. See also Spelman, *Concilia, decreta, etc. in re eccl. orbis Britannici* (Lond. 1639-64, 2 vols. fol.).

4. In *France* the Spanish collection came into use in the eighth century, along with the Adriano-Dionysian mentioned above. In the ninth century many of the forged decretals from the pseudo-Isidorian collection were mingled with the authentic canons. The confusion led to several new collections: (1) *Canonum collectio*, in 381 titles, toward the end of the eighth century; (2) *Collectio Acheriana* (perhaps of the beginning of the ninth century); (3) the *Penitentialis* of bishop Halitgar of Cambray, A.D. 925. Besides these there were numerous small collections, called *Capitula Episcoporum*.

The great increase of the worldly power of the clergy under the Carlovingian dynasty necessitated more copious and complete collections of the canons. Among the more important we name (1) the *Collectio Anselmo dedicata* (883–897, 12 vols.), of Italian origin. It includes the pseudo-Isidorian decretals, and also the *Institutes of Justinian*, which for the first time now appear in the canon law collections. (2) Regini's *Libri duo de causis Synodalibus et discip. eccles.* was compiled about A.D. 906, and includes also some of the false decretals. It is important for its account of the acts of German councils. (3) Burchard's *Liber decretorum collectarium* (1012-1023), in 20 books. To strengthen the authority of certain canons, Burchard ascribes them to too early dates, and his errors, followed by Gratian, have been incorporated into later books. The nineteenth book, treating of penitential discipline, one of whose titles is *Consuetudines superstitiosæ*, throws much light on the state of society in that age. Several editions exist: the latest is in Migne, *Patrolog.* vol. 140 (Paris, 1853). (4) Important *manuscript* collections of the eleventh century are the *Collectio duodecim partium* (after 1028); that of *Anselm of Lucca* (died 1086), in 13 books; two collections of *cardinal Deusdedit*, each in 4 books (1086–1087), in which the valuable archives of the Lateran were employed. (5) To *Ivo of Chartres* (died 1117) two collections are ascribed, viz.: the *Decretum*, in 17 books, and the *Pannormia*, in 8 books, of which the former seems to be a collection of materials for the latter. They are given by Migne, *Patrolog. Lat.* vol. clxi. There are several other MS. collections of minor importance.

III. *From the Twelfth Century.*—1. *Gratian's.* The want of a collection containing all canons and decretals of general interest, omitting merely local ones, and having a good arrangement, began to be universal about the twelfth century. GRATIAN, a monk of the convent of St. Felix, in Bologna, undertook to supply it. His work is now known as the *Decretum Gratiani.* It was compiled from all preceding books and many MSS. It is divided into three parts. The first part is subdivided into 101 *Distinctiones*, and each of these into canons. Of the *distinctiones*, 81 relate to the clergy, and this part of the book is called by Gratian himself *Tractatus ordinandorum.* Part II contains 36 *causæ*, or points of law, subdivided into *questiones*, each of which is answered by *canones.* Part III, *De consecratione*, contains the sacraments, in five *Distinctiones.* In this work Gratian not only made a collection of the different canons in a certain order, but presented all the canons treating upon one subject under that head. The *decretum*, with all its shortcomings—for it was not yet a complete work—soon superseded all other collections. But what mostly helped to gain for this *decretum* its position is, that Gratian's comments and elucidations resulted in the formation of a new school of canonists and decretalists at Bologna. This made the *decretum* known to all the churches, and brought it into such high esteem that the popes themselves quoted it, though it was not received by them as an official codex.

2. *Other Collections before Gregory IX.*—The papal decretals after the twelfth century became so abundant on points of discipline that the collection of Gratian, however complete at first, soon ceased to be so, and new collections were made. We mention only the principal ones.

(1.) The *Breviarium extravagantium* of Bernardus of Pavia († bishop of Pavia 1213), compiled in 1190, and containing newer decretals not in Gratian's Decretum, and therefore called *extra decretum vagantes*, for which he made use of several minor collections posterior to Gratian, e. g. the *Appendix Concilii Lateranensis*, etc. His divisions under the titles *Index, Indicium, Clerus, Connubia* (Sponsalia), and *Crimen* were adopted in subsequent collections. The *Summa* of this work, written by Bernardus himself, was approved

of by the Bologna school. As this was the first collection of *Extravagantes*, it is known as *Volumen primum*, or *Compilatio prima*.

(2.) The compilation of *Petrus Collivacinus*, made by order of Innocent III, containing the decretals of Innocent during the first eleven years of his reign (1198-1210). It was approved by the Bologna canonists, and known as *Compilatio tertia*. The decretals of the popes, from Alexander III (1181) to Celestin III (1198), were compiled by Gilbertus and Alanus, two Englishmen, but were not received at Bologna until they were revised and completed by Johannes Gallensis, which was admitted and known as *Compilatio secunda*.

(3.) The *Compilatio quarta* was made after the fourth Lateran Council (1215), and contains the decretals of Innocent after 1210. These four compilations are given by Labbé, *Antiquæ collectiones decretalium cum Ant. August. et J. Cujacii not. et emend.* (Paris, 1609-1621).

3. *Decretal of Gregory IX.*—In 1230 Gregory IX directed his chaplain, Raymond of Pennaforte, to make a new collection of decretals, suppressing many superfluous parts of the old collections, and arranging the whole systematically. This *Decretalium Gregorii IX compilatio* was in 1234 sent by the pope to the University of Bologna, with the bull *Volentes igitur*, superseding the older compilations, although two of them had been published by popes. The new collection was introduced into university instruction as well as general practical use. Appendices and supplements were added by Innocent IV (1245), Alexander IV, Urban IV, Clement IV, and Gregory X.

4. *Decretal of Boniface VIII.*—In 1298 a new collection, including the post-Gregorian decretals, was published by Pope Boniface VIII under the title *Liber sextus*, because it was a completion of the five books of Gregory. After the publication of the *Liber sextus* Boniface issued a series of decretals (among which we find the celebrated *Unam sanctam* against Philip of France in 1302), as did also his successor, Benedict XI. These were united under the style of *Constitutiones extravagantium libri sexti*, with comments by cardinal Johannes Monachus.

5. *The Clementines.*—In 1313 Pope Clement V published *Liber septimus*, which included constitutions of the General Synod of Vienna (1311) and his own decretals, in five books, and sent it to the University of Orleans. Here he seems to have stopped its circulation, intending to replace it by a new collection, which was completed under his successor, John XXII, who sent it to the Universities of Paris and Bologna. It became a full authority in the Church, under the name *Clementines* (Constitutiones Clementinæ). With the Clementines the code of canon law, as such, may be said to have been completed, as "the power of the popes has not since been sufficient to give the force of law to their enactments throughout Christendom." Later laws have been added from papal decretals, decisions of Trent, etc., but they have never obtained *legal* authority.

6. *Corpus Juris Canonici.*—The *Decretum Gratiani*, Gregorian collection, *Liber sextus*, and *Constitutiones Clementinæ*, were afterward, however, collected under the joint appellation of CORPUS JURIS CANONICI. The Paris edition, edited by Chappuis (1499-1502), divides the *Extravagantes* into two parts; first, *Extravagantes Joannis P. XXII*, contains 20 decretals of John XXII, under 14 titles, arranged in the usual system; the second, or *Extravagantes communes*, embraces 74 decretals, from Urban IV (1261-1264) to Sixtus IV (1471-1484). There have been many editions of the *Corpus Juris Canonici;* among them may be named that of Lancelotti (Cologne, 1783, 2 vols. 4to); of Boehmer and Richter (Lips. 1839, 2 vols. 4to). The Paris edition of 1687 (2 vols. 4to) is much esteemed.

Petrus Matthews, of Lyon, compiled in 1590 a *Liber septimus decretalium*, in 5 vols., containing decretals from Sixtus IV to Sixtus V (1585-1590), and forming a sort of supplement to the *Extravagantes communes;* but the work was not sanctioned. Gregory XIII gave orders for the compilation of an authentic *Liber septimus*, which was completed under Clement VIII (1598). It contains the dogmatic decisions of the Synods of Florence and Trent, but was soon after withdrawn. No attempts have since been made to collect the decretals of the succeeding popes.

Prevalence of the Canon Law in Modern Times.—"The canon law, borrowing from the Roman civil law many of its principles and rules of proceeding, has at different times undergone careful revision and the most learned and scientific treatment at the hands of its professors, and was very generally received in those Christian states which acknowledge the supremacy of the pope; and it still gives ecclesiastical law, more or less, to Roman Catholic Christendom, although its provisions have in many countries been considerably modified by the *Concordats* (q. v) which the popes now and then find it expedient to enter into with Roman Catholic sovereigns and governments, whose municipal system does not admit of the application of the canon law in its integrity. Indeed, the fact of its main object being to establish the supremacy of the ecclesiastical authority over the temporal power is sufficient to explain why, in modern times, it is found to conflict with the views of public law and government, even in the case of the most absolute and despotic governments."

In the Protestant Church of Germany the canon law is still the basis of the common Church law. Luther burned the *Corpus Juris* at Wittenberg (Dec. 20, 1520); but, nevertheless, the canon law was afterward taught in the universities, and its rules as to benefices, marriage, etc., became the basis of ecclesiastical law in the German Protestant Church (Herzog, *Real-Encyklopädie*, s. v.). Calvin calls the legislation of the Roman Church "an overgrown and barbarous empire;" and maintains that Church laws bind the conscience only as they are Christ's laws (*Institutes*, bk. iv, ch. 10).

In England, the canon law, even in Roman Catholic times, never obtained so firm a footing as on the Continent. Hook (*Church Dictionary*, s. v. Canon) says that "as to the Church of England, even at that time, when the papal authority was at the highest, none of these foreign canons, or any new canons, made at any national or provincial synod here, had any manner of force if they were against the prerogative of the king or the laws of the land. It is true that every Christian nation in communion with the pope sent some bishops, abbots, or priors to those foreign councils, and generally four were sent out of England; and it was by those means, together with the allowance of the civil power, that some canons made there were received here, but such as were against the laws were totally rejected. Nevertheless, some of these foreign canons were received in England, and obtained the force of laws by the general approbation of the king and people (though it may be difficult to know what these canons are); and it was upon this pretence that the pope claimed an ecclesiastical jurisdiction, independent of the king, and sent his legates to England with commissions to determine causes according to those canons, which were now compiled into several volumes, and called *jus canonicum:* these were not only enjoined to be obeyed as laws, but publicly to be read and expounded in all schools and universities as the civil law was read and expounded there, under pain of excommunication to those who neglected. Hence arose quarrels between kings and several archbishops and other prelates who adhered to those papal usurpations. There was, however, a kind of national canon law in England, composed of *legatine* and *provincial* constitutions, adapted to the particular necessities

of the English Church. The legative constitutions were ecclesiastical laws enacted in national synods, held under the cardinals Otho and Othobon, legates from Pope Gregory IX and Pope Clement IV, in the reign of king Henry III, about the years 1220 and 1268. The *provincial* constitutions are principally the decrees of provincial synods, held under divers archbishops of Canterbury, from Stephen Langton, in the reign of Henry III, to Henry Chicheley, in the reign of Henry V, and adopted also by the province of York in the reign of Henry VI. At the dawn of the Reformation, in the reign of Henry VIII, it was enacted in Parliament that a review should be had of the canon law; and till such review should be made, all canons, constitutions, ordinances, and synodals provincial being then already made, and not repugnant to the law of the land or the king's prerogative, should still be used and executed. And as no such review has yet been perfected, upon this enactment now depends the authority of the canon law in England, the limitations of which appear, upon the whole, to be as follows: that no canon contrary to the common or statute law, or the prerogative royal, is of any validity; that, subject to this condition, the canons made anterior to the parliamentary provision above mentioned, and adopted in our system (for there are some which have had no reception among us), are binding both on clergy and laity; but that canons made since that period, and having no sanction from the Parliament, are, as regards the laity at least, of no force." See CANONS OF THE CHURCH OF ENGLAND.

Before the Reformation, degrees were as frequent in the canon law as in the civil law. Many persons became graduates in both, or juris utriusque doctores; and this degree is still common in foreign universities. But Henry VIII, in the twenty-seventh year of his reign, issued a mandate to the University of Cambridge to the effect that no lectures on canon law should be read, and no degree whatever in that faculty conferred in the university for the future. It is probable that Oxford received a similar prohibition about the same time, as degrees in canon law have ever since been discontinued in England (*Penny Cyclopædia*, vi, 244).

In Scotland, Presbyterian though the ecclesiastical system of that country be, the old Roman canon law still prevails to a certain extent. "So deep hath this canon law been rooted," observes Lord Stair, in his *Institutes of the Scotch Law*, "that even where the pope's authority is rejected, yet consideration must be had to these laws, not only as those by which Church benefices have been erected and ordered, but as likewise containing many equitable and profitable laws, which, because of their weighty matter, and their being once received, may more fitly be retained than rejected." In two old Scotch acts of Parliament, made in 1540 and 1551, the canon law is used in conjunction with the Roman law to denote the common law of the country, the expression used being "the common law, baith canon, civil, and statutes of the realme" (Chambers's *Encyclopædia*, s. v.).

In the United States the Roman Catholic Church is ruled by the Roman canon law, and also by the decrees of national and provincial councils, and by the regulations set forth by the bishops, subject to the revision of Rome.

Scolastique*, ii, 204 sq.; Cunningham, *Historical Theology*, vol. ii, ch. xv; Hagenbach, *Theol. Encyklopädie*, § 112; Walter, *Fontes juris Ecclesiastici* (Bonn, 1862); Boehmer, *Institut. Juris Canonici* (Hal. 1770, 5th ed.).

CANON OF THE CHURCH OF ENGLAND. The authority of the English canons rests upon "the statute 25 Henry VIII, commonly called the act of submission of the clergy, by which they acknowledged that the convocation had been always assembled by the king's writ; and they promised, *in verbo sacerdotis*, not to attempt, claim, or put in use, or enact, promulge, or execute any new canons in convocation without the king's assent or license. Then follows this enacting clause, viz.: That they shall not attempt, allege, or claim, or put in use any constitutions or canons without the king's assent." The first book of English canons was published in Latin in 1571, archbishop Parker and the bishops of Ely and Winchester being the principal agents in its construction, though "all the bishops in both provinces in synod, in their own persons or by proxy, signed it." These canons underwent various modifications, until, in 1604, bishop Bancroft collected a hundred and forty-one canons out of the articles, injunctions, and synodical acts passed and published in the reigns of Edward VI and Elizabeth, which were adopted by the Convocation of that year. These canons, which at first appeared in Latin, we have in English, under the title of "Constitutions and Canons Ecclesiastical." The code of canons was amplified in 1606, and finally completed by the addition of seventeen more in 1640. They do not constitute the law of the land, because they were not made pursuant to the statute 25 Henry VIII, since they were made in a convocation, sitting by the king's writ to the archbishops, after the Parliament was dissolved. After the Restoration, when an act was passed to restore the bishops to their ordinary jurisdiction, a proviso was made that the act should not confirm the canons of 1640. This clause makes void the royal confirmation. Hence we may conclude that canons should be made in a convocation, the Parliament sitting; that, being so made, they are to be confirmed by the sovereign; and that without such confirmation they do not bind the laity, much less any order or rule made by a bishop alone, where there is neither custom nor canon for it. See Burn, *Ecclesiastical Law*, App. to vol. iv. The canons are also given by Hammond, *The Definitions of Faith and Canons of Discipline*, etc. (New York, 1844, 12mo). See Cardwell, *Synodalia* (Oxford, 1842, 2 vols. 8vo); Hall, *Inquiry on the Canons and Articles* (London); Eden, *Church Dictionary*, s. v.; Hook, *Church Dictionary*, s. v. See ENGLAND, CHURCH OF.

CANON OF THE PROTESTANT EPISCOPAL CHURCH (of America), the law or discipline of that Church. The canons are of two kinds: (1.) "The constitution and canons of the General Convention, forming a code for the uniform government of every diocese and every church;" (2.) "The constitutions and canons of the several dioceses, of force only within their several precincts, and generally subordinate to the power of the General Convention." The canons are liable to be repealed or altered by the successive Conventions. They are given by Hammond, *Definitions of Faith and Canons of Discipline* (N. York, 1844, p. 283 sq.). There is also a *Digest of the Canons* by Dr. Hawks and Judge Hoffman (N. Y. 1860); see also Hoffman, *Treatise on the Law of the Protestant Episcopal Church* (N. York, 1850); *Digest of the Canons for the Government of the Protestant Episcopal Church*, adopted in the General Conventions of 1859, 1862, and 1865 (Boston, 1866, 8vo). See PROTESTANT EPISCOPAL CHURCH.

CANON REGULAR, a class of monastic orders in the Roman Catholic Church. The class comprises those canons (q. v.) who not only live in common, and under the same rule, but also bind themselves by either simple or solemn vows, and who therefore really constitute what is called in the Roman Church a "religious" order (see ORDER, RELIGIOUS). The "canons" owe their origin to Chrodegang (q. v.), who established them on a monastic basis; but after the tenth century the common life began to cease among a large portion of them. In the eleventh and twelfth centuries many

attempts were made to restore their monastic character, and a number of congregations were founded. The most important among them were the Premonstratenses (q. v.), the congregation of St. Genoveva (q. v.), St. Rufus (q. v.), and of St. Victor (q. v.) in France, the Gilbertine canons (q. v.) in England, and the canons of the Holy Cross, or sometimes also called canons of the Holy Sepulchre, at Jerusalem. All the congregations followed either the rule of St. Augustine, or composed their rule out of those of Augustine and Benedict. They were very numerous in England, where they were introduced about 1105, and where they had, at the time of their dissolution, 175 houses (including those of the canonesses). Their habit was a long black cassock, with a white rochet over it, and over that a black cloak and hood. In 1519 cardinal Wolsey undertook the reformation of all the congregations of regular canons existing in England, in virtue of a bull of Leo X. He ordered them to hold general chapters every third year, and to restore a rigid discipline. A few years after they were suppressed, together with all other English monasteries. In Ireland the regular canons were so numerous that they counted as many houses as all other orders together. One of the most celebrated reformers of the order in France was bishop Ivo of Chartres († 1115); yet he did not found an independent congregation. *The Congregation of St. Lawrence*, near Oulx, in the Dauphiné, which was founded in 1050 by Gerard Charbrerius, spread especially in Savoy and south-eastern France. At the end of the eighteenth century they had nearly disappeared. The superior of the monastery of St. Lawrence, which still existed, bore the title of provost, possessed episcopal jurisdiction in his provostry, and was only dependent on the pope. *The Congregation of Marbach*, in Alsace, was established about 1100 by Manegold de Lutembach, and is said by some writers to have had, at one time, about 300 monasteries. Very numerous was the *Congregation of Arouaise*, established about the same time by three hermits, one of whom was made a cardinal. It spread over England, Scotland, Flanders, and Poland. A reformed congregation of the *Regular Canons of Lorraine* (called the "Congregation of our Saviour") was established by Pierre Fourier in 1624, but many of the other congregations refused to recognize it. The most celebrated and numerous of the congregations in Italy, next to that of Lateran (see LATERAN), was the *Congregation of our Saviour (of Bologna)*, founded by Stephen Cioni in 1408, which possessed, in the eighteenth century, three monasteries in the city of Rome. Few orders of the Roman Church have been oftener and more generally pervaded by gross abuses and corruptions than the regular canons. The greater number of the French congregations were extinguished by the French Revolution. A new congregation of regular canons "of the Sacred Heart" (generally called, after the street in Paris in which they had their first house, the Congregation of *Picpus*) was founded in 1823 by abbé Coudrin (see PICPUS, Congregation of). See Helyot, *Ordres Religieux*, i, 761 sq.; Fehr, *Geschichte der Mönchsorden*, i, 55 sq.; ii, 27 and 408.

Canon Regular of England.

Canonesses (*Canonissæ*), a class of female orders in the Roman Church, organized after the model of the regular canons (q. v.), observing the rule of St. Augustine, and living in common. They are first found in the seventh century. They took no solemn vows, but were to remain unmarried, were generally governed by an abbess, and were under the spiritual direction of the canons. These female societies, like the canons (q. v.), fell into irregularities; gave up the common life, and their property fell mostly into the hands of the nobility, who provided for some of their daughters by canonical livings. Reformed congregations were frequently instituted, sometimes following the reformed congregations of the canons, sometimes being independent of them. Reformatory movements were particularly extensive at the close of the twelfth century, when the Beghards (q. v.) and Beguines (q. v.) made their appearance in many towns of the Netherlands. Those who did not bind themselves by a monastic rule were called secular canonesses (*Canonissæ seculares*, or also *Domicellæ*), and they were almost exclusively found in the institutions of noble ladies. Many of them married and then resigned their benefices. The Reformation in Germany did not abolish the houses of the canonesses, but changed most of them into asylums for the unmarried daughters of the Protestant nobility. Celebrated houses ("stifter") of this class were at Gandersheim, Herford, Quedlinburg, Gernrode, etc., and after their model even new Protestant houses were founded at Halle, Altenburg, Frankfort, and in other places, especially in Mecklenburg and Westphalia. See Helyot, *Ordres Religieux* (Paris, 1847), i, 789.

Canonicæ, virgins who devoted themselves to the celibate before the monastic life was known, and therefore before there were monasteries to receive them; and called *canonicæ* (canonical virgins), because their names were enrolled in the canon or *matricula* of the Church, that is, in the catalogue of ecclesiastics. They differed from the monastic virgins in this, that they lived privately in their fathers' houses, and had their maintenance from them, or, in case of necessity, from the Church; but the others lived in communities, and upon their own labor; so that it is now out of dispute, says Bingham, that, as the ascetics for the first three hundred years were not monks, so neither were the sacred virgins of the Church nuns confined to a cloister, as in after ages.—Bingham, *Orig. Eccl.* bk. vii, ch. iv, § 1.

Canonical hours, certain stated hours of the day assigned to prayer and devotion. Such are Nocturns, Matins, Lauds, Nones, Vespers, and Complini. It is not known at what period these hours were settled in the early Church. The Apostolical Constitutions direct prayers to be said at dawn, and at the third, sixth, and ninth hours, as well as at evening. In England the canonical hours are from eight to twelve in the forenoon, before or after which marriage cannot lawfully be performed in any church.—Bingham, *Orig. Eccles.* bk. xiii, ch. ix, § 8; Procter *On Common Prayer*, p. 10. See BREVIARY.

Canonical obedience is that submission which, by the ecclesiastical laws, inferior clergy are to pay to their bishops, and members of religious orders to their superiors.

Canonist, a professor of, or a writer upon, the Canon Law (q. v.).

Canonization, in the Roman and Greek churches, the act and ceremony of proclaiming a deceased person who has previously been *beatified* (see BEATIFICATION) a saint, and enrolling such a one in the catalogue of saints to be honored. In the Roman Church this is done by the pope only, who, after examination, "declares the person in question to have led a perfect life, and that God hath worked miracles at his intercession, either during his life or after his death, and that, consequently, he is worthy to be honored as a saint, which implies permission to exhibit his relics, to

invoke him, and to celebrate mass and an office in his honor." In the *Greek* Church the ceremony of canonization takes place only in the presence of the patriarch, who, having assembled his bishops for this purpose in synod, causes the testimonies of the witnesses in favor of the person to be canonized to be examined. A thousand witnesses are required. The trouble and expense incident to this process are so great that canonizations in the East are few.

Anciently the reverence due to "saints" was thought to be fulfilled by putting the name of the saint on the Sacred Diptychs, or *Album Sanctorum*, or erecting oratories or churches under the invocation of the saint. "Canonization in the Roman sense was not known before the tenth century, but some hold that the first canonization was celebrated by Leo III, A.D. 804; and, from the close correspondence of its ceremonies with those which were performed at the apotheosis or deification of the ancient Romans, it is with great probability supposed to derive its origin thence. In consequence of the multiplication of saints during the Dark Ages, the canonizing of any deceased Christians was prohibited by a solemn ordinance in the ninth century, unless it were done with the consent of the bishop. This edict occasioned a new accession of power to the Roman pontiff, as it ultimately vested in him the exclusive right of canonizing whomsoever he pleased. John XV was the first pope who exercised this assumed right, and who, in the year 995, with great formality, enrolled Udalric, bishop of Augsburg, among the number of the saints. Before a beatified person can be canonized four consistories are held. In the first the pope causes the petition of the parties requesting the canonization to be examined by three auditors of the rota, and directs the cardinals to revise all the necessary instruments; in the second the cardinals report the matter to the Roman pontiff; in the third, which is a public consistory, the cardinals pay their adoration to the pope. One person, called the devil's advocate, says all he can against the person to be canonized, raises doubts on the genuineness of the miracles said to be wrought by him, and exposes any want of formality in the procedure. It is said that the ingenuity and eloquence of the devil's advocate nearly prevented the canonization of cardinal Borromeo in the seventeenth century. But another advocate makes a pompous oration in praise of the person who is to be created a saint, in which he largely expatiates on the miracles said to have been wrought by him, and even pretends to know from what motives he acted. In the fourth and last consistory, the pope, having convened all the cardinals, orders the report concerning the deceased to be read, and then proceeds to take their votes, whether he is to be canonized or not. Previously to pronouncing the sentence declaring the beatified party to be a saint, the pope makes a solemn protestation that, by this act of canonization, he does not intend to do anything contrary to faith, or to the Catholic [Romish] Church, or to the honor of God. On the day appointed for the ceremony the church of St. Peter at Rome is hung with tapestry, on which are emblazoned the arms of the pope, and of the sovereign or prince who desires the canonization, and is also brilliantly illuminated. Thousands of devout members of the Romish communion fill that capacious edifice, eager to profit by the intercessions of the new saint with the Almighty. During the ceremony of canonizing, the pope and cardinals are all dressed in white. The expenses, which are very considerable, are defrayed by the royal or princely personage at whose request the beatified person is enrolled among the saints. The cost of canonizing the saints Pedro de Alcantara and Maria Maddalena di Pazzi, under the pontificate of Clement IX, amounted to sixty-four thousand scudi" (or dollars) (Eadie, *Eccles. Dict.* s. v.). No person can be canonized until at least fifty years after death, nor if he be believed to have passed into purgatory, nor if he be a baptized infant dead before reaching years of discretion, except in cases of martyrdom. The act of *beatification* precedes that of canonization. See BEATIFICATION.

The worship of "canonized saints" is enjoined by the Council of Trent (Sess. xxv, *De invocatione*, etc.). Many Romanists have declared against this superstition; and the Protestant churches reject it as idolatrous. Canonization is a relic of Paganism. In the thirteenth century a Dualist came very near being canonized. In 1269 there died at Ferrara a wealthy citizen, Armanno Pungilovo, whose extraordinary charities endeared him to the poor, while his austere and exemplary life procured him a general reputation of sanctity. He was buried in the cathedral, in the presence of an immense crowd, who lamented their benefactor; and such was the public veneration that miracles were soon wrought, or appeared to be, on the spot where he was buried. An altar was built over his remains, and statues were erected in his honor throughout the churches of the diocese. The bishop and chapter of Ferrara proceeded to an investigation of the miracles wrought at his tomb, as a preliminary step to applying for his canonization, and professed themselves satisfied of the veracity of persons who testified that they had themselves been cured—some of blindness, others of paralysis. What was the general consternation when the Dominican Aldobrandini, inquisitor general of Lombardy, brought forward irresistible evidence that the deceased was a member of the Catharists (q. v.); that his house had been for years the asylum of their teachers; and that he had both received and administered the *consolamentum* (q. v.). The clergy of Ferrara were slowly and unwillingly convinced, the people not at all; but, after repeated investigations, and a delay of more than thirty years, those remains, which had well-nigh been proposed to the adoration of the faithful, were dug up with ignominy and burned to ashes. See Heilmann, *Consecratio Santorum*, etc. (Hal. 1754, 4to); Elliott, *Delineation of Romanism*, bk. iv, ch. iv; Hurd, *Religious Rites and Ceremonies*, 244; Ferraris, *Promta Bibliotheca*, s. v. Veneratio Sanctorum, ix, 119 sq.; Chemnitius, *Examen Concil. Trident.* pt. ii, loc. 6; pt. iii, loc. 4; Herzog, *Real-Encyklopädie*, vii, 326; Eadie, *Eccl. Dictionary*, s. v.; Hook, *Ch. Dictionary*, s. v.

Canopy (κωνωπεῖον, from κώνωψ, a *gnat*; Vulg. *conopeum*): (1) In the O. T. the term employed for the hanging of the couch of Holofernes (Judith x, 21; xiii, 9; xvi, 19), where alone it occurs in the Bible, although, perhaps, from the "pillars" of the litter described in Cant. iii, 10, it may be argued that its equipage would include a canopy. It probably retained the mosquito-nets or curtains in which the name originated, although its description (Judith x, 21) betrays luxury and display rather than such simple usefulness. Varro (*R. R.* ii, 10, 8) uses the term (*quæ in conopeis jacent*) of languid women very much as the book of Judith (ἀναπαυόμενος . . . ἐν τῷ κωνωπείῳ) describes the position of a luxurious general. (For farther classical illustration, see Smith, *Dict. of Ant.* s. v. Conopeum.) It might possibly be asked why Judith, whose business was to escape without delay, should have taken the trouble to pull down the canopy on the body of Holofernes? Probably it was an instance of the Hebrew notion that blood should be instantly covered (comp. 2 Sam. xx, 12; Levit. xvii, 13) [see BLOOD], and for this purpose the light bedding of Syria was inadequate. See BED. Tent furniture also is naturally lighter, even when most luxurious, than that of a palace, and thus a woman's hand might unfix it from the pillars without much difficulty.

(2) In ecclesiastical use, see BALDACHIN.

Canstein, KARL HILDEBRAND, *Baron von*, was born Aug. 15, 1667, at Lindenburg, in Germany, studied law at Frankfort on the Oder, travelled much in

Europe, and in 1688 was appointed page of the elector of Brandenburg. He afterward served as a volunteer in the Netherlands. A dangerous sickness obliged him to leave the military service, and led him to a religious life, in which he was greatly helped by Spener (q. v.). His wish to spread the Bible among the poor led him to form the idea of printing it with stereotype plates. Thus originated the famous institution, called in German *Die Cansteinsche Bibelanstalt.* He lived to see 100,000 Testaments and 40,000 Bibles sold from the establishment. It is still continued on a very large scale; the books are furnished at cost prices (about twenty-five cents for the Bible and eight for the Testament). Up to 1854, 4,612,000 Bibles and 2,630,000 Testaments had been sold. He edited a *Harmonie der 4 Evangelisten* (2d ed. 1727, fol.), and also wrote *Lebensbeschreibung Speners* (Life of Spener), the edition of which by Lange, 1740, contains a biography of Canstein, who died at Halle, Aug. 19, 1719. See also Niemeyer, *Geschichte der Cansteinschen Bibelanstalt* (Halle, 1827, 8vo); Plath, *Leben von Canstein* (1861, 8vo); Bertram, *Geschichte der Cansteinschen Bibelanstalt* (1863, 8vo); *Jahrbücher f. Deutsche Theologie*, ix, 392. — Hoefer, *Nouv. Biog. Générale*, viii, 510; Herzog, *Real-Encyklopädie*, ii, 552.

Canterbury (*Cantuaria Dorobernum*), the capital of the county of Kent, a cathedral city and the seat of an archbishop, who is the metropolitan of all England. It is 56 miles from London, E.S.E., on the road to Dover. When Augustine became archbishop of this see, A.D. 597, king Ethelbert granted his palace here to the archbishop and his monks, who thereupon began to build a monastery, converting an ancient church in the neighborhood (said to have been used by the Roman Christians) into his cathedral church. Cuthbert, the eleventh archbishop, A.D. 740, added a church to the east of this. In the course of ages it received numerous additions, until it assumed its present magnificent form. Among those who helped to repair, enlarge, and rebuild it were archbishops Odo (A.D. 940), Lanfranc (1070), and Anselm (1093). In 1174 the choir was destroyed by fire, and in order to the rebuilding of it a number of French and English artificers were summoned. Among the former was a certain William of Sens, and to him, a man of real genius, the work was intrusted. The church was rich in relics: Plegemund had brought hither the body of the martyr Blasius from Rome; there were the relics of St. Wilfred, St. Dunstan, and St. Elphege; the murder of Thomas Becket (q. v.) took place in the north transept. Dec. 29, 1170. The total exterior length of the cathedral is 545 feet, by 156 in breadth at the eastern transept. The crypt is of greater extent and loftier—owing to the choir being raised by numerous steps at the east end—than any other in England. The archbishop of Canterbury is primate of all England, metropolitan, and first peer of the realm. He ranks next to royalty, and crowns the sovereign. His ecclesiastical province includes all England, except the six northern counties. Among his privileges, he can confer degrees in divinity, law, and medicine. His seats are at Lambeth and Addington Park. He is patron of 149 livings. The present archbishop is Charles Thomas Longley, translated to the see in 1862.—Landon, *Eccl. Dictionary*, s. v.; Chambers, *Encyclopædia*, s. v.

Canthărus (a *cup* or *pot*). In the atrium of ancient churches there was commonly a fountain or cistern, in which worshippers could wash their hands and faces before entering the church. Eusebius says that in the court over against the church were placed fountains (κρῆναι) of water, as symbols of purification, for such to wash as entered into the church (*De Orat.* c. xi). Paulinus, bishop of Nola, calls this fountain *cantharus* (*Epist.* xii, *ad Sever.*). In some places, according to Dufresne, the fountain was surrounded with lions, from whose mouths water spouted; whence the place is also called by some ecclesiastical writers *leontarium.* It is also called *nymphæum*, κολυμβεῖον, both of which signify a fountain. Tertullian exposes the absurdity of men going to prayers with washed hands while they retained a filthy spirit and polluted soul. Some of the Roman Catholic writers pretend to justify their use of holy water from the existence of this ancient custom. It is, however, more probable that it owes its origin to the Grecian rite called περιῤῥαντήρια, or *lustral sprinklings.*—Bingham, *Orig. Eccles.* bk. viii, ch. iii, § 6, 7.

Canthēras (Κανθηράς), a person mentioned by Josephus (*Ant.* xx, 1, 3) as having been deposed from the Jewish high-priesthood by Herod, king of Chalcis, to make room for Joseph, the son of Canu, A.D. 45; he is elsewhere (*Ant.* xix, 6, 2) identified with the Simon (q. v.) who had before enjoyed that honor, as the son of (Simon, the son of) Boëthius, father-in-law of Herod the Great (*Ant.* xv, 9, 3). See High-priest.

Canticle (*song*), applied commonly to sacred songs chanted in the Church, such as the *Benedicite.*

Can'ticles, or Solomon's Song (called in ver. 1 *Shir hash-Shirim'*, שִׁיר הַשִּׁירִים, *Song of the Songs*, a Heb. superlative; Sept. ᾆσμα ἀσμάτων, Vulg. *Canticum Canticorum*), entitled in the A. V. "The Song of Solomon." No book of the O. T. has been the subject of more varied criticism, or been more frequently selected for separate translation than this little poem. It is one of the five *megilloth* or rolls placed in most Jewish MSS. of the Scriptures immediately after the Pentateuch, but in the Heb. printed copies it constitutes the fourth of the *Ketubim* or *Hagiographa* (q. v.). (See Davidson in Horne's *Introd.* new ed. ii, 790 sq.) See Bible.

I. *Author and Date.*—By the Hebrew title it is ascribed to Solomon; and so in all the versions, and by the majority of Jewish and Christian writers, ancient and modern. In fact, if we except a few of the Talmudical writers (*Baba Bathra*, R. Moses Kimchi; see Gray's *Key*), who assigned it to the age of Hezekiah, there is scarcely a dissentient voice down to the close of the last century. More recent criticism, however, has called in question this deep-rooted and well-accredited tradition. Among English scholars Kennicott, among German Eichhorn and Rosenmüller, regard the poem as belonging to the age of Ezra and Nehemiah (Kennicott, *Diss.* i, p. 20-22: Eichhorn, *Isagogen in V. T.* pt. iii, § 647, p. 531 sq., 2d ed.; Rosenm. *Schol. in V. T.*) Kennicott based his opinion upon the uniform insertion of the י in all the copies, in the name of David (דויד). The name, however, occurs only once (iv, 4); and the insertion of the letter in this solitary instance is easily accounted for by a supposed error in transcription. At any rate, the insertion of the י would not bring the Canticles so far down as the time of Ezra, since we find the same peculiarity in Hos. iii, 5, and Amos vi, 5 (Gesenius, *Thesaur.* s. v.) The charge of Chaldaism has been vigorously pressed by Rosenmüller, and especially by Eichhorn. But Gesenius (*Heb. Gr.* § 2) assigns the book to the golden age of Hebrew literature, and traces "the few solitary Chaldaisms" which occur in the writings of that age to the hands of Chaldee copyists. Gesenius has moreover suggested an important distinction between Chaldaisms and *dialectic* variations indigenous to Northern Palestine, where he conjectures that Judges and Canticles were composed. The application of this principle is sufficient to eliminate most of the Chaldaisms alleged by Eichhorn (e. g. שֶׁ for אֲשֶׁר); while the occurrence of similar forms in Phœnician affords an indication of other intrusive forces besides the Aramæan acting upon the Biblical Hebrew. Nor is the suggestion of Gesenius that the book was written in Northern Palestine, and consequently tinged with a local coloring, inconsistent with the opinion which places it among the "one thousand and five" songs of Solomon (1 Kings iv, 32).

Comp. 1 Kings ix, 19 with 2 Chron. viii, 6, where the buildings of Lebanon are decidedly contrasted with those of Jerusalem, and are not, therefore, to be confounded with the "house of the forest of Lebanon" (1 Kings vii, 2), which was probably in Jerusalem. By a farther comparison of these passages with Robinson (*Bibl. Res.* iii, 441), who describes remains of massive buildings as still standing on Lebanon, it will appear probable that Solomon had at least a hunting-seat somewhere on the slopes of that mountain (comp. Cant. iv. 9). In such a retreat, and under the influence of its scenery, and the language of the surrounding peasantry, he may have written Canticles. Artistically this would have been in keeping with the general conditions of pastoral poetry. In our own language such compositions are not unfrequently accommodated to rustic ideas, and sometimes to provincial dialects. If, moreover, it should be urged that Chaldaisms are not provincialisms, it may be replied that Solomon could scarcely be ignorant of the Aramæan literature of his own time, and that he may have consciously used it for the purpose of enrichment (Gesen. *Heb. Gr.* § 2, 4).

The title, though it is possibly too flattering to have come from the hand of Solomon, must have existed in the copy used by the Sept., and consequently can lay claim to a respectable antiquity. The moral argument put forward by the supporters of the most recent literal interpretation, and based upon the improbability of Solomon's criminating himself (see below), is not very conclusive. Even on the theory of those interpreters his conduct might be traced to a spirit of generous self-accusation; and, at any rate, it need not be exalted above the standard which was likely to flourish in the atmosphere of a court such as his. On the whole, then, it seems unnecessary to depart from the plain meaning of the Hebrew title.

Supposing the date fixed to the reign of Solomon, great ingenuity has been employed by the Rabbinical and some Christian writers in determining at what period of that monarch's life the poem was written (see Poli *Synops.* Præf. ad Cant.). The point at issue seems to have been whether Solomon ever repented after his fall. If he did, it was contended that the ripeness of wisdom exhibited in the Song seemed the natural growth of such an experience; if he did not, it was urged that no other than a spiritually-minded man could have composed such a poem, and that therefore it must have been written while Solomon was still the cherished of God. Then, again, it was a mooted point whether the composition was the product of Solomon's matured wisdom, or the fresh outburst of his warm and passionate youth; whether, in fact, the master element of the poem were the *literal* form or the *allegorical* meaning. In either view of its interpretation, however, the only historical occasion in the life of Solomon for a poem like this is his marriage with the daughter of Pharaoh, B.C. 1008 (1 Kings iii, 1); a reference that is strongly corroborated by the probable date of Psalm xlv, which indeed may be regarded as the *key* of the Canticles themselves. An old commentator (Woken, Wittemb. 1729) holds that the bride was "Nicaule," the queen of Sheba, and that she formed a connubial intimacy with Solomon during her stay in Palestine. See SOLOMON.

II. *Form.*—This question is not absolutely determined by the Hebrew title. The rendering of שִׁיר הַשִּׁירִים, mentioned by Simonis (*Lex. Heb.*), "series of songs" (comp. σειρά, chain), and adopted by Paulus. Good, and other commentators, can scarcely compete with that of Gesenius, "Song of Songs, i. e. the most beautiful of songs" (comp. Psa. xlv, 1, שִׁיר יְדִידֹת, "a delightful song;" comp. also Theocr. *Idyl.* viii, προσφιλὲς μέλος). The non-continuity which many critics attribute to the poem is far from being a modern discovery (comp. the Lat. "Cantica canticorum," and the Chaldee paraphrase, "the songs and hymns which Solomon, the prophet, the king of Israel, uttered in the spirit of prophecy before the Lord"). Ghislerius (16th century) considered it a drama in five acts. One of the first separate translations published in England is entitled "The Canticles, or Balades of Solomon, in English metre" (1549); and in 1596 appeared Solomon's Song in eight eclogues, by J. M. [Jervase Markham]; the number of eclogues in this latter production being the same as that of the idylls into which the book was afterward divided by Jahn. Down to the 18th century, however, the Canticles were generally regarded as continuous.

Gregory Nazianzus calls it "a bridal dramatic song" (νυμφικὸν δρᾶμά τε καὶ ᾆσμα). According to Patrick, it is a "pastoral eclogue" or a "dramatic poem;" according to Lowth, "an epithalamium, or ὀαριστύς nuptialis of a pastoral kind." Michaelis and Rosenmüller, while differing as to its interpretation, agree in making it continuous, "carmen amatorium." A modified continuity was suggested by Bossuet, who divided the Song into seven parts, or scenes of a pastoral drama, corresponding with the seven days of the Jewish nuptial ceremony (Lowth, *Prælect.* xxx). Bossuet is followed by Calmet, Percy, Williams, and Lowth; but his division is impugned by Taylor (*Fragm. Calmet*), who proposes one of six days, and considers the drama to be *post-nuptial*, not *ante-nuptial*, as it is explained by Bossuet. (See below.) The entire nuptial theory has been severely handled by J. D. Michaelis, and the literal school of interpreters in general. Michaelis attacks the first day of Bossuet, and involves in its destruction the remaining six (*Not. ad Lowth Præl.* xxxi). It should be observed that Lowth makes it a drama, but only of the *minor* kind, i. e. dramatic as a dialogue, and therefore not more dramatic than an idyll of Theocritus or a satire of Horace. The fact is that he was unable to discover a plot; and it seems clear that if the only dramatic element in Canticles be the dialogue, the rich pastoral character of its scenery and allusions renders the term *drama* less applicable than that of *idyll*. Bossuet, however, extravagantly claims it as a regular drama, with all the proprieties of the classic model; and if with Lowth we recognise a chorus completely sympathetic and assistant, it is difficult to see how we can avoid calling the poem a drama: but in all the translations of the *allegorical* school which are based upon the dramatic idea, the interference of the chorus is so infrequent or so indefinite, the absence of anything like a dramatic progress and development sufficient to enlist the sympathy of a chorus is so evident, that the strongly-marked *idyllic* scenery could not far outweigh the scarcely perceptible elements of dramatic intention. The idyllic theory is confirmed by the use of a similar form among the Arabians, under the name of "Cassides" (Sir W. Jones, *Pces. As. Comment.* iii).

By the reactionary allegorists, of whom Rosenmüller may be considered the representative, the Song of Solomon has either been made absolutely continuous, or has been divided with reference to its spiritual meaning rather than its external form (e. g. Hengstenberg and Prof. Burrowes).

The supposition that the Canticles supplied a model to Theocritus seems based on merely verbal coincidences, such as could scarcely fail to occur between two writers of *pastoral* poetry (comp. Cant. i, 9; vi, 10, with Theocr. xviii, 30, 36; Cant. iv, 11, with Theocr. xx, 26, 27; Cant. viii, 6, 7, with Theocr. xxiii, 23-26; see other passages in Pol. *Syn.*; Lowth, *Præl.*; Gray's *Key*). In the essential matters of *form* and of *ethical* teaching the resemblance does not exist.

III. *Meaning.*—The schools of interpretation may be divided into three: the *mystical*, or *typical*; the *allegorical*, and the *literal*.

1. The *mystical* interpretation is properly an offshoot of the *allegorical*, and probably owes its origin to the

necessity which was felt of supplying a *literal* basis for the speculations of the allegorists. This basis is either the marriage of Solomon with Pharaoh's daughter, or his marriage with an Israelitish woman, the Shulamite. The former (taken together with Harmer's variation) was the favorite opinion of the mystical interpreters to the end of the 18th century: the latter has obtained since its introduction by Good (1803). The mystical interpretation makes its first appearance in Origen, who wrote a voluminous commentary upon the Canticles. Its literal basis, minus the mystical application, is condemned by Theodoret (A.D. 420). It reappears in Abulpharagius (1226-1286), and was received by Grotius. As involving a literal basis, it was vehemently objected to by Sanctius, Durham, and Calovius, but approved of and systematized by Bossuet, indorsed by Lowth, and used for the purpose of translation by Percy and Williams. The arguments of Calovius prevented its taking root in Germany; and the substitution by Good of an Israelitish for an Egyptian bride has not saved the general theory from the neglect which was inevitable after the reactionary movement of the 19th-century allegorists.

2. *Allegorical.*—Notwithstanding the attempts which have been made to discover this principle of interpretation in the Sept. (Cant. iv, 8); Jesus Sirach (xlvii, 14-17); Wisd. (viii, 2), and Josephus (c. *Apion*, i, § 8), it is impossible to trace it, with any certainty, farther back than the Talmud (see Ginsburg, *Introd.*). According to the Talmud, the *beloved* is taken to be God; the *loved one*, or bride, is *the congregation of Israel*. This general relation is expanded into more particular detail by the Targum, or Chaldee Paraphrase, which treats the Song of Songs as an allegorical history of the Jewish people from the exodus to the coming of the Messiah and the building of the third temple. In order to make out the parallel, recourse was had to the most extraordinary devices: e. g. the reduction of words to their numerical value, and the free interchanging of words similar to each other in sound. Elaborate as it was, the interpretation of the Targum was still farther developed by the mediæval Jews, but generally constructed upon the same allegorical hypothesis. It was introduced into their liturgical services; and during the persecutions of the Middle Ages its consoling appeal to the past and future glories of Israel maintained it as the popular exposition of a national poem. It would be strange if so universal an influence as that of the scholastic philosophy had not obtained an expression in the interpretation of the Canticles. Such an expression we find in the theory of Ibn Caspe (1200-1250), which considers the book as representing the union between the *active intellect* (intellectus agens), and the *receptive* or *material intellect* (intellectus materialis). A new school of Jewish interpretation was originated by Mendelssohn (1729-1786), which, without actually denying the existence of an allegorical meaning, determined to keep it in abeyance, and meanwhile to devote itself to the literal interpretation. At present the most learned rabbis, following Löwesohn, have abandoned the allegorical interpretation altogether (Hexheimer, 1848; Philippson, 1854).

In the Christian Church, the Talmudical interpretation, imported by Origen, was all but universally received. It was impugned by Theodore of Mopsuestia (360-429), but continued to hold its ground as the orthodox theory till the revival of letters, when it was called in question by Erasmus and Grotius, and was gradually superseded by the typical theory of Grotius, Bossuet, Lowth, etc. This, however, was not effected without a severe struggle, in which Sanctius, Durham, and Calovius were the champions of the *allegorical* against the *typical* theory. The latter seems to have been mainly identified with Grotius (Pol. *Syn.*), and was stigmatized by Calovius as the heresy of Theodore Mopsuestia, condemned at the second council of Constantinople, and revived by the Anabaptists. In the 18th century the allegorical theory was reasserted, and reconstructed by Puffendorf (1776) and the reactionary allegorists, the majority of whom, however, with Rosenmüller, return to the system of the Chaldee Paraphrase.

Some of the more remarkable variations of the allegorical school are: (*a.*) The extension of the Chaldee allegory to the Christian Church, originally projected by Aponius (7th century), and more fully wrought out by De Lyra (1270-1340), Brightman (1600), and Cocceius (1603-1699). According to De Lyra, chaps. ii-vii describe the history of the Israelites from the exodus to the birth of Christ; chap. vii ad fin. the history of the Christian Church to Constantine. Brightman divides the Canticles into a history of the *Legal* and a history of the *Evangelical* Church: his detail is highly elaborate; e. g. in Cant. v, 8, he discovers an allusion to Peter Waldo (1160), and in verse 13 to Robert Trench (1290). (*b.*) Luther's theory limits the allegorical meaning to the contemporaneous history of the Jewish people under Solomon. (*c.*) According to Ghislerius and Corn. a Lapide, the bride is the Virgin Mary. (*d.*) Puffendorf refers the spiritual sense to the circumstance of our Saviour's death and burial.

3. The *literal* interpretation seems to have been connected with the general movement of Theodore Mopsuestia (360-429) and his followers, in opposition to the extravagances of the early Christian allegorists. Its *scheme* was nuptial, with Pharaoh's daughter as the bride. That it was by many regarded as the only admissible interpretation appears from Theodoret, who mentions this opinion only to condemn it. Borne down and overwhelmed by the prolific genius of mediæval allegory, we have a glimpse of it in Abulpharagius (see above), and in the MS. commentary (Bodl. Oppenh. Coll. No. 625), cited by Mr. Ginsburg, and by him referred conjecturally to a French Jew of the 12th or 13th century. This commentary anticipates more recent criticism by interpreting the Song as *celebrating the humble love of a shepherd and shepherdess.* The extreme literal view was propounded by Castellio (1544), who rejected it from the Canon. Following out this idea, Whiston (1723) recognised the book as a composition of Solomon, but denounced it as *foolish, lascivious, and idolatrous.* Nearly the same view is entertained by Dr. Clarke in his *Commentary.* Meanwhile the *nuptial* theory was adopted by Grotius as the literal basis of a secondary and spiritual interpretation, and, after its dramatical development by Bossuet, long continued to be the standard scheme of the mystical school. Bossuet's idea of this poem was that it is a regular drama, or pastoral eclogue, consisting of seven acts, each act filling a day, concluding with the Sabbath, inasmuch as the bridegroom on this day does not, as usual, go forth to his rural employments, but proceeds from the marriage chamber into public with his bride. The following are Bossuet's divisions of the plots:

First day	Chap.	i-ii, 6.
Second day	"	ii, 7-17.
Third day	"	iii-v, 1.
Fourth day	"	v, 2-vi, 9.
Fifth day	"	vi, 10-vii, 11.
Sixth day	"	vii, 12-viii, 3.
Sabbath	"	viii, 4-14.

In 1803 this scheme was reconstructed by Good, with a Jewish instead of an Egyptian bride; and his version is still the most elegant. For the most ingenious and completely elaborated form in which this theory has been developed, see the new translation in scenic form by Taylor in his edition of Calmet's *Dict.*; also more lately by Horner in the *Methodist Quart. Review*, July, 1862. See THEATRICAL REPRESENTATIONS.

The *purely literal* theory, opposed on the one hand to the allegorical interpretation, and on the other to Castellio and Whiston, owes its origin to Germany. Michaelis (1770) regarded the Song as an exponent of

nuptial love, innocent and happy. But, while justifying its admission into the Canon, he is betrayed into a levity of remark altogether inconsistent with the supposition that the book is inspired (Not. *ad Lowth, Prœl.*). From this time the scholarship of Germany was mainly enlisted on the side of the literalists. The literal basis became thoroughly dissociated from the mystical superstructure, and all that remained to be done was to elucidate the true scheme of the former. The most generally received interpretation of the modern literalists is that which was originally proposed by Jacobi (1771), adopted by Herder, Ammon, Umbreit, Ewald, etc., and more recently by Prof. Meier of Tübingen (1854), and in England by Mr. Ginsburg, in his learned translation (1857). According to the detailed application of this view as given by Mr. Ginsburg, the Song is intended to display *the victory of humble and constant love over the temptations of wealth and royalty.* The tempter is Solomon; the object of his seductive endeavors is a Shulamite shepherdess, who, surrounded by the glories of the court and the fascinations of unwonted splendor, pines for the shepherd-lover from whom she has been involuntarily separated. In this scheme the drama is divided into five sections, indicated by the thrice-repeated formula of adjuration (ii, 7; iii, 5; viii, 4), and the use of another closing sentence (v, 1).

Section 1 (ch. i-ii, 7): scene, a country-seat of Solomon. The shepherdess is committed to the charge of the court ladies ("daughters of Jerusalem"), who have been instructed to prepare the way for the royal approach. Solomon makes an unsuccessful attempt to win her affections.

Sec. 2 (ii, 8-iii, 5): the shepherdess explains to the court ladies the cruelty of her brothers, which had led to the separation between herself and her beloved.

Sec. 3 (iii, 6-v, 1): entry of the royal train into Jerusalem. The shepherd follows his betrothed into the city, and proposes to rescue her. Some of her court companions are favorably impressed by her constancy.

Sec. 4 (v, 2-viii, 4): the shepherdess tells her dream, and still farther engages the sympathies of her companions. The king's flatteries and promises are unavailing.

Sec. 5 (viii, 5-14): the conflict is over; virtue and truth have won the victory, and the shepherdess and her beloved return to their happy home, visiting on the way the tree beneath whose shade they first plighted their troth (viii, 5). Her brothers repeat the promises which they had once made conditionally upon her virtuous and irreproachable conduct.

Even in Germany, however, a strong band of reactionary allegorists have maintained their ground, including such names as Hug, Kaiser, Rosenmüller, Hahn, and Hengstenberg. On the whole, their tendency is to return to the Chaldee paraphrase, a tendency which is specially marked in Rosenmüller. In England the battle of the literalists has been fought by Dr. Pye Smith (*Congreg. Mag.* for 1837, 38); in America by Prof. Noyes, who adopts the extreme *erotic* theory, and is unwilling to recognise in Canticles *any moral or religious design.* It should be observed that such a sentiment as this of Dr. Noyes is utterly alien to the views of Jacobi and his followers, who conceive the recommendation of virtuous love and constancy to be a portion of the very highest moral teaching, and in no way unworthy of an inspired writer.

The allegorical interpretation has been defended in America by Professors Stuart and Burrowes. The *internal* arguments adduced by the allegorists are substantially the same with those urged by Calovius against the literal basis of the mystical interpretation. The following are specimens: (*a.*) Particulars not applicable to Solomon (v, 2). (*b.*) Particulars not applicable to the wife of Solomon (i, 6, 8; v, 7; vii, 1, comp. i, 6). (*c.*) Solomon addressed in the second person (viii, 12). (*d.*) Particulars inconsistent with the ordinary conditions of decent love (v, 2). (*e.*) Date twenty years after Solomon's marriage with Pharaoh's daughter (comp. Cant. iv, 4, and 1 Kings vi, 38). It will readily be observed that these arguments do not in any way affect the literal theory of Jacobi.

For *external* arguments the allegorists depend principally upon *Jewish tradition and the analogy of Oriental poetry.* The value of the former, as respects a composition of the 10th century B.C., is estimated by Michaelis (*Not. ad Lowth*) at a very low rate. For the latter, it is usual to refer to such authors as Chardin, Sir W. Jones, D'Herbelot, etc. (see Rosenm. *Animad.*). Rosenmüller gives a song of Hafiz, with a paraphrase by a Turkish commentator, which unfolds the spiritual meaning. For other specimens of the same kind, see Lane's *Egyptians*, ii, 215 sq. On the other hand, the objections taken by Dr. Noyes are very important (*New Transl.*). It would seem that there is one essential difference between the Song of Solomon and the allegorical compositions of the poets in question. In the latter the allegory is more or less avowed, and distinct reference is made to the Supreme Being; in the former there is nothing of the kind. But the most important consideration adduced by the literalists is the fact that the Canticles are the production of a different country, and separated from the songs of the Sufis and the Hindoo mystics by an interval of nearly 2000 years. To this it may be added that the Song of Solomon springs out of a religion which has nothing in common with the pantheism of Persia and India. In short, the conditions of production in the two cases are utterly dissimilar. But the literalists are not content with destroying this analogy; they proceed farther to maintain that allegories do not generally occur in the sacred writings without some intimation of their secondary meaning, which intimation in the case of the Canticles is not forthcoming. They argue, from the total silence of our Lord and his apostles respecting this book, not indeed that it is uninspired, but that it was never intended to bear within its poetic envelope that mystical sense which would have rendered it a perfect treasury of reference for Paul when unfolding the spiritual relation between Christ and his Church (see 2 Cor. xi, 2; Rom. vii, 4; Eph. v, 23-32). Again, it is urged that if this poem be allegorically spiritual, then its spiritualism is of the very highest order, and utterly inconsistent with the opinion which assigns it to Solomon. The philosophy of Solomon, as given in Ecclesiastes, is a philosophy of indifference, apparently suggested by the exhaustion of all sources of physical enjoyment. The religion of Solomon had but little practical influence on his life; if he wrote the glowing spiritualism of the Canticles when a young man, how can we account for his fearful degeneracy? If the poem was the production of his old age, how can we reconcile it with the last fact recorded of him, that "his heart was not perfect with the Lord his God?" For the same reason it is maintained that no other writer would have selected Solomon as a symbol of the Messiah. The excessively amative character of some passages is designated as almost blasphemous when supposed to be addressed by Christ to his Church (vii, 2, 3, 7, 8); and the fact that the dramatis personæ are three is regarded as decidedly subversive of the allegorical theory.

The strongest argument on the side of the allegorists is the matrimonial metaphor so frequently employed in the Scriptures to describe the relation between Jehovah and Israel (Exod. xxxiv, 15, 16; Num. xv, 39; Psa. lxxiii, 27; Jer. iii, 1-11; Ezek. xvi, xxiii, etc.). It is fully stated by Prof. Stuart (*O. T. Canon*). On the other hand, the literalists deny so early a use of the metaphor. They contend that the phrases describing spiritual fornication and adultery represent the literal fact; and that even the metaphor, as used by the prophets who lived after Solomon, implies a wedded relation, and therefore cannot be compared with the ante-nuptial affection which forms the subject of Canticles.—Smith, *Dict. of Bible*, s. v.

On the whole, a combination of the moderately literal interpretation with the general allegorical idea seems to be the true one, by which, under the figure of chaste conjugal love (probably that of Solomon and the Egyptian princess), set forth in Oriental style and

warmth [see MARRIAGE], the union of Jehovah and his Church is represented after the analogy of a parable (q. v.). All attempts, however, hitherto made to carry the explanation into detail, especially in the application of the language to the phenomena of individual religious experience, have been signal failures, having been, indeed, rather the offspring of a sensuous fanaticism or over-wrought enthusiasm, than of sound devotion or sober interpretation. See ALLEGORY. Taking, therefore, the ground figure of connubial as typical of divine union to be intended to be represented in this *general* expression only by this unique specimen of sacred phantasmagoria, we may venture to arrange it dramatically somewhat as follows:

Time.	Place.	Persons.	Subject.	Passage.
1. Morn.	Antechamber of palace.	Bride and ladies.	The welcome to the future home.	i, 2–8.
Eve.	Audience-room of palace.	Bride, groom, and attendants.	The first interview.	i, 9–ii, 6.
2. Morn.	Palace window.	Bride and groom.	The invitation, in serenade.	ii, 7–17.
Eve.	Private chamber.	Bride.	The search, in fancy.	iii, 1–4.
3. Morn.	Front of palace.	Bride, groom, and ladies.	The return from parade.	iii, 5–11.
Eve.	Palace garden.	Bride and groom.	The visit and excursion.	iv, 1–v, 1.
4. Morn.	Private chamber.	Bride and ladies.	The dream.	v, 2–vi, 3.
Eve.	Palace apartment.	Bride, groom, and visitors.	The reception-party.	vi, 4–13.
5. Morn.	Private chamber.	Bride and ladies.	The toilette.	vii, 1–5.
Eve.	Private apartment.	Bride and groom.	The mutual avowal.	vii, 6–viii, 3.
6. Morn.	Public apartment.	Bride, groom, and witnesses.	The espousal.	viii, 4–7.
Eve.	Private apartment.	Bride, groom, and brothers.	The dowry.	viii, 8–14.

IV. *Canonicity.*—It has already been observed that the book was rejected from the Canon by Castellio and Whiston, but in no case has its rejection been defended on *external* grounds. It is found in the Sept., and in the translations of Aquila, Symmachus, and Theodotian. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and, in short, we have the same evidence for its canonicity as that which is commonly adduced for the canonicity of any book of the O. T.

V. *Commentaries.*—The following are the exegetical works expressly on the whole of this book, a few of the most important being indicated by an asterisk (*) prefixed: Origen, *Homiliæ*, etc. (in *Opp.* iii, 12, 28, 94); Theophilus, *Fragmenta* (in Grabe's *Spicilegium*, ii, 223); Eusebius, *Expositio* [Gr. and Lat.] (in Meursii *Opera*, viii, 125); Polychronius and Psellus, *Expositiones* (ed. Meursius, Lugd. 1617, 4to); Athanasius, *Homilia* (in *Opp.* iii, 37); also *Fragmenta* (*ib.* I, ii, 1005); *Gregory Nyssen., *Explanatio* (in *Opp.* i, 468; also *Bibl. Patr. Gall.* vi, 645); Ambrose, *Commentarius* (in *Opp.* i, 1546); Epiphanius, *Commentarius* (ed. Foggini, Rom. 1750, 4to); Philo Carpathius, *Interpretatio* (Lat. in *Bibl. Max. Patr.* v, 661; Gr. and Lat. in *Bibl. Patr. Gall.* ix, 713: also *Enarratio*, ed. Gr. and Lat. Giacomell, Rom. 1772, 4to); Theodoret, *Explanatio* (Rom. 1563, fol.; Ven. 1574, 4to; also in *Opp.* II, i; tr. in "Voice of the Church"); Cassiodorus, *Expositio* (in *Opp.* ii, 479); Gregory the Great, *Expositio* (in *Opp.* III, ii, 397); Justus Orgelitanus, *Explicatio* (in *Bibl. Max. Patr.* ix, 731); Isidore, *Expositio* (in *Opp.* p. 503); Apponius, *Expositio* (in *Bibl. Max. Patr.* xiv, 98); Lucas, *Summariola* (in *Bibl. Max. Patr.* xiv, 128); Udalricus, *Scholia* (*ib.*); Bede, *Expositio* (in *Opp.* iv, 714; also *Works* by Giles, ix, 186); Alcuin, *Compendium* (in *Opp.* I, ii, 391); Angelomanus, *Enarrationes* (in *Bibl. Max. Patr.* xv); Bruno Astensis, *Cantica* (in *Opp.* i); Anselm, *Enarrationes* (in *Opp.* ed. Picard); Rupertus Tuitiensis, *Commentaria* (in *Opp.* i, 986); Bernard, *Sermones* (in *Opp.* I, ii, 2649; also *ib.* II, i, 555); Irimpertus, *Commentarius* (Pez, *Thesaur.* II, i, 369); Aquinas, *Commentarius* (in *Opp.* i); Honorius Augustodunensis, *Commentarius* (in *Opp.*; also *Bibl. Patr. Max.* xx, 963); Jarchi's annotations [Heb.] (in Buxtorf's Rabbinical Bible, q. v.); Rashi's פֵּרוּשׁ (in the Rabbinical Bibles; also with Lat. tr. by Genebrard, Par 1570 and 1585, 8vo; with notes by Breithaupt, Gotha, 1714, 4to; in Jewish-German by Bresch, Cremona, 1560, fol., and since); R. S. ben-Meir (Rashbam), פֵּרוּשׁ (first published Lpz. 1855, 8vo); *Aben-Ezra, פֵּרוּשׁ (in Frankfurter's Rabbinical Bible; in Lat. by Genebrard, Paris, 1570 and 1858, 8vo); Alscheich, שׁוֹשַׁנַּת הַמְּבָקְרִים (Ven. 1591 and 1606, 4to, and since); Nachmani (or rather Asariel, A.D. cir. 1200), פֵּרוּשׁ [Cabalistic] (Altona, 1764, 4to; including comments by Ibn-Tamar, Johannisb. 1857, 8vo); Arama, פֵּרוּשׁ (in the Amst. Rabb. Bible, which likewise contains the three following); De Bañoles, פֵּרוּשׁ (R. de Trento, 1560, 4to); Jos. ben-Jachja, פֵּרוּשׁ (Bologna, 1538, fol.); Is. Jaabez, קֹדֶשׁ הִלּוּלִים (Belvidere, n. d. fol.); Holkot, *Notæ* (Ven. 1509, fol.); Nic. de Argentina, *Expositiones* (Pez, *Bibl. Ascet.* xi, xii); Thomas Vercellensis, *Commentarius* (Pez, *Thesaur.* ii, 503); Perez, *Expositio* (in *Exp. Psalm.*); Radulphus Fontanellensis, *Commentaria* (Hommey, *Suppl.* p. 276); Gerson, *Tractatus* (in *Opp.* iv, 27); *Luther, *Enarratio* (Vitemb. 1538, 1539, 8vo; also in *Opp.* Latin ed. Vit. iv, 49; ed. Jen. iv, 226; Germ. ed. Lips. vii, 1; ed. Hal. v, 2385); Zwingle, *Complanatio* (in *Opp.* iii); Marloratus, *Expositio* (in *lib. Psalm.* etc.); Beza, *Sermons* (tr. by Harmar, Oxf. 1587, 4to); Hall, *Paraphrase* (in *Works*, i, 245, etc.); Theresa, *Explications* (in *Œuvres*, p. 829); Jansen, *Annotationes* (in *Psalmi*, etc.); Maldonatus, *in Cant.* (in *Commentarii*, p. 165); Mercer, *Commentarii* (in *Jobus*, etc.); Wilcocks, *Exposition* (in *Works*); à Lapide, *in Cant.* (in *Commentarii*); Homes, *Comment.* (in *Works*); Castell, *Annotationes* (in Walton's *Polyglott*, vi); Tegelath, *Expositio* (Ven. 1510, fol.); Halgrin, *Expositio* (Par. 1521, fol.); Guidacer, *Commentarius* (Par. 1531, 8vo); Arboreus, *Commentarius* (Paris, 1537 and 1553, fol.); Titelmann, *Commentarii* (Antw. 1547, 8vo, and later); Alkabez, אַיֶּלֶת אֲהָבִים (Ven. 1552, 4to); Nannius, *Scholia* (Lon. 1554, 4to); Ab. ben-Isaak (Tamak), פֵּרוּשׁ (with others, Sabionetta, 1558, 12mo; Prague, 1611, 4to); Strigel, *Scholia* (Lips. 1565, 8vo); Almosnino, יְדֵי מֹשֶׁה (Salonica, 1572; Ven. 1597, 4to); Mercer, *Commentarius* (Gen. 1573; L. B. 1651, fol.); Ibn-Jaisch, מְקוֹר בָּרוּךְ (Constant. 1576, fol.); Genebrard, *Observationes* (Par. 1579, 4to; also his *Paraphrasis*, ib. 1585, 8vo); Arepol, שַׁר שָׁלוֹם (Safet, 1579, 4to; also in אֲגֻדַּת שְׁמוּאֵל, Ven. 1593); Saadias, פֵּרוּשׁ (from the Arab. with others on the same book, Constpl. n. d. 4to; first separately, Prague, 1608, 4to, etc.); Brocardus, *Interpretatio* (L. B. 1580, 8vo); Garzia, *Expositio* (Complut. 1581, fol., and later); De la Huerga, *Commentarius* (Complut. 1582, fol.); Damianus, *Commentarius* (Venice, 1585, 4to); Almoncirius, *Commentarius* (Complut. 1588, 4to); Blackney, *Commentarius* (Ven. 1591, 4to); Rosseti, *Commentarius* (Ven. 1594, 4to); Janson, *Commentarius* (Lond. 1596, 1604; Ingolstadt, 1605, 8vo); Gyffard, *Sermons* (Lond. 1598, 8vo); Brucioli's commentary (in Italian, Ven. 1598, 8vo); Sotomajor, *Interpretatio* (Olyssip. 1599, Paris, 1605, fol.; also *Notæ*, ib. 1611, 4to); Jesu Maria, *Interpretatio* (Rom. 1601, 8vo, and later); De Pineda, *Prælectio* (Hisp. 1602, 4to); Clapham, *Exposition* (Lond. 1603, 8vo); Del Rio, *Commentarius* (Ingolst. 1604, fol.; Par. 1607, Lugd. 1611, 4to); Loanz, רִנַּת הוֹדִים [Cabalistic] (Basel, 1606, 1612, 4to); Tuccius, *Adnotationes*

Cantor (*singer*), an ancient ecclesiastical order so called, and a title still given to the master of the choir in many churches, as, in modern use, *precentor*. The Councils of Cologne, A.D. 1260 and 1536, give to the chantor, or *cantor*, the title of *chorepiscopus*, or bishop of the choir. The cantor is also the same with the primicerius. The order of cantores appears to be of great antiquity, and is mentioned in the Canons called Apostolical, Nos. 26, 43, and 69, and in the Liturgy of St. Mark, which was written before the fourth century (Renaudot, *Liturg. Orient. Coll.* tom. i, pref. p. xxxv, and p. 151). The Council of Laodicea, can. 15, forbids any to sing in church except the singers or cantores whose names were inscribed on the canon of the church, and whose proper place was in the *ambo*. By can. 23 it forbad the cantores to wear the stole or *orarium*. The Roman writers endeavor to prove that the lector and cantor were the same, but they are everywhere spoken of in the ancient canons as distinct orders. There is no reason to believe this order to be of higher than *ecclesiastical* institution only. The cantor might be ordained even by a priest (*Con. Carth.* 4, cap. 10). This order is still retained in the Oriental Church.—Bingham, *Orig. Eccl.* bk. iii, ch. vii; Landon, *Eccl. Dict.* s. v.

Canus or **Cano**, MELCHIOR, a distinguished Spanish theologian, was born at Tarançon in 1523, and entered the Dominican order at Salamanca, where he studied theology under Francisco Vittoria, whom he succeeded in 1546 in the theological chair, after having served brilliantly as professor at Valladolid and Alcala. He formed a party in opposition to Carranza, afterward archbishop of Toledo, to whose disgrace he greatly contributed. When the Jesuits endeavored to settle at Salamanca, Canus vehemently denounced them as the precursors of Antichrist, and so successfully that it was not until he had gone to the Canaries that they could establish themselves in Salamanca. He was made bishop of the Canaries by Paul III, but resigned, and retired into a convent of his order, of which he became, in 1554, provincial for the province of Spain. He died at Toledo, Sept. 30, 1560. His chief and best-known work is his *Locorum Theologicorum libri xii*, relating to the *sources* whence polemical theologians may derive proofs of their opinions and arguments (Salamanca, 1562, fol.). It may be found, with his other writings, in his *Opera*, *edit. noviss.* (Bassani, 1776, 4to).—Hoefer, *Nouv. Biog. Générale*, viii, 494.

Canute. See DENMARK.

Cap (or BONNET, *pileolus*), in clerical dress. Cardinal Richelieu is said to be the first who wore the *calotte*, or cap, in France. The red cap is peculiar to the college of cardinals. The bonnet or cap worn by the Jesuits, Barnabites, Theatines, and by the Italians generally, is three-cornered and square, and worn without the cape. See VESTMENTS OF THE CLERGY.

Caparcotia (Καπαρκοτία, a name of which the initial element is evidently the Heb. כפר: see CAPHAR-), a town located by Ptolemy (iv, 16) in Galilee, and mentioned (*Caparcotani*) in the *Peutinger Table* as situated between Scythopolis and Cæsarea Palestinæ (Reland, *Palæst.* p. 461, 687), 24 R. miles from the former and 28 from the latter. It was discovered by Burckhardt (*Travels*, p. 551) in the modern *Kefr-Kud*, a village about one hour [1¼] west of Jenin, among the hills (Robinson, *Researches*, iii, 159), and half an hour west of Burkin (Wolcott, in the *Biblioth. Sacra*, 1843, p. 76; Robinson, *Later Researches*, p. 121), situated on an eminence, with a high wely north of the village, called Sheik Zeit, and visible from a great distance all around (Van de Velde, *Memoir*, p. 301).

Capellus. See CAPPELLUS.

Caper-PLANT (אֲבִיּוֹנָה, *abiyonah'*, from אָבָה, to *desire*, Sept. κάππαρις) is mentioned only once in the Bible (Eccles. xii, 5): "When the almond-tree shall flourish, and the grasshopper shall be a burden, and *desire* shall fail; because man goeth to his long home." The word here translated *desire* has been considered to signify the CAPER-berry. The reasons assigned for this opinion are that the rabbins apply the plural (אֲבִיּוֹנוֹת, *abyonoth'*: see *Berachoth*, xxxvi, 1) to the small fruit of trees and berries, as well as to that of the caper-bush (Buxtorf, *Lex. Talm.* col. 12); that the caper-bush is common in Syria and Arabia (see Galen, *Facult. Alim.* ii, 34); that its fruit was in early times eaten as a condiment, being stimulating in its nature, and therefore calculated to excite desire (Plutarch, *Quæst. Symp.* vi, 2; Pliny, *Hist. Nat.* xiii, 23; xx, 15; comp. xiii, 44; xx, 59; Dioscor. ii, 204); that as the caper-bush grows on tombs, it will be liable to be destroyed when these are opened; and, finally, that as Solomon speaks here in symbols and allegories, we must suppose him to deviate from the course he had apparently prescribed to himself if he were to express in plain words that "desire shall fail," instead of intimating the same thing by the failure of that which is supposed to have been used to excite desire. Celsius (*Hierobot.* i, 210) argues, on the contrary, that Solomon in other places, when treating of the pleasures of youth, never speaks of capers, but of wine and perfumes; that, had he wished to adduce anything of the kind, he would have selected something more remarkable; that capers, moreover, instead of being pleasantly stimulant, are acrid and hurtful; and though occasionally employed by the ancients as condiments, were little esteemed by them; and, finally, that the word *abiyonoth* of the rabbins is distinct from the *abiyonah* of this passage, as is admitted even by Ursinus (*Arboret. Biblicum*, xxviii, 1). The caper-plant, however, is often mentioned in the Talmud (*Maaseroth*, iv, 6; *Demai*, i,

1) by the terms צֶלֶף, *tselaph'*, נִצְפָּה, *nitsphah'*, and even קַפְרִיס, *kaphris'* (Buxtorf, col. 1919, 1381, 2098). But as the Septuagint, the Vulgate, the Syriac, and the Arabic translations have understood the *caper-bush* to be meant, it is desirable to give some account of it, especially as, from its ornamental nature, it could not but attract attention. There are, moreover, some points in its natural history which have been overlooked, but which may serve to show that in the passage under review it might without impropriety have been employed in carrying out the figurative language with which the verse commences (see Plenk, *Plant. Med.* p. 420; Sprengel, *Hist. rei herb.* i, 14).

The caper-plant belongs to a tribe of plants, the Capparidaceæ, of which the species are found in considerable numbers in tropical countries, such as India, whence they extend northward into Arabia, the north of Africa, Syria, and the south of Europe (Forskal, *Flor.* p. 99; Shaw, p. 395). The common caper-bush—*Capparis spinosa*, Linn. (the *C. sativa* of Persoon)—is

Caper-plant (*Capparis Spinosa*), with enlarged view of the Pericarp.

common in the countries immediately surrounding the Mediterranean. Dioscorides describes it as spreading in a circular manner on the ground, in poor soils and rugged situations; and Pliny "as being set and sown in stony places especially." Theophrastus states that it refuses to grow in cultivated ground. Dioscorides further states that it has thorns like a bramble, leaves like the quince, and fruit like the olive—characters almost sufficient to identify it. The caper is well known to the Arabs, being their *kibbur*, and designated also by the name *athuf* or *azuf*. The bark of the root, which is still used in the East, as it formerly was in Europe, no doubt possesses some irritant property, as it was one of the five aperient roots. The unexpanded flower-buds, preserved in vinegar, are well known at our tables as a condiment by the name of capers. Parts of the plant seem to have been similarly used by the ancients. The caper-plant is showy and ornamental, growing in barren places in the midst of the rubbish of ruins, or on the walls of buildings. It was observed by Ray on the Temple of Peace at Rome, and in other similar situations. It forms a much-branched, diffuse shrub, which annually loses its leaves. The branches are long and trailing; smooth, but armed with double curved stipulary spines. The leaves are alternate, roundish or oblong-oval, a little fleshy, smooth, of a green color, but sometimes a little reddish. The flowers are large and showy, produced singly in the axils of the leaves, on stalks which are larger than the leaves. The calyx is four-leaved, coriaceous; the petals are also four in number, white, and of an oval roundish form. The stamens are very numerous and long; and their filaments, being tinged with purple and terminated by the yellow anthers, give the flowers a very agreeable appearance. The ovary is borne upon a straight stalk, which is a little longer than the stamens, and which, as it ripens, droops and forms an oval or pear-shaped berry, inclosing within its pulp numerous small seeds. Many of the caper tribe, being remarkable for the long stalks by which their fruit is supported, conspicuously display, what also takes place in other plants, namely, the drooping and hanging down of the fruit as it ripens. As, then, the flowering of the almond-tree, in the first part of the verse in question, has been supposed to refer to the whitening of the hair, so the drooping of the ripe fruit of a plant like the caper, which is conspicuous on the walls of buildings and on tombs, may be supposed to typify the hanging down of the head before "man goeth to his long home" (see the *Penny Cyclopædia*, s. v. Capparidaceæ). See HYSSOP.

Caper-berry.

Caper'naüm (Καπερναούμ; Lachm. [with Codex B] Καφαρναούμ, as if כְּפַר נַחוּם, "village of Nahum" [from some unknown person of that name]; Syriac, Curetonian *Kaaphar Nachum*, Peshito *Kaphar Nachum*; Vulg. *Capharnaum*), the name of a Galilæan city familiar as that of the scene of many acts and incidents in the life of Christ (see Stuart, *Capernaum as the Scene of Christ's Miracles*, 2d ed. London, 1864). There is no mention of Capernaum in the O. T. or Apocrypha, but the passage Isa. ix, 1 [viii, 23] is applied to it by Matthew. The word *Caphar* in the name perhaps indicates that the place was of late foundation. See CAPHAR-. There is named, however, by the rabbins (Midrash, *Koheleth*, fol. 89, col. 4) a place called *Kephar-Nachum* (כפר נחום), which Reland (*Palæst.* p. 689) presumes to be the Capernaum of the Gospels (see Otho, *Lex. Rabb.* p. 118). Josephus also mentions a remarkable fountain, called by the natives *Capharnaum* (Καφαρναούμ), watering the fertile "plain of Gennesareth" (*War*, iii, 10, 8); as also a village by the name of *Cepharnome* (Κεφαρνώμη) in the same region (*Life*, 72). Ptolemy also (v, 16, 4) calls it *Capernaum* (Καπαρναούμ). Another Capernaum is mentioned by William of Tyre (*De Bello Sacr.* x, 26) on the Kishon, six leagues from Cæsarea.

After the expulsion of Jesus from Nazareth (Luke iv, 16-31; Matt. iv, 13-16), where he was "brought up," Capernaum became emphatically his "own city;" it was when he returned thither that he is said to have been "at home" (Mark ii, 1; such is the force of ἐν οἴκῳ—A. V. "in the house"). Here he chose the evangelist Matthew or Levi (Matt. ix, 9). The brothers Simon-Peter and Andrew belonged to Capernaum (Mark i, 29), and it is perhaps allowable to imagine that it was on the sea-beach near the town (for, doubtless, like true Orientals, these two fishermen kept close to home), while Jesus was "walking" there, before "great multitudes" had learned to "gather together unto him," that they heard the quiet call which was to make them forsake all and follow him (Mark i, 16, 17; comp. 28). It was here that Christ worked the miracle on the centurion's servant (Matt. viii, 5; Luke vii, 1), on Simon's wife's mother (Matt. viii, 14; Mark i, 30; Luke iv, 38), the paralytic (Matt. ix, 1; Mark ii, 1; Luke v, 18), and the man afflicted with an unclean spirit (Mark i, 33; Luke iv, 33). The son of the nobleman (John iv, 46) was, though resident at Capernaum, healed by words which appear to have been spoken in Cana of Galilee. At Capernaum occurred the emblem-

atical incident of the child (Mark ix, 33; Matt. xviii, 1; comp. xvii, 24); and in the synagogue there was spoken the remarkable discourse of John vi (see verse 59). The infidelity and impenitence of the inhabitants of this place, after the evidence given to them by our Saviour himself of the truth of his mission, brought upon them this heavy denunciation: "And thou, Capernaum, which art exalted unto heaven, shalt be brought down to hell; for if the mighty works which have been done in thee had been done in Sodom, it would have remained unto this day," etc. (Matt. xi, 23). See GALILEE, SEA OF.

According to the notices of its situation in the N. T. Capernaum was on the western shore of the Sea of Galilee (τὴν παραθαλασσίαν, Matt. iv, 13; comp. John vi, 24), and, if recent discoveries are to be trusted (Cureton's *Nitrian Rec.* John vi, 17), was of sufficient importance to give to that sea, in whole or in part, the name of the "Lake of Capernaum." (This was the case also with Tiberias, at the other extremity of the lake. Comp. John vi, 1, "the Sea of Galilee—of Tiberias.") It was in or near the "land of Gennesaret" (Matt. xiv, 34, compared with John vi, 17, 21, 24), that is, the rich, busy plain on the west shore of the lake, which we know from the descriptions of Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. See GENNESARETH. Yet it was not far from the entrance of the Upper Jordan into the lake (Lightfoot, *Hor. Hebr.* p. 139). Being on the shore, Capernaum was lower than Nazareth and Cana of Galilee, from which the road to it was one of descent (John ii, 12; Luke iv, 31), a mode of speech which would apply to the general level of the spot, even if our Lord's expression, "exalted unto heaven" (ὑψωθεῖσα, Matt. xi, 23), had any reference to height of position in the town itself. It was of sufficient size to be always called a "city" (πόλις, Matt. ix, 1; Mark i, 33); had its own synagogue, in which our Lord frequently taught (John vi, 59; Mark i, 21; Luke iv, 33, 38)—a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place (Luke vii, 1; comp. 8; Matt. viii, 8). But besides the garrison there was also a customs station, where the dues were gathered both by stationary (Matt. ix, 9; Mark ii, 14; Luke v, 27) and by itinerant (Matt. xvii, 24) officers (though the latter passage probably refers rather to the ecclesiastical or temple tax than to the Roman or secular one). If the "way of the sea" was the great road from Damascus to the south (Ritter, *Erdk.* xv, 339), the duties may have been levied not only on the fish and other commerce of the lake, but on the caravans of merchandise passing to Galilee and Judæa. It was also near the border between the tribes of Zebulon and Naphtali (Matt. iv, 13). The doom which our Lord pronounced against Capernaum and the other unbelieving cities of the plain of Gennesareth has been remarkably fulfilled. In the present day no ecclesiastical tradition even ventures to fix its site; and the contest between the rival claims of the two most probable spots is one of the warmest, and at the same time the most difficult to decide, in sacred topography.

1. Dr. Robinson (*Bibl. Researches*, iii, 288-294) exposes the errors of all previous travellers in their various attempts to identify the site of Capernaum; and from a hint in Quaresmius, he is rather inclined to look for it in a place marked only by a mound of ruins, called by the Arabs *Khan Minyeh*. This is situated at the north-eastern extremity of the fertile plain (now called El Ghuweir) on the western border of the Lake of Gennesareth, to which the name of "the land of Gennesareth" is given by Josephus (*War*, iii, 10, 8). This plain is a sort of triangular hollow, formed by the retreat of the mountains about the middle of the western shore. The base of this angle is along the shore, and is about one hour's journey in length, whereas it takes an hour and a half to trace the inner sides of the plain. In this plain Josephus places a fountain called Capharnaum: he says nothing of the town; but if it can be collected from the scriptural intimations that the town of Capernaum was in this same plain (from a comparison of Mark vi, 47, with John vi, 19, it appears that it was at least six miles from the N.E. shore), it may be safely concluded that the fountain was not far from the town, and took its name therefrom. In this plain there are now two fountains, one called 'Ain et-Tin, the "Spring of the Fig," near the northern extremity of the plain, and not far from the lake. It is surrounded by vegetation and overhung by a fig-tree, from which it derives its name. Near this are several other springs, the water of which is said to be brackish; but Burckhardt, who rested for some time under the great fig-tree, describes the water of the main source as sweet. This is the fountain which Dr. Robinson inclines to regard as that which Josephus mentions under the name of Capharnaum. M. De Saulcy, however, contends, in his usual confident manner, against the conclusion of Dr. Robinson (*Narrative*, ii, 357-365). In the new edition of his *Researches* (iii, 348), Dr. Robinson reviews the arguments and reaffirms his position. Three miles south, toward the other extremity of the plain, is the other large spring, called 'Ain el Mudauwarah, the "Round Fountain"—a large and beautiful fountain rising immediately at the foot of the western line of hills. This Pococke took to be the Fountain of Capernaum, and Dr. Robinson was at one time disposed to adopt this conclusion. The "Round Fountain" is a mile and a half from the lake, to which it sends a considerable stream with fish. Whichever of these fountains be that of Capharnaum, we should look for some traces of an ancient town in the vicinity, and, finding them, should be justified in supposing that they formed the remains of Capernaum. The only ancient remains of any kind near the Round Fountain are some large volcanic blocks strewed over the plain, or piled together with little architectural order. But near the 'Ain et-Tin is the low mound of ruins, occupying a considerable circumference, which, if Capernaum were situated in this plain, offer the best probability of being the remains of the doomed city; and if these be all its remains, it has, according to that doom, been brought low indeed. Near the fountain is also a khan, which gives the name of Khan Minyeh to the spot. This khan is now in ruins, but was once a large and well-built structure. Close on the north of this khan, and of the fountain, rocky hills of considerable elevation come down quite to the lake, and form the northern termination of the plain. It is important to add that Quaresmius expressly states that in his day the place called by the Arabs *Menich* (i. e. Minyeh) was regarded as marking the site of Capernaum (*Elucid. Terr. Sanct.* ii, 864). The mention by Josephus (*Life*, 72) of a village called *Kepharnome*, situated between the mouth of the Jordan and Tarichæa, will agree with either location of Capernaum. Willibald, however (*Vita*, 16, 17), passed successively, on his way from Tiberias to the Upper Jordan, through Magdala, Capernaum, Bethsaida, and Chorazin, which would locate Capernaum at the southern end of the plain, if (as appears true) this also contained Chorazin. The latter may have been immediately on the shore, and Capernaum at a little distance from it (Luke ix, 57; comp. Matt. viii, 18, 19), as is the case at the southern spring, but not the northern. The arguments in favor of *Khan Minyeh* may be found in Robinson's *Researches* (new ed. ii, 403 sq.; iii, 344-358). They are chiefly founded on Josephus's account of the fountain and of his visit to Cepharnome, which Dr. R. would identify with the mounds near the khan, and on the testimonies of successive travellers from Arculfus to Quaresmius, whose notices Dr. R. interprets—often, it must be confessed, not without difficulty—in reference to

Khan Minyeh. The fountain Capharnaum, which Josephus mentions (*War*, iii, 10, 8) in a very emphatic manner as a chief source of the water of the plain of Gennesareth and as abounding with fish, would, however, certainly answer better to the "Round Fountain" than to a spring so close to the shore and so near one end of the district as is 'Ain et-Tîn. The claim of Khan Minyeh is also strongly opposed by a later traveller (Bonar, p. 437-41), as also by Van de Velde (*Memoir*, p. 301, 302) and Thomson (*Land and Book*, i, 542 sq.). Another objection to the site of Khan Minyeh is that the ancient town of Cinnereth appears to have lain north of Capernaum, and in this same plain of Gennesareth [see CINNERETH]; from which it is most natural to infer that Capernaum lay at the southern end of the plain (at 'Ain el Mudauwarah), and Cinnereth at the northern ('Ain et-Tîn). In that case, the approach of Christ and his disciples to Capernaum through the plain of Gennesareth (Matt. xiv, 34) was from the north, the direction most likely in coming from their last point on the north-eastern shore of the lake; for then the disciples would have fallen short of their destination, owing to the head wind, and, after landing, first traversed the plain. The site of Abu Shusheh, however, is in some respects more likely to have given name to the plain, if that of the ancient Cinnereth, which will thus be distinguished from the localities of Capernaum and Chorazin. See BETHSAIDA.

2. Three miles north of Khan Minyeh is the other claimant, *Tell Hûm*, containing ruins (very extensive, according to Bonar, p. 415 sq.) of walls and foundations covering a space of half a mile long by a quarter wide, on a point of the shore projecting into the lake, and backed by very gently rising ground. The shapeless remains are piled up in confusion all along the shore, and are much more striking than those of any other city on this part of the lake. With two exceptions, the houses were all built of basalt, quite black and very compact, but rudely cut. The stones of the temple, synagogue, or church, whatever it may have been, are of beautiful marble, cut from the mountains to the north-west (Thomson, i, 540). The ruins are described by Robinson (*Researches*, iii, 297 sq.). Rather more than three miles farther north is the point at which the Jordan enters the north of the lake. The arguments in favor of Tell Hûm date from about 1675. The principal one is the name, which is maintained to be a relic of the Hebrew original—"Caphar" having given place to "Tell." Dr. Wilson also ranges Josephus on this side (*Lands of the Bible*, ii, 139-149). See also Ritter (*Erdk.* xv, 335-343), who supports the same locality, as do also Van de Velde, Bonar, and Thomson. Against Tell Hûm, on the other hand, the following arguments seem almost conclusive: (1) It is not near the boundary-line between Zebulon and Naphtali, as appears to be required by Matt. iv, 13. (2) It is not likely to have been on the highway to Damascus (see above), for the mountains are so near the shore as to preclude this, while a thoroughfare still exists through the plain at the south. (3) It is rather too near the head of the lake for the scriptural notices, and apparently in the wrong direction from the plain of Gennesareth. (4) It does not by any means so well suit the indications in Josephus of the position of the spring of Capharnaum and village of Cepharnome: for [1] the latter was near a swampy ground (evidently, from the numerous springs, in the loamy plain), and at no great distance from Tiberias (or, at farthest, Tarichæa); [2] the fountain was a prominent feature in the plain of Gennesareth, which extended along the lake for three miles, apparently midway. To these arguments it may again be replied: (*a*) The language of the Evangelist respecting the proximity of the boundary-line is not to be taken so strictly, since none of the places in question were really situated on the border. (*b*) There is room enough for a road along the shore by Tell Hûm, for the shortest route to the head of the lake actually lies through it. (*c*) The Scripture notices most in question relate to the miracle of the feeding of the five thousand, the scene of which may have been on the shore south-east of Bethsaida, beyond Jordan, and in that case Christ's return to Capernaum may have been from the south through the plain of Gennesareth. (*d*) The misadventure of Josephus may have happened at the mouth of the Upper Jordan, and the place into which he was borne was a "village" merely, not a large city like Capernaum, although the name of the latter may naturally have included adjacent localities, as we know it was extended to the entire plain.

On the whole, however, later archæologists incline to the site of Khan Minyeh, where extensive ruins have recently been discovered, Bethsaida (q. v.) being, perhaps, to be located at Tell Hûm; and this conclusion is greatly confirmed by the almost certain position of Chorazin at Bir-Kerazeh, a little to the N.W. (See *Journal Sac. Lit.* Oct. 1854, p. 162 sq.; July, 1855, p. 354 sq.; *Bibl. Sacra*, April, 1855, p. 263 sq.; *Lond. Athenæum*, Feb. 24, March 31, 1866; *Stud. u. Krit.* 1867, iv). See CHORAZIN.

Capers, WILLIAM, D.D., a bishop of the Methodist Episcopal Church South, was born in St. Thomas's Parish, S. C., Jan. 26, 1790. In 1805 he entered the sophomore class at the South-Carolina College, but left college before the time of graduation, and began the study of law. He entered the itinerant ministry in the South-Carolina Conference in 1809, and located in 1815. He was readmitted to the Conference in 1818, and was first elected to General Conference in 1820, and was sent as delegate from the American Methodist Church to the British Wesleyan Conference in 1828. His subsequent posts of duty were, professor of Evidences of Christianity in Columbia College, 1835; editor of the Southern Christian Advocate, 1836-40; missionary secretary of the southern division of the Methodist Episcopal Church, 1840-44; superintendent of colored missions in the Southern States in 1844. In May, 1844, Dr. Capers attended the General Conference held at New York as one of the delegates of the South-Carolina Conference. This was the year in which the great anti-slavery agitation in the Methodist Episcopal Church came to its crisis in the division of that body. Dr. Capers took the Southern view of the question, and from that time till the close of his life he was identified with the Methodist Episcopal Church South. At the General Conference of that Church held in 1844 he was elected bishop. The remainder of his life was spent in the discharge of the bishop's office, which he filled with pre-eminent dignity, diligence, and success. Dr. Capers came of a Huguenot family, and his father did gallant service in the Revolution. His house was one of the homes of Asbury and the early Methodist preachers. In the ministry his rise was rapid, and his usefulness and popularity constantly increased. His eloquence in the pulpit was sanctified by the unction of the Holy Ghost, and, though generally smooth and graceful, was at times powerful, and even overwhelming. He was always refined and elevated in thought and life, and labored with earnest fidelity for his Master's cause. His activity of mind and perseverance, together with the weight of his moral power, gave him great influence in his Conference and in the Church. He died in Anderson, S. C., Jan. 29, 1855. He left no literary remains except an autobiography (prefixed to Dr. Wightman's *Life of Capers*); *Catechisms for the Negro Missions; Short Sermons and True Tales for Children* (edited by Dr. Summers, Nashville, 18mo).—Summers, *Sketches of Eminent Itinerants*, p. 75; Wightman, *Life of W. Capers, D.D.* (Nashville, 1859, 12mo); Sprague, *Annals*, vii, 460.

Cape Town, the capital of the English possessions at the Cape of Good Hope, erected into a bishop's see of the English Church in 1847. The see owes

its existence to the munificence of Miss Burdett Coutts. The first bishop was Robert Gray, D.D., of Stockton, consecrated at Westminster, June 29, 1847, who is still the incumbent. The bishop of Cape Town is the metropolitan of the Anglican dioceses in South Africa, of which, in 1867, there were the following, besides Cape Town: Natal, established 1863; Mauritius, 1854; Graham's Town, 1856; St. Helena, 1862; Orange River State, 1863; Central Africa, 1863. The Wesleyan missions in the district of Cape Town embraced, in 1866, 10 circuits, 25 chapels, 12 other preaching-places, 9 missionaries and assistant missionaries, 201 subordinate paid and unpaid agents, 1510 members, 211 on trial for membership, 2680 scholars in Sunday-schools, and 6988 attendants on public worship. The Roman Catholics have at Cape Town a vicar apostolic (bishop in partibus), whose diocese embraces about half a dozen churches. See AFRICA.

Caphar- (the Latinized form of the Heb. prefix כְּפַר־, *Kefar'*, the "construct form" of *Kaphar'*, כָּפָר, from the root of the same form signifying "to cover," Gesenius, *Thesaur.* p. 707), one of the numerous words employed in the Bible (and still oftener in later or rabbinical Hebrew) to denote a village or collection of dwellings smaller than a city (Reland, *Palæst.* p. 516). See IR-. Stanley proposes to render it by "hamlet" (*Palest.* App. § 87), to distinguish its occurrences from those of *Chavvah*, *Chatser*, *Bayith*, and other similar words. As an appellative it is found only three times: 1 Chron. xxvii, 25, Cant. vii, 11, and 1 Sam. vi, 18 (in the last the pointing being different, *Ko'pher*, כֹּפֶר); but in neither is there anything to enable us to fix any special force to the word. In names of places, it occurs in CHEPHAR-AMMONAI, CHEPHIRAH, CAPHAR-SALAMA, and those here following; also CAPERNAUM, CAPARCOTIA, etc. But the number of places compounded therewith mentioned in the Talmud shows that the name became a much commoner one at a time subsequent to the Biblical history. See the words beginning with KEPHAR-. In Arabic, the corresponding local epithet *Kefr* is in frequent use (see the lists in Robinson's *Researches*, iii, Append.).

Capharăbis (Καφαραβίς), a town of Idumæa, with a very strong wall, surrendered by the citizens to Cerealis, the general of Vespasian, after a siege thus rendered unexpectedly short (Josephus, *War*, iv, 9, 9). Reland (*Palæst.* p. 684) thinks it the *Kephar-Bish* (q. v.) of the rabbins; but Schwarz refers it to the *Kephar-Abus* (כפר אבוס) of the Jerusalem Talmud (*Sanhedr.* ii), and finds it in the well near Gedor, in Wady Surar (meaning apparently that marked on Van de Velde's *Map* a little south-east of Ekron), which he says is still called "the Spring of Abis." This position, however, seems too northerly.

Caphărath. See KEPHAR-AKKO.

Capharbarŭcha (prob. for כְּפַר בְּרָכָה, *village of blessing*; but different from the "valley of blessing" [see BERACHAH], named in 2 Chron. xx, 26), a place mentioned by Jerome (*Ep.* 86) as overlooking the desert of Sodom, and traditionally held to be the place where Abraham interceded with Jehovah for the guilty cities of the plain (Gen. xviii, 16; xix, 28). The name also occurs (in various forms) in several other ancient notices (Reland, *Palæst.* p. 685). It is probably the modern *Beni Naim*, an eminence on very high ground, three or four miles east of Hebron, commanding an extensive view of the Dead Sea (Robinson, *Researches*, ii, 189). The tomb of Lot has been shown there since the days of Mandeville (*Trav.* p. 68).

Capharcotia. See CAPARCOTIA.

Caphardagon. See BETH-DAGON.

Caphareccho. See KEPHAR-AKKO.

Capharetæa, a village of Samaria, the native place of the heretic Menander, according to Justin Martyr (Καπαρεταία, *Apol.* ii), but Eusebius (*Eccl. Hist.* iii, 26) cites the name somewhat differently (Καπαρατταία), and Theodoret (*Compend. Hæret. Fab.* ii) has *Chabræ* (Χαβραί); so that the place is altogether doubtful.

Caphargamăla (prob. *village of the camel*), a village said to have been situated 20 miles from Jerusalem; the native place of the presbyter Lucian, who wrote the memoir concerning the remains of St. Stephen, about the fifth century (Reland, *Palæst.* p. 688); but thought by Cotovicus (*Itin.* p. 284) to be the name of a person. See CAPHARSALAMA.

Capharnăüm. See CAPERNAUM.

Caphararia. See CAPHARORSA.

Capharorsa, a place (Καπαρόρσα for Καφαρόρσα) named by Ptolemy as a town of Idumæa west of the Jordan, and thought by Reland (*Palæst.* p. 690) to be the *Caphararia* (or Ceperaria) placed in the *Peutinger Table* between Jerusalem and Ashkalon. See CEPERARIA. It is possibly the same with CAPHAR-ZACHARIA (q. v.).

Capharsăba. See ANTIPATRIS.

Capharsal'ama (Χαφαρσαλαμά v. r. Χαφαρσαραμά, appar. for כְּפַר שְׁלָמָא, "village of peace"), a place where Nicanor's troops were cut to pieces by Judas Maccabæus (1 Macc. vii, 31). Josephus, in the parallel account (*Ant.* xii, 10, 4), calls it a village (κώμη Καφαρσαλαμά). Reland suggests (*Palæst.* p. 690) that it may have been the same with the *Caphar Gamala* (q. v.) where the presbyter Lucian was born, or the *Caphar-semelia* mentioned in his writings. He also adduces an allusion from the Talmud (*Aboda Sara*, folio 44, col. 4) to a wine-growing village, *Kephar-Salam* (כפר שלם), doubtless the same. From the fugitives in the above battle having taken refuge in the "city of David," it would appear to have been near Jerusalem; hence it is possible that it was the village near *Siloam* (q. v.), the Arabic name of which is *Kefr-selwân*. Ewald places it north of Ramla, on the Samaritan boundary (*Gesch. Isr.* iv, 368, note), but this is quite arbitrary.

Caphar-Sorech. See SOREK.

Caphartŏba. See KEPHAR-TEBI.

Caphar-Zachariæ ("village of Zacharias"), a place mentioned by Sozomen (*Hist. Eccl.* ix, 17) as lying in the region of Eleutheropolis, and apparently visited by Willibald on his way from Gaza to Hebron (*Travels*, p. 20, Bohn). It seems to have been different from the Bath-Zacharias (q. v.) of the Apocrypha (1 Macc. vi, 32) and Josephus (*Ant.* xii, 9, 4). It is probably the modern *Kefr Zekaria* (Robinson, *Researches*, ii, 34), a village on the north side of Wady Surot, opposite Tell Zacharia, about half way between Jerusalem and Ashkelon (Van de Velde, *Narrative*, ii, 192). See CAPHARORSA.

Caphen'atha (Χαφεναθά), a place apparently close to and on the east side of Jerusalem, which was repaired by Jonathan Maccabæus (1 Macc. xii, 37). The name seems to be derived from כַּפְנִיתָא, *kaphnitha'*, the Chaldee word for *the unripe date* (Buxtorf, *Lex. Talm.* col. 1071), and thus has a remarkable correspondence with the names of Bethany (house of dates), Bethphage (house of figs), and of the Mount of Olives itself, on which the three were situated—all testifying to the ancient fruitfulness of the place (comp. Schwarz, *Palest.* p. 256).

Caphĕthra (Καφεθρά), a pretentious little town (ψευδοπολίχνιον) in Upper Idumæa, apparently not far from Capharabis (q. v.), taken and burnt by Cerealis, the general of Vespasian (Josephus, *War*, iv, 9, 9). The name occurs with considerable variety in the texts (Καφεθραμίς, etc., Hudson, in loc.), and Petrus Apollonius (*De excid. Hieros.* iii, 65) gives it simply

as *Caphara*, from which it seems possible that the scriptural Chephirah (q. v.) may be intended.

Caphi'ra (Καφιρα), a place whose inhabitants returned from Babylon (1 Esdr. v, 19); evidently the Chephirah (q. v.) of the Hebrew text (Ezra ii, 25).

Caph'thorim (1 Chron. i, 12). See Caphtorim.

Caph'tor (Heb. *Kaphtor'*, כַּפְתּוֹר [כַּפְתֹּר in Deut.], a *chaplet*, as in Amos ix, 1, etc.; Sept. Καππαδοκία, Vulg. *Cappadocia*), a maritime country thrice mentioned as the primitive seat of the Philistines (Deut. ii, 23; Jer. xlvii, 4; Amos ix, 7), who are once called Caphtorim (Deut. ii, 23), as of the same race as the Mizraite people of that name (Gen. x, 14; 1 Chron. i, 12). There has been a great diversity of opinion with regard to the exact situation of that country (see Simonis, *Onom. V. T.* p. 441). See Caphtorim.

1. The general opinion that Caphthor was *Cappadocia* (not the city Cappadocia, or *Caphtora* in Phœnicia, see Schultz, *Leit.* v, 466) is, upon the whole, founded more on the ancient versions of the Bible, such as the Septuagint and the Targums, than on any sound argument (see Bochart, *Phaleg*, iv, 32; Miller, *Syntagm. Hermeneut.* p. 167 sq.; Strauss, *ad Zephaniah*, p. 47). Against this opinion have been urged: (1) The authority of Josephus (*Ant.* i, 6, 2), who seems to seek Caphtor somewhere between Egypt and Ethiopia; (2) that the Caphtorim came originally from Egypt, from which Cappadocia is so far removed that it seems highly improbable that an Egyptian colony should first have emigrated thither, and then again removed to Palestine, still more remote; (3) that Caphtor and Cappadocia are very dissimilar names (but see Heeren in the *Commentt. Soc. Gott.* xiii, 33; Jablonsky, *Opusc.* iii, 1 sq.; Gesenius, *Thesaur.* p. 709; Köster, *Erläuter.* p. 157 sq.) even in sound; (4) that Caphtor is (Jer. xlvii, 4) designated as an island (אִי), though אִי sometimes also signifies a coast. See Cappadocia.

2. Others again, as Calmet (*Dissert. sur l'Origine des Philistins*, p. 321), and still more Lackemacher (*Obser. Phil.* p. 2, 11 sq.), have tried to prove that the Philistines derived their origin from the island of *Crete* (so Rosenmüller, *Alterth.* II, ii, 363; iii, 385; Movers, *Phön.* i, 28; Lengerke, *Ken.* i, 194; Ewald, *Gesch. Isr.* i, 330; Tuch, *Gen.* p. 243; Hitzig, *Zu Zeph.* ii, 5; Bertheau, *Isr. Gesch.* p. 187; Knobel, *Gen.* p. 110; Delitzsch, *Gen.* p. 290; Fürst, *Handwb.* s. v.), because —(1) Caphtor is with Jeremiah an island; (2) the proper name of the Philistines is כְּרֵתִים, *Kerethim'*, "Cherethites" (Ezek. xxv, 16; Zeph. ii, 5; 1 Sam. x, 14); (3) a city *Aptera* existed in Crete (Strabo, x, 479; Pliny, iv, 20). The Sept., however, evidently makes a distinction between the Caphtorim and Cherethim; nor is it probable either that a small island like Crete should be able to send forth thus early so large a body of emigrants as must have landed on the territories of the Avim, so as to be able to expel them and take possession of their country, or that the Phœnicians would allow a seafaring race like the Cretans to settle in their vicinity (see Höck, *Kreta*, p. 367). See Crete.

3. By far more probable is Calmet's previous opinion (found in the first edition of his *Comment. on Genesis*, but which he afterward recalled), that Caphtor is the island of *Cyprus*. From the geographical situation of that island, it may have been known to the Egyptians at a very early period, and they may have sent colonies thither, who afterward removed, from some reason or other, to the southern coast of Palestine bordering on Egypt. Swinton (*Inscr. Cit.* Oxon. 1750, p. 78, 85) actually found on that island an ancient Phœnician coin, with the inscription which he read "Kabdor" (כבדר), not very unlike Kaphtor; but in the *Allgemeine Lit. Zeitung* (Leips. 1825, i, 440) it has been proved that Swinton was mistaken in the reading of that inscription (see Gesenius, *Mon. Phœn.* ii, 320). Opposed to this identification also is the fact that the Cyprians are elsewhere (Gen. x, 4) called Chittim (q. v.). See Cyprus.

4. A still more probable identification is with certain parts of *Egypt*: either (1) the coast of the Egyptian *Delta* (Stark, *Gaza*, p. 76); (2) *Damietta* (Saadias, *Arab. Vers.*, which has "Dimyat;" Haine, *Obs. Sac.* ii, 6, 10); or (3) part of *Morocco* west of Egypt (Quatremère, *Jour. des Savans*, 1846, p. 265). The position of the country, since it was peopled by Mizraites, may naturally be supposed to be in Egypt, or near to it in Africa, for the idea of the south-west of Palestine is excluded by the migration of the Philistines. In Jer. xlvii, 4, the expression אִי כַּפְתּוֹר ("country of Caphtor") has a wider signification than an insular location; for the term אִי denotes any maritime land, whether coast or island, as in the expression *Gentile shores* (אִיֵּי הַגּוֹיִם, Gen. x, 5), by which the northern coasts and the islands of the Mediterranean seem to be intended, the former, in part at least, being certainly included. It must be remembered, however, that the Nile is spoken of as a sea (יָם) by Nahum in the description of No, or Thebes (iii, 8). It is also possible that the expression in Jer. merely refers to the maritime position of the Philistines (comp. Ezek. xxv, 16), and that Caphtor is here poetically used for Caphtorim. Forster (*Epist. ad Michael.* p. 17 sq.) thinks that the Caphtorim had lived on the Egyptian coast, somewhere about Damietta (comp. Benjamin of Tudela, p. 121, Bohn). From hence he supposes a colony of that people, and their brethren and easterly neighbors, the *Casluhim*, had gone forth, in the period between the first wars of the world (described in Gen. xiv) and the birth of Isaac, and settled on the southern coast of Palestine, under the name of *Philistines*, after having expelled the Avim (q. v.), who lived about Gaza. But in subsequent times, Forster thinks, these new Philistines had again sent a colony who conquered the province of Lapethus, in the island of Cyprus. This colony he identifies with the Ethiopians, who lived, according to Herodotus (vii, 88), upon the island. "Following out these suggestions, Reginald Stuart Poole (in the *Encyclopædia Britannica*, 8th ed., article Egypt, p. 419), after a conjecture in Heinii *Dissertt. Sacr.* p. 210 sq., has proposed to recognise Caphtor in the ancient Egyptian name *Coptos* (Κοπτός), which, if literally transcribed, is written in the hieroglyphics *Kebtu*, probably pronounced *Kubt* (Brugsch, *Geogr. Inschr.* pl. xxxviii, No. 899, 900), whence Coptic *Kepto*, Arab. *Kuft*. The similarity of name is so great that it alone might satisfy us, but the correspondence of Αἴγυπτος, as if Αἶα γυπτός, to אִי כַּפְתּוֹר, unless אִי refer to the Philistine coast, seems conclusive. We must not suppose, however, that Caphtor was Coptos: it must rather be compared to the Coptite nome, probably in primitive ages of greater extent than under the Ptolemies, for the number of nomes was in the course of time greatly increased. The Caphtorim stand last in the list of the Mizraite peoples in Gen. and Chron., probably as dwellers in Upper Egypt, the names next before them being of Egyptian, and the earliest names of Libyan peoples. See Egypt.

"The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. It thus appears to have been an event of great importance, and this supposition receives support from the statement in Amos. In the lists of Gen. and Chron., as the text now stands, the Philistines are said to have come forth from the Casluhim—'the Casluhim, whence came forth the Philistines and the Caphtorim'—where the Heb. forbids us to suppose that the Philistines and Caphtorim both came from the Casluhim. Here there seems to have been a transposition, for the other passages are as explicit, or more so, and their form does not admit of this explanation. The period of the migration must have been very remote,

since the Philistines were already established in Palestine in Abraham's time (Gen. xxi, 32, 34). The evidence of the Egyptian monuments, which is indirect, tends to the same conclusion, but takes us yet farther back in time. It leads us to suppose that the Philistines and kindred nations were cognate to the Egyptians, but so different from them in manners that they must have separated before the character and institutions of the latter had attained that development in which they continued throughout the period to which their monuments belong. We find from the sculptures of Rameses III at Medinet Abû that the Egyptians, about 1200 B.C., were at war with the Philistines, the Tok-karu, and the Shayratana of the Sea, and that other Shayratana served them as mercenaries. The Philistines and Tok-karu were physically cognate, and had the same distinctive dress; the Tok-karu and Shayratana were also physically cognate, and fought together in the same ships. There is reason to believe that the Tok-karu are the Carians, and the Shayratana have been held to be the Cherethim of the Bible and the earlier Cretans of the Greeks, inhabiting Crete, and probably the coast of Palestine also (*Encyclop. Brit.* s. v. Egypt, p. 462). All bear a greater resemblance to the Egyptians than does any other group of foreign peoples represented in their sculptures. This evidence points, therefore, to the spread of a seafaring race cognate to the Egyptians at a very remote time. Their origin is not alone spoken of in the record of the migration of the Philistines, but in the tradition of the Phœnicians that they came from the Erythræan Sea [see ARABIA], and we must look for the primæval seat of the whole race on the coasts of Arabia and Africa, where all ancient authorities lead us mainly to place the Cushites and the Ethiopians. See CUSH. The difference of the Philistines from the Egyptians in dress and manners is, as we have seen, evident on the Egyptian monuments. From the Bible we learn that their laws and religion were likewise different from those of Egypt, and we may therefore consider our previous supposition as to the time of the separation of the peoples to which they belong to be positively true in their particular case. It is probable that they left Caphtor not long after the first arrival of the Mizraite tribes, while they had not yet attained that attachment to the soil that afterward so eminently characterized the descendants of those which formed the Egyptian nation. The words of the prophet Amos (ix, 7) seem to indicate a deliverance of the Philistines from bondage. The mention of the Ethiopians there is worthy of note: they are perhaps spoken of as a degraded people. The intention appears to be to show that Israel was not the only nation which had been providentially led from one country to another where it might settle, and the interposition would seem to imply oppression preceding the migration. It may be remarked that Manetho speaks of a revolt and return to allegiance of the Libyans, probably the Lehabim, or Lubim, from whose name Libya, etc., certainly came, in the reign of the first king of the third dynasty, Necherôphês or Necherôchis, in the earliest age of Egyptian history, B.C. cir. 2600 (Cory, *Anc. Frag.* 2d ed. p. 100, 101)." See PHILISTINE.

Caph'torim (Heb. *Kaphtorim'*, כַּפְתֹּרִים; Gen. x, 14, Sept. Γαφθοριείμ, Vulg. *Caphtorim;* Deut. ii, 23, Καππάδοκες, *Cappadoces*, A. V. "Caphtorims;" 1 Chron. i, 12, Χαφοριείμ v. r. Καφθοριείμ, *Caphthorim*, "Caphthorim"), the inhabitants of CAPHTOR (q. v.).

Capistranus, JOHANNES (*Giovanni di Capistrano*), a Franciscan, was born at Capistrano, in the Abruzzi, June 23, 1385. Political troubles, during which he was imprisoned, led him to quit the world, and to assume the Franciscan habit. He led a life of extreme austerity, sleeping only three hours a day, and eating but once daily, without touching flesh, for thirty-six years. He was made Inquisitor at Rome, especially against the Fratricelli (q. v.); and Cave states that, "heading the army of Crusaders, as they were called, he endeavored to root out heresy by fire and sword, and actually burned to the ground eighty-six villages of the Fratricelli in Campania." Pope Eugenius IV sent him in 1439 as nuncio to Sicily, and employed him at the Council of Florence in seeking to effect a union between the Greek and Latin Churches. In 1443 Nicholas V sent him on a crusade into Bohemia and Hungary against the Hussites. After this he stirred up a crusade against the Turks, and in 1456, putting himself at the head of 100,000 men, raised for the relief of Belgrade, then besieged by Mohammed II, he carried the standard in the very foremost of the fight, and obtained a complete victory. He died Oct. 23, 1456, at Villach, in Carinthia. Alexander VII beatified him in 1690, and he was canonized by Benedict XIII in 1724. Among his works are: (1.) *De papæ et concilii, sive Ecclesiæ, auctoritate*, against the Fathers of Basle (Venice, 1580, 4to); and in the *Tractatus Juris* (Ibid. 1584, tom. xiii, pt. i, p. 32):—(2.) *Speculum clericorum*:—(3.) *Speculum conscientiæ*:—(4.) *De Canone pœnitentiali* (all three in the *Tract. Jur.*):—(5.) *De Excommunicatione; Matrimonio; Judicio Universale; Antichristo*, etc.—Cave, *Hist. Lit.* vol. ii, App. p. 153; Hoefer, *Nouv. Biog. Générale*, viii, 580; Baillet, *Vies des Saints*, 23 Oct.; Gieseler, *Ch. History*, period iii, § 132; Wetzer u. Welte, *Kirchen-Lexikon*, ii, 824.

Capitation or POLL-TAX, *among the Jews.* Moses ordained (Exod. xxx, 13) that every Israelite should pay half a shekel *for his soul*, or person, as a redemption, "that there might be no plague among the people, when they were numbered." Many interpreters are of opinion that this payment was designed to take place as often as the people were numbered; and that this payment of the half shekel per head being evaded when David numbered his subjects, God punished the neglect with a pestilence (2 Sam. xxiv, 1). But it is more generally thought that Moses laid this tax on all the people, payable yearly, for the maintenance of the tabernacle, for the sacrifices, wood, oil, wine, flour, habits, and subsistence of the priests and Levites. In our Saviour's time the tribute was punctually paid. See DIDRACHMA. The Israelites, when returned from Babylon, paid one third part of a shekel to the Temple, being disabled, probably, at that time, by poverty, from doing more (Nehem. x, 32). The rabbins observe that the Jews in general, and even the priests, except women, children under thirteen years of age, and slaves, were liable to pay the half shekel. The collectors demanded it in the beginning of Nisan, but used no compulsion till the Passover, when they either constrained its payment or took security for it. After the destruction of the Temple, the Jews were compelled to pay the half shekel to the temple of Jupiter Capitolinus. See ASSESSMENT.

Capito, WOLFGANG FABRICIUS, an eminent coadjutor of Œcolampadius and Bucer in the Reformation, was born at Haguenau in 1478, studied medicine, and afterward theology, and became D.D. at Freiburg, 1506. His father's name was Köpfstein, and he was a blacksmith, whence the name Fabricius. For a while he was lecturer in the University of Freiburg, and in 1512 he became parish priest at Bruchsal, where he studied Hebrew with a converted Jew, made the acqaintance of Œcolampadius, and was led to the study of Luther's writings. Called to the cathedral at Basle, he there became intimate with Erasmus; and in his lectures to the students on Romans he showed reformatory tendencies. In 1520 he became chaplain to Albrecht, elector and archbishop of Mayence, whom he defended, gently, against one of Luther's attacks, on account of the traffic in indulgences. Luther (Jan. 17, 1522) sharply rebuked Capito as a time-server. Stung, and perhaps convicted, Capito abandoned Mayence (1523), and took up a prebend there which Leo X had

given him. At Strasburg Capito's prudence led him to moderate the zeal of Zell and other reformers; but he soon became himself ardent and earnest in the cause. From that time on he was one of the most efficient of all the coadjutors of Luther. In 1524 he married. In 1530 he took part in preparing the *Confessio Tetrapolitana* (q. v.). His timidity, however, often drew on him the reproaches of Luther. In 1535 he had an interview with Calvin, at which he endeavored to bring about such a modification of the Genevan views on the subject of the Lord's Supper as might lead to a better understanding with the Lutherans. He died of the plague in 1541. He wrote many works, among them a *Vita Œcolampadii*, *Enarrationes in Habucuch et Hoseam* (Strasb. 1526 and 1528), and *Responsio de missâ, matrimonio et jure magistratûs in religionem* (1537). Capito was a very learned man, and was in advance of his contemporaries also in toleration. See Baum, *Capito und Butzer, Strassburg's Reformatoren* (3d vol. of *Leben und ausgewählte Schriften der Väter der reform. Kirche* [Elberfeld, 1860]); Adami, *Vit. Theolog.* 41; Herzog, *Real-Encyklopädie*, ii, 561; Middleton, *Evangelical Biography*, i, 147; *Biblioth. Sacra*, Jan. 1861.

Capitularies (*capitula*, chapters), a term applied especially to the statutes of the Frankish kings made in the assemblies of bishops and lords of the kingdom, and called *capitula* because published in chapters. The bishops reduced into the form of articles such rules as they deemed necessary, taken for the most part from the canons. The temporal lords also drew up on their part ordinances taken from the civil laws and customs, which the king afterward ratified and confirmed. These capitularies were in force throughout the kingdom. Those best known are the capitulars of Charlemagne and Louis le Debonnaire, which were first collected by Ansegis (q. v.) A.D. 827. The work is divided into four books, to which, about 845, Benedict, a deacon of Mayence, added some which Ansegis had omitted, together with the capitulars of Carloman and Pepin. In the eighth and following centuries, bishops were accustomed to give the names of capitularies to the rules which they drew up from the canons of councils for the regulation of their dioceses. Such capitularies had no force beyond the particular diocese for which they were made, except they were confirmed by a provincial synod, which made them binding on the whole province. Other prelates, however, sometimes adopted the capitularies of particular bishops. An edition of the early capitularies was printed by Baluze (Paris, 1677, 2 vols. 4to), reprinted and re-edited by Chiniac, 1780; the latest and best edition is found in Pertz, *Monum. Germ. Hist.* (*Legum*), t. i, ii (Hanover, 1835–1837).—Farrar, *Eccl. Dict.* s. v.; Herzog, *Real-Encyklopädie*, ii, 563.

Capnis. See Reuchlin.

Cappado'cia (Καππαδοκία, explained by Herod. vii, 72, as Persic, and lately thought by Lassen to be found on inscriptions in the form *Katpadhula;* but Benfey, *Monatsnamen*, p. 117, interprets as *Kappadukja*, "province of good horses"), an ancient and the easternmost province of Asia Minor, bounded on the north by Pontus, on the east by the Euphrates and Armenia Minor, on the south by Mount Taurus (beyond which are Cilicia and Syria), and on the west by Phrygia and Galatia (Strabo, xii, p. 533 sq.; Ptolemy, v, 6; Pliny, vi, 3). The country is mountainous and abounds in water, and was celebrated for the production of wheat, for its fine pastures, and for its excellent breed of horses, asses, and sheep (Strabo, xii, 539; Solin. 47). The inhabitants were notorious for their dulness and vice (Isidor. Pelus. i, 281; iv, 197; Justin. xxxviii, 2; comp. Porphyrog. *Them.* i, 2). They were called "Syrians" (comp. Jablonsky, *De lingua Lycaon.* in his *Opusc.* iii, 1 sq.; Gesen. *Mon. Phœn.* p. 11) in the age of Herodotus (i, 72; v, 49), and even in Strabo's days they bore the name of Λευκόσυροι, or "White Syrians" (xii, p. 544), in contradistinction to those dwelling beyond the Taurus, whose complexion was darkened by the sun (Strabo, xvi, 787). By the ancient interpreters (see Philo, *Opp.* ii, 676) they were thought to be meant by "the land of Caphtor" (q. v.); but the ancient name of Cappadocia was *Katpatuk* or *Katapatuka* (Rawlinson, *Journ. of the Asiat. Soc.* xi, 1, 95). Cappadocia was subjugated by the Persians under Cyrus, but after the time of Alexander the Great it had kings of its own, although tributary to the Seleucidæ. Its geographical limits on the west and north were variable. In early times the name reached as far northward as the Euxine Sea. The region of Cappadocia, viewed in this extent, constituted two satrapies under the Persians, and afterward two independent monarchies. One was Cappadocia on the Pontus, the other Cappadocia near the Taurus. Here we have the germ of the two Roman provinces of Pontus and Cappadocia. See Pontus. Several of the monarchs who reigned in Cappadocia Proper bore the name of Ariarathes (q. v.). One of them is mentioned in 1 Macc. xv, 22. The last of these monarchs was called Archelaus (see Joseph. *Ant.* xvi, 4, 6). He was treacherously treated by the emperor Tiberius, who reduced his kingdom to a province A.D. 17, including what was anciently called Lesser Armenia (Tacit. *Ann.* ii, 42; Dio Cass. lvii, 17). Christianity was very early propagated in Cappadocia, for the apostle Peter names it in addressing the Christian churches in Asia Minor (1 Pet. i, 1). Cappadocians (prop. Καππάδοκες, also Καππαδόκαι) were present at Jerusalem on the day of Pentecost (Acts ii, 9). The Jewish community in this region doubtless formed the nucleus of the Christian; and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus (Josephus, *Ant.* xii, 3, 4). The Roman period, through the growth of large cities and the construction of roads, would afford increased facilities for the spread both of Judaism and Christianity. It should be observed that Cappadocia was easily approached from the direction of Palestine and Syria by means of the pass called the Cilician Gates, which led up through the Taurus from the low coast of Cilicia, and that it was connected, at least under the later emperors, by good roads with the district beyond the Euphrates (see *Penny Cyclopædia*, s. v.; Smith, *Dict. of Class. Geogr.* s. v.). See Asia Minor.

Coin of Cappadocia.

Cappadocia was one of the seven provinces assigned to the diocese of Pontus, at its erection, by Constantine the Great and Constantius. Under the emperor Valens the province of Cappadocia was divided into the provinces of Cappadocia Prima and Secunda, which last was by the emperor Justinian subdivided, the new province being styled Cappadocia Tertia, and having for its metropolitan see Mocissus, or, as it was thenceforward styled, Justinianopolis. The chief see of the second Cappadocia was Tyana, and of the first, Cæsarea, which last church was the mother and head of the whole Pontic diocese. See Cæsarea.

Cappel (Cappellus), **Jacques**, a learned French Protestant divine, was born at Rennes in March, 1570, of an ancient and honorable family, which produced many theologians, jurists, and statesmen in the fifteenth, sixteenth, and seventeenth centuries. He became pastor at Sedan, and in 1599 professor of Hebrew at the academy there, and afterward of theology, which post he held until his death, September 7, 1624. Among his numerous writings are, *Les Livres*

du Babel, ou l'histoire du Siège Romain (Sedan, 1616, 8vo); *Historiæ Ecclesiasticæ Centuriæ quinque* (Sedan, 1622, 4to). After his death appeared his *Observationes in N. T. except's Act. et Apocalyps. procurante fratre Ludovico Cappello* (Amst. 1677, 4to):—*Observationes in libros Vet. Test.* (in L. Cappel's *Commentarii*, Amst. 1689, fol.). A list of his works is given by Niceron, xxii, 405.—Hoefer, *Nouv. Biog. Générale*, viii, 615; Haag, *La France Protestante*, s. v.

Cappel (CAPPELLUS), **Louis**, younger brother of the foregoing, was born near Sedan, October 15, 1585. In 1609 the church in Bordeaux provided funds for him, and he spent four years in travel and study in England, Belgium, and Germany. In 1613 he became professor of Hebrew, and in 1633 (with Amyraldus and Placæus) was professor of divinity at Saumur. He was a pious Christian, a most learned theologian, and a thorough Protestant in a time of great trial. Besides his theological and exegetical writings, he is chiefly memorable for his controversy with Buxtorff concerning the antiquity of the vowel points. His view was published in his *Arcanum punctionis revelatum* (1623; reprinted in the appendix to his *Comm. et Notæ Criticæ*, Amst. 1689). It was, that these points were invented by the Jews of Tiberias some six hundred years subsequently to the death of Christ; whereas Buxtorff held them to be coeval with the language. The opinion of Cappellus has since been generally received. His greatest work was the *Critica Sacra*, containing, among many other learned and valuable dissertations, a collection of various readings and errors which had crept into the text of the Bible. He was occupied thirty-six years upon this work, which the Protestants so much disliked that they hindered the impression of it, and it was not given to the public until 1650, when John, his son, who joined the communion of the Church of Rome, obtained leave of the king to print it. Buxtorff (the son) criticised it sharply, and also bitterly attacked Cappellus for his theory of the vowel points in his *Tractatus de Punctorum Origine*, etc. (Basel, 1648; 3d part 1651, 4to). Cappellus replied in a *Justa defensio* (printed in later editions of the *Critica Sacra*). He farther published, on the text of the O. T., *Diatriba de veris et Antiquis Ebræorum literis* (Amst. 1645, 12mo), in reply to Buxtorff. A new edition of the *Crit. Sac.* appeared at Halle (1775–86) in 3 vols. 8vo. In 1610 he visited Oxford. He died at Saumur, June 18, 1658. Among his other works are, *Historia Apostolica illustrata* (Geneva, 1634, 4to; and in the London edition of the *Critica Sacra*, 1660):—*Spicilegium post messem*, a collection of criticisms on the New Testament (Geneva, 1632, 4to):—*De critica nuper a se edita ad Rev. virum D. Jacob. Usserium, Armacanum in Hibernia Episcopum, Epistola Apologet.* (Salm. 1651, 4to):—*Commentarii et Notæ Criticæ in Vet. Test.* (Amst. 1689, fol.). A full list is given by Haag, *La France Protestante*, iii, 199; in Niceron, vol. xxii; and also in the edition, by his son, of his *Comment. et Notæ Criticæ in V. T.* (Amst. 1689, fol.), which also gives biographical sketches, under the title *De Cappellorum Gente*, of the distinguished members of the Cappel family. His Correspondence with Usher is given in Parr's Collection of Usher's Letters. He also wrote *Chronologia Sacra* (1655, 4to), reprinted among the prolegomena of Walton's Polyglot.—Hoefer, *Nouv. Biog. Générale*, viii, 615; Herzog, *Real-Encyklopädie*, ii, 566.

Captain is the rendering, in the Auth. Vers., of numerous Heb. and several Greek words, of which the following only require special elucidation. For the כָּרִי, *kari'*, rendered "captains," 2 Kings xi, 4, 19, see CHERETHITES.

(1.) As a purely military title, captain answers to שַׂר, *sar*, in the Hebrew army, and χιλίαρχος (*tribunus*) in the Roman. See ARMY. The "captain of the guard" (στρατοπεδάρχης) spoken of in Acts xxviii, 16 was the Prætorian *præfect*. See CHRONOLOGY, p. 312, b.

(2.) קָצִין, *katsin'*, which is occasionally rendered *captain*, applies sometimes to a military (Josh. x, 24; Judg. xi, 6, 11; Isa. xxii, 3; Dan. xi, 18), sometimes to a civil command (e. g. Isa. i, 10; iii, 6): its radical sense is *division*, and hence *decision* without reference to the means employed: the term illustrates the double office of the שֹׁפֵט, *shophet'*, or *dictator* ("judge"). See JUDGE.

(3.) שָׁלִישׁ, *shalish'* (Exod. xiv, 7; xv, 4; 2 Sam. xxiii, 8; 1 Kings ix, 22; 2 Kings ix, 25; x, 25; xv, 25; 1 Chron. xi, 11; xii, 18; 2 Chron. viii, 9; "lord," 2 Kings vii, 2, 17, 19; Ezek. xxiii, 23; "prince," Ezek. xxiii, 15), prop. a *third* man, i. e. one of three, Gr. τριστάτης, a higher order of soldiers, who fought from chariots, *chariot-warriors* (Exod. xiv, 7; xv, 4; 1 Kings ix, 22; ἀναβάται, παραβάται, Hom. *Iliad*, xxiii, 32; Eurip. *Supplic.* 679); employed also for the body-guard of kings (1 Kings ix, 22; 2 Kings x, 25; 1 Chron. xi, 11; xii, 18). The Sept. has τριστάται, i. e. according to Origen and Gregory of Nyssa (in the *Catenæ*), "soldiers fighting from chariots," and so called because each chariot contained *three* soldiers, one of whom managed the horses, while the other two fought (comp. Ewald, *Gesch. Isr.* ii, 81). For although on the Egyptian monuments usually but one, or at most two appear in the war-chariots, yet occasionally, as certainly in the Assyrian bas-reliefs, in addition to the driver and the warrior, an armor-bearer or umbrella-bearer is depicted as standing in the chariot, who might properly be termed *ternarius*, or a *third man*. See CHARIOT. It is true the Hebrew army did not originally consist of cavalry, although chariots were in use among the Canaanites, and the first occurrences of the term שָׁלִישׁ are in connection with the Egyptians; but at a later date a chariot-squadron was organized (1 Kings x, 26; comp. ix, 9; v, 6; 2 Sam. viii, 4). Consequently, it is not strange that among the battalions of David and Solomon (2 Sam. xxiii, 8) there should be named as a prominent hero the leader of these *shalishim* (רֹאשׁ הַשָּׁלִשִׁי, or, rather, הַשְּׁלֹשִׁים; comp. Gesenius, *Lehrgeb.* p. 525; Böttcher, *Spec.* p. 38 sq.; Ewald, *Gramm. Heb.* 5th ed. § 152, c. 177 a). Solomon's chariot-men (שָׁלִשָׁיו) are mentioned (1 Kings ix, 22; 2 Chron. viii, 9) as next to the præfects of his chariot-force (שָׂרֵי רִכְבּוֹ). After the times of Solomon there certainly were chariot-combatants (*essedarii*) as royal officers in the northern kingdom, and in the reign of Jehu runners and charioteers (הָרָצִים וְהַשָּׁלִשִׁים) formed, as it were, the king's Prætorian cohort (2 Kings x, 25); and the chief of these Prætorians (called by eminence הַשָּׁלִישׁ or שָׁלִישׁ הַמֶּלֶךְ) was among the most noble of the regal attendants (q. d. adjutant-general). Accordingly, Joram had an officer of this title, "on whose hand the king leaned" (2 Kings vii, 2, 17, 19); Jehu's charioteer was Bidkar (2 Kings ix, 26); and Pekah held this eminent office under Pekahiah (2 Kings xv, 25). Others, however (after Drusius), hold that the שָׁלִישׁ was merely the third officer in rank after the king, or commanded a third part of the army (comp. the Roman *tertiarii*). So the Greek glossarists (ap. Drusius *ad Ezech.* and in *Fragm. Vet. interpr. Gr.* p. 145; Schleusner, *Nov. Thesaur.* s. v. τριστάτης; Dufresne, *Glossar.* s. v.; see Rosenmüller, *Scholia* ad Exod. xiv, 7). See CHIEF OF THREE.

(4.) The "captain of the Temple" (στρατηγὸς τοῦ ἱεροῦ), mentioned by Luke (Acts iv, 1; v, 24) in connection with the priests, was not a military officer, but superintended the guard of priests and Levites who kept watch by night in the Temple. The "captains" mentioned Luke xxii, 4, were probably his subalterns.

The office appears to have existed from an early date; the "priests that kept the door" (2 Kings xii, 9; xxv, 18) are described by Josephus (*Ant.* x, 8, 5) as "the officers guarding the Temple" (*τοὺς φυλάσσοντας τὸ ἱερὸν ἡγεμόνας*): a notice occurs in 2 Macc. iii, 4, of a præfect of the Temple (*προστάτης τοῦ ἱεροῦ*); this officer is styled *στρατηγός* or captain by Josephus (*Ant.* xx, 6, 2; *War*, vi, 5, 3); and in the Mishna (*Middoth*, i, § 2) איש הר הבית, "the captain of the mountain of the Temple;" his duty, as described in the place last quoted, was to visit the posts during the night, and see that the sentries were doing their duty (comp. 1 Chron. ix, 11; 2 Chron. xxxi, 13; xxxv, 8, 9; Jer. xx, 1). See TEMPLE.

The rank or power of an Israelitish captain was designated by the number of men under his command, as captain of fifty, or captain of a thousand [comp. CENTURION]; and the commander or chief of the whole army was called the captain of the host (q. v.). The divisions of the army were regulated in some measure by the division of families, as the heads of families were usually officers. Captains of hundreds, or larger companies, were probably what would be called in modern phrase staff-officers, and formed the councils of war. See WAR. Sometimes distinguished men who were not Hebrews were promoted to high stations in the army (Deut. i, 15; 1 Chron. xiii, 1; 2 Chron. xxv, 5; 2 Sam. xxiii, 39). See OFFICER.

God is called *Captain* ("Prince") *of the Host* (שַׂר הַצָּבָא, Dan. viii, 11), not as equivalent to "Lord of Hosts," but because he is the head and protector of his people. So in the N. T. our Lord is called Captain of his people's salvation (*ἀρχηγὸς τῆς σωτηρίας αὐτῶν*, Heb. ii, 10), because he is the beginner, source, and author of their salvation, the head of his Church, which he conducts, with and in himself, to blessedness (comp. Josh. v, 14). See JEHOVAH.

Captive (properly שְׁבִי, *shebi'*; Gr. *αἰχμάλωτος*) is distinguished from a prisoner (q. v.) or one in bondage (q. v.). See CAPTIVITY. Various indignities and cruelties were inflicted on those who had the misfortune to be taken captive in war. Those who surrendered were led out with halters as if for execution (1 Kings xx, 32). See BEHISTUN. On some occasions particular districts were marked out with a line for destruction (2 Sam. viii, 2). The victors set their feet upon the necks (q. v.) of the captured kings and nobles (Josh. x, 24), or mutilated their persons by cutting off their thumbs, toes, or ears (Judg. i, 7; 2 Sam. iv, 12; Ezek. xxiii, 25); and sometimes they put out their eyes (q. v.) by passing a red-hot iron over them, or literally scooped or dug them out of their sockets (2 Kings xxv, 7; Isa. lxi, 1). These cruelties are still practised under some of the despotic governments of the Eastern countries. See PUNISHMENT. It was the barbarous custom of the conquerors of those times to suspend their unhappy cap-

Captives with "ropes on their heads." From the Egyptian Monuments.

Ancient Assyrians flaying Captives alive.

tives by the hand (Lam. v, 12), and also to make them bow down that they might go over them (Isa. li, 23); sometimes they were thrown among thorns, were sawn asunder, beaten to pieces with threshing instruments, or had imposed upon them the severest and most laborious occupations (Judg. viii, 7; 2 Sam. xii, 31; 1 Chron. xx, 3). The soldiers who were taken were deprived of all their property and sold naked into servitude. When the city was taken by assault, all the men were slain; the women and children were carried away captive, and sold at a very low price (Isa. xx, iii, 4; xlvii, 3; 2 Chron. xxviii, 9-15; Psa. xliv, 12; Mic. i, 11; Joel iii, 3). See SIEGE. Sometimes the conqueror stripped the wretched prisoners naked, shaved their heads, and made them travel in that condition, exposed to the heat of a vertical sun by day, and the chilling cold of the night. Nor were women exempted from this treatment (Isa. iii, 17). To them this was the height of indignity, as well as of cruelty, especially to those described by the prophets, who had indulged themselves in all manner of delicacies of living, and all the superfluities of ornamental dress, and even whose faces had hardly ever been exposed to the sight of men. Women and children were also exposed to treatment at which humanity shudders (Nah. iii, 5, 6; Zech. xiv, 2; Esth. iii, 13; 2 Kings viii, 12; Psa. cxxxvii, 9; Isa. xiii, 16, 18; 2 Kings xv, 16; Hos. xiii, 16; Amos i, 13). Sometimes the people were carried into captivity, and transplanted to distant countries: this was the case with the Jews (Jer. xx, 5; xxxix, 9, 10; xl, 7; 2 Kings xxiv, 12-16). In some cases the conquered nations were merely made tributary (2 Sam. viii, 6; 2 Kings xiv, 14). To be tributary, however, was considered a great ignominy, and was a source of reproach to the idol deities of the countries who were thus subjected (2 Kings xix, 8, 13). It was likewise a custom among the heathens to carry in triumph the images of the gods of such nations as they had vanquished (Isa. xlvi, 1, 2; Jer. xlviii, 7; Dan. xi, 8; Amos i, 15). Still farther to show their absolute superiority, the victorious sovereigns used to change the names of the monarchs whom they subdued (2 Kings xxiv, 17; 2 Chron. xxxv, 21, 22; xxxvi, 4; Dan. i, 7). The conquerors, however, were not always destitute of humanity. In many instances they permitted the conquered kings to retain their authority, only requiring from them the promise of good faith and the payment of tribute. But if in such a case the kings rebelled, they were treated with the greatest severity (Gen. xiv, 4-11; 2 Kings xxiii, 34; xxiv, 1-14; Isa. xxiv, 2; Jer. xx, 5, 6). See TRIUMPH.

Evacuation of a captured City. From the Assyrian Monuments.

Captivity (properly some form of the root שָׁבָה, *shabah'*, to *take captive*; but frequently expressed by other Heb. words). The experience was so frequent as to have become a metaphorical expression (Job xlii. 10). The bondage (q. v.) of Israel in Egypt, and their subjugation at different times by the Philistines and other nations [see JUDGES], are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel's vision (ch. vii), reckon their national captivities as four—the Babylonian, Median, Grecian, and Roman (Eisenmenger, *Entdecktes Judenthum*, i, 748). But the popular distinction usually confines the term to the conquest and dispersion of the "ten northern" tribes by the Assyrians, the subsequent deportation of the remaining "two tribes" by the Babylonians, and the final disruption of the entire Jewish polity by the Romans. See CAPTIVE.

The word *Captivity*, as applied to the people of Israel, has been appropriated, contrary to the analogy of our language, to mean Expatriation. The violent removal of the entire population of a city, or sometimes even of a district, is not an uncommon event in ancient history. As a measure of policy, no objection to it on the ground of humanity was felt by any one, since, in fact, it was a very mild proceeding, in comparison with that of selling a tribe or nation into slavery. Every such destruction of national existence, even in modern times, is apt to be embittered by the simultaneous disruption of religious bonds; but in the ancient world, the positive sanctity attributed to special places, and the local attachment of Deity, made expatriation doubly severe. The Hebrew people, for instance, in many most vital points, could no longer obey their sacred law at all when personally removed from Jerusalem; and in many others they were forced to modify it by reason of their change of circumstances. Two principal motives impelled conquering powers thus to transport families in the mass: first, the desire of rapidly filling with a valuable population new cities, built for pride or for policy; next, the determination to break up hostile organizations, or dangerous reminiscences of past greatness. Both might sometimes be combined in the same act. To attain the former object, the skilled artisans would in particular be carried off; while the latter was better effected by transporting all the families of the highest birth, and all the well-trained soldiery. The Greeks used the special epithet ἀνάσπαστοι for a population thus removed (Herod. vi, 93, passim).

I. ASSYRIAN CAPTIVITY OF "ISRAEL."—1. *Its Occurrence.*—The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul or Sardanapalus, according to H. Rawlinson (*Outline of Assyrian History*, p. 14; but comp. G. Rawlinson, *Herodotus*, i, 466), imposed a tribute, B.C. cir. 762, upon Menahem (1 Chron. v, 26, and 2 Kings xv, 19). Tiglath-Pileser carried away, B.C. cir. 738, the trans-Jordanic tribes (1 Chron. v, 26) and the inhabitants of Galilee (2 Kings xv, 29; compare Isa. ix, 1)

Ancient Assyrian Procession of Captives.

to Assyria. Shalmaneser twice invaded (2 Kings xvii, 3, 5) the kingdom which remained to Hoshea, took Samaria, B.C. 720, after a siege of three years, and carried Israel away into Assyria. See HOSHEA. In an inscription interpreted by Rawlinson (*Herodotus*, i, 472), the capture of Samaria is claimed by king Sargon (Isa. xx, 1) as his own achievement. The cities of Samaria were occupied by people sent from Babylon, Cuthah, Ava, Hamath, and Sepharvaim; and Halah, Habor, Hara, and the river of Gozan became the seats of the exiled Israelites. See ISRAEL, KINGDOM OF.

The theory of this history is, that in the time of these conquering monarchs Assyria was rapidly rising into power, and to aggrandize Nineveh was probably a great object of policy. It is therefore credible, as Tiglath-Pileser had received no particular provocation from the Israelites, that he carried off those masses of population to stock his huge city with. His successor Shalmaneser made the Israelitish king Hoshea tributary. When the tribute was withheld, he attacked and reduced Samaria, and, by way of punishment and of prevention, transported into Assyria and Media its king and all the most valuable population remaining to the ten tribes (2 Kings xvii, 6). That he did not carry off all the peasants is probable from the nature of the case; Hengstenberg, however, maintains the contrary (*Genuineness of the Pentateuch*, i, 71 sq. Edinb. tr.). The families thus removed were in a great measure settled in very distant cities, many of them probably not far from the Caspian Sea, and their place was supplied by colonies from Babylon and Susis (2 Kings xvii, 24). See ASSYRIA.

2. *Condition of the Assyrian Captives.*—This was probably not essentially different in its external circumstances from that of their Judaite brethren subsequently during the exile in Babylon. (See below.) We know nothing, except by inference from the book of Tobit (q. v.), of the religious or social state of the Israelitish exiles in Assyria. Doubtless the constant policy of seventeen successive kings had effectually estranged the people from that religion which centred in the Temple, and had reduced the number of faithful men below the 7000 who were revealed for the consolation of Elijah. Some priests at least were among them (2 Kings xvii, 28), though it is not certain that these were of the tribe of Levi (1 Kings xii, 31). The people had been nurtured for 250 years in idolatry in their own land, where they departed not (2 Kings xvii, 22) from the sins of Jeroboam, notwithstanding the proximity of the Temple, and the succession of inspired prophets (2 Kings xvii, 13) among them. Deprived of these checks on their natural inclinations (2 Kings xvii, 15), torn from their native soil, destitute of a hereditary king, they probably became more and more closely assimilated to their heathen neighbors in Media. And when, after the lapse of more than a century, they were joined by the first exiles from Jerusalem, very few families probably retained sufficient faith in the God of their fathers to appreciate and follow the instruction of Ezekiel. But whether they were many or few, their genealogies were probably lost, a fusion of them with the Jews took place, Israel ceasing to envy Judah (Isa. xi, 13); and Ezekiel may have seen his own symbolical prophecy (xxxvii, 15–19) partly fulfilled.

The nation thus transported by the monarchs of Assyria and Babylon were treated with no unnecessary harshness, even under the dynasty that captured them. So far were they from the condition of *bondsmen* (which the word "captive" suggests), that the book of Susanna represents their elders in Babylon as retaining the power of life and death over their own people (i, 28), when Daniel was as yet a very young man. The authority of that book cannot indeed be pressed as to the chronology, yet the notices given by Ezekiel (xiv, 1; xx, 1) concur in the general fact that they still held an internal jurisdiction over their own members. At a later time, under the Seleucidæ, we have distinct proof that in the principal cities the Jews were governed by an officer (ἐθνάρχης) of their own nation, as also in Egypt under the Ptolemies. The book of Tobit exhibits Israelites in Media possessed of slaves themselves (viii, 18); the book of Daniel tells us of a Jew in eminent political station, and that of Esther celebrates their power and consequence in the Persian empire. Under the Seleucidæ [see ANTIOCHUS] they were occasionally important as garrison-soldiers; and it may be suspected that, on the whole, their lot was milder than that of the other conquered nations among which they dwelt.

3. *Eventual Fate of the Exiles in Assyria.*—Many attempts have been made to discover the ten tribes existing as a distinct community. Josephus (*Ant.* xi, 5, 2) believed that in his day they dwelt in large multitudes somewhere beyond the Euphrates, in Arsareth, according to the author of 2 Esd. xiii, 45. Rabbinical traditions and fables, committed to writing in the Middle Ages, assert the same fact (Lightfoot, *Hor. Hebr. in* 1 *Cor.* xiv, Appendix), with many marvellous amplifications (Eisenmenger, *Ent. Jud.* vol. ii, ch. x; Jahn, *Hebrew Commonwealth*, App. bk. vi). The imagination of Christian writers has sought them in the neighborhood of their last recorded habitation; Jewish features have been traced in the Affghan tribes; rumors are heard to this day of a Jewish colony at the foot of the Himalayas; the Black Jews of Malabar claim affinity with them; elaborate attempts have been made to identify them with the Tartars (G. Fletcher, *Israel Redux*, Lond. 1677), and more recently with the Nestorians (Grant's *Nestorians*, N. Y. 1841), and in the seventeenth century with the Indians of North America. But, though history bears no witness of their present distinct existence, it enables us to track the footsteps of the departing race in four directions after the time of the Captivity: (1.) Some returned and mixed with the Jews (Luke ii, 36; Phil. iii, 5, etc.). (2.) Some were left in Samaria, mingled with the Samaritans (Ezra vi, 21; John iv, 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and, mixing with the Jews, formed colonies throughout the East, and were recognised as an integral part of the Dispersion (see Acts ii, 9; xxvi, 7; Buchanan's *Christian Researches*, p. 212), for whom, probably ever since the days of Ezra, that plaintive prayer, the tenth of the *Shemoneh Esre*, has been daily offered, "Sound the great trumpet for our deliverance, lift up a banner for the gathering of our exiles, and unite us all together from the four ends of the earth." (4.) Most, probably, apostatized in Assyria, as Prideaux (sub ann. 677) supposes, and adopted the usages and idolatry of the nations among whom they were planted, and became wholly swallowed up in them. Dissertations on the Ten Tribes have been written by Calmet (*Commentaire Littéral*, vol. iii and vi) and others (the latest by J. Kennedy, Lond. 1855); also innumerable essays and disquisitions scattered in the works of travellers, and in the pages of various periodicals, mostly of a highly fanciful character. Every scriptural intimation respecting them, however, goes to show that they shared the ultimate history of their brethren of the kingdom of Judah transported to the same or adjoining parts. See below.

II. BABYLONIAN CAPTIVITY OF "JUDAH."—1. *Its Date.*—Sennacherib, B.C. 713, is stated (Rawlinson, *Outline*, p. 24; but comp. Demetrius ap. Clem. Alexand. *Stromata*, i, 21, incorrectly quoted as confirming the statement) to have carried into Assyria 200,000 captives from the Jewish cities which he took (2 Kings xviii, 13). Nebuchadnezzar, early in his reign, B.C. 606–562, repeatedly invaded Judæa, and finally besieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and Temple. Two distinct deportations are mentioned in 2 Kings xxiv, 14, and xxv, 11; one in 2 Chron. xxxvi, 20; three in

Jer. lii, 28, 29, and one in Dan. i, 8. The two principal deportations were, (1) that which took place B.C. 598, when Jehoiachin, with all the nobles, soldiers, and artificers were carried away; and (2) that which followed the destruction of the Temple and the capture of Zedekiah, B.C. 588. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place, under the orders of Nebuchadnezzar, before or after the two principal deportations. The third is located by the date in B.C. 582. The captivity of certain selected children, B.C. 607, mentioned by Daniel (i, 3, 6), who was one of them, may have occurred when Nebuchadnezzar (q. v.) was colleague or lieutenant of his father Nabopolassar, a year before he reigned alone. The captivity of Ezekiel (q. v.) dates from B.C. 598, when that prophet, like Mordecai, the uncle of Esther (ii, 6), accompanied Jehoiachin.

There is a difficulty in the statement with which the book of Daniel opens, which is generally interpreted to mean that *in the third year* of Jehoiakim, Nebuchadnezzar besieged and captured Jerusalem, partially plundered the Temple, and carried off the first portion of the people into captivity, among whom was Daniel. The text, however, does not explicitly say so much, although such is the obvious meaning; but if this is the only interpretation, we find it in direct collision with the books of Kings and Chronicles (which assign to Jehoiakim an *eleven* years' reign), as also with Jeremiah xxv, 1. The statement in Daniel partly rests on 2 Chron. xxxvi, 6, which is itself not in perfect accordance with 2 Kings xxiv. In the earlier history, the war broke out during the reign of Jehoiakim, who died before its close; and when his son and successor Jehoiachin had reigned three months, the city and its king were captured. But in the Chronicles, the same event is made to happen twice, at an interval of three months and ten days (2 Chron. xxxvi, 6 and 9), and even thus we do not obtain accordance with the received interpretation of Daniel i, 1-3. It seems, on the whole, the easiest supposition that "the third *year* of Jehoi*akim*" is there a mistake for "the third *month* of Jehoi*achin*." Hengstenberg, however, and Hävernick defend the common reading, and think they reconcile it with the other accounts; which may not unreasonably be done by understanding the date in Dan. i, 1, to refer to the *setting out* of Nebuchadnezzar on the campaign in question. See JUDAH, KINGDOM OF.

There has been considerable difference of opinion as to how the 70 years of captivity spoken of by Jeremiah (xxv, 12; xxix, 10) are to be estimated. A plausible opinion would make them last from the destruction of the first Temple, B.C. 588, to the finishing of the second, B.C. 516; but the words of the text so specify "the punishing of the king of Babylon" as the end of the 70 years—which gives us the date B.C. 538—that many, with Jahn, cling to the belief that a first captivity took place in the third year of Jehoiakim, B.C. 605. But, in fact, if we read Jeremiah himself, it may appear that in ch. xxv he intends to compute the 70 years from the time *at which he speaks* (ver. 1, "in the fourth year of Jehoiakim," i. e. B.C. 604); and that in xxix, 10, the number "seventy years" is still kept up, in remembrance of the former prophecy, although the language there used is very lax. There seem, in fact, to be two, if not more, co-ordinate modes of computing the period in question, used by the sacred writers, one *civil*, and extending from the first invasion by Nebuchadnezzar to the decree of Cyrus B.C. 606-536), and the other *ecclesiastical*, from the burning of the Temple to its reconstruction (B.C. 588-517). See SEVENTY YEARS' CAPTIVITY.

2. *Its Extent*.—Jeremiah dates by the years of Nebuchadnezzar's reign, and estimates that in his seventh year 3023 were carried off, in his eighteenth 832, and in his twenty-third only 745, making in all, as the writer is careful to note, 4600 (Jer. lii, 28, etc.). The third removal he ascribes to Nebuzaradan, the Babylonian general. That some misunderstanding here exists, at least in the *numbers*, appears undeniable; for 4600 persons was a very petty fraction of the Jewish people; and, in fact, 42,360 are stated to have returned immediately upon the decree of Cyrus (Ezra ii, 64). In 2 Kings xxiv, 8-16, we find 18,000 carried off at once, in the third month of king Jehoiachin, and in the eighth year of Nebuchadnezzar, which evidently is the same as the first removal named by Jeremiah. After this, the vassal king Zedekiah having rebelled, his city is beleaguered, and finally, in his eleventh year, is reduced by Nebuchadnezzar in person; and in the course of the same year, "the nineteenth of Nebuchadnezzar" (2 Kings xxv, 8), Nebuzaradan carries away all the population except the peasants. Perhaps we need not wonder that no mention is made in the book of Kings of the third deportation, for the account of the destruction was in a manner complete upon the second invasion. The first expatriation was directed to swell the armies and strengthen the towns of the conqueror; for of the 18,000 then carried away, 1000 were "craftsmen and smiths, all strong and apt for war," and 7000 of the rest are called "mighty men of valor." (Yet there is an uncertainty about verses 14 and 16 in 2 Kings xxiv. Probably here, as well as in Jer. liii, *heads of families* only are counted.) It was not until the rebellion of Zedekiah that Nebuchadnezzar proceeded to the extremity of breaking up the national existence. As the Temple was then burnt, with all the palaces and the city walls, and no government was left but that of the Babylonian satrap, this latter date is evidently the true era of the captivity. Previously Zedekiah was tributary, but so were Josiah and Ahaz long before; the national existence was still saved. See BABYLONIA.

3. *Its comparative Mildness*.—The captive Jews were probably prostrated at first by their great calamity, till the glorious vision of Ezekiel (i, 1) in the fifth year of the captivity revived and reunited them. The wishes of their conqueror were satisfied when he had displayed his power by transporting them into another land, and gratified his pride by inscribing on the walls of the royal palace his victorious progress and the number of his captives. He could not have designed simply to increase the population of Babylon, for his Assyrian predecessor had sent Babylonian colonists into Samaria. One political end certainly was attained—the more easy government of a people separated from local traditions and associations (see Gesenius on Isa. xxvi, 16, and compare Gen. xlvii, 21). It was also a great advantage to the Assyro-Babylonian king to remove from the Egyptian border of his empire a people who were notoriously well affected toward Egypt. The captives were treated not as slaves, but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. ii, 48), or holding the most confidential office near the person of the king (Neh. i, 11; Tobit i, 13, 22). The advice of Jeremiah (xxix, 5, etc.) was generally followed. The exiles increased in numbers and in wealth. They observed the Mosaic law (Esth. iii, 8; Tobit xiv, 9). They kept up distinctions of rank among themselves (Ezek. xx, 1). And though the assertion in the Talmud be unsupported by proof that they assigned thus early to one of their countrymen the title of Head of the Captivity (or captain of the people, 2 Esd. v, 16), it is certain that they at least preserved their genealogical tables, and were at no loss to tell who was the rightful heir to David's throne. They had neither place nor time of national gathering; no temple, and they offered no sacrifice. But the rite of circumcision, and their laws respecting food, etc., were observed; their priests were with them (Jer. xxix, 1); and possibly the practice of erecting synagogues in every city (Acts xv, 21) was begun by the Jews in the Babylonian captivity.

The captivity is not without contemporaneous *liter-*

ature. In the apocryphal book of Tobit, which is generally believed to be a mixture of poetical fiction with historical facts recorded by a contemporary, we have a picture of the inner life of a family of the tribe of Naphtali, among the captives whom Shalmaneser brought to Nineveh. The apocryphal book of Baruch seems, in Mr. Layard's opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Several of the Psalms appear to express the sentiments of Jews who were either partakers or witnesses of the Assyrian captivity. Ewald assigns to this period Psa. xlii, xliii, lxxxiv, xvii, xvi, xlix, xxii, xxv, xxxviii, lxxxviii, xl, lxix, cix, li, lxxi, xxv, xxxiv, lxxxii, xiv, cxx, cxxi, cxxiii, cxxx, cxxxi. Also in Psa. lxxx we seem to have the words of an Israelite, dwelling perhaps in Judæa (2 Chron. xv, 9; xxxi, 6), who had seen the departure of his countrymen to Assyria; and in Psa. cxxxvii an outpouring of the first intense feelings of a Jewish exile in Babylon. But it is from the three great prophets—Jeremiah, Ezekiel, and Daniel—that we learn most of the condition of the children of the captivity. The distant warnings of Jeremiah, advising and cheering them, followed them into Assyria. There, for a few years, they had no prophetic guide; till suddenly the vision of Ezekiel at Chebar (in the immediate vicinity of Nineveh, according to Layard, or, according to others, near Carchemish on the Euphrates) assured them that the glory which filled the Temple at Jerusalem was not hopelessly withdrawn from the outcast people of God. As Jeremiah warned them of coming woe, so Ezekiel taught them how to bear that which was come upon them. When Ezekiel died, after passing at least twenty-seven years (Ezek. xxix, 17) in captivity, Daniel survived even beyond the Return; and though his high station and ascetic life probably secluded him from frequent familiar intercourse with his people, he filled the place of chief interpreter of God's will to Israel, and gave the most conspicuous example of devotion and obedience to his laws.

4. *The Restoration from Babylon.*—The first great event in the Return is the decree of Cyrus, B.C. 536 (which was possibly framed by Daniel; see Milman, *Hist. of Jews*, ii, 8), in consequence of which 42,360 Jews of Babylon returned under Sheshbazzar, with 7337 slaves, besides cattle. This ended in their building the altar, and laying the foundation of the second Temple, fifty-three years after the destruction of the first. The progress of the work was, however, almost immediately stopped; for Zerubbabel, Jeshua, and the rest abruptly refused all help from the half-heathen inhabitants of Samaria, and soon felt the effects of the enmity thus induced. That the mind of Cyrus was changed by their intrigues we are not informed, but he was probably absent in distant parts through continual war. There is some difficulty in Ezra iv as to the names Ahasuerus and Artaxerxes, yet the general facts are clear. When Darius (Hystaspis), an able and generous monarch, ascended the throne, the Jews soon obtained his favor. At this crisis Zerubbabel was in chief authority (Sheshbazzar, if a different person, perhaps being dead), and under him the Temple was recommenced in the second and finished in the sixth year of Darius, B.C. 520-517. Although this must be reckoned an era in the history, it is not said to have been accompanied with any new immigration of Jews. We pass on to "the seventh year of king Artaxerxes" (Longimanus), Ezra vii, 7, i. e. B.C. 459, when Ezra comes up from Babylon to Jerusalem, with the king's commendatory letters, accompanied by a large body of his nation. The enumeration in Ezra viii makes them under 1800 males, with their families; perhaps amounting to 5000 persons, young and old: of whom 113 are recounted as having heathen wives (Ezra x, 18-43). In the twentieth year of the same king, or B.C. 446, Nehemiah, his cup-bearer, gains his permission to restore "his fathers' sepulchres," and the walls of his native city, and is sent to Jerusalem with large powers. This is the crisis which decided the national restoration of the Jewish people; for before their city was fortified they had no defence against the now confirmed enmity of their Samaritan neighbors; and, in fact, before the walls could be built, several princes around were able to offer great opposition. See SANBALLAT. The Jewish population was overwhelmed with debt, and had generally mortgaged their little estates to the rich; but Nehemiah's influence succeeded in bringing about a general forfeiture of debts, or, at least, of interest; after which we may regard the new order of things to have been finally established in Judæa. See NEHEMIAH. From this time forth it is probable that numerous families returned in small parties, as to a secure home, until all the waste land in the neighborhood was reoccupied.

The great mass of the Israelitish race nevertheless remained in the lands to which they had been scattered. Previous to the captivity, many Israelites had settled in Egypt (Zech. x, 11; Isa. xix, 18), and many Jews afterward fled thither from Nebuzaradan (Jer. xli, 17). Others appear to have established themselves in Sheba (see Jost's *Geschichte*, etc.), where Jewish influence became very powerful. See SHEBA. Among those that returned to Judæa, about 30,000 are specified (comp. Ezra ii and Neh. vii) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred (Prideaux, sub ann. 536) that the remaining 12,000 belonged to the tribes of Israel (comp. Ezra vi, 17). Also from the fact that out of the twenty-four courses of priests only four returned (Ezra ii, 36), it has been inferred that the whole number of exiles who chose to continue in Assyria was about six times the number of those who returned. Those who remained (Esth. viii, 9, 11), and kept up their national distinction, were known as The Dispersion (John vii, 35; 1 Pet. i, 1; James i, 1); and in course of time they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the evangelists of the Christian faith. See below, and comp. RESTORATION (*of the Jews*).

5. *Effects of the Captivity.*—The exile was a period of change in the vernacular language of the Jews (see Neh. viii, 8, and comp. CHALDEE LANGUAGE) and in the national character. The Jews who returned were remarkably free from the old sin of idolatry: a great spiritual renovation, in accordance with the divine promise (Ezek. xxxvi, 24-28), was wrought in them. A new and deep feeling of reverence for at least the letter of the law and the institutions of Moses was probably a result of the religious service which was performed in the synagogues. At the same time their theosophical and dæmonological views were developed by their contact with Oriental systems, and perhaps by the polemics thereby engendered, and especially by their review of their own religious resources, and their more careful study of the didactic portions of the O.-T. Scriptures; certain it is that from this period we can date not only a fuller angelology [see ANGEL], but also more subtle philosophical distinctions [see PHILOSOPHY], and in particular a more distinct recognition of the great doctrines of the immortality of the soul, and even of the resurrection of the body, which we subsequently find so unquestioned by the orthodox Pharisees. See SECTS (OF THE JEWS). All this was the natural consequence of the absence of the ritual services of the Temple, which brought out the more spiritual elements of Mosaism, and thus was the nation better prepared for the dispensation of the Gospel. A new impulse of commercial enterprise and activity was also implanted in them, and developed in the days of the Dispersion (see James iv, 13), which they have continued to feel even to the present time. In fine, an innovation was effected upon the narrow and one-

sided notions of Judaism by the associations of the exile, which, although it resulted in the defection of many from the national faith (but of these few cared to return to their native land), yet—like the earlier Sojourn in Egypt (with which, in the glowing pictures of prophecy, it was often compared)—ended in the colonization of Palestine with a fresh and more thoroughly cultured population, yet more scrupulously devoted than ever to the theocratic cultus, who volunteered with pious zeal to lay anew the foundations of the Hebrew polity.

6. *The Dispersion*, ἡ Διασπορά (2 Macc. i, 27; James i, 1; 1 Pet. i, 1; John vii, 35; Josephus, *Ant.* xii, 1, 3, etc.; Sept. for גָּלוּת, which it also renders *ἀποικία, μετοικεσία, αἰχμαλωσία*), is the collective name given to all those descendants of the twelve tribes (James i, 1; *τὸ δωδεκάφυλον*, Acts xxvi, 7) who lived without the coufines of Palestine (ἔξω, 1 Cor. v, 13, etc.; מְדִינַת הַיָּם, חוּצָה לָאָרֶץ, Talmudic *Mishna*), during the time of the second Temple. The number of exiles, mostly of the tribe of Judah and Benjamin (Ezra i, 5, etc.), who availed themselves of the permission of Cyrus to return from their captivity in Babylon to the land of their fathers, scarcely exceeded, if indeed it reached, the number of 50,000 [the total stated both in Ezra and Nehemiah is, exclusive of the slaves, 42,360; but the sum of the items given—with slight differences—in both documents, falls short of 30,000]. Old Jewish authorities see in this surplus Israelites of the ten tribes (comp. *Seder Olam Rabbah*, ch. xxix), and among these few but the lowest and humblest, or such as had yielded to authority, were to be found (comp. Mishna, *Kidushin*, iv, 1; Gem. lxxi, 1). The great bulk of the nation remained scattered over the wide dominions of the Persian empire, preferring the new homes in which they enjoyed all the privileges of native-born subjects, and where they had in many cases acquired wealth and honors, to the dangers and difficulties of a recolonization of their former country. But while, by the hands of the despised minority who had bravely gone forth, was to be recreated not only the Temple, the visible centre of Judaism, but also the still more imposing and important edifice of the Jewish law and Jewish culture, to the much larger section which remained behind, and gradually diffused itself over the whole of the then known world, it was given to participate in the intellectual life and the progress in civilization of all the nations with whom their lot was cast. To the Dispersion is thus due the cosmopolitan element in Judaism which has added so vastly not only to its own strength and durability, but also, geographically at least, to the rapid spread of Christianity. So far, however, from the dispersion paving the way for the new faith by relaxing the rigor of Jewish law, written or oral—as has been assumed by some—one of the strongest ties by which these voluntary exiles were bound to Palestine and Jerusalem consisted in the very regulations and decisions on all ritual and legal points which they received from the supreme religious authorities, either brought back by their own delegates, or transmitted to them by special messengers from the Central Court, the Sanhedrim (Acts xxviii, 21). Generally it might be said of the whole *Diaspora*, as Philo (*Flacc.* § 7) said of that of Egypt: that while they looked upon the country in which they had been born and bred as their home, still they never ceased, so long as the Temple stood, to consider Jerusalem as the spiritual metropolis to which their eyes and hearts were directed. Many were the pilgrimages undertaken thither from their far-distant lands (Acts ii, 5, 9–11; Joseph. *War*, vi, 9, 3, etc.). The Talmud (*Jer. Meg.* iii, 75; comp. *Tos. Meg.* c. 2) speaks of no less than 380 synagogues in Jerusalem, besides the Temple, all belonging to different communities of the Dispersion (comp. also Acts vi, 9). Abundant and far exceeding the normal tax of half a shekel (*Shek.* vii, 4) were the gifts they sent regularly for the support of the holy place (gold instead of silver and copper, *Tos. Shek.* c. 2), and still more liberal were the monetary equivalents for sacrifices, propitiatory offerings (*χύτρα*, Philo), for vows, etc., which flowed from all countries into the sacred treasury. The Sanhedrim again regulated the year, with all its subdivisions, throughout the wide circle of the Dispersion; the fact that the commencement of the new month had been officially recognised being announced either by beacon-fires to the adjoining countries, or by messengers to places more remote. That, in general, there existed, as far as circumstances permitted, an uninterrupted intercourse between the Jews abroad and those in Palestine cannot be doubted. Probably, owing to this very connection, two foreign academies only seem to have existed during the time of the second Temple; the youth of the Dispersion naturally preferring to resort to the fountain-head of learning and religious instruction in the Holy City. The final destruction of the Temple and Jerusalem was thus a blow hardly less sensibly felt by the Dispersion than by their brethren of Jerusalem themselves. From that time forward no visible centre bound the widely-scattered members of the Jewish nation together; nothing remained to them but common memories, common hopes, and a common faith.

(*a*.) Foremost in the two or three chief sections into which the Dispersion has been divided stands the Babylonian (*ὑπὲρ Εὐφράτην*, Josephus, *Ant.* xv, 3, 1), embracing all the Jews of the Persian empire, into every part of which (Esth. iii, 8)—Babylonia, Media, Persia, Susiana, Mesopotamia, Assyria, etc.—they penetrated. The Jews of Babylonia proper prided themselves on the exceptional purity of their lineage—a boast uniformly recognised throughout the nation. What Judæa, it was said, was with respect to the Dispersion of other countries—as pure flour to dough—that Babylonia was to Judæa (Jerus. Talm. *Kid.* vi, 1). Herod pretended to have sprung from Babylonian ancestors (Joseph. *Ant.* xiv, 1, 3), and also bestowed the high-priesthood upon a man from Babylon (Joseph. *Ant.* xv, 2, 4). In the messages sent by the Sanhedrim to the whole Dispersion, Babylonia received the precedence (*Sanh.* 11); although it remained a standing reproach against the Babylonians that they had held aloof from the national cause when their brethren returned to Palestine, and thus had caused the weakness of the Jewish state (*Yoma*, 9); as indeed living in Palestine under any circumstances is enumerated among the (613) Jewish ordinances (Nachmanides, *Comm.* to Maimonides's *Sepher Hammizvoth*). The very territory of Babylonia was, for certain ritual purposes, considered to be as pure as Palestine itself. Very little is known of the history of the Babylonian *Diaspora*; but there is no reason to suppose that its condition was, under Persian as well as under Seleucidian and Parthian rule, at most times other than flourishing and prosperous; such as we find that it was when it offered Hyrcanus "honors not inferior to those of a king" (Joseph. *Ant.* xv, 2, 2). Of Alexander the Great, Josephus records expressly that he confirmed the former privileges of the Jews in Babylonia (Joseph. *Ant.* xi, 8, 5), notwithstanding their firm refusal to assist in rebuilding the temple of Belus at Babylon (Hecat. ap. Joseph. *Ap.* i, 22). Two great cities, Nisibis in Mesopotamia, and Nehardea on the Euphrates, where the moneys intended for transmission to Jerusalem were deposited (Joseph. *Ant.* xviii, 9, 1, 3, 4, etc.), as was the case also at Apamea in Asia Minor, Laodicea in Phrygia, Pergamus and Adramyttium in Æolis—seem to have been entirely their own, and for a number of years they appear even to have enjoyed the undisputed possession of a whole principality (*ib.* 5). Great calamities, however, befell them, both about this time under Mithridates (*ib.* 9), and later under Caligula, through the jealousy of the

Greeks and Syrians; and at both of these epochs they emigrated in large numbers. Whether they had in those times, as was afterward the case, a universally recognised ethnarch at their head, is open to doubt, although *Seder Olam Sutta* enumerates the names of fifteen generations of such, down to the third century. The ties which linked Babylonia to Palestine were perhaps closer than in the case of any other portion of the Dispersion, both on account of their greater proximity, which enabled them to communicate by beacons (Beth-Biltin being the last station on the frontiers; *Rosh Hash.* ii, 7), and of their common Aramaic idiom. That this Dispersion was not without an influence on the development of the Zoroastrian religion (comp. Spiegel, *Intr. to Zendavesta*), which in its turn again influenced Judaism (and, at a later stage, Gnosticism), can hardly be doubted; at the same time, it was Babylon which, after the final destruction of the Temple, by its numerous and far-famed academies, became for a long time the spiritual centre of the Jewish race, and was the seat of the prince of the Diaspora (Resh Gelutha). See BABYLON.

(*b*.) The second great and pre-eminently important group of the Dispersion we find in Egypt. Of the original immigrations from Palestine (comp. Zech. x, 11), and of those which took place in the times of the last kings of Judah (Jer. xli, 17, 42), we have no more certain traces than of those under Artaxerxes Ochus (Josephus, *Ap.* 1, etc.). It was only after Alexander the Great, who first settled 8000 Jewish soldiers in the Thebais, and peopled a third of his newly-founded city Alexandria with Jews, and Ptolemæus, the son of Lagus, after him, who increased the number of Egyptian Jews by fresh importations from Palestine, that the Egyptian Dispersion began to spread over the whole country, from the Libyan desert in the north to the boundaries of Ethiopia in the south (Philo, *Fl.* ii, 523), over the Cyrenaica and parts of Libya (Joseph. *Ant.* xvi, 7, 2), and along the borders of the African coast of the Mediterranean. They enjoyed equal rights with their fellow-subjects, both Egyptian and Greek (*ἰσοπολιτεία*, Joseph. *Ap.* ii, 4, etc.), and were admitted to the highest offices and dignities. The free development which was there allowed them enabled them to reach, under Greek auspices, the highest eminence in science and art. Their artists and workmen were sent for to distant countries, as once the Phœnicians had been (*Yoma*, iii, 8, *a.*; *Erach.* 10, *b*). In Greek strategy and Greek statesmanship, Greek learning and Greek refinement, they were ready disciples. From the number of Judæo-Greek fragments, historical, didactic, epic, etc. (by Demetrius, Malchus, Eupolemus, Artapan, Aristæus, Jason, Ezechielus, Philo the Elder, Theodotion, etc.; collected in Müller, *Fragm. Hist. Græc.* iii, 207-230), which have survived, we may easily conclude what an immense literature this Egyptian Dispersion must have possessed. To them is owing likewise the Greek translation of the Bible known as the Septuagint, which, in its turn, while it estranged the people more and more from the language of their fathers, the Hebrew, gave rise to a vast pseudo-epigraphical and apocryphal literature (Orphica, Sybillines, Pseudophocles; poems by Linus, Homer, Hesiod; additions to Esther, Ezra, the Maccabees, Book of Wisdom, Baruch, Jeremiah, Susannah, etc.). Most momentous of all, however, was that peculiar Græco-Jewish philosophy which sprang from a mixture of Hellenism and Orientalism, and which played such a prominent part in the early history of Christianity. The administrative government of this Egyptian, or, rather, African Dispersion, which, no less than all other branches, for all religious purposes looked to Jerusalem as the head, was, at the time of Christ, in the hands of a Gerousia (*Sukkah*, 51, *b*; Philo, *Fl.* ii, 5, 28), consisting of seventy members and an ethnarch (alabarch), chosen from their own body, of priestly lineage. These sat at Alexandria, where two of the five divisions of the city, situated on the Delta (the site best adapted for navigation and commercial purposes), were occupied exclusively by Jews (Josephus, *Ant.* xiv, 7, 2). Of the splendor of the Alexandrine temple, there is a glowing account in the Jerus. Talm. (*Suk.* 10, *b*); and when, in consequence of the Syrian oppression in Palestine, Onias, the son of the last high-priest of the line of Joshua, had fled to Egypt, where Ptolemy Philometor gave him an extensive district near Heliopolis, a new temple (Beth Chonyo) had arisen at Leontopolis (Joseph. *Ant.* xiii, 3, 2, *f.*), B.C. 180, which bade fair to rival the Temple of Jerusalem. Such, indeed, was the influence of the Jews in Egypt, whom Philo (*Fl.* 6) in his time estimates at a million, that this new temple was treated with consideration even by the Sanhedrim (*Menach.* 109, *a*). Their condition, it may easily be inferred, was flourishing both under the Seleucidian and Roman sway, but under Caligula, and still more under Nero (Joseph. *War*, ii, 18, 7), they, like their brethren in other parts of the Roman empire, suffered greatly from sudden outbursts of the populace, prompted and countenanced in some instances by their rulers. From Egypt the Diaspora spread southward to Abyssinia, where some remnants of it still exist under the name of the *Falasha*, and in all likelihood eastward to Arabia (Mishna, *Shab.* vi, 6), where we find a Jewish kingdom (Yemen) in the south (Tabari ap. Silv. de Sacy, *Mem. de l'Acad. de Inscr.* p. 78), and a large Jewish settlement (Chaibar) in Hejaz in the north. See ALEXANDRIA.

(*c*.) Another principal section of the Dispersion we find in Syria, whither they had been brought chiefly by Seleucus Nicator or Nicanor (Joseph. *Ant.* vii, 3, 1), when the battle of Ipsus, B.C. 301, had put him in possession of the countries of Syria Proper, Babylonia, Mesopotamia, Persia, Phœnicia, Palestine, etc. Under his and his successors' fostering rule they reached the highest degree of prosperity (*l. c.*), principally at Antioch on the Orontes, and Seleucia on the Tigris, and other great cities founded by Seleucus; and the privileges which this king had bestowed upon them were constantly confirmed up to the time of Josephus (*Ant.* xii, 3, 1). Antiochus Epiphanes, or Epimanes, as he was called, seems to have been the only Syrian potentate by whom the Syrian dispersion was persecuted; and it was no doubt under his reign that they, in order to escape from his cruelty, began to emigrate in all directions—to Armenia, Cappadocia (Helena, the Jewish queen of Adiabene, Joseph. *Ant.* xx, 2), Cyprus, and over the whole of Asia Minor; Phrygia and Lydia alone possessed Jewish colonies of a previous date, planted there by Antiochus the Greek (Joseph. *Ant.* xii, 3, 4). Hence they dispersed themselves throughout the islands of the Ægean, to Macedonia, to Greece, where they inhabited chiefly the seaports and the marts of trade and commerce. See SYRIA.

(*d*.) Although, to use the words of Josephus (*Ant.* xiv, 7, 2), the habitable globe was so full of Jews that there was scarcely a corner of the Roman empire where they might not be found—a statement fully confirmed by the number of Roman decrees issued to various parts of the empire for their protection (Joseph. *Ant.* xiv, 10 sq.)—there is yet no absolute proof of their having acquired any fixed settlements in the metropolis itself anterior to the time of Pompey, who, after the taking of Jerusalem, carried back with him many Jewish captives and prisoners to Rome, B.C. 63. These, being generally either allowed to retire from the service, or ransomed, remained there as *Libertini*, and in time formed, by the addition to their number of fresh immigrants from Asia and Greece, a large and highly influential community, which occupied chiefly the Transtiberine portion of the city, together with an island in the Tiber. Their prosperity grew with their numbers, and suffered but short interruptions under Tiberius (Suet. *Tib.* c. 36). The expulsion under Claudius (Suet. *Cl.* 25) and Caligula (Joseph. *Ant.* xviii, 6)

is contradicted (Dio Cass. lx, 6; Orosius, vii, 6). They built numerous synagogues, founded schools (even a short-lived academy), made proselytes, and enjoyed the full advantages of Roman citizens (in the decrees they are styled πολῖται Ῥωμαίων, πολῖται ἡμέτεροι Ἰουδαῖοι, Joseph. *Ant.* xiv, 10). The connection between the Roman Dispersion and Palestine was very close, especially so long as the young princes of the Herodian house were, in a manner, obliged to live in Rome. There is no doubt that to the influence of this powerful body, whose number, origin, strange rites and customs, attracted no small share of public notice (Tacitus, Suetonius, Cicero, Juvenal, Horace, Martial, Justinian, etc., *passim*), and to their access to the imperial court was due the amelioration of the condition of the Jewish people throughout every country to which the sway of Rome extended. It was also through Rome chiefly, both before, and still more after the final destruction of Jerusalem, that the stream of Jewish emigration was poured over the greater part of Europe. Of the world-wide influence of the Jewish Dispersion on Christianity, which addressed itself first of all to the former as a body (Acts xiii, 46; ii, 9, 11), farther mention will be found under the article JEWS.

The most important original authorities on the Dispersion are Joseph. *Ant.* xiv, 10; xiv, 7; *Apion.* ii, 5; Philo, *Leg. ad Caium;* id. *Flaccum.* Frankel has collected the various points together in an exhaustive essay in his *Monatsschrift*, Nov. Dec. 1853, p. 409-11, 449-51. Comp. Jost, *Gesch. d. Judenth.* p. 336, 344; Ewald, *Gesch. d. Volkes Isr.* iv. See DISPERSED JEWS.

III. *Subsequent States of Captivity.*—1. The extermination suffered by the Jewish inhabitants of Palestine under the Romans far better deserves the name of captivity; for, after the massacre of countless thousands, the captives were reduced to a real bondage. According to Josephus, in his detailed account (*War*, especially vi, 9, 3), 1,100,000 men fell in the siege of Jerusalem by Titus, and 97,000 were captured in the whole war. Of the latter number, the greatest part were distributed among the provinces, to be butchered in the amphitheatres, or cast there to wild beasts; others were doomed to work as public slaves in Egypt. Only those under the age of seventeen were sold into private bondage. See JERUSALEM. 2. An equally dreadful destruction fell upon the remains of the nation, which had once more assembled in Judæa, under the reign of Hadrian (A.D. 133), which Dion Cassius concisely relates; and by these two savage wars the Jewish population must have been effectually extirpated from the Holy Land itself, a result which did not follow from the Babylonian captivity. 3. Afterward, a dreary period of fifteen hundred years' oppression crushed in Europe all who bore the name of Israel, and Christian nations have visited on *their* head a crime perpetrated by a few thousand inhabitants of Jerusalem, who were not the real forefathers of the European Jews. 4. Nor in the East has their lot been much more cheering. With few and partial exceptions, they have ever since been a despised, an oppressed, and naturally a degraded people, though from them have spread light and truth to the distant nations of the earth. See JEWS.

IV. *Metaphorical Uses of the Term "Captivity."*—"Children of the captivity" is a common figure of speech denoting those who were in captivity, or perhaps sometimes literally their posterity (Ezra, iv, 1). "Turn again" (Psa. cxxvi, 1), "turn away" (Jer. xxix, 14), "turn back" (Zeph. iii, 20), or, "bring again" (Ezek. xvi, 53) "the captivity," are figurative phrases, all referring to the Jewish nation in bondage and their return to Canaan. A similar expression is used in relation to individuals (Job xliii, 10): "The Lord turned the captivity of Job," i. e. he released him from the unusual sufferings and perplexities to which he had been in bondage, and caused him to rejoice again in the favor of God. "He led captivity captive," or "he led captive those who had led others captive" (Eph. iv, 8), is a figurative allusion to the victory which our blessed Redeemer achieved over sin, the world, death, and hell, by which our ruined race are brought into bondage (Psa. lxviii, 18; Rom. viii, 21; Gal. iv, 24; Heb. ii, 15; 2 Pet. ii, 19; Col. ii, 15). See EXILE.

Capuchins, monks of the strictest observance of the rule of St. Francis, called *Capuchins* on account of the great pointed *capuchon* (or cowls) which they wear. Matteo di Baschi, an Observantine friar, of the convent of Monte Falcone, in the duchy of Urbino, in Italy, was the founder of this reformed order in 1525. Pretending that the Franciscans were no longer strict followers of St. Francis, as they wore a different cowl, did not let their beard grow, and had mitigated the vow of poverty, he, with the pope's permission, and accompanied by some others, retired into a solitary hermitage of the Camaldoli near Massacio. The reformed monks were much persecuted by the Franciscans, who drove them from place to place. In 1528 Pope Clement VII allowed them to put themselves under the obedience of the Conventuals, and to take the title of Friars Hermits Minors, with the right of electing a vicar general. Their first establishment was at Colmenzone, near Camerino. In 1529 they held the first general chapter at Alvacina, and drew up the rule of the new association, which received alterations and additions in 1536 and 1575. It enjoins, among other things, that the Capuchins shall perform divine service without singing; that they shall say but one mass each day in their convents; that they shall observe hours for mental prayer morning and evening, days for disciplining themselves, and days of silence; that they shall always travel on foot, and avoid ornament and costly furniture in their churches, contenting themselves with having the curtains of the altar of stuff and the chalices of tin. Pope Paul III, in 1536, gave them the name of *Capuchins of the Order of Friars Minor*, and subjected them to the visitation and correction of the Conventuals. In the same year the two founders and first vicars general of the order, Matteo di Baschi, and his friend Ludovico di Fossombrone, were excluded from the order for disobedience. The fourth vicar general, Ochino, one of the most famous preachers of Italy, became a Protestant in 1548. For a time the whole order was forbidden to preach, and threatened with suppression, but their submission and humble petitions averted this danger. From this time dates the development of their peculiar character, their rapid spread, and great influence in the Romish Church. A severe asceticism, a designed neglect of both mind and body, and a coarse, cunning eloquence, made them the favorite preachers of the lower classes of the people. The order has never produced great scholars, but has been joined sometimes by princes (e. g. Alfonso di Este, duke of Modena) and by statesmen tired of the world. In 1573 the order was introduced into France, in 1606 into Spain, and in 1619 their superior was permitted to take the name of General. In the last century they counted more than 50 provinces, 3 custodies, nearly 600 convents, and 25,000 members, without taking into account the missionaries in Brazil, Congo, Barbary, Egypt, and the East.

In 1858 the order had 39 provinces, 4 custodies, and

Capuchin Monk, without Cloak.

5 vicariates general *in partibus infidelium*, with about 11,300 members. A province must have at least 4 complete convents. Houses with less than four monks are called *residences*. The greatest number of *provinces* was, until 1859, in Italy; but, together with other monastic communities, nearly all the convents of the Capuchins have since been suppressed by the government of the kingdom of Italy. It has also convents or residences in France, Switzerland, Austria, Prussia, several other German states, Belgium, Holland, Ireland, England, Poland, Turkey, Greece, India, the Seychelles, and South America. In most of these countries the number of convents is on the increase. The *custodies* (with less than four convents) are in Ireland, Croatia, Lucca, and Westphalia. The latter, which comprises Prussia, Hanover, and Hesse-Darmstadt, was established in 1851. The first convent in *England* was founded in 1858 by Viscount Fielding. The *vicariates general* with episcopal jurisdiction are in Tunis, Abyssinia, Patna, Bombay, and Agra. In South America they have some residences, and are penetrating more and more into the interior. About 500 members are employed as foreign missionaries, and there is a seminary for preparing chosen young Capuchins for foreign missions in Rome.

There is likewise an order of Capuchin nuns (*Capuchines* or *Capucines*), also known as *Nuns of the Passion*, instituted by Maria Lorenza Longa, the widow of a noble Neapolitan. Their first establishment was at Naples, in 1538, when they took the third rule of St. Francis. They, however, soon quitted this for the more rigid rule of St. Clara. Of this order only a few convents are left, most of them in Italy and Switzerland, with a few in France, Bavaria, and South America. See *Annales Sacr. hist. ordinis minorum S. Francisci, qui Capucini nuncupantur* (Lugd. 1632); Wadding, *Annales ord. Minor.* t. xvi; Fehr, *Gesch. der Mönchsorden, nach Henrion*, i, 308.

Capuciati or CAPUTIATI: (1.) A sect which arose about A.D. 1186, named from a cowl or cap which they wore as a badge. It was founded by one Durand, reputed to have been a carpenter (others say a butcher), who published that the Virgin had appeared to him and given him her image, and that of her Son, with this inscription: "O Lamb of God, that takest away the sins of the world, grant us peace!" adding that she directed him to take the image to the bishop of Puy, in order that he might form a society of all those who desired to restore peace in church and state; who should, in token of their belonging to such a society, wear a white hood, or capuche, with a leaden image like the pattern. Many persons in Burgundy joined the sect. They were put down by Hugo, bishop of Auxerre. (2.) Some of the Wicliffites, in England, also obtained the name of *Capuciati* about the year 1387, because they refused to uncover their heads before the Host.—Mosheim, *Ch. Hist.* cent. xii, pt. ii, ch. v, § 15; Bergier, *Dict. de Théologie*, i, 361.

Car. See BETH-CAR; CARR; CART.

Cara (or KARAH), **Joseph**, son of Simeon Cara (q. v.), a celebrated Jewish commentator on the O. T., lived in the north of France toward the end of the eleventh century. Following the example of his uncle, Menachem ben-Chelbo, Joseph Cara abandoned the allegorical mode of interpretation of which his own father was a great defender, and devoted his talents to a simple and grammatical interpretation of the Biblical text. His commentaries, which extend over nearly the whole Old Testament, are distinguished for logical sequence and lucid diction, but of most of them fragments only have thus far been printed. His glosses upon Rashi's commentary on the Pentateuch (פֵּרוּשׁ הַתּוֹרָה) have mostly been printed by Geiger (*Zeitschr.* iv, 138-40 [Stuttg. 1839]; see his *Beiträge zur jüd. Lit.* p. 17 [ib. 1847]), and some of them under the title לִקּוּטִים, in his נִטְעֵי נַעֲמָנִים (Bresl. 1847), and *Parshandatha* (Leipzig, 1855). Fragments of his commentary on *The Prophets* (פֵּרוּשׁ נְבִיאִים) are given by De Rossi in his *Variæ Lectiones* (Parma, 1785); קֹבֶץ כַּל יָד, by Leopold Dukes (Eslingen, 1846); נִטְעֵי נַעֲמָנִים, by Geiger (Bresl. 1847). Fragments of the commentaries on *Esther*, *Ruth*, and *Lamentations* have been published by Dr. Adolph Jellinek (Leipzig, 1855). The commentary on *Lamentations* has been printed in Naples, 1847, and reprinted in the collection, דִּבְרֵי חֲכָמִים (Metz, 1849). The commentary on *Job* is reprinted in Frankel's *Monatschrift für Geschichte und Wissenschaft des Judenthums* (1856-58). His commentary on *Hosea* was published in Breslau, 1861. See Fürst, *Bibliotheca Judaica*, ii, 170; Kitto, *Cyclop.* i, 444.

Cara, Simeon, ben-Chelbo, also called R. Simeon had-Darshan, a celebrated Jewish commentator, lived in the eleventh century. He was a brother of the celebrated Menachem ben-Chelbo, and received the name Kara (קָרָא) in the synagogue for his lesson on the Sabbath, and the name had-Darshan from his collecting and explaining (דַּרְשָׁן) the Midrashim. Cara is the author of the celebrated *Jalkut* (יַלְקוּט), a collection of Midrashim on almost every verse of the Old Testament. He brought together a catena of traditional expositions from upward of fifty different works of all ages, many of which are of great value. Ten different editions of this work appeared between 1526 and 1805; one of the best and most convenient is that published at Frankfort on the Maine, 1687, folio. See Rapaport in the Hebrew annual called *Kerem Chemed* (כֶּרֶם חֶמֶד, vii, 4, etc.); Zunz, *Die Gottesdienstlichen Vorträge der Juden* (p. 295-303); Steinschneider, *Catalogus Librorum Hebræorum in Bibliotheca Bodleiana* (Berlin, 1852-60, col. 2600, 2604; Kitto, *Cyclop.* i, 444).

Caraba'sion (Καραβασίων v. r. Ῥαβασίων, Vulg. *Marimoth*), a name given (1 Esdr. ix, 34) as one of the "sons" of Maani (Bani) that divorced his Gentile wife after the exile, and apparently corresponding to the CHELLUH (q. v.) of the Hebrew text (Ezra x, 35), although the list is here greatly corrupt.

Caracalla or CARACALLUS (properly MARCUS AURELIUS ANTONINUS BASSIANUS), a Roman emperor. He was son of the emperor Septimius Severus, and was born at Lyons, A.D. 188. The name Caracalla never appears on medals, but was a nickname from his long-hooded tunic, made in the fashion of the Gauls, and so called in their language. "After his father's death, A.D. 211, he ascended the throne as co-regent with his brother Publius Septimius Antoninus Geta, whom he afterward caused to be murdered. Having bribed the Prætorians to make him sole emperor, Caracalla next directed his cruelty against all the adherents of Geta, of whom twenty thousand of both sexes—including the great jurist Papinianus — were put to death. Innumerable acts of oppression and robbery were employed to raise supplies for the unbounded extravagance of the despot, and to pay his soldiers. In his famous constitution, he bestowed Roman citizenship on all his free subjects not citizens—who formed the majority, especially in the provinces—but simply in order to levy a

Bust of Caracalla.

greater amount of taxes on releases and heritages, which were paid only by citizens. In his campaigns he imitated at one time Alexander, at another time Sulla; while his main object was to oppress and exhaust the provinces, which had been in a great measure spared by the tyranny of former emperors. In 217 he was assassinated, at the instigation of Macrinus, prefect of the Prætorians, by one of his veterans named Martialis, on the 8th of April, 217, on the way from Edessa to Carrhæ. Historians paint the life of Caracalla in the darkest colors. Among the buildings of Caracalla in Rome, the baths—Thermæ Caracallæ—near Porta Copena, were most celebrated, and their ruins are still magnificent." Caracalla, cruel to mankind, was yet indifferent to religion, and during his reign no new persecutions were devised against the Christians. Spartianus (*Vita Caracalli*, i, 707) tells a story of his being greatly affected, at seven years of age, on hearing that a Jewish boy had been punished for his religion. From a passage in Tertullian (*ad Scapulam*, cap. 4) it is inferred that Caracalla had a Christian nurse.—Chambers's *Encyc.*; Lardner, *Works*, vii, 310-312; Gibbon, *Dec. and Fall* (ed. Milman), ch. vi.

Caraccioli, Galeazzo, marquis of Vico, one of the earliest and most distinguished followers of the Reformation in Italy. Born in Naples, in 1517, of a noble family, which had given warriors to the field and cardinals to the Church, he began life with the most brilliant prospects. Married at twenty to Vittoria, daughter of the duke of Novera, he had by her six children. In 1541 he heard Peter Martyr, and after a long and painful investigation, in spite of the distressing conviction that he would have to leave family, friends, home, and wealth in abandoning Rome, he became a Protestant, and in 1551 escaped to Geneva. His father, his uncle cardinal Caraffa, his wife, and his children sought for many years to change his purpose, but in vain. In Geneva he acquired the entire confidence of Calvin, who dedicated to him his Commentary on 1 Corinthians (edit. *Tholuck*, p. 205). He died in great peace, 1586. His life, by Balbano, will be found in the *Museum Helveticum*, viii, 1748, p. 519; and, abridged, in Gerdes, *Specimen Italiæ Reformatæ* (Lugd. Bat. 1765, 4to). See M'Crie, *Reformation in Italy;* Herzog, *Real-Encyklopädie*, ii, 574.

Caraïtes. See Karaites.

Caramuel (*Juan de Lobkowitz*), a Spanish theologian, was born at Madrid, May 23, 1606. He became a Cistercian, and after several preferments, among which was the abbey of Melrose, in Scotland, was made vicar general of the archbishopric of Prague. When the Swedes, in 1648, besieged the city, Caramuel, forgetting his episcopal character, set himself at the head of a body of ecclesiastics on the battle-field. His services were rewarded by the emperor with a collar of gold. In 1657 he was made bishop of Campagna, in Naples, which he resigned in 1673, but afterward became bishop of Vigevano, in the Milanese, where he died, Sept. 8, 1682. He was "a man of vast but ill-digested learning, with an ill-regulated imagination. His moral theology (*Theologia Moralis*, Louvain, 1643, fol.) is so universally decried that even Romanists have censured it. He taught that the commandments of the Decalogue are not immutable in their nature, and that God is able to change or dispense with them, as in cases of theft, adultery, etc.; he also held that the smallest degree of *probability* justified any criminal action." A list of his numerous writings (37 volumes) is given by Nicolas Antonio, *Bibliotheca Hisp. Nova.*—*Nouv. Biog. Générale*, viii, 666.

Caranza. See Carranza.

Caravan, the Arabic name for a body of pilgrims or merchants travelling in the East. Orientals who have occasion to journey—whether for pleasure, religion, or profit—usually do so in companies, for the sake of society as well as protection. Hence the most motley associations may take place. They often consist of hundreds of persons, mostly mounted on camels, which (including those for baggage) frequently amount to several thousands. Such spectacles are common in all parts of Turkey, Persia, and Arabia, especially through the sandy deserts. They march at first disorderly, but after a short period of practice with great regularity, mostly by night, in companies which are each kept together by a large beacon-fire on the top of its own peculiar standard. Much time is consumed in packing and unpacking; but when this confused scene of preparation is over, they travel with great uniformity (see Ezek. xii, 3) from about eight P.M. till about midnight (Luke xi, 5, 6). In the cooler seasons they journey by day, only halting for a brief repast at noon. Seven or eight hours is the usual day's stage (Hornemann, p. 150), or about 17 to 20 miles. See Traveller.

Modern Oriental Caravan.

1. *Commercial Caravans.*—The earliest of these on record is that to which Joseph was sold (Gen. xxxvii), consisting of Ishmaelites (ver. 25), Midianites (ver. 28), and Medanites (ver. 36, Heb.), who were on the high-road through Dothan to the mart of Egypt with the spices of India and Hadramaut (Vincent, *Commerce and Navigation of the Ancients*, ii, 262). Such often avail themselves at the present day of the second class of caravans mentioned below. See COMMERCE.

2. *Religious Caravans.*—Such companies of pilgrims pass regularly along the route (hence termed the *Haj*) to Mecca, four each year; one from Cairo, consisting of Barbars, a second of Turks from Damascus, a third of Persians from Babylon, and the fourth of the Arabians and Indians from Zibith, at the mouth of the Red Sea. They are under the strictest discipline, a chief or *bashi* being in command, and five officers having respectively charge of the march, the halt, the servants and cattle, the baggage, and the commissariat. The *kybeer*, or guide, is also an indispensable companion—a person not only well acquainted with the route, the wells, the hostile or friendly tribes, and other features on the route, but also skilled in the signs of the weather, and an individual of general sagacity and fidelity. See PILGRIM.

These large travelling masses illustrate many features of the exodus of the Israelites from Egypt. They, too, had their leader, Moses, and were divided into twelve companies, each with its chief (Num. vii), and ranged under its distinctive banner (Num. ii, 2). They set out in tumult (Exod. xii, 11), but were soon reduced to almost military order, starting at the blast of trumpets (Num. x, 2, 5), under the guide of the fiery pillar (q. v.). Hence, too, the anxiety of Moses to secure the services of Hobab (q. v.) as guide. See EXODE.

The processions of Israelites to their national festivals at Jerusalem were probably made up very much after the caravan style, villages and acquaintances travelling together by companies. Hence the youthful Saviour was not missed until the party halted at night (Luke ii, 44) at a place which tradition fixes about three miles from Jerusalem (Munro, *Summer Ramble*, i, 265); for the first day's journey is always a short one. See CARAVANSERAI.

Caravanserai, the Arabic name of a building for the accommodation of strangers in sequestered places, while *khan* is the usual designation of a similar structure situated in or near towns. See KHAN.

In the days of the earlier patriarchs there seems to have been no such provision for travellers, for we find Abraham looking out for their entertainment (Gen. xxiii), and the visitors of Lot proposed to lodge in the street, apparently as a matter of course (Gen. xix, 2), just as modern Orientals often do, wrapped in their hykes, although in Arab towns generally the stranger is conducted by the sheik to the *menzil*, where he is provided for the night (La Roque, *De la Palestine*, p. 124. In Egypt, however, there seems to have been some such building (Gen. xlii, 27), probably only a rude shed. The innkeepers in that country were usually women (Herod. ii, 38), just as in the days of the Hebrew spies (Josh. ii, 1); apparently women of easy virtue (Heb. xi, 31; James ii, 25), if not absolutely courtesans. See HARLOT. In the times of Christ and his apostles, inns must have been common in Palestine, yet the frequent injunction contained in the Epistles to entertain strangers (e. g. Heb. xiii, 2; Rom. xii, 3) show that they were very inadequate in their arrangements. See HOSPITALITY. They are mentioned in the N. T. under two names, πανδοχεῖον, or house for the reception of all kinds of guests, where the good Samaritan took the wounded stranger (Luke x, 34); probably a building like the modern comfortless and unfurnished ones on the great Eastern routes of travel, with a host (or janitor), however, who, on urgent occasions, will furnish supplies to the sick and destitute. The other word is κατάλυμα, properly the upper room reserved in large houses for guests (Mark xiv, 14; Luke xxii, 11), and also applied to the place where the nativity occurred (Luke ii, 7). The tradition connects this event with a cave (Justin Martyr, *Dial. c. Tryph.* p. 303; Origen, *cont. Cels.*), and the spot, as such, is still pointed out. See BETHLEHEM. But this is opposed to all the circumstances and usages of the case. The exact distinction between this and the previous term has been matter of dispute, but the editor of the *Pictorial Bible* (note in loc.) suggests the most probable explanation, that the stable, in the retirement of which Mary brought forth the Saviour, was one of the stalls running along the outside of the building, behind the apartments destined for the guests; and that the "manger" (q. v.), or φάτνη, was not the crib or contrivance for this purpose known to us (for such are not used in the East), but simply the projection of the floor of the guest-room into the cattle-shed, which was probably lower on the ground (see Strong's *Harmony and Expos. of the Gospels*, p. 14). See INN.

Modern Oriental Caravanserai.

Oriental "inns," whether called khans or caravanserais, are not at all comparable, in point of comfort and convenience, with modern hotel accommodations, nor have they the least resemblance to the character and appurtenances of a respectable tavern. A khan is always to be found in the neighborhood of a town; and caravanserais, of various sizes and degrees of completeness, are generally disposed at regular stages along public roads, especially the mercantile and pilgrim thoroughfares, according to the character of the country. They have usually been built by rich merchants for trading purposes, or by wealthy devotees as an act of religious munificence. At a distance they resemble a castellated fort, but on a nearer approach are found to be a simple quadrangular building, enclosed by a high wall, usually about 100 yards on each side, and about 20 feet high, resting on a stone foundation. In the middle of the front there is a large arched entrance, with a porter's lodge on one or both sides, and apartments for the better class over it, surmounted by a dome. The interior is an open space for cattle, baggage, etc., with a well or fountain in the middle. Along the sides of this inner court-yard are piazzas opening every few yards into arched recesses or alcoves for travellers, having an inner door communicating with a small oblong chamber, sometimes lighted at the farther end, but entirely destitute of furniture, shelves, or closets. These cells are intended for dormitories, but travellers usually prefer the open door-way, which is either paved or level and hard earth, and raised two or three feet above the general area of the court. These sets of rooms have no communication with each other, but in the middle of the three sides there is a large hall for general assemblages; at the end of each side is a staircase for ascending to the flat roof for enjoying the breeze and the landscape. These lodging-chambers are thus usually on the ground-floor; but in the few buildings which have two stories, the lower rooms are used for servants, storage, etc., while the upper story serves for the travellers themselves. Sometimes also the porter's lodge affords a supply of commodities for their use, and cooks are occasionally found in attendance. Generally, however, the accommodations are of the most wretched description—bare walls, rooms filled with dirt and vermin, and no cooking apparatus to be obtained for love or money. The traveller must do all his own work, and even furnish his own subsistence. His baggage must supply his bed, his clothing must

be his covering. He is usually obliged to content himself with such cold food or fruits as he has himself brought. His outfit should therefore consist at least of the following articles: a carpet, a mattress, a blanket, two saucepans with lids, contained within each other; two dishes, two plates, etc., a coffee-pot, all of well-tinned copper; also a small wooden box for salt and pepper, a round leather table, which he suspends from his saddle, small leather bottles or bags for oil, melted butter, water, a tinder-box, a cocoanut cup, some rice, dried raisins, dates, and, above all, coffee-berries, with a roaster and a wooden mortar to pound them; all this is in addition to such more substantial provisions as he may prefer or can conveniently carry. The porter in attendance can only be relied upon to show him his chamber, and perhaps furnish him with a key. In case of sickness, however, the latter is generally able to administer simple remedies, and may even set a broken limb. See CARAVAN.

Interior of a Caravanserai.

Carbuncle is the rendering in the Auth. Vers. of the following Heb. and Gr. words: 1. אֶקְדָּח, *ekdach'*, only Isa. liv, 12 (Sept. κρύσταλλος, Vulg. [*lapis*] *sculptus*), some *sparkling* gem (from קָדַח, to *inflame*). 2. בָּרֶקֶת, *bare'keth*, only Exod. xxviii, 17, and xxxix, 10, as the third in the first row of the high-priest's breastplate (Sept. σμάραγδος, Vulg. *smaragdus*, i. e. emerald); or בָּרְקַת, *barekath'*, only Ezek. xxviii, 13 (Sept. ὀνύχιον, Vulg. *smaragdus*). From the etymology (בָּרַק, to *flash*), we assume that a stone of a bright coruscant color is meant. Kalisch translates it *smaragd*, or emerald, and says it is a sort of precious corundum of strong glass lustre, a beautiful green color, with many degrees of shade, pellucid and doubly refractive. Pliny enumerates twelve species of emerald. They are not rare in Egypt (see Braun. *de Vest. Sacerdott.* p. 517 sq.). 3. Ἄνθραξ, lit. a *coal* of fire, Tobit xiii, 17; Ecclus. xxxii, 5. 4. The carbuncle is thought by many to be denoted by the word נֹפֶךְ, *no'phek* ("emerald," Exod. xxviii, 18; xxxix, 11; Ezek. xxvii, 16; xxviii, 13). See EMERALD. Under the name "carbuncle" are comprehended several brilliant red stones of the clay family which resemble a glowing coal, such as the ruby, the garnet, the spinel, but particularly the *almandin*, that is, the noble Oriental garnet, a transparent red stone with a violet shade and strong glass lustre. Probably it is not so hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of red color, but, at the same time, so hard that engravings cannot easily be made in it (Rosenmüller, *Alterth.* iv, 1, 34). In the present state of our knowledge respecting the ancient Hebrew mineralogy, it is impossible to determine with precision what particular gem is denoted by either of these terms, although they all evidently were precious stones of a brilliant fiery hue. See GEM.

Car'cas (Heb. כַּרְכַּס, *Karkas'*, comp. the Sanscrit *karkaça, severe;* Sept. Θαβάζ v. r. Θαραβά, Vulg. *Charchas*), the last named of the seven eunuchs ("chamberlains") in the harem of Ahasuerus (Xerxes), who were directed to bring queen Vashti into the royal convivial party (Esth. i, 10). B.C. 483.

Carcase (פֶּגֶר, נְבֵלָה, מַפֶּלֶת, גְּוִיָּה, πτῶμα), the dead body of a man or beast (Josh. viii, 29; Isa. xiv, 19; Heb. iii, 17, etc.). According to the Mosaic law, any Israelite became ceremonially unclean until the evening (and in turn rendered whatever he touched unclean, Hag. ii, 14; comp. Num. xix, 22), by (unwitting) contact, under any circumstances, with a dead animal of the "unclean" class (Lev. v, 2; xi, 8 sq.; comp. Deut. xiv, 8), or with any "clean" animal, in case it had not been regularly slain according to the prescribed mode (Lev. xi, 39 sq.). The eating of any (clean) beast that had died an accidental or natural death was still more strictly forbidden (Lev. xxii, 8; comp. Ezek. iv, 14; xliv, 31); but it might be sold as food to a foreigner (Deut. xiv, 2). Carrion was doubtless buried or burned. On the sepulture of persons found dead, see HOMICIDE. An unburied carcase (Jer. xxxvi, 30; Psa. lxxix, 3) was considered by the ancients the height of indignity and misfortune (Virgil, *Æn.* x, 559). See BURIAL. The Levitical enactments respecting all dead bodies evidently had their origin in sanitary reasons in a climate so liable to pestilence (Michaelis, *Mos. Recht*, iv, 309 sq.). On the incident of the beehive in the skeleton (Judg. xiv, 8), see BEE. On the allusion to the vulture's scent for putrid flesh, Matt. xxiv, 28 (Loder, *De cadavere Judaico, ab aquilis Romanis discerpendo*, Argent. 1715; Rechenberg, *De adagio Christi*, etc., Lips. 1696), see EAGLE.

Car'chamis (1 Esdr. i, 25). See CARCHEMISH.

Car'chemish (Heb. *Karkemish'*, כַּרְכְּמִישׁ, prob. *fort of Chemosh;* Sept. Χαρμείς v. r. Καρχαμὶς in Jer., but omits in Chron. and Isa., Χαρκαμύς in 1 Esdr. i, 5). mentioned in Isa. x, 9 among other places in Syria which had been subdued by an Assyrian king,

probably Tiglath-pileser. That Carchemish was a stronghold on the Euphrates appears from the title of a prophecy of Jeremiah against Egypt (xlvi, 2): "Against the army of Pharaoh-necho, king of Egypt, which lay on the river Euphrates, at Carchemish, and which Nebuchadnezzar, the king of Babylon, overthrew, in the fourth year of Jehoiakim, the son of Josiah, king of Judah," i. e. B.C. 606. According to 2 Chron. xxxv, 20, Necho had advanced with his ally Josiah, the father of Jehoiakim, against the Babylonians, on the Euphrates, to take Carchemish, B.C. 609. These two circumstances—the position of Carchemish on the Euphrates, and its being a frontier town, render it probable (see Layard, *Nineveh and Babylon*, p. 199) that the Hebrew name points to a city which the Greeks called Κιρκήσιον, the Latins *Cercusium*, and the Arabs *Kerkesiyeh* (Schultens, *Index. Geogr.* s. v.; Ritter, *Erdk.* xi, 695); for this too lay on the western bank of the Euphrates, where it is joined by the Chaboras (comp. Bochart, *Phaleg*, iv, 21; Cellarii *Notit.* ii, 715 sq.; Michaelis, *Supplem.* p. 1352 sq.). It was a large city, and surrounded by strong walls, which, in the time of the Romans, were occasionally renewed, as this was the remotest outpost of their empire, toward the Euphrates, in the direction of Persia (Ammian. Marcell. xxiii, 5; Zozim. iii, 12; Procop. *Bell. Pers.* ii, 5; comp. Procop. *Ædif.* i, 6; Ptolemy, v, 18, 6). Carchemish is named in the cuneiform inscriptions (q. v.), which show it to have been, from about B.C. 1100 to B.C. 850, a chief city of the Hittites, who were masters of the whole of Syria from the borders of Damascus to the Euphrates at Bir, or Bireh-jik; it is also mentioned on the Egyptian hieroglyphical sculptures (Layard, *ut sup.* p. 305, 538). At the point where the Khabur (the ancient Chebar) joins the Euphrates, there are large mounds on both banks of the former river, marking the sites of old cities, or perhaps of different sections of one great city. The mound on the right bank is crowned with a modern Arab village, called *Abu Serai*, or "Father of Palaces" (Chesney, *Euph. Exp.* i, 118). It stands on a narrow wedge-shaped plain, in the fork of the two rivers. This corresponds exactly to Procopius's description of Circesium, who says that its fortifications had the form of a triangle at the junction of the Chabur and Euphrates (*Bell. Pers.* ii, 5). This seems to be the true site of Carchemish. It was visited by Benjamin of Tudela in the twelfth century, who found in it two hundred Jews (*Early Travels in Pal.* p. 93). According to others, however (following the Syriac and Arabic versions), it lay very much higher up the Euphrates, occupying nearly the site of the later *Mabug*, or Hierapolis. Dr. Hinks maintains, from his reading of the Assyrian inscriptions, that the true site of Carchemish is at or near *Bir*, on the opposite bank of the Euphrates, and about 200 miles higher up than it is generally thought to be (*Jour. Sac. Lit.* July, 1854, p. 408). Still less probable is the supposition that it is the *Cadytis* of Herodotus (see Heinii *Dissertt. Sacr.* Amst. 1726, p. 23). See CALNEH.

Cardinal (*cardinalis*, principal; from *cardo*, *a* hinge), the title of an eminent class of dignitaries in the Roman Church, so styled as if the axle or hinge on which the whole government of the Church turns; or as they have, from the pope's grant, the hinge and government of the Romish Church. Pope Eugenius IV states the derivation from *cardo*, a hinge, as follows: *Sicut per cardinem volvitur ostium domus, ita super hos Sedes Apostolica, totius Ecclesiæ ostium, quiescit et sustentatur* (see Dufresne, s. v. *cardinalis*).

1. *Cardinal Priests, etc.*—In early days the name cardinal was used with great latitude in the Roman Church. Its first definite application was to the principal priests of the parishes of Rome; the chief priest of a parish, next to a bishop, being presbyter *cardinalis*, to distinguish him from the other priests who had no church. It is uncertain when the term was first applied, but it seems that Stephen IV (770) was the first who selected seven bishops out of the number of the see of Rome, and gave them the title of cardinal, obliging them to say mass every Sunday in St. Peter's. Leo IV, in a council of Rome held in 853, calls them *presbyteros sui cardinis*, and their churches *parochias cardinales*. At a subsequent period the priests and deacons of other cities of importance assumed the title of cardinal, to distinguish them from other priests and deacons over whom they claimed supremacy; but the popes subsequently ordained that none but those whom they had chosen should be honored with that title. Among those whom the popes thus appointed were the seven bishops *suburbicarii*, who took their titles from places in the neighborhood of Rome. These bishops were called *hebdomadarii*, because they attended the pope for a week each in his turn. These cardinals took part with the Roman clergy in the election of the pope, who was generally chosen from their number. But it was not until the edict of Nicolas II, A.D. 1059 (see below), that the body of cardinals, as such, had a proper existence as a recognised branch of the ecclesiastical system.

2. *College of Cardinals.*—"The college of Cardinals, in its origin, was nothing else than the council which, according to the canons, every metropolitan was obliged to consult, and in which, during a vacancy, all the metropolitan powers resided, viz., the synod of provincial bishops, and the chapter of the metropolitan church; and it is not difficult to see that this college would share in the supreme glory of the see of Rome, in the same proportion as every other church participated in the honor of its particular metropolitan. It was not, however, for a long time that the cardinalate attained to its present excessive and usurped degree of power and dignity. In the Synod of Rome, under Benedict VIII, in 1015, the cardinals, priests, and deacons still signed after the bishops, and the cardinal-bishops after other bishops of older standing in the order than themselves; but in 1050 we find a vast change, for Humbertus, bishop of Silva Candida, who was a cardinal-bishop of the see of Rome, took precedence at Constantinople of the archbishop of Amalfi; and from that time we perceive the cardinal-bishops, and soon even the priests and deacons, arrogating to themselves that precedence over all other ecclesiastical dignitaries which they now possess. This, however, was not done without resistance. Thus, in 1440, the archbishop of Canterbury refused to allow to the cardinal-archbishop of York the precedence which he claimed; whereupon Pope Eugenius IV wrote to the former, reprehending him for his conduct, and declaring that the cardinalate had been instituted by St. Peter himself, and that the dignity of the cardinals, who, with the pope, governed the Universal Church, and sat in judgment upon bishops, was, past all doubt, greater than that of even patriarchs, who had jurisdiction over only a part of the Church, and from whom there lay an appeal to the see of Rome. The same dispute occurred between the cardinal-bishop of Cracow and the primate of Gnesna in 1449. As time went on, these arrogant pretensions of the college increased: we find the cardinals saying to Pope Pius, *Cardinales pares Regibus haberi;* so the cardinal of Pavia, in several places, *Cardinalem . . . cujus dignitas antefertur Regibus*. In 1561 the cardinals of Lorraine and Guise refused to give precedence to the princes of the blood royal. To such an excess had this arrogance and grasping at dignity attained in the sixteenth century, that the bishops at the Council of Lateran, under Leo X, in 1512, came to the resolution either to keep away altogether, or to negative every proposition, until their grievances were redressed.

"The Council of Rome, under Nicolas II, 1059, grants to the college of Cardinals, or rather (can. i) to the cardinal-bishops, the principal voice in the election of the pope; and, according to Peter Damianus, the

election of a pope contrary to the opinion of the cardinal-bishops was null. Pandulphus remarks, with regard to the election of Gelasius II, that although all the cardinals, clergy, and people had a voice in the election, the cardinal-bishops alone had the right of approving or disapproving the election, and consecrating the elect. None but cardinals are now eligible to the papacy. Pius IV seems to have been the first who restricted the election to the cardinals only" (Landon, *Eccl. Dictionary*, s. v.).

3. *Number of Cardinals.*—In 1331 there were twenty, and after the death of Clement VI, in 1352, the cardinals resolved that that number should not be exceeded. In 1378, at the election of Urban VI, there were twenty-three. The Council of Basle fixed the number at twenty-four, and the college itself appears to have been all along very jealous of an increase to its numbers. However, Leo X set the example of a large increase, creating in one day thirty-one new cardinals, in order to neutralize the opposition made to him by a cardinal who had formed a party in the college. The bull *Compacti*, in 1555, fixed the number at forty, and forbade to create more. But the college has since been enlarged to seventy members, the number at which it was finally fixed by the bull of Pope Sixtus V in 1586: six of these are bishops, fifty priests, and fourteen deacons. The number of cardinal-bishops was at first seven, but it was shortly afterward altered to six, at which it has ever since remained. These bishops, on Sundays and festivals, officiate as the pope's vicars at the altar of St. Saviour, in the church of Lateran, or assist the pontiff when he officiates in person. The cardinal-bishops in 1867 were Mario Mattei, bishop of Ostia and Velletri, July 2, 1832; Constantino Patrizi, bishop of Porto and St. Rufina, June 23, 1834; Luigi Amat, bishop of Palestrina, May 19, 1837; Anthony Cagiano de Azevedo, bishop of Frascati, Jan. 22, 1844; Girolamo d'Andrea, March 15, 1852; Ludovico Alfieri, bishop of Albano, April 21, 1845. A list of the cardinal-priests and cardinal-deacons is given in the *Almanac de Gotha* and in the Roman Catholic almanacs annually.

4. *Costume.*—The dress of a cardinal is a red soutane, a rochet, a short purple mantle, and a red hat. The cardinals began to wear the red hat at the Council of Lyons in 1245: the privilege was granted by Pope Innocent IV. Its color is designed to show that the cardinals are bound to shed their blood in the cause of the Church, if need be. A number of symbolical ceremonies accompany the investiture. The hat is given by the pope's own hands; and many cardinals who do not visit Rome die without ever having received it. The only exception is in favor of members of royal houses, to whom the hat is sent. As the cardinals, when dressed in the sacred vestments, could not wear the red hat, and had therefore no other distinction to mark the difference between them and prelates of an inferior rank except their place, Paul II permitted them to wear the red bonnet (*rubrum capitium*), which previously had been the prerogative of the pontiff alone. They were also permitted the red habit by the same pope.

Cardinal's Hat.

5. *The Style* of the cardinals, until the time of Urban VIII, was *Most Illustrious;* that pope, however, Jan. 10, 1630, granted to all the cardinals the title of *Eminence.* The cardinal-bishops are titled *Eminentissimi.* A carriage and livery servants are obligatory parts of the establishment of a cardinal.

6. *Form of making Cardinals.*—The pope alone can elevate any one to the cardinalate, which he does by declaring in the secret Consistory the names of those whom he proposes to make cardinals, saying *Habemus Fratres.* He afterward, in a public Consistory, puts the red bonnet on the head of the newly-appointed cardinal, signs him with the cross, and creates him cardinal, with the form of words following: *Ad laudem Omnipotentis Dei et Sanctæ Sedis Apostolicæ ornamentum accipe galerum rubrum, insigne singularis dignitatis cardinalatus, per quod designatur, quod usque ad mortem et sanguinis effusionem inclusive, pro exultatione Sanctæ fidei, pace et quietate populi christiani, augmento et statu Sacrosanctæ Romanæ Ecclesiæ te intrepidum exhibere debeas. In nomine Patris †, et Filii †, et Spiritus Sancti †, Amen.*

7. *Duties, Privileges, etc., of Cardinals.*—The legal *status* of cardinals, and their relations to the papal see, are fixed by the *Ceremoniale Romanum*, by the decrees of Trent (*sess. xxiv, cap.* 1, *de Reform.*), by the bull of Sixtus V, *Religiosa Sanct.*, April 13, 1587, and by later papal constitutions. By the canon of Trent, as above cited, it is decreed "that all and each of the particulars which have been elsewhere ordained, in the same synod, touching the life, age, learning, and other qualifications of those who are to be promoted to be bishops, the same are also to be required in the creation of cardinals of the holy Roman Church, even though they be deacons; whom the most holy Roman pontiff shall, as far as can conveniently be done, choose out of all the nations of Christendom, as he shall find persons competent. Finally, the same holy synod, moved by the so many most grievous difficulties of the Church, cannot avoid calling to mind that nothing is more necessary for the Church of God than that the most blessed Roman pontiff apply especially here that solicitude which, by the duty of his office, he owes to the universal Church, that he take unto himself, to wit as cardinals, men the most select only." No bastard, nor ecclesiastic who has not been a year in orders, can be chosen. Cardinals may be taken from any country, but the pope has always chosen a large majority of Italians. In October, 1866, of 59 cardinals, 39 were Italians by birth, 8 Frenchmen, 4 Spaniards, 4 Germans, 1 Croatian, 1 Belgian, 1 Portuguese, and 1 Irishman. The rank of cardinal is next to that of pope, and the pope is always chosen from their number. Since the time of Alexander III the right of electing the pope lies in the College of Cardinals. See POPE. The pope often employs cardinals as ambassadors, and the individual thus employed is styled Legate *a Latere.* A cardinal-legate acted, before the recent absorption of the Papal States by the kingdom of Italy, as governor of the northern provinces of the Papal States, which thence received the name of legations. The chief secretary of state, the *Camerlengo*, or minister of finances, the vicar of Rome, and other leading officials, are always chosen from among the cardinals. Their dignity is held to place them in the rank of European princes; and, so long as the temporal power of the popes lasted, they held civil as well as ecclesiastical offices. For the *Congregations*, i. e. papal commissions, which are under the direction of cardinals, see CONGREGATION, PAPAL.

8. *Literature.* — Ferraris, *Promta Bibliotheca*, ii, 99; Kleiner, *De Orig. et Antiq. etc. Cardinalium;* Buddeus, *De Orig. Card. Dignitatis* (Jena, 1695, 4to); Bez, *De Orig. et Antiq. Cardinalium* (Heidelberg, 1767, 4to); *History of the Cardinals, to Pope Clement IX*, from the Italian (Lond. 1670, fol.); Augusti, *Denkwürdig.* p. 151; Thomassin, *Vet. et Nov. ecclesiæ Disciplina* (vol. i, c.

113); Siegel, *Handbuch der Alterthümer*, i. 329; Coleman, *Christian Antiquities*, ch. iii, § 6; Herzog, *Real-Encyklopädie*, ii, 577. See CONGREGATION; CURIA; POPE.

Care'äh (2 Kings xxv, 23). See KAREAH.

Carem (Καρέμ), one of the additional group of eleven cities of Judah (q. v.) interpolated by the Septuagint at Josh. xv, 59, and thought to be the present village *Ain Karim*, about 1½ hour west of Jerusalem (Wilson, *Lands of Bible*, ii, 268; Schwarz, *Palest.* p. 96, 108; Robinson, *Later Bib. Res.* p. 367-9), but the position agrees better with that of BETH-HACCEREM (q. v.).

Carès, JOHN, a minister of the German Reformed Church, was born in Northumberland county, Pa., in September, 1811. He studied theology in the Theological Seminary of the German Reformed Church at York, Pa. In 1832 he was licensed and ordained, and immediately became pastor of the German Reformed church in York, Pa., which post he occupied till his death, April 5, 1843. As a preacher, he was clear, compact, earnest, and solemn. In his manner, looks, and tones there was a peculiarity which belongs but to few—a kind of holy fascination which chained the hearer, and awed his conscience. Deep impressions were made wherever he preached; and for this, more than for any talents or learning he possessed, he was widely known and gratefully remembered. He possessed also the rare talent of preaching in both German and English with a correctness that made it impossible to determine which was his native tongue.

Carey, Felix, son of Dr. William Carey, was born in 1786, assisted his father in his labors in Bengal, and died at Serampore in 1822. Among his works were, *Grammar and Dictionary of the Burman Language* (Serampore, 1814, 8vo); *Pali Grammar*; a Bengalese translation of the *Pilgrim's Progress*, etc. — Gorton, *Biog. Dictionary*, s. v.

Carey, William, an eminent Baptist missionary, was born Aug. 17, 1761, at Paulersbury, Northamptonshire, England. His father was clerk of the parish, and master of a free school, in which his son received his elementary education. Having early embraced Baptist principles, he was in 1783 immersed in the river Nen, and afterward became pastor of a Baptist church in the village of Moulton. Here he was a diligent student, not only of theology, but also of natural history, botany, and modern languages. In 1787 he removed to Leicester, where he had every prospect of a useful and happy life. But his mind, long occupied with the duty of missionary exertions among the heathen, would not allow him to indulge the prospect of remaining at home. The cause of missions was his favorite theme; and having, at the urgent recommendation of his friends, Fuller, Ryland, and Sutcliffe of Olney, directed public attention to the subject through the press, steps were forthwith taken to commence practical operations among the Baptists. Chiefly through his exertions the Baptist Missionary Society was formed, Oct. 2, 1792. Mr. John Thomas, who had already spent some years in Bengal, and was imbued with a similar enthusiasm in the cause of missions to the heathen, had recently returned home. Carey volunteered for India, associated Thomas with him, and embarked June 13, 1793, accompanied by his wife and whole family, Mrs. Carey's sister having consented also to form one of the emigrants. Arrived in India, all their property was lost on the river Hooghly. Thus left destitute in a strange land, Carey retained unshaken faith in the providence of God. In 1794 he was employed by a Mr. Udney in an indigo factory, and was brought into close contact, in this sphere, with the natives. Here he spent five years, preaching, studying the Bengalee and Sanscrit languages, and establishing schools. Carey, having made satisfactory inquiries, resolved to establish his head-quarters at Mudnabatty. The home society sent out two pious and excellent laborers—Marshman and Ward—the former of whom had been a teacher, the latter a printer. On their arrival at Calcutta in 1799, the Indian government refused permission to increase the missionary force at Mudnabatty, and accordingly forced them to break up that establishment at a great loss to their funds. Mr. Carey and his friends fixed their residence at the Danish settlement of Serampore, where, under the patronage of the governor, who was most friendly to the object of their mission, they enjoyed a tide of prosperity beyond their most sanguine expectations, and were placed in the centre of a much more numerous population, among whom they were free to carry on their work of Christian instruction. In 1801 the marquis of Wellesley, who founded the College of Fort William for instructing the youth in the Company's service in the vernacular languages of India, offered Carey the professorship of Bengalee. After considerable hesitation, and satisfactory evidence that the duties of this situation would not interfere with his missionary labors, Carey accepted the situation; and though the teaching of the Sanscrit and Mahratta languages, being subsequently devolved on the occupier of this chair, added greatly to the routine of his duties, he continued for thirty years—the whole period of its existence—to contribute to the usefulness and the fame of that institution. He now formed the acquaintance of learned pundits from all parts of India, through whom, in the course of years, he was enabled to translate the Scriptures into all the principal languages of Northern Hindostan. For the students in the college he had to compile grammars of the languages he taught them, and after many years he completed his voluminous Bengalee dictionary. All his philological researches were made subservient to the design of translating the Sacred Oracles into the vernacular languages of India. "The versions of the sacred Scriptures, in the preparation of which he took an active and laborious part, included the Sanscrit, Hindee, Brijbhassa, Mahratta, Bengalee, Voriga, Telinga, Kurnata, Maldivian, Gujarattee, Buloshee, Pushtoo, Punjabee or Shikh, Kashmeer, Assam, Burman, Pali or Magudha, Tamul, Cingalese, Armenian, Malay, Hindostanee, and Persian. In six of these tongues the whole Scriptures of the Old and New Testaments were printed and circulated; the New Testament appeared in twenty-three languages, besides various dialects, in which smaller portions of the sacred text were printed. The whole number of languages is stated at forty, and we are probably below the truth when we state that the Serampore press, under the auspices chiefly of Dr. Carey, was honored to be the instrument, in about thirty years, of rendering the Word of God accessible to three hundred millions of human beings, or nearly one third of the population of the world." He died June 9, 1834. See *Life of Carey*, by Eustace Carey (Lond. 1837, 2d ed. 12mo); Belcher, *Biography of Carey* (Phila. 1855, 18mo); Jamieson, *Cyclop. of Biography*, 103; Marshman, *Lives of Carey, Marshman, and Ward* (Lond. 1859, 2 vols. 8vo); *Christian Review*, i, 531.

Cargill, DONALD, one of the leaders of the Scotch Covenanters (q. v.), was born in Perthshire about 1610. He received his education at Aberdeen, entered the ministry of the Presbyterian Church, and was pastor of the Barony church at Glasgow. When the English Church was established in 1661, he refused to accept his charge from the archbishop, and also refused to leave Scotland when banished. After the battle of Bothwell Bridge, in which he took part, he fled to Holland, but returned to Scotland, and took part with the "Cameronians" (q. v.), or strict Presbyterians. Pursued by the military, he was surprised, with his friend, Henry Hall, at Queensferry, June 3, 1680, but he escaped, while Hall was mortally wounded. On Hall's person was found a "Declaration of

Principles," which caused a still hotter pursuit of Cargill. Cargill, Cameron, and others now prepared what is known as the "Sanquhar Declaration," because it was affixed to the market-cross at Sanquhar, June 22, 1680. Cargill was declared a traitor, and a price set on his head. In September he publicly "excommunicated" the king and others at Torwood. Hunted from place to place, he preached his last sermon on Dunsyre Common, July 10, 1681, and was arrested the same night at Covington Mill. He was tried and condemned, the casting vote being given by the duke of Argyle, who afterward bitterly repented this act. Cargill was executed at Edinburgh, July 27, 1681.—Hetherington, *History of the Church of Scotland*, vol. ii, ch. ii; *Biographia Presbyteriana*, ii (Edinburgh, 2d ed. 1835); *History of the Covenanters* (Presbyterian Board, Phila.), vol. ii, ch. iii; Hook, *Eccles. Biography*, ii, 435.

Ca'ria (Καρία), the south-western district of Asia Minor (q. v.), washed on the S. by the Mediterranean and on the W. by the Ægean Sea, and indented by many bays and creeks. On the N. lay Lydia, eastward were Phrygia and Lycia, here separated by mountainous landmarks, yet without any fixed boundary, which continually fluctuated on the N., where the river Mæander formed not so much the political as the natural border (Strabo, xii, 577, 578; comp. xiii, 628). The S.W. angle of this region, having been settled by Dorian colonies, was sometimes distinguished from Caria by the name of *Doris* (Pliny, v, 29). Mountain ranges stretched through its entire territory, jutting out into promontories at the sea; yet considerable plains intervened, which were well watered, and fruitful in grain, oil, wine, etc. The inhabitants, composed of various mixed races (among which were some of Shemitic stock, Bertheau, *Isr. Gesch.* p. 193 sq.), were engaged, at least on the shore, in navigation and piracy (Herod. ii, 152; Thucyd. i, 4, 8; Strabo, xiv, 662). A Jewish colony is referred to in the Apocrypha (1 Macc. xv, 22, 33) as being favorably addressed by the Romans in a decree which names the principal towns Halicarnassus (the birthplace of the historian Herodotus), Cnidus (mentioned in Acts xxvii, 7), to which may be added Miletus (comp. Acts xx, 15-28); and the same passage alludes to the fact that the Carians were then (B.C. 139) endowed with the privilege of Roman citizenship (Livy, xlix, 15), after having been for some time subject to Rhodes (comp. Ptolemy, v, 2; Mela, i, 16; Forbiger, *Alte Geogr.* ii, 204 sq.; Heeren, *Ideen*, I, i, 158 sq.). Somewhat later (B.C. 130) Caria became a province of the Roman empire (see Smith's *Dict. of Class. Geogr.* s. v.). Some antiquarians (see Verbrugge, *De num. plur. Hebr.* p. 68) have discovered the Carians in the O. T. under the name *Karim* (כָּרִים, 2 Kings xi, 4, 19), mentioned in connection with the *Ratsim* (רָצִים, 2 Sam. xx, 23) as the life-guards of the Jewish kings; but these terms are rather to be taken as appellatives, *executioners* and *couriers* (Gesenius, *Thesaur.* p. 671). See CHERETHITE and PELETHITE.

Carinthia and **Carniola**. The province of *Carinthia* (German, *Kärnthen*), since 1336, has been an appanage of the dukes of Austria. In olden times it was included in Slavonia, and during the wars with Germany the first seeds of Christianity were sown. The princes of Carinthia had become Christians by the middle of the eighth century, yet the mass of the people did not embrace it before the latter part of the ninth century. In *Carniola* (German, *Krain*), which is also a duchy of Austria, Christianity was earlier propagated. Fortunatus, deacon of Hermagoras, first bishop of Aquileia, is said to have first introduced it in Laibach, and up to 1463 Laibach was an archdeaconry of Aquileia.

At the Reformation, Luther's doctrine spread rapidly through these two provinces, and Primus Truber (q. v.), who first promulgated them there, became canon of Laibach in 1531; yet he had afterward to leave the country and retire to Wurtemberg, from whence he supplied his countrymen with evangelical books and tracts, partly in Slavonic and partly in Latin. In 1555 almost the whole population of both provinces had adopted the Reformation, and Truber went back in 1561, taking with him the first printer there had been in the country, John Mandel (Manlius). In 1597, a letter of prince-bishop Thomas Chrön to the pope shows that but one twentieth of the population, and that among the lower classes, adhered to Romanism. Yet want of unity among the ministers, and a growing tendency to indulge in scholastic and dogmatic discussions, opened the doors again to Rome, and in 1579 some of the ministers were driven away. The Roman Catholic element steadily increased until, in 1598, all the Protestant ministers were commanded by the emperor Ferdinand II to leave within fourteen days. In 1601 the same command was issued for the laity, who were to recant or emigrate within six weeks. Most preferred the latter alternative, and went into Bohemia, Hungary, and Germany. This state of things continued until the promulgation of the celebrated edict of toleration by Joseph II in 1781.

The denominational statistics of the two provinces were, according to the official census of 1880, as follows: *Carinthia*—Roman Catholics, 331,027; United Greeks, 9; Non-united Greeks, 1; Lutherans, 17,466: Reformed, 55. *Carniola*—Roman Catholics, 480,079; United Greeks, 201; Non-united Greeks, 319; Lutherans, 881; Reformed, 123; other sects, 4. There are three bishoprics: 1st, the see of Laibach, suffragan of the diocese of Görz, with 205 livings, 83 cures, 50 benefices, 676 secular priests, and 44 regular priests; 2d, the see of Gurk, belonging to the archbishopric of Salzburg, contains 204 livings, 72 cueneres, 11 l.fices, and counts 421 secular priests, and 17 regular priests; 3d, the see of Lavant, suffragan of Salzburg, with 169 livings, 43 cures, 171 benefices, 405 secular priests, and 72 regular priests. In Carniola there are also 5 convents, occupied by 67 monks, and 2 by 55 nuns; in Carinthia there are 70 of the latter, and 8 convents.

The Lutherans are subject to the Superintendent at Vienna. They have in the district of Klagenfurth 2 circuits, with 2 ministers; and in that of Villach, 14 districts and 14 ministers. The latter districts are: 1, Oriach, 1415 persons; 2, Bleiberg, 1000; 3, Dornbach, 605; 4, Eisentratten, 953; 5, Feffernitz, 621; 6, St. Peter, 1624; 7, Fresach, 1600; 8, St. Ruprecht, 1429; 9, Trebesing, 1250; 10, Fresdorf, 881; 11, Watschig, 1168; 12, Zlan, 1586; 13, Weisbriach, 1178; 14, Gnesau, 900; 15, Feldkirchen, 800.—*De conversione Carantanorum* (anonymous); Waldau, *d. Geschichte d. Protest. i. Oesterreich, Steyermark, Kärnthen u. Krain* (Anspach, 1783, 2 vols.); Herzog, *Real-Encyklopädie*, vii, 208, from which this article is condensed.

Carleton, GEORGE, D.D., bishop of Chichester, was born at Norham, Northumberland, 1559. He was educated by Bernard Gilpin, by whom he was sent to Edmund Hall, Oxford, where he graduated A.B. in 1580, and A.M. in 1585. He remained in the college as fellow and master until 1616. In 1617 he was made bishop of Llandaff. In 1618 he was sent by James I, with Drs. Hall, Davenant, and Ward, to the Synod of Dort, where he defended episcopacy. On his return, the States sent a letter to king James highly commending him and the rest of the divines for their virtue, learning, piety, and love of peace. He was advanced to the see of Chichester in 1619, of which he continued bishop until his death in 1628. He was a man of solid judgment and various reading, particularly in the fathers and schoolmen; a strenuous opponent of Rome, and a steady Calvinist. He wrote *Tithes Examined* (Lond. 1611, 4to):—*Short Directions to know the true Church* (Lond. 1615, 12mo):—*Consensus Ecclesiæ Catholicæ contra Tridentinos* (London, 1613, 8vo):—*Heroici Characteres* (Oxford, 1603, 4to):—*Vita*

B. Gilpini (in Bates, *Collection of Lives*, Lond. 1681), and several other works.—Middleton, *Evangelical Biography*, ii, 455; Hook, *Eccl. Biography*, iii, 440; *New and General Biog. Dictionary*, iii, 153.

Carlisle (*Carleolum*), a city in Cumberlandshire, and an episcopal see of the Church of England. It belongs to the province of the archbishop of York. A monastery was commenced here about 1093, and afterward finished by king Henry I, who richly endowed it, and filled it with regular canons, and farther, at the request of archbishop Thurstan, erected it into a cathedral church. It was the only regular chapter in England composed of Augustinian canons, and who, with the consent of the pope and the king, enjoyed the right of electing their bishop. The priory was dissolved in January, 1540, and its site and manor given to maintain a dean, prebendaries, etc. The diocese is composed of parts of Cumberland and Westmoreland, and the chapter consists of a dean, archdeacon, chancellor, four canons, and three minor canons. The incumbent (1868) is Harvey Goodwin, D.D., consecrated in 1869.

Carlstadt or **Carolostadt**, an eminent but violent coadjutor of Luther. His name was ANDREW BODENSTEIN, but he took his surname from his native place in Franconia. The date of his birth is unknown. He studied theology and the canon law at Rome. In 1504 he went to Wittemberg, and after taking several academic degrees and obtaining a great reputation for scholastic learning, he was in 1513 made professor of theology and archdeacon. His intimacy with Luther began in 1512. When Carlstadt came back from a stay at Rome, about 1515, and found that Luther's opinions were subverting scholasticism in the University, he at first opposed them violently, but afterward devoted himself to Biblical study, and became one of Luther's most zealous adherents. By some of his contemporaries his erudition is at this time highly spoken of, but Melancthon denied him either sound learning, genius, or piety. In escaping from scholasticism he seems to have gone to the opposite extreme of mysticism. In the celebrated Leipsic Disputation (June 27, 1519) he disputed with Eck (q. v.) upon "human freedom and divine grace." Luther, being drawn into the debate, surpassed the other disputants, and from this time the breach between Carlstadt and the great reformer openly manifested itself. The next year (1520) he published a treatise, *De canonicis Scripturis*, which, although defaced by bitter attacks on Luther, was nevertheless an able work, setting forth the great principle of Protestantism, viz. the paramount authority of Scripture. He also at this time contended for the authority of the epistle of St. James against Luther. On the publication of the bull of Leo X against the reformers, Carlstadt showed a real and honest courage in standing firm with Luther. His work on *Papal Sanctity* (1520) attacks the infallibility of the pope on the basis of the Bible. In 1521, during Luther's confinement in the Wartburg, Carlstadt had almost sole control of the reform movement at Wittemberg, and was supreme in the University. He attacked monachism and celibacy in a treatise *de cœlibatu, monachatu et viduitate*. His next point of assault was the *Mass*, and a riot of students and young citizens against the mass soon followed. On Christmas, 1521, he gave the sacrament in both kinds to the laity, and in German; and in January, 1522, he married. His headlong zeal led him to do whatever he came to believe right, at once and arbitrarily. But he soon outran Luther, and one of his great mistakes was in putting the O. T. on the same footing as the New. On Jan. 24, 1522, Carlstadt obtained the adoption of a new church constitution at Wittemberg, which is of interest only as the first Protestant organization of the Reformation. In 1523 he gave way to a fanaticism against academic learning, insisting that academical degrees were sinful, and that the spirit was sufficient for the illumination of the faithful. The ferment increased until Wittemberg was in a storm, the University in danger of dissolution, and the timid Melancthon, although countenancing all the reasonable steps of Carlstadt, was nevertheless in great fear that his rashness would be disastrous to the reform. This is the culminating point of Carlstadt's influence. When Luther returned from the Wartburg, and found how things were going at Wittemberg, his eloquence and strength soon restored order, and Carlstadt's violence was rebuked and set aside. Carlstadt's vanity and ambition were mortified, and his influence at Wittemberg was broken. In 1523 he abandoned his academical honors and degree, left Wittemberg, and, calling himself a "*new layman*," went into the country. He soon published a number of mystical works, asserting the entire passivity of the human will in relation to predestined grace, and soon went almost to the verge of apostasy. He was especially fanatical in regard to the right to use "physical force," and treated with contempt Luther's consideration for the weakness of others. After his banishment from Wittemberg he obtained the pastorate of a church at Orlamünde, in Saxony, but after his discussion with Luther the elector banished him also from the state. Hence he went to Strasburg, and published several writings on the Eucharist, in which he opposed Luther's doctrine of the real (spiritual) presence, and coincided with Zwingle's views, which were also those of Œcolampadius, and are now held by most Protestants. On account of these tenets he was dismissed from Orlamünde in 1524, and from this date until 1534 he wandered through Germany, pursued by the persecuting opinions of both Lutherans and Papists, and at times reduced to great straits by indigence and unpopularity. But, although he always found sympathy and hospitality among the Anabaptists, yet he is evidently clear of the charge of complicity with Münzer's rebellion. Yet he was forbidden to write, his life was sometimes in danger, and he exhibits the melancholy spectacle of a man great and right in many respects, but whose rashness, ambition, and insincere zeal, together with many fanatical opinions, had put him under the well-founded but immoderate censure of both friends and foes.

By these severe reverses the intemperate zealot was humbled. In 1530 Bucer sent him with warm commendations from Strasburg to Zurich, where, in 1532, he became a second time pastor of a church. In 1534 he was made professor of theology at Basel, and minister of St. Peter's, and, bating a dispute with Myconius, he lived in comparative quiet and comfort. He died of the plague on Christmas, 1541. It cannot be denied that in many respects he was apparently in advance of Luther, but his error lay in his haste to subvert and abolish the external forms and pomps before the hearts of the people, and doubtless his own, were prepared by an internal change. Biographies of him are numerous, and the Reformation no doubt owes him much of good for which he has not the credit, as it was overshadowed by the mischief he produced. See Füssli, *Andreas Bodenstein* (Frankfurt, 1776); Jäger, *And. Bodenstein von Carlstadt* (Stuttgardt, 1856, 8vo); Mosheim, *Ch. Hist.* iii, 24, 32, 140; Merle D'Aubigné, *Hist. of Reformation*, iii, 179 sq.; Herzog, *Real-Encyklopädie*, ii, 595 sq.; Ranke, *History of the Reformation*, pt. ii, p. 163; Dorner, *Geschichte d. Prot. Theologie*, 1867, p. 121 sq.

Carma'nian (Vulg. *Carmanianus*, for the Gr. text is not extant), an inhabitant of Carmania (occurring in the Bible only in 2 Esdr. xv, 30, where the Carmanians are predicted as the ravagers of Assyria), an extensive province of Asia along the northern side of the Persian Gulf, extending from Carpella (the present Cape Bomareek, or else C. Iask) on the E. to the river Bagradas (now Nabend) on the W., and comprehending the modern coast-line of *Kirman*, including Laris-

tan and Moghostan. See PERSIA. It was rugged, but fruitful, and inhabited by a warlike race (see Smith's *Dict. of Class. Geogr.* s. v.). They are described by Strabo (xv, p. 727) as worshipping Ares alone of all the gods, to whom they sacrificed an ass. None of them married till he had cut off the head of an enemy and presented it to the king, who placed it on his palace, having first cut out the tongue, which was chopped up into small pieces and mixed with meal, and in this condition, after being tasted by the king, was given to the warrior who brought it and to his family to eat. Nearchus says that most of the customs of the Carmanians, and their language, were Persian and Median. Arrian gives the same testimony (*Ind.* 38), adding that they used the same order of battle as the Persians. See ASIA.

Car'mè (Χαρμή v. r. Χαρμι), given (1 Esdr. v, 25) as the family head of 1017 Jews who returned from Babylon: evidently meaning the HARIM (q. v.) of the Heb. texts (Ezra ii, 32; Neh. vii, 35).

Car'mel (Heb. *Karmel'*, כַּרְמֶל, *park*, as in Isa. x, 18; xvi, 10; xxix, 17; xxxii, 15, 16; Jer. ii, 7; xlviii, 33 [also 2 Kings xix, 23; 2 Chron. xxvi, 10, in both which passages the A. V. incorrectly takes it for a proper name, "Carmel"]; hence *grits*, as a garden fruit, Lev. ii, 14; xxiii, 14; 2 Kings iv, 42), the name of a noted promontory (often with the art. [as in several of the above occurrences of the appellation], *hak-Karmel'*, הַכַּרְמֶל, q. d. *the orchard*, Amos i, 2; ix, 3; Jer. iv, 26; Cant. vii, 6; fully "Mt. Carmel," *har hak-Karmel'*, הַר הַכַּרְמֶל, q. d. *garden-mount*, 1 Kings xviii, 19, 20; or without the art. Isa. xxxiii, 9; Nah. i, 4; Josh. xix, 26), and also of a town; both doubtless so called from their verdant fertility. For details of both see the *Memoirs* accompanying the *Map* lately issued by the "Pal. Explor. Fund."

1. (Sept. usually Κάρμηλος [so Josephus, *Ant.* v, 1, 22, etc.; Tacitus, "Carmelus," *Hist.* ii, 78; also Suetonius, *Vespas.* 5, 1]; but Καρμήλιον in 1 Kings xviii, 19, 20; 2 Kings ii, 25; iv, 25 [so Josephus, *Ant.* xiii, 5, 4], and Χερμέλ in Josh. xii, 22). A prominent headland of lower or central Palestine, bounding southerly the Bay of Acre, and running out boldly almost into the waves of the Mediterranean, from which it stretches in a straight line, bearing about S.S.E. for a little more than twelve miles, when it terminates suddenly by a bluff somewhat corresponding to its western end, breaking down abruptly into the hills of Jenin and Samaria, which form at that part the central mass of the country. The average height is about 1500 feet; and at the foot of the mountain, on the north, runs the brook Kishon, and a little further north the river Belus. Mount Carmel consists rather of several connected hills than of one ridge, being at the W. end about 600, and at the E. about 1600 feet above the sea. The highest part is some four miles from the E. end, at the village of Esfieh, which, according to the measurements of the English engineers, is 1728 feet above the sea. The foot of the northern portion approaches the water closely, but farther south it retires more inland. The slopes are steepest on the northern side toward the Kishon (q. v.).

Carmel fell within the lot of the tribe of Asher (Josh. xix, 26), which was extended as far south as Dor (Tantura), probably to give the Asherites a share of the rich corn-growing plain of Sharon (comp. Josephus, *Ant.* v, 1, 22; *War*, iii, 3, 1). The king of "Jokneam of Carmel" was one of the Canaanitish chiefs who fell before the arms of Joshua (xii, 22). There is not in these earliest notices a hint of any sanctity attaching to the mount; but from the facts that an altar to Jehovah did exist there before the introduction of Baal worship into the kingdom (1 Kings xviii, 30); that Elijah chose the place for the assembly of the people, such assemblies being commonly held at holy places; and from the custom, which appears to have been prevalent, of resorting thither on new-moon and sabbaths (2 Kings iv, 23), there seem to be grounds for believing that from very early times it was considered a sacred spot. In later times, Pythagoras was led to it by that reputation, according to his biographer Iamblichus (*Vit. Pythag.* c. 3, p. 40, 42, ed. Kiesl.), who himself visited the mountain; Vespasian, too, came thither to consult—so we are told by Tacitus (*Hist.* ii, 7), with that mixture of fact and fable which marks all the heathen notices of Palestine—the oracle of the god, whose name was the same as that of the mountain itself; an oracle without image or temple (see Smith's *Dict. of Classical Geogr.* s. v. Carmelus). But the circumstances that have made the name of Carmel most familiar are that here Elijah brought back Israel to allegiance to Jehovah, and slew the prophets of the foreign and false god; here at his entreaty were consumed the successive "fifties" out of the royal guard; and here, on the other hand, Elisha received the visit of the bereaved mother whose son he was soon to restore to her arms (2 Kings iv, 25, etc.) See ELISHA. The first of these three events, without doubt, took place at the eastern end of the ridge, at a spot called *el-Mukhrakah*, near the ruined village of el-Mansurah, first described by Van de Velde (*Journey*, i, 324 sq.). The tradition preserved in the convent, and among the Druses of the neighboring villages, the names of the places, the distance from Jezreel, the nature of the locality, the presence of the never-failing spring, all are favorable (see Stanley, *Sinai and Palest.* p. 345 sq.; Thomson, *Land and Book*, i, 223 sq.). The terrace on which the traditionary structure stands commands a noble view over the whole plain of Esdrælon, from the banks of the Kishon down at the bottom of the steep declivity, away to the distant hill of Gilboa, at whose base stood the royal city of Jezreel. To the 850 prophets, ranged doubtless on the wide upland sweep, just beneath the terrace, to the multitudes of people, many of whom may have remained on the plain, the altar of Elijah would be in full view, and they could all see, in the evening twilight, that "the fire of the Lord fell, and consumed the burnt-sacrifice, and the wood, and the stones, and the dust, and licked up the water" (ver. 38). The people then, trembling with fear and indignation, seized, at Elijah's bidding, the prophets of Baal; "and Elijah brought them down to the brook Kishon, and slew them there." On the lower declivities of the mountain is a mound called Tell el-Kusis, "the Hill of the Priests," which probably marks the very scene of the execution. May not the present name of the Kishon itself have originated in this tragic event? It is called *Nahr el-Mokutta*, "the River of Slaughter." The prophet went up again to the altar, which was *near*, but *not upon* the summit of the mountain. While he prayed, he said to his servant, "Go up now, and look toward the sea." The sea is not visible from the terrace, but a few minutes' ascent leads to a peak which commands its whole expanse. Seven times did the servant climb the height, and at last saw the little cloud "like a man's hand" rising out of the sea. See ELIJAH.

According to the reports of most travellers, the mountain well deserves its Hebrew name (see above). Mariti describes it as "a delightful region," and says the good quality of its soil is apparent from the fact that many odoriferous plants and flowers, as hyacinths, jonquils, tazettos, anemones, etc., grow wild upon the mountain (*Travels*, p. 274 sq.). Otto von Richter (*Wallfahrten*, p. 64) gives a glowing account of its beauty and varied scenery. Mr. Carne also says, "No mountain in or around Palestine retains its ancient beauty so much as Carmel. Two or three villages and some scattered cottages are found on it; its groves are few, but luxuriant; it is no place for crags and precipices, or rocks of the wild goats; but its sur-

face is covered with a rich and constant verdure" (*Letters*, ii, 119). "There is not a flower," says Van de Velde, "that I have seen in Galilee, or on the plains along the coast, that I do not find here on Carmel . . . still the fragrant, lovely mountain that he was of old" (*Narrative*, i, 317, 8). "The whole mountain side was dressed with blossoms, and flowering shrubs, and fragrant herbs" (Martineau, p. 539). So Isaiah (xxxv, 2) alludes to "the excellency (splendid ornaments) of Carmel." So, on account of the graceful form and verdant beauty of the summit, the head of the bride in Cant. vii, 5 is compared to Carmel. It was also celebrated for its pastures, and is therefore ranked with Bashan in Isa. xxxiii, 9; Jer. l, 19; Amos i, 2; Mic. vii, 14; Nah. i, 4. Its conspicuous position is also compared with that of Tabor (Jer. xlvi, 18). Its great elevation is referred to in Amos ix, 3. A much less glowing account of Carmel is given, however, by many travellers whose visit has been later in the year—toward the end of summer or in autumn—and who consequently found everything parched, dry, and brown. (See Hackett's *Illustra. of Scripture*, p. 324-326.) The western extremity of the ridge—that, unfortunately, with which ordinary travellers are most familiar, and from which they take their impressions—is more bleak than the eastern. Its sides are steep and rocky, scantily covered with dwarf shrubs and aromatic herbs, and having only a few scattered trees here and there in the glens (*Crescent and Cross*, i, 54 sq.).

The structure of Carmel is in the main the Jura formation (upper oolite), which is prevalent in the centre of Western Palestine—a soft white limestone, with nodules and veins of flint. As usual in limestone formations, it abounds in caves ("more than 2000"—Mislin, ii, 46), often of great length, and extremely tortuous. See CAVE. At the west end are found chalk and tertiary breccia formed of fragments of chalk and flint (Russegger, in Ritter, *Erdk.* xvi, 712). On the north-east of the mount, beyond the Nahr el-Mokatta, plutonic rocks appear, breaking through the deposited strata, and forming the beginning of the basalt formation which runs through the plain of Esdrælon to Tabor and the Sea of Galilee (Ritter, *ib.*). The round stones known by the names of "Lapides Judaici" and "Elijah's melons" are the bodies known to geologists as "geodes." Their exterior is chert or flint of a lightish brown color; the interior is hollow, and lined with crystals of quartz or chalcedony. They are of the form, and often the size, of the large water-melons of the East. Formerly they were easily obtained, but are now very rarely found (Seetzen, ii, 131, 134; Parkinson's *Organic Remains*, i, 322, 451). The "olives" are more common. They are the fossil spines of a kind of echinus (*Cidaris glandifera*) frequent in these strata, and in size and shape are exactly like the fruit (Parkinson, iii, 45). The "apples" are probably the shells of the *cidaris* itself. For the legend of the origin of these "fruits," and the position of the "field" or "garden" of Elijah in which they are found, see Mislin, ii, 64, 65. The whole ridge of Carmel is deeply furrowed with rocky ravines, filled with such dense jungle as scarcely to be penetrable. Here jackals, wolves, hyenas, and wild swine make their lairs, and woodcocks find excellent cover; while in the open forest glades, partridges, quails, and hares sport about. In the sides of the mountain, especially round the convent and overhanging the sea, are great numbers of caves and grottoes, formed partly by nature and partly by art and industry in the soft calcareous rock. Carmel at one period swarmed with monks and hermits, who burrowed in these comfortless dens. Curious traditions cling to some of them, in part confirmed by the Greek inscriptions and names that may still be traced upon their walls. One of them is called the "Cave of the Sons of the Prophets," and is said to be that in which the pious Obadiah hid the prophets from the fury of the infamous Jezebel (1 Kings xviii, 4). In one tract, called the Monks' Cavern, there are as many as 400 caves adjacent to each other, furnished with windows, and with places for sleeping hewn in the rock. A peculiarity of many of these caverns is mentioned by Shulz (*Leitung*, v, 187, 382), that the entrances into them are so narrow that only a single person can creep in at a time; and that the caverns are so crooked that a person is immediately out of sight unless closely followed. This may serve to illustrate Amos ix, 3. To these grottoes the prophets Elijah and Elisha often resorted (1 Kings xviii, 19 sq., 42; 2 Kings ii, 25; iv, 25; and comp. perhaps 1 Kings xviii, 4, 13). At the present day is shown a cavern called the cave of Elijah, a little below the Monks' Cavern already mentioned, and which is now a Moslem sanctuary. Upon the north-west summit is an ancient establishment of Carmelite monks, which order, indeed, derived its name from this mountain. See CARMELITES. The order is said in the traditions of the Latin Church to have originated with Elijah himself (St. John of Jerus., quoted in Mislin, ii, 49), but the convent was founded by St. Louis, and its French origin is still shown by the practice of unfurling the French flag on various occasions. Edward I of England was a brother of the order, and one of its most famous generals was Simon Stokes of Kent (see the extracts in Wilson's *Bible Lands*, ii, 246; for the convent and the singular legends connecting Mount Carmel with the Virgin Mary and our Lord, see Mislin, ii, 47-50). By Napoleon it was used as a hospital during the siege of Acre, and after his retreat was destroyed by the Arabs. At the time of Irby and Mangles's visit (1817) only one friar remained there (Irby, p. 60). The old convent was destroyed by Abdallah Pasha, who converted the materials to his own use; but it has of late years been rebuilt on a somewhat imposing scale by the aid of contributions from Europe. Carmel is known by the name of *Jebel Kurmul* in Arabian writers. At present it seems to be called by the Arabs *Jebel Mar Elyas*, from the convent of Elias near its northern end. (See generally Phil. a S. Trinitate, *Oriental. Reisebeschreib.* iii, 1, p. 156 sq.; Reland, *Palæst.* p. 32 sq.; Hamesveld, i, 349; Schubert, *Reise*, iii, 205; Robinson, *Researches*, iii, 160, 189; Thomson, *Land and Book*, i, 493; Porter, *Handbook for Syria*, p. 371; Tristram, *Land of Israel*, p. 496.)

2. (Sept. Χερμέλ in Josh., ὁ Κάρμηλος in Sam. and Chron.) A town in the mountainous country of Judah (Josh. xv, 55), the residence of Nabal (1 Sam. xxv, 2, 5, 7, 40), and the native place of David's favorite wife, "Abigail the Carmelitess" (1 Sam. xxvii, 3; 1 Chron. iii, 1). This was doubtless the Carmel at which Saul set up a "place" (יָד, *a hand*; compare 2 Sam. xviii, 18, "Absalom's place," where the same word is used) after his victory over Amalek (1 Sam. xv, 12). This Carmel, and not the northern mount, must also have been the spot at which king Uzziah had his vineyards (2 Chron xxvi, 10). In the time of Eusebius and Jerome it was the seat of a Roman garrison (*Onomast.* s. v. Κάρμηλος, Carmelus). The place appears in the wars of the Crusades, having been held by king Amalrich against Saladin in 1172 (William of Tyre, *De Bello Sacro*, 30; in *Gesta Dei per Francos*, p. 993). The ruins of the town, now *Kurmul*, still remain at ten miles below Hebron, in a slightly south-east direction, close to those of Main (Maon), Zif (Ziph), and other places named with Carmel in Josh. xv, 55. They are described both by Robinson (*Bib. Res.* ii, 195-201; *Bib. Sacr.* 1843, p. 60) and by Van de Velde (*Narrative*, ii, 77-79), and appear to be of great extent. They lie around the semicircular head and along the shelving sides of a little valley, which is shut in by rugged limestone rocks. The houses are all in ruins, and their sites are covered with heaps of rubbish and hewn stones. In the centre of the valley is a large artificial reservoir, supplied by a

fountain among the neighboring rocks. This is mentioned in the account of king Amalrich's occupation of the place, and now gives the name of *Kasr el-Birkeh* to a ruined castle of great strength, situated westward of the reservoir, on high ground, the most remarkable object in the place. Its walls are ten feet thick; their sloping basement and bevelled masonry are evidently of Jewish origin, probably the work of Herod. The interior was remodelled, and the upper part rebuilt by the Saracens. Beside it are the ruins of a massive round tower. Around and among the ruins of the locality are the foundations of several old churches, showing that the town had at one period a large Christian population. (See Seetzen, *Reise*, iii, 8, 9; Porter, *Handbook for Syria*, p. 61; Schwarz, *Palest.* p. 106.) See CARMELITE.

Car'melite (Heb. *Karmeli'*, כַּרְמְלִי), the designation of Nabal (Sept. Καρμήλιος, 1 Sam. xxvii, 3; xxx, 5; 2 Sam. ii, 2) and his wife Abigail (Sept. Καρμηλία, A. V. "Carmelitess," 2 Sam. iii, 3; 1 Chron. iii, 1); as also of one of David's warriors, Hezrai (Sept. Καρμήλιος, 2 Sam. xxiii, 35) or Hezro (Sept. Καρμωδί, 1 Chron. xi, 37); doubtless as being inhabitants of CARMEL (q. v.) in Judah (Josh. xv, 55).

Carmelites, the monastic order of "St. Mary of Mount Carmel." It was founded as an association of hermits by Berthold, count of Limoges, about 1156, on Mount Carmel, and received its first rule in 1209 from Albert, patriarch of Jerusalem, to whose diocese Mount Carmel belonged, which rule was sanctioned by Pope Honorius III in 1224. The rule was founded on that of St. Basil, and enjoined that the prior be elected unanimously or by majority; to have places in deserts, separate cells, common refectory; all to remain in their cells meditating by day and night, excepting when at fit hours, in church, etc.; to have all things common; no flesh allowed save to the sick; fast from Holyrood to Easter every day except to the sick; to observe chastity, to labor, and to keep silence from after Compline till Prime. The habit was at first white, as well as the mantle, of which the bottom was laced thick with yellow bands, an ornament suppressed by Honorius IV. They then assumed the robe of the Minims, and a white mantle. The Carmelites were also known by the name of *Barred* or *Barry Friars* (*Frères Barrez*), because of the *barred* dress of black and white which the Saracens, when they took possession of the East, compelled them to wear, instead of the white dress, white being with them a mark of distinction. They came to Europe in 1238, and had seven establishments in England. The first General Chapter was held in 1245 in England, after which, through the activity of their general, Simon Stock, and the protection of Innocent IV, they spread with great rapidity. From Innocent IV they received, in 1247, a new rule, which was better suited for their new situation, and which classed them among the mendicant orders. Instigated by the desire to excel their rivals, they invented the most absurd legends. They pretended that the prophet Elijah had been the founder of their order and the Virgin Mary a member, wherefore they called themselves *Fratres Beatæ Mariæ de Monte Carmelo.* The succession of the generals of the order, according to their historians, has never been interrupted since the prophet Elijah. They were duly castigated and ridiculed for such pretensions by the Jesuits, and particularly by the learned Bollandist Papebroch. Still the Church never decided against them; Pope Innocent IV imposed silence on both parties, and the fables of the Carmelites can be read in their liturgical books to this day.

The great schism of the 14th century split also the order of the Carmelites, and completed their corruption and disorganization. Several attempts at a reformation were made, of which that of Thomas Connecte, who laid the foundation of the Congregation of Mantua, was the most successful. Thomas himself (a celebrated penitentiary in France and in the Netherlands) was burned in Rome as a heretic, but his congregation soon extended widely, and received the privilege of electing a vicar general. Pope Eugenius IV mitigated the rule of Innocent IV in 1431, and endeavored to unite all the Carmelites, except the Congregation of Mantua, on this mitigated rule as a new basis. For the same purpose, the general received from Pius II, in 1459, the authority to proceed with regard to fast-days according to their own judgment. In 1462, general John Soreth tried to introduce a greater strictness of the rule into the whole order. His plans were approved by Pope Paul II, but the author was poisoned by discontented monks in 1471. The same Soreth established, in 1452, the first convent of Carmelite nuns. In 1476 Sixtus IV established the Tertiarians of the order. They received a rule in 1625, which was reformed in 1678.

The *Discalceate* Carmelites received their name from going barefooted, and took their rise in the 16th century. They professed the order as reformed by Theresa of Avila, in Spain, who, desiring a stricter rule than that which the Carmelites (farther mitigated by Eugenius IV in 1431) afforded, about 1562 established a new house at Avila under her reformed rule; and in 1577 the Discalceats were exempted from the jurisdiction of the Mitigated Carmelites. They were divided into two distinct bodies, those of Spain, who were composed of six provinces under one general, being the strictest. The others had seventeen provinces in France, Italy, Poland, Germany, Persia, etc. It is a rule with them that in every province there shall be a hermitage attached to some one monastery, in which hermitage shall be not more than twenty monks, who after three weeks return to the monastery, and are replaced by twenty other monks. Their manner of life is very austere (Landon, *Eccl. Dictionary*, s. v.).

Barefooted Carmelite.

The Spanish congregation has become nearly extinct in consequence of the suppression of all the monastic orders in Spain. In 1843 no more than fourteen convents belonging to it were left in South America. Their procurator general lived in the general house of the Italian congregation in Rome. At the same date the Italian congregation counted 63 convents, with about 900 members, in Italy, France, Belgium, Holland, Austria, Bavaria, Ireland, Poland, and Turkey. The Mitigated or Calceate Carmelites had convents in Italy, Austria, Bavaria, Ireland, and Poland, with about 600 members. In 1860 the Carmelite monks altogether numbered 125 houses in Italy; 12 in Germany, Holland, and Belgium; 12 in France, 8 in Ireland, 22 in Eastern Europe (Poland, Gallicia, Russia, Hungary), 6 in Asia, 17 in Mexico and South America, and a few

in Spain. The number of members was estimated at about 4000. Since then the number has been reduced by the suppression of a number of convents in Italy. The Carmelite nuns of the reform of Theresa had, in 1843, about 90 houses in Italy, France, Belgium, England, Ireland, Bavaria, Prussia, Austria, Poland, North America (at Baltimore), South America, and India: 60 of these convents were in France. In 1860, Spain and Portugal had 15 houses; Italy, 19; France, 71; Germany, Holland, and Belgium, 28; Great Britain and Ireland, 15; Poland, 3; America, 7; Asia, 1; altogether, 160 houses, with about 3200 members.

A congregation of our Lady of Mount Carmel was founded in France in 1702. Its members are not obliged to enter a convent, but can pass their novitiate in the world. They have many institutions in France, principally devoted to teaching and the nursing of the sick, and have once a year a great gathering at Avranches for the purpose of a common spiritual *retreat.* There is also a congregation of Carmelites in the archdiocese of New Orleans, U. S., who teach four schools. —Manning, *Life of St. Teresa* (Lond. 1865), p. 161 sq.; Fehr, *Geschichte der Mönchsorden*, i, 356; ii, 341; *P. Karl vom heil. Aloys, Jahrbuch der Kirche* (Ratisbon, 1862).

Car'melitess (1 Sam. xxvii, 3; 1 Chron. iii, 1). See CARMELITE.

Car'mi (Heb. *Karmi'*, כַּרְמִי, *vine-dresser*, otherwise *noble;* Sept. Χαρμί, but Χαρμεί in Exod. vi, 14), the name of three men.

1. The last named of the four sons of Reuben (Gen. xlvi, 9; Exod. vi, 14). B.C. 1872. His descendants were called after him CARMITES (Num. xxvi, 6).

2. A son of Hezron (Judah's grandson), and father of Hur (1 Chron. iv, 1); elsewhere called CALEB (ii, 18) or CHELUBAI (ii, 9). B.C. post 1856.

3. The son of Zimri or Zabdi, and father of the traitor Achan (Josh. vii, 1; 1 Chron. ii, 7). B.C. ante 1618. Some have erroneously identified him with the preceding; but the names in 1 Chron. iv, 2, are evidently in direct succession of father and son from Judah.

Car'mite (Heb. *Carmi'*, כַּרְמִי for כַּרְמִיִּי, Sept. Χαρμί), the patronymic of the descendants of the Reubenite Carmi (Num. xxvi, 6).

Carnahan, JAMES, D.D., president of Princeton College, was born Nov. 15, 1775, near Carlisle, Cumberland Co., Pa. In November, 1798, he entered the junior class in the college of New Jersey, and received the first degree in the arts in September, 1800. He read theology under John M'Millan, D.D., in Western Pennsylvania. In 1801 he returned to Princeton as tutor, and resigned his tutorship in the fall of 1803. He was licensed by the presbytery of New Brunswick at Baskenridge in April, 1804, and preached in the vicinity of Hackettstown, Oxford, and Knowlton. January 5, 1805, he was ordained pastor of the united churches of Whitesborough and Utica, N. Y. In February, 1814, he moved for his health to Georgetown, D. C., and opened a school, teaching there for nine years. In May, 1823, he was chosen president of the college of New Jersey, was inaugurated on the 5th of August, 1823, and, after a service of thirty years, resigned in 1853, and his connection with the college was dissolved June, 1854. He was in different capacities connected with the college for thirty-five years, viz. two years as a student, two as a tutor, and thirty-one as president. "His character was distinguished by mildness, joined to firmness and vigor; his learning was extensive, and his practical ability in the ordinary affairs of life exceedingly acute. His labors were very useful in every department of activity—as a man, a Christian clergyman, the head of a most important educational institution, and an efficient co-operator in numerous schemes of benevolent enterprise." He died in Newark, N. J., March 3, 1859.—*New York Observer;* Wilson, *Presb. Almanac*, 1860, p 68.

Car'naïm (Καρναΐν v. r. Καρνεΐν, Vulg. *Carnaïm*), a large and fortified city in the country east of Jordan—"the land of Galaad"—containing a "temple" (τὸ τέμενος ἐν K.). It was besieged and taken by Judas Maccabæus (1 Macc. v, 26, 43, 44). Under the name of CARNION (τὸ Καρνίον) the same occurrence is related in 2 Macc. xii, 21, 26, the temple being called the ATARGATEION (τὸ Ἀταργατεῖον). This enables us to identify it with ASHTEROTH-KARNAIM (q. v.).

Carnal (σαρκικός), fleshly, sensual. Wicked or unconverted men are represented as under the domination of a "carnal mind, which is enmity against God," and which must issue in death (Rom. viii, 6, 7). Worldly enjoyments are carnal, because they only minister to the wants and desires of the animal part of man (Rom. xv, 27; 1 Cor. ix, 11). The ceremonial parts of the Mosaic dispensation were carnal; they related immediately to the bodies of men and beasts (Heb. vii, 16; ix, 10). The weapons of a Christian's warfare are not carnal; they are not of human origin, nor are they directed by human wisdom (2 Cor. x, 4). See FLESH.

Carnelian. See SARDIUS.

Carnesecchi, PIETRO, an Italian reformer and martyr of the 16th century, was born in Florence, of a good family. His education and culture gained him the esteem of the best scholars of the time, such as Sadoletus and Bembo. He became secretary and prothonotary to Pope Clement VII, and had so much influence that it was said "the Church was governed by Carnesecchi rather than by Clement." At Naples he imbibed the Reformed doctrine from Valdes (q. v.), and in 1546 he was accused as a heretic and cited to Rome. Throu h the favor of Paul IV he escaped, but sought safety in France, where he remained at the court of Henry VI until 1552, when he thought he might return to Italy, and took up his abode at Padua. In 1557 he was summoned to Rome; but, failing to appear, he was excommunicated as a heretic, April 6, 1559. Pius IV, on his accession, removed the sentence of excommunication, without any recantation on the part of Carnesecchi. When Pius V became pope, Carnesecchi apprehended danger, and took refuge with Cosmo, grand-duke of Tuscany, who basely surrendered him on a demand in the pope's own writing. He was tried by the Inquisition, adhered steadfastly to the faith, and was condemned. On Oct. 3, 1567, he was beheaded, and his body afterward was consumed.—M'Crie, *Reformation in Italy*, chap. v (and authorities there given).

Carniola. See CARINTHIA.

Car'nion (2 Macc. xii, 21, 26). See CARNAIM.

Carnival, a period of festivity in Roman Catholic countries, beginning on the day after the Epiphany, and ending at the commencement of Lent, on Ash Wednesday, resembling the Lupercalia of the Romans and the Yule-feasts of the Saxons. Some derive the word from *caro* (*carnis*), flesh, and *vale*, to bid adieu, i. q. *farewell to flesh;* others from the Italian *carne*, flesh, and *avallare*, to swallow. In mediæval Latin it is called *carnelevamen, carnisprivium*. The Carnival owes its origin to the pagan festivals, and pious Roman Catholics themselves have testified their sense of the scandal which this season occasions. In Rome the Carnival is observed with revelry, masquerades, feasts, and grotesque processions. The Greeks have a similar period, which they call Ἀπόχρεως, *Apocreos;* it comprehends the week preceding their Lent, during which, as Marinus says, "*unusquisque pro facultate sua, laute et opipare convivatur.*" A good account of the Roman Carnival is given in Appleton's *Cyclopædia*, iii, 447. See also Nicolai, *Comment. de Ritu Bacchana-*

liorum (Helmst. 1679, 4to); Zeuner, *Bacchanalia Christianorum* (Jena, 1699, 4to); Landon, *Eccl. Dict.* s. v.

Carob. See HUSK.

Carol, a hymn sung by the people at Christmas. "The Christmas carol may be traced to the primitive Church. Tertullian (*advers. Gentil.* 39) states that at their feasts it was customary for the Christians to place in the middle such as were able to sing, and call upon them to praise God in a hymn, either out of the Scriptures or of their own invention. Durand also informs us (*Rel.* vi, 86, 9) that it was usual for the bishops on Christmas day to make sport, and even to sing with their clergy; and this custom was an imitation of the *Gloria in excelsis* of the angels, as we learn from Jeremy Taylor—"These blessed choristers had sung their Christmas carol, and taught the Church a hymn to put into her offices forever, on the anniversary of this festivity." For the popular carols of England, see Brand, *Popular Antiquities*, i, 262 sq.; Chambers, *Book of Days*, ii, 747 sq.—Eadie, *Eccles. Dictionary*, s. v.; Sandys, *Christmas Carols, Ancient and Modern* (Lond. 1833, 8vo). See MYSTERIES.

Caroline Books (*Libri Carolini* or *Opus Carolinum*), four books written against decrees of the second Council of Nice on the adoration of images, contained in the *Capitulare Prolixum* of Charlemagne. These books were drawn up under the direction of Charlemagne, but their preparation has been ascribed to Angilram, bishop of Metz, Angilbert, and to Alcuin. Roger de Hoveden directly names the last, and the most probable opinion is that Alcuin was the writer. At all events, they were written before the Synod of Frankfort in 794, and were published in the name of Charlemagne during the sitting of that council. In the preface the emperor declares that he had undertaken the work "*Zelo Dei et veritatis studio, cum conhibentia regni sui sacerdotum.*" The great principles of these books are the following:

Lib. ii, c. 21: Solus igitur Deus colendus, solus adorandus, solus glorificandus est, de quo per Prophetam dicitur: "Exaltatum est nomen ejus solius" (Psa. cxlviii, 13): Cujus etiam Sanctis, qui triumphato diabolo cum eo regnant, sive quia viriliter certaverunt, ut ad nos incolumis status ecclesiæ perveniret, sive quia eandem ecclesiam assiduis suffragiis et intercessionibus adjuvare noscuntur, veneratio exhibenda est: imagines vero, omni sui cultura et adoratione seclusa, utrum in basilicis propter memoriam rerum gestarum et ornamentum sint, an etiam non sint, nullum fidei catholicæ adferre poterunt præjudicium: quippe cum ad peragenda nostræ salutis mysteria nullum penitus officium habere noscantur. Lib iii, c. 16: Nam dum nos nihil in imaginibus spernamus præter adorationem, quippe qui in basilicis Sanctorum imagines non ad adorandum, sed ad memoriam rerum gestarum et venustatem parietum habere permittimus: illi vero pene omnem suæ credulitatis spem in imaginibus collocent; restat, ut nos Sanctos in eorum corporibus vel potius reliquiis corporum, seu etiam vestimentis veneremur, juxta antiquorum patrum traditionem: illi vero parietes et tabulas adorantes in eo se arbitrentur magnum fidei habere emolumentum, eo quod operibus sint subjecti pictorum. Nam etsi a doctis quibusque vitari possit hoc, quod illi in adorandis imaginibus exercent, qui videlicet non quid sint, sed quid innuant venerantur, indoctis tamen quibusque scandalum generant, qui nihil aliud in his præter id quod vident venerantur et adorant.

The Caroline books were first printed by Jean du Tillet, bishop of Meaux, under the assumed name of Eriphilus, or Elias Philyra (Paris, 1549, 8vo), at Cologne in 1555; by Goldastus, 1608; and in his *Constitution. Imperial.* tom. i; and, lastly, by Heumannus at Hanover (1731, 8vo), under the title *Augusti Concilii Nicæni Secundi Censura*.—Palmer, *Treat. on the Church*, pt. iv, ch. x, § 4; Bergier, *Dict. de Théologie*, s. v. *Image*; Gieseler, *Church History*, per. iii, § 12; Herzog, *Real-Encyklopädie*, vii, 429; Landon, *Eccles. Dict.* s. v. See IMAGE-WORSHIP.

Carolostadt. See CARLSTADT.

Carpenter, the rendering in the Auth. Vers. of the Heb. חָרָשׁ, *charash'* (2 Sam. v, 11; 1 Chron. xiv, 1; Isa. xliv, 13, etc.), as also of its Greek equivalent τέκτων (Matt. xiii, 55; Mark vi, 3; 1 Esdr. v, 14; Ecclus. xxxviii, 27, etc.), a general name, applicable to an artificer in stone, iron, or copper, as well as in wood. See ARTIFICER. The Hebrews, at a very early period, appear to have made considerable progress in these arts (Exod. xxxv, 30 35). See ART. Of their works, however, we have no existing remains; but by a reference to the antiquities of Egypt, the country where their proficiency was acquired, we may obtain a satisfactory notion of their general character. See HANDICRAFT. Tools of various kinds used in carpentry, as axes, hammers, saws, planes, chisels, and centre-bits, are represented on the ancient monuments, and to most of them we find allusions in Scripture (1 Sam. xiii, 19, 20; Judg. iv, 21; Isa. x, 15; xliv, 13). There appears but little difference between these implements and those of our time. See TURNER. The ancient Egyptians were acquainted with the art of veneering: this proves that they knew the use of glue. They had chairs and couches of very graceful form (comp. Gen. xliii, 33; 1 Sam. iv, 18). Among the works of the Egyptian artists are found tables, bureaus, wardrobes, and coffers; several of the latter, probably designed for jewel-cases, rival in beauty the caskets of gold and silver. See MECHANIC.

Modern Oriental Wooden Lock-maker.

Carpenter, Charles W., a Methodist Episcopal minister, was born in New York, Dec. 16, 1792, where his parents were members of the John Street Church. He entered Columbia College, but was compelled by ill health to quit before graduation. He was converted in his eighteenth year, and was licensed by Freeborn Garretson to preach in 1812. He entered the itinerant ministry in the New York Conference in 1814, but in 1816 he was obliged, by the weakness of his health, to go to Savannah, where he was engaged in business for ten years. During this time he labored as a local preacher, and was ordained deacon in 1820, and elder in 1826. In 1828 he returned to the North, and was readmitted into the New York Conference, in which he filled important appointments, as pastor and presiding elder, until 1850, when he was compelled by ill health to become supernumerary. He died May, 1853, at Plattekill, N. Y. He was of very uniform character, good literary acquirements

and great loveliness of disposition. As a minister he was able and sound, and his influence was great and durable. He was several times delegate to the General Conference, and as presiding elder his administrative talent was remarkable. He was secretary of the New York Conference for several years, and in all posts he was efficient and successful. His death was joyful.—*Minutes of Conferences*, v, 194; Sprague, *Annals*, vii, 558; Wightman, *Life of Bishop Capers*, p. 211.

Carpenter, Coles, a minister of the Methodist Episcopal Church, was born in Westchester county, N. Y., March 17, 1784. His parents were earnest Methodists, and he was carefully trained in religion. At seventeen he was converted, and began at once to exhort his young neighbors. In 1809 he was admitted on trial in the New York Conference; ordained deacon in 1811, and elder in 1813. He filled various important appointments in the New York Conference until 1832, when the Troy Conference was organized, and he remained in it. In 1833 he was appointed presiding elder of the Troy District, in which service he labored acceptably until his death, Feb. 17, 1834. In direct appeals to the heart and conscience he had few superiors.—Sprague, *Annals*, vii, 466; *Minutes of Conferences*, 1834, p. 283.

Carpenter, Lant, LL.D., an English Unitarian minister, was born Sept. 2, 1780, at Kidderminster, and educated at Northampton and Glasgow. In 1805 he became pastor of a Unitarian congregation at Exeter, and in 1817 removed to Bristol, where he remained as pastor and classical teacher till 1839, when, his health failing, he undertook a Continental tour. While going in a steam-boat from Naples to Leghorn, he fell overboard and was drowned, in the night of April 5, 1840. Dr. Carpenter was an industrious writer. His publications, including posthumous ones, amounted to forty-four. The more important are: *Introduction to the Geography of the New Testament* (12mo, 1805):—*Unitarianism the Doctrine of the Gospel* (12mo, 1809):—*An Examination of the Charges made against Unitarianism* by Dr. Magee (8vo, 1820):—*A Harmony of the Gospels* (8vo, 1835, of which a second edition, under the title of *An Apostolical Harmony of the Gospels*, was published in 1838):—*Sermons on Practical Subjects* (8vo, 1840, posthumous):—*Lectures on the Scripture Doctrine of Atonement* (12mo, 1843, posthumous). He was a contributor to Rees's *Cyclopædia*, and to the Unitarian journals. There is a memoir of him by his son, the Rev. R. L. Carpenter (Lond. 1840).—*English Cyclopædia*, s. v.; Darling, *Cyclopædia Bibliographica*, i, 582.

Carpocrates, a Gnostic of Alexandria in the second century, probably during the reign of Hadrian (A.D. 117-138). Of his personal history little is known. Clement of Alexandria speaks of his son Epiphanes, who died at seventeen, and was honored as a god at Sama, in Cephallenia.—Clemens, *Strom.* iii, 428; Lardner, *Works*, viii, 393. See CARPOCRATIANS.

Carpocratians, Gnostic heretics of the second century, so named from Carpocrates of Alexandria (q. v.). In common with the Gnostics generally, they held the existence of one Supreme Principle, the Primal Being, or Monas, toward which all finite things are striving to return. They taught that the visible world was formed by angels, inferior to the Father (Epiphan. *Hæres.* xxvii, c. xi; Iren. *Hæres.* i, 25). They regarded Christ as a religious Genius, born, in the ordinary course of nature, of Joseph and Mary, but as having excelled other men not only by the holiness and virtue of his life, but by the wonderful elasticity of his mind (εὔτονος), which retained the remembrance of what he had seen when circling in the train of the Father. They admitted that he had been educated among the Jews, but had despised them, and had therefore obtained the power to surmount his sufferings, and afterward ascended to the Father (Iren. *Hær.* i, 25). The Carpocratians boasted of resembling Christ, and even allowed, hypothetically speaking, that if any person had a purer soul, or despised in a greater degree the things here below, he might excel him. They had statues and images of Christ and his apostles, and also of Pythagoras, Plato, Aristotle, and other eminent men, whom they are said to have honored with superstitious rites in the temple of Epiphanes in Cephallenia. Carpocrates maintained the transmigration of the soul, which must perform all to which it was destined before it can obtain rest. In support of his doctrine he cited the words of our Lord, "Verily thou shalt not depart hence until thou hast paid the uttermost farthing." Those souls, however, which are deeply impressed with the remembrance of their former existence, are enabled to defy the influence of the spirits governing this world, and, soaring to the contemplation of the Supreme Being, finally reach a state of eternal rest. In proof of this, Carpocrates adduced the examples of Pythagoras, Plato, and Aristotle among the heathen, and Jesus among the Jews. To the latter he ascribed extraordinary strength of soul, which, animated by the remembrance of its former existence, soared to the highest flights of contemplation, and enabled him to obtain a divine power, by which, in working miracles, he set at naught the spirits of this world, cast off the thraldom of the God of the Jews, and overturned the religion which this god had devised. Every human soul was supposed by contemplation capable of becoming equal in every respect with Jesus Christ. The Carpocratians are stigmatized on account of the consequences which they drew from their principles. They are charged with asserting that there was nothing good or evil in itself; that the distinction between right and wrong was not real, but depended merely on human opinion—an assertion which appears inconsistent with their view of the character of Christ, and which was, perhaps, applied, not to moral duties, but to positive rites. They are also said to have taught the community of women; a doctrine which, together with their notions of a pre-existent state, and of metempsychosis, may be traced to Plato, in whose writings Carpocrates and his son Epiphanes (by whom the opinions of this sect were much amplified, and to whom extraordinary honor was paid) were familiarly versed (Clement, *Strom.* iii, 428). As the fruit of these last opinions, they are represented as having indulged in the grossest licentiousness, and as having given occasion to the dreadful calumnies by which the early Christians were assailed. The reproach of licentiousness is not confirmed by Irenæus, who is the oldest source of our knowledge of the Carpocratians. Epiphanius says the Carpocratians rejected the Old Testament. It appears not certain that they rejected any part of the New (Euseb. *Ecc. Hist.* iv, 7; Epiphan. *Hær.* xxvii).—Jeremie, *Church Hist.* 154; Neander, *Ch. Hist.* i, 449-451; Lardner, *Works*, viii, 391-403; Dorner, *Person of Christ*, div. i, vol. i, p. 186; Hase, *Church History*, § 78; especially Mosheim, *Commentaries*, etc., cent. ii, § 50.

Car'pus (Κάρπος, perhaps for καρπός, *fruit*; on the accentuation, see Winer's *Grammar*, 6th ed. p. 49), a Christian at Troas, with whom the apostle Paul states that he left a cloak (2 Tim. iv, 13); on which of his journeys it is uncertain, but probably in passing through Asia Minor after his first captivity, for the last time before his martyrdom at Rome, A.D. 64. According to Hippolytus, Carpus was bishop of Berytus, in Thrace, called Berrhœa in the *Synopsis de Vita et Morte Prophetarum*, which passes under the name of Dorotheus of Tyre.

Carpzov, the surname of a family which was one of the most distinguished of the 17th century for theological learning. The first eminent man of the name was Benedikt Carpzov, professor of law at Witten-

berg, who died in 1624; and the latest, Johann Benedikt (the fourth), died as professor at Helmstädt in 1803. The most important are:

CARPZOV, JOHANN BENEDIKT, born at Rochlitz, June 22, 1607, who became archdeacon of St. Thomas's church at Leipzig, and was made, in 1643, professor extraordinarius, and in 1646 professor ordinarius of theology at Leipzig. He died Oct. 22, 1657, He was noted for piety as well as for learning. His chief writings are, *De Ninivitarum Pœnitentia* (Leipzig, 1640, 4to):—*Hodegeticum* (1656; enlarged by his son, J. B., 1689, 4to):—*Isagoge in libros Eccl. Luther. Symbolicos*, completed after his death by Olearius (1665; 1675, 4to). In view of this book, Gass calls Carpzov the "first really distinguished laborer in Symbolics" (*Geschichte d. Prot. Dogmatik*, i, 172).

CARPZOV, JOHANN GOTTLOB, the most eminent of the family, was born at Dresden, Sept. 26, 1679, and studied successively at Wittenberg, Leipzig, and Altdorf. In 1702 he became almoner to the Saxon ambassador, and in this capacity had the opportunity of travel in Holland and England, which he used to advantage for his culture in the Oriental languages. He was engaged in pastoral work at Dresden from 1704 to 1708, in which year he was called to St. Thomas's church in Leipzig. His studies took a wide range, but his chief bent was toward Hebrew literature and philology. In 1719 he was made professor of Oriental literature at Leipzig, which office he filled until 1730, when he became general superintendent at Lübeck, where he died April 7, 1767. His writings form an epoch in the history of Biblical criticism. He was a bitter opponent of the Moravians and Pietists, and wrote a historico-polemical treatise against the Moravians (mentioned below). His most important works are, *Disput. de vet. philos. sentt. circa naturam Dei* (Lpz. 1692, 4to):—*Disp. de pluralitate personarum in una Dei essentia* (Lpz. 1720, 4to):—*Introductio ad Libros Canonicos Vet. Test.* (Lpz. 1741, 2d ed. 4to):—*Critica Sacra Vet. Test.* (pt. i, *Text. Original*: pt. ii, *Versiones*; pt. iii, *Circa pseudo criticam G. Whistoni sollicita* (Lpz. 1728, 4to):—*Religions-Untersuchung der Böhmischen u. Mährischen Brüder* (Lpz. 1742, 8vo):—*Apparatus Hist.-Crit. Antiquitatum et codicis sacri et gentis Hebrææ* (Leipzig, 1748, 4to).—Ersch u. Gruber, *Allgem. Encyklopädie*, s. v.; Hoefer, *Nouv. Biog. Générale*, viii, 842.

CARPZOV, JOHANN BENEDIKT, born in Leipzig, 1720, became professor of philosophy at Leipzig in 1747; professor of Greek at Helmstädt, 1748. He published *Liber doct. theol. purioris* (1768):—*Sacræ Exercitationes in Epist. ad Hebr.* (1750):—*Stricturæ in Ep. ad Rom.* (1756):—*Septenarius Epist. Cath.* (1790). His repute as a philologist was very great. He died April 28, 1803.

Carr (in some editions "car") is an Anglicized form of the term χάῤῥα (v. r. κάῤῥα), occurring only in 1 Esdr. v, 55, as the name of something given to the Phœnicians for furnishing cedar to rebuild the Temple. Bretschneider (*Spicileg.* p. 270) thinks we should read χάραγμα, i. e. *money*; perhaps, however, the word is simply a corruption for κέρμα, *coin* (see Fritzsche, *Handb.* in loc.).

Carranza, BARTOLOMÉ DE, an eminent Spanish theologian and prelate, was born at Miranda, Navarre, in 1503, of noble parents. Having studied theology at Alcala, he entered the order of Dominicans in 1520. He afterward was professor of theology at Valladolid. In 1546 Charles V sent him to the Council of Trent, where he vindicated the rights of bishops, *jure divino*, against the papal pretensions. Philip of Spain took him (1554) to England, where queen Mary appointed him her confessor, and charged him with the re-establishment of the Roman Church. This office he discharged "with a zeal more worthy of a Spanish inquisitor than of a minister of Jesus Christ," and was rewarded with the archbishopric of Toledo in 1558. On entering his diocese he put forth a catechism, which his enemies made a subject of attack. It was censured by the Inquisition, but sanctioned by the commission of the Council of Trent. A more heavy charge awaited him. A report was circulated that Charles V had not died in the "faith of the Church," and that this was owing to the archbishop of Toledo, who had instilled into his mind "heretical opinions." Carranza was seized by the Inquisition and imprisoned in 1559. After eight years' duress in Spain he was transferred to Rome, where Pius V kept him ten years longer immured in the castle of St. Angelo. In 1576 he was finally acquitted, but was suspended from his episcopal functions for five years, and was compelled to reside in the Dominican cloister of Della Minerva at Rome. He lived only seventeen days afterward, dying May 2, 1576. He wrote, (1.) *Commentarios sobre el Catechismo Christiano* (Antwerp, 1558, fol.):—(2.) *Summa Conciliorum* (Venice, 1546, 8vo):—(3.) *De necessariâ residentiâ Episc. et alior. pastorum* (Venice, 1547); and several practical treatises.—*Biog. Univ.* vii, 199; Burnet, *Hist. of Engl. Reformation*, iii, 381; Bayle, *Dictionary*, s. v.; Echard, *Script. ord. Prædicatorum*, s. v.; Hoefer, *Nouv. Biog. Générale*, viii, 854; Dupin, *Eccles. Writers*, cent. xvi.

Carriage. Vehicles answering to this term in modern usage were not known to the ancients. See CART. In the English Bible this word stands, therefore, as the incongruous rendering of several totally different terms. In 1 Sam. xvii, 20, the Hebrew word מַעְגָּלָה, *magalah'*, rendered "trench" in our version, and "place of the carriage" in the margin, probably signifies *a wagon-rampart*, a bulwark formed of the wagons and other vehicles of the army (1 Sam. xxvi, 5, 7). In Judg. xviii, 21, the original is כְּבוּדָּה, *kebudah'*, and means *wealth*, i. e. booty. In Isa. xlvi, 1, "carriage" stands for נְשׂוּאָה, *nesuah'*, a *load* for a beast of burden. In 1 Sam. xvii, 22, the word כְּלִי, *keli'*, "carriage," properly means *implements, equipments*; and in Isa. x, 28, *implements of war*. In Acts xxi, 15, the phrase, "we took up our carriages" (ἀποσκευάζομαι), should be, "we packed up our baggage." See WAGON.

Carrières, LOUIS DE, born at Clavilé, near Angers, in 1662, was first a soldier, but in 1689 entered the congregation of the Oratory. He died at Paris June 11, 1717. He is chiefly known by his *Commentaire littéral*, or "Literal Commentary" on the whole Bible, which is so managed that his comments are introduced into the text (translated) in italic characters. They are for the most part in the words of holy Scripture itself, which is thus made to be its own interpreter. This work, which was carried through at the request of Bossuet, was completed in twenty-four 12mo volumes (1701 to 1716). It has since gone through many editions, and is much used. It is the only French version authorized in Italy.—*Biographie Universelle*, vii, 219.

Carroll, Daniel Lynn, D.D., a Presbyterian minister, was born in Fayette county, Pa., May 10, 1797, and graduated at Jefferson College, 1823. Having completed his theological course at Princeton, he was licensed in 1826, and supplied the churches of Shrewsbury and Middletown Point. Thence, after a brief sojourn at Princeton and Newburyport, he removed to Litchfield, Conn., where he was installed in 1827. He supplied the First Presbyterian Church, Brooklyn, in 1829, but his health soon obliged him to resign, and in 1835 he was appointed to the presidency of Hampden Sidney College, Va., which he held for three years. On retiring he took charge of the First Presbyterian Church in the Northern Liberties of Philadelphia, and subsequently became secretary of the Colonization Society of the state of New York till 1845, when he was obliged to give up all active service.

He died Nov. 23, 1851. He published *Sermons* (1846-7, 2 vols. 12mo), besides detached sermons and addresses.—Sprague, *Annals*, iv, 697.

Carroll, John, D.D., first Roman Catholic archbishop in the United States, was born at Upper Marlborough, Maryland, in 1735. He was educated at St. Omer's, France, and at the colleges of Liege and Bruges, in Belgium. In 1769 he was ordained priest, and became a Jesuit. When the order was dissolved in France he went to England, and became tutor to a son of Lord Stourton, with whom he travelled on the Continent. On the breaking out of the Revolutionary War he returned to America, and took an active part on the side of the patriots. After the close of the war, the Roman Catholic clergy in the United States requested from the pope the establishment of a hierarchy, and Mr. Carroll was appointed vice-general. He fixed his residence at Baltimore. In 1789 he was named bishop, and in the ensuing year was consecrated. In 1791 he assumed the title of bishop of Baltimore. A few years before his death he was made archbishop. He died Dec. 3, 1815.

Carshe'na (Heb. *Karshena'*, כַּרְשְׁנָא, probably of Persian derivation; comp. mod. Pers. *Karshen*, "spoiler," or Zend *Keresna*, Sanscr. *Kreshna*, "black;" Sept. has but three names, of which the first is Ἀρκεσαῖος; Vulg. *Charsena*), the first named of the seven "princes" or chief emirs at the court of Xerxes (Ahasuerus) when Vashti refused to present herself at the royal banquet (Esth. i, 14). B.C. 483.

Carson, Alexander, LL.D., a Baptist minister, was born in Scotland about 1776, but early removed to Ireland. He began his public life at Tubbermore as a minister in connection with the Presbyterian Synod of Ulster, but having changed his opinions as to Church government, and adopted the views of the Independents, he seceded in 1803. Embracing Independent Baptist views, he formed a society at Tubbermore, of which he remained pastor to the time of his death. He wrote, in 1803, his *Reasons for separating from the Synod of Ulster;* and afterward produced numerous books and pamphlets—on baptism and other subjects of controversy—which are highly esteemed by the Baptists. Though a strenuous advocate of immersion, he was not a "close" communionist. After many years of incessant activity, pastoral and literary, he died at Belfast, Aug. 24, 1844, from the effects of a fall into the Mersey at Liverpool a few days before. Dr. Carson was an earnest and often bitter controversialist. His dogmatism and arrogance detract greatly from the effect of his arguments. He is often right, often wrong; but, whether right or wrong, he is equally self-confident. Besides a number of pamphlets, reviews, etc., he published *The God of Providence the God of the Bible* (18mo):—*Theories of Inspiration* (18mo):—*The Knowledge of Jesus* (18mo):—*The Unitarian Mystery* (8vo):—*Examination of the Principles of Biblical Interpretation of Ernesti, Stuart, Ammon*, etc.:—a *Treatise on Figures of Speech*, and a *Treatise on the Right and Duty of all men to read the Scriptures* (N. Y. 1855, 12mo):—*Baptism, in its Mode and Subjects, with a Sketch of the Life of Dr. Carson* (Phila. 1857, 5th ed. 8vo).—Jamieson, *Cyclopædia of Biography;* Reid, *History of the Presbyterian Church in Ireland*, iii, 449.

Carstares, William, a Scotch divine and politician, was born in 1649, at Cathcart, near Glasgow, and completed his studies at the Universities of London and Utrecht. While in Holland he was introduced to the prince of Orange, who honored him with his confidence. After his return to England he became connected with the party which strove to exclude James from the throne, and, on suspicion of being one of the Rye-house conspirators, he was sent to Scotland, and put to the torture of the thumbscrew, which he bore with unshrinking firmness. On his liberation he went back to Holland, and became one of the prince of Orange's chaplains. He accompanied William to England in 1688, and was appointed king's chaplain for Scotland. He was subsequently of great service in producing a reconciliation between the Scottish Presbyterians and William III. A General Assembly being about to convene, at which it was understood that there would be opposition to the oath of allegiance, the king had delivered to a messenger dispatches directing the peremptory enforcement of the act. It is said that Carstares assumed authority to stop the messenger; and, presenting himself to the king (who had gone to bed) in the middle of the night, in the guise of a petitioner for his life, forfeited by his having thus committed high treason, to have prevailed on him to dispense with the oath. Whether the anecdote be true or not, there is little doubt that his influence obtained the dispensation. He became now virtually prime minister for Scotland, and received the popular designation of "Cardinal Carstares." Even after the death of William, his knowledge of Scottish affairs, and the respect paid to his talents, left him with considerable influence. In 1704 he was chosen principal of the University of Edinburgh. He died Dec. 28, 1715. See *State Papers and Letters, to which is prefixed the Life of Mr. Carstares* (4to, 1714); *Engl. Cyclopædia;* Hetherington, *Church of Scotland*, ii, 216.

Cart (עֲגָלָה, *agalah'*, from עָגַל, to *roll;* Sept. ἅμαξα [so in Judith xv, 11], Vulg. *plaustrum;* also rendered "wagon," Gen. xlv, 19, 21, 27; xlvi, 5; Num. vii, 3, 6, 7, 8; and "chariot" in Psa. xlvi, 9 [comp. Cart-wheel]), a vehicle moving on wheels, and usually drawn by cattle (2 Sam. vi, 6), to be distinguished from the chariot drawn by horses. See Chariot.

1. The carts which the king of Egypt sent to assist in transporting Jacob's family from Canaan (Gen. xlv, 19, 27) were manifestly not used in the latter country, but were peculiar to Egypt. These carts or wagons were, of course, not war-chariots, nor such curricles as were in use among the Egyptian nobility. The ready means of transport and travel by the Nile seems to have rendered in a great measure unnecessary any other wheel-carriages than those for war or pleasure. The sculptures, however, exhibit some carts as used by a nomade people (enemies of the Egyptians) in their migrations (comp. Figs. 1 and 2, below).

An ancient Ethiopian Princess travelling in a Car drawn by Oxen, with a sort of Umbrella, a Driver, and a Footman.

Carts of the "Tokkari," some foreign nation defeated by the ancient Egyptians.

2. Elsewhere (Num. vii, 3, 6; 1 Sam. vi, 7) we read of carts used for the removal of the sacred arks and utensils. These also were drawn by two oxen. In Rossellini we have found a very curious representation of the vehicle used for such purposes by the Egyptians (Fig. 3). It is little more than a platform

on wheels; and the apprehension which induced Uzzah to put forth his hand to stay the ark when shaken by the oxen (2 Sam. vi, 6) may suggest that the cart employed on that occasion was not unlike this, as it would be easy for a jerk to displace whatever might be upon it. See ARK.

Ancient Egyptian Carts: 1, 2, for ordinary purposes; 3, for conveying a Shrine containing a Mummy.

3. In Isa. xxviii, 27, 28, a *threshing-dray* or sledge is to be understood. See AGRICULTURE.

As it appears that the Israelites used carts, they doubtless employed them sometimes in the removal of agricultural produce. The load or bundles appear to have been bound fast by a large rope; hence "a cart-rope" is made in Isa. v, 18, a symbol of the strong attachment to sinful pleasures and practices induced by long and frequent habit. Carts and wagons were either open or covered (Num. vii, 3), and were used for conveyance of persons (Gen. xlv, 19), burdens (1 Sam. vi, 7, 8), or produce (Amos ii, 13). As there are no roads in Syria and Palestine and the neighboring countries, wheel-carriages for any purpose except conveyance of agricultural produce are all but unknown; and though modern usage has introduced European carriages drawn by horses into Egypt, they were unknown there also in times comparatively recent (Stanley, *Sinai and Pal.* p. 135; Porter, *Damascus*, i, 339; Lynch, *Narrative*, p. 75, 84; Niebuhr, *Voyage*, i, 123; Layard, *Nineveh*, ii, 75; Mrs. Poole, *Englishwoman in Egypt*, 2d series, p. 7?). The only cart used in Western Asia has two wheels of solid wood (Olearius, *Travels*, p. 418; Ker Porter, *Travels*, ii, 533). A bas-relief at Nineveh represents a cart having wheels with eight spokes, drawn by oxen, conveying female captives; and others represent carts captured from enemies with captives, and also some used in carrying timber and other articles (Layard, *Nineveh*, ii, 396; *Nin. and Bab.* p. 134, 447, 583; *Mon. of Babylon*, pt. ii, pls. 12, 17). Four-wheeled carriages are said by Pliny (*Nat. Hist.* vii, 56) to have been invented by the Phrygians (Wilkinson, *Anc. Egypt.* Abridgment, i, 384, 385; ii, 39, 47). The carts used in India for conveying goods, called *suggar* or *hackeri*, have two wheels, in the former case of solid wood, in the latter with spokes. They are drawn by oxen harnessed to a pole (Capper, *India*, p. 346, 352). See WAGON.

Carter, ABIEL, a minister of the Protestant Episcopal Church, was born at Concord, N. H., May 2, 1791. He graduated A.B. at Dartmouth College in 1813, and soon after began the study of law at New York; but, turning his attention to religion, he left the Congregational Church, in which he had been educated, and became a student of theology under bishop Hobart, by whom he was ordained deacon in 1815. He at once became assistant to Dr. Lyell at Christ Church, New York. He was ordained priest in 1816, and became rector of Trinity Church, Pittsburg, Pa., whence he removed in 1818 to St. Michael's Church, Trenton, N.J. In 1822 he became rector of Christ Church, Savannah, Georgia. In 1827 the yellow fever raged in Savannah, and although it had been stipulated in his call that he should spend the summer of each year in the North, he refused to leave his people. His wife soon fell a victim to the pestilence, which also carried him away, Nov. 1, 1827. He published a number of occasional sermons. — Sprague, *Annals*, v, 584.

Carthage, a famous ancient city on the coast of Africa, founded by Tyrian colonists, and long the rival

Coin of Carthage.

of Rome, by which it was taken and destroyed, B.C. 146. It was again rebuilt, however, and continued to flourish till the Vandal invasion (see a full account in Smith's *Dict. of Class. Geogr.* s. v.). Its site has lately been explored (Davis, *Ruins of Carthage*, Lond. 1861).

In Christian and ecclesiastical times Carthage was the metropolis of the proconsular province of Africa, and the seat of a bishop, having metropolitan authority over all the provinces of the African Church. All the African churches were dependent on the see of Rome, probably because their greater intercourse with Rome had made Latin the language of the country, and it was therefore more natural that they should be connected with the Latin than the Greek Church. Until the time of Constantine, the bishop of Carthage was the only prelate in the African Church having metropolitan jurisdiction; but under Constantine Africa was divided into six provinces, and each province began to have its own metropolitan, taking, however, the title of *primate*, and not that of *metropolitan*, which was still peculiar to the bishop of Carthage. This prelate, from the first, had authority to select whom he pleased from any church in Africa to consecrate to a vacant see (third Council of Carthage); for the bishop of Carthage had also the privilege of nominating to all the vacant sees of Africa. It was farther a privilege enjoyed by the primate of Carthage to convoke general and diocesan synods, to preside in them, and to judge therein of appeals brought thither from the provincial councils. That the African Church acknowledged no *papal* authority in the Roman see is evident from the well-known case of the priest Apiarius, where the African bishops denied the authority of the pope to receive appeals from the decisions of their synods, and his right to send a legate to take any sort of cognizance of their proceedings. In 691 the Saracens got possession of the city of Carthage, and of all this part of Africa, from which period the Church began to fall away; and though it was still in existence, under Leo IX, in the eleventh century, it soon after became entirely extinct.

CARTHAGE, COUNCILS OF. Among the most important are the following:

I. In 218-22 (?), under Agrippinus, on the baptism of heretics.

II. In 251, on the election of Cornelius as bishop of Rome, and the disputes of Novatian and Felicissimus.

III. In 252, on early baptism.

IV. In 253, on the baptism of infants and heretics. Cyprian presided, and 66 bishops are said to have been present. On the question whether baptism should be administered to infants before the eighth day, in view of the rite of circumcision, the council decided unanimously that God had no respect either to persons or ages; that circumcision was but the figure of the mystery of Jesus Christ, and that no one may be shut out from the grace of God. Cyprian, who wrote this decision to Fidus in his own name and in that of his colleagues, gives the reason for it in these words: "If the greatest sinners coming to the faith receive remission of sin and baptism, how much less can we reject a little infant just born into the world, free from actual sin, and only so far a sinner as being born of Adam after the flesh, and by its first birth having contracted the pollution of the former death; it ought to have so much the easier access to the remission of sins, inasmuch as not its own sins, but those of others, are remitted." These words are quoted by Jerome in his dialogues against the Pelagians, and by Augustine in his 294th sermon, in order to prove that belief in original sin has always been the faith of the Church.—Cyprian, *Epist.* 55, Labbe et Cossart, *Concilia*, t. i, p. 740; Landon, *Manual of Councils*, 101.

V. Held in 254 (?), when the Spanish bishops Martialis and Basilides were deposed as *Libellatici.*

VI. Held in 255 and 256, under Cyprian, on the necessity of rebaptizing heretics—attended by 71 bishops. They decided that there can be no valid baptism out of the Catholic Church, and addressed a synodical letter to Stephen of Rome upon the subject, informing him of their decision upon this and other matters. Stephen refused to admit the decision, and separated himself from the communion of Cyprian and the other bishops who acted with him in the council. The conflict lasted until the pontificate of Sixtus, when the African bishops gave up their theory of the invalidity of heretical baptism.—Labbe et Cossart, *Concil.* t. i, p. 793; Landon, *Manual of Councils*, p. 102.

VII. Held in 330, in favor of those who were steadfast in the persecution.

VIII. Held in 397 and 398, on discipline and the baptism of children.

IX. Two in 401, in which numerous canons were made on receiving converted children of Donatists among the clergy.

X. Two in 408, on pagans, heretics, and Donatists.

XI. Commencing June 1, 411, in which conferences were held with the Donatists, with a view to their reunion with the Church. Augustine was present, and argued the case from the side of the Church. At the close of the conference, Marcellinus, who represented the emperor Honorius in the council, gave sentence to the effect that the Donatists had been entirely refuted by the Catholics; and that, accordingly, those of the Donatists who should refuse to unite themselves to the Church should be punished as the laws directed. From this sentence the Donatists appealed to the emperor, but in vain. Honorius confirmed the acts of the Conference of Carthage by a law, bearing date Aug. 30, 414. This conference and the severe measures which followed it gave the death-blow to Donatism.—Labbe et Cossart, *Concil.* t. iii, p. 107; Neander, *Church History*, ii, 203 sq.; Landon, *Manual of Councils*, p. 111.

XII. Held in 411 or 412, against Cœlestius, disciple of Pelagius. Cœlestius was accused by Paulinus, among other things, of teaching that the sin of Adam only injured himself, and that its effects have not descended to his posterity, and that every child is born into the world in the same condition in which Adam was before the Fall. Cœlestius did not deny the accusation; for, although he agreed that children must of necessity receive redemption by baptism, yet he refused to acknowledge that the sin of Adam had passed upon them; nor would he confess, unequivocally, that they receive therein remission of any sin: accordingly he was condemned and excommunicated.—Labbe

et Cossart, *Concil.* t. iii, p. 347 sq.; Landon, *Manual of Councils*, p. 111; Mansi, *Concil.* iv, 289.

XIII. Held in 416, against Pelagius and Cœlestius. The doctrines of Pelagius were condemned by this council in a decree which was approved by Innocent I, bishop of Rome.

XIV. Held in 418, at which more than 200 bishops took part, under the presidency of Aurelius. Augustine styles it "the Council of Africa." Its decrees against Pelagianism were the triumph of Augustinism, and finally received the general approval of the Church. Prosper has preserved one of these decrees, in which the council declares that the grace of God given to us through Jesus Christ not only assists us to know what is right, but also to practise it in each particular action, so that without it we can neither have, nor think, nor say, nor do anything which appertains to holiness and true piety. The council agreed upon a letter to Zosimus, bishop of Rome, demanding that the sentence of condemnation passed by Innocent I against Pelagius and Cœlestius should be enforced until they should abjure their errors.—Mansi, *Concil.* iii, 810; iv, 377; Landon, *Manual of Councils*, p. 112; Schaff, *Ch. Hist.* iii, 798.

Carthusians, an order of monks in the Roman Catholic Church, founded by St. Bruno (q. v.) A.D. 1086. A legend of much later origin tells the following story: At the funeral of a friend of Bruno's in 1082, the dead man raised himself up, saying, "By the just judgment of God I am accused!" This was repeated on the two following days, and had such an effect on Bruno and six more that they immediately retired to the desert of the Chartreuse, and there built the first monastery. This absurd legend found its way into the Roman breviary, but was struck out by order of Pope Urban VIII. After Bruno had governed the first establishment for about six years, Pope Urban II, his former pupil, called him to Rome, and retained him there, although Bruno begged for permission to return to his brethren. The order increased slowly. In 1137 they counted four, in 1151 fourteen, and in 1258 fifty-six houses. In 1170 the order was recognised by the pope. Martin V exempted all the property of the order from tithes. Julius II provided, in 1508, by a bull, that the prior of the Grande Chartreuse, near Grenoble, should always be the general of the whole order, and that a general chapter should meet annually. At the beginning of the 18th century the number of houses was 170, of which 75 belonged to France. Many houses perished in the French Revolution, but some were re-established after 1815. Their principal establishment, the Grande Chartreuse, was reoccupied in 1816. In England the Carthusians settled in 1180, and had a famous monastery in London, since called, from the Carthusians who settled there, the "Charter-house." The order has given to the Church several saints, three cardinals, and more than seventy archbishops and bishops.

Until 1130 the order had no written statutes. Then the fifth prior of the Chartreuse, Guigo, compiled the *Consuetudines Cartusiæ.* Bernard de la Tour collected, in 1258, the resolutions of all general chapters which had been held since 1141. This collection was confirmed by the General Chapter of 1259, and bears the title *Statuta antiqua.* Another collection, *Statuta nova*, was added in 1367. A third collection, *Tertia compilatio statutorum*, dates from the year 1509; a fourth, *Nova collectio statutorum ordinis Cartusiensis*, from the year 1581. The characteristic of the statutes of this order is, that it aims, in the first place, at precluding the members from all intercourse with the world, and even, as far as possible, from all intercourse with each other; secondly, at separating the *professi* from the lay brothers, who occupy in no other order an equally low position, and are divided into three classes, *Conversi*, *Donati*, and *Redditi;* thirdly, at separating every single Carthusian monastery from the whole surrounding region and population; and, lastly, at preventing all connection of the order with other monastic orders, and any direct influence on the world or the Church. Thus the whole order, and each individual member, is like a petrifaction from the Middle Ages. The monks wear a hair-cloth shirt, a white cassock, and over it, when they go out, a black cloak. They never eat flesh, and on Friday take only bread and water. They are not allowed to go out of their cells except to church, nor to speak to any person, even their own brother, without leave of their superior. Some of the convents are magnificent, especially those of Naples and Pavia, which have a world-wide renown for their ornaments and riches. In 1843 the order had 3 houses in France, 8 in Italy, and 2 in Switzerland.

Carthusian Monk—at Home. Carthusian Nun—at Home.

There are also houses of Carthusian nuns, but the date of their origin is not known. They were always very few in number. Father Helyot, the historian of monachism, knew only of the existence of five, all of which perished by the French Revolution. In 1820 they re-established their first house near Grenoble, in France, and this is still their only establishment.

A history of the order was commenced by father Masson, general of the order, and vol. i published in 1687; but, for unknown reasons, the order forbade the continuance of the work. See also Morstius, *Theatrum Chronologicum S. Ordinis Carthusiensis* (Taur. 1681); Corbin, *Histoire sacrée de l'ordre des Chartreux* (Paris, 1653, 4to); Helyot (ed. Migne), *Dict. des Ordres Relig.* i, 872; Fehr, *Geschichte der Mönchsorden*, i, 78 sq.

Cart-wheel (τρόχος ἁμάξης), a chariot wheel (Ecclus. xxxiii, 5). See CART; WHEEL.

Cartwright, Thomas, a learned and eminent Puritan divine; born in Herts about 1535. He was educated at St. John's College, Cambridge, where he became a fellow in 1560. A few years afterward he was removed to a fellowship at Trinity College, of which he became one of the senior fellows. In 1564, when Queen Elizabeth visited the University, he appears to have distinguished himself in the disputations held before her majesty. He took his B.D. degree in 1567, and three years afterward was chosen Lady Margaret's divinity professor. He was a thorough Protestant. In his lectures he criticised the polity of the Church of England with great acuteness and learning. It was his conviction that the reformation of the Church had not gone far enough; and he advocated his views with a clearness and boldness which none could mistake. The following statement of the doctrines for which he was expelled from the University is given by Hook, in vindication of the severity with which Cartwright was treated. It will be seen that, with a

few exceptions, they are views in which most moderate men in the Church of England would now agree with other Christians. "He maintained that, in reforming the Church, it was necessary to reduce all things to the apostolical institution; that no one ought to be admitted into the Christian ministry who was unable to preach; that those only who ministered the word ought to pray publicly in the Church, or administer the sacraments; that popish ordinations were not valid; that only canonical Scripture ought to be read publicly in the Church; that the public liturgy ought to be so framed that there might be no private praying or reading in the Church, but that all the people should attend to the prayers of the minister; that the service of burying the dead did not belong any more to the ministerial office than to the rest of the Church; that equal reverence was due to all canonical Scripture, and to all the names of God: there was, therefore, no reason why the people should stand at the reading of the Gospel, or bow at the name of Jesus; that it was as lawful to sit at the Lord's table as to kneel or stand; that the Lord's Supper ought not to be administered in private, *nor baptism administered by women or laymen;* that the sign of the cross in baptism was superstitious; that it was reasonable and proper that the parent should offer his own child to baptism, making confession of that faith in which he intended to educate it, without being obliged to answer in the child's name, 'I will,' 'I will not,' 'I believe,' etc., nor ought women or persons under age to be sponsors; that, in giving names to children, it was convenient to avoid paganism, as well as the names and offices of Christ and angels; that it was papistical to forbid marriages at any particular time of the year, and to grant licenses at those times was intolerable; that private marriages, or such as were not published in the congregation, were highly inconvenient," etc.

Archbishop Grindal and Dr. Whitgift zealously opposed Cartwright, and in 1571 he was deprived of his professorship and fellowship. He retired from England to the Continent, became chaplain at Antwerp, and afterward at Middleburg. At the end of about two years he returned to England, and published a *Second Admonition to the Parliament*, with a petition for relief from the subscription required by the ecclesiastical commissioners. He had a controversy of pamphlets with Whitgift, and was greatly persecuted by that prelate, and was twice imprisoned. In 1585 he obtained from the earl of Leicester the mastership of the new hospital at Warwick. In 1592 he was liberated from his second imprisonment, and returned to the mastership of the hospital at Warwick, where he died, Dec. 27, 1603 (or 1602, according to Isaac Walton). Cartwright was a man of great parts. Beza wrote of him: "I think the sun does not see a more learned man." Froude, in his *History of England* (1866, vol. iv), gives an elaborate panegyric of Cartwright. Among his writings are, *Commentaria Practica in totam Historiam Evangelicam* (1630, 4to; and by L. Elzevir, at Amsterdam, 1647; Eng. version, 1650):—*Commentarii in Proverbia Salamonis* (Amsterdam, 1638, 4to):—*Metaphrasis et Homiliæ in Librum Ecclesiastes* (ibid. 1647, etc.):—*A Body of Divinity* (London, 1616, 4to):—*Directory for Church Government* (1644, 4to): —*Confutation of the Rhemish Testament* (1618, fol.). His exegetical writings are still of value. Dr. Alexander (in Kitto's *Cyclopædia*, s. v.) says that Hengstenberg, in his work on Ecclesiastes, borrows largely from Cartwright's *Metaphrasis*. See Strype, *Life of Whitgift;* Hook, *Eccl. Biography*, iii, 479; Neal, *History of the Puritans*, i, 172; ii, 48, et al.; iii, 404; Walton's *Lives;* Middleton, *Evang. Biography*, ii, 326.

Cartwright, Thomas, D.D., bishop of Salisbury, was born at Northampton Sept. 1, 1634. He studied at Magdalen Hall and Queen's College, Oxford, and, after taking orders, became chaplain of Queen's, and vicar of Walthamstow. In 1659 he was preacher of St. Mary Magdalen, Fish Street. After the Restoration he was made domestic chaplain to Henry, duke of Gloucester; prebendary of Twyford, in the church of St. Paul; of Chalford, in the church of Wells; a chaplain in ordinary to the king; and rector of St. Thomas the Apostle, London. In 1672 he was made prebendary of Durham, and in 1677 dean of Ripon. His loyalty was, in 1686, rewarded with the bishopric of Chester. At the Revolution he fled to France, and performed divine service at St. Germain, according to the English ritual, for such as resorted to him. On the death of Dr. Seth Ward, king James nominated him to the see of Salisbury. In the spring of 1688 he went to Ireland, and finally died there, April 15, 1689. He wrote a *Diary*, published by the Camden Society in 1843.—Hook, *Eccles. Biog.* iii, p. 480 sq.

Carvajal. I. Giovanni, born in the year 1400, of an illustrious family of Andalusia, became bishop of Piacenzia, and governor of Rome. He was present at the Council of Basle, where he so warmly defended the interest of the papacy that Eugene IV created him cardinal in 1446. The succeeding popes sent him as their legate to Germany, Bohemia, and Hungary. He died at Rome in 1469.

II. Bernardino, nephew of the preceding, was born at Piacenzia in 1456. In 1493 he became cardinal and papal nuncio in Spain. He was put under the ban by Pope Julius II for having, in 1511, assembled the Council of Pisa, before which the pope was cited on account of his conduct toward the emperor Maximilian and king Louis XII of France. Leo X, however, restored him his dignities in 1513, and he was employed on important missions by the succeeding popes. He died bishop of Ostia in 1523.—Pierer, *Universal-Lexikon*, s. v.

Carve, in some of its forms, is the rendering in the Auth. Vers. of several Heb. words from the following roots: 1. Prop. קָלַע, *kala'*, to "*carve*" wood (1 Kings vi, 29, 32, 35); hence מִקְלַעַת, *mikla'ath*, *sculpture* in relief (1 Kings vi, 18, 29, 32; "graving," vi, 31). 2. חָרַשׁ, *charash'*, to *engrave;* whence חֲרֹשֶׁת, *charo'sheth*, *cutting* of wood or stone (Exod. xxxi, 5; xxxv, 33). 3. חָקָה, *chakah'*, to *hem;* whence מְחֻקֶּה, *mechukkeh'*, *carved* (1 Kings vi, 35). 4. פָּתַח, *pathach'*, to *open;* in Piel, to *sculpture* ("grave") wood (1 Kings vii, 36; 2 Chron. iii, 7), gems (Exod. xxviii, 9, 36; 2 Chron. ii, 7, 14), etc. (Exod. xxviii, 11; xxxix, 6; Zech. iii, 9); whence פִּתּוּחַ, *pittu'ăch*, *sculpture* (Exod. xxviii, 11, 21, 36; Psa. lxxiv, 6; 1 Kings vi, 29; elsewhere "graving," etc.). 5. חָטַב, *chatab'*, to *cut* into figures; whence חֲטֻבוֹת, *chatuboth'*, *variegated* (Prov. vii, 16). 6. Especially, פָּסַל, *pasal'*, to *hew* or shape; whence פֶּסֶל, *pe'sel*, a "carved" or "graven" *image* (Exod. xx, 4, and often). 7. The Greek word "carve" in the Apocrypha is γλύφω (Wisd. xiii, 13; 1 Macc. v, 68). See Engrave.

The Egyptians were extremely fond of carving on articles of furniture, and also in the decoration of walls and ceilings; and, indeed, there was scarcely a corner in an Egyptian palace destitute of carved ornaments. See Handicraft. The ebony and ivory required for these costly works were obtained, either as a tribute or by traffic, from the Ethiopian nations. We frequently find both elephants' teeth and logs of ebony represented on the monuments as brought to the Egyptian monarchs; and we learn that Solomon did not erect his splendid ivory throne until he had opened a communication with the nations bordering on the Red Sea, through his alliance with the king of Tyre. The arts of carving and engraving were much in request in the construction both of the Tabernacle and the Temple (Exod. xxxi, 2, 5; xxxv, 33; 1 Kings vi, 18, 35; Psa. lxxiv, 6), as well as in the ornamentation of the priestly dresses (Exod. xxviii, 9-36; Zech. iii, 9;

2 Chron. ii, 6, 14). In Solomon's time, Huram the Phœnician had the chief care of this, as of the larger architectural works. That the art of carving, however, was cultivated by the Hebrews themselves to a considerable extent, is evident, not only from the cherubim, which were set first in the Tabernacle, and afterwards in Solomon's Temple, but also from the lions which were placed on each side of his throne (1 Kings x, 20). The carving of timber is mentioned in Exod. xxxi, 5, and the prophet Isaiah gives us a minute description of the process of idol-making (xliv, 13). The origin and progress of the art of carving, as connected with Biblical inquiries, have been investigated and illustrated with much ingenuity by Mr. Landseer, in his *Sabæan Researches*. See GRAVEN IMAGE.

Carvosso, Benjamin, a Methodist missionary, son of William Carvosso, was born in Cornwall, England, Sept. 27, 1789. The eminent piety of his parents saved his youth from vice, and in 1811 he was converted. In 1814 he entered the itinerant ministry, and in 1820 was appointed missionary to New South Wales. There and in Van Diemen's Land, where he introduced Methodism, his labors were abundant and useful. In 1830 he returned to England, and re-entered the home work. He died Oct. 2, 1854. He commenced the first religious magazine in Australia, and wrote also *Memoir of William Carvosso* (q. v., New York, 1837, 12mo), which has been sold by thousands. —*Wesleyan Minutes* (Lond. 1855), p. 12.

Carvosso, William, a lay Methodist, one of the "saints" of modern times. He was born in Cornwall, England, March 11, 1750, and bred on a farm. In his youth he fell into the prevalent sins of the time, such as cock-fighting and Sabbath-breaking; but in 1771 he was converted, after a severe mental struggle. In 1774 he became a class-leader in the Wesleyan Church, and held that useful office for sixty years. His whole life was a wonderful illustration of the power of Christian faith, and his visits, prayers, and exhortations were the means of hundreds of conversions. He died Oct. 13, 1834. See *Memoir of William Carvosso*, edited by his son (N. Y. 18mo, a book which has had a vast circulation), and Stevens, *History of Methodism*, iii, 218, 279, 495.

Carwithen, J. B. S., a minister of the Church of England, was born in 1781. Having been ordained deacon in 1803 and priest in 1805, he was in 1810 appointed perpetual curate of Sandhurst, Berks, and in 1814 perpetual curate of Frimley, Hants. He died at Sandhurst vicarage in 1832. He published *A View of the Brahminical Religion in its Confirmation of the Truth of Sacred History, in a Series of Discourses preached in* 1809 (Lond. 1810, 8vo):—*History of the Church of England*, parts 1 and 2 (2d ed., with a notice of the author by W. R. Browell, A.D., Oxf. 1849, 2 vols. 12mo):—*History of the Church from the Fourth to the Twelfth Century* (with Rev. A. Lyall, from *Encyclop. Metropol.* Lond. 1856, 12mo).—Darling, *Cyclop. Bibliog.* i, 589; *British Critic*, vii, 45.

Cary, Lot, a colored Baptist minister, was born a slave about 1780, in Charles City county, Va. He joined the Baptist Church in 1807 at Richmond, and, having learned to read and write, he held meetings with the colored people so successfully that the Church licensed him to preach. By rigid economy he was enabled to purchase his own freedom and that of his two children in 1813; and in 1815, having become deeply interested in the missions to Africa, he succeeded in establishing the "Richmond African Missionary Society." Having been ordained, he sailed for Sierra Leone Jan. 23, 1821, in company with Colin Teague, another colored preacher. He established a school at Monrovia, and attempted to establish another at Grand Cape Mount. Having studied the diseases of the country, he was in 1824 appointed physician to the colony. In September, 1826, he was appointed to the office of vice-agent, and on Mr. Ashmum's return to America in 1828 he became acting governor of Liberia. An accidental explosion, Nov. 8, 1828, while he was engaged in manufacturing cartridges wherewith to defend the colony against the attacks of some slave-dealers, caused his death on the 10th of the same month.—Sprague, *Annals*, vi, 578.

Caryl, Joseph, a nonconformist divine of good abilities, learning, and industry, was born in London in 1602. He was for some time a commoner at Exeter College, Oxford, and preached several years with great success before the Hon. Society of Lincoln's Inn. Appointed one of the triers in 1653, he was ejected in 1662, and afterwards gathered a congregation in the neighborhood of St. Magnus, London Bridge. He died Feb. 7, 1673. His principal work, showing great learning, if not judgment, is his *Exposition, with Practical Observations on the Book of Job* (Lond. 1648-66, 12 vols. 4to; 2d edit. 2 vols. fol. 1676-7), abridged by Berrie (Edinb. 1836, 8vo).—Darling, *Cyclopædia Bibliographica*, i, 590; Neal, *History of the Puritans*, v, 17; v, 531; Calamy, *Nonconformist's Memorial*, i, 221.

Casas, Bartolomé de Las, bishop of Chiapa, Mexico, was born of a noble family at Seville in 1474. His father Antonio, who went to Hispaniola with Columbus in 1493, and returned rich to Seville in 1498, made him a present of an Indian slave while he was pursuing his studies at Salamanca. At nineteen he accompanied his father to St. Domingo, whence he returned to Spain, entered the Dominican order, and fitted himself for a missionary. In 1535 he fixed his residence at St. Domingo, and employed himself in preaching Christianity to the Indians. Afflicted by the cruelties which the Indians endured from their conquerors, Las Casas made another voyage to Spain in order to interest Charles V in their behalf, and so far succeeded as to procure orders for the observance of the governors in the west, restricting the exercise of their powers. Upon his arrival in America he traveled through Mexico, New Spain, and even into Peru, notifying everywhere the imperial commands. In 1539 he again crossed the ocean to solicit aid of the emperor in behalf of the Indians. After infinite disappointments, the emperor granted all that he had asked for, and conferred upon him the bishopric of Chiapa. In 1544 he was consecrated at Seville, and returned with a band of missionaries to America, where he labored with incessant zeal and boldness to defend the natives, and at length retired to Spain, where he continued his endeavors in their behalf until his death, about 1566. One of his chief opponents was Sepulveda, a canon of Salamanca, who published an infamous work justifying the cruelties exercised upon the Indians, and even their *murder*. Las Casas replied by a writing entitled *Brevissima relacion de la destruccion de las Indias* (Seville, 1552, 4to). Charles V forbade its publication, but it was printed, and Sepulveda persisted, nevertheless, in his devilish doctrine, endeavoring in all ways to propagate the notion that, by the laws of the Church, it was a duty to "exterminate those who refused to embrace the Christian faith." Charles V appointed his confessor, the celebrated Dominic Soto, to examine the subject. Soto made his report to the council of Spain, but no judgment was ever pronounced, and the horrible massacres of the Indians continued to such an extent that, it is said, fifteen millions of these innocent victims perished in less than ten years. This is doubtless an exaggeration. An infamous calumny has been circulated by some historians against Las Casas, founded on the authority of Herrara alone, a writer of no credit, viz. that he first counselled the Spaniards to purchase negro slaves to labor instead of the Indians. This story has been sufficiently refuted by Grégoire, Llorente, and others. The other works of Las Casas are *Narratio regionum Indicarum per Hispanos quosdam devastatarum*, etc. (Frankfort, 1598, 4to, and at Tubin-

gen in 1625; also in French, at Antwerp, 1679); *Principia quædam ex quibus procedendum est in disputatione ad manifestandam et defendendam justitiam Indorum*, etc. His works were published at Seville, 1552, in five parts, 4to; but his *Historia General de las Indias* remains in MS.—Prescott, *History of Mexico;* Grégoire, *Apologie de Las Casas* (Mem. of Mor. and Polit. of Institute of France, vol. iv); Landon, *Eccl. Dictionary*, s. v.; *Revue de Paris*, 1843, 331; *Foreign Quart. Review*, March, 1835; Hoefer, *Nouv. Biog. Générale*, xxix, 745.

Casaubon, Isaac, one of the most learned men of his own or of any age, was born Feb. 18th, 1559, at Geneva, whither his family, originally of Dauphiné, fled to avoid the persecutions to which the French Protestants were exposed. His father, Arnauld Casaubon, a minister of the Reformed Church, returned into France, and devoted himself to the education of his son, who, at nine years of age, spoke Latin. In 1578 he went to Lausanne, and studied law, theology, and the Greek and Oriental languages. He soon became professor of Greek at Geneva, and married the daughter of Henry Stephens, the celebrated printer, and soon began to put forth translations of the Greek and Latin writers, with notes and commentaries. In 1596 he accepted the Greek professorship at Montpellier, but held it only until 1599, when he was called to Paris by Henry IV, and received the appointment of librarian to the king. Henry appointed him one of the Protestant judges in the controversy between Du Perron, bishop of Evreux, and Du Plessis Mornay, at Fontainebleau (1600). The Roman Catholics made many attempts to gain so distinguished a convert; but there does not seem to be any reason for concluding that they had even partial success, although it was given out that he had wavered in a conference with Du Perron. On the death of Henry IV, 1610, Casaubon went to England with Sir Henry Wotton. James I received him with distinction, and presented him, though a layman, to a prebend at Canterbury, and (it is said) to another in the church of St. Peter, at Westminster. He died July 1, 1614, and was buried in Westminster Abbey. Besides his classical works he published *Exercitationes contra Baronium* (London, 1614, fol., Frankfort, 1615, and Geneva, 1663, 4to); *Novum Testamentum Græcum* (Geneva, 1587, 16mo, with notes; reprinted in the *Critici Sacri*); *De libertate Ecclesiasticâ* (1607, 8vo), undertaken by order of Henry IV on occasion of the difference between the republic of Venice and Pope Paul V, with the aim to maintain the rights of the temporal power against the court of Rome. It was stopped by the king's order, when the difference in question was settled. He also wrote *Ad Frontonem Ducæum Epistola* (Lond. 1611, 4to) against the Jesuitical doctrine of authority. The best edition of his *Letters* is that of Rotterdam (1709, fol). There is a full account of his life and writings in Haag, *La France Protestante*, iii, 230.—*Biog. Univ.* vii, 259; Landon, *Eccl. Dictionary*, s. v.; Hoefer, *Nouv. Biog. Générale*, viii, 954.

Case, Isaac, a Baptist minister, was born at Rehoboth, Bristol Co., Mass., Feb. 25, 1761, united with the Baptist Church in 1779, was licensed the following year, and was ordained in 1783. For many years Mr. Case labored as a missionary in Maine, New Brunswick, and Nova Scotia, and with much success, until advancing age rendered him incapable of farther exertion. He died at Readfield, Nov. 3, 1852, in the 92d year of his age and the 72d of his ministry.—Sprague, *Annals*, vi, 205.

Case, William, missionary to the Indians in Canada, was born in Swansea, Mass., Aug. 27, 1760. He embraced a religious life in 1803, and was received on trial in the New York Conference of the Methodist Episcopal Church in 1805. His first appointment was to the Bay of Quinte, Canada. In 1809 he served as missionary at Detroit. From 1810 to 1827 he served as presiding elder in various districts in Western and Northern New York, and in Canada. In 1828 Canada was given up to the Wesleyan Methodists, and Case was made superintendent of Indian missions and schools; and from 1830 to 1833 he was general superintendent, without episcopal powers, of the Methodist societies in Canada. A great part of his time, in all these years, was spent in missionary work among the Indians. In 1837 he was made principal of the Wesleyan native industrial school at Alnwick, in which service he remained until 1851. In 1854 he delivered a sermon before the Canadian Conference in commemoration of the fiftieth year of his service in the ministry. He died, in consequence of a fall from his horse, at the Alnwick mission-house, Canada, Oct. 19th, 1855. He filled all his ecclesiastical posts with honor; but his greatest field of usefulness was among the Indians. "The very spirit of Eliot seemed to be reproduced in him."—*Minutes of the Canadian Conference*, 1856; *Wesl. Method. Magazine*, 1856, p. 179; Sprague, *Annals*, vii, 425; *Case and his Contemporaries* (Toronto, 1867).

Caselius, Johann, an eminent German scholar, was born at Göttingen in 1533. He studied first in the schools of Gandersheim and Nordhausen, and afterwards in the universities of Wittenberg and Leipzig, where he received the lessons of Melancthon and J. Camerarius. He then visited Italy, where he continued his studies, and on his return became, in 1563, professor of philosophy and rhetoric in the University of Rostock. During a second journey he made in Italy he received the degree of LL.D. at Pisa, in 1566, and the following year received a patent of nobility from the emperor Maximilian. In 1599 he accepted a professorship in the University of Helmstadt, where he opposed, in union with the Melancthonians, the efforts of ultra Lutheran orthodoxy, principally represented by his colleague, Daniel Hoffmann (q. v.), to proscribe science and philosophy. He was the teacher of George Calixtus (q. v.), and wrote a great number of works, most of which remain unpublished. He died in 1613. See J. Burkhardt's *Epistola de Jo. Caselii erga bonas literas meritis ejusque lucubrationum editione* (Wittenb. 1707, 4to).—Herzog, *Real-Encyklopädie*, ii, 598.

Casement (אֶשְׁנָב, *eshnab'*, Prov. vii, 6; "lattice," Judg. v, 28), a kind of barrier of open-work, placed before windows in the East, which, being usually open in summer down to the floor, require some such defence. See House.

Cashel, formerly an archiepiscopal see in Ireland. This ancient see is now deprived of its metropolitan dignity, and has united to it the sees of Emly, Waterford, and Lismore; the united diocese consisting of the counties of Tipperary, Waterford, and part of Limerick. The incumbent in 1866 was Robert Daly, D.D., consecrated in 1843.

Casiph'ia (Heb. *Kasiphya'*, כָּסִפְיָא, perhaps from כֶּסֶף, *silver*, or *whitish*, if the name be not of Arian origin; Sept. so translates ἀργύριον), a "place" (מָקוֹם, i. e. region) of the Persian empire, where Levites had settled during the Captivity, whence Iddo, with others of them, were sent for by Ezra to join his party returning to Jerusalem (Ezra viii, 17). Gesenius (*Thesaur.* p. 703) objects to the identification by some with the *Caspiæ Pylæ*, and of others with the city *Kaswin*, that these are not on the route from Babylon to Palestine. As this position of the place in question, however, is not clear, it is likely that, if the Caspian *Sea* be not designated by this name, it may refer to the "Caspian" *Mountains*, situated in Media (Strabo, xi, p. 522, 525; Pliny, vi, 15), where Jewish exiles seem to have been located (Tobit i, 16; iii, 7). This is at least favored by the rabbinical tradition, *Vajikra Rabba* (v, 5), and is defended by Fürst (*Heb. Handwört.* s. v.), who adduces also the local title *Albania* as a coincidence with the silvery summits of the

snow-capped range of Caucasus (comp. *Alp*, i. e. *albus*, "white").

Cas'lev (Χασελεῦ), a Græcized form (1 Macc. i, 54; iv, 52, 59; 2 Macc. i, 9, 18; x, 5) of the name of the Jewish month elsewhere (Neh. i, 1; Zech. vii, 1) Anglicized CHISLEV (q. v.).

Cas'luhim (Heb. *Kasluch'm'*, כַּסְלֻחִים, of uncertain, but prob. foreign etymology; Sept. in Gen. Χασμωνιείμ, Vulg. *Chasluim*; in Chron. Χασλωνιείμ v. r. Χασλωείμ, *Caslu'm*), a people whose progenitor was a son of Mizraim (Gen. x, 14; 1 Chron. i, 12). In both passages it would appear, as the text now stands, that the Philistines came forth from the Casluhim, and not from the Caphtorim, as is elsewhere expressly stated: here, therefore, there may be a transposition. See CAPHTOR. The only clew we have as yet to the position of the Casluhim is their place in the list of the sons of Mizraim between the Pathrusim and the Caphtorim, whence it is probable that they were seated in Upper Egypt. See PATHROS. The Sept. seems to identify them with the *Chashmannim*, חַשְׁמַנִּים, of Psa. lxviii, 31 (A. V. "princes"), which some (Michaelis, *Suppl.* p. 973), though not the Sept. in that place, take to be a proper name, and compare with the native civil name of Hermopolis Magna. This would place the Casluhim in the Heptanomis. See HASHMANNIM. Bochart (*Phaleg*, iv, 31) suggests the identity of the Casluhim with the *Colchians* (comp. Michaelis, *Spicileg.* i, 275 sq.), who are said to have been an Egyptian colony (Herod. ii, 104; Diod. Sic. i, 28; Dionys. Perieg. p. 689; Ammian. Marc. xxii, 22; comp. Agath. *Hist.* ii, 18); but this story and the similarity of name do not seem sufficient to render the supposition a probable one, although Gesenius (see Hitzig, *Philist.* p. 86 sq.) gives it his support (*Thes.* p. 702; comp. Ritter, *Vorhalle*, p. 35 sq.; Brehmer, *Entdeck.* i, 354 sq.). Forster (*Ep. ad Michael.* p. 16 sq.) conjectures the Casluhim to be the inhabitants of *Cassiotis*, the tract in which is the slight elevation called Mount Casius (Pliny, v, 12 and 14; Strabo, xvii, 759; Steph. Byz. p. 455). Bunsen assumes this to be proved (*Bibelwerk*, p. 26). There is, however, a serious difficulty in the way of this supposition—the nature of the ground, a low littoral tract of rock, covered with shifting and even quick sand. But Ptolemy (*Geogr.* iv, 5, 12; comp. Joseph. *War*, iv, 5, 11) gives us the names of several towns lying in this district, so that it must have been capable of supporting a population, and may, in an earlier period, have been quite adequate to the support of a tribe. The position of the Casluhim in the list beside the Pathrusim and the Caphtorim renders it probable that the original seat of the tribe was somewhere in Lower Egypt, and not far from the vicinity of that "Serbonian Bog betwixt Damiata and Mount Casius old" (*Par. Lost*, ii, 592). Hiller (*Syntag. Herm.* p. 178 sq.) refers the name to the *Solymi* of the Greeks (Strabo, i, 34; xiv, 667), in the neighborhood of the Lycians (comp. Schulthess, *Parad.* p. 166 sq.). The supposition of Hitzig (*Philist.* p. 90 sq.) that the Casluhim were a Cretan colony in Libya, whence again a colony was sent to Philistia, is merely based upon a vague allusion in Tacitus (*Hist.* v, 2). See ETHNOLOGY.

Cas'phon (Χασφών v. r. Χασφώρ and Χασφώθ, 1 Macc. v, 36) or **Cas'phor** (Χασφώρ v. r. Χασφών and Χάσφωθ, 1 Macc. v, 26), one of the fortified cities in the "land of Galaad," i. e. Gilead (1 Macc. v, 26), in which the Jews took refuge from the Ammonites under Timotheus (comp. ver. 6), and which, with other cities, was taken by Judas Maccabæus (v, 36). Josephus, in the parallel account (*Ant.* xii, 8, 3), calls it *Chasphoma* (Χάσφωμα). Grotius and Calmet (in loc.) consider it the same (but on very slight grounds) with HESHBON (q. v.). It was situated near Bostra, Ashtaroth-Karnaim, and Edrei, and was perhaps one of the ruined sites in the Hauran still found by travellers. See HAURAN. Seetzen's commentators (notes on pt. 7, March, 1806, iv, 198) suggest the modern *es-Szbân* as the possible site of Casphon, but add, "Site, however, uncertain." See also CASPIS.

Cas'pis (Κάσπις), a strongly-fortified city—whether east or west of Jordan is not plain—having near it a lake (λίμνη) two stadia in breadth. It was taken by Judas Maccabæus with great slaughter (2 Macc. xii, 13, 16). The parallel history of the 1st Book of Maccabees mentions a city named CASPHOR or CASPHON (q. v.), with which Caspis may be identical, but the narratives differ materially (see Ewald, *Isr. Gesch.* iv, 359, note). Reland (*Palæst.* p. 134) compares a city *Chaspiah* (חספיה) on the borders of Palestine (Jerus. Talm. *Demai*, xxii, 4).

Cassander, GEORGE, one of the most amiable and enlightened divines of the Roman Church, was born about 1515, in the island of Cadsand, at the mouth of the Scheldt. He was for a time professor of theology, first at Bruges, then at Ghent; after which he went to Cologne, where he devoted himself to the study of the controversy between the Roman Catholics and Reformers, hoping to allay the dissensions of the time. The duke of Cleves called him to Duisburg, to bring back the Anabaptists, if possible, to the Church: and this led to his preparing his book on infant baptism. His first publication was *De officio pii veri in hoc dissidio religionis* (Basle, 1561, 8vo). He shared the common fate of those who endeavor to unite parties warmly opposed to each other, and his book was disliked by both Protestants and Romanists. The emperor Ferdinand induced him to write his *Consultatio de articulis fidei inter papistas et protestantes controversis* (1564), in which he endeavored to reconcile the various articles of the Confession of Augsburg with the faith of the Roman Church. He was willing to grant the cup to the laity, and, in extreme cases, the marriage of priests. Cassander died Feb. 3, 1566. His works were collected by Decordes, *Opera quæ reperiri potuerunt omnia* (Paris, 1616, fol.). This collection contains, among other things, a commentary on the two natures of Jesus Christ; various treatises against the Anabaptists, with testimonies from the fathers, and the doctrine of the early Church on the subject of the baptism of infants; *Liturgica*; ecclesiastical hymns, with notes; one hundred and seven letters, etc. Some of these treatises were condemned by the Council of Trent.—Landon, *Eccl. Dictionary*, s. v.; Hoefer, *Nouv. Biog. Générale*, ix, 27; Gieseler, *Church History*, vol. iv, § 30, 51; Hook, *Eccles. Biography*, iii, 5[illegible]2 sq.

Cassel, Conference of, a meeting held at Cassel in 1661 between the Reformed theologians of Marburg and the Lutheran theologians of Rinteln. Peter Musäus and Johann Hennichen, both zealous disciples of Calixtus (q. v.), represented the Lutherans, and Sebastian Curtis and Johannes Hein the Reformed. The object of the Conference was, according to the officially-published *Brevis relatio colloquii*, etc., to endeavor, by friendly discussion, to remove the obstacles to union. The principal subjects of discussion were the Eucharist, Predestination, Baptism, and the person of Christ, and both parties agreed that in these fundamental points their doctrines were essentially similar. The landgrave was petitioned to call on the neighboring churches, and the Universities of Brandenburg and Brunswick, to adopt the resolutions of the Conference, and also to invite a general congress of the theologians of all countries. The landgrave's death (in 1663) destroyed all these projects of union. See Rommel, *Gesch. von Hessen*, ix, p. 46; Mosheim, *Church History*, iii, 359; Herzog, *Real-Encyklopädie*, ii, 600.

Cassell, LEONARD, a minister of the Methodist Episcopal Church, was born in Maryland in 1784, entered the itinerant ministry in 1802, and died of yellow

fever Sept. 28, 1808. He was of German parentage, and his mind remained in "uncultured darkness until his conversion. From that day it was manifest how great a mind had thus been called forth. The improvement he made astonished his friends." His genius, eloquence, and piety soon placed him in the most important positions as a preacher, and his early death was a great loss to the Church.—*Minutes of Conferences*, ii, 168.

Cassia is the rendering in the Auth. Vers. of two Heb. words.

1. KIDDAH′, קִדָּה, mentioned in Exod. xxx, 24 (Sept. ἶρις) among the ingredients of the holy oil of anointing, and in Ezek. xxvii, 19 (Sept. σπαρτιον) as one of the articles of merchandise in the markets of Tyre. The Sept. (in one passage) and Josephus (*Ant.* iii, 8, 3) have *iris*, i. e. some species of *flag*, perhaps the *Iris florentina*, which has an aromatic root-stock. Symmachus and the Vulg. (in one place) read *stacte*, "liquid myrrh." The Arabic versions of Saadias and Erpenius conjecture *costus* (see below). The Chaldee and Syriac, with most of the European versions, followed by Gesenius, Simon, Fürst, Lee, and all the lexicographers, understand the Arabian *cassia*, or cassia-bark, a species of aromatic cortical resembling cinnamon, but less fragrant and valuable; so called from its rolls being *split* (from קָדַד, to *cleave*). See Dioscor. i, 12; Theophr. *Hist. Plant.* ix, 5; Celsius, *Hierob.* ii, 186, 350 sq.

2. KETSIAH′, קְצִיעָה, named only in the plural in Psa. xlv, 8 (Sept. κασία, Vulg. *casia*), in connection with myrrh and aloes, as being used to scent garments with. The word comes from the root קָצַע, to *abrade*, and appears to refer to the *peeled* bark of some species of cinnamon, perhaps differing in this from the preceding only as designating some *oil* or prepared aromatic, of which that denotes the raw material (see Celsii *Hierob.* ii, 360). See AROMATICS.

Under the name *cassia* (which appears to be identical with this last Heb. term) the ancients designated an aromatic bark derived from the East, and employed as an ingredient in costly unguents (Theophr. *Plant.* ix, 7; Pliny, xii, 43; Dioscor. i, 12; Diod. Sic. iii, 46; Athen. x, 449; Plaut. *Curcul.* i, 2, 7; Virg. *Geo.* ii, 466; Martial, vi, 55, 1; x, 97, 2; Pers. *Sat.* ii, 64; i, 36). It was obtained from a tree or shrub growing in India and Austria (Herod. iii, 110; Diod. Sic. l. c.; Agatharch. in Hudson, i, 61; Arrian, *Alex.* vii, 20; but see Pliny, xii, 41), which Pliny (xiii, 43) more closely, but still not adequately describes, and which Columella (iii, 8) saw in Roman fancy gardens. It is clear that the Latin writers by the term *casia* understood both the Oriental product now under consideration, as well as some low, sweet herbaceous plant, perhaps the *Daphne gnidium*, Linn. (see Fee, *Flore de Virgile*, p. 32, and Du Molin, *Flor. Poet. Ancienne*, p. 277); but the Greek word, which is first used by Herodotus (ii, 86), who says (iii, 110) the Arabians procured it from a shallow lake in their country, is limited to the Eastern product. Dioscorides (l. c.) and Galen enumerate three better sorts of cassia, and there are still in Europe held to be different kinds, but they all are distinguished from the true cinnamon-tree by their darker color, weaker odor, and less lively taste. The tree from which the bark is produced is regarded by naturalists as the *Laurus cassia* (Linn.), that flourishes in the East Indies and Malatia (Ainslie, *Mater. Med.* i, 58 sq.); yet the brothers Nees von Esenbeck (*De cinnamomo disputat.* Bonn, 1823, in the *Botan. Zeitung*, 1831, No. 34) have shown that this plant (the *Laurus cassia*) is not a distinct species, but only a wild or original form of the *cinnamomum Ceylonicum* or *Zeylanicum*. See the *Penny Cyclopædia*, s. v. Cassia; Laurus.

The name Cassia has been applied by botanists to a genus containing the plants yielding senna, and to others, as the *Cassia fistula*, which have nothing to do with the original cassia. "Cassia-buds," again, though no doubt produced by a plant belonging to the same, or to some genus allied to that producing cinnamon and cassia, were probably not known in commerce at so early a period as the two latter substances. Dr. Royle, in his *Antiquity of Hindoo Medicine*, p. 84, has remarked, "The cassia of the ancients it is not easy to determine; that of commerce, Mr. Marshall says, consists of only the inferior kinds of cinnamon. Some consider cassia to be distinguished from cinnamon by the outer cellular covering of the bark being scraped off the latter, but allowed to remain on the former. This is, however, the characteristic of the (Cochin-Chinese) *Cinnamomum aromaticum*, as we are informed by Mr. Crawford (*Embassy to Siam*, p. 470) that it is not cured, like that of Ceylon, by freeing it from the epidermis." There is no doubt that some cassia is produced on the coast of Malabar. The name also would appear to be of Eastern origin, as *kasse korondé* is one kind of cinnamon, mentioned by Burmann in his *Flora Zeylonica*.

The Heb. word *ketsiah*, however, has a strong resemblance to the *kooth* and *koost* of the Arabs, of which *Kooshta* is said by their authors to be the Syriac name, and from which there is little doubt that the κόστος of the Greeks and *costus* of the Latins are derived. Κόστος is enumerated by Theophrastus (*Hist. Pl.* ix, 7) among the fragrant substances employed in making ointment. Three kinds of it are described by Dioscorides among his *Aromata* (i, 15), of which the Arabian is said to be the best, the Indian to hold the second place, and the *Syrian* the third. An inferior kind is termed by him κιττώ (i, 12), a word which has a strong resemblance to the Heb. *kiddah* above. Pliny mentions only two kinds (xv, 12), the white and the black, brought from India. The Persian writers on Materia Medica in use in India, in giving the above synonymes, evidently refer to two of the three kinds of *Costus* described by Dioscorides, one being called *Koost Hindee*, and the other *Koost Arabee*. Both these kinds are found in the bazaars of India, and the *koot* or *koost* of the natives is often, by European merchants, called Indian orris, i. e. Iris root, the odor of which it somewhat resembles. The same article is known in Calcutta as *Puchuk*, the name under which it is exported to China. The identity of the substance indicated by these various names was long ago ascertained by Garcias. The *koost* obtained in the northwestern provinces of India

Laurus Kinnamomum.

is one of the substances brought across the Indus from Lahore (Royle, *Illust. Himal. Bot.* p. 360). Dr. Falconer, on his journey to Cashmere, discovered that it was exported from that valley in large quantities into the Punjab, whence it finds its way to Bombay (as in the time of Pliny to Patala) and Calcutta for export to

Cinnamomum Cassia, with enlarged view of the Bud.

China, where it is highly valued as one of the ingredients in the incense which the Chinese burn in their temples and private houses. He named the species *Aucklandia Costus* (*Linn. Trans.* xix, 23) (see Smith's *Dict. of Class. Ant.* Am. ed., s. v. Cassia; Costum). See CINNAMON.

Cassian, JULIUS (Κασσιανός), a leader of the Docetæ in the second century: Cave gives the date A.D. 174; Tillemont about A.D. 200. He is mentioned by Hippolytus and Irenæus, but what is known of him is chiefly derived from Clemens Alexandrinus, who calls him the founder of the sect of the Docetæ, and refers to one of his works, entitled *Concerning Continence*, from which it appears that he adopted the notions of Tatian respecting the impurity of marriage. He quoted passages from apocryphal Scriptures, and perverted passages from the genuine Scriptures in order to support his opinions. Clement says that "he had recourse to the fiction—that Christ was only a man in appearance —through unwillingness to believe that he had been born of the Virgin, or partaken in any way of generation." Clement accuses him of borrowing from Plato his notions respecting the evil nature of generation, as well as the notion that the soul was originally divine, but, being rendered effeminate by desire, came down from above to this world of generation and destruction. Eusebius (vi, 13) speaks of Cassian as author of "a history of the times in chronological order" (Clement, *Stromat.* iii, 13, § 91).—Lardner, *Works*, viii, 611-614; Neander, *Church Hist.* i, 458; Cave, *Hist. Litt.* Cent. ii; Matter, *Hist. du Gnosticisme*, ch. i, § 3.

Cassiānus, JOHANNES (also called JOANNES MASSILIENSIS, JOANNES EREMITA), according to Gennadius (*De Vir. Illust.* c. 61), a Scythian; but the more likely view makes him a native of Marseilles. He was brought up at the celebrated monastery of Bethlehem (q. v.), under Germanus, with whom, about A.D. 390, he went to visit the hermits of Egypt, among whom he lived several years. In 403 he went to Constantinople, where he listened to Chrysostom, who ordained him deacon. About 415 he founded a monastery at Marseilles for monks and another for nuns; the first is the celebrated abbey of St. Victor. He may thus be considered as the founder of monachism in the West; and his treatise *De Institutis Coenobiorum*, libri xii, afforded a code by which the monasteries were long after ruled (transl. into French by Saligny, Paris, 1667, 8vo). Cassianus, according to different writers, died (aged 97) in 440, or 448, or 435. The Chronicle of Prosper represents him as alive in 433. Some churches honor him as a saint on the 23d of July, though he was never canonized. He was a strong opponent of Augustine's doctrine of predestination, but at the same time, by recognising the universal corruption of human nature, he opposed Pelagius just as strongly. (See his *Collationes Patrum.*) He admitted the necessity of preventing and assisting grace, but held that, in most men, faith and good will, and the desire of conversion, wrought by natural strength alone, precede such grace, and prepare the mind to receive it; and that such first efforts of the natural man cannot indeed *deserve* the gift of grace, but assist to the obtaining of it. "His attention was turned to experience; he observed religious natures; a system of mere logical speculation had no charms for him. His doctrines, which are scattered through his writings, were designed to represent in its simplicity the faith of the Galilean fishermen, which had been garbled by Ciceronian eloquence. Free will and grace agreed, and hence there was an opposing onesidedness which maintained either grace alone, or free will alone. Augustine and Pelagius were each wrong in their own way. The idea of the divine justice in the determination of man's lot after the first transgression did not preponderate in Cassian's writings as in Augustine's, but the idea of a disciplinary divine love, by the leadings of which men are to be led to repentance. He appeals also to the mysteriousness of God's ways, but not as concerns predestination, but the variety of the leadings by which God leads different individuals to salvation. Nor is one law applicable to all; in some cases grace anticipates (*gratia præveniens*), in others a conflict precedes, and then divine help comes to them as grace. In no instance can divine grace operate independently of the free self-determination of man. As the husbandman must do his part, but all this avails nothing without the divine blessing, so man must do his part, yet this profits nothing without divine grace" (Neander, *Hist. Dogmas*, ii, 377). Among his writings are *Collationes Patrum*, xxiv, in which Cassian introduces Germanus and other monks as interlocutors, with himself, in dialogues on various monastic and moral duties. In the 13th Conference, Cassian, under the person of Chæremon, sets forth what has been called his *semi-Pelagianism*, viz. his views of predestination and grace. The 17th Conference defends occasional *falsehood*, as being not contrary to Scripture: "A *lie* is to be so esteemed and so used as if it possessed the nature of hellebore, which, if taken in an extreme case of disease, may be healthful, but if taken rashly, is the cause of instant death; people the most holy and most approved of God have used falsehood without blame," etc. The 20th shows several ways of obtaining remission of sins besides through the death and intercession of Christ. He wrote also a treatise, *De Incarnatione Christi*, lib. vii, in confutation of Nestorius, about A.D. 430, at the request of Leo, afterwards bishop of Rome. Cassian maintains the propriety of the term "Mother of God." The *Collationes* were translated into French by Saligny (Paris, 1663, 8vo). His works were published at Basle in 1575; at Antwerp in 1578; at Rome (*cura Petri Giacconii*), 1580 and 1611, 8vo; at Douai (1616, two vols. 8vo), by Alardus Gazæus; reprinted at Leipsic 1722, fol. (the best edition). They are also in the *Biblioth. Patrum*, vol. vii.—Neander, *Church Hist.* ii, 627-630; Hoefer, *Nouv. Biographie Générale*, ix, 35; Dupin, *Eccl. Writers*, 5th century; Meier, *Jean Cassian* (Strasb. 1840); Wiggers, *de Johanne Cassiano*, etc. (Rostock, 1824, 1825); Wiggers, *Augustinismus et Pelagianismus*, ii, 19, 47, etc.;

also his article Cassianus, in *Ersch u. Gruber's Encyklopädie;* Hagenbach, *History of Doctrines*, § 114; Lardner, *Works*, v, 27; Clarke, *Sacred Literature*, ii, 188.

Cassiodōrus, or *Cassiodorius*, Magnus Aurelius, *Senator*, was born at Scylacium (Squillace), in Bruttium (Lucania), of a noble Roman family, about 463, and gained a high reputation for wisdom and eloquence at a comparatively early age. Theodoric loaded him with honors and employments near his own person, and about 500 made him prefect of the Prætorium, and raised him to the patrician rank. In 514 he was sole consul. He retained his influence at court under Athalaric, but in 537 he retired into the country, and founded the monastery of Viviers (*Vivariense*), in Calabria. He was still living in 562, and is believed to have lived beyond a hundred years. In his retreat he devoted himself to literature, even to copying manuscripts, and it is an undoubted fact that we owe to him the preservation of many precious manuscripts. Some, indeed, say that he first of all set the monks to this labor of copying. Besides some grammatical works, he wrote *Historiæ Ecclesiast. Tripartitæ* (Frankf. 1588); *Computus Paschalis*, etc.; *De Institutione Divinarum Literarum; Expositio in Psalmos; Complexiones in Epist. Apostol.* (Rott. 1723, 8vo). His works were collected and published in 1491 and 1588; the most exact is the edition of Dom Garet (Rouen, 1679, 2 vols. fol., and Ven. 1729). They are also in Migne, *Patrologia.* Maffei published at Verona (1702) a commentary of Cassiodorus on the Acts and Epistles, which he discovered in the library of that city. His life was written by the Benedictine St. Marthe (*La vie de Cassiodore*, Paris, 1694).—Landon, *Eccles. Dictionary*, s. v.; Gieseler, *Church History*, i, § 112; Herzog, *Real-Encyklopädie*, ii, 603; Cave, *Hist. Lit.* (1720), p. 325.

Cassius (fully Caius Cassius Longinus), one of the murderers of Julius Cæsar, first appears in history as the quæstor of Crassus in the unfortunate campaign against the Parthians, B.C. 53, when he greatly distinguished himself by his military skill. After various public services he conspired with Brutus against Cæsar, B.C. 44, and in the anarchy that followed he usurped the presidency of Syria, in which capacity his violent conduct toward the Jews is related by Josephus (*Ant.* xiv, 11 and 12). The forces of the conspirators were defeated by Antony at Philippi, and Cassius commanded his freedmen to put an end to his life, B.C. 42. —Smith, *Dict. of Class. Biog.*, s. v. Longinus.

Josephus also mentions another (Caius) Cassius Longinus as appointed governor of Syria, A.D. 50, by Claudius, in the place of Marcus (*Ant.* xx, i, 1; comp. xv, 11, 4). He was banished by Nero, A.D. 66, who dreaded his popularity at Rome (Smith, *ut sup.*).

Cassock, the *coat* formerly worn by all orders of the clergy in the Roman and English churches; in the Church of Rome it varies in color with the dignity of the wearer. Priests wear black; bishops, purple; cardinals, scarlet; and popes, white. In the Church of England, black is worn by all the three orders of the clergy, and the garment is of cloth or silk, with plain sleeves like a coat, made to fit close to the body, and tied round the middle with a girdle. It is worn under the gown or surplice. The cassock was not originally appropriated to the clergy: the word is used in Shakspeare for a military coat.

Cast (the representative of many Heb. words, and usually of the Greek βάλλω) occurs in many applications as a synonyme of *throw.* The following seem to deserve special notice.

1. Amaziah, king of Judah, caused the punishment of "*casting down* from the top of a rock" to be inflicted on ten thousand Edomites whom he had taken in war (2 Chron. xxv, 12); and the Greeks and Romans were in the habit of condemning certain criminals to be cast down from the top of a rock, especially the latter nation, whence the famous "Tarpeian Rock" at Rome. See Punishment.

2. The phrase to "*cast up* a bank" is one frequently employed in Scripture for the preliminary act in besiegers of raising a rampart of blockade around a hostile city. See Siege.

3. For the practice of "*casting* metal," see Metallurgy.

4. On the act of "*casting out* of the synagogue," see Excommunication.

5. "*Castaway*" (ἀδόκιμος, *not accepted*, reprobate) occurs 1 Cor. ix, 27, as a term equivalent to apostate. See Apostasy.

Castalion, Castalio, or **Castellio**, Sebastian, a Protestant writer of extraordinary talent, was born of poor parents in Dauphine in 1515. His family name was Châteillon, which he Latinized into Castalion. He applied himself early to the ancient languages, and became a great proficient in Greek and Hebrew. In 1540-1 Calvin invited him to Geneva, and had him appointed to a professor's chair. In a few years Castalio, having become obnoxious to Calvin on account of his opinions on predestination, left Geneva for Basle, where he employed himself in teaching and writing. He wrote *Psalterium reliquaque sacrarum Literarum Carmina et Precationes* (1547, with notes):—*Jonas Propheta, heroico carmine Latino descriptus:—Dialogorum Sacrorum ad linguam et mores puerorum formandos, libri iv* (translated into English by Bellamy under the title *Youth's Scripture Remembrancer, or Select Sacred Stories by way of familiar Dialogues*, Lat. and Eng., London, 1743). He also published a version in Latin verse of the Sibylline Books, with notes, and a Latin translation of the *Dialogues* of Bernardino Ochino. Before he left Geneva he had undertaken a complete Latin version of the Bible from the Hebrew and Greek, which he completed at Basle (*Biblia Vet. et Nov. Test. ex versione Seb. Castalionis*, Basil. 1551), and dedicated to Edward VI of England. He published a French version of the same in 1555. Castalio's versions were made the subject of much conflicting criticism. His Latin Bible went through several editions; that of Leipzig, 1697, contains also his *Delineatio Reipublicæ Judaicæ ex Josepho; Defensio versionis Novi Fæderis contra Th. Bezam*, and *Nota prolixior in cap. ix Epistolæ ad Romanos.* He carried on an epistolary controversy with Calvin and Beza, who assailed him with many charges, and even urged the magistrates of Basle to drive him away. He passed his latter years at Basle in great poverty, and died Dec. 23, 1563, leaving his family in want. "In 1562 Castalio published *Defensio suarum Translationum Bibliorum et maxime Novi Fæderis.* His *Dialogi IV de Prædestinatione, Electione, Libero Arbitrio, ac Fide*, were published in 1578 by Faustus Socinus. The book attacks Calvin's doctrines with great violence, as making God a tyrant, as tending to encourage vice, and to discourage all exertion toward virtue. Castalio has been abused both by Calvinists and Roman Catholics; Arminian critics have been more indulgent to him. He wrote a treatise to prove that magistrates have no right to punish heretics" (*English Cyclopædia*). He was more a philologist than a theologian; he treated the Bible rather as a critic than as an interpreter.—Horne, *Bibliog. Appendix*, pt. i, ch. i, § 4; Haag, *La France Protestante*, iii, 361; Hagenbach, *Hist. of Doctrines*, § 250; Bayle, *Dictionary*, s. v.; Wesley, *Works*, vii, 571.

Caste. See Indian Caste.

Castell, Edmund, a learned English divine, was born at Hatley, Cambridgeshire, 1606, and was educated at Immanuel and St. John's colleges, Cambridge. While at the University he compiled his *Lexicon Heptaglotton*, Dictionary of Seven Languages (Lond. 1669, 2 vols. fol.), after seventeen years' labor on it. The publication cost him £12,000, and ruined him. He had, however, previously been appointed king's chap-

lain (1666) and Arabic professor at Cambridge, to which were afterwards added a prebend of Canterbury and the livings of Hatfield Peverell and Wodeham Walter. He died in 1685 rector of Higham Gobion, Bedfordshire. His *Lexicon* is one of the greatest monuments of industry known in literature. He was aided in its preparation by Dr. Murray, bishop Beveridge, and Dr. Lightfoot. Besides his vast labors on the *Lexicon*, he was eminently useful to Walton in the preparation of his *Polyglot Bible*. Walton acknowledges his services, but not adequately.—*New General Biograph. Dictionary*, iii, 194; *Bibl. Repository*, x, 11; Todd, *Life of Walton*, vol. i, ch. v; Horne, *Introduction*, v, 252 (9th ed.).

Castellio. See CASTALION.

Castellum (or **Căstra**) **Peregrinōrum** (*Foreigners' Station*) or PETRA INCĪSA (*Cut Rock*), a fortified seaport of the Crusaders in Palestine, between Mt. Carmel and Cæsarea (Ritter, *Erdk.* xvi, 615; Raumer, *Paläst.* p. 133); now ATHLIT, a most formidable-looking ruin (Van de Velde, *Narrative*, i, 312-314; Wilson, *Lands of Bible*, ii, 248). See AHLAB. Under the form *Castra* (קסטרה) it seems to be mentioned by the Rabbins (Reland, *Palæst.* p. 697; Schwarz, *Palest.* p. 162).

Castle is the rendering in the A. V. of the following words in certain passages: אַרְמוֹן, *armon'*, a *fortress* (Prov. xviii, 19; elsewhere uniformly "palace"); טִירָה, *tirah'*, a *wall* ("row," Ezek. xlvi, 23), hence an *enclosure*, e. g. a *fortress* ("palace," Cant. viii, 9), or a nomade *hamlet* of palisades (Gen. xxv, 16; Num. xxi, 10; 1 Chron. vi, 54; "palace," Ezek. xxv, 4; poetically "habitation," Psa. lxix, 25); בִּירָנִית, *biranith'* [from the synonymous בִּירָה, *birah'*, "palace;" see BARIS], a *citadel* (2 Chron. xvii, 12; xxvii, 4); מִגְדָּל, *migdal'* (1 Chron. xxvii, 25), a *tower* (as elsewhere rendered); מְצַד, *metsad'* (1 Chron. xi, 7), or מְצוּדָה, *metsudah'* (1 Chron. xi, 5), a *fort* or *stronghold* (as elsewhere usually rendered); ἀκρόπολις, *acropolis* (2 Macc. iv, 27; v, 5); πύργος, a *tower* along a wall (2 Macc. x, 18, 20, 22); παρεμβολή, a military *enclosure* (Acts xxi, 34, 37; xxii, 24; xxiii, 10, 16, 32) or *station* ("camp," Heb. xi, 34; xiii, 11, 13; Rev. xx, 9). See TOWER; PALACE, etc.

Castles among the Hebrews were a kind of military fortress, frequently built on an eminence (1 Chron. xi, 7). The priests' castles, mentioned in 1 Chron. vi, 54, may also have been a kind of tower, for the purpose of making known anything discovered at a distance, and for blowing the trumpets, in like manner as the Mohammedan imams ascend the *minarets* of the mosques at the present day to call the people to prayers. The castles of the sons of Ishmael, mentioned in Gen. xxv, 16, were watch-towers, used by the nomade shepherds for security against marauders. The "castle" in Acts xxi, 34, refers to the quarters of the Roman soldiers at Jerusalem in the fortress Antonia (q. v.), which was adjacent to the Temple and commanded it. See FORTIFICATION.

Cas'tor AND POL'LUX, the *Dioscūri* (Διόσκουροι, Acts xxviii, 11), two heroes of Greek and Roman mythology, the twin-sons of Jupiter and Leda (see Smith's *Dict. of Classical Biog.*, s. v. Dioscuri). They were regarded as the tutelary divinities (Θεοὶ σωτῆρες) of sailors (Xenoph. *Sympos.* viii, 29). They appeared in heaven as the constellation of *Gemini*. On shipboard they were recognised in the phosphoric lights called by modern Italian sailors *the fires of St. Elmo*, which play about the masts and the sails (Seneca, *Nat. Quæst.* i, 1; comp. Pliny, xi, 37). Hence the frequent allusions of Roman poets to these divinities in connection with navigation (see especially Horace, *Carm.* i, 3, 2, and iv, 8, 31). As the ship mentioned by Luke was from Alexandria, it may be worth while to notice that Castor and Pollux were specially honored in the neighboring district of Cyrenaica (*Schol.* Pind. *Pyth.* v, 6). In Catull. iv, 27, we have distinct mention of a boat dedicated to them (see also lxviii, 65). In art, these divinities were sometimes represented simply as stars hovering over a ship, but more frequently as young men on horseback, with conical caps, and stars above them (see the coins of Rhegium, a city

Silver Bruttian Coin, with the Heads of Castor and Pollux; also their Figures mounted.

of the Bruttii, at which Paul touched on the voyage in question, verse 13). Such figures were probably painted or sculptured at the bow of the ship (hence παράσημον: see Smith, *Dict. of Class. Antiq.*, s. v. Insigne). This custom was very frequent in ancient ship-building. See SHIP. Herodotus says (iii, 37) that the Phœnicians used to place the figures of deities at the bow of their vessels. Virgil (*Æneid*, x, 209) and Ovid (*Trist.* i, 10, 2) supply us with illustrations of the practice; and Cyril of Alexandria (Cramer's *Catena*, ad l. c.) says that such was always the Alexandrian method of ornamenting each side of the prow. See DIOSCURI.

Casuistry is that branch of Christian morals which treats of *casus conscientiæ* (cases of conscience); that is to say, of questions of conduct in which apparently conflicting duties seem at first to perplex and disturb the moral faculty, and make it necessary to trace, with a careful exclusion of everything *but* moral considerations, the *consequences* of the rules of morality (Whewell, *History of Moral Philosophy*, xxiv). Kant calls casuistry "the dialectics of conscience." In this sense the word might have a good meaning; but its ordinary use is to designate sophistical perversion or evasion of the moral law. Pope supplies examples of both shades of signification, as, first, in the good sense:

"Who shall decide when doctors disagree,
And soundest *casuists* doubt, like you and me?"

Again, in the unfavorable sense:

"Morality by her false guardians drawn,
Chicane in furs, and *casuistry* in lawn."

But the theory of "collision of duties," on which this so-called science of casuistry rests, is unsound. Duty is one, though there may be various ways of performing it, and with regard to these, instruction and guidance of course may be needed. What appears to be collision of duties is generally only a collision between duty and inclination. In true Christian ethics, principles of life are set forth, not rules for individual cases. There is nothing like casuistry in the moral teaching of Christ and his apostles. If the "eye be single, the whole body will be full of light;" and if the ultimate aim of man be to do the will of God, this aim, by the aid of the divine Spirit, will clear up all special perplexities as they arise. "When truth must be dealt out in drams or scruples, the health of the soul must be in a very feeble and crazy condition." Bishop Heber tells us that when Owen was dean of Christ Church, a regular office for the satisfaction of doubtful consciences was held in Oxford, to which the students at last gave the name of "Scruple shop" (Heber's *Works of Jeremy Taylor*, i, 270). "The cure for diseased consciences is not to be found in a 'scruple shop,' but in the love and care of the great Physician. The law of love, under the guidance of the Holy Spirit, is a solvent of all subordinate moral questions in the practice of life. For the application of this law our

reason must be constantly and carefully used" (Wesley, *Works*, ii, 129).

2. *Casuistry in the Church of Rome.*—As the Roman doctrines of penance and absolution grew up in the Middle Age, *casuistry* grew up also, in the form of decisions on special cases of moral difficulty. "The schoolmen delighted in this species of intellectual labor. They transferred their zeal for the most fanciful and frivolous distinctions in what respected the doctrines of religion to its precepts; they anatomized the different virtues; nicely examined all the circumstances by which our estimate of them should be influenced; and they thus rendered the study of morality inextricable, confounded the natural notions of right and wrong, and so accustomed themselves and others to weigh their actions, that they could easily find some excuse for what was most culpable, while they continued under the impression that they were not deviating from what, as moral beings, was incumbent upon them" (Watson, *Theol. Dictionary*, s. v.). The works which contained collections of cases of conscience, and of which the title commonly was *Summa Casuum Conscientiæ*, or something resembling this, were compiled at first for the use of Roman confessors. It was requisite for them to know, for instance, in what cases penance of a heavier or lighter kind was to be imposed; and what offences must, for the time, exclude the offender from the communion. The first systematic work on casuistry was that of *Raymond of Pennaforti*, who published a *Summa de Casibus Pœnitentialibus*, which came into very general use in the 13th century, largely followed by succeeding casuists. In the 14th and 15th centuries the number of such books increased very greatly. "These *Summæ* were in common speech known by certain abbreviated names, borrowed from the name of the author or his birthplace. Thus there was the *Astesana*, which derived its name from its author, Astesanus, a Minorite of Asti, in Piedmont (Nuremburg, 1482); the *Angelica*, compiled by Angelus de Clavasio, a Genoese Minorite (Nuremb. 1492); the *Pisana* or *Pisanella*, which was also termed *Bartholina* or *Magistruccia* (Par. 1470); the *Pacifica* (Venice, 1574), the *Rosella*, the *Sylvestrina*." In these works the subjects were usually arranged alphabetically, and the decisions were given in the form of responses to questions proposed, the opinions being often quoted from or supported by the authority of the Scriptures, or the fathers, or schoolmen. There was no attempt to lay down general principles which might enable the inquirer to determine for himself the matter by which his conscience was disturbed. The lay disciple was supposed to be in entire dependence upon his spiritual teachers for the guidance of his conscience, or, rather, for the determination of the penance and mortification by which his sins were to be obliterated. Moreover, a very large proportion of the offences which were pointed out in such works were transgressions of the observances required by the Church of those days, and referred to matters of which conscience could not take cognizance without a very considerable amount of artificial training. Questions of rites and ceremonies were put upon an equal footing with the gravest questions of morals. The Church had given her decision respecting both; and the neglect or violation of her precepts, and of the interpretations of her doctors, could never, it was held, be other than sinful. Thus this body of casuistry was intimately connected with the authority and practices of the Church of Rome, and fell into disuse along with them (Whewell, l. c.).

After the Reformation, the vices of the casuistical system developed themselves in the Church of Rome more fully than ever before. The so-called *Moral Theology* really poisoned the very fountains of morality. See JESUITS; PASCAL. The abbé Maynard published in 1851 a defence of the Jesuits and of their casuistry, under the title *Les Provincials et leur refutation* (2 vols. 8vo), which is ably reviewed in the *Christian Remembrancer* (July, 1852), from which we take the following passage: "The first source of the Jesuitical casuistry is to be sought in the inherited habits of thought which had been formed in the Middle-age schools. Conditions, restrictions, distinctions multiplied, of course; but so did the authorities and decisions, inventing doubts, extending liberty, and taking away scruples. Its next cause was the practical need of casuistry (under the Romish system)—the endeavor to fix what cannot be fixed—the limits, in every possible case, of mortal sin. Doubtless moral questions are very important and often very hard. But there are endless questions on which no answer can be given except a bad one—which cannot be answered in the shape proposed at all. We may think it very desirable to be able to state in the abstract, yet for practical use, the extreme cases, which excuse killing, or taking what is not our own; but if we cannot get beyond decisions which leave the door open for unquestionable murders or thefts, or shut it only by vague verbal restrictions, unexplained and inexplicable, about '*prudence*,' and '*moderation*,' and '*necessity*,' and '*gravity of circumstances*,' it is a practical illustration of the difficulty of casuistry, which seems to point out that, unless we can do better, we had best leave it alone. But these men were hard to daunt. They could not trust the consciences of mankind with principles of duty, but they could trust without a misgiving their own dialectic forms, as a calculus which nothing could resist. The consequence was twofold. Their method often *did* fail, and in the attempt to give exact formulæ of right and wrong action, they proved unable to express the right without comprehending the wrong with it. From all evil designs the leaders, at any rate, may be safely absolved; though whether they did not lose their sense of the reality of human action in the formal terms in which they contemplated it, may be a question. But, though the *design* of corrupting morality is one of the most improbable charges against any men, the *effect* may more easily follow, even where not intended. These casuists would not trust the individual conscience, and it had its revenge. They were driven onward till they had no choice left between talking nonsense, or what was worse. They would set conscience to rights in minutest detail, and so they had to take the responsibility of whatever could not be set to rights. Nature outwitted them; it gave up its liberty in the gross, and then forced them to surrender it again in detail. And thus, at length, under the treatment of compilers and abridgers, and under the influence of that idea of authority which deferred to *opinions* on the same rule as it deferred to *testimony*—exhibited in the coarsest brevity, and with the affectation of outbidding the boldest precedents—grew up that form of casuistry which is exhibited in the Escobars and Baunys; which, professing to be the indispensable aid to common sense, envelops it in a very Charybdis of discordant opinions; amid whose grotesque suppositions, and whimsical distinctions, and vague yet peremptory rules, bandied about between metaphysics and real life, the mind sinks into a hopeless confusion of moral ideas, and loses every clew to simple and straightforward action."

The principal casuists of the Roman Church are Vasquez († 1604), Sanchez († 1610), Suarez († 1617), Laymann († 1635), Filliucius († 1622), Bauny († 1649), Escobar († 1669), Busenbaum († 1669). Most of these names are immortalized in Pascal's *Provincial Letters* (see also each name in its proper place in this Cyclopædia). See also Migne, *Dictionnaire de cas de Conscience* (Paris, 1847, 2 vols. 4to). The books of so-called *Moral Theology*, in the Roman Catholic Church, are generally repertories of casuistry. The most important of them of late are Ligorio, *Theologia Moralis* (Paris, 1852, 6 vols. 12mo); Gury, *Casus Conscientiæ* (Lyons, 1866, 2 vols. 8vo).

3. *Protestant Casuistry.*—The Reformation, of course,

brought the office of such casuistry to an end. "The decision of moral questions was left to each man's own conscience; and his reponsibility as to his own moral and spiritual condition could no longer be transferred to others. For himself he must stand or fall. He might, indeed, aid himself by the best lights which the Church could supply—by the counsel of wiser and holier servants of God; and he was earnestly enjoined to seek counsel of God himself by hearty and humble prayer. But he could no longer lean the whole weight of his doubts and his sins upon his father confessor and his mother Church. He must ascertain for himself what is the true and perfect law of God. He could no longer derive hope or satisfaction from the collections of cases, in which the answer rested on the mere authority of men fallible and sinful like himself. Thus the casuistical works of the Romanists lost all weight, and almost all value, in the eyes of the Reformed churches. Indeed, they were looked upon, and justly, as among the glaring evidences of the perversions and human inventions by which the truth of God had been disfigured. But even after the sophistry and the moral perversion connected with casuistry were exploded, the form of that science was preserved, and many valuable moral principles in conformity to it delivered. The writers of the Reformed churches did not at first attempt to substitute anything in the place of the casuistical works of the Romish Church. Besides an aversion to the subject itself, which, as remarked above, they naturally felt, they were, for a considerable period after the Reformation, fully employed upon more urgent objects. If this had not been so, they could not have failed soon to perceive that, in reality, most persons do require some guidance for their consciences, and that rules and precepts, by which men may strengthen themselves against the temptations which cloud the judgment when it is brought into contact with special cases, are of great value to every body of moral and Christian men. But the circumstances of the times compelled them to give their energies mainly to controversies with the Romish and other adversaries, and to leave to each man's own thoughts the regulation of his conduct and feelings." —Whewell, *History of Moral Philosophy in England* (Lond. 1852, 1 vol. 8vo, p. xxviii sq.).

In the writings of the early reformers (e. g. Melancthon and Calvin) there may be found moral directions approaching to casuistry. But the first regular treatise on casuistry in the Protestant Church was Perkins, *The whole Treatise of Cases of Conscience, distinguished into three Books* (Lond. 1602, 1606; also in his *Works*, vol. ii, Lond. 1617; in Latin, Hanov. 1603; and in *Perkinsii Opera*, Geneva, 1624). See PERKINS. He was followed by Henr. Alstedius (Reformed), *Theologia Casuum*, in 1621 (Hanover, 4to); F. Balduinus, *Tract. de Casibus Conscientiæ* (Vitemb. 1628, 4to; Lips. 1684, 4to); Amesius (Ames, q. v.), *De Conscientia, ejus jure et Casibus* (Amst. 1630); Osiander, *Theologia Casualis* (Tübingen, 1680, 8vo). For other writers on casuistry in the Lutheran and Reformed churches, see Walch, *Bibliotheca Theologica*, vol. ii, cap. vi. In the Church of England we find bishop Hall, *Resolutions and Decisions of divers practical Cases of Conscience* (Lond. 1649, 8vo); bishop Sanderson, *Nine Cases of Conscience* (London, 1678, sm. 8vo); Jeremy Taylor, *Ductor Dubitantium, or Rule of Conscience* (*Works*, Heber's edition, vols. xii-xiv). To casuistry belongs also Baxter's *Christian Directory, a Sum of Practical Theology* (fol. 1673; and in Baxter's *Practical Works*, vols. ii-vi; transl. into German, Frankf. 1693, 4to). Dickson, professor at Edinburgh, had previously published *Therapeutica Sacra* (Latin, 1656; English, 1695), a work which Baxter lauds highly. There is still at the University of Cambridge, England, a professorship of *Moral Theology* or *Casuistical Divinity*, which was held by the late Dr. Whewell. See Whewell, *Lectures on the History of Moral Philosophy in England* (Lond. 1852, 8vo); Winer, *Theolog. Literatur*, vol. i, § xiii, d.; Herzog, *Real-Encyklopädie*, ii, 607, 787; Orme, *Life of Baxter*, vol. ii, ch. v; Hagenbach, *Theolog. Encyklopädie*, § 94; Stäudlin, *Geschichte der theol. Wissenschaften*, i, 842 sq.; Schweitzer, in *Studien u. Kritiken*, 1850, p. 554; Gass, in *Illgen's Zeitschrift*, xii, 152; Bickersteth, *Christ. Student*, p. 468.

Casus Reservāti (*cases reserved*), in the Roman Church, are cases of sin such as an ordinary confessor (q. v.) cannot absolve, but only an ecclesiastic of high rank, or one specially authorized by the pope for the purpose. See *Canons of Trent*, sess. xiv, ch. vii.

Cat (αἴλουρος, so called, according to Phavorinus, from *moving its tail*), an animal mentioned only in Baruch vi, 22, as among those which defile the gods of the heathen with impunity (see below). They are alluded to, however, in the Targum (at Isa. xiii, 22; Hos. ix, 6) under the name *chathul'*, חַתּוּל, Arabic *chaytal*. Martial (xiii, 69) makes the only mention of *catta* in classical writers. Bochart (*Hieroz.* ii, 206 sq.) thinks that by the word צִיִּים, *tsiyim'*, in Isa. xiii, 21; xxxiv, 14; Jer. l, 39, and Psa. lxxiv, 14, some species of cats are meant; but this is very doubtful (Michaelis, *Suppl.* p. 2086). See BEAST. The Greek αἴλουρος, as used by Aristotle, has more particular reference to the wild cat (*Felis catus*, etc.). Herodotus (ii, 66) uses αἴλουρος to denote the domestic animal; similarly, Cicero (*Tusc.* v, 27, 78) employs *felis*; but both Greek and Latin words are used to denote other animals, apparently some kinds of marten (*Martes*). The context of the passage in Baruch appears to point to the domesticated animal. Perhaps the people of Babylon originally procured the cat from Egypt, where it was a capital offence to kill one (Diod. Sic. i, 83).—Smith, s. v. See ANIMAL WORSHIP. The Egyptians treated it as a divinity, under the denomination of *Pasht*, the Lunar Goddess, or Diana, holding every domesticated individual sacred, embalming it after death, and often sending it for interment to Bubastis (see Jablonski, *Panth. Æg.* ii, 66). Yet we find the cat nowhere mentioned in the canonical books as a domestic animal. In Baruch it is noticed only as a tenant of pagan temples, where, no doubt, the fragments of sacrificed animals and vegetables attracted vermin, and rendered the presence of cats necessary. With regard to the neighboring nations, they all had domestic cats, derived, it is presumed, from a wild species found in Nubia, and first described by Ruppel under the name of *Felis maniculata*. Two specimens are here given from these

Nubian Wild Cat (*Felis Maniculata*).

Ancient Egyptian domestic Cats.

paintings: one clearly a cat; the other, in the original, figured as catching birds, acting like a retriever for his master, who is fowling in a boat (Wilkinson, *Anc. Eg.* abridgm. i, 236, 237). It is not apparently a cat, but a species of *gennet* or *paradoxurus*, one of the genera before hinted at. Both are nearly allied to the celebrated *ichneumon*, the *herpestes* of authors, the modern *nems*, which is even now occasionally domesticated; it differs in manners, for the *herpestes pharaonis* does not frequent the uplands, but willingly takes the water. See EGYPT.

Catabaptists (*κατά*, *against*, and *βαπτιστής*), a general name sometimes used to designate all who deny the necessity of Christian baptism.

Catacombs, subterranean places of burial, generally found in regions of soft and easily excavated rock, such as granular tufa. The oldest are in Egypt; others are to be found in Syria, Malta, Persia, Greece, and South America. It is likely that most of them were originally quarries, which afterwards came to be used as places of burial for the dead or as hiding-places for the living. When the word catacombs is used alone, it applies generally to those of Rome, the soil around which city is undermined in various places, and the long labyrinths thus formed are "The Catacombs." There are catacombs at Naples resembling those at Rome; and also at Palermo and Syracuse. This article is devoted entirely to the Catacombs of Rome.

I. *The Word Catacombs.*—The derivation of the word is uncertain. Some find it in *κατά*, *down*, and *τύμβος*, *mound*, *tomb*; others in *κοιμάω*, *to go to sleep*; or, as Marchi (*Monum.* p. 209), Lat. *cumbo*, part of *decumbo*, I lie down; others in *κατά* and *κύμβη*, a *hollow*, *canoe*, as from the resemblance of a sarcophagus to a boat (Schneider, *Lex. Græc.*, s. v. *κύμβη*). The name catacombs was first applied to the underground burial-places in the sixth century; before that date they were called *crypts* (*κρύπται*, secret places); *cemeteries* (*κοιμητήρια*, sleeping-places).

II. *Origin of the Catacombs.*—It is likely that some, at least, of the catacombs were originally the sand-pits and quarries from which building materials for use in the city had been taken. As the Romans burned their dead to ashes, they did not bury underground; but it is believed that the bodies of slaves and of executed criminals were sometimes thrown into the old quarries. This view was formerly held by the chief Roman Catholic writers on the Catacombs, e. g. Bosio, Aringhi, and Boldetti; but of late, since the publication of Padre Marchi's great work on the monuments of Rome, the writers of that school object to this origin for *any* of the catacombs, and call it a Protestant calumny (e. g. Bergier, *Dict. de Théologie*, i, 374). But Protestants and Romanists are alike interested in getting at historical truth; nor would either class be likely to stigmatize the early Christians, the common religious ancestry of all believers. The Jews in Rome and elsewhere retained the custom of burying their dead instead of burning them; and they probably began using catacombs in the vicinity of Rome before the time of Christ, or immediately after. In the 16th century Bosio discovered a Jewish catacomb outside of the ancient Porta Portuensis; and in 1862 another was opened on the Via Appia, outside of the Porta Capena. Its form is like that of the Christian catacombs; but, instead of the Christian symbols, the seven-branched candlestick and other Jewish emblems are sculptured on the slabs that close the tombs. The Etruscans, centuries before, had made use of rock-tombs or catacombs, as seen at Civita Castellana, Falieri, and other Etruscan cities. There is nothing more likely or natural than that, in the first persecutions, the Christians should have buried their dead in excavations previously made by Pagans; that they should afterwards have enlarged these excavations; and, finally, that they should have made new ones as their necessities, in the lapse of time, demanded. It is certain that in the catacombs at Naples there are found tiers of tombs, some of which are clearly Pagan, and have Pagan symbols and inscriptions, while others are as clearly Christian. The argument, on the other hand, for the theory that the early Christians themselves excavated *all* the catacombs, is well stated in Martigny, *Dict. des Antiq. Chrétiennes*, p. 118 et seq. It certainly appears settled that many, if not most of the existing catacombs, were excavated by the Christians of the first three centuries. Their dates can be approximately ascertained by several criteria:

1. The style of some of the fresco paintings on the walls belongs to the third century, or even to the latter half of the second, while it is to be presumed that the crypts were excavated many years before the paintings were executed.

2. Some of the symbols which have been discovered belong to the earliest dates of the Christian history, and some of the coins bear the effigy of Domitian († 96), and even of earlier emperors; other inscriptions and paintings as clearly show later dates.

3. Inscriptions marked with consular dates. Among eleven thousand epitaphs in De Rossi's collection, about three hundred range from A.D. 71 up to the middle of the 4th century. For these and other reasons it is believed that the origin of the oldest Christian catacombs coincides with the dates of the earliest persecutions, e. g. that of Nero. Martigny puts in a much more doubtful argument, drawn from the burial-place of St. Peter, which, as he says, became the veritable nucleus of the Vatican catacombs. It is probable that the catacombs, such as we now know them, were all excavated before the 5th century. In that and the following century no new catacombs were dug, but the old ones were repaired; walls were built to support their roofs, and passages for light and air were opened to the surface of the ground.

III. *Early Uses.*—The Catacombs have served three distinct purposes:

1. *As places of burial.*—These underground receptacles consist of long galleries, with transverse corridors connecting them. These passages are sometimes regular for a considerable distance, but the multiplication of cross alleys and branches at last forms a labyrinth in which it is rash to venture without a guide. These galleries and corridors are of various lengths and heights, generally seven to eight feet high, and three to five wide. The roof is supported by that part of the tufa which is left between the passages, and in these walls the tombs (*loculi*) are excavated. In most cases the tomb is just large enough for a single corpse; in some tombs, however, two or more skeletons have been found. The number of graves in each tier depends on the height of the wall; there are commonly three to five; but even twelve are found in one instance. The tomb is closed up, either with a slab of marble (as in Fig. 3) or with large bricks (as in Fig. 2). Inscriptions and emblems are found sculptured or painted on many of the slabs (see Fig. 3) and in some cases a

Catacombs. Fig. 1.

Catacombs. Fig. 2.

small vase (Fig. 2), supposed to have held blood, is found attached to the end of the tomb.

CYRIACÆ DVLCISSIMÆ DEPOSIÆ
IN PACE VIXIT ANNOS XXXV
IDIBVS MARTIIS

Catacombs. Fig. 3.

Besides the *loculi* in the corridors and passages, there are also larger spaces (called *arcosolia*), having an arch over the tomb, or over a sarcophagus, hollowed out of the wall. There are also larger sepulchral chambers, called *cubicula*, of various shapes—square, triangular, semicircular, etc. These were doubtless family vaults; their walls are full of separate *loculi*. On the arch in front was a family inscription; e. g. on one found in the Catacombs of St. Agnes is the title *Cubiculum Domitiani;* while the separate *loculi* within had their individual inscriptions.

2. *As Places of Worship in Times of Persecution and Trouble.*—Chambers are found adapted to this purpose, some capable of holding a small assembly of worshippers, and others having room for but a few, who probably went there to commemorate the dead buried in the crypts. In some cases there is an opening from these crypts to the upper air sufficient to let in light, but commonly they were illuminated by lamps suspended by bronze chains from the roof. Cisterns and wells are sometimes found in them which served for use in baptisms. "The superstitious reverence which in later times was paid to the relics of martyrs was perhaps owing, in some measure, to the living and the dead being brought into so close contact in the early ages, and to the necessity of the same place being used at once for the offices of devotion and for burial" (Burton, *Eccles. History*, p. 341). In later times churches were built over the entrances to the chief catacombs; e. g. St. Peter's, over those of the Vatican; St. Paul's, over those of St. Lucina; St. Agnes, over the catacombs which bear her name, and in which, according to tradition, she was buried.

3. *As Places of Refuge.*—It is among the Roman traditions that Pope Stephen long dwelt in the Catacombs, held synods there, and was finally killed in his episcopal chair. Even after the establishment of the Church under Constantine, the Catacombs served for places of refuge for various popes in times of trouble. Liberius, it is said, lived a year in the cemetery of St. Agnes; and in the beginning of the fifth century, during one of the many disputes for the papal chair, Boniface concealed himself in one of the catacombs. There is little doubt that large numbers of Christians took refuge in the Catacombs during the early persecutions. A Protestant writer remarks that in the preparation of these vast caverns we may trace the presiding care of Providence. "As America, discovered a few years before the Reformation, furnished a hiding-place of refuge to the Protestants who fled from ecclesiastical intolerance, so the catacombs, reopened shortly before the birth of our Lord, supplied shelter to the Christians in Rome during the frequent proscriptions of the second and third centuries. When the Gospel was first propagated in the imperial city its adherents belonged chiefly to the lower classes; and, for reasons of which it is now impossible to speak with certainty, it seems to have been soon very generally embraced by the quarrymen and sand-diggers. It is probable that many were condemned to labor in those mines as a punishment for having embraced Christianity (see Lee's *Three Lectures*, Dublin, p. 28; Maitland's *Church in the Catacombs*, p. 24. Dr. Maitland visited Rome in 1841, but his inspection of the Lapidarian Gallery seems to have been regarded with extreme jealousy by the authorities there). Thus it was when persecution raged in the capital; the Christian felt himself comparatively safe in the catacombs. The parties in charge of them were his friends; they could give him seasonable intimation of the approach of danger, and among these 'dens and caves of the earth,' with countless places of ingress and egress, the officers of government must have attempted in vain to overtake a fugitive" (Killen, *The Ancient Church*, p. 350).

IV. *Number and Extent of the Catacombs.*—The actual number of catacombs has never been accurately known. Aringhi, followed by other writers, gave the number as high as sixty, but without proof. De Rossi's list gives forty-two, only twenty-six of which are extensive, while five date after the peace secured for the Church under Constantine, mostly within a circle of three miles from the modern walls; the most remote being that of St. Alexander, about six miles on the Via Nomentana. It was formerly held that the catacombs around Rome were connected together in a vast system, but De Rossi has shown that there is no such connection. The most remarkable catacombs are *on the left bank* of the Tiber; viz. the catacombs of Sts. Julius, Valentinus, Basilla, Gianutus, Priscilla, Brigida, Agnes, Hippolytus, Peter, and Marcellinus, etc. On the Via Appia are the extensive catacombs of Pretextatus, Callistus (not far from the latter is an interesting Jewish catacomb, discovered in 1859), Sts. Nereus and Achilleus, and others. On the *right bank* there are few catacombs of interest except those of the Vatican. Tradition fixes upon this as the spot where St. Peter was buried; and in the belief of this tradition the church of St. Peter was built on the neighboring hill. The modern cemetery of the Vatican is over the more ancient one, contrary to the general rule. The number of bodies deposited in the catacombs cannot, of course, be accurately ascertained. P. Marchi estimates it at six millions. Michele di Rossi calculates, from carefully-gathered data, that the total length of all the galleries known to exist near Rome is 957,600 yards, equal to about 590 miles, but only a small part of this vast range has been explored.

V. *Inscriptions and Symbols.*—For a specific account of the inscriptions and symbols of the Catacombs, see the articles INSCRIPTIONS; SYMBOLISM. The collections of the Vatican and the Lateran contain multitudes of these remains, which can now be studied in De Rossi's *Inscriptiones Christianæ Urbis Romæ* (1861), and in other works named at the end of this article. On most of the slabs is found the Constantinian monogram of Christ ☧, or *α* ☧ *ω*. The sculptures and paintings are either historical or symbolical. Among the former, from the Old Testament, are the fall of Adam and Eve, Noah in the ark, the sacrifice of Abraham, Moses striking the rock, the story of Jonas, Daniel in the lions' den, the three Israelites in the furnace, the ascent of Elias, etc. From the New Testament, the Nativity, the adoration of the Magi, the change of water into wine, the multiplication of loaves, the healing of the cripple, the raising of Lazarus, Christ entering Jerusalem on an ass, Peter denying Christ, between two Jews; the arrest of Peter, Pilate washing his hands; in one instance (on a sarcophagus), the soldiers crowning our Lord in mockery, but a garland of *flowers* being substituted for the crown of thorns. No *Crucifixion* occurs among the remains; nor does the Virgin Mary or St. Peter appear before the fourth century.

"Turning to the purely symbolic, we find most frequently introduced, the lamb (later appearing with the nimbus round its head), and the various other forms in which faith contemplated the Redeemer, namely, the good shepherd, Orpheus charming wild animals with his lyre, the vine, the olive, the rock, a light, a column, a fountain, a lion; and we may read seven poetic lines by Pope Damasus enumerating all the titles or

symbols referring to the same divine personality, comprising, besides the above, a king, a giant, a gem, a gate, a rod, a hand, a house, a net, a vineyard. But, among all others, the symbol most frequently seen is the fish. See ICHTHUS. We find also the dove for the Holy Spirit, or for beatified spirits generally; the stag, for the desire after baptism and heavenly truth; candelabra, for illumination through the Gospel; a ship, for the Church—sometimes represented sailing near a light-house, to signify the Church guided by the source of all light and truth; a fish swimming with a basket of bread on its back, for the eucharistic sacrament; the horse, for eagerness or speed in embracing divine doctrine; the lion, for martyr fortitude, or vigilance against the snares of sin (as well as with that higher allusion above noticed); the peacock, for immortality; the phœnix, for the resurrection; the hare, for persecution, or the perils to which the faithful must be exposed; the cock, for vigilance—the fox being taken in a negative sense for warning against astuteness and pride, as the dove (besides its other meanings) reminded of the simplicity becoming to believers. Certain trees also appear in the same mystic order: the cypress and the pine, for death; the palm, for victory; the olive, for the fruit of good works, the lustre of virtue, mercy, purity, or peace; the vine, not only for the eucharist and the person of the Lord, but also for the union of the faithful in and with him" (Hemans, in *Contemp. Review*, Sept. 1866).

As to the spirit of the inscriptions and symbols, two things are to be noticed: 1. Their entire opposition to the Pagan spirit. 2. Their almost entire freedom from the later Romanist errors. As to the first, the inscriptions on Pagan tombs are remarkable for their painful exhibition either of despair or of rebellion against the Divine will: for instance, one taken from the right-hand wall of the Lapidarian gallery: "CAIUS JULIUS MAXIMUS, *(aged) two years and five months. O relentless fortune, who delightest in cruel death, why is* MAXIMUS *so suddenly snatched from me? He who lately used to lie joyful on my bosom. This stone now marks his tomb —behold his mother.*" In the Christian inscriptions, on the other hand, we find expressions of hope, peace, resignation, but nothing of despair, hardly even sorrow. "'Vivis in Deo,' most ancient in such use; 'Vive in æterno;' 'Pax spiritu tuo;' 'In pace Domini dormis,' frequently introduced before the period of Constantine's conversion, but later falling into disuse; 'In pace' continuing to be the established Christian formula, though also found in the epitaphs of Jews; while the 'Vixit in pace,' very rare in Roman inscriptions, appears commonly among those of Africa and of several French cities, otherwise that distinctive phrase of the Pagan epitaph, 'Vixit' (as if even in the records of the grave to present life rather than death to the mental eye), does not pertain to Christian terminology" (Hemans, l. c.).

As to the other point, the freedom from later Roman doctrines and superstitions, we take the following passage from Killen (*The Ancient Church*, p. 351 sq.): "These witnesses to the faith of the early Church of Rome altogether repudiate the worship of the Virgin Mary, for the inscriptions of the Lapidarian Gallery, all arranged under the papal supervision, contain no addresses to the mother of our Lord (Maitland, p. 14). They point only to Jesus as the great Mediator, Redeemer, and Friend. Farther, instead of speaking of masses for the repose of souls, or representing departed believers as still to pass through purgatory, the inscriptions describe the deceased as having entered immediately into eternal rest. 'Alexander,' says one of them, 'is not dead, but lives beyond the stars, and his body rests in this tomb.' 'Here,' says another, 'lies Paulina, in the place of the blessed.' 'Gemella,' says a third, 'sleeps in peace.' 'Aselus,' says a fourth, 'sleeps in Christ' (Maitland, pp. 33, 41, 43, 170). On a third point, viz. celibacy, we gather the following testimony from the tombs. Hippolytus tells us (*Philosophumena*, lib. ix) that, during the episcopate of Zephyrinus, Callistus was 'set over the cemetery.' This was probably considered a highly important trust, as, in those perilous times, the safety of the Christians very much depended on the prudence, activity, and courage of the individual who had the charge of their subterranean refuge. The new curator seems to have signalized himself by the ability with which he discharged the duties of his appointment; he probably embellished and enlarged some of these dreary caves; and hence a portion of the Catacombs was designated 'the cemetery of Callistus.' Hippolytus, led astray by the ascetic spirit beginning so strongly to prevail in the commencement of the third century, was opposed to all second marriages, so that he was sadly scandalized by the exceedingly liberal views of his Roman brother on the subject of matrimony; and he was so ill-informed as to pronounce them novel. 'In his time,' says he indignantly, 'bishops, presbyters, and deacons, though they had been two or three times married, began to be recognised as God's ministers; and if any one of the clergy married, it was determined that such a person should remain among the clergy as not having sinned' (*Philosophumena*, lib. ix. Tertullian corroborates the charge of Hippolytus, *De Pudicitia*, cap. 1). We cannot tell how many of the ancient bishops of the great city were husbands. We know, however, that, long after this period, married bishops were to be found almost everywhere. One of the most eminent martyrs in the Diocletian persecution was a bishop who had a wife and children (Eusebius, lib. viii, c. 9). Clemens Romanus speaks as a married man (*Ep. ad Cor.* § 21). But the inscriptions in the Catacombs show that the primitive Church of Rome did not impose celibacy on her ministers. There is, for instance, a monument 'To Basilus, the presbyter, and Felicitas, his wife;' and on another tombstone, erected about A.D. 472, or only four years before the fall of the Western Empire, there is the following singular record: 'Petronia, a deacon's wife, the type of modesty. In this place I lay my bones: spare your tears, dear husband and daughters, and believe that it is forbidden to weep for one who lives in God' (Maitland, p. 191-193; Aringhi, i, 421, 419). 'Here,' says another epitaph, 'Susanna, the happy daughter of the late presbyter Gabinus, lies in peace along with her father' (Aringhi, ii, 228; Rome, 1651). In the Lapidarian Gallery of the Vatican there are other epitaphs to the same effect."

The doctrinal lessons to be drawn from the Catacombs are also treated in two articles in the *Revue Chrétienne* (15 Mai, 1864; 15 Juin, 1864), by Roller, who, after a careful study of the conformation, etc. of the Catacombs, and of their tombs, chapels, etc.; of the inscriptions, of the paintings, and, finally, of the sarcophagi, with their sculptures, arrives at the following conclusions: The use of the Catacombs as places of worship dates from the 3d century; the substitution of the altar for the communion-table dates from the 4th. The Episcopal *Cathedra* appears at about the beginning of the 5th century. No specifically Romanist doctrine finds any support in inscriptions dating before the 4th century. We begin to trace signs of saint-worship in the 5th century. The first idea of the transmission of power from Christ to Peter dates from the latter part of the 5th to the beginning of the 6th, and even then Peter's figure does not appear armed with the keys, as in the later symbolism. Finally, Protestantism has every thing to gain, and nothing to lose, from the most thorough study of the remains gathered with so much care from the Catacombs by the authorities of the Church of Rome.

VI. *Later History and Literature.*—1. *Middle Age.*—After the 6th century no additions seem to have been made to the Catacombs. After a corridor or passage was filled, it appears to have been blocked up with stone. The irruption of the barbarians seems to coin-

cide with the disuse of the ancient cemeteries as burial-places, and they fell into neglect and ruin. Pope Paul I († 767) removed the bones of many martyrs and so-called saints from the Catacombs, and distributed them among churches and monasteries. But the tombs of the martyrs continued to be objects of reverence, and pilgrimages were made to them, especially to those of St. Sebastian, over which a church had been built, and which remained accessible. The Crusaders thronged the subterranean corridors, and carried off bones of the dead in such numbers that the popes denounced the act as a crime for which the penalty should be excommunication. With these exceptions, the Catacombs may be said to have been almost entirely forgotten for several centuries. Their ingresses became, for the most part, unknown even to the clergy; and one of the earliest records of their being visited in later ages is found in the names of Raynuzio Farnese (father of Paul III) and others, marked by an inscription in the Catacombs of St. Callistus, of date 1490.

2. *Modern Scientific Exploration.*—In 1578 a Dominican named Alphonse Ciacconio, learning that a cemetery (St. Priscilla's) had been opened on the Salarian Way, made a partial exploration of it, and gave designs of sculptures, etc. found in it. About 1590 he was joined by a young Frenchman named Wingh. But Antonio Bosio († 1600) was the real founder of the modern study of the Catacombs. He devoted to it thirty years of labor, the fruits of which appeared only after his death, in *Roma Sotterranea*, compiled from Bosio's MSS. by Severano, an Oratorian priest (Roma, 1632, 1 vol. fol.), and subsequently another Oratorian, Aringhi, brought out, with additions, the same work in Latin (Rome, 1651, 2 vols. fol.; Cologne, 1659, 2 vols. fol.). The works of Bosio and Aringhi were like a revelation to the learned world, and gave a great impulse to archæological studies. In 1702 appeared Fabretti's *Inscriptiones Antiquæ*, and in 1720 *Cimiteri dei Santi Martiri*, by Boldetti, the fruit of thirty years' labor. The *Sculture e Pitture Sacre* (Sacred Sculptures and Paintings from the Cemeteries of Rome, 3 vols. fol.), by Bottari (1737-54), is a very valuable and fully illustrated work, using Bosio's materials, and even his copper-plates. Original sketches of sculptures from the Catacombs are given by D'Agincourt, *Histoire d'art par les Monuments* (Paris, 1811-23, 6 vols. fol.). But in the eighteenth century little was done for the exploration or illustration of the Catacombs, and it is only since 1820 that the research has been carried on in a really scientific way, and the honor of this is largely due to the Jesuit padre Giuseppe Marchi, whose *Monumenti Primitiri delle Arte Christiane* (Roma, 1844, 70 plates, 4to) is confined wholly to the topography and architecture of the Catacombs. It was to have been followed by a second volume on the paintings, and a third on the sculptures. The French government has been at the expense of publishing, under the patronage of the Academy of Inscriptions, the finely-illustrated work of Perret, *Les Catacombes de Rome* (Paris, 1852-3, 6 vols. fol.), a work of more artistic than original scientific value, but yet exceedingly valuable for study. The 5th volume gives 430 Christian inscriptions, carefully reproduced. But all previous works are thrown into the shade by those of Chevalier G. B. di Rossi, who has given many years to personal research in the Catacombs (aided by his brother Michele di Rossi), and whose *Roma Sotterranea*, of which vol. i appeared in 1866 (4to, with Atlas of 40 plates), will, when completed (in 3 vols.), make the study of the Catacombs easy, without a personal visit to Rome. He has also published (under the patronage of Pius IX) *Inscriptiones Christianæ urbis Romæ* (1861, vol. i, fol.), containing the Christian inscriptions of Rome anterior to the 6th century. Among minor works are Northcote (Rom. Cath.), *The Roman Catacombs* (London, 1859, 2d ed. 12mo); Maitland, *Church in the Catacombs* (Lond. 1847, 2d ed. 8vo); Kip, *The Catacombs of Rome* (N. Y. 1854, 12mo); Bellermann, *Aelt. christliche Begräbnissstätten u. d. Katacomben zu Neapel* (Hamb. 1839). See also Murray, *Handbook of Rome*, § 35; Schaff, *Church Hist.* i, § 93; Rémusat, *Musée Chrétienne de Rome* (in *Rev. d. Deux Mondes*, 15 Juin, 1863); Jehan, *Dict. des Origines du Christianisme*, p. 212 sq.; Martigny, *Dict. des Antiquités Chrét.* p. 106 sq.; Lecky, *History of Rationalism*, i, 216 sq.; *English Review*, v, 476; *Edinburgh Rev.* vol. cix, p. 101; vol. cxx, p. 112 (Am. ed.); Bouix, *Theologie des Catacombes* (Arras, 1864). See CRYPTS; LOCULUS; INSCRIPTIONS; SYMBOLISM.

Catafalco (Ital. *a scaffold*), or CATAFALQUE, a temporary cenotaph of carpentry, intended to represent a tomb, and with decorations of sculpture, and painting or upholstery. It is employed in funeral ceremonies in the Church of Rome, especially in Italy.

Cataldus, bishop of Tarentum, a saint of the Roman calendar. According to one account, he was born in Ireland, and came to Italy in the fifth or sixth century. Marvellous stories of miracles and wonders are connected with his birth and history in the Tarentine traditions. See Hoefer, *Nouv. Biog. Générale*, ix, 141; Herzog, *Real-Encyklopädie*, supplem. p. 808; *Acta Sanctorum*, t. ii, Maii, p. 569.

Cataphrygians, a name anciently given to the Montanists, because Montanus first published his opinions in a village of Mysia, on the borders of Phrygia. See MONTANISTS.

Catechetical Instruction. See CATECHETICS; CATECHISM.

Catechetical Schools. See ANTIOCH and ALEXANDRIA (SCHOOLS OF).

Catechetics, CATECHIZATION. Catechetics is that part of the science of theology which treats of catechetical religious instruction (under Church authority), both with regard to theory and practice. It belongs to the department of Practical Theology.

1. *Name and Scope.*—The term is derived from κατηχέω, to *sound out aloud*; to *sound into one's ears*; and hence, in N. T., to *instruct orally* (1 Cor. xiv, 19; Gal. vi, 6, et al). In the N. T. the word applies to all kinds of oral instruction; but its derivatives, in later use, acquired a special application to instruction given to proselytes seeking baptism. Still later, the same terms came to apply to elementary instruction in Christianity, whether given to proselytes seeking baptism, or (and this chiefly) to baptized children in the Church. The act of giving such instruction is called *catechising*, or *catechization*. The person instructing is called a catechist (q. v.); the persons taught are called *catechumens* (q. v.); the substance of the instruction (in later times a small book) is called *The Catechism* (q. v.). It belongs to Catechetics, as a branch of theology, to treat of all these heads; but, for convenience of reference, we treat the three latter in separate articles, in their alphabetical order.

2. *History.*—The science of Catechetics, as such, can hardly be said to have taken its rise until after the Reformation. But as the necessities of the case gave rise to oral instruction in Christianity from the very beginning, and to the subsequent development of this instruction into a systematic branch of Church activity, we find indications of Catechetics at all periods.

(1.) *Before the Reformation.*—The first teaching of Christ and his apostles was necessarily oral, and partly homiletical, partly catechetical. But we find no mention in the N. T. of catechists as Church functionaries. In the second century we find mention of catechists and catechumens (e. g. in the *Clementines*, q. v.). Under the catechetical system of the fourth century, the catechumens were taught the Ten Commandments, a creed, or summary confession of faith, and the Lord's Prayer, with suitable expositions; but, prior to baptism, the nature of the sacraments was carefully concealed. See ARCANI DISCIPLINA; CATECHUMEN. The *Apostolical Constitutions* (q. v.) not only mention the

catechumens, but fix three years as the period of instruction (viii, 32). See ALEXANDRIA; ANTIOCH (SCHOOLS OF). In Gregory of Nyssa's († 394) λόγος κατηχητικὸς ὁ μέγας (ed. Krabinger, Monac. 1835), and in Cyril of Jerusalem's († 386) Κατηχήσεις (Catechetical discourses), we find catechetical instruction for both proselytes and newly-baptized persons. Augustine wrote a tract, *De Catechizandis rudibus* (opp. *ed. Bened.* t. vi). After the Church had become established, and its increase was obtained by the birth and baptism of children rather than by conversions from heathendom, the idea of catechetical instruction passed from being that of a preparation for baptism to being that of a culture of baptized children. When confirmation became general, catechetical instruction began to bear the same relation to it that it had formerly done to baptism. In the missions to heathens, in the Middle Age, it became usual to baptize converts at once, and the ancient catechumenate fell into disuse. Nor was great attention given to the catechizing of baptized children in the Roman Church up to the time of the Reformation; the confessional took the place of the Catechism. See CATECHISM. The names of Bruno, bishop of Würzburg (11th century), Hugo de St. Victore, Otto of Bamberg, and John Gerson, are to be mentioned as active in restoring catechetical instruction. The Waldenses, Wicliffites, and other reforming sects gave attention to the subject. On the Waldensian Catechism, see Zezschwitz, *Katechismen der Waldenser und Böhm. Brüder* (Erlangen, 1863); *Jahrbücher für deutsche Theologie*, ix, 2, 385.

(2.) *Since the Reformation.*—As the Reformation was a revival of religion for the human intellect as well as for the heart, it naturally followed that the training of children soon came to demand new methods, or the restoration of old methods, of grounding them in the faith. Luther was the father of modern catechetics, both by the Catechisms (q. v.) which he himself prepared, and by the writings in which he explained Catechetics and gave an impulse to their pursuit. The principal points of Luther's Catechisms are the Decalogue, the Creed, the Lord's Prayer, and the Sacraments (1529). Luther, with true insight, however, taught that catechization should not merely include the hearing of a recitation from the book, but also an explanation and an application of it to the hearts of the pupils (see prefaces to his larger and smaller Catechisms, and also Brüstlein, *Luther's Einfluss auf das Volksschulwesen*, etc., Jena, 1852). Calvin also published Catechisms (1536, 1541), and in the preface to the *Catechismus Eccles. Genevensis* he gave his views of the nature and design of Catechisms and of catechetical instruction at length. He defines the Catechism to be "formula erudiendi pueros in doctrina Christi" (Augusti, *Corpus. Libror. Symbolicor.* p. 460-464). The Reformed churches generally followed: e. g. the Heidelberg Catechism (1563) for the German Reformed; the Church of England Catechism (1553, 1572), etc. The Helvetic Confession (*brevis et simplex*) makes catechization a duty of positive obligation in the Church: ". . . pastores, qui juventutem mature et diligenter catechisant, prima fidei fundamenta jacientes, explicando Decalogum mandatorum Dei, Symbolum item Apostolorum, Orationem quoque Dominicam, et Sacramentorum rationem, cum aliis ejus generis primis principiis, et religionis nostræ capitibus præcipuis" (*Caput* xxiv). See also the preface to the Heidelberg Catechism (Augusti, *Lib. Symb.* 532 sq.), and the article CATECHISM. In Germany, after the fervor of the Reformation period had passed, and the scholastic theologians reigned, the catechetical instruction degenerated into a mere formal routine of preparation for confirmation, and the same thing happened in the Church of England. Indeed, this result appears to be inevitable where baptismal regeneration is believed, and confirmation is made to follow as a matter of course. Spener and the Pietists gave new life to catechetical instruction by connecting it with spiritual teaching and life (see Hurst, *History of Rationalism*, p. 90; Thilo, *Spener als Katechet*, Berl. 1840). The Church of Rome was compelled to follow the Reformers in catechetical instruction; the *Catechismus Romanus* (1566) became the basis of numerous Catechisms—those of Canisius, Bellarmin, Bossuet, and Fleury attaining the widest circulation. As any bishop can authorize a Catechism for his diocese, the Romanists have now a great variety, and they are still increasing (see *Theolog. Quartalschrift*, 1863, p. 443).

The theory of catechization in the Protestant Church grew up gradually from the germs in Luther's teaching, through the period of decay and dry scholasticism, and finally shot up into full bloom in Pietism. Its principles are, 1. That the Catechism of the Church, stamped with its authority, shall be used in instruction; 2. That the instruction is not Socratic, i. e. does not aim to draw out what is in the mind of the pupil, but rather to convey revealed truth to the mind in a way which it can appreciate and understand; 3. That while the pupil is to learn the words of the Catechism by heart, the teacher is to explain and illustrate them from the Bible, and to enforce them on the heart and conscience of the catechumen—i. e. catechization is to be not merely didactic, but practical. It is farther well settled that the Catechism of each particular church should be taught to the children of that church (1) by parents or guardians in the family; (2) by the Sunday-school teacher, who should always be a constant catechist; and (3) by the pastor, whose catechization should not only be a test of the proficiency of the children under home and Sunday-school instruction, but should include exhortation, illustration, and application also. It was one of Spener's glories that he introduced public catechization; and the pastor who fails, at fixed times, to catechize the children in presence of the congregation, loses one of the most important means of Christian culture within the sphere of Church life.

Dr. Ashbel Green (*Lectures on the Shorter Catechism*, vol. i), in his *Introductory Lecture*, thus speaks of the advantages of catechization: "The catechetical or questionary form of religious summaries renders them most easy and interesting to children and youth, and, indeed, to Christians of all ages and descriptions. For myself, I have no reluctance to state here publicly what I have frequently mentioned in private, that in the composition of sermons one of the readiest and best aids I have ever found has been my Catechism. Let me add, farther, that long observation has satisfied me that a principal reason why instruction and exhortation from the pulpit are so little efficacious, is, that they presuppose a degree of information, or an acquaintance with the truths and doctrines of divine revelation, which, by a great part of the hearers, is not possessed, and which would best of all have been supplied by catechetical instruction. It is exactly this kind of instruction which is at the present time most urgently needed in many, perhaps in most of our congregations. It is needed to imbue effectually the minds of our people with "the first principles of the oracles of God," to indoctrinate them soundly and systematically in revealed truth, and thus to guard them against being "carried about with every wind of doctrine," as well as to qualify them to join in the weekly service of the sanctuary with full understanding, and with minds in all respects prepared for the right and deep impression of what they hear."

The duty of catechization is enjoined in the laws of almost all branches of the Church. In the Church of England, by Canon 59, "every parson, vicar, or curate, upon every Sunday and holyday, before evening prayer, shall, for half an hour or more, examine and instruct the youth and ignorant persons of his parish in the Ten Commandments, the articles of the belief, and in the Lord's Prayer; and shall diligently hear, in-

struct, and teach them the Catechism set forth in the Book of Common Prayer. And all fathers, mothers, masters, and mistresses shall cause their children, servants, and apprentices, which have not learned the Catechism, to come to the church at the time appointed, obediently to hear, and to be ordered by the minister until they have learned the same. And if any minister neglect his duty herein, let him be sharply reproved upon the first complaint, and true notice thereof given to the bishop or ordinary of the place. If, after submitting himself, he shall willingly offend therein again, let him be suspended. If so the third time, there being little hope that he will be therein reformed, then excommunicated, and so remain until he be reformed. And likewise, if any of the said fathers, mothers, masters, or mistresses, children, servants, or apprentices, shall neglect their duties as the one sort in not causing them to come, and the other in refusing to learn, as aforesaid, let them be suspended by their ordinaries (if they be not children), and if they so persist by the space of a month, then let them be excommunicated. And by the rubric, the curate of every parish shall diligently, upon Sundays and holydays, after the second lesson at evening prayer, openly in the church, instruct and examine so many children of the parish sent unto him as he shall think convenient, in some part of the Catechism. And all fathers and mothers, masters and dames, shall cause their children, servants, and apprentices (who have not learned their Catechism) to come to the church at the time appointed, and obediently to hear, and be ordered by the curate, until such time as they have learned all that therein is appointed for them to learn." These careful rules, however, have become nearly a dead letter. In the Protestant Episcopal Church, the xxviiith Canon (of 1832) enjoins that "the ministers of this Church who have charge of parishes or cures shall not only be diligent in instructing the children in the Catechism, but shall also, by stated catechetical lectures and instruction, be diligent in informing the youth and others in the doctrines, constitution, and liturgy of the Church." The Methodist Episcopal Church makes it the "duty of preachers to see that the Catechism is used in Sunday-schools and families, to preach to the children, and to publicly catechize them in the Sunday-schools and at public meetings appointed for that purpose" (*Discipline*, part v, § 2). "It shall also be the duty of each preacher, in his report to each Quarterly Conference, to state to what extent he has publicly or privately catechized the children of his charge" (part ii, chap. ii, § 17). "At the age of ten years, or earlier, the preacher in charge shall organize the baptized children of the church into classes, and appoint suitable leaders, male or female, whose duty it shall be to meet them in class once a week, and instruct them in the nature, design, and obligation of baptism, and the truths of religion necessary to make them wise unto salvation" (part i, ch. ii, § 2). The Presbyterian Church makes catechizing "one of the ordinances in a particular church" (*Form of Government*, ch. vii), and enjoins the duty in its *Directory for Worship*, ch. i, § 6; also ch. ix, § 1: "Children born within the pale of the visible Church, and dedicated to God in baptism, are under the inspection and government of the Church, and are to be taught the Catechism, the Apostles' Creed, and the Lord's Prayer." In the Reformed Dutch Church each pastor is bound to expound the Heidelberg Catechism, and the Classis is bound to see that "the catechizing of children and youth are faithfully attended to" (*Constitution*, ch. i, art. iii, § 8). The Lutheran and German Reformed churches, not only by their traditions, but also by Church law, are bound to fidelity in catechization.

3. *Literature.*—The *science* of Catechetics was treated by Hyperius, *De Catechesi* (1570; ed. Schmidt, Helmst. 1704, 8vo); Dietrich, *Institt. Catechet.* (1613); Alstedius, *Theologia Catechetica* (Hanover, 1616, 4to); Rambach, *Wohlunterrichteter Catechet* (Jena, 1727, and Lips. 1736, 8vo). Dr. Watts gave an impetus to Catechetics by his *Discourse on Instruction by Catechism* (London, 1728; *Works*, ed. of 1812, vol. v), in which he explained the Catechism of the Westminster Assembly, and gave two smaller Catechisms. A thorough work on this branch of theology, in English, is yet a desideratum. The relation of the Catechism and of catechetical instruction to the Church and to baptism has not been made so prominent in the English-speaking churches as in the German. On minor points, especially relating to the ancient Church, Bingham and other English writers have done well. Both for the history and theory of Catechetics in general, our chief references must be to German writers. Among them are, besides those already mentioned, Langemack, *Historia Catechetica* (3 vols. 1729-40); Walch, *Einleitung in die catechetische Historie*, etc. (1752); Köcher, *Einleitung in die catechetische Theologie* (1752); the same, *Kat. Geschichte d. päpstlichen Kirche* (1753); the same, *Kat. Gesch. d. ref. Kirche* (1756); the same, *Kat. Geschichte d. Waldenser, u. a. Secten* (1768—the four books constituting a body of Catechetical science). Of more or less Rationalistic tendencies are the following: Schuler, *Geschichte des kat. Religionsunterrichts unter den Protestanten bis* 1762 (Halle, 1802); Gräffe, *Lehrbuch der allgem. Katechetik* (on Kantian principles, Götting. 1799, 3 vols.; 1805, 1 vol.); Gräffe, *Grundriss der allgem. Katechetik* (1796, 8vo). Of the same school: Schmid, *Katechet. Handbuch* (Jena, 2d ed. 1799-1801); Müller, *Lehrbuch d. Katechetik* (Altona, 2d ed. 1822, 8vo). More evangelical, but yet resting on the Kantian philosophy in its Fichtean form, is Daub, *Lehrbuch der Katechetik* (Frankfort, 1801, 8vo); and more practical are Schwarz, *Katechetik* (Giessen, 1819, 8vo); Harnisch (Halle, 1828); Hoffmann, *Katechetik* (1841). Since the modification of German theology through Schleiermacher's influence, a still better class of works has appeared, among which are Palmer, *Evangel. Katechetik* (1844; 4th ed. 1856, 8vo); Kraussold, *Katechetik* (1843); Plato, *Lehrbuch d. Katechetik* (Leipz. 1853, 12mo); Puchta, *Handbuch der prakt. Katechese* (1854); Zezschwitz, *System der christlich-kirchlichen Katechetik* (Lpz. 1864 66, 2 vols. 8vo, the fullest treatise on the subject, but not yet finished). In books of practical theology, Catechetics, of course, is treated in its place. Among Roman Catholic writers we name Galura, *Grundsätze d. wahren Katechese* (Freiburg, 1795); Winter, *Katechetik* (Landshut, 1816, 8vo); Gruber; Muller; and especially Hirscher, *Katechetik* (1831, 4th ed. Tübing. 1840), whose comprehensive mind grasped the subject in all its bearings, but especially in its true relations to the pastoral work. Among writers in English, see Cannon, *Pastoral Theology*, Lecture xxxi; Baxter, *Reformed Pastor;* Vinet, *Pastoral Theology;* Baxter, *The Teaching of Families* (*Practical Works*, vol. xix); Orme, *Life of Baxter*, ii, 140 sq.; Gilly, *Horæ Catechеticæ* (London, 1828, 8vo); Doddridge *On Preaching*, Lecture xvii; Farindon, *Sermons*, iv, 201; *Quarterly Review*, March, 1843; *Princeton Review*, xxi, 59; *Evangelical Review*, i, 221; Arden, *Manual of Catechetical Instruction* (High-church; London, 1851, 12mo); Green, Ashbel, *Lectures on the Shorter Catechism* (Phila. 1841, 2 vols. 8vo); Alexander, A., *Duty of Catechetical Instruction* (Presbyter. Tract Soc.); Ramsay, *Catechetical Instruction* (Church of England; Lond. 1851, 18mo); *Aids to Catechetical Teaching* (Lond. 1843, 12mo); Bather, *Art of Catechizing* (revised by author, N. Y. 1847). Catechetical hints may be found in many books on Sunday-school and Bible-class teaching; in periodicals, such as *The Catechumen's Reporter* (Lond.); and in the various expositions of the different Church Catechisms. Also Clarisse, *Encyclopædia Theologica*, § 99; Siegel, *Handbuch der christ.-kirch. Alterthümer*, i, 340 sq.; Hagenbach, *Encyklopädie*, § 99; Pelt, *Theolog. Encyklopädie*, § 103; Herzog, *Real-Encyklopädie*, vii, 441; Winer, *Theolog. Literatur;* Walch, *Bibliotheca Theologica*, vol. i, ch. iv.

Catechism (in the ecclesiastical sense), a book of

Christian instruction, put forth under the authority of the Church, for the oral instruction of children and proselytes. Generally, at the present day, the Catechism is in the form of question and answer.

I. *The name Catechism.*—The name is derived from κατηχέω (see CATECHETICS, 1). In its existing sense it probably originated with Luther. In the early ages the catechumens (q. v.) were taught the Creed, the Lord's Prayer, and certain rudiments of doctrine (Bingham, *Orig. Eccles.* bk. x, ch. i, § 6). Cyril († 386) and Gregory of Nyssa († 394) wrote what would now in substance be called Catechisms, as did Augustine († 430) in his Exposition of the Creed. See CATECHETICS. But in Augustine's use, the word Catechism means the act of preparatory instruction through which the catechumens went before baptism. In the Middle Ages, Kero of St. Gall (8th century) published the Creed and Lord's Prayer in German, for the instruction of children and ignorant people. Wicliffe also did the same in English, adding the Decalogue. But Luther first gave the name Catechism (1525) to the sum of Christian knowledge made up for elementary instruction into a book. It is possible, however, that the term "Catechism" had been used by the Waldenses before Luther's time in the same sense. See Zezschwitz, *Die Katechismen der Waldenser und böhmischen Brüder* (Erlangen, 1863, 8vo).

II. *The principal Catechisms.*—1. *Lutheran.*—In 1520 Luther published his first Short Catechism, containing a short form of the Creed, the Commandments, and the Lord's Prayer; but his experience of the gross ignorance of the people in religious things, especially as seen by him in his visitations of 1527, led him to prepare Larger and Smaller Catechisms, which afterwards found a place among the symbolical books or standards of the Lutheran churches. They are to be found in Hase, *Libri Symbolici Eccles. Lutheranæ* (Lips. 1846), where a brief sketch of their history is given; also in Francke, *Lib. Symb. Eccles. Lutheranæ* (Lips. 1847). Translations in German and English are abundant. The *Catechismus Major* was intended for the use of the clergy and schoolmasters, the *Minor* for the use of the people and the children. The *Formula Concordiæ* calls these Catechisms "quasi laicorum Biblia, in quibus omnia illa breviter comprehenduntur quæ in sacra Scriptura fusius tractantur" (Pars I, § 5; also Pars II, § 8). The Smaller Catechism is in the form of question and answer; the Larger is not. The contents of the Smaller are: Preface; Chap. I. The Decalogue; Chap. II. The Apostles' Creed; Chap. III. The Lord's Prayer; Chap. IV. The Sacrament of Baptism; Chap. V. The Lord's Supper; Appendix 1. Morning and Evening Devotion; App. 2. Blessing and Grace at Table; App. 3. The Home Table (containing a brief summary of ethics). This arrangement of topics is followed also in the Larger Catechism (omitting the appendices), but more amply treated. The German churches still use Luther's Catechism generally, but not without opposition. See Zezschwitz, *System der christlich-kirchlichen Katechetik* (Leipzig, 1864, 1866, 2 vols. 8vo); Nitzsch, *Prakt. Theol.* II, i, 191, and *Jahrbücher für deutsche Theologie*, x, II, 395 sq. For the various editions of Luther's Catechisms, and the works written upon them, see Walch, *Bibliotheca Theologica*, i, 452 sq.; Winer, *theol. Literatur*, pt. xi, pt. xxvii.

2. *Reformed.*—(1.) *Geneva Catechism.*—Calvin drew up a Catechism in French in 1536; in Latin, 1538 (the *Catechismus Genevensis*). This was revised and published in French in 1541, and in Latin, 1545. Its heads are, 1. Doctrine, or Truth (the Apostles' Creed); 2. Duty (the Decalogue); 3. Prayer (Lord's Prayer); 4. The Word; 5. The Sacraments. Appended is a form for public prayer and the administration of the sacraments (see Calvini *Opera*, Geneva, 1617, vol. xv, p. 12 sq.; Augusti, *Corpus Libr. Symbolicor.* 460 sq.). It was speedily translated into other languages, and adopted in the Reformed churches of Switzerland, France, England, Scotland, Hungary, and the Netherlands. As late as 1578 it was ordered to be used in the University of Cambridge, England. See Köcher, *Katechet. Gesch. der reform. Kirche*, Jena, 1756, 8vo, 210 sq.; Bonar, *Catechisms of the Scottish Reformation* (Lond. 1866).

(2.) *Heidelberg.*—The most important of the Reformed Catechisms is that of Heidelberg, compiled by Caspar Olevianus and Zacharias Ursinus, at the request of the Elector of the Palatinate, Frederick III, and published at Heidelberg in 1562. After its approval by the Synod of Dort (q. v.), it became one of the symbolical books of the Reformed Church of Holland, as well as of the German Reformed Church. It may be found in Latin in Augusti, *Libr. Symbolicor.* 532 sq.; in English in many separate editions. The best English version is the *Tercentenary* (N.Y. 4to, 1863); the best German ed. is that of Schaff (Phila. 1866, 18mo). In view of the special importance of this Catechism, it is treated in a separate article. See HEIDELBERG CATECHISM.

3. *Church of England.*—We give the following account from Procter, *On Common Prayer*, chap. v:

"Previously to 1661 the Catechism was inserted in the Order of Confirmation. The title in the Prayer-books of Edward VI and Elizabeth was, *Confirmation, wherein is contained a Catechism for Children*; and in 1604, *The Order of Confirmation, or laying on of hands upon children baptized, and able to render an account of their faith, according to the Catechism following*; with a farther title to the *Catechism* itself, *that is to say, An Instruction to be learned of every Child before he be brought to be confirmed by the Bishop.* The insertion in the prayer-book of such an authorized exposition of the elements of the Christian faith and practice belongs to the Reformation. English versions and expositions of the Lord's Prayer and Creed had existed in early times. But immediately before the Reformation, it appears that these elements were by no means generally known. The origin of the rubrics about catechizing may be referred to the injunctions issued in 1536 and 1538 (Strype, *Eccl. Mem. Hen. VIII*, i, 42), which ordered the curates to teach the people the Lord's Prayer, the Creed, and the Ten Commandments, sentence by sentence, on Sundays and holydays, and to make all persons recite them when they came to confession (Burnet, *Hist. Ref.* iv, 101, ed. Nares [Records, book iii, No. xi]). As soon as a book of service was prepared, a Catechism was placed in it, that the exposition of these Christian elements might not depend on the care or ability of the curates. This manual still remains in the Prayer-book, with only a few verbal alterations, and the addition of an explanation of the sacraments in 1604. The composition of this latter part is generally attributed to bishop Overall, who was the prolocutor of the Convocation, and at that time dean of St. Paul's. It was added by royal authority, 'by way of explanation,' in compliance with the wish which the Puritans had expressed at the conference at Hampton Court (Cardwell, *Conf.* p. 187), and, with two emendations, was afterwards confirmed by Convocation and Parliament in 1661.

"An intention was formed, in the time of Edward and Elizabeth, to have also another authorized Catechism for the instruction of more advanced students, and especially those in public schools, touching the grounds of the Christian religion. The original of this work is ascribed to Poynet (Orig. Lett. [Park. Soc.] lxxi, *Cheke to Bullinger*, June 7, 1553), who was bishop of Winchester during Gardiner's deprivation. It was published in Latin and in English in 1553, and is supposed to have had the approval of Cranmer, and also of the Convocation which sanctioned the Articles in 1552 (see it reprinted in bishop Randolph's *Enchiridion Theologicum*, vol. i. Both the English and Latin editions are reprinted in *Liturgies, etc., of Edw. VI* [Park. Soc.]). It seems, however, that this was not considered quite satisfactory; nor was it able to supplant the many similar compilations of the foreign Reformers,

which were adopted by many teachers, and occasioned much complaint as to the want of a uniform system of religious instruction (see Hardwick's *Hist. of the Articles*, p. 108 sq.). Of foreign Catechisms there were the Catechism of Erasmus (1547), ordered to be used in Winchester College and elsewhere; the Smaller and Larger Catechisms of Calvin (1538 and 1545), that of Œcolampadius (1545), Leo Judas (1553), and more especially Bullinger (1559). Even in 1578, when the exclusive use of Nowell's Catechisms had been enjoined in the canons of 1571, those of Calvin, Bullinger, and others were still ordered by statute to be used in the University of Oxford (see Cardwell, *Doc. Ann.* i, 300, *note*). Hence it was agreed by the bishops in 1561 that, besides the Catechism for children who were to be confirmed, another somewhat longer should be devised for communicants, and a third, in Latin, for schools. It is probable that at this time Dean Nowell was employed upon such a Catechism, taking Poynet's as his groundwork; so that it was completed before the meeting of Convocation (Nov. 11, 1562), by which it was approved and amended, but not formally sanctioned, apparently because it was treated as part of a larger design, which was not realized, viz. to publish Nowell's Catechism, the Articles, and Jewell's Apology in one book 'by common consent to be authorized, as containing true doctrine, and enjoined to be taught to the youth in the universities and grammar-schools throughout the realm.' The Catechism, therefore, remained unpublished until 1570, when it was printed at the request of the archbishops, and appeared in several forms, in Latin and in English. The *Larger Catechism*, in Latin, intended to be used in places of liberal education, is reprinted in Bp. Randolph's *Enchirid. Theologicum*, vol. ii. Its title is 'Catechismus, sive prima institutio, disciplinaque pietatis Christianæ, latine explicata.' In the same year it was translated into English by Norton. Also an abridgment of it, called the Shorter or the Middle Catechism, was prepared by Nowell for the use of schools. He also published a third, called the Smaller Catechism, differing but slightly from that in the Book of Common Prayer. It is probable that Overall abridged the questions and answers on the Sacraments from this Catechism (see Churton's *Life of Nowell*, p. 183 sq.; Lathbury, *Hist. of Convoc.* p. 167 sq.)." Cranmer's Catechism was reprinted, London, 1829, 8vo.

Among the numerous commentaries on the Catechism are, Nicholson (Bp.), *An Exposition of the Catechism of the Church of England* (2d ed. Oxf. 1844, 8vo); Beveridge (Bp.), *Church Catechism Explained* (12mo); Nixon (F. R.), *Lectures, Historical, Doctrinal, and Practical, on the Catechism of the Church of England* (3d ed. Lond. 1847, 8vo); Fitzgerald (A. D.), *Short Lectures on the Church Catechism* (12mo); James (J.), *A Comment on the Church Catechism and Occasional Offices, or the Mother's Help* (Lond. 1842, 12mo); Secker (Arp.), *Lectures on the Church Catechism* (12mo); Burnet's *Exposition of the Church Catechism* (8vo). John Wesley says of it: "Our Church Catechism is utterly improper for children of six or seven years old" (*Works*, N. Y. ed. vii, 170).

4. *Presbyterian Church.* — The *Westminster Catechisms*, with the Westminster Confession of Faith, constitute the standards or symbolical books of the Presbyterian churches. They were prepared by committees of the Westminster Assembly; the *Shorter Catechism* was presented to the House of Commons November 5, 1647; the *Larger*, April 5, 1648; and by resolution of September 15, 1648, the Catechisms were ordered printed *by authority*, for public use. The shorter is not an abridgment of the larger, but the latter is an expansion of the former. They were both adopted by the General Assembly of the Church of Scotland in 1648. The Shorter Catechism "has been, and still is, in almost universal use among Presbyterians speaking the English language, and to a considerable extent among Independents and Congregationalists both in Britain and America. In Holland, also, a translation of it has been much used. It is very generally regarded, by those whose doctrinal views are in accordance with it, as an admirable compend of Christian doctrine and duty. The authorship of the Westminster Assembly's Catechisms has been the subject of much debate, or at least the authorship of the first drafts of them, it being admitted that they were prepared with great care by committees of the Assembly. But the probability appears to be that their authorship is to be ascribed entirely to these committees, and that, like the Westminster Confession of Faith, they are thus the result of the joint labors of many. From discoveries recently made by Dr. M'Crie, it seems probable that at least the plan or scheme of the Shorter Catechism is to be ascribed to Mr. Palmer" (Chambers, s. v.).

There are numerous editions of the Catechisms; the latest are those of the *Presbyterian Board of Publication* (Philadelphia). They teach the Calvinistic theology. Among the many commentaries on the Catechisms, we name Green (Ashbel), *Lectures on the Shorter Catechism* (Phila. 1841, 2 vols. 8vo); Belpage, *Exposition of the Assembly's Catechism* (Lond. 2 vols. 12mo); Fisher, *Exposition of the Assembly's Catechism* (Lond. 1849, 12mo); Paterson, *The Shorter Catechism* (Lond. 1841, 12mo); Vincent, *The Catechism Explained* (Lond. 1848, 18mo); Boyd, *The Westminster Shorter Catechism* (N. Y. 1849, 18mo).

5. *The Methodist Church.*—In the Wesleyan Methodist Church, in England, the Catechisms in use are three, arranged in gradation, for pupils of different ages, by the Rev. Richard Watson. They are printed as *The Wesleyan Methodist Catechisms.* For many years these Catechisms were used also in the Methodist Episcopal Church in the United States, together with *A Short Scriptural Catechism*, prepared by the Rev. J. Edmondson (?). In 1848 the General Conference ordered the preparation of a Church Catechism, which was undertaken by the Rev. Dr. Kidder (then Sunday-school Editor), who, with the aid of other divines, prepared a series of Catechisms which were approved and adopted by the General Conference of 1852. They are published as *Catechisms of the Methodist Episcopal Church*, No. 1, 2, 3 (New York, Methodist Book Room). The series does not consist of three separate Catechisms, but of *one*, in three stages of development, the language of the basis being unchanged in the different numbers of the series. No. 1 is the Catechism; No. 2 is the same, with the addition of numerous Scripture proofs and illustrations printed side by side with the several questions and answers; No. 3 expands the answers of No. 1 and the proofs of No. 2 into something like a system of Christian doctrine in a condensed form. The Catechism proper is taken up section by section, and a *summary* is given, in comprehensive language, of the subject-matter of each section. Then follow an analysis of the section, a number of explanatory and practical questions, and a set of definitions. The outline of topics is as follows: I. God: § 1. His Nature and Attributes; § 2. The Persons of God. II. Creation: § 1. The World; § 2. Man. III. Man's Fall and Sinful State: § 1 Sin; § 2. Guilt, Prevalence, and Consequences of Sin. IV. Salvation: § 1. The Source and Grounds of Salvation, viz.: The Love of God in Christ, and Redemption through Christ; § 2. Conditions of Salvation; § 3. The Fruits and Extent of Salvation. V. The Means of Grace: § 1. The Church and Ministry; § 2. The Sacraments: (1.) *Baptism;* (2.) *The Lord's Supper;* § 3. The Word of God and Prayer. VI. God's Law: Duties to God and Man. VII. Of Death, Judgment, and Eternity. Appendix: The Beatitudes; The Lord's Prayer; The Ten Commandments; The Apostles' Creed; Baptismal Covenant; Examples of Prayers for the Young.

6. *The Church of Rome.*—In the Church of Rome the Tridentine Catechism (*Catechismus Romanus*) is a book of symbolical authority. It was prepared in obedience to a decree of the Council of Trent (Sess. 24, de Ref. c. 7), by archbishop Leonardo Marino, bishop Ægidius Foscarrari, and the Portuguese Dominican Francisco Fureiro, with the aid, as later writers (e. g. Tiraboschi) conclude, of Muzio Calini, archbishop of Zara; revised by cardinals Borromeo, Sirlet, and Antonian; and sanctioned by Pope Pius V. It was published at Rome in 1566, the Latin version being either by Paulus Manutius or Poggianus. The Council of Trent had ordered (l. c.) that the Catechism, when prepared, should "be faithfully translated into the vernacular languages, and expounded to the people by all pastors." It was subsequently approved by special bulls, and adopted by votes of provincial synods in the various Roman Catholic countries. It consists of four parts: the Apostles' Creed, the Sacraments, the Decalogue, and the Lord's Prayer. It is one of the standards of doctrine in the Church of Rome, though the Jesuits deny its symbolical authority. Möhler refuses to it the character of a "public confession," but admits "the great authority which undoubtedly belongs to it" (*Symbolism*, Introduction, p. 105; see also Elliott, *Delineation of Romanism*, bk. i, ch. i; Cramp, *Text-book of Popery*, ch. xxii). The Catechism is not fitted for the instruction of children, but is a manual for the use of pastors. It was not originally in the form of question and answer, but some of the later editions took that shape. There is an English translation by Dr. Donovan, of Maynooth College (Dublin, 1829; Baltimore, n. d. 8vo). Cramp remarks of this translation that it "suppresses or alters such passages as express the peculiar tenets of popery in too open and undisguised a manner," and furnishes proofs of the charge (*Text-book of Popery*, p. 430). Besides the *Catechismus Romanus*, numerous other Catechisms have appeared within the Church of Rome from time to time. The most important are those of Canisius (q. v.), the Jesuit (1554 and 1566), which have been largely used from that time to this, especially in Germany; and that of Bellarmine (1603), and of Bossuet (1687). On recent Roman Catholic Catechisms, as compared with Canisius, see *Theologische Quartalschrift*, 1863, III, p. 443.

7. *The Greek Church.*—Palmer (in Herzog, *Real-Encyklop.* s. v. Katechismus) remarks that the only Church without an authorized Catechism is the Greek Church. But a Catechism prepared by Mogilas, metropolitan of Kiew (1642), was recognised by a synod of Jerusalem (1672) as a standard.

8. *Socinian.*—1. The *Cracovian* Catechism was drawn up by Schomann, 1574, for the Polish churches; it is made up chiefly of verses of Scripture. 2. The Catechism of *Faustus Socinus* was published at Racovia, 1618, in an unfinished form, owing to the death of Socinus, under the title *Christ.-Relig. brevissima institutio*, etc. 3. The *Racovian Catechisms*, larger and smaller, composed by Moscorovius, a Polish nobleman, and Schmalz, a Socinian minister (Latin, Racovia, 1609, 12mo; new ed. by Crellius, 1680, 4to; and another, with refutation, by Œder, Frankfort and Leips. 1739, 8vo; English translation by Rees, Lond. 1818, with preface, treating of the literary history of the Catechism).

There have been many Catechisms prepared by individuals and used in various countries and churches, but as none of them have been clothed with symbolical authority, we do not attempt to give a list of them. —Smith's Hagenbach, *Hist. of Doctrines*, § 226; Shedd, *Hist. of Doctrines*, ii, 457-498; Smith's Gieseler's *Ch. History*, vol. iv, § 31; Augusti, *Corpus Libr. Symbol. Reform.* (Uberf. 1827, 8vo); Winer, *Theol. Literatur*, § xxvii; Walch, *Bibliotheca Theologica*, vol. i, ch. iv; Herzog, *Real-Encyklopädie*, vii, 454 sq.; *Zeitschrift für histor. Theologie*, 1865, p. 300.

Catechist, i. e. *catechizer*, in the ecclesiastical sense, one who teaches religion to children, or neophytes, catechetically. For the derivation, see CATECHETICS, 1. (1.) At first it was the office of the bishop to prepare the catechumens for baptism, as well as to admit them into the Church by that sacrament. But in course of time it became impossible for the bishops to devote the requisite attention to this part of their work, and consequently they transferred it to such presbyters and deacons as they deemed competent to the undertaking. They were called *catechetæ*; and their employment was considered peculiarly honorable, as requiring the possession and use of eminent talents and qualifications. But there never was a separate office or order of catechists in the Church; the work was only a function, assigned, as need arose, to persons capable of it. Cyril of Jerusalem and Chrysostom (*Hom.* 21 ad popul. Antioch.) were originally catechists. They were sometimes called by a figurative name, ναυτολόγοι, that is, those whose office it was to admit passengers to the ship, and contract with them for the fare. The Church, by a well-known figure, was compared to a ship; the bishop was ὁ πρωρεύς, *the pilot*; the presbyters, οἱ ναύται, *the mariners*; the deacons, οἱ τοίχαρχοι, *the chief rowers*; the catechists, οἱ ναυτολόγοι. It was properly the catechists' duty to show the catechumens the contract they were to make, and the conditions they were to perform, in order to their admittance into the Christian ship. The deaconesses were also catechists to the more ignorant and rustic women-catechumens, which proves that catechists were not necessarily of the clerical order. Origen, when only eighteen years of age, and consequently when incapable of being ordained a deacon, was appointed a catechist (Eusebius, *Hist. Eccles.* vi, 3).

(2.) In the modern churches, ministers are generally required by Church law to be catechists (i. e. for the instruction of children); and since the growth of the Sunday-school (q. v.), the Sunday-school teachers are, or ought to be, all catechists.—Farrar, *Eccles. Dict.* s. v.; Bingham, *Orig. Eccles.* bk. iii, ch. x; Coleman, *Christian Antiq.* ch. iv, § 8; Krause, *De Catechetis primitivæ ecclesiæ* (Lips. 1704); Siegel, *Alterthümer*, p. 340.

Catechumens, in the ancient Church, candidates for baptism, who were placed under a course of religious instruction in order to their admission into the Church. For the derivation, see CATECHETICS, 1. They are classed by ancient writers as members of the Church, but the lowest order of members (e. g. Origen, Eusebius, Jerome; cited by Bingham, bk. i, ch. iii).

1. *Names.*—Besides the name catechumens, they were called candidates (*candidi*), because they were accustomed to appear dressed in *white* on their admission to the Church. They were also called *novitiati*, *tyrones Dei*, *rudes*, *incipientes* (e. g. by Tertullian, *De Pænitent.* c. vi.; and by Augustine, *De Fide ad Catechum.* lib. ii, cap. i).

2. *Admission to the Catechumenate.*—Heathens were admitted to the catechumenate by the imposition of hands and prayer, with the sign of the cross. The children of believers were admitted as soon as they were of age to receive instruction, but there does not appear to have been any specific age fixed at which Jewish and heathen converts were considered as catechumens. The greater part were of adult age; even Constantine the Great was in this class. But it was essential that they should not have been baptized.

3. *Period of the Catechumenate.*—The time spent in preparation varied according to the usages of various churches, and particularly according to the proficiency of each individual. In the Apostolical Constitutions three years are enjoined; by the Council of Eliberis, A.D. 673, two years; by that of Agatha, A.D. 506, eight months. Sometimes the catechumenate period was limited to the forty days of Lent. Socrates observes that, in the conversion of the Burgundians, the

French bishop who converted them took only seven days to catechise them, and then baptized them. But, in case of sickness or imminent death, the catechumens were immediately baptized with what was called clinic baptism. Cyril of Jerusalem and Jerome direct the catechumens to observe a season of fasting and prayer forty days.

4. *Classes of Catechumens.*—They were early divided into separate classes, the number and names of which were somewhat different. The Greek canonists, followed by Beveridge, Cave, and others, among the moderns, speak of the *ἀτελέστεροι*, *the uninitiated*, and the *τελέστεροι*, *the more advanced.* Suidas distinguishes them as *ἀκροωμενοί*, such as were occupied in learning, and *εὐχομενοί*, such as are engaged in devotional pursuits. Bingham specifies four classes: First, the *ἐξωθούμενοι*, or those who were instructed privately without the Church, and kept at a distance from the privilege of entering into the Church for some time, to make them the more eager and desirous of it. The next degree above these were the *ἀκροώμενοι*, *audientes*, or hearers. They were so called from being admitted to hear sermons and the Scriptures read in the Church, but were not allowed to partake of the prayers. The third sort of catechumens were the *γονυκλίνοντες*, *genu-flectentes*, or kneelers, so called because they receive imposition of hands kneeling upon their knees. The fourth order was the *βαπτιζόμενοι*, *φωτιζόμενοι*, the *competentes* and *electi*, which denote the immediate candidates of baptism, or such as were appointed to be baptized the next approaching festival, before which strict examination was made into their proficiency under the several stages of catechetical exercises. The age, sex, and circumstances of the catechumens were duly observed, men of age and rank not being classed with children (*Antiquities*, bk. x, ch. ii, § 2).

5. *Instruction and Admission to the Church.*—The exercises of the parties till their union with "the believers" were generally directed with reference to their preparation for baptism. They were required to attend to various doctrinal and catechetical instructions, to reading the Scriptures, etc. One of Chrysostum's homilies (ad 2 Cor. 2) is an exposition of the prayer of the Church for the catechumens (see Neander, *Life of Chrysostom*, tr. by Stapleton, Appendix to vol. i). That part of divine service which preceded the common prayers of the communicants at the altar, that is, the psalmody, the reading of the Scriptures, the sermon, etc. was called *missa catechumenorum*, because the catechumens had the liberty of being present only at this part of the service. The advanced classes before baptism were subjected to repeated examinations, and, in later times, to a kind of exorcism, accompanied by the imposition of hands; they received the sign of the cross, and insufflation, or the breathing of the priest upon them. They also passed many days in fasting and prayer, and in learning the Apostles' Creed and the Lord's Prayer. Some days before baptism they were required to wear a veil. Their mode of admission was simple. The bishop examined the candidate, and, if he was found worthy, enrolled his name in the records of the Church. The solemnity was concluded by prayer, by the imposition of hands, and by the signing of the cross.

"No such arrangement as the catechumenate is indicated in the New Testament: when an individual professed faith in the Lord Jesus Christ, he was immediately admitted to the initiatory rite of Christianity. All converts then, however they might differ in their knowledge or attainments, were equally entitled to the outward sign, as they were to the inward and spiritual grace. But when the Church was augmented by the accession to her pale of large numbers from heathenism, and when her purity was no longer guarded by the presiding care of those apostles and others who possessed the power of discerning spirits, the custom of deferring the admission of members was adopted, in order to obtain satisfactory evidence of their fitness to be enrolled in the rank of the disciples. The experience of the primitive Christians had taught them that the gross habits of idolaters were not at once relinquished for the pure and spiritual principles of the Gospel, and that multitudes of professed believers held their faith by so slender a tie that the slightest temptation plunged them again into their former sensuality. The protracted inquiry into the character and views of candidates for admission into the Church was therefore designed, if possible, to prevent the occurrence of apostaises, which had disturbed the peace and prosperity of the Church, and may be traced to a laudable desire of instructing young and uninitiated converts in the principles of the Christian faith."

In modern Christian usage, the words *catechumen*, *catechumenate*, are not found in the books of Church law, except with historical reference to the ancient Church. But the things designated by these terms have always existed, and the terms themselves appear likely (and very properly) to come into use again, to designate the children of the Church and their period of instruction preparatory to confirmation, in the churches which use that rite, and preparatory to communion in full membership, in those churches which do not. In the Methodist Church in England the term has been revived, especially in the efforts of the Rev. S. Jackson to establish a fixed method and course of instruction for young persons between childhood and puberty (see the volumes of the *Catechumen's Reporter*, London). The whole subject is also carefully discussed by Zezschwitz, *System d. christl.-kirchl. Katechetik* (Leipz. 1862, i, 79 sq.).

See the copious treatment of the ancient catechumenate by Bingham, *Origines Ecclesiæ*, ch. x; and Coleman, *Ancient Christianity*, ch. vii, sec. vi, § 7. See also Siegel, *Alterthümer*, i, 364 sq.; Pfanner, *De Catechumenis, Antiquæ Ecclesiæ* (Frankfurt et Gotha, 1688, 4to); Farrar, *Ecclesias. Dictionary*, s. v.; Buck, *Theol. Dictionary*, s. v.; Neander, *Church History*, i, 305; and the article ARCANI DISCIPLINA.

Catēna (*a chain*), in Biblical criticism, is an exposition of a portion of the Scriptures, formed of collections from various authors. Thus we have *Catenæ* of the Greek fathers by Procopius, by Olympiodorus, and by Nicephorus, on several books of the Old Testament. Poole's *Synopsis* may be regarded as a *catena* of modern interpretations of the Bible. The ancient catenæ seem to have originated in the short scholia, or glosses, which it was customary in manuscripts of the Scriptures to introduce in the margin. These, by degrees, were expanded, and passages from the homilies or sermons of the fathers were added. The most celebrated catena is the *catena aurena* of Thomas Aquinas, which was translated at Oxford under the superintendence of Mr. J. H. Newman. The subsequent conduct of Mr. Newman has led those who were willing to attach some authority to that work to examine it carefully, and the result has been the detection that Thomas Aquinas has sometimes modified the quotations he has made from the fathers; and the whole, as a commentary, is inferior to the commentaries of modern theologians (Farrar, *Eccl. Dict.* s. v.; Hook, *Ch. Dictionary*, s. v.).

The application of this name to works of this sort has been attributed to Thomas Aquinas in consequence of the above collection on the four Gospels; but that it is of later invention appears from the fact that the older editions of this work bear the title of *glossa continua*, according to what was the customary phraseology of the time, and that Thomas himself, in his dedication to Pope Urban IV, calls his work *continua expositio*. The early names for these among the Greeks were *ἐπιτομαὶ ἑρμηνειῶν*, *συναγωγαὶ ἐξηγήσεων*, *σχόλια ἀπὸ διαφέρων ἑρμηνειῶν*, etc., which are more justly descriptive of their contents than the later names *χρυσᾶ κεφάλαια* and *σειραί*. These catenæ are

of different kinds. "Sometimes the words of the fathers from whom they were compiled are presented in a mutilated state, and not as they were originally written. Sometimes the bare exposition is given, without the reasons by which it is supported. Sometimes we find that the opinions of different writers are confounded, that being assigned to one which properly belongs to another. By far the greater number appear to have been hastily and negligently made, with so many omissions, corruptions, and errors that they cannot be relied on" (Davidson, *Hermeneut.* p. 156). All are not alike in the method of their arrangement, nor are all equally skilfully or neatly arranged. They vary, also, according as the writers from whom they are drawn were attached to the grammatical, the allegorical, or the dogmatic principle of interpretation; and sometimes the compiler's own inclination in this respect gives a character to his work. The use of these catenæ is, nevertheless, considerable, as they preserve to us many fragments of Aquila and the other versions of the Hexapla; as they contain extracts from the works of interpreters otherwise unknown to us, and as they occasionally supply various readings.

The number of these catenæ is considerable; many yet remain in MS. Of those that have been printed may be mentioned: *Catena Gr. Patrum in beatum Job, collectore Niceta*, ed. Pat. Junius (London, 1637, fol.); *Symbolarum in Matthæum tomus prior exhibens Catenam Gr. Patrum xxi*, edit. P. Possinus (Tolos. 1646, fol.); *Ejusd. tomus alter quo continetur Catena PP. Gr. xxx*, interpret. Balth. Corderius (Tolos. 1647, fol.); *Catena Gr. PP. in Evang. sec. Marcum* collect. atque interp. P. Possinus, etc. (Rom. 1673, fol.); *Catena lxv Gr. PP. in Lucam, quæ simul Evangg. introducit explicatiorum, luce et latinitate donata*, etc. a B. Corderio, Antw. 1628, fol.); *Catena PP. Gr. in Joannem ex antiquiss. Gr. codice in lucem*, ed. a B. Corderio (Antw. 1630, fol.); *Catenæ Gr. PP. in Nov. Test.* ed. J. A. Cramer (Oxon. 1844, 8 vols. 8vo). To this class belong also the commentaries of Theophylact, Euthymius Zigabenus, Œcumenius, Andreas, Arethas, Bede, Aquinas, etc.

The introduction of this class of commentaries has been assigned to Olympiodorus by Wolf and others, but this cannot be substantiated; still less can the opinion of those who would ascribe it to Procopius Gaza. It is probable that the practice of compiling from the great teachers of the Church grew up gradually in the later and less enlightened ages, partly from a feeling of veneration for these earlier and brighter luminaries, partly from inability to furnish anything original on the books of Scripture. It was a season of night, when those who sought after truth felt that even reflected lights were a great blessing (see Simon, *Hist. Crit. des princ. Commentateurs de N. T.* c. 30, Ittigius *de bibliothecis et catenis patrum* [Lips. 1708]; Fabricius, *Bibl. Gr.* vii, p. 728; J. C. Wolfius, *Exercitatio in cat. PP. Gr.* reprinted in Cramer's *Catenæ in N. Test.* i; Noesselt, *De Cat. PP. Gr. in N. T.* [*Opusc.* iii, 325 sq.]; Cramer's *Præfatio* to his edition of the Catenæ). See COMMENTARY.

Caterpillar is the rendering in the Auth. Vers. of two Heb. words: 1. Invariably of חָסִיל, *chasil'* (occurs 1 Kings viii, 37; 2 Chron. vi, 28; Psa. lxxviii, 46; Isa. xxxiii, 4; Joel i, 4; ii, 25); 2. Occasionally (Psa. cv, 34; Jer. li, 14, 27) of יֶלֶק, *ye'lek*, elsewhere "canker-worm" (q. v.).

The English word *caterpillar* belongs strictly to the *larvæ* of the genus Lepidoptera, and more especially to the larvæ of a section of it, the *Papilionidæ*. It is, however, far from proved that the *chasil* is any species of caterpillar. The root חָסַל, *chasal'*, signifies to "consume" or "devour," and it is especially used to denote the ravages of the *locust* (Deut. xxviii, 38). The word βροῦχος, by which it is frequently rendered in the Sept., from βρώσκω, "I eat up," conveys also the idea of ravenousness. The Arabic and Syriac terms also indicate a creature whose chief characteristic is voracity, and this attaches to all the species of *locusts*. The ancients, indeed, concur in referring the word to the locust tribe of insects, but are not agreed whether it signifies any particular *species* of locust, or is the name for any of those *states* or *transformations* through which the locust passes from the egg to the perfect insect. The Latin fathers take it to mean the *larva* of the locust, and the Greek understand it as the name of an *adult* locust. The Latins give the name *bruchus* to the young locust before it has wings, call it *attelabus* when it begins to fly, and *locusta* when it is fully able to fly. The superior antiquity, however, of the Sept. entitles its opinion to preference, and in some passages it ascribes *flight* to the βροῦχος, and speaks of it as a distinct species; and in the former particular, especially, it is difficult to suspect it of an egregious error. The statement of Aristotle is also worthy of notice, who speaks of the *attelabos* as a mature insect, for he refers to its parturition and eggs (*Hist. An.* v, 29). The arguments and speculations of the most eminent modern writers may be seen in Bochart, *Hieroz.* ed. Rosenmüller, iii, 256 sq. (Lips. 1793-6). See LOCUST.

Cathări (καθαροί, *pure*) or CATHARISTS (q. d. *Puritans*), a name applied at different times in Church history to different sects; all, however, characterized by aiming at, or at least pretending to, peculiar purity of life and manners. 1. It was assumed by the Novatians in the third century, who excluded from the Church all who fell into sin after baptism. See NOVATIANS. 2. The name of Cathari was also given in the twelfth century to the sects of the Albigenses, Vaudois, Patarini, and others. The Roman Catholic historians abound in frightful accounts of the heresies and immoralities of all these sects, to whom they attributed all the bad men and bad deeds of their times. Some modern Protestant writers, yielding too ready credence to the Roman historians, treat of the Cathari as if they were all dualists, if not Manichæans. The truth seems to be that the origin of most, if not all, of the sects above named is to be sought in circumstances of general operation, and principally in a prevailing sense of the corruptions of the dominant Church, and of her perversions of Gospel truth. That some of the sects thus originated professed dualistic doctrines is not to be doubted; that *all* were corrupt in doctrine and life is probably an invention of their persecutors. See ALBIGENSES.

I. *History.*—The origin of the Cathari is unknown; the name itself, however, is Greek, and indicates an Oriental origin. That an earnest spirit of protest against the corruptions of Rome arose in Western Europe during the Middle Ages, and manifested itself especially about the thirteenth century, is certain; but the doctrines and some of the rites of the really dualistic Cathari were doubtless derived from the East. It was formerly thought that the Cathari were lineal descendants of the Manichees of the third and fourth centuries; but this view is now abandoned. There is no subtle religious philosophy like that of the Manichæans found among the Cathari; their whole system was popular rather than mysterious. "According to the Manichees, the creation is the result of the union of the soul of the world with matter, while the Cathari taught that the whole material creation was exclusively the work of the evil principle. Above all, there is among them no trace of the profound personal reverence for Manes, and worship of his memory, which was one essential characteristic of the genuine Manichees, who looked upon their founder as the Paraclete promised by Jesus to his disciples. The Priscillianists succeeded the Manichees in the West, and the Paulicians in the East; yet these latter, properly Syrian Gnostics, execrated Manes. The Paulicians were thought by Mosheim, Gibbon, and Maitland to have been the immediate religious ancestors of the Cathari. It is

well known that numbers of those religionists were transplanted into Thrace by Constantine Copronymus about the middle of the eighth century. Yet the Paulicians had no rites or ceremonies whatever, no ecclesiastical or hierarchical organization; they were strangers to ascetic abstinence from animal food, and did not condemn marriage. Such radical differences as these will not allow us to suppose the heterodox movement of Southern and Western Europe to have been a simple transplantation of Asiatic Paulicianism, though this sect may have contributed in some measure—more or less directly—to the formation of Catharism. The fact seems to be that Dualism manifested itself in Christendom at different periods under various successive and independent forms" (*Lond. Quart. Review*, iv, 10). Schmidt assigns it a Slavonic origin (South Macedonia), and ascribes its introduction into Italy to Slavonic traders. The first Cathari in Italy were found about A.D. 1035 near Turin, and their chief and others were burned. By the twelfth century they were established at various points, from Upper Italy to Calabria. A Romanist writer has recently sought to show that Dante was a Catharist (Aroux, *Dante hérétique*, Paris, 1854; and *Chef de la Comédie Anti-catholique de Dante Alighieri*, Paris, 1856). In the thirteenth century, Pungilovo, said to have been a Catharist, but a man of eminent charity and goodness, came near being canonized by the Roman Church. See CANONIZATION. The greatest successes of the Catharists in Western Europe were in the south of France, where they were either identical with the Albigenses, or confounded with them. See ALBIGENSES. During the twelfth century they, and all other dissidents from Rome, suffered grievous local persecutions; but there "had been no general, persevering, systematic attempt to exterminate them. Meantime they had spread from Constantinople to Spain; they were masters in the Slavonic provinces which now form the north-east of Turkey; they were formidable in Lombardy; they had audaciously insinuated themselves into the pontifical city itself; above all, the only transalpine nation that had emerged from barbarism had almost thrown off its allegiance to Rome; heresy sat enthroned in a central region, whence, in one generation, it could spread over France, Spain, and Italy. The Church was in peril; but the year 1198 witnessed the beginning of a pontificate in which an iron will was to put forth in her service all the resources of rare intrepidity, unremitting vigilance, and far-seeing sagacity. Innocent III was the very incarnation of the idea of the papacy; he was distinguished by precisely the sort of character and talents which were qualified to effect the purposes of the hierarchy of which he was the head." During his pontificate, the cruel crusades against the Albigenses and Cathari, which have made the names of Innocent and Dominic notorious in history, swept away thousands of Catharist Dualists and of simple-minded Albigenses together. See ALBIGENSES. There were congregations of them enough to constitute whole dioceses in the thirteenth century; but the Inquisition, directed by Innocent III, and established by the Council of Toulouse, 1229, for the search and suppression of heresy, pursued them relentlessly; so that after the fourteenth century no traces of them are to be found.

II. *Doctrines.* —The heretical Cathari held to Dualism, i. e. to God as the original good, and to an evil principle as the author of evil. This is a simple, and, to an uneducated mind, a natural solution of the problem of the origin of evil. The *absolute* Dualists held that the evil principle was an original one as well as the good. The struggle between them is eternal. "It was believed that some souls had been created by the evil being, and, of course, would never be saved. Such were all atrocious criminals, tyrants, persecutors, enemies of God and of his Church. Others, created by the good God, had been seduced from the heavenly world above by Satan, who disguised himself, for the purpose, as an angel of beauty and light. These were condemned to expiate their offence in earthly bodies, and to pass from one body to another, sometimes even, as an additional punishment, assuming the shape of animals, until, at last, they should obtain deliverance from their terrestrial hell by being admitted into the true Church. The *consolamentum* (see below) reunites the exiles to their guardian angels (called 'Holy Ghost' or 'Paraclete'), of whom there is a distinct one for every soul of heavenly creation. St. Paul, in particular, had successively inhabited thirty-two bodies. Of course there was to be no real resurrection."

The majority of the Cathari held to a more moderate form of Dualism. Of this class were the Bogomiles (q. v.) in Slavonia and the East; and in Italy, the Concorensians or Concorezenses, so called from a corruption of the name of the town Coriza, in Dalmatia. They held to one God, who created matter from nothing; but the arrangement of matter into the existing form of the visible world, in which so much evil exists, was due, not to God, but to a fallen spirit—an exceedingly mighty angel, who seduced a third of the heavenly host. The absolute Dualists held that all souls came to the earth at once; the Concorensians maintained that Adam and Eve were created (their bodies by the evil power, their souls from God), and that all souls are derived from them. Hence the metempsychosis of the absolute duality had no place in their system. The Word of God, both in the O. T. and N. T., was interpreted by the Catharists to suit their dualistic theory. Jesus Christ, the highest of created beings, was sent from heaven to teach the captive spirits the secret of setting themselves free from the chains of matter and of evil. He came in an ethereal body, which had only the appearance of the human form; for, as he said of himself, he is "from above" (John viii, 23), or, as St. Paul said, "from heaven" (1 Cor. xv, 47). He expressly denied having inherited anything from his mother (John ii, 4). He had but the likeness of flesh (Rom. viii, 3; Phil. ii, 8). It was for this reason that he could walk upon the water; and this was the glory revealed on the Mount of Transfiguration. His death, not being real, was but an apparent triumph of the evil one.

In *Ethics*, all classes of Cathari held that sin is "the lust after the created." The world, as the work of the evil one, is evil, and all contact with it leads to sin. Among mortal sins were wealth, war, killing of animals (except fish), carnal connexion, whether in or out of wedlock (inasmuch as it increases the number of fallen souls). Purification from sin was to be obtained by renouncing the world and entering the Church of the Cathari, out of which salvation could not be had.

III. *Usages.*—The various sects of Cathari agreed very generally in their usages, however they might differ in doctrine. There were two classes of members, the *perfect* (perfecti) and simple *believers* (credentes). The former were admitted by the "spirit-baptism," called the *consolamentum*, the ceremony being a simple imposition of hands. (Water baptism was rejected.) By the imposition of hands the Holy Ghost was said to be imparted, and the recipient became one of the *perfect*. To this class belonged the authority of the Church; they administered its rites, and governed it as successors of the apostles. A manuscript in the Romance language was discovered in 1851, and is now in the *Palais des Arts* at Lyons. It was published by Cunitz, Jena, 1852; also in the *Strasburger Beiträge z. d. theol. Wissenschaften*, vol. iv, 1852. It contains a short liturgy, beginning with the Lord's Prayer, the Doxology, and the first seventeen verses of St. John's Gospel in Latin. Then follow in Provençal, first, an act of confession; secondly, an act of reception among the number of *believers*; thirdly, an act of reception among the number of *Christians* or *Perfects*; fourthly, some special directions for the faithful; and, lastly, an

act of consolation in case of sickness. The formula for the act of confession terminates with the following prayer:

O thou holy and good Lord, all these things which happen to us, in our senses and in our thoughts, to thee we do manifest them, holy Lord; and all the multitude of sins we lay upon the mercy of God, and upon holy prayer, and upon the holy Gospel; for many are our sins. O Lord, judge and condemn the vices of the flesh; have no mercy on the flesh born of corruption, but have mercy on the spirit placed in prison, and administer to us days and hours, and genuflexions, and fasts, and orisons, and preachings, as is the custom of good Christians, that we may not be judged nor condemned in the day of judgment with felons.

The first degree of initiation, or the act of reception into the number of believers, is called "the delivery of the orison," because a copy of the Lord's Prayer was given to the neophyte. It begins thus:

If a believer is in abstinence, and the Christians are agreed to deliver him the orison, let them wash their hands, and the believers present likewise. And then one of the *bons hommes*, the one that comes after the elder, is to make three bows to the elder, and then to prepare a desk (*desc*), then three more bows, and then he is to put a napkin (*touala*) upon the desk, and then three more bows, and then he is to put the book upon the napkin, and then let him say the *Benedicite, parcite nobis*. And then let the believer make his salute, and take the book from the hand of the elder. And the el er must admonish him, and preach from fitting testimonies (that is, texts). And if the believer's name is Peter, he is to say, "Sir Peter, you must understand that when you are before the Church of God, you are before the Father, and the Son, and the Holy Ghost. For the Church is called 'assembly;' and where are the true Christians, there is the Father, the Son, and the Holy Ghost."

The final initiation, or *consolamentum*, is called "the baptism of the Spirit." Here is an extract from the formula of its celebration:

Jesus Christ says, in the Acts of the Apostles, that "John surely baptized with water; but ye shall be baptized with the Holy Ghost." This holy baptism of imposition of hands wrought Jesus Christ, according as St. Luke reports; and he said that his friends should work it, as reports St. Mark: "They shall lay hands on the sick, and they shall receive good." And Ananias wrought this baptism on St. Paul when he was converted. And afterwards Paul and Barnabas wrought it in many places. And St. Peter and St. John wrought it on the Samaritans . . . This holy baptism, by which the Holy Spirit is given, the Church of God has had it from the apostles until now; and it has come down from *bons hommes* to *bons hommes*, and will do so to the end of the world.

The *perfecti* were bound to special fasting and abstinence—from property, and from marriage. They had signs by which their persons, and even their houses, could be recognised by the initiated. Rainerius (who apostatised from Catharism to the Church of Rome) estimated the number of "the perfect" at about 4000 in all Europe. The *credentes*, or simple believers, were not subject to the special restrictions named above, but were bound to confession to their ministers, and to seek the *consolamentum* before death, as essential to salvation unattainable by the great mass of mankind. With them, quite as much as with the Roman Catholics, salvation was made to depend upon adhesion to a given religious community; and as the auditors generally put off receiving the *consolamentum* to the hour of death, this ceremony became invested with a magical virtue, like the sacraments of the dominant Church.

Their religious services were entirely free from the pomp and display of the Established Church. The places of worship were destitute of ornaments, crosses, and images; at one end was a simple table, covered with a cloth, on which lay the New Testament. Worship consisted of reading the Scripture, exposition of it, and prayer. They rejected the baptism of the Church of Rome both because the hierarchy was not the true one, and because water was created by the evil god; and yet, with some inconsistency, they substituted the blessing and breaking of bread, without wine, for the Romish eucharist.

The excellent writer in the *London Review*, whom we have cited, makes the following just remarks upon the *source* of the false views of the Cathari, as existing in all ages: "Is there no overt Manichæism displayed in our own day in the false asceticism of the Puseyite; and if there be no latent Manichæism in the views of the extremely opposite section of Protestants, whence the tendency to treat human nature as intrinsically evil, not as merely subjected to evil; to make human powers, physical and mental, evil in their use, and not merely in their abuse; to identify society and its institutions with 'the world,' against which the Christian is forewarned? No; however it may disguise itself, and however its manifestations may be varied, that has ever been one and the same instinct of self-justification, hidden in the recesses of the heart, which treats sin as a something external to the will, and, to a certain extent, inevitably imposed; which makes holiness and faithfulness to God consist in something easier than the abdication of the idol self. This insidious instinct stops at no sacrifices provided it can maintain itself. It inspired the stern 'Touch not, taste not, handle not,' of the earliest Gnostics of the apostolic times (Col. ii, 21); and it has worked, with more or less intensity, in every age of the Christian Church."

IV. *Literature.*—The Roman sources are Bonacorsi, in D'Achery, *Spicil.* i, 208; Moneta, *adv. Catharos et Valdenses* (Rom. 1743); Rainerius (about 1250), whose account is analyzed by Maitland, *Facts and Documents on the History, etc. of the Albigenses and Waldenses* (Lond. 1832). The recent writers are Neander, *Ch. Hist.* iv, 565 sq.; Maitland (as above); Schmidt, *Hist. et Doct. de la Secte des Cathares* (Par. 1849, 2 vols. 8vo); Hahn, *Geschichte d. Ketzer im Mittelalter* (Stuttgart, 1845–47). See also *London Review*, April. 1855, art. i; Gieseler, *Ch. History*, ii, § 84, 87; Hahn, *in Studien u. Kritiken*, 1852, Heft. iv; Schmidt, in Herzog's *Real-Encyklopädie*, vii, 461 sq.

Catharine, the name of several so-called *saints* of the Greek and Roman churches.

1. A martyr, who suffered at Alexandria under Maximin II. The Greek and Roman accounts, which are not at all to be depended on, state that she was a rich and noble lady, who, having entered upon a disputation with certain heathen philosophers at the command of Maximin, and vanquished and converted them to the faith, was, together with them, put to death. She is said to have been put upon an engine made of wheels armed with spikes to lacerate her body, but when the machine was put into motion her bonds were miraculously broken, but she was immediately beheaded. Hence the name of *Catharine-wheel.* Eusebius (*Eccl. Hist.* viii, 14) speaks of a famous Alexandrian woman, who, when other women of the city yielded to the lust of the tyrant Maximin, resolutely resisted and overcame him, for which she was punished with exile and the loss of all her property. Joseph Assemanni thinks that this is the only account of *St. Catharine* that can be depended on. Her remains are said to be still kept in a marble chest in the monastery of Mount Sinai, in Arabia (Pocock's *Travels*, i, 140, fol.). She is commemorated on Nov. 25.—Butler, *Lives of Saints*, Nov. 25; Landon, *Eccl. Dict.* s. v.

2. Of Sweden, a princess, born about 1330, who, being contracted in marriage to a young nobleman named Egard, persuaded him to join her in making a vow of perpetual chastity! She died abbess of the monastery of Vatzen, March 24, 1381.—Butler, *Lives of Saints*, Nov. 22; Landon, *Eccles. Dictionary*, s. v.

3. Of Sienna, was born at Sienna in 1347, and early devoted herself to an austere life. In 1365 she received the habit of the third order of St. Dominic, and soon became celebrated for her recluse life, revelations, and miraculous powers of conversion! She induced Pope Gregory XI to restore the pontifical throne to Rome from Avignon. She used all her efforts to cause Urban VI to be recognised as the lawful successor of Gregory. She died April 29, 1380. Pius II published the bull for her canonization June 29, 1461, and her festival is observed on April 30.—A. Butler, *Lives of Saints*, April 30; Chavin, *Vie de St. Catharine* (1846); Landon, *Eccles. Dictionary*, s. v.

4. Of Bologna, born of noble parents Sept. 8, 1413.

In 1427 she entered among the nuns of St. Francis at Ferrara, who soon after adopted the severe rule of St. Clare. Afterwards she became abbess of a new convent of the order in Bologna. She is said by Roman writers to have had the gifts of prophecy and miracles! She died March 9, 1463, on which day she is commemorated. A spurious book of her Revelations was published at Bologna in 1511.—Butler, *Lives of Saints*, March 9.

5. Of Genoa, daughter of James Fieschi, viceroy of Naples, was born at Genoa in 1448, and at about sixteen was married, against her will, to a gay young profligate named Julius Adorna, who for many years caused her the greatest affliction. Being left a widow, she devoted herself to the care of the sick and poor. She died Sept. 14, 1510, leaving a few works of devotion.—Butler, *Lives of Saints*, Sept. 14; Upham, *Life of Cath. Adorna* (N. Y. 1856, 12mo).

6. Of Ricci, was born at Florence in 1522. In 1535 she took the veil among the Dominican nuns at Prato, in Tuscany. She was made perpetual prioress at twenty-five, on account of her sanctity and ascetic life. The Bollandists say that Philip of Neri was allowed to converse with her in a vision, she being at her convent and he at Rome! She died Feb. 2, 1589, and was canonized in 1746.—Butler, *Lives of Saints*, Feb. 14.

Catharinus, Ambrosius, or, more properly, *Lancelot Politi*, was born at Sienna in 1483. He studied law, and afterwards taught that science in several Italian universities; but in 1521 he entered the Dominican order at Florence, and in 1545 accompanied the cardinal del Monte to the Council of Trent. He became afterwards bishop of Minori in 1546, and archbishop of Conza in 1551. He died at Rome in 1553. As a theologian he stood high for learning, but was much given to controversy, and did not spare either the fathers or the dogmas of his Church in his attacks. His principal works are: *Commentaria in epistolas Pauli* (Venice, 1551, fol.):—*Enarrationes in Genesin* (Rome, 1552, fol.). Some of his writings were published under the title *Opuscula* (1542).—Pierer, *Universal-Lexikon*, s. v.; Dupin, *Eccl. Writers*, 16th cent.; Niceron, *Mémoires*, t. xxxiv.

Cathcart, Robert, D.D., a Presbyterian minister, was born Nov. 1759, near Coleraine, Ireland, where he was classically educated. He afterwards entered the University of Glasgow, was licensed by the Presbytery of Route, and labored within its bounds for several years. On coming to America in 1790 he became a member of the Presbytery of Philadelphia, and in 1793 became pastor of the churches of York and Hopewell, Pa., where he spent nearly fifty years of eminent usefulness. He was a member of the General Assembly for nearly thirty years in succession. He pursued his labors with unwearied diligence, and died Oct. 19, 1849. He published *A Sermon on the Death of Rev. Dr. Davidson*, 1812.—Sprague, *Annals*, iii, 559; *Presb. Quart. Rev.* Oct. 1860, art. vi.

Cathĕdra (Latin *cathedra*; Gr. καθέδρα—from κατά, down, and ἕδρα, a seat). In classical archæology *cathedra* means a chair with a back, but without arms, and usually used by women. Cathedræ were also used by teachers of gymnastics while giving instruction, and, later, by all public teachers. Following this usage of the word, the term has been applied to the chair or office of professors in universities or other high schools of learning. The English word *chair* is used in the same way.

In the early Christian Church the term cathedra was applied to the seats bishops and presbyters occupied during divine service in such rooms as Christians were permitted to assemble in before they were allowed to build churches. In many of the crypts in the Catacombs at Rome and elsewhere are seats cut in the rocks, supposed to have been thus used. Later, when church edifices were erected, the cathedræ were placed in the middle of the semicircular apsis at the eastern or rear end of the church, and occupied by the choir. In Rome many of the cathedræ were taken from the public baths, and were thus of marble, and decorated with designs from classical mythology. Later, they were decorated with symbolic designs of the Christian faith, as the head of a lion, representing the force and vigilance of a good bishop; the head of a dog, representing his vigilance and fidelity; or a dove crowned with a nimbus over the back of the chair, representing the Holy Spirit which was to shed light into his heart. The cathedræ of the 5th and 6th centuries were often inlaid with ivory and precious stones, after the style of the Alexandrian mosaics. Later, they were richly decorated and heavily gilt. Very early in the history of the Church they were held as precious mementoes of favorite bishops. Traditions, unworthy of credit, are attached to the reputed chairs of St. Peter in the Vatican (Rome), of St. Mark in Venice, and of St. Paul in Salonica. In the Gaulic Church, for a time, the bishops were buried seated in their chairs, which were afterwards taken up and preserved with great respect.

In the paintings of the Catacombs, in early mosaics and miniatures, cathedræ are often represented with either a literal or figurative meaning. Thus, in the Catacombs, a bishop is represented stretching out his hand to a woman and to a sheep, thus representing the audience and the flock; in another, the bishop is holding up the Word; God the Father is represented on a cathedra receiving the gifts of Cain and Abel; the Redeemer is thus seated, receiving the crowns of gold from the seven elders [see Apocalypse]; Christ is seated on a cathedra surrounded by eight martyrs. Two chairs in two niches, with a table between them bearing the open Bible, represent a council (in the Baptistery of Ravenna). In the church of Santa Maria della Mentorella (in Latium) is a work in gilded bronze, representing the twelve apostles on seats; between them is a cathedra supporting the open Bible, as the source of all authority; above is a lamb, bearing a cross with a banner, having the inscription "*Ego sum ostium et ovile ovium*—"*I am the gate and the fold of the sheep*;" a chalcedony in Cortena has a cathedra with Ἰχθύς cut on it.—Bingham, *Orig. Eccles.* bk. viii, ch. vi, § 10.

Cathedral [see Cathedra]. (1.) The church edifice containing the cathedra or bishop's chair, i. e. the bishop's church in a diocese, usually the largest and most magnificent church in a diocese. The modern use of the term cathedral, as designating the church in which the bishop has his throne, is confined to the Western Church, and is posterior to the tenth century. In the East such churches are called the great church, the episcopal church, or simply the church.

(2.) Cathedral (adjective)—(*a*) pertaining to a cathedral, as "cathedral service;" (*b*) official or authoritative, as the "cathedral determination of an article."

Catholic (καθολικός [κατά and ὅλος], *general, universal*), a title given to the Christian Church on account of its being not confined (like the Jewish) to one people, but embracing members out of every nation. "As '*the* Church' is (in one of its senses) employed to signify all Christians, who are 'members one of another,' and who compose the body of which Christ is the head, so the title 'catholic,' or 'universal' is a necessary indication of the use of the word 'church' in that sense. The Catholic Church comprehends the entire body of true Christians; but it is no one community on earth—it has no one visible ruler or governor. Any individual church may be included in it, but cannot with propriety be called the Catholic Church" (Eden, s. v.).

1. In the primitive Church, the title "catholic" came into use at an early period to distinguish the

Christian Church from the Jewish, which was national, while the Christian body was to include all mankind. At a later period it was used to distinguish those who adopted the so-called "heresies," within the Christian Church, from the body of believers who held the true faith, and to whom alone, and to whose belief, the term "catholic" was applied. The earliest uses of the word (e. g. of Polycarp [† 166], in an epistle preserved in Eusebius, *H. E.* iv, 15; Clemens Alex. [† 220], *Stromata*, vii) are in the sense of the general diffusion of the Church. It is used in the Apostles' Creed (third century), and after the adoption of the Nicene Creed it became a common title of the Church (see Pearson, *On the Creed*, art. ix, note c). Chillingworth interprets the "Holy Catholic Church" in the Creed to mean "the right that the Church of Christ, or rather, to speak properly, the Gospel of Christ, hath to be universally believed. And therefore the article may be true, though there were no Christian Church in the world" (Chillingworth, *Works*, fol. p. 196). Pacianus (A.D. 372), in answer to Sempronian the Novatian, who demanded of him why Christians called themselves Catholics, replied, "Christian is my name, and Catholic my surname; the one is my title, the other my character or mark of distinction" (cited by Bingham). Clarke (*Sermons* [vol. iv, ed. 1730] *on the Catholic Church*) gives the following meanings of the word: "The *first* and largest sense of the term Catholic Church is that which appears to be the most obvious and literal meaning of the words in the text (Heb. xii, 23), 'The general assembly and church of the first-born which are written in heaven;' that is, the whole number of those who shall finally attain unto salvation. *Secondly*, The Catholic or Universal Church signifies, in the next place, and indeed more frequently, the Christian Church only—the Christian Church, as distinguished from that of the Jews and patriarchs of old; the Church of Christ spread universally from our Saviour's days over all the world, in contradistinction to the Jewish Church, which was particularly confined to one nation or people. *Thirdly*, The Catholic Church signifies very frequently, in a still more particular and restrained sense, that part of the Universal Church of Christ which in the present age is now living upon earth, as distinguished from those which have been before and shall come after. *Fourthly and lastly*, The term Catholic Church signifies, in the last place, and most frequently of all, that part of the Universal Church of Christ which in the present generation is visible upon earth, in an outward profession of the belief of the gospels, and in a visible external communion of the Word and sacraments." Pearson (*Exposition of the Apostles' Creed*, art. ix) explains the catholicity of the Church as consisting, generally, in "universality, as embracing all sorts of persons, as to be disseminated through all nations, as comprehending all ages, as containing all necessary and saving truths, as obliging all men to all kinds of obedience, as curing all diseases, and planting all graces in the souls of men."

2. The Roman Church arrogantly claims the name Catholic as exclusively her own, and designates all who do not belong to her communion as heretics and schismatics. It is bad enough in the Church of Rome to make this claim of the title "Catholic;" it is still worse for Protestants to concede it. The result of this concession, in most Protestant countries, is that common people have really no conception of the true use of the word Catholic. The words "Papist," "Papal," "Romanist," are all properly applicable to the Church of Rome, and imply no offensive meaning, as they are all legitimately derived. At all events, the word "Roman" should always be prefixed to "Catholic," if the latter term be used as part of the title of the Church of Rome. "There is a strange enchantment in words, which, being (although with no great color of reason) assumed, do work on the fancies of men, especially of the weaker sort. Of these power doth ever arrogate to itself such as are most operative, by their force sustaining and extending itself. So divers prevalent factions did assume to themselves the name of Catholic, and the Roman Church particularly hath appropriated that word to itself, even so as to commit a bull, implying Rome and the universe to be the same place; and the perpetual canting of this term hath been one of the most effectual charms to weak people. 'I am a Catholic, that is, a universal; therefore all I hold is true:' this is their great argument" (Barrow, *On the Pope's Supremacy; Works*, N. Y. ed. iii, 201). The Church of which Rome was so long the centre is not Catholic, but Latin; just as the Church of which Constantinople was the centre is not Catholic, but Greek. "There is, indeed, a Catholic or Universal Church, and therefore a universal Christianity. But to assert that the unity implied in the conjunction of these terms is, and must be, a *visible* unity, is, in a word, to give the lie to all Church history, both Greek and Latin, from a date almost immediately sequent on the apostolic age. And neither Greek, nor Latin, nor Teutonic Christianity, nor all of them together, can be *Catholic* Christianity, any more than a part of anything can be equal to the whole" (*Lond. Quarterly Review*, April, 1855, p. 150).

Bishop Bilson, in his *True Difference between Christian Subjection and Unchristian Rebellion* (1585), sums up the reasons for denying catholicity as a note of the Roman Church as follows (in dialogue form): "*Philander* (Romanist): What one point of our religion is not catholic? *Theophilus* (Anglican): No one point of that which this realm hath refused is truly catholic. Your having and adoring of images in the church; your public service in a tongue not understood of the people; your gazing on the priest while he alone eateth and drinketh at the Lord's table; your barring the people from the Lord's cup; your sacrificing the Son of God to his Father for the sins of the world; your adoring the elements of bread and wine with Divine honor instead of Christ; your seven sacraments; your shrift; your releasing souls out of purgatory by prayers and pardons; your compelling priests to live single; your meritorious vowing and performing pilgrimages; your invocation of saints departed; your rules of perfection for monks and friars; your relying on the Pope as head of the Church, and vicar-general unto Christ—these, with infinite other superstitions in action and errors in doctrine, we deny to have any foundation in the Scriptures, or confirmation in the general consent or use of the Catholic Church."

In fact, for Protestants to concede to Romanists the title "Catholics" is equivalent to acknowledging themselves heretics. "This concession may be harmless and innocent enough as far as Protestants are concerned, but it is most pernicious to those to whom the title is conceded. Men at all times have an inclination to trust in names and privileges, and nothing has proved, or will prove, a greater obstacle to progress in Christian truth than this feeling of being possessed of exclusive privileges—of being exclusively Catholics, i. e. members of the Catholic Church—of that holy community that must secure a special share of divine favor to every member of it."—Bingham, *Orig. Eccles.* bk. i, ch. i, § 7; Suicer, *Thesaurus Eccles.* s. v. καθολικός; Eden, *Churchman's Dictionary*, s. v.; Elliott, *Delineations of Romanism*, bk. iii, ch. ii, § vii; *Bellarmine's Notes of the Church confuted* (Lond. 1687, 4to, pp. 29-34); Litton, *The Church of Christ*, bk. ii, pt. ii, Introduction; Palmer, *On the Church*, pt. i, ch. xi, § 8. See ROMAN CATHOLIC CHURCH.

CATHOLIC, title of a prelate. See CATHOLICOS.

Catholic Apostolic Church, the name of a body of Christians which has had a separate organization for somewhat more than thirty years. The following article is from a member of the body.

I. *History.*—Towards the end of the first quarter of this century there began to be an increased spirit of prayer in Great Britain for the outpouring of the Holy Spirit, in promoting which the labors of the Rev. I. Haldane Stewart (of the Church of England) were most helpful. About the same time the Rev Edward Irving (q. v.) was called up from Glasgow to London, where for a number of years he preached with great power and effect on the coming and kingdom of Christ, his true humanity, and his work as the baptizer with the Holy Ghost. In respect to the last, he taught that the Church is now, and at all times, entitled to the spiritual endowments of the primitive age, because "the gifts and callings of God are without repentance;" but he had no clear conviction that they would be restored, nor did he urge his flock to pray for their restoration. The missionary employed by his Church to preach to the poor of the city, the Rev. A. J. Scott, had much stronger faith that they would be recovered than Mr. Irving himself, and, when on a visit to his friends in the west of Scotland in '28 or '29, he labored to convince them of the permanency of the gift of the Holy Ghost. Among them was Miss Mary Campbell, sister of Isabella Campbell, whose *Memoirs* were widely circulated more than thirty years ago, then living at Fernicarry. Through the careful study of the New Testament, she became convinced that the promise of the Comforter was for all generations, and she was led to pray, in concert with some friends, that God would again manifest himself as of old in the gifts of his Spirit. In March, 1830, when engaged in prayer with her friends, the power of the Holy Ghost came mightily upon her, and she was made to speak in tongues and prophesyings. Very soon afterwards, the same spiritual phenomena appeared in a family by the name of Macdonald, living at Port Glasgow, who, like Miss Campbell, were Presbyterians, and distinguished as well for purity of life as for zeal and devotion. One of the sisters, who was dangerously ill, was restored instantaneously to health through the faith of her brother, by whose instrumentality Mary Campbell was also raised up from what seemed to be the very brink of death. These occurrences naturally excited much attention not only in the immediate neighborhood, but throughout Great Britain, and in the summer of that year several persons—almost all of them members of the Church of England—went down from London and spent some weeks at Port Glasgow, to satisfy themselves as to the true character of these spiritual utterances. Being convinced by what they saw and heard that they were the work of the Holy Ghost, they met together after their return, with others of like faith, to pray that God would pour out his Spirit upon his whole Church. These meetings, which were held weekly at private houses, were continued throughout the winter, and it was not until April of the following year (1831) that any spiritual manifestation appeared. Then the mouth of a pious lady of the Church of England, under the pastoral care of the Rev. Baptist Noel, was opened in power, and she too spake in tongues and prophesyings. In the course of that year other persons, both men and women, received like spiritual gifts. Some of them were members of the Established Church, and others were Presbyterians and Dissenters; but it was chiefly in the congregation of Mr. Irving (and that after long and careful examination) that liberty was given to speak in spiritual power. This, together with his prominence in the eyes of the world, led to the connecting of his name with the work, although he and all who were of the same faith with him never ceased to protest against the name of Irvingites as a designation of the body.

These utterances, accompanied by many and striking cases of healing, continued in great power and frequency until the end of the year 1832, when a new form was given to the work by the restoring of the office of apostle. This was done, not by popular election, nor by any act of man, but by the voice of the Holy Ghost speaking through prophets, and thus expressing the mind and will of God, that one who had been a godly member of the Church of England, and had stood as a faithful witness to the work of the Holy Ghost, should serve him in this highest ministry. Others were afterwards, from time to time, called to the same office, until, in the year 1835, the full number was completed. Mr. Irving was not one of them, nor, with a single exception, any of his original congregation; three of them were clergymen, three were members of the bar, two of them had been members of Parliament, and all were men of high religious character.

At this time there existed a considerable number of congregations which had been gathered by the preaching of evangelists, and organized by the apostles previously called. When the number had been filled up, they were solemnly separated to their work with prayer and benediction in an assembly of the churches, as was done in Antioch in the case of Barnabas and Saul. They were then bidden, in the word of prophecy, to go to a secluded village in the south of England—Albury, the residence of Mr. Henry Drummond—and there read the Scriptures together in the presence of the prophets, that light might be thrown upon them by the word of the Holy Ghost. They were also directed to prepare a testimony of what God was doing, and to present it to the bishops of the Church of England and Ireland, which was done in Jan. 1836. A larger testimony was presented in 1838 to the Pope, the Emperor of Austria, and the King of the French, as the representatives of the great principles of government existing in Christendom—priestly rule, absolutism, and popular election—and afterwards to others of the chief rulers in church and state throughout Europe. In these testimonies (especially in the latter) the sins of Christendom in departing from the ways of God were pointed out, his approaching judgments proclaimed, and the coming of the Lord (for which the restoration of the Church was the preparation) held up as the only hope of deliverance to the sin-burdened and weary creation.

For a number of years the work made little progress outside of the British Isles, but the revolutionary movement in Europe in 1848 drew to it the attention of many in Germany, and churches were soon organized in Berlin and other cities and towns. It has gradually extended itself into Switzerland, France, Holland, Belgium, Denmark, and Austria, and also into North America, and believers are to be found in countries where there is as yet no liberty of worship.

II. *Organization and Polity.*—This body of Christians, who take the name of the Catholic Apostolic Church, as being the proper designation of all the baptized, and not as exclusively their own, look upon the spiritual work which has been briefly described, as a divine movement in the one Church to restore to it its original structure and endowments, in preparation for the now rapidly approaching advent of the Lord Jesus Christ. They believe it to be, not the founding of a new sect, much less the setting up of a new dispensation, but a work of healing and recovery in the one body of Christ, which has had a continuous and historic existence from the day of Pentecost to this hour. They recognise, therefore, the whole Christian Church as brethren, according to the measure of truth in doctrine and ordinances which it has retained in its several divisions. They believe that, in the purpose of God and in its own nature, it is one body; and that intercommunion between the parts is the true law of its being, and the necessary condition of its healthful growth; intercommunion, not as between distinct and independent nations, but as between the different portions of one and the same nation, having one central authority, and subject to common laws. The central authority which God gave to the Church in the beginning they believed him to have now restored, not for

the superseding of the existing ministries, but for the conveying of grace and strength more abundantly to all who will receive it. The apostolic office belongs to no sect, but is for the whole Church; and those who are gathered under it are not a sect, but a part of the one body brought into their right relations to the Head and to one another.

In respect to the organization of the Catholic Apostolic Church, its chief peculiarity lies in the fourfold ministry of apostle, prophet, evangelist, and pastor, as described by St. Paul in the 4th of the Ephesians. Apostles are rulers in the Church universal, by whom the Lord in his absence exercises his functions of authority; prophets are the special organs of the Holy Ghost, by whom light is imparted for the guidance of apostles in their work; evangelists carry forth the Gospel; and pastors feed and care for the flocks. The same fourfold distinction is brought out in the particular churches, in each of which, where circumstances allow of its being fully organized, there is an angel or chief pastor, representing to his own flock the Angel of the Covenant in the heavens, who has under him a body of elders in whom there should be seen the same fourfoldness of ministry as in the Church universal under Christ—some helping him in the work of rule, others exercising the prophetic gift, and others still acting as evangelists and pastors within the limits of the angel's charge. This variety of functions in the ministry is in accordance with a fourfold distinction in the intellectual and spiritual characters of men, to which the gifts of the Holy Ghost shape themselves—some having the power of rule, others the imaginative faculty, while in others the adaptive understanding or the affections are respectively predominant.

In every church, in addition to the angel and elders, there is a body of deacons, who are chosen by the people as being their representatives, and ordained by the angel; whose office it is to assist in the public services, especially the celebration of the Eucharist; to distribute the alms of the church to the poor, and to be the counsellors of the people in worldly matters. There are also under-deacons and deaconesses, as the necessities of the congregation may require. All ministers except those in the diaconal office are called by the voice of prophecy, and ordained by the hands of apostles. The apostles themselves are not ordained, there being none higher than themselves to confer on them authority and grace.

III. *Doctrines.*—They receive the Scriptures of the Old and New Testaments (rejecting the Apocrypha) as the plenarily inspired and authoritative revelation of God's will, and standard of doctrine for all generations. And they hold the common faith of Christendom, as expressed in the three great creeds best deserving the name of Catholic—the Apostles', the Nicene, and the Athanasian. They make use of no other creeds, and these are used constantly in the public services as a part of worship—the Apostles' being recited before God every day in the morning and evening services, the Nicene every Sunday in the eucharistic office, and the Athanasian on the principal feasts of the year. But they give especial prominence to the great doctrine of the Incarnation, with its corollaries of the death and resurrection of the Lord, and the descent of the Holy Ghost; teaching that the only and eternally-begotten Son of God took fallen humanity by being born of the Virgin, fulfilled in it as man the perfect righteousness of God, and yielded it to the death of the cross as a spotless and sufficient offering for the sins of the whole world; whereupon the Father gave him his reward by raising him from the dead in the incorruptible body, and exalting him in the human nature to his own right hand. He was thus constituted the Head of the Church, and his next step was to form the body by sending the Holy Ghost to make men one with himself in all the spiritual fruits and results of his victory. The three great ordinances which he has appointed in his Church for this end are, Baptism, which is for conveying his new or resurrection life to all who believe in him, and to their children, and which is counted valid whether administered by sprinkling, pouring, or immersing; the Lord's Supper, in which bread and wine are made in consecration, by the operation of the Holy Spirit, to be the spiritual mystery of the body and blood of Christ, and are partaken of for the nourishing and strengthening of his faithful members; and the rite of confirmation or sealing, in which, by the laying on of the hands of apostles, the Holy Ghost is given for endowing with heavenly gifts and the powers of the world to come those who have reached adult age and are walking in holiness of life. In respect to the Eucharist, they reject the Roman Catholic doctrine of transubstantiation on the one hand, and that of Zwingle on the other, holding that the elements of bread and wine are unchanged in their physical properties and essence by consecration, while they are made, by the operation of the Holy Ghost, to be, spiritually and not carnally, the body and blood of the Lord.

To gather the Church as the election of God out of all the nations of the earth, they believe to be the great work of this dispensation, at the completion of which the Lord will return and take his Bride to himself by raising the dead and changing the living saints, and will then proceed to set up his kingdom in the earth. First of all, he will deliver the Jews—both the two tribes which are known and the ten which are lost—from their dispersion and exile, and reconstitute them as the metropolitan nation in the land which God gave to their fathers; and then, by their instrumentality, he will extend his salvation to all the families of mankind. This millennial dispensation will continue through the thousand years spoken of by St. John, at the expiration of which there will be an apostasy among the nations outside "the camp of the saints and the beloved city," i. e. those whose standing is distinct both from the Church and the restored nation of Israel, through the instigation of Satan, then for the last time loosed from his prison-house, after which the final judgment, with its eternal retributions of good and evil, will ensue.

The Eucharist is made the centre of worship, as being the commemoration of the death of Christ, which opened the way of entrance into the Holy of Holies, where he now, as our great High-priest, fulfils the work of intercession. In this work his Church is called to take part, which she does in the highest sense when she shows forth his death in this holy sacrament, by presenting unto God in the consecrated elements the memorial of his sacrifice, and thereupon offering prayers and intercessions for all men. It is not the expiatory sacrifice of Jesus on the Cross which the Church thus renews and continues in the Eucharist (as the Roman Catholics teach), for he died once for all to make atonement for sin, and there can be no repetition of his death; but it is his present intercessory work in heaven. The Eucharist is celebrated on the forenoon of every Lord's day, and on other solemn and special occasions. The tithes and offerings of the people are brought up during the services, and solemnly dedicated to God in prayer. There are also morning and evening services for worship on every day of the year, at 6 A.M. and 5 P.M., consisting of confession of sin with absolution, the reading of the Holy Scriptures, the reciting of the Creed, the singing of a Psalm, and prayers in the fourfold form of supplications, prayers, intercessions, and giving of thanks, which are offered by the priests in order according to their respective ministries, all being gathered up and presented to God in the name of Jesus Christ, the great High-priest and Mediator, by the angel of the Church. In the principal congregations there are shorter services every forenoon and afternoon at nine and at three. There are also meetings for extemporaneous prayer, that all whom the Spirit moves to

pray may have liberty to express their desires unto God, and for the exercise of spiritual gifts, in which every one—even women and children—may yield themselves to speak in the power of the Holy Ghost. Sermons are preached on Sundays and at appointed times during the week. A ritual is used, constructed on the principle of gathering in one all that is most valuable in the worship of the whole Church. The ministers wear vestments in the public services, and lights and incense are used for their symbolical character. The ancient ordinance for anointing the sick with oil is restored to its right use; and for the relief of penitents there is the rite of private confession and absolution, but which is not compulsory, nor for the extortion of secrets. They believe that the end of the dispensation is rapidly approaching, and that the object and aim of all these ministries, and spiritual gifts, and ecclesiastical services, is to make ready a people for the Lord.

There are no published statistics of this body, but there are churches in many of the principal cities of England (seven in London) and Scotland; in Dublin and Belfast; in Paris, and a few other places in France; in Basle, and Berne, and other towns in Switzerland; in Berlin, and many other places in North Germany; and a number of smaller congregations in Holland, and Belgium, and North America.

To the above account it is proper to add that, in the judgment of the Christian Church generally, the distinctive doctrines of the Catholic Apostolic Church are regarded as erroneous, and its polity and usages as reactionary, and opposed to the true development of the Church.

1. *As to doctrine.*—The C. A. Church is especially distinguished by its doctrine as to spiritual gifts. "Like the Montanists of the second century, they look upon these apostolic gifts and offices as the necessary conditions of a healthy state of the Church at any time; make their disappearance the fault of Christianity; and hold it impossible to remedy the defects of the Church without a revival of the charisms and the apostolate. They appeal to such passages as 1 Cor. xii, 27-31; Eph. iv, 11-13, where undue emphasis is laid on 'till;' and to Thess. v, 19, 20; 1 Cor. xii, 31; xiv, 1, where the apostle not only warns Christians against quenching the holy fire of the Spirit, but also positively requires them to strive earnestly after His miraculous gifts. There seems to us to be here a mixture of truth and error on both sides. In these charisms we must distinguish between the essence and the temporary form. The first is permanent; the second has disappeared, yet breaks out at times sporadically, though not with the same strength and purity as in the apostolic period. In the nature of the case, the Holy Ghost, when first entering into humanity, came with peculiar creative power, copiousness, and freshness; presented a striking contrast to the mass of the unchristian world; and, by this very exhibition of what was extraordinary and miraculous, exerted a mighty attraction upon the world, without which it never could have been conquered. Christianity, however, aims to incorporate herself in the life of humanity, enter into all its conditions and spheres of activity as the ruling principle, and thus to become the second, higher nature. As it raises the natural more and more into the sphere of the Spirit, so in this very process it makes the supernatural more and more natural. These are but two aspects of one and the same operation. Accordingly we find that, as fast as the reigning power of heathenism is broken, those charisms which exhibited most of the miraculous become less frequent, and after the fourth century almost entirely disappear. This is not owing to a fault of Christianity, for at that very time the Church produced some of her greatest teachers, her Athanasius and her Ambrose, her Chrysostom and her Augustine. It is rather a result of its victory over the world. Spiritual gifts, however, did not then fully and forever disappear, for in times of great awakening and of the powerful descent of the Spirit, in the creative epochs of the Church, we now and then observe phenomena quite similar to those of the first century, along with the corresponding dangers and abuses, and even satanic imitations and caricatures. These manifestations then gradually cease again, according to the law of the development of a new principle as just stated. Such facts of experience may serve to confirm and illustrate the phenomena of the apostolic age. In judging of them, moreover, particularly of the mass of legends of the Roman Church, which still lays claim to the perpetual possession of the gift of miracles, we must proceed with the greatest caution and critical discrimination. In view of the overvaluation of charisms by the Montanists and Irvingites, we must never forget that Paul puts those which most shun free inspection, and most rarely appear, as the gift of tongues, far beneath the others, which pertain to the regular vital action of the Church, and are at all times present in larger or smaller measure, as the gifts of wisdom, of knowledge, of teaching, of trying spirits, of government, and, above all, of love, that greatest, most valuable, most useful, and most enduring of all the fruits of the Spirit" (Schaff, *Apostolic Church*, § 116).

2. Their worship is almost wholly out of the line of Protestant development and feeling. Their use of incense, and of lights on the altar; their priestly vestments—alb, girdle, stole, chasuble, rochet, etc.—with the pomp of their worship, belong neither to the primitive age on the one hand, nor to the Reformed Church on the other.

For a fuller account, by the author of the articles given above (the Rev. W. W. Andrews), see *Bibliotheca Sacra*, January, 1866, p. 108 sq. See also Schaff, in the *Deutsche Kirchenfreund*, vol. iii; *English Rev.* ix, 212; Thiersch (H. W. J.), *Vorlesungen über Katholicismus und Protestantismus* (Erlang. 1845, 1846, 2 vols.); Thiersch, *Die Kirche im Apostol. Zeitalter* (1852, 8vo); *London Quarterly Review*, No. iii, art. 1; *Liturgy and Litany of the C. A. Church* (N. Y. 1856); W. W. Catholic Epistles. The canonical epistles of James, Peter, and Jude, and the first of John, are so called because they are not addressed to any particular individual or church, but to Christians in general (Suicer, *Thes. Eccles.* ii, 15).

Hug gives the following view: "When the Gospels and Acts of the Apostles constituted one peculiar division, the works of Paul also another, there still remained writings of different authors which might likewise form a collection of themselves, to which a name must be given. It might most aptly be called *the common collection*, καθολικὸν σύνταγμα, of the apostles, and the treatises contained in it κοιναί and καθολικαί, which are commonly used by the Greeks as synonyms. For this we find a proof even in the most ancient ecclesiastical language. Clemens Alexandrinus calls the epistle which was dispatched by the assembly of the apostles (Acts xv, 23) the 'catholic epistle,' as that in which *all* the apostles had a share, τὴν ἐπιστολὴν καθολικὴν τῶν Ἀποστόλων ἅπαντων. Hence our seven epistles are catholic, or epistles of *all* the apostles who are authors" (*Introd. to N. T.* § 151). So, also, Eichhorn. See Horne, *Introduction*, pt. vi, ch. iv, § 1. See EPISTLES, APOSTOLICAL.

Catholic League. See LEAGUE.

Catholicos (καθολικός), (1.) The title given, under

Constantine, to his procurator, or vicar-general (after the organization of dioceses under imperial law), whose duty it was to see that all imperial rescripts were duly carried out. So in a letter from Constantine to Eusebius (preserved in Socrates, *Hist. Eccles.* i, 9), the emperor says: "Letters have been sent to the διοικήσεως καθολικόν, that he may provide all things necessary," etc. See Suicer, *Thes. Eccles.* s. v.

(2.) The official title of certain of the Oriental prelates, especially of the patriarchs of the Armenian Church. He is appointed head of that part of the church over which his jurisdiction extends; he only can ordain bishops and consecrate the sacred oil. The dignity of Catholicos is inferior to that of patriarch, but superior to that of metropolitan. There are three dignitaries bearing the title in the Armenian Church at present—the Catholicos of Etchmiadzin, the Catholicos of Aghtamar, the Catholicos of Sis.—Coleman, *Ancient Christianity*, ch. xxvii, § 2. See ARMENIAN CHURCH.

Cathu'ä (Καθουά), one of the family heads of the "servants of the Temple" (Nethinim) that returned from Babylon (1 Esdr. v, 30); apparently the GIDDEL (q. v.) of the Heb. texts (Ezra ii, 47; Neh. vii, 49).

Catlin, JACOB, D. D., a Congregational minister, was born at Hauvinton, Conn., March, 1758, and graduated at Yale, 1784. He became pastor in New Marlborough, Mass., July 4, 1787, was made D.D. by Yale in 1822, and died April 12, 1826. He published a work on theology, *What is Truth?* (1818); a volume, *Sermons collected* (1797); and a *Discourse before a Free-mason's Lodge* (1796).—Sprague, *Annals*, ii, 260.

Cattenburgh, ADRIEN VAN, an Arminian or Remonstrant theologian, born at Rotterdam Nov. 2, 1664, and filled the professorship of theology at Amsterdam for twenty-five years. He was intimately connected with Philip Limborch. He died in 1736, leaving (1.) *Spicilegium Theologiæ Christianæ Philippi a Limborch* (Amst. 1726, 2 vols. fol.):—(2.) *Bibliotheca Scriptorum Remonstrantium* (Amst. 1727, 8vo):—(3.) *Syntagma Sapientiæ Mosaicæ* (ibid. 1737, 4to), against Atheists and Deists. He also wrote a life of Grotius in Dutch.—Hoefer, *Nouv. Biog. Générale*, ix, 226.

Cattle (the representative in various passages in the A.V. of the Heb. words בְּהֵמָה, *behemah'*, a large *quadruped* in general, usually "beast" [see BEHEMOTH]; in Num. xx, 4, and Psa. lxxviii, 48, בְּעִיר, *beir'*, grazing *animals*, elsewhere "beast;" so the Gr. βοσκήματα, as being *fed*, 2 Macc. xii, 11, or θρέμματα, from being *reared*, John iv, 12; most frequently and characteristically מִקְנֶה, *mikneh'*, a *possession*, as sometimes rendered—from the fact that Oriental wealth ["substance," Job i, 3, 10] largely consisted in this kind of property; like the Gr. κτήνη, as being *possessed*, 1 Macc. xii, 23; also idiomatically, שֶׂה, *seh*, Gen. xxx, 32; Isa. vii, 25; xliii, 23; Ezek. xxxiv, 17, 20, 22, an individual *sheep* or *lamb*, as elsewhere rendered; or צֹאן, *tson*, Gen. xxx, 39, 40, 41, 42, 43; xxxi, 8, 10, 12, 41, 43; Eccles. ii, 7, *sheep* collectively or a *flock*, as rendered elsewhere), in scriptural usage, embraces the tame quadrupeds employed by mankind for domestic purposes, as oxen, buffaloes, horses, sheep, goats, camels, and asses (Gen. i, 25; xiii, 2; xxxii, 13-17; Ezek. xii, 29; xxxiv, 19; Num. xx, 19; xxxii, 16; Psa. l, 10). See each of these in their alphabetical place.

The Holy Land was eminently distinguished for its abundance of cattle, to the management and rearing of which the inhabitants, from the earliest times, chiefly applied themselves, as indeed they have always constituted the principal and almost only possession of a nomade race. In this case, wealthy people were exposed to all the vicissitudes of the seasons (Gen. xxxi, 40). Moses was a shepherd during his exile, Shamgar was taken from the herd to be a judge in Israel, and Gideon from his threshing-floor (Judg. vi, 11), as were Jair and Jephthah from the keeping of sheep; Saul and David might also be mentioned. Some of the prophets were called from that employment to the prophetic dignity, as Elisha was from the plough (1 Kings xix, 19), and Amos from being a herdsman. But the tending of flocks was not confined to the men. Rachel, the daughter of Laban, kept her father's sheep (Gen. xxix, 9), and Zipporah and her six sisters had the care of their father Jethro's flocks, who was a prince or priest of Midian (Exod. ii, 16). The following is a general treatment of the subject under its two great sections. See HERD; FLOCK.

Bull of Palestine.

I. *Neat Cattle.*—These are designated collectively by the Heb. term בָּקָר, *bakar'*; single animals of this kind are called אַלּוּף, *alluph'*, an "ox," or שׁוֹר, *shor* (Chald. תּוֹר, *tor*), a "bullock;" the calves are styled עֵגֶל, *e'gel*, often a *yearling*—fem. עֶגְלָה, *eglah'*, a "heifer" (also a young cow, even when broken to the yoke, Judg. xiv, 18; Hos. x, 11); when grown, but still in full youthful vigor, פַּר, *par*, a *steer*—fem. פָּרָה, *parah'*, a *heifer* (*juvencus*, *juvenca*: comp. Varro, *Res Rust.* ii, 5, 8). The nomadic Abrahamidæ (like the Homeric chiefs, see Feith, *Antiq. Hom.* p. 405) already practiced the raising of cattle (Gen. xii, 16; xviii, 7; xxiv, 35; xxxii, 5; xxxiv, 28; comp. xiii, 5), and when they emigrated into Egypt still carried it on (Exod. x, 9, 24; xii, 32 sq.). In later times, also, this was a principal pursuit of the Israelites, especially in several districts of Palestine (Deut. viii, 13; xii, 21; 1 Sam. xi, 5; xii, 3; 2 Sam. xii, 2; Psa. cxliv, 14; Jer. iii, 24; v, 11; Judith viii, 6, etc.). The oxen are there somewhat small, with short horns, and a bunch of fat on the shoulders (Hasselquist, *Travels*, p. 180; comp. Shaw, *Travels*, p. 150). The finest herds and strongest bullocks were found in Bashan, beyond Jordan (Num. xxxii, 4); hence the Bashanite steers are often put metaphorically for formidable enemies (Psa. xxii, 13), while Bashanite cows are a symbol of stately women (Amos i, 4). In the district west of the Jordan, the plain of Sharon, extending to the Mediterranean Sea, afforded the finest pastures (Isa. lxv, 10; see Jerome in loc.). Even the kings had their herdsmen (1 Chron. xxviii, 29). There was great demand for neat cattle; many hundreds were yearly slaughtered in sacrifice (and these were animals of the finest quality, as among other nations, see Herod. ii, 41; Xenoph. *Cyrop.* viii, 31; Varro, *Res Rust.* ii, 5, 11; Pliny, viii, 10, etc.), others were employed for food or festive occasions (Deut. xii, 21; 2 Sam. xii, 4; Tobit viii, 21; Matt. xxiii, 4), as then generally beef (1 Sam. xiv, 32; 1 Kings xix, 21; comp. iv, 23; Neh. v, 18), and still oftener veal was a feast to the Israelites (Gen. xviii, 7; 1 Sam. xxviii, 24; Amos vi, 4; Luke xv, 23, 27, 30), it being anciently regarded as an act of wanton prodigality to slay useful agricultural beasts (compare Apollon. Rhod. ii, 655 sq.) in order to enjoy their flesh (Ælian, *Var. Hist.* v, 14; *Anim.* xii, 34; Varro, *R. R.* ii, 5, 6; Pliny, *Hist. Nat.* viii, 70; Valer. Max. viii, 1; Cic. *Nat. Deor.* ii, 65). See FOOD. The milk was used either sweet or curdled, and was made also into cheese. See MILK; CHEESE; BUTTER. Cattle

were yoked to the plough (Deut. xxii, 10; 1 Kings xix, 19 sq.; Isa. xxx, 24; Amos vi, 12; Job i, 14; comp. Judg. xiv, 18; Josephus, *Ant.* xii, 4, 6), likewise for draught (Num. vii, 3, 7; 1 Sam. vi, 7; 2 Sam. vi, 3, 6), and were sometimes employed for burdens (1 Chron. xii, 40; comp. Ælian, *Anim.* vii, 4), but especially for threshing (comp. *Baba Mezia*, vi, 4; *Chelim*, xvi, 7). See AGRICULTURE. They were driven (Judg. iii, 31; 1 Sam. xiii, 21; compare Sirach xxxviii, 25; Acts ix, 5) with a pointed stick (מַלְמָד, *malmad'*, or דָּרְבָן, *dorban'*; *κέντρον* or *βούκεντρον*, also *βουπλήξ* in *Iliad*, vi, 135, Lat. *stimulus* [comp. *Schol.* ad Pindar, *Pyth.* ii, 173]), an instrument employed also for horses (Ovid, *Metam.* ii, 127; see Schöttgen, *De stimulo boum*, Frcf. a V. 1717). See GOAD. During summer cattle ranged under the open sky. In the stalls (2 Chron. xxxii, 28) their fodder (Prov. xiv, 4; Luke xiii, 15) was placed in a crib (אֵבוּס, *ebus'*; *φάτνη*). Besides fresh grass and meadow-plants (Dan. iv, 29; Num. xxii, 4), meslin (בְּלִיל, *belil'*, Job vi, 5; Isa. xxx, 24; תֶּבֶן, *te'ben*, Isa. xi, 7) is mentioned as provender of cattle, a mixed food, like the Roman *farrago* (Gesenius, *Thesaur.* p. 212). That salt (to gratify the appetite) was added may be inferred from Isa. xxx, 24 (see Gesenius in loc.). See SALT. Cattle were greatly annoyed by insects, and perhaps the קֶרֶץ, *ke'rets* (A. V. "destruction"), of Jer. xlvi, 20, indicates some sort of such noxious creature, namely, the gadfly or *œstrus* (see Hitzig in loc.; otherwise Gesenius in loc.). See BEEVE.

In the Mosaic law the following enactments relate especially to oxen: 1. The mouth of the threshing-cattle was not to be bound so as to prevent their eating the provender spread under them (compare Burckhardt, *Proverbs*, p. 67). See MUZZLE. Hence the term "threshing oxen" sometimes stands for fat or well-conditioned animals (Jer. l, 11; see Rosenmüller in loc.). 2. Whoever stole and then sold or slaughtered an ox must give five oxen in satisfaction (Exod. xxii, 1); but if the animal was found alive in the possession of the thief, he was merely required to make double restitution (Exod. xxii, 4). See THEFT. 3. Whoever met an ox that had fallen or strayed was under obligation immediately to help it up and bring it back to the owner (Exod. xxiii, 4; Deut. xxii, 1, 4), an injunction the more needful in a country not only thinly inhabited, but intersected by many desert tracts. See PALESTINE. 4. An ox and an ass must not be yoked together to the plough (Deut. xxii, 10). This prohibition is evidently akin to those relating to heterogeneous combinations, although Michaelis (*Mos. Rech'*, iii, 149) gives it another interpretation. See DIVERSE. Respecting unruly cattle (Exod. xxi, 28 sq.), see DAMAGES. It was considered unmerciful to take the only beast of a widow in pawn (Job xxiv, 3). See DEBT. On the subject generally, see Bochart, *Hieroz.* i, 268 sq.; Ugolino, *De Re Rust. Hebr.* (in his *Thesaur.* xix), ii, 9 sq. For the symbolical worship of the young bull, see CALF, GOLDEN. Compare BEAST.

II. *Small Cattle*: 1. *Sheep.*—These are designated collectively by צֹאן, *tson* (a general term, like *μῆλον* and *pecus*, including also goats), singly by שֶׂה, *seh*; while רָחֵל, *rachel'*, means *ewe*; אַיִל, *a'yil*, *wether* (Chald. דְּכַר, *dekar'*); כַּר, *kar*, a fat pasture *lamb*: כֶּבֶשׂ, *ke'bes*, a lamb of one to three years (comp. Gesen. *Thes.* p. 659); טָלֶה, *taleh'* (or טְלִי, *teli'*), a suckling or *milk-lamb*; מִשְׁנִים, *mishnim'* ("fatlings," 1 Sam. xv, 9), is an obscure term, possibly signifying *two-year-old* lambs (*oves secundarius*, Columella, *Res Rust.* vii, 3; comp. Bochart, *Hieroz.* i, 469). Next to neat herds, sheep formed the most important staple of Oriental nomadic pursuits in Aramæa (Gen. xxix, xxx) and Palestine (Gen. xii, 16; xiii, 5; xx, 14; xxi, 27; xxiv, 35; xxxii, 5; xxxiv, 28), as in Egypt (Gen. xlvii, 17; Exod. ix, 3), Arabia Petræa and Deserta (Exod. ii, 16, 19; iii, 1; Num. xxxi, 32; Isa. xxxiv, 6; lx, 7), and Moabitis (2 Kings, iii, 4; Isa. xvi, 1). In military feuds between such tribes, we always find sheep mentioned among the booty of the victors (Num. xxxi, 32; Jos. vi, 21; 1 Sam. xiv, 32; xv, 3 sq.; xxvii, 9; 1 Chron. v, 21, etc.). The same is still universally true of modern Bedouin Arabs, whose traffic in sheep (comp. Ezek. xxvi, 21) is their leading

Syrian Sheep (*Ovis Laticaudata*).

mark of prosperity and even opulence (comp. Arvieux, iii, 132). The patriarchs had large flocks of sheep in Palestine, as later in Egypt or Goshen (Exod. x, 9, 24; compare Hengstenberg, *Pent.* p. 5 sq.); also upon the occupation of Canaan by the Israelites, sheep-breeding continued to be the chief employment of a large part of the population down to the latest period, being carried on amid the numerous open tracts and hills of the country (Isa. vii, 25), many of which were productive of saline plants (comp. Deut. vii, 13; viii, 13; xxviii, 4; Judg. vi, 4; 1 Sam. xxii, 19; 2 Sam. xii, 2; Prov. xxvii, 23; Eccl. ii, 7; Jer. iii, 24; v, 17; Hos. v, 6; Joel i, 18; Judith viii, 6, etc.). There were rich owners of flocks (1 Sam. xxv, 2; 2 Sam. xii, 2; comp. Job i, 3; xlii, 12), and even kings had their shepherds (1 Chron. xxvii, 31; Amos vii, 1; compare 2 Chron. xxxii, 28), from whom they derived a revenue of sheep and wool as presents (2 Sam. xvii, 29; 1 Chron. xii, 40) or tribute (2 Kings iii, 4; Isa. xvi, 1). Among the regions most favorable for sheep-rearing are mentioned the plain of Sharon (Isa. lxv, 10), Mt. Carmel (Mic. vii, 14), Bashan (Ezek. xxxix), and Gilead (Mic. l. c.). The sheep in the patriarchal age were tended oftentimes by the daughters of the owners (Gen. xxix, 9; compare Exod. ii, 16); later by overseers or hired men (John x, 12); sometimes by the sons of the family (1 Sam. xvi, 11; xvii, 15). See SHEPHERD. The keepers gave their sheep, especially the bell-wethers, regular names (John x, 3; compare Theocr. v, 102 sq.; Aristot. *Anim.* vi, 16; Longin. *Pastor.* v, 17 and 19), and familiarized these animals with their voice so as to follow them (comp. 2 Sam. xii, 2). The sheep roamed all summer in the open air, being folded only at night (Num. xxxii, 16; 2 Chron. xxxii, 28) in a pen (גְּדֵרָה, *gederah'*; Talmud, דיר), where, in exposed positions, they were guarded by sentries (Luke ii, 8). In the daytime they appear to have been sometimes sheltered from the heat of the sun in caverns (כְּרוֹת, Zeph. ii, 6; which, however, according to others, signifies only *pits*, i. e. cisterns for watering the sheep). Shepherds' dogs were indispensable (Job xxx, 1). Of the young, which sheep bear twice a year, the autumn lambs were considered the more vigorous (Varro, *Res Rust.* ii, 2, 18; Colum. *R. R.* vii, 3; Pliny, viii, 72; comp. Hamaker, *Miscell. Phœnic.* p. 117 sq.). The flesh of the sheep, especially that of wethers and lambs,

was, as with modern Arabs (Wellsted, *Trav.* p. 121), a highly esteemed food (1 Sam. xxv, 18; Isa. xxii, 13; Amos vi, 4; Tobit vii, 9; viii, 21), and was essential to a well-spread board (1 Kings iv, 23; Neh. v, 18). The milk of sheep was also an article of culinary use (Deut. xxxii, 14; comp. Diod. Sic. i, 18; Pliny xxviii, 33; Strabo, xvii, 835; Colum. *R. R.* vii, 2; Dioscor. ii, 75). Sheep, especially lambs and rams (q. v.), were a prominent animal in sacrifices (q. v.), and a stock of them was often sacrilegiously offered for sale in the Jewish temple (John ii, 14). The wool (צֶמֶר, *tse'mer*, or גֵּז, *gez*), which, on account of the pasturing of the flock under the open sky, attained a high degree of fineness (as in Spain), was wrought into garments (Lev. xiii, 47; Deut. xxii, 11; Ezek. xxxiv, 3; Job xxxi, 20; Prov. xxvii, 26; xxxi, 13), and the Israelites were obliged to pay tithes of this product (Deut. xviii, 4). Sheep-shearing (Gen. xxxviii, 12) was a rural festive occasion (1 Sam. xxv, 4; 2 Sam. xiii, 23). As enemies of the shepherd are named the lion (Mic. v, 7), the bear (1 Sam. xvii, 34) and the wolf (Sirach xiii, 21; Matt. x, 16; John x, 12; comp. Isa. xi, 6; lxv, 25), which might easily carry off a single animal in the extensive and solitary pastures, although even this was often rescued by the sheep-tender (1 Sam. xvii, 34 sq.). See LION. The sheep were very liable also to stray in the wide pasturages (Psa. cix, 176; Isa. liii, 6; Hos. iv, 16; Matt. xviii, 12). On the "rot," or disease peculiar to flocks, see Bochart, i, 596; Aristot. *Anim.* ix, 3. The color of sheep is in the East generally white (Psa. cxlvii, 16; Isa. i, 18; Dan. vii, 9; Cant. vi, 5; Rev. i, 14; comp. Ezek. xxvii, 18); although black (חוּם, *dusky*, Gen. xxx, 32) ones are also found (Colum. *R. R.* vii, 2; Pliny, viii, 73; comp. Wellsted, i, 213; Ruppell, *Abyssin.* ii, 21), as well as spotted and grizzled (Gen. xxx, 32), peculiarities which shepherds knew how to produce artificially (Gen. xxx, 37 sq.; Strabo, x, 449; Pliny, xxxi, 9; comp. Rosselini, *Monum. Civil.* i, 246). See JACOB. A peculiar species of sheep (*Ovis laticaudata*, Linn.) is found in the East, with a long fat tail (אַלְיָה, *alyah'*, Arab. *alyat*, A. V. "rump;" Lev. iii, 9; vii, 3; viii, 25; ix, 19) of 10 to 15, and sometimes 40 to 50 pounds' weight, turned up at the end, and often drawn by the animal upon a board or small two-wheeled cart (Herod. iii, 113; Aristot. *Anim.* viii, 28; Pliny, viii, 75; Diod. Sic. ii, 54; Ælian, *Anim.* iii, 3; x, 4; Olear. *Persian.* v, 8; Kämpfer, *Amoen.* p. 506 sq.; Lucas, *Reise nach d. Levante*, p. 183; Russel, *Aleppo*, ii, 8; *Descript. de l'Egypte*, xxiii, 197 sq.; Oedman, *Samml.* iv, 75 sq.; comp. Korte, *Reise*, p. 429; Robinson, *Res.* ii, 169, 180; Schubert, iii, 118). That the same contrivance was customary with the Jews may be seen from the Mishna (*Shabb.* v, 4). This kind of sheep is further distinguished from the common species of the Bedouins by its turned-up nose, and long, pendent ears. On the Mosaic enactments respecting the rights of property in sheep (Exod. xxii; Deut. xxii), see above. Compare generally Bochart, *Hieroz.* i, 451 sq.; Michaelis, *Verm. Schrift.* i, 118 sq. In Dan. viii the Persian empire (king) is personified by a ram. See PERSIA. On this figure (which represents the subjects as a flock), see Lengerke, *Daniel*, p. 365 sq. Compare SHEEP.

2. *Goats.*—This kind of stock is usually classed with sheep under the word צֹאן, *tson*, or (when a single head is intended) שֶׂה, *seh*, and thus associated with neat cattle, בָּקָר, *bakar'* (as in Hom. μῆλα, then βόες). The terms for goats individually are: עֵז, *ez*, a *he-goat*; שְׂעִירַת עִזִּים, *seirath' izzim'* (shaggy female of the goats), a *she-goat*; for the buck, more distinctively, there are several terms: תַּיִשׁ, *ta'yish*; עַתּוּד, *attud'*; שָׂעִיר, *sair'* (more fully שְׂעִיר עִזִּים, *seir' izzim'*, i. e. shaggy male of the goats); צָפִיר, *tsephir'*; גְּדִי, *gedi'*, is a collective term. Goats were reared by the early patriarchs (Gen. xv, 9; xxxii, 14; xxxvii, 31), as by the modern Bedouins; and in later times they also formed an important element (in all the hilly regions of Palestine) of agricultural wealth

Goat of Palestine (*Capra Mambrica*).

(comp. 1 Sam. xxv, 2; Cant. vi, 5; Prov. xxvii, 26; see Ezek. xxvii, 21). They were used not only for sacrifice, but also for food (Deut. xiv, 4; comp. Buckingham, ii, 67; Robinson, i, 342; Wellsted, p. 406), especially the young males (Gen. xxvii, 9, 14, 17; Judg. vi, 19; xiii, 15; 1 Sam. xvi, 20), as still in the East (Russel, *Aleppo*, ii, 28). The milk of goats was also an article of food (Prov. xxvii, 27), being more wholesome than that of sheep (Pliny, xxviii, 33; comp. Bochart, *Hieroz.* i, 717; Prosp. Alpin. *Res Ægypt.* p. 229). Goat-skins were only employed as clothing by poor persons, or such as chose to wear mean apparel (Heb. xi, 37). They were generally made into water or wine casks. See BOTTLE. Goat's hair was often the material of tent-cloth (Exod. xxvi, 7; xxxvi, 14; comp. Della Valle, *Trav.* i, 206; Arvieux, iii, 226; Volney, i, 303; Thevenot, iii, 196), as well as of mattresses and bedding (1 Sam. xix, 13, 16; but see on this passage Kolkar, *Quæst. Bibl. spec.* ii, 56 sq.), and frequently of cloaks (Robinson, i, 279). See TENT; BOLSTER; CLOTHING. The goats of the nomadic Arabs are generally black; but in Syria (Russel, ut sup.; Thevenot, ii, 196; Russegger, i, 712) and Lower Egypt (Sonini, i, 329) there are found goats of a large size, like the European, with hanging ears (often a foot or more in length), and of a bright red color: this species is called *Capra Mambrica*. Whether the Angora goat (*Capra Angorensis* of Linn.) (see Hasselquist, p. 285; Tournefort, iii, 488; Schubert, i, 379), whose long, soft, silky hair is made into the well-known "camlet" stuff, was also indigenous to Palestine (Schulz, *Leit.* v, 28, will have it found on Lebanon), is undetermined; it is possibly that referred to in Cant. vi, 5. On the Mosaic enactment respecting the cooking of a kid in its mother's milk (Exod. xxiii, 19; xxxiv, 26; Deut. xiv, 21), see KID. The symbol of the Macedonian (Alexander's) empire by a he-goat (צְפִיר הָעִזִּים) in Dan. viii, 5 sq., may be illustrated by the epithet Ægean (Αἰγεάδες, q. d. goat-men), applied to the Greek colonies on that part of the Mediterranean Sea (comp. Justin. vii, 1, 7). See MACEDONIA. See generally Bochart, *Hieroz.* i, 703. On the Syrian wild goats, see IBEX. Comp. GOAT.

Caul (יוֹתֶרֶת, *yothe'reth*, properly a *redundant* part, i. e. *flap*, Exod. xxix, 13, 22; Levit. iii, 4, 10, 15; iv, 9; vii, 4; viii, 16, 25; ix, 10, 19) is, according to the Septuagint and Vulgate, the *great lobe of the liver*; the margin of our version says, "It seemeth by anatomy and the Hebrew doctors to be the *midriff*." The word might be rendered the lobe over the liver, although it makes a part of the liver itself, and this appears to be more applicable than the net over the liver, termed the lesser *omentum*. See LIVER. In Hos. xiii, 8, the Heb. word rendered "caul" of the heart is סְגוֹר (*segor'*, literally *enclosed*), and means the *pericardium*, or parts about the heart.

The term translated "cauls" in Isa. iii,18 (שְׁבִיסִים, *shebisim* , literally *nettings*, Sept. ἐμπλόκια) was perhaps a cap of network worn by females. The caps of network in the accompanying wood-cut are from a

Ancient Assyrian Hair-nets.

relief in the British Museum, representing singers and harpists welcoming Sennacherib on his return from conquest. Fig. 1 has the hair curiously arranged, but perhaps not in a caul. There is also in the British Museum a real cap of network for the hair, from Thebes, the meshes of which are very fine. See HEAD-DRESS. As to the true meaning in this passage, the versions give but little assistance. The Sept. renders ἐμπλόκια "plaited work," to which κοσύμβους, "fringes," appears to have been added originally as a gloss, and afterwards to have crept into the text. Aquila has τελαμῶνας, "belts." The Targum merely adopts the Hebrew word without translating it, and the Syriac and Arabic vaguely render it "their ornaments." It occurs but once, and its root is not elsewhere found in Hebrew. The Rabbinical commentators connect it with שָׁבֵץ, *shibbets'*, rendered "embroider" in Exod. xxviii, 39, but properly "to work in squares, make checker-work." So Kimchi (*Lex.* s. v.) explains *shebisim* as "the name of garments wrought in checker-work." Rashi says they are "a kind of network to adorn the head." Abarbanel is more full; he describes them as "head-dresses made of silk or gold thread, with which the women bound their heads about, and they were of checker-work." The word occurs again in the Mishna (*Kelim*, xxviii, 10), but nothing can possibly be inferred from the passage itself, and the explanations of the commentators do not throw much light upon it. It there appears to be used as part of a network worn as a head-dress by women. Bartenora says it was "a figure which they made upon the network for ornament, standing in front of it, and going round from one ear to the other." Schroeder (*De Vest. Mul.* cap. ii) conjectured that they were medallions worn on the necklace, and identified them with the Arab *shomaiseh*, the diminutive of *shams*, the sun, which is applied to denote the sun-shaped ornaments worn by Arab women about their necks. But to this Gesenius very properly objects (*Jesa.* i, 209), as well as to the explanation of Jahn (*Archäol.* I, ii, 2, 139), who renders the word "gauze veils" (Smith, s. v.). Others understand golden ornaments appended to braids of the hair behind (see Kitto's *Daily Illustration* in loc.). The hair of Oriental women is usually divided into a number of braids or tresses, which fall down upon the back, and to each of which is added three silken threads, each charged with small ornaments in gold, and terminating in small coins of the same metal (see Kitto, *Pict. Bible* in loc.; Lane, *Mod. Eg.* i, 59, 60; ii, 409, 410). See ORNAMENT.

Modern Egyptian Lady with the *Sofa* and Turban.

Causeway (מְסִלָּה, *mesillah'*), a raised way (1 Chron. xxvi, 16, 18), or stairs of wood ("terrace," 2 Chron. ix, 11). In these passages it apparently refers to an ascent by steps, or a raised slope between Zion and the Temple, which in subsequent times was replaced by the bridge. In 2 Chron. ix, 4, it is called עֲלִיָּה (*aliyah'*), an "ascent." In most of the passages where it occurs, the former word signifies any public road, and is translated "highway."

Caussin, NICHOLAS, a French Roman Catholic divine, was born at Troyes, in Champagne, in 1583, and was received in the order of the Jesuits in 1607. He taught rhetoric for a time in different colleges, and Richelieu made him confessor to Louis XIII. He died July 2, 1651. His principal work is *Cour Sainte* (5 vols. 12mo, *The Holy Court*, transl. by Sir Thomas Hawkins, Lond. 1663, fol.). It had great success from the style of its biographies and its fervid devotion. Fuller has adopted much of its style in his *Holy and Profane State*. Part of it was translated into Latin, under the title *Aula Impia Herodis* (Col. 1644, 8vo). He published also *De eloquentia sacra et humana*, libri xvi (7th edit. Lugd. 1651, 4to); *Symbolica Ægyptiorum sapientia, nunc post varias editiones denuo edita* (Par. 1647, 4to).—Hoefer, *Nouv. Biog. Générale*, ix, 262.

Cavalier or **Cavallier**, JEAN, one of the chief leaders of the Camisards (q. v.), was born in 1679, at Ribaute, near Alaix, in Languedoc. He was a Protestant, and in the persecution of 1701 he fled to Geneva. When the insurrection in the Cévennes broke out in 1702 he joined the insurgents, and soon rose to command. With incredible skill and success he kept up the warfare until 1704, when he made a treaty with Marshal Villars. He then became a colonel in the king's service, and was even introduced at Versailles. Afterwards feeling himself to be an object of suspicion, he escaped, and subsequently went to Great Britain. Here he published his *Mémoires*, which were translated into English (Dublin, 1726, 8vo). After having commanded a regiment of Huguenot refugees at the battle of Almanza, he died, governor of Jersey, in 1740.—Smedley, *Hist. of the Reform. Rel. in France*, vol. iii, chap. xxv; Hoefer, *Nouv. Biog. Générale*, ix, 279. See CAMISARDS.

Cavallieri, GIOVANNI MICHELE, an Augustine monk of Lombardy, born at Bergamo about the end of the 17th century. He died in 1757, leaving behind him as a monument of learning and industry a work entitled *Opera omnia liturgica* (Aug. Vind. 1764, 5 vols. folio), containing a vast mass of information in the shape of commentaries on the decrees of the "Sacred Congregation of Rites" at Rome.—Hoefer, *Nouv. Biog. Générale*, ix, 284; *Biog. Univ.* tom. iii, p. 443.

Cavalry. See HORSE; CHARIOT.

Cavasilas. See CABASILAS.

Cave, properly מְעָרָה, *meärah'* (everywhere so rendered, except "den" in Isa. xxxii, 14; Jer. vii, 11; "Mearah" [q. v.], in Josh. xiii, 4); σπήλαιον ("den," except in John xi, 38); occasionally חוֹר, *chor* (literally a "hole," as generally rendered; hence a *cavern*, Job xxx, 6, etc.; whence the name HORITE, i. e. *troglodyte*;

also HAINAN, i. e. *cavernous;* HORONAIM, i. e. *twin caves;* BETH-HORON, i. e. *place in the hollow*), or חוּר, *chur* (also rendered "hole"); once מְחִלָּה, *mechillah'*, Isa. ii, 19. Grottoes seem also to be indirectly denoted by the terms חֲגָוִים, *chagavim'* (*refuges* in the rocks, "clefts," Cant. ii, 14; Jer. xlix, 16; Obad. 3), and מִנְהָרָה, *m'nharah'* (a *fissure* through which a stream flows, "den," Judg. vi, 2); both of which are combined in the Greek term ὀπή ("cave," Heb. xi, 38; "place" of water, James iii, 11). See DEN.

1. *As natural Features.*—The geological formation of Syria is highly favorable to the production of caves. It consists chiefly of limestone, in different degrees of density, and abounds with subterranean rivulets. The springs issuing from limestone generally contain carbonate of lime, and most of them yield a large quantity of free carbonic acid upon exposure to the air. To the erosive effect upon limestone rocks of water charged with this acid the formation of caves is chiefly to be ascribed (*Enc. Metropol.* art. Geology, p. 692, 693). Many of these have also been artificially enlarged and adapted to various purposes both of shelter and defence (Page, *Text-Book of Geology*, p. 141; Kitto, *Phys. Geogr. of Pal.* p. 72). This circumstance has also given occasion to the use of so large a number of words as are employed in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places and their neighborhood (Gen. xiv, 6; xxxvi, 21; Deut. ii, 12; Job xxx, 6; comp. Strabo, i, 42; xvi, 775, 776; see Burckhardt, *Syria*, 410; Robinson, ii, 424; Stanley, *Sinai and Palest.* Append. § 68–71). The *subordinate* strata of Syria, sandstone, chalk, basalt, natron, etc. favor the formation of caves; consequently the whole region abounds with subterranean hollows of different dimensions. Some of them are of immense extent; these are noticed by Strabo, who speaks of a cavern near Damascus capable of holding 4000 men (xvi, p. 1096, edit. 1707). This cavern is shown to the present day. Modern travels abound with descriptions of the caves of Syria. The Crusade writers record the local traditions respecting them current in their times (William of Tyre; Quaresmius, *Elucid. Ter. Sanc.*). Tavernier (*Voyage de Perse*, part ii, chap. iv) speaks of a grotto between Aleppo and Bir which would hold near 3000 horse. Maundrell has described a large cavern under a high rocky mountain, in the vicinity of Sidon, containing 200 smaller caverns (*Travels*, p. 158, 159). Shaw mentions the numerous dens, holes, and caves in the mountains on the sea-coast, extending through a long range on each side of Joppa. An innumerable multitude of excavations are found in the rocks and valleys round Wady Musa, which were probably formed at first as sepulchres, but afterwards inhabited, like the tombs of Thebes (Robinson's *Researches*, ii, 529). Other excavations occur at Deir Dubbân (ii, 353); others in the Wady leading to Santa Hanneh (ii, 395). "In the mountains of Kûl'at Ibn Ma'an, the natural caverns have been *united* by passages cut in the rocks, in order to render them more commodious habitations. In the midst of these caverns several cisterns have been built; the whole would afford refuge for 600 men" (Burckhardt's *Travels*, p. 331). Almost all the habitations at Om-keis (Gadara) are caves (Burckhardt, p. 273). An extensive system of caves exists between Bethlehem and Hebron (Irby and Mangles, p. 103).

2. *Scriptural Notices.*—(1.) The first mention of a cave in Scripture relates to that into which Lot and his two daughters retired from Zoar, after the destruction of Sodom and Gomorrah (Gen. xix, 30). It was some cavern in the mountains of Moab, but tradition has not fixed upon any of the numerous hollows in that region. See ZOAR.

(2.) The next is the cave of Machpelah, in the field of Ephron, which Abraham purchased of the sons of Heth (Gen. xxv, 9, 10). There Abraham buried Sarah, and was himself afterwards buried; there also Isaac, Rebekah, Leah, and Jacob were buried (Gen. xlix, 31; l, 13). The cave of Machpelah is said to be under the Mohammedan mosque at Hebron, surrounded by a high wall called the Haram; but even the Moslems are not allowed to descend into the cavern (Benj. of Tudela, *Early Trav.* p. 86; Stanley, p. 149). The tradition that this is the burial-place of the patriarchs is supported by an immense array of evidence (Robinson, *Researches*, ii, 433–440). See MACHPELAH.

(3.) The situation of the cave at Makkedah, into which the five kings of the Amorites retired upon their defeat by Joshua, and into which their carcasses were ultimately cast, is not known (Josh. x, 16, 27). It is thought by many that the cave of Makkedah can hardly be the one to which tradition has assigned the name (Irby and Mangles, p. 93); for, though it is not necessary to suppose that the cave was close to the town of Makkedah, yet the situation of the great caverns both at Beit Jibrîn and at Deir Dubbân in neither case agrees with that of Makkedah as given by Eusebius, eight miles from Eleutheropolis (Reland, p. 885; Robinson, ii, 352, 397; Stanley, p. 211). See MAKKEDAH.

(4.) The cave of Adullam, to which David retired to avoid the persecutions of Saul (1 Sam. xxii, 1, 2). This, according to tradition, is an immense natural cavern at the Wady Khureitun, which passes below the Frank mountain. The site assigned by Eusebius to Adullam, 10 m. E. of Eleutheropolis, agrees little with that of this cave, which in some respects agrees with the Scripture narrative better than the neighborhood of Deir Dubbân, assigned to it by Mr. Stanley (see 1 Sam. xx, 6, and particularly xxii, 3, 4; Josephus, *Ant.* vi, 12, 3; Reland, p. 549; Irby and Mangles, p. 103; Robinson, ii, 175; Stanley, p. 259). See ADULLAM.

(5.) The cave at Engedi, which afforded a retreat to David and his followers (1 Sam. xxiii, 29; xxiv, 1), and in which he cut off the skirt of Saul's robe (1 Sam. xxiv, 4), can be clearly identified. The place is now called 'Ain Jidy by the Arabs, which means the same as the Hebrew, namely, "The Fountain of the Kid." "On all sides the country is full of caverns, which might serve as lurking-places for David and his men, as they do for outlaws at the present day. The whole scene is drawn to the life" (Robinson,

Caves along the Upper Jordan.

ii, 203; comp. Lynch, *Narrative*, p. 234; Stanley, p. 296). See EN-GEDI.

(6.) The cave in which Obadiah concealed the prophets (1 Kings xviii, 4) cannot now be identified, but it was probably in the northern part of the country, in which abundant instances of caves fit for such a purpose might be pointed out. See OBADIAH.

(7.) The site of the cave of Elijah (1 Kings xix, 9), as well as that of the "cleft" of Moses on Mount Horeb (Exod. xxxiii, 22), is also obviously indeterminate; for, though tradition has not only assigned a place for the former on Jebel Mûsa, and consecrated the spot by a chapel, there are caves on the competing summit of Serbâl to one or another of which it might with equal probability be transferred (Stanley, p. 49; Robinson, i, 153; Burckhardt, p. 608). See HOREB. The cave of Elijah is pretended to be shown at the foot of Mount Sinai, in a chapel dedicated to him; and a hole near the altar is pointed out as the place where he lay (Robinson, i, 152). See also CARMEL.

(8.) In the New Test. are mentioned the rock sepulchres of Lazarus (John xi, 38) and Christ (Matt. xxvii, 60); the former still shown with little probability by the monks at Bethany (see Robinson, ii, 100), and the latter a disputed question. See CALVARY.

Besides these special caves there is frequent mention in O. T. of caves as places of refuge. Thus the Israelites are said to have taken refuge from the Philistines in "holes" (1 Sam. xiv, 11), to which the name of the scene of Jonathan's conflict, Mŭkhmâs (Michmash), sufficiently answers (Stanley, p. 204; Robinson, ii, 112; Irby, p. 89). So, also, in the time of Gideon, they had taken refuge from the Midianites in dens, and caves, and strongholds, such as abound in the mountain region of Manasseh (Judg. vi, 2; see Stanley, p. 341).

3. *Uses of Caves.*—(1.) Caves were used as *dwelling-places* by the early inhabitants of Syria. The Horites, the ancient inhabitants of Idumæa Proper, were troglodytes, or dwellers in caves, as their name imports. Jerome records that in his time Idumæa, or the whole southern region from Eleutheropolis to Petra and Ailah, was full of habitations in caves, the inhabitants using subterranean dwellings on account of the great heat (*Comm. on Obad.* v, 6). "The excavations at Deir Dubbân and on the south side of the wady, leading to Santa Hanneh, are probably the dwellings of the ancient Horites" (Robinson, ii, 353), and they are peculiarly numerous around Beit Jibrin (Eleutheropolis) (ii, 425). The Scriptures abound with references to habitations in rocks; among others, see Num. xxiv, 21; Cant. ii, 14; Jer. xlix, 16; Obad. 3. Even at the present time many persons live in caves. The inhabitants of Anab, a town on the east of the Jordan, all live in grottoes or caves hollowed out of the rock (Buckingham's *Travels among the Arab Tribes*, p. 61). In the neighborhood of Hebron peasants still live in caves, and especially during summer, to be near their flocks (Wilkinson's *Travels*, i, 313). Poor families live in caverns in the rocks which seem formerly to have been inhabited as a sort of village, near the ruins of El Burj; so also at Siloam, and in the neighborhood of Nazareth. For the rock-dwellings and temples of Idumæa, see PETRA.

(2.) Caves afforded excellent *refuge in the time of war.* Thus the Israelites (1 Sam. xiii, 6) are said to have hid themselves in caves, and in thickets, and in rocks, and in high places, and in pits (see also Jer. xli, 9; Josephus, *Ant.* xii, 11. 1). Hence, then, to "enter into the rock, to go into the holes of the rocks, and into the caves of the earth" (Isa. ii, 19), would, to the Israelites, be a very proper and familiar way to express terror and consternation. Such were most of the caves noticed above, especially the strongholds of Adullam and Engedi.

(3.) Not only have the caves of Palestine afforded refuge from enemies, but during the *earthquakes* also, by which the country has been so often visited, the inhabitants have found in them a safe retreat. This was the case in the great convulsion of 1837, when Safet was destroyed; and to this mode of retreat the prophet Isaiah perhaps alludes (Isa. ii, 10, 19, 21; see Robinson, iii, 321; Stanley, p. 151).

(4.) Caverns were also frequently *fortified* when occupied by soldiers. Thus Bacchides, the general of Demetrius, in his expedition against Judæa, encamped at Messaloth, near Arbela, and reduced to submission the occupants of the caves (1 Macc. ix, 2; comp. Josephus, *Ant.* xii, 11, 1). Messaloth is probably מְסִלּוֹת, *steps* or *terraces* (comp. 2 Chron. ix, 11; see Gesenius, *Thes.* p. 957). The Messaloth of the book of Maccabees and the robber-caves of Arbela are thus probably identical, and are the same as the fortified cavern near Mejdel (Magdala), called Kalaat Ibn Maan, or Pigeon's Castle, mentioned by several travellers. They are said by Burckhardt to be capable of containing 600 men (Reland, p. 358, 575; Burckhardt, *Syria*, p. 331; Irby and Mangles, p. 91; Lightfoot, *Cent. Chorogr.* ii, 231; Robinson, iii, 279; Raumer, p. 108; comp. also Hos. x, 14). See BETH-ARBEL. Josephus also speaks of the robber inhabitants of Trachonitis, who lived in large caverns, presenting no prominence above ground, but widely extended below (*Ant.* xv, 10, 1). These banditti annoyed much the trade with Damascus, but were put down by Herod. Strabo alludes very distinctly to this in his description of Trachonitis, and describes one of the caverns as capable of holding 4000 men (Strabo, xvi, 756; Raumer, p. 68; Jolliffe, *Travels in Pal.* i, 197). Josephus (*Ant.* xiv, 15, 5) relates the manner in which one of these caves, occupied by robbers, or rather insurgents, was attacked by soldiers let down from above in chests and baskets, from which they dragged forth the inmates with hooks, and killed or thrust them down the precipices; or, setting fire to their stores of fuel, destroyed them by suffocation. These caves are said to have been in Galilee, not far from Sepphoris, and are probably the same as those which Josephus himself, in providing for the defence of Galilee, fortified near Gennesaret, which elsewhere he calls the caves of Arbela (*War*, i, 16, 2-4; ii, 20, 6; *Life*, 37). See ARBELA. This description of *caves of robbers* reminds us of our Lord's words, in which he reproaches the Jews with having made the Temple *a den of thieves*, σπήλαιον λῃστῶν (Matt. xxi, 13). A fortified cavern existed in the time of the Crusades. It is mentioned by William of Tyre (xxii, 15-21) as situate in the country beyond the Jordan, sixteen Roman miles from Tiberias. Lastly, it was the caves which lie beneath and around so many of the Jewish cities that formed the last hiding-places of the Jewish leaders in the war with the Romans. Josephus himself relates the story of his own concealment in the caves of Jotapata; and after the capture of Jerusalem, John of Gischala, Simon, and many other Jews, endeavored to conceal themselves in the caverns beneath the city; while in some of them great spoil and vast numbers of dead bodies were found of those who had perished during the siege by hunger or from wounds (Josephus, *War*, iii, 8, 1; vi, 9, 4).

(5.) Natural cavities in the rock were and are frequently used for other purposes more or less akin with the above, such as stalls for horses and for granaries (Irby and Mangles, p. 146). Again, the "pits" spoken of in some of the foregoing Scripture references seem to have consisted of large *wells*, in "the sides" of which excavations were made leading into various chambers. See CISTERN. Such pits were sometimes used as *prisons* (Isa. xxiv, 22; li, 14; Zech. ix, 11). See PRISON. Those with *niches* in the sides were even occupied for *burying-places* (Ezek. xxxii, 23). Many of these vaulted pits remain to this day. The cave in which Lazarus was buried was possibly something of this kind. No use, indeed, of rock caverns more

strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as tombs or vaults (compare the early Christian CATACOMBS). The rocky soil of so large a portion of the Holy Land almost forbids interment, excepting in cavities either natural or hewn from the rock. The dwelling of the dæmoniac among the tombs is thus explained by the rock caverns abounding near the sea of Galilee (Jolliffe, i, 36). Accordingly, numerous sites are shown in Palestine and adjoining lands of (so-called) sepulchres of saints and heroes of the Old and New Testaments, venerated both by Christians and Mohammedans (*Early Trav.* p. 36; Stanley, p. 148). Among these may be mentioned the cave of Machpelah, the tomb of Aaron on Mount Hor, of Joseph, and of Rachel, as those for which every probability of identity, in site at least, may be claimed (Irby and Mangles, p. 134; Robinson, i, 321, 322; iii, 95–97). More questionable are the sites of the tombs of Elisha, Obadiah, and John the Baptist at Samaria; of Habakkuk at Jebâtha (Gabatha), Micah near Keila, and of Deborah, Rebekah's nurse, at Bethel (Stanley, p. 143, 149; Reland, p. 772, 698, 981; Robinson, iii, 140). The questions so much debated relating to the tombs in and near Jerusalem and Bethany will be found treated under those heads. But, whatever value may belong to the connection of the name of judges, kings, or prophets with the very remarkable rock-tombs near Jerusalem, there can be no doubt that the caves bearing these names are sepulchral caverns enlarged and embellished by art. The sides of the valley of Jehoshaphat are studded with caves, many of which are inhabited by Arab families (Sandys, p. 188; Maundrell, p. 446; Robinson, i, 355, 516, 539; Bartlett, *Walks about Jerusalem*, p. 117). It is no doubt the vast number of caves throughout the country, together with, perhaps, as Maundrell remarks, the taste for hermit life which prevailed in the fifth and sixth centuries of the Christian æra, which has placed the sites of so many important events in caves and grottoes; e. g. the birth of the Virgin, the Annunciation, the Salutation, the birth of the Baptist and of our Lord, the scene of the Agony, of Peter's denial, the composition of the Apostles' Creed, the Transfiguration (Shaw, pt. ii, c. 1; Maundrell, *Early Travels*, p. 479); and the like causes have created a traditionary cave-site for the altar of Elijah on Mount Carmel (1 Kings xviii, 19; comp. Amos iv, 8), and peopled its sides, as well as those of Mount Tabor, with hermit inhabitants (see Irby and Mangles, p. 60; Reland, p. 329; Sir J. Maundeville, *Travels*, p. 31; Sandys, p. 203, Maundrell, *Early Trav.* p. 478; Jahn, *Bibl. Arch.* p. 9; Stanley, p. 353; Kitto, *Phys. Geogr.* p. 30, 31; Van Egmont, *Travels*, ii, 5–7). See SEPULCHRE.

Cave, WILLIAM, an eminent English divine, was born at Pickwell, Leicestershire, Dec. 30, 1637. He studied at St. John's College, Cambridge, where he graduated A.B. in 1656; A.M. in 1660. In 1662 he was appointed vicar of Islington, and afterwards he became chaplain in ordinary to Charles II. In 1679 he was made rector of All-Hallows, London; in 1681 he received a canonry at Windsor, and in 1690 became vicar of Isleworth. He died at Windsor, August 4, 1713. His works are: 1. *Primitive Christianity* (Lond. 1672; and several times reprinted—a French translation, Amsterdam, 1712, 2 vols. 12mo):—2. *Tabulæ Ecclesiasticæ*, or Tables of Ecclesiastical Writers (Lond. 1674; Hamburg, 1676):—3. *Antiquitates Apostolicæ*, or *Lives, Acts, etc., of the Holy Apostles, and Sts. Mark and Luke* (Lond. 1676 and 1684, fol.; also, edited by Cary, Oxf. 1840, 8vo):—4. *Apostolici*, or *the Lives, Acts, etc., of the Contemporaries or immediate Successors of the Apostles*, and the most eminent of the Fathers of the first three centuries (Lond. 1677, fol.; also, edited by Cary, Oxf. 1840, 3 vols. 8vo):—5. *A Dissertation concerning the Government of the Ancient Church*, by Bishops, Metropolitans, and Patriarchs (Lond. 1683, 8vo):—6. *Ecclesiastici*, or Lives, Acts, etc., of the most eminent Fathers of the fourth century (Lond. 1682, fol.):—7. *Chartophylax Ecclesiasticus*, an improved edition of the *Tabulæ Ecclesiasticæ* (1685, 8vo):—8. *Scriptorum Ecclesiasticorum Historia Literaria a Christo nato usque ad Sæculum XIV* (2 vols. or parts, fol. 1688 and 1698, Lond.; reprinted at Geneva, 1705 and 1720, and at Basle, 1741; best edition that of Oxford, corrected and enlarged by Cave himself, and continued by Wharton (1740 and 1743, 2 vols. fol. The Basle edition was made upon this). Cave was a very credulous writer; destitute of critical talent, he generally took the accounts of ancient writers and Roman Catholics as he found them. Jortin calls him "the whitewasher of the ancients." Yet Dowling is justified in saying that "Cave's writings rank undoubtedly among those which have affected the progress of Church history. His smaller works greatly tended to extend an acquaintance with Christian antiquity; his *Lives of the Apostles and Primitive Fathers*, which may be regarded as an ecclesiastical history of the first four centuries, is to this very day the most learned work of the kind which has been written in our own language; and his *Historia Literaria* is still the best and most convenient complete work on the literary history of the Church. For extent and variety of learning he stands high among the scholars of his time, and he had taste and feeling to appreciate ancient piety, but he can scarcely claim any other praise."—Herzog, *Real-Encyklopädie*, Supplem. i, 183; Landon, *Eccles. Dictionary*, s. v.; Hook, *Eccles. Biography*, iii, 524; Dowling, *Introd. to Eccles. Hist.* (Lond. 1838); *New Gen. Biog. Dict.* vi, 137.

Cawton, THOMAS, a Nonconformist divine, was born at Wivenhoe, Essex, in 1637. Having studied at Utrecht and Oxford, he received ordination from the bishop of Oxford. He officiated for several years as chaplain to English noble families, but soon became so dissatisfied with the dominant party in the Established Church that he left it to become pastor of a Nonconformist congregation in Westminster, where he died in 1677. While a student at Utrecht, he published two dissertations, entitled, *Disputatio de Versione Syriaca Vet. et Novi Testamenti* (Ultraj. 1657, 4to), and *Dissertatio de usu Linguæ Hebraicæ in Philosophia Theoretica* (Ultraj. 1657, 4to), the former of which is of lasting value for the history of the Syriac versions. Cawton was regarded as one of the prominent Orientalists of his time.—Kitto, *Cyclop.* s. v.; Hook, *Eccl. Biog.* iii, 526.

Cazalla, AUGUSTIN, martyr, was born of noble parents in 1506, and was educated at the universities of Valladolid and Alcala. Carranza (q. v.), archbishop of Toledo, became his patron; and Cazalla's talents, under such patronage, soon gained him distinction. In 1545 he became chaplain and almoner to the emperor Charles V, whom he accompanied into Germany. Here he imbibed the principles of Luther (after combating them some time), and on his return to Spain in 1552 he began to preach reform. His mother, brother, and sisters shared his religious convictions and it is said that even Charles V was greatly moved by Cazalla's piety and arguments. The attention of the Inquisition was soon fixed on the Cazalla family, but it was not till after the emperor's death in 1558 that they were arrested and tried for heresy. At an auto da fé in May, 1559, he was strangled and then burnt, with his sister Donna Beatrice; his brother Francisco was at the same time burnt alive.—M'Crie, *Hist. of the Reformation in Spain*, p. 225 sq.; De Castro, *Spanish Protestants* (Lond. 1851), p. 114 sq.

Cecil, RICHARD, an eminent Evangelical divine of the Church of England, was born in London, November 8, 1748. His early life was bad—he was even a professed infidel; but about 1772 he was converted, and in 1773 entered Queen's College, Oxford. In 1777

he was ordained priest, and settled at Lewes; but his health failed there, and in 1780 he became minister of St. John's, Bedford Row, London. In 1800 he obtained the livings of Chobham and Bisham, Surrey. In 1808 he was attacked by a paralytic seizure, and was compelled to visit Clifton. The journey did not much, however, improve his health, and he retired in May, 1809, to Tunbridge Wells. He died August 15, 1810. "The exertions of Mr. Cecil as a preacher were immense. His talents were eminent; his eloquence was impassioned, yet solemn, and sometimes argumentative. As a Christian, he was habitually spiritually minded; modest and unassuming, he never intruded his capacities on the attention of mankind. He was contented with doing good and getting good; and his works, though few, are valuable for their sterling sense and genuine piety" (Jones). They are collected in his *Works*, edited by Pratt (London, 1811, 4 vols. 8vo), of which vol. i contains a Life of Cecil, by Pratt, with Cecil's *Lives of Bacon and Newton*, vol. ii contains sermons and miscellaneous tracts; vol. iii, thirty-three sermons; vol. iv, Cecil's *Remains*, which are among the most valuable writings on pastoral life and work, as well as on various points of practical religion, in modern times. There is also an American edition (N. Y. 1845, 3 vols. 8vo).—Pratt, *Memoir of Cecil;* Jones, *Christian Biography*, s. v.

Cecilia, one of the so-called saints of the Greek and Roman Calendar, is said to have suffered martyrdom nearly at the same time with Valerian, her husband, Tiburtius, his brother, and Maximus, an officer, about A.D. 230, under Alexander Severus, probably in some popular commotion and persecution, since that emperor was favorably inclined toward the Christians. The legendary accounts of her are not worthy of credit. As she is said to have sung praises with instrumental accompaniment just before her execution, she is regarded as the special patroness of church music. "St. Cecilia's Day" is still annually celebrated in England by a musical festival. Handel's "Messiah" was composed for it. Both Greeks and Latins celebrate her festival on the 22d of November.—A. Butler, *Lives of Saints*, Nov. 22; Landon, *Eccl. Dict.* s. v.

Ceciliānus, bishop of Carthage (A.D. 311). See DONATISTS.

Cedar (אֶרֶז, *e'rez*, from its *deep* root or *compressed* form; Gr. κέδρος) occurs in numerous places of Scripture, but authors are not agreed on the exact meaning of the term. Celsius (*Hierobot.* i, 106, sq.), for instance, conceives that it is a general name for the pine tribe, to the exclusion of the cedar of Lebanon, which he considers to be indicated by the word *berosh*, or "FIR." The majority of authors, however, are of opinion that the cedar of Lebanon (*Pinus cedrus*, or *Cedrus Libani* of botanists) is alone intended. This opinion is confirmed by the Septuagint and Vulgate, which uniformly (as in the English version) render the word by κέδρος, *cedrus;* and also by the fact that the Arabic name for the cedar of Lebanon is *arz*, evidently cognate with *erez*. The following statements are intended to be discriminative on the subject. See BOTANY.

1. The earliest notice of the cedar is in Lev. xiv, 4, 6, where we are told that Moses commanded the leper that was to be cleansed to make an offering of two sparrows, cedar-wood, wool dyed in scarlet, and hyssop; and in ver. 49, 51, 52, the houses in which the lepers dwell are directed to be purified with the same materials. Again, in Num. xix, 6, Moses and Aaron are commanded to sacrifice a red heifer: "And the priest shall take cedar-wood, and hyssop, and scarlet." Here the proper cedar can hardly be meant, as it does not grow in Egypt, and its wood is scarcely aromatic. The variety called *juniper* is evidently intended, the wood and berries of which were anciently applied to such purposes. The term cedar is applied by Pliny to the lesser cedar, *oxycedrus*, a Phœnician juniper, which is still common on the Lebanon, and whose wood is aromatic. The wood or fruit of this tree was anciently burnt by way of perfume, especially at funerals (Pliny, *H. N.* xiii, 1, 5; Ovid, *Fast.* ii, 558; Homer, *Od.* v, 60). The tree is common in Egypt and Nubia, and also in Arabia, in the Wâdy Mousa, where the greater cedar is not found. It is obviously likely that the use of the more common tree should be enjoined while the people were still in the wilderness, rather than of the uncommon (Shaw, *Travels*, p. 464; Burckhardt, *Syria*, p. 430; Russell, *Nubia*, p. 425). See JUNIPER.

At a later period we have notices of the various uses to which the wood of the *erez* was applied, as 2 Sam. v, 11; vii, 2-7; 1 Kings v, 6, 8, 10; vi, 9, 10, 15, 16, 18, 20; vii, 2, 3, 7, 11, 12; ix, 11; x, 27; 1 Chron. xvii, 6; 2 Chron. ii, 8; ix, 27; xxv, 18. In these passages we are informed of the negotiations with Hiram, king of Tyre, for the supply of cedar-trees out of Lebanon, and of the uses to which the timber was applied in the construction of the Temple, and of the king's palace: he "covered the house with beams and boards of *cedar;* "the walls of the house within were covered with boards of *cedar:*" there were "*cedar* pillars," and "beams of *cedar*," and the altar was of cedar. But in these passages of Scripture, likewise, the common cedar cannot well be signified, as the wood is neither hard nor strong enough for building purposes. Other kindred varieties of trees, however, doubtless existed in the same locality with the cedar of Lebanon, which were suitable in these respects, as well as on account of beauty and durability, for architecture. Perhaps nothing more is meant than the *pine*-tree, which is known to grow on Mt. Lebanon. This opinion seems to be confirmed by Ezek. xxvii, 5: "They have made all thy ship-boards of fir-trees of Senir; they have taken *cedar* from Lebanon to make masts for thee;" for it is not probable that any other tree than the common pine would be taken for masts, when this was procurable. Also in the second Temple, rebuilt under Zerubbabel, the timber employed was cedar from Lebanon (Ezra iii, 7; 1 Esdr. iv, 48; v, 55). Cedar is also said by Josephus to have been used by Herod in the roof of his temple (*War*, v, 5, 2). The roof of the rotunda of the church of the Holy Sepulchre at Jerusalem is said to have been of cedar, and that of the church of the Virgin at Bethlehem to have been of cedar or cypress (Williams, *Holy City*, ii, 202; Quaresmius, *Eluc. Terr. Sanct.* vi, 12; Tobler, *Bethlehem*, p. 110, 112). See PINE.

It may here also be remarked that the Syriac and Heb. interpreters generally, at Isa. xli, 19; lx, 13, render the word *teäshshur'* (תְּאַשּׁוּר, literally *erectness*), translated in our version (after the Vulg. and Chaldee) "box-tree," by *sherbin*-cedar, a species of cedar distinguished by the smallness of its cones and the upward direction of its branches (see Rosenmüller, *Alterthumsk.* IV, i, 292). Another form of this word, אֲשֻׁר, *ashur'*, occurring in Ezek. xxvii, 6, has there been mistranslated in our version by "Ashurites," where the clause "the company of the *Ashurites* have made thy benches of ivory," is literally, "thy benches they make of ivory, the daughter of the *ashur*-wood," i. e. inlaid or bordered with it. For a full account of the various readings of that passage, see Rosenmüller's *Schol.* in Ezek. xxvii, 6. The most satisfactory translation appears to be that of Bochart (*Geog. Sac.* i, iii, c. 5, 180) and Rosenmüller: "Thy benches have they made of ivory, inlaid with box-wood from the isles of Chittim." Now it is probable that the isles of Chittim may refer to any of the islands or maritime districts of the Mediterranean. Bochart believes Corsica is intended in this passage; the Vulg. has "de insulis Italiæ." Corsica was celebrated for its box-trees (Plin. xvi, 16; Theophrast. *H. P.* iii, 15, § 5), and it is well known that the ancients understood the art of veneer-

ing wood, especially box-wood, with ivory, tortoise-shell, etc. (Virg. *Aen.* x, 137). However, Celsius (*Hierob.* i, 80) and Sprengel (*Hist. Rei Herb.* i, 267) identify the *sherbin* with the *Pinus cedrus* (Linn.), the cedar of Lebanon. See BOX-TREE.

If, on the other hand, we consider some of the remaining passages of Scripture, we cannot fail to perceive that they forcibly apply to the cedar of Lebanon, and to the cedar of Lebanon only. Thus, in Psa. xcii, 12, it is said, "The righteous shall flourish like a palm-tree, and spread abroad like a *cedar* of Lebanon." But Ezekiel (chap. xxxi) is justly adduced as giving the most magnificent, and, at the same time, the most graphic description of this celebrated tree (comp. Homer, *Il.* xiii, 359; Virgil, *Æn.* ii, 626; v, 447; Horace, *Od.* iv, 6). The other principal passages in which the cedar is mentioned are 1 Kings iv, 33; 2 Kings xix, 23; Job xl, 17; Psalms xxix, 5; lxxx, 10; civ, 16; cxlviii, 9; Cant. i, 17; v, 15; viii, 9; Isa. ii, 13; ix, 10; xiv, 8; xxxvii, 24; xli, 19; xliv, 14; Jer. xxii, 7, 14, 23; Ezek. xvii, 3, 22, 23; Amos ii, 9; Zeph. ii, 14; Zech. xi, 1, 2; and in the Apocrypha, Ecclus. xxiv, 13; l, 12. See TREE.

The conditions to be fulfilled in order to answer all the descriptions in the Bible of a cedar-tree are that it should be tall (Isa. ii, 13), spreading (Ezek. xxxi, 3), abundant (1 Kings v, 6, 10), fit for beams, pillars, and boards (1 Kings vi, 10, 15; vii, 2), masts of ships (Ezek. xxvii, 5), and for carved work, as images (Isa. xliv, 14). To these may be added qualities ascribed to cedar-wood by profane writers. Pliny speaks of the cedar of Crete, Africa, and Syria as being most esteemed and imperishable. In Egypt and Syria ships were built of cedar, and in Cyprus a tree was cut down 120 feet long and proportionately thick. The durability of cedar was proved, he says, by the duration of the cedar roof of the Temple of Diana at Ephesus, which had lasted 400 years. At Utica the beams, made of Numidian cedar, of a temple of Apollo had lasted 1178 years! (Pliny, *Hist. Nat.* xiii, 5; xvi, 40). Vitruvius (ii, 9) speaks of the antiseptic properties of the oil of cedar (comp. Josephus, *Ant.* viii, 5, 2; Sandys, *Travels*, p. 166, 167). The corresponding Arabic word, *arz*, is used to express not only the cedar of Lebanon, but also at Aleppo the *Pinus sylvestris*, which is abundant both near that city and on Lebanon. A similar statement will apply also to the *Thuja articulata* of Mount Atlas, which is called by the Arabs *el-arz*, a name that led to the mistake as to the material of the Cordova roof from its similarity to the Spanish *alerce* (Niebuhr, *Descr. de l'Arabie*, p. 131, etc., and *Questions*, xc, 169, etc.; Pliny, *H. N.*, xiii, 11, 15; Hay, *West Barb.* c. iv, 49; Gesenius, *Thes.* p. 148). Besides the trees which belong to the one grove, known by the name of "the Cedars," groves and green woods of cedar are found in other parts of the range (Buckingham, *Travels among the Arabs*, p. 468; *Eng. Cyclopædia*, s. v. Syria; Robinson, new ed. of *Res.* iii, 593; Burckhardt, *Syria*, p. 19; Loudon, *Arboretum*, iv, 2406, 2407; Celsius, *Hierobotan.* i, 89; Belon, *Obs. de arboribus coniferis*, ii, 162, 165, 166). The remains of wood used in the Nineveh palaces were supposed by Layard to be cedar, a supposition confirmed by the inscriptions, which show that the Assyrian kings imported cedar from Lebanon. This wood is now proved by microscopic examination to be yew (Layard, *Nin. and Bab.* p. 356, 357; Loudon, *ut sup.* p. 2431). See FIR.

2. The modern CEDAR OF LEBANON is well known to be a widely-spreading tree, generally from 50 to 80 feet high, and, when standing singly, often covering a space with its branches the diameter of which is much greater than its height. The horizontal branches, when the tree is exposed on all sides, are very large in proportion to the trunk, being disposed in distinct layers or stages, and the distance to which they extend diminishes as they approach the top, where they form a pyramidal head, broad in proportion to its height. The branchlets are disposed in a flat, fan-like manner on the branches (see Shelby, *Forest Trees*, p. 522). The leaves, produced in tufts, are straight, about one inch long, slender, nearly cylindrical, tapering to a point, and are on short footstalks. The male catkins are single, solitary, of a reddish hue, about two inches long, terminal, and turning upwards. The female catkins are short, erect, roundish, and rather oval; they change after fecundation into oval oblong cones, which, when they approach maturity, become from 2½ inches to 5 inches long. Every part of the cone abounds with resin, which sometimes exudes from between the scales. As its leaves remain two years on the branches, and as every spring contributes a fresh supply, the tree is an evergreen, in this resembling other members of the fir family, which, the larches excepted, retain the same suit for a year or upwards, and drop the old foliage so gradually as to render the "fall of the leaf" in their case imperceptible. As far as is at present known, the cedar of Lebanon is confined in Syria to one valley of the Lebanon range, viz. that of the Kedisha River, which flows from near the highest point of the range westward to the Mediterranean, and enters the sea at the port of Tripoli. The

Cedar of Lebanon (*Cedrus Libani*).

General view of the Cedars.

grove is at the very upper part of the valley, about 15 miles from the sea, 6000 feet above that level, and their position is moreover above that of all other arboreous vegetation. Belon, who traveled in Syria about 1550, found the cedars about 28 in number, in a valley on the sides of the mountains. Rauwolf, who visited the cedars in 1574, "could tell no more but 24, that stood round about in a circle; and two others, the branches whereof are quite decayed from age." De la Roque, in 1688, found but 20. Maundrell, in 1696, found them reduced to 16; and Dr. Pococke, who visited Syria in 1744 and 1745, discovered only 15. "The wood," he says, "does not differ from white deal in appearance, nor does it seem to be harder. It has a fine smell, but is not so fragrant as the juniper of America, which is commonly called cedar, and it also falls short of it in beauty." M. Lamartine, in 1832, says, "These trees diminish in every succeeding age. There are now but 7. These, however, from their size and general appearance, may fairly be presumed to have existed in biblical times. Around these ancient witnesses of ages long since past there still remains a little grove of yellow cedars, appearing to me to form a group of from 400 to 500 trees or shrubs. Every year, in the month of June, the inhabitants of Beshierai, of Eden, of Kandbin, and the other neighboring valleys and villages, climb up to these cedars and celebrate mass at their feet." Dr. Graham gives the following measurements of the twelve largest cedars: the circumferences of the trunk at the base respectively 40 feet, 38, 47, 18½, 30, 22½, 28, 25½, 33½, 29½, 22, 29½; the largest having thus a diameter of nearly 16 feet (*Jordan and the Rhine*, p. 26). Within a few years past a chapel has been erected there (Robinson, *Later Res.* p. 590, 591; Stanley, *Sinai and Pal.* p. 140). See Trew's treatises, *Cedror. Libani Hist.* and *Apologia de cedro Lib.* (Norimb. 1757 and 1767); *Penny Cyclop.* s. v. Abies; Thomson, *Land and Book*, i, 292 sq.; especially Dr. Hooker, in the *Nat. History Review*, Jan. 1862, p. 11-18; and Mr. Jessup, in the *Hours at Home*, March and April, 1867.

Ce'dron, the name of a place and of a rivulet.

1. (ἡ Κεδρὼν v. r. Κεδρῶ.) A place fortified by Cendebæus, under the orders of king Antiochus (Sidetes), as a station from which to command the roads of Judæa (1 Macc. xv, 39, 41; xvi, 9). It was not far from Jamnia (Jabneh), or from Azotus (Ashdod), and had a winter-torrent or wady (χειμάῤῥους) on the eastward of it, which the army of the Maccabees had to cross before Cendebæus could be attacked (xvi, 5). These conditions are well fulfilled in the modern place *Katra* or *Kûtrah*, which lies on the maritime plain below the river Rubin, and three miles south-west of Akir (Ekron). Schwarz (*Palest.* p. 119) gives the modern name as *Kadrûn*, but this wants confirmation. Ewald (*Isr. Gesch.* iv, 390, note) suggests *Tell-Turmus*, five or six miles farther south. The Syriac has *Hebron*, and the Vulg. *Gedor*, which some compare with the village *Gedrus* (Κέδους), mentioned by Eusebius and Jerome (*Onomast.* s. v. Γεδούρ, Gædur) as lying ten miles from Diopolis, toward Eleutheropolis.

2. In this form is given in the N. T. the name of the brook Kidron (נַחַל קִדְרוֹן = "the black torrent") in the ravine below the eastern wall of Jerusalem (John xviii, 1). Lachman, with codices A and D, has χειμάῤῥους τοῦ Κεδρών; but the Rec. Text with B has τῶν Κέδρων, i. e. "the brook of the cedars" (so, too, the Sept. in 2 Sam. xv, 23). Other MSS. have the name even so far corrupted as τοῦ κέδρου (so א), *cedri*, and τῶν δένδρων. The word, however, has no connection with "cedar." In English, the name in this form is often erroneously pronounced (as if written *Kedron*) with a hard C. See KIDRON.

Cei'lan (Κίλαν, Vulg. *Ciaso*), a person named (1 Esdr. v, 15) as the family head (in connection with Azetas) of sixty-seven Israelites who returned from Babylon; but the Heb. texts (Ezra ii, 16; Neh. vii, 21) do not contain either name.

Ceiling. There are three Heb. words employed in the Old Test. which our translators have rendered "ceiled" or "ceiling." 1. חָפָה (*chaphah'*, to cover or *overlay*, as it is elsewhere rendered) occurs 2 Chron. iii, 5, where it is said, "He ceiled the greater house with fir-tree." 2. סָפַן (*saphan'*, to *wainscot* or plank; elsewhere rendered "cover," once "seat," Deut. xxxiii, 21) occurs Jer. xxii, 14: "It is ceiled with cedar, and painted with vermilion." Houses finished in this manner were called "ceiled houses" (Hag. i, 4). The "ceiling" of the walls itself is likewise spoken of (סִפֻּן, *sippun'*, 1 Kings vi, 15). In Ezek. xli, 16, the word rendered "ceiled" is שְׂחִיף (*shachiph'*, from being *hewed thin*), a *board* simply, used for that purpose. These ceilings were adorned with ornaments in stucco, with gold, silver, gems, and ivory. Oriental houses appear to have been the reverse of such as we inhabit, the ceiling being of wood richly ornamented and painted, and the floor plaster or stucco, the walls being generally wainscoted. The Egyptian monuments still exhibit elegant specimens of painted ceilings, no doubt greatly resembling those mentioned in the above texts (Wilkinson's *Anc. Egypt.* ii, 125). According to Mr. Layard, in the ancient Assyrian houses also "the ceilings overhead were divided into square compartments, painted with flowers or with the figures of animals. Some were inlaid with ivory, each compartment being surrounded by elegant borders and mouldings" (*Nineveh*, ii, 208). The following remarks are from Smith's *Dict.* s. v.: The descriptions of Scripture (1 Kings vi, 9, 15; vii, 3; 2 Chron. iii, 5, 9; Jer. xxii, 14; Hag. i, 4) and of Josephus (*Ant.* viii, 3, 2-9; xv, 11, 5) show that the ceilings of the Temple and the palaces of the Jewish kings were formed of clear planks applied to the beams or joints crossing from wall to wall, probably with sunk panels (φατνώματα), edged and ornamented with gold, and carved with incised or other patterns (βαθυξύλοις γλυφαῖς), sometimes painted (Jer. xxii, 14). It is probable that both Egyptian and Assyrian models were in this, as in other branches of architectural construction, followed before the Roman period. See ARCHITECTURE. The construction and designs of Assyrian ceilings in the more important buildings can only be conjectured (Layard, *Nineveh*, ii, 265, 289), but the proportions in the walls themselves answer in a great degree to those mentioned in Scripture (*Nin. and Bab.* p. 642; Fergusson, *Hand-book of Architecture*, i, 201). Examples, however, are extant of Egyptian ceilings in stucco painted with devices of a date much earlier than that of Solomon's Temple. Of these devices, the principal are the guilloche, the chevron, and the scroll. Some are painted in blue, with stars, and others bear representations of birds and other emblems (Wilkinson, *Anc. Egypt.* ii, 290). The excessive use of vermilion and other glaring colors in Roman house-painting, of which Vitruvius at a later date complains (vii, 5), may have been introduced from Egypt, whence also came, in all probability, the taste for vermilion painting shown in Jehoiakim's palace (Jer. xxii, 14; Amos iii, 15; Wilkinson, i, 19). See also the descriptions given by Athenæus (v, 196) of the tent of Ptolemy Philadelphus and the ship of Philopator (ib. 206), and of the so-called sepulchres of the kings of Syria, near Tyre, by Hasselquist (p. 165). The

Patterns of ancient Egyptian Ceilings.

panel-work in ceilings which has been described is found in Oriental and North African dwellings of late and modern time. Shaw describes the ceilings of Moorish houses in Barbary as of wainscot, either "very artfully painted, or else thrown into a variety of panels, with gilded mouldings and scrolls of the Ko-

Modern Egyptian Ceiling with different Colors.

ran intermixed" (*Trav.* p. 208). Mr. Porter describes the ceilings of houses at Damascus as delicately painted, and in the more ancient houses with "arabesques" encompassing panels of blue, on which are inscribed verses and chapters of the Koran in Arabic; also a tomb at Palmyra, with a stone ceiling beautifully panelled and painted (*Damascus*, i, 34, 37, 57, 60, 232; comp. Deut. vi, 9; see also Lane's *Mod. Egypt.* i, 37, 38; Thomson, *Land and Book*, ii, 571). Many of the rooms in the Palace of the Moors at the Alhambra were ceiled and ornamented with the richest geometrical patterns. The ancient Egyptians used colored tiles in their buildings (Athen. v, 206; Wilkinson, ii, 287). The like taste is observed by Chardin to have prevailed in Persia, and he mentions beautiful specimens of mosaic, arabesque, and inlaid wood-work in ceilings at Ispahan, at Koom in the mosque of Fatima, and

Panel-work in modern Egyptian Ceilings.

at Ardevil. These ceilings were constructed on the ground, and hoisted to their position by machinery (Chardin, *Voyage*, ii, 434; iv, 126; vii, 387; viii, 40, plate 39; Olearius, p. 241). See HOUSE.

Ceillier, *Dom* RÉMY, an eminent French theologian, was born at Bar-le-Duc in 1688. He entered the order of St. Benedict in 1705, and became titular prior of Flavigny. In 1718 he published, *Apologie de la morale des Pères de l'Église, contre Jean Barbeyrac;* but the work of his life was his *Histoire Générale des Auteurs Sacrés et Ecclésiastiques* (1729-1763, 23 vols. 4to)—a work more complete, and perhaps more accurate than that of Dupin, although inferior to him in the analysis of books. A new edition has appeared (Paris, 1860-65, 15 vols. 8vo), with additions, but unfortunately thus far without general indexes. The chief superiority of Ceillier over Dupin lies in his treatment of the writers of the first six centuries, in which he had the use of Tillemont, and also of the Benedictine editions of the fathers. In the Middle Ages, and especially in the scholastic theology, for which he had no taste, he does not equal Dupin. Ceillier died Nov. 17, 1761.—*Biog. Universelle*, s. v.

Ceimeliarchæ (κειμηλιάρχαι, *keepers of the sacred vessels*), a class of inferior officers in the ancient church. They had charge of all utensils and precious things laid up in the sacred repository of the church. The name *sceuophylax* is used in the same signification; also *chartophylax*, or *custos archivorum*, custodian of the rolls or archives (Suicer, *Thesaurus*, ii, 971). This officer was commonly a presbyter; Macedonius was both presbyter and sceuophylax of the church of Constantinople; and Sozomen styles Theodore, presbyter of Antioch, who suffered martyrdom in the days of Julian, φύλακα τῶν κειμηλίων, "keeper of the sacred utensils." He was put to death because he would not deliver up what he had in his custody. In the Greek Church the chartophylax acts as the patriarch's substitute, excommunicating and licensing presbyters and deacons, and sitting as supreme ecclesiastical judge in many cases.—Bingham, *Orig. Eccl.* bk. iii, ch. xiii, § 3; Sozomen, *Hist. Eccl.* v, 8.

Celestine (or CŒLESTIN) **I**, Pope, a Roman by birth, was elected Pope in 422, on the death of Boniface I. During his pontificate the Council of Ephesus, against Nestorius, was held, upon which occasion he wrote several letters to the Eastern churches. He claimed authority and primacy in the Roman See, and sought to exercise it over the African Church in vain. In the Nestorian dispute above mentioned he was more successful, as Cyril, in order to put down Nestorius, accepted the authority of Celestine against him. He left thirteen letters; among them is a complaint as to the dress of bishops; but it is doubtful whether it means that the clergy should dress like the laity, or should abstain from some special garment which some had adopted. He died March 25 (or July 26), 432. Celestine is said to have sent Palladius and St. Patrick as missionaries to Ireland, but the story is very doubtful. It is not clear that either of them ever had any connection with Rome. His letters are preserved in the Collection of Councils. He is counted among the saints of the Church of Rome.—*Biog. Univ.* vii, 497; Cormenin, *Lives of the Popes*, i, 79.

II. Pope, originally Guido, of Città di Castello, in Tuscany, studied under Abelard, and succeeded Innocent II September 26th, 1143. He died in March, 1144.

III. Pope, a Roman named Iacinto Orsini, cardinal of Santa Maria, was elected Pope March 30, 1191, at eighty-five. He crowned Henry V and his wife Constance, and made a great display of arrogance in doing it; entered warmly into the scheme for delivering the Holy Land, on which account he espoused the cause of Richard I of England, and fulminated censures against Leopold of Austria and the emperor, who detained Richard prisoner. He died January 8, 1198. During his last illness he proposed to transfer his papal authority to cardinal Colonna, to which, of course, the cardinals objected.

IV. Pope, originally called Goffredo, of the family of Castiglione, of Milan. He was elected Pope October 26, 1241, and died on the 17th of November following.

V. Pope, originally Pietro de Murrone, was born 1215 at Isernia. With a few companions he withdrew to a cave on Monte Majella, where he lived a life of extreme austerity. After a time his disciples multiplied so greatly that he was induced to form them into a new order (called first the congregation of *St. Damian*, but subsequently the order of *Celestines*), under the rule of St. Benedict. This order was confirmed by Gregory X in the Synod of Lyons, 1274. On the 5th of July, 1294, he was elected pope, and took the name of Celestine V. He proved to be too ignorant of the world and its ways, as well as of literature, for the office which he was so suddenly called upon to undertake. Feeling his unfitness, and finding that many abuses were committed in his name, he resigned Dec. 13, 1294, and retired to his solitude. He was cruelly imprisoned by

his successor Boniface, who detained him in custody until his death, May 19, 1296. Clement V canonized him, and his day in the calendar is May 19.—Mosheim, *Ch. Hist.* i, 349; Hoefer, *Nouv. Biog. Générale*, ix, 346.

Celestines, or CŒLESTINES (I.), an order of barefooted Minorites (see DISCALCEATI); (II.) a monastic order, so called from the founder, Pietro de Murrone, afterwards Celestine V, in 1254. After his death his order made great progress, not only in Italy, but likewise in France, whither the then general, Peter of Tivoli, sent twelve religious, at the request of king Philip the Fair, who gave them two monasteries, one in the forest of Orleans, and the other in the forest of Compeigne, at Mount Chartres. This order had at one time 200 monasteries in Italy, France, Germany, and the Netherlands. They had about ninety-six convents in Italy, and twenty-one in France, under the name of priories. Their Constitutions consisted of three parts: the first refers to the provincial chapters and the election of superiors; the second contains the regular observances; and the third, the visitation and correction of the monks. The rule required the Celestines to rise two hours after midnight to say matins; to eat no flesh except when in sickness; to fast every Wednesday and Friday from Easter to the feast of the Exaltation of the Holy Cross; and from that feast to Easter, every day. Their dress was a white gown, a capuche, and a black scapulary; in the choir, and out of the monastery, a black cowl with the capuche; shirts of serge. The order is decayed; in Italy a few monasteries survive. See FRANCISCANS.

Celestius. See CŒLESTIUS.

Celibacy (*cælibatus*, Lat. *cœlebs* or *cælebs*, unmarried, derived by some Roman writers from *cæli beatitudo*, the blessedness of heaven), the state of virginity, or of unmarried persons.

I. *In the Scripture.*—Under the Mosaic law, priests were not only allowed, but encouraged to marry. The priesthood was confirmed to the descendants of one family, and consequently involved even an obligation to marry. In the N. T. we find passages in which an unmarried life, voluntarily assumed, is commended, under certain circumstances (Matt. xix, 12; 1 Cor. vii, 1 35). But no passage in the N. T. can be interpreted into a prohibition against the marriage of the clergy under the Gospel dispensation; on the contrary, there are many from which we may infer the contrary. One of the twelve, Peter, was certainly a married man (Matt. viii, 14), and it is supposed that several of the others were also married. Philip, one of the seven deacons, was also a married man (Acts xxi, 9); and if our Lord did not require celibacy in the first preachers of the Gospel, it cannot be thought indispensable in their successors. Paul says, "Let every man have his own wife" (1 Cor. vii, 2); and that marriage is honorable in all (Heb. xiii, 4), without excepting those who are employed in the public offices of religion. He expressly says that "a bishop must be the husband of one wife" (1 Tim. iii, 2); and he gives the same direction concerning elders, priests, and deacons. When Aquila traveled about to preach the Gospel, he was not only married, but his wife Priscilla accompanied him (Acts xviii, 2); and Paul insists that he might have claimed the privilege "of carrying about a sister or wife (1 Cor. ix, 5), as other apostles did." The "forbidding to marry" (1 Tim. iv, 3) is mentioned as a character of the apostasy of the latter times.

II. *In the Early Church.*—At an early period virginity came to be held in honor in the Church. Several passages of the N. T. (e. g. Matt. xix, 10, 12; 1 Cor. vii, 7, 38) in which *voluntary* virginity for "the kingdom of heaven's" sake is commended under certain circumstances, were interpreted as favoring asceticism and as depreciating marriage. Moreover, in the old Pagan times celibacy had been held in honor (e. g. the Vestal Virgins). Wherever dualistic ideas of a good and evil principle, and of matter as the seat of evil, prevailed, there it was natural that ascetic notions of virginity should arise. An undue regard for virginity, and corresponding depreciation of marriage, began to appear strongly about the middle of the second century, and reached their height in the fourth. Few of the so-called fathers escaped from extravagant notions and opinions on this subject; in fact, their errors here have done more, perhaps, than any other cause to weaken their authority as guides for the Church (see Taylor, *Ancient Christianity*, passim). But no enforced celibacy of the clergy was known in the Church immediately following the apostolic age. Bingham collects the facts carefully (*Orig. Eccles.* bk. iv, ch. v) to the following effect. In the age immediately succeeding that of the apostles we read of the wives of Valens, presbyter of Philippi (Polycarp, *Ep. ad Philip.* ii, 11), of Chœremon, bishop of Nilus (Euseb. vi, c. 42), of Novatus, presbyter of Carthage (Cyprian, *Ep.* 49), of Cyprian himself, of Cæcilius, who converted him (Pont *Vit. Cyp.*), and of several other bishops and presbyters. But it has been said by the advocates of celibacy that married persons promised to separate themselves from their wives as soon as they should receive ordination. The history of Novatus distinctly proves the contrary. He was accused, long after he was a presbyter, of having caused the miscarriage of his wife by a passionate blow. In fact, throughout the first three centuries we read of no enforced celibacy. Chrysostom expressly combats the notion that the clergy, peculiarly, were required to live unmarried (*Ep.*1 *ad Cor.*: *Hom. XIX* ad 1 Cor. vii, 1). But the first step towards clerical celibacy was taken in the disapproval of *second* marriages. "Yet so late as the beginning of the third century there were many clergymen in the Catholic Church who were married a second time. This appears from the accusation of Tertullian, who asks the Catholics, with Montanistic indignation: '*Quot enim et bigami præsident apud vos, insultantes utique apostolo? . . . Digamus tinguis? digamus offers?*' Second marriage thus seems to him to disqualify for the administration of the sacraments of baptism and the Lord's Supper. Hippolytus, in the *Philosophoumena*, reproaches the Roman bishop Callistus with admitting to sacerdotal and episcopal office those who were married the second and even the third time, and allowing the clergy to marry after having been ordained. The next step was the disapproval of even one marriage for the clergy, but not yet the prohibition of it. The priesthood and marriage became more and more incompatible in the prevailing view. The Montanists shared in this feeling; among the oracles of the prophetess Prisca is one to the effect, 'Only a holy (that is, an unmarried) minister can administer in holy things.' Even those fathers who were married, like the presbyter Tertullian and the bishop Gregory of Nyssa, gave decided preference to virginity. The apostolical constitutions and some provincial councils accordingly prohibited priests not only from marrying a widow, or a divorced woman, or a slave, and from second marriage, but also from contracting marriage after ordination. The Synod of Ancyra, in 314, allowed it to deacons, but only when they expressly stipulated for it before taking orders. The rigoristic Spanish Council of Elvira (Illiberis), in 305, went farthest. It appears even to have forbidden the continuance of nuptial intercourse after consecration upon pain of deposition" (Schaff, *Church Hist.* i, § 96).

Phileas, bishop of Thumis, and Philoromus, had both wife and children, and were *on that account* urged by the heathen magistrate to deny the faith and save themselves (Euseb. lib. vi, cap. 42; lib. viii, cap. 9). Eusebius (iv, 23) tells us how Pinytus, bishop of Gnossus, in Crete, being desirous to enforce celibacy, was rebuked by Dionysius, bishop of Corinth. In the great Council of Nicæa it was proposed to enact a law to

that effect, but Paphnutius, an Egyptian bishop, himself unmarried, resolutely withstood it as an innovation, declared that marriage is honorable "in all men," and desired that the ancient tradition of the Church should continue to be observed, viz. that those who before ordination were unmarried should continue to be so (Socrates, *H. E.* i, 11; Sozomen, *H. E.* i, 23). The only reply which Bellarmine and Valesius give to this statement is to suspect the veracity of the historians; in which they are followed by Thomassin, who, cautious and judicious as he is, scruples not to say that Socrates and Sozomen are not such irreproachable writers, nor of such weight, that we need believe their word in a matter of such importance. In opposition to all this, Roman writers allege the testimony of Epiphanius and Jerome, and the tenth canon of Ancyra, which forbids deacons who did not, at ordination, declare their intention to marry, to do so afterwards. But all these testimonies are subsequent to the third century; and the Council of Gangra, held probably about 379, long after that of Ancyra, anathematizes those who separate from the communion of a married priest: "*Si quis discernit presbyterum conjugatum, tanquam occasione nuptiarum quod offerre non debeat et ab ejus oblatione ideo se abstinet, anathema sit*" (Canon iv). See Wilson, *The Doctrine of the Apostolic Fathers* (Liverpool, 1845), p. 178 sq.; and the article EUSTATHIUS.

III. *In the Church of Rome.*—Siricius, bishop of Rome (A.D. 385), decided against the Canon of Gangra (*ad Himer. Tarraconensem*, ep. i, c. 7, in c. 3, 4, dist. lxxxii), asserting that the reason why, in the O. T., priests were allowed to marry, was because they could be taken only from the tribe of Levi. He argued, therefore, as no such tribal limitation exists in the Christian Church, that *obscœnas cupiditates* (i. e. marriage) are inconsistent with the clerical office. The Roman bishops after Siricius adhered to his theory, and the Church generally seems to have followed them (Decretals of Innocent I, A.D. 404, 405, c. [illegible]-6, dist. xxxi; of Leo I, 446-458, in c. i, dist. xxxii; c. 10, dist. xxxi, etc.; Conc. Carth. ii, A.D. 390, c. [illegible], in c. 3, dist. xxxi; c. 3, dist. lxxxiv; Conc. Carth. v, A.D. 401, c. 3, in c. 13, dist. xxxii; c. 4, dist. lx[illegible]iv, etc.). The prohibition applied at first only to bishops, priests, and deacons, but from the fifth century onward subdeacons were prohibited marriage after ordination (Leo I, A.D. 446, in c. 1, dist. xxxii; Gregory I, A.D. 591-94, in c. 1, dist. xxxi; c. 2, dist. xxxii; Conc. Agath. A.D. 506, c. 39, in c. 19, dist. [illegible]xxiv, etc.). The clergy of the minor orders were allowed to marry once, but not with widows (Conc. Carth. v, A.D. 401, c. 3, in c. 13, dist. xxxii; Greg. I, A.D. 601, in c. 3). The civil law confirmed these regulations, enacting that married persons, or such as [illegible] children or grandchildren, should not be chosen [illegible] bishops. It was further enjoined by the civil law that all marriages of higher clergy after their ordination should be held as invalid, and the children of such marriages illegitimate (Herzog, *Real-Encyklopädie*, ii, 772).

F[illegible] centuries this question of the celibacy of the clergy was a subject of constant struggle within the Chu[illegible] Unnatural crimes abounded among the clergy; [illegible]ir office, in the ninth and tenth centuries, seem[illegible] to be held as a license for excess (Neander, *Church History*, iv, 94). Many priests lived openly in wedl[illegible], although the councils were always issuing new [illegible]ers against them. "Popes Leo IX (1048-1054) [illegible]d Nicolas II (1058-1061) interdicted all priests that [illegible] wives or concubines from the exercise of any spiri[illegible] function, on pain of excommunication. Alexander [illegible] (1061-1073) decreed excommunication against all w[illegible] should attend a mass celebrated by a priest having a [illegible]fe or concubine. This decision was renewed by Greg[illegible] VII (Hildebrand) in a council held at Rome in 10[illegible] and a decretal was issued that every layman who [illegible]uld receive the communion from the hands of a m[illegible]l priest should be excommunicated, and that every priest who married or lived in concubinage should be deposed. The decree met with the most violent opposition in all countries, but Gregory succeeded in carrying it out with the greatest rigor; and, though individual instances of married priests were still to be found in the twelfth and thirteenth centuries, the celibacy of the Roman Catholic clergy was established, and has since continued both in theory and practice" (Chambers, s. v.). Nevertheless, after the Reformation, the question came up; and at the Council of Trent (1545-1563) several bishops, and the emperor Charles V, favored a relaxation of the rule. But the majority of voices decided that God would not withhold the gift of chastity from those that rightly prayed for it, and the rule of celibacy was thus finally and forever imposed on the ministers of the Roman Catholic Church. Those who have only received the lower kinds of consecration may marry on resigning their office. For all grades above a sub-deacon, a papal dispensation is necessary. A priest that marries incurs excommunication, and is incapable of any spiritual function. If a married man wishes to become a priest, he receives consecration only on condition that he separate from his wife, and that she of her free will consent to the separation, and enter a religious order, or take the vow of chastity (*sess.* xxiv, *can.* ix). It is a question among divines of the Roman communion whether the law of the celibacy of clerks be of divine right, i. e. whether marriage is by holy Scripture forbidden to the clergy, or whether it is only of ecclesiastical authority, and binding on each clergyman in consequence of the vow to that effect voluntarily made at his ordination. Their best and most moderate writers maintain the second view.

IV. *In the Greek Church.*—The Greek Church has never adopted the law of celibacy absolutely for all its clergy, but adheres, in substance, to the ancient canon law. The Council in Trullo (A.D. 692) enacted that, though bishops may observe celibacy, yet presbyters and deacons might live with their wives (c. 14; Conc. Chalc. A.D. 451, c. 3, 6, 12, 13, 48; Conc. Trullan, A.D. 692, can. 7, 13). In the Russian Church, a parish priest *must* be married before ordination; if he loses his wife, he generally enters a monastery; or, if he marries again, he lays aside his priestly functions (Neale, *Voices from the East*, p. 58). Celibacy is to this day enjoined upon the bishops, who are therefore generally chosen from the monks, or from widowed presbyters; but as to the lower clergy, while the canons forbid the marriage of priests, deacons, and subdeacons, *after ordination*, they do not forbid the ordination of married men, nor require them to abstain from the conversation of their wives. In the Armenian Church marriage is imperative; an unmarried man cannot be ordained; but he cannot marry again. The *Vartabeds* (regulars), on the other hand, take the vow of celibacy, live in convents, and from their ranks the bishops are chosen (Dwight, in Coleman's *Ancient Christianity*, ch. xxvii, § 2); and the Romish Church allowed this in the case of the Greeks, Maronites, etc. who united with her (Benedict XIV, in the constit. *Etsi Pastoralis* of May 26, 1742 [*Bullar. Magn. ed. Luxemb.* t. xvi, fol. 100, and his *Eo quamvis tempore*, May 4, 1745, t. xvi, 6, 296]). The priests of the united Greek Church have received permission from the popes to continue in marriage, if entered into before consecration, but on condition of always living apart from their wives three days before they celebrate mass. There have been discussions in the Roman Church even in regard to the validity or nullity of marriages among the Copts and Greeks entered into after ordination (see *Bullar. Magn.* t. xviii, p. 67). "The Greek Church differs from the Latin, not by any higher standard of marriage, but only by a closer adherence to earlier usage, and by less consistent application of the ascetic principle. It is in theory as remote from the evangelical Protestant Church as the Latin is, and ap-

proaches it only in practice. It sets virginity far above marriage, and regards marriage only in its aspect of negative utility. In the single marriage of a priest it sees, in a measure, a necessary evil—at best only a conditional good, a wholesome concession to the flesh for the prevention of immorality—and requires of its highest office-bearers total abstinence from all matrimonial intercourse. It wavers, therefore, between a partial permission and a partial condemnation of priestly marriage" (Schaff, *Church History*, ii, § 50).

V. *Since the Reformation.*—The evils brought upon the Church by the celibacy of the clergy formed one cause of the movement towards reform which culminated in the 16th century. The leading Reformers declared against the celibacy of the clergy as unfounded in Scripture, and contrary to the natural ordinance of God, and the spell was finally broken by the marriage of Luther with Catharine Bora. His example was soon widely followed; and his writings, and those of his coadjutors, soon put an end to celibacy among all the reforming clergy (comp. Luther, *Ermahnung an kaiserl. Maj.* 1520, etc.; *De Votis Monasticis*). Calvin speaks as follows of the evil of clerical celibacy, as developed among the Romanists: "With what impunity fornication rages among them it is unnecessary to remark; emboldened by their polluted celibacy, they have become hardened to every crime. Yet this prohibition clearly shows how pestilent are all their traditions, since it has not only deprived the Church of upright and able pastors, but has formed a horrible gulf of enormities, and precipitated many souls into the abyss of despair. The interdiction of marriage to priests was certainly an act of impious tyranny, not only contrary to the Word of God, but at variance with every principle of justice. In the first place, it was on no account lawful for men to prohibit that which the Lord had left free. Secondly, that God had expressly provided in his Word that this liberty should not be infringed, is too clear to require much proof" (*Institutes*, iv, 12, 13). The Protestant Confessions of Faith generally touch on the subject more or less directly: e. g. the Augsburg Confession has a long article (xxiii) on the subject, from which we extract a passage: "Matrimony is moreover declared a lawful and honorable estate by the laws of your imperial majesty, and by the code of every empire in which justice and law prevailed. Of late, however, innocent subjects, and especially ministers, are cruelly tormented on account of their marriage. Nor is such conduct a violation of the divine laws alone; it is equally opposed to the canons of the Church. The apostle Paul denominates that a doctrine of devils which forbids marriage (1 Tim. iv, 1, 3); and Christ says (John viii, 44), 'The devil is a murderer from the beginning.' For that may well be regarded as a doctrine of devils which forbids marriage and enforces the prohibition by the shedding of blood." The Church of England: "Art. xxxii. *Of the Marriage of Priests.*—Bishops, priests, and deacons are not commanded by God's law either to vow the estate of single life, or to abstain from marriage; therefore it is lawful for them, as for all other Christian men, to marry at their own discretion, as they shall judge the same to serve better to godliness." See also the Helvetic Conf. i, ch. xxxvii; ii, ch. xxix. All the modern evangelical denominations are agreed in rejecting enforced celibacy as unscriptural and immoral. "When an institution has been tried during a dozen centuries in all parts of the world, and has uniformly been found productive of the same evil effects, there cannot well be a doubt what sentence ought to be pronounced on it: *Cut it down.* That the papacy should have refrained from pronouncing this sentence—that, on the contrary, it should have retained and upheld that institution with dogged pertinacity, notwithstanding the horrors which streamed in whelming torrents from it, is perhaps the most damning proof how the papacy recklessly sacrificed every moral consideration, recklessly sacrificed the souls of its ministers, for the sake of maintaining its own power, by surrounding itself with an innumerable host of spiritual Mamelukes, bound to it by that which severed them from all social ties. And this is the Church for which our modern dreamers claim the exclusive title of holy—a Church headed by his holiness Pope Alexander the Sixth! This whole question of the celibacy of the clergy has been treated in a masterly manner by Jeremy Taylor, in that wonderful book, his *Ductor Dubitantium* (b. iii, c. iv, rule 20), where (in § 28) he gives the following summary of his objections: 'The law of the Church was an evil law, made by an authority violent and usurpt, insufficient as to that charge. It was not a law of God; it was against the rights and against the necessities of Nature; it was unnatural and unreasonable; it was not for edification of the Church; it was no advantage to spiritual life; it is a law that is therefore against public honesty, because it did openly and secretly introduce dishonesty; it had nothing of the requisites of a good law—no consideration of human frailty nor of human comforts; it was neither necessary, nor profitable, nor innocent—neither fitted to time, nor place, nor person; it was not accepted by them that could not bear it; it was complained of by them that could; it was never admitted in the East; it was fought against, and declaimed, and railed at in the West; and at last it is laid aside in the churches, especially of the North, as the most intolerable and most unreasonable tyranny in the world; for it was not to be endured that, upon the pretence of an unreasonable perfection, so much impurity should be brought into the Church, and so many souls thrust down to hell.' "—Hare, *Contest with Rome*, p. 268.

At different periods since the Council of Trent the celibacy of the clergy has been a topic of dispute within the Church of Rome, and many of the clergy have sought to free their body from this yoke of bondage. In Austria, Joseph II confirmed it by an ordinance under date of June 11, 1787, which would seem to indicate that some hopes of its nullification were entertained by the Austrian clergy at that time. When, in consequence of the Concordat of 1801, ecclesiastical communities were re-established in France, the rule of celibacy was maintained, and was skilfully defended by Portalis in the session of the *Corps Législatif* of March 21, 1802. In 1817 the question was again mooted by the theological faculty of Landshut, who, complaining of the scarcity of candidates for holy orders, pointed to celibacy as one of its causes. In 1828 certain Roman priests of Baden and Silesia made another attempt, but without success. Similar attempts were also made after 1831 in the grand-duchy of Hesse, Wurtemberg, and Saxony, and petitions asking for the abolition of celibacy presented at the diets. The civil authorities felt the less inclined to such a step, as the fundamental question as to whether celibacy is an ecclesiastical law, or whether it could be abrogated by the civil authorities, is not yet decided. In France, again, the question was eagerly discussed from 1828 to 1832. In Spain, the Academy of Ecclesiastical Science took the subject into consideration in a meeting held in 1842; while the Portuguese Chambers had previously, in 1835, discussed it, though without result. The same took place in Brazil about 1827. During the commotions of 1848, the subject was again brought into prominence in Germany. The "German Catholics" (q. v.) had already abolished celibacy; and a general measure was called for in the Frankfort Parliament, in the Prussian Assembly, and in the press. In Austria, also, voices were raised against it; but here the state took the side of the pope, who, in a bull of 1847, had added fresh stringency to the rule of celibacy, and condemned its infringement. Since the Italian Liberation War of 1866, hundreds of the Italian clergy have united to reform the Church, and one of

the special points demanded is the abolition of celibacy.

On the other hand, the Romanizing party in the Church of England seem inclined to revive celibacy and the ancient admiration of virginity. See Shipley, *The Church and the World* (Vaux's Essay), London, 1866, 8vo.

Literature.—For the older writers on both sides, see Walch, *Bibliotheca Theologica*, i, 202; ii, 254. As later authorities, besides those cited in this article, see Gieseler, *Ch. History*, i, § 95, 124; ii, § 80, 65; Schaff, *Apostol. Church*, § 112; Schaff, *Ch. History*, l. c.; Browne, *On Thirty-nine Articles*, art. xxxii; Burnet, *On the Articles*, art. xxxii; Mackintosh, *Ethical Philosophy*, § 8; Taylor, *Ancient Christianity*, i, 193, 383 (N. York ed.); Neander, *Planting*, etc., i, 246 sq.; ibid. *Church History*, ii, 147; iv, 94 (Torrey's); Atterbury, *Sermon before the Sons of the Clergy* (Dec. 6, 1709); Thiersch, *Vorles. üb r Katho'icismus · nd Protestantismus, Vorl.* 83; Marneineke, *Institt. Symbol.* § 49, and references there; Herzog, *Real-Encyklopädie*, ii, 771; Wetzer u. Cölibats* (Augs. 1830); Sulzer, *Die erheblichsten Gründe für u. gegen d. Cölibatgesetze* (Const. 1820); Lea, *Sacerd. Celibacy* (Phila. 1867, 8vo); Stanley, *East. Church*, p. 264; Milman, *Lat. Christianity*, iii, 108 sq. See MARRIAGE; MONACHISM; VIRGINITY.

Cell (Lat. *cella*).

1. In classical archæology *cella* is applied to a cave or cellar to preserve wine, oil, or other provision. It also was applied to the enclosed space of a temple, to bath-rooms, to the sleeping apartments of slaves.

2. From this last use of the word it was transferred in the fourth century to the sleeping apartments of monks and nuns in cloisters (q. v.). These at first held three or four occupants, but later they usually received but one person. These cells are small, have one door and window, and are generally plainly furnished.

3. The word was also applied to a monastic dwelling, either for a single monk or for a community, subordinate to some great abbey. The former was mostly the abode of hermits, and erected in solitary places. See HERMITAGE. In the Quirinal Palace at Rome are the cells of the conclave (q. v.).

Cellar (אוֹצָר, *otsar'*, something *laid up* in store). This word is in 1 Chron. xxvii, 28 rendered "cellar," but in another verse of the same chapter, "treasure," and "store-house," from which we may conclude that subterranean vaults are spoken of in each case. The same word is sometimes applied to the treasury of the Temple (1 Kings vii, 51) and of the king (xiv, 26).

Cellarius, or **Cellarer**, an officer in monasteries to whom belonged the care of procuring provisions for the establishment. See ABBEY. He was one of the four *obedientiarii*, or great officers: under his ordering was the *pistrinum*, or bake-house, and the *bracinum*, or brew-house. In the richer houses there were lands set apart for the maintenance of the office, called, in ancient writings, *ad cibum monachorum*. His whole office had respect to that ori in. He was to see the corn got in, and laid up in the granaries: his wages consisted of a portion of the property, usually fixed at a thirteenth part of the whole, and a furred gown. The office was equivalent to that of bursar.—Fosbrooke, *Antiquities*, i, 177; Farrar, *Eccl. Dict.* s. v.

Cellarius, Martinus (surnamed BORRHÆUS), was born at Stuttgardt in 1499; studied at Tubingen, and afterwards at Wittenberg (under Melancthon), where he devoted himself to Oriental languages. When the Anabaptists arose, he wrote and spoke against them, especially against Stock; but finally he joined them himself. About 1530 he gave up this enthusiasm and went to Basle, assuming the name of Borrhæus. He became professor of rhetoric there in 1536; of theology, 1544; and died Oct. 11, 1564.—Melchior, Adam, *Vit. Eruditorum*; Herzog, *Real-Encyklop.* s. v.

Cellarius, Jacobus. See KELLER.

Cellites (*Fratres Cellitæ*), a society which arose at Antwerp about 1300, and so called from *cella*, because they provided graves for the dead. They were also called the Alexian Brethren and Sisters, because Alexius was their patron. As the clergy of that period took little care of the sick and dying, and deserted such as were infected with pestilential disorders, some compassionate persons in Antwerp formed themselves into a society for the performance of these religious duties. They visited the sick, assisted the dying, and buried the dead with a solemn funeral dirge, and were on that account called Lollards (from *lollen*, or *lullen*, to sing). See LOLLARDS. Societies of Lollards were formed in most parts of Germany, and were supported partly by manual labor and partly by charitable donations. In 1472, Charles, duke of Burgundy, obtained a bull from Pope Sixtus IV ordering that the Cellites or Lollards should be ranked among the religious orders, and delivered from the jurisdiction of the bishops. Of the Alexian brethren, a few houses are left in the archdiocese of Cologne (Cologne, Aix-la-Chapelle, Düren), and of the sisters, some houses in Germany (Cologne, Dusseldorf), Belgium, and France.—Wetzer u. Welte, *Kirchen-Lexicon*, i, 165; Farrar, *Eccl. Dict.* s. v.; Mosheim, *Church History*, ii, 392. See ALEXIANS; LOLLARDS.

Celosyria. See CŒLE-SYRIA.

Celsius, OLAUS, an exegetical writer of Sweden, was born in 1670. He was a minister of the Lutheran Church, and professor of theology and of the Oriental languages at the University of Upsal. He was twice offered the dignity of archbishop of Upsal, but declined. He published many dissertations on points of theology, history, and antiquities. His most distinguished labors were on the natural history of the Bible. By direction of Charles XI, he travelled over the principal states of Europe to determine the different plants mentioned in the Bible, and the result of his labors, seventeen dissertations, published at intervals from 1702 to 1741, and afterwards collected into one work called *Hierobotanicon, seu de plantis Sanctæ Scripturæ dissertationes breves* (Upsal, 1745 and 1747), is still in repute as one of the most important books on the subject. He died in 1756. See *Memoirs of the Society of Sciences of Upsal*, vol. ii; *Biogr. Univers.* s. v.

Celsus, a philosopher of the second century, supposed to have been of the Epicurean sect, but inclined towards Platonism. He lived towards the close of the reign of Adrian, and during part of that of M. Aur. Antoninus; and (if Origen be correct) wrote an attack upon the faith and morals of Christians, which he called Λόγος ἀληθής, or "A True Discourse," the date of which Lardner supposes to have been about A.D. 176. Our only knowledge of it is derived from Origen's reply to it (*contra Celsum*, lib. viii), which, however, gives extracts sufficiently copious to allow a pretty sure judgment of its contents and purpose.

Of the life of Celsus little or nothing is known. Lucian dedicated his life of the magician Alexander to Celsus the Epicurean, and Origen identifies this person with the author of the book against which he wrote. The spirit of the book is far more Platonic than Epicurean. The arguments for and against the identity of the two persons thus named are stated in Neander, *Church History* (Torrey's transl. i, 160 sq.); and in Baur, *Geschichte der drei ersten Jahrhunderte*, p. 371.

"Both conclude that the persons were different. The evidence of their oneness is chiefly Origen's conjecture that they were the same person (*cont. Celsum*, iv, 36). The evidence against it is: (1.) That Lucian's friend attacked magical rites; the Celsus of Origen seems to have believed them. (2.) That Lucian's friend was probably an Epicurean; the other Celsus a Platonist or Eclectic. (3.) That the former is praised for his mildness; the latter shows want of moderation. Pressensé (*Trois Prem. Siècles*, vol. ii, 105) regards them as the same person" (Farrar, *Free Thought*, p. 51). It is quite in harmony with the whole spirit of the book, as well as of the Pagan philosophy of the time, to suppose that Celsus is, as Origen supposed, the Epicurean friend of Lucian; and that, in this treatise, he argues on any principles that may serve his purpose. But, whoever Celsus may have been, his writings are very important to Christian apologetics. They "are valuable on account of their admissions of the grand facts and doctrines of the Gospel as preached by the apostles and contained in their writings, by an enemy who lived little more than one hundred and thirty years after the ascension of our Lord. He has nearly eighty quotations from the books of the New Testament, which he not only appeals to as existing, but as universally received by the Christians of that age as credible and divine. He is most minute in his references to the circumstances of the life of Christ and his apostles, which shows that he was well acquainted with them, and that no one denied them. He everywhere ridicules the idea of our Lord's divinity, contrasting with it that of his poverty, sufferings, and death; which proves not only that the Christians of that early age avowed their belief in the doctrine, but that Celsus himself, though an unbeliever, found it in the documents to which he refers, as the source of his acquaintance with the Christian system" (Buck, s. v.). Moreover, he is the "original representative of a kind of intellect which has presented itself over and over again in the various attacks made on Christianity: wit and acuteness, without earnest purpose or depth of research; a worldly understanding, that glances merely on the surface, and delights in hunting up difficulties and contradictions. His objections against Christianity serve one important end: they present in the clearest manner the opposition between the Christian standing-ground and that of the ancient world; and, in general, the relation which revealed religion will ever be found to hold to the ground assumed by natural reason. Thus many of his objections and strictures became testimonies for the truth" (Neander, l. c.).

Lardner (*Testimonies*, chap. xviii; *Works*, vii, 210 sq.) gives full summaries of the book, classed under different heads, especially with reference to the authentication of the books of the N. T., for which these allusions and citations are of special value, as coming from a heathen opponent. A full analysis is also given by Neander, *Ch. History*, i, 160 sq. (Torrey's transl.), and by Tzschirner, *Fall des Heidenthums*, i, 320 sq. Pressensé, in his *Hist. de l'Eglise des Trois Prem. Siècles* (2d series, ii, 140 sq.), attempts ingeniously a reproduction of Celsus's treatise, as gathered from Origen, which Farrar follows (*Critical History of Free Thought*, lect. ii) in the outline which we here present. The references are to the Benedictine edition (Paris, 1733). Celsus intoduces a Jewish rabbi as opposing Christianity from the Hebrew monotheistic point of view. "The rabbi first criticises the *documents* of Christianity, and then the facts narrated. He points out difficulties in the Gospel narratives of the genealogy of Christ: utters the most blasphemous calumnies concerning the incarnation; turns the narrative of the infancy into ridicule; imputes our Saviour's miracles to magic; attacks his divinity; and concentrates the bitterest raillery on the affecting narrative of our blessed Lord's most holy passion. Each fact of deepening sorrow in that divine tragedy, the betrayal, the mental anguish, the sacred agony (ii, 24), is made the subject of remarks characterized no less by coarseness of taste and unfairness, than to the Christian mind by irreverence. Instead of his heart being touched by the majesty of our Saviour's sorrow, Celsus only finds an argument against the divine character of the adorable sufferer (ii, 16). The wonders accompanying Christ's death are treated as legends (iii, 58); the resurrection regarded as an invention or an optical delusion (iii, 59, 55, 57, 78).

"After Celsus has thus made the Jew the means of a ruthless attack on Christianity, he himself directs a similar one against the Jewish religion itself (iii, § 1 and elsewhere). He goes to the origin of their history; describes the Jews as having left Egypt in a sedition (iii, § 5); as being true types of the Christians in their ancient factiousness (iii, § 5); considers Moses to be only on a level with the early Greek legislators (i, 17, 18; i, 22); regards Jewish rites like circumcision to be borrowed from Egypt; charges anthropomorphism on Jewish theology (iv, 71; vi, 62), and declines allowing the allegorical interpretation in explanation of it (iv, 48); examines Jewish prophecy, parallels it with heathen oracles (vii, 3; viii, 45), and claims that the goodness, not the truth of a prophecy, ought to be considered (vii, 14); points to the ancient idolatry of the Jews as proof that they were not better than other nations (iv, 22, 23); and to the destruction of Jerusalem as proof that they were not special favorites of heaven. At last he arrives at their idea of creation (iv, 74; vi, 49, etc.), and here reveals the real ground of his antipathy. While he objects to details in the narrative, such as the mention of days before the existence of the sun (vi, 60), his real hatred is against the idea of the unity of God, and the freedom of Deity in the act of creation. It is the struggle of pantheism against theism.

"When Celsus has thus made use of the Jew to refute Christianity from the Jewish stand-point, and afterwards refuted the Jew from his own, he proceeds to make his own attack on Christianity; in doing which, he first examines the lives of Christians (iii), and afterwards the Christian doctrine (v, vi, vii), thus skilfully prejudicing the mind of his readers against the persons before attacking the doctrines. He alludes to the quarrelsomeness shown in the various sects of Christians (iii, 10), and repeats the calumnious suspicion of disloyalty (iii, 5, 14), want of patriotism (iii, § 55; viii, 73), and political uselessness (viii, 69), and hence defends the public persecution of them (viii, 69). Filled with the esoteric pride of ancient philosophy, he reproaches the Christians with their carefulness to proselytize the poor (iii, 44, 50) and to convert the vicious (iii, 59, 62, 74), thus unconsciously giving a noble testimony to one of the most divine features in our religion, and testifying to the preaching of the doctrine of a Saviour for sinners.

"Having thus defamed the Christians, he passes to the examination of the Christian doctrine, in its form, its method, and its substance. His æsthetic sense, ruined with the idolatry of form, and unable to appreciate the thought, regards the Gospels as defective and rude through simplicity (iii, 55; viii, 37). The method of Christian teaching also seems to him to be defective, as lacking philosophy and dialectic, and as denouncing the use of reason (vii, 9; i, 2; i, 9; iii, 39; vi, 10). Lastly, he turns to the substance of the dogmas themselves. He distinguishes two elements in them, the one of which, as bearing resemblance to philosophy or to heathen religion, he regards as incontestably true, but denies its originality, and endeavors to derive it from Persia or from Platonism (vi, 15; vi. 22, 58, 62; v, 63; vi, 1), resolving, for example, the worship of a human being into the ordinary phenomenon of apotheosis (iii, 22; vii, 28-30). The other class of doctrines which he attacks as false consists of those which relate to creation (iv, 37; vi, 49), the incarna-

tion (iv, 14; v, 2; vii, 36), the fall (iv, 62, 70), redemption (v, 14; vii, 28, 86; vi, 78), man's place in creation (iv, 74, 76, 23), moral conversions (iii, 65), and the resurrection of the dead (v, 14, 15). His point of view for criticising them is derived from the fundamental dualism of the Platonic system; the eternal severance of matter and mind, of God and the world; and the reference of good to the region of mind, evil to that of matter. Thus, not content with his former attack on the idea of creation in discussion with the Jew, he returns to the discussion from the philosophical side. His Platonism will not allow him to admit that the absolute God, the first Cause, can have any contact with matter. It leads him also to give importance to the idea of δαίμονες, or divine mediators, by which the chasm is filled between the ideal god and the world (vii, 68; viii. [2 14] 35, 36), not being able otherwise to imagine the action of the pure ἰδέα of God on a world of matter. Hence he blames Christians for attributing an evil nature to demons, and finds a reasonable interpretation of the heathen worship (viii, 2). The same dualist theory extinguishes the idea of the incarnation as a degradation of God; and also the doctrine of the fall, inasmuch as psychological deterioration is impossible if the soul be pure, and if evil be a necessary attribute of matter (iv, 99). With the fall redemption also disappears, because the perfect cannot admit of change; Christ's coming could only be to correct what God already knew, or rectify what ought to have been corrected before (iv, 3, 7, 18). Further, Celsus argues, if Divinity did descend, that it would not assume so lowly a form as Jesus. The same rigorous logic charges on Christianity the undue elevation of man, as well as the abasement of God. Celsus can neither admit man more than the brutes to be the final cause of the universe, nor allow the possibility of man's nearness to God (iv, 74). His pantheism, destroying the barrier which separates the material from the moral, obliterates the perception of the fact that a single free responsible being may be of more dignity than the universe."

The order in which the objections of Celsus are arranged in Origen's reply to him is different from that above given in some respects, and it is therefore here subjoined: "The first half of book i is prefatory (ch. i-xl); the second half, together with book ii, contains the attack by the Jew on Christianity given in lect. ii. The early part of book iii (1-9) contains Origen's refutation of the Jew. The subsequent parts and remaining books give Origen's refutation of Celsus's own attack on Christianity. First, Celsus attacks the character of Christians in the remainder of book iii. In book iv he returns to his attack on Judaism, and on the Scriptures of the Old Testament, especially on many of the narratives, either regarding them as false or as borrowed, and objecting to their anthropomorphic character; also objecting to the account of man's place in creation, and of divine interference. In book v he continues his attack on the doctrines of both religions, chiefly so far as he considers them to be untrue; and in book vi so far as he considers them to be borrowed, dragging to light the difference which existed between Judaism and Christianity. In book vii the subject of prophecy and some other doctrines, as well as the ethics of Christianity, are examined; and in book viii, when the attack on Christianity is mainly over, a defence of paganism is offered by Celsus. Such is the type of a philosophical objector against Christianity a little later than the middle of the second century. We meet here for the first time a remarkable effort of pagan thought, endeavoring to extinguish the new religion; the definite statements of a mind that investigated its claims and rejected it. Most of the objections of Celsus are sophistical, a few are admitted difficulties, but the philosophical class of them will be seen to be the corollary from his general principle before explained."

Literature.—Besides the works already cited, see Cave, *History of Literature*, i, 96; Pond, in *Literary and Theological Review*, iv, 219, 584; Cudworth, *Intellectual System*, ii, 340 sq. (American edition); Shedd, *History of Doctrines*, bk. ii, ch. ii; Bindemann, *in Illgen's Zeitschrift*, etc. 1842, Heft 2; Schaff, *Church History*, i, § 60; Jachmann, *De Celso*, etc. (Regiom. 1836, 4to); Hase, *Church History*, § 51; Fenger, *de Celso Epicurio* (1828, 8vo; maintains that Celsus was not a Platonist); Gieseler, *Ch. Hist.* i, § 39 (note); Mosheim, *Commentaries*, cent. ii, § 19 (argues that Celsus was an Alexandrian Platonist); *Baptist Quart.* 1868, Jan. and Apr. See also APOLOGETICS; APOLOGIES; ORIGEN.

Celtic Church or Christians. See CULDEES; GALATIANS.

Celtic Religion. Unless preceded by the Iberians, the Celts formed the first of those vast waves of Indo-European immigration that, first from the Himalayas and then from the Caspian Sea, spread themselves over Europe. This people, of unknown antiquity, not only at one time held all of Western and Central, but also an important part of Southern and Eastern Europe, and their armies threatened Rome and Asia Minor. Pressed back by the German tribes, and then conquered by the Romans and Saxons, the Celts have now ceased to be active agents in history as distinct national bodies, and have, indeed, a clear descent, as an unmixed race, only in Brittany, in France, Ireland, Wales, and part of Scotland and the smaller British Isles.

The Celts occupied a low stage of culture. They despised agriculture, were skilful traders and miners, and passionately fond of war, piracy, ornaments, and wine. They were cruel to their wives and children on the death of chiefs, practised polygamy, had few roads, but built many fortified cities and villages. They had no compact national union, but were divided into clans and districts, having but a slight federative union. Their society gradually became more and more aristocratic, so that feudalism seems, from its many points of resemblance, to be but the development of the Celtic social order.

The Celts had, however, a powerful bond of union in their religion and priesthood. In many features the priests resembled those of the ancient Egyptians. The numerous and powerful body of priests called *Druids* not only fulfilled all the offices of religion, but they were also the judges, the expounders of civil law, the physicians, the astrologers, the instructors of the youth, and had, in short, in their hands all the spiritual life of the entire people. They were not held to military service, paid no taxes, and bore none of the burdens of the state. With such privileges attached to their order, the children of rich and noble families often were placed in the priesthood, or sought it of their own wills. These novices were placed under a training which often lasted twenty years, being compelled to commit to memory an immense number of verses containing the secrets of the religion. As it was never permitted to commit these verses to writing, most of the particulars of the Celtic religion have been lost. The Druids were a secret or close corporation, wore a peculiar costume, had various grades of priesthood, and were presided over by a high-priest elected by the whole body. To the *ordinary priests* were intrusted the preservation of the sacred legends, and the teaching of them to the young priests. They usually had their places of residence and instruction in retired places, as in deep forests, dark valleys, or in islands. The *vates* (seers) dwelt in cities and villages, and there conducted the prayers, sacrifices, and other religious rites, and foretold the future and the counsel of the gods from the flight of birds and other phenomena of Nature. The *bards* preserved, developed, and sang to the people lyrics of the religion and of the glorious traditions of heroes among their ancestors. They often

appeared on the battle-field, firing the soldiers to deeds of heroic valor. By the touching tones of their lyres and songs they often stayed the flow of blood between hostile clans. In the early ages the bards stood in the highest esteem. At Cæsar's time they had sunk to be beggar-poets, seeking their living by singing flattering songs in the palaces of rich men and princes.

The *religion of the Druids* seems to have been originally a monotheism, which developed later into the deification of the powers of Nature, and the final incorporation of them as deities. *Tavann* (the Thunderer) was the god of heaven, the ruler of the universe, the highest judge, scattering the thunderbolts of his vengeance among mortals. *Belen* was the benevolent son of God, who gives life to the vegetable world and healing power to plants. *Hesus*, *Heus* or *Hu*, originally the founder of the religion of the Druids, was the god of war and of agricultural labor. *Teutates* was the god of manufactures, the arts, and trade, therefore was identified by the Romans as Mercury. *Fairies*, "motherly virgins," were female deities who spun out the thread of life and of fate, and who were guardian angels of both lands, cities, and individual persons, and in the minds of the people were clothed with all attractions and virtues. Many places had also their local female deities.

The *instruction in the schools* of the priests consisted largely in tracing out the attributes of their deities. This was done with a surprising completeness. Instruction was also given concerning the stars and their courses, the size of the universe, the nature of matter and of existence, and especially of the human soul. The Druids taught the *immortality* of the soul; that after death it enters into another body, and that it leads in a more beautiful world than this a happy life, like the earthly life in its better phases, with the same occupations and enjoyments, so that the dead and living stand in a certain communication. At burial, letters were thus often thrown into the flames, that the dead might read them. This belief gave the Celts a high regard for their dead, and spurred them to deeds of great bravery. But it also brought with it deeds of horrible cruelty. In their earlier history it was not unusual, on the death of a man of station, for some of his nearest friends to throw themselves into the flames of his funeral pile. This led to tragic results. Thus, after the feudal system of the late Celtic period had developed itself, it was not rare, on the death of a chieftain, for some of his favorite slaves or followers to be killed and burned on his pile or buried in his grave. The warrior's favorite steed, his arms, dress, and ornaments, were also buried with him, that he might lack nothing in the other life.

Sacrifices formed the chief part of the Celtic religious rites. Human sacrifices were frequent, being regarded as the most effectual and acceptable way of appeasing Deity. It was believed that one human life could only be redeemed by the life of another human being. Thus, a person suffering from a dangerous sickness, a person in danger or in battle, offered to the deities instead of animals a human being, or vowed to do so, availing themselves of the Druids to fulfil the vow for them. In behalf of the state also the Druids offered human sacrifices. Great figures in the human form, made of wicker-work, were filled with human beings and then set on fire. The sacrifice of criminals was considered especially grateful to the deities. When they were lacking, innocent persons were offered up. For a long time also prevailed the custom of sacrificing all prisoners of war, accompanying the dreadful offering with loud songs and wild music, and out of the flowing blood and quivering members to divine the future.

The Celts also had *Druidesses*, or female priests, who, however, had less respect and privileges than the Druids. Companies of these priestesses inhabited certain islands, which no man dared to set foot upon. When they wished to have intercourse with the people of the main land, they had to come in boats, and then return to their islands. These islands were avoided by sailors, as their fancy attributed to the Druidesses the power of sending tempests to destroy them. Once each year these priestesses had to remove the roofs from their houses, and to restore a new one before the setting of the sun. If one of them, crowned with ivy and other leaves, let a stick fall while at this work, the others fell upon her with wild cries and tore her to pieces.

All *legal questions* were decided by the Druids. All the Druids gathered every year at Chartres, and there decided all matters of dispute, both public and private. They appointed the punishment for murder and other crimes, and decided all disputes of inheritance and boundaries of estates. If any private person or chieftain refused to stand by their decision, he was refused permission to attend the religious rites—the most severe punishment they could inflict. He was an outcast, a godless criminal, avoided by all, and deprived of all rights at the hand of his fellow-man or of the law itself.

The *medicine* of the Druids consisted mostly in incantations, the plants used being deemed only the vehicles of communicating the healing influence. The most prized plant was the mistletoe. This was gathered from the oak in dark forests on winter's nights of the holy festival days, and was cut with golden sickles. It was called the "*all-healing*."

Talismans of various kinds were prepared with incantations by the priests and given to the people. The eggs of snakes, gathered by moonlight and carried in the bosom, were considered the most powerful protection against evil fortune. Many of these rites have left their traces on the religious customs of modern times, and are the foundation of many superstitions in Celtic lands of to-day.

Carnac, a small village in Brittany, has remains attributed to Druidical worship. They consist of four thousand massive rocks, placed upright in eleven rows. These rocks are often ten or fifteen feet high, and nearly as many feet apart. Over these are similar rocks, laid horizontally. In other places in Western France are similar remains of Druidical worship, also in Anglesea (Wales), on the Isle of Man, and other places in England. The tombs of the chiefs are mounds, or subterranean chambers. In the first are usually found bronze and earthen urns, bones, and ashes; in the latter, skeletons, earthen vessels, knives, battle-axes, chains, and other articles of furniture or ornament. — Amed. Thierry, *Histoire des Gaulois* (Paris, 1857, 2 vols.); Eckermann, *Celtische Mythologie* (Halle, 1847); Diefenbach, *Celtica* (Stuttg. 1839-41); Mone, *Celt. Forschungen* (Freiburg, 1857); Contzen, *Wanderungen der Celten* (Leipz. 1861). See DRUIDS.

Cemeteries (*κοιμητήρια*, *dormitories*, or *sleeping-places*), a place of burial for the dead. The word cemetery, in this use, is of exclusively Christian origin; the burial-places of the Christians were so called to denote not only that the dead rested from their earthly labors and sorrows, but to point out the hope of a future resurrection (Bingham, *Orig. Eccles.* bk. xxiii, ch. 1). See BURIAL; CATACOMBS; SEPULCHRE.

Cen'chreä (rather *Cenchreæ*, Κεγχρεαί), the eastern port (ἐπίνειον) of Corinth (i. e. its harbor on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lechæum (now Lutáki) on the Corinthian Gulf connected it with Italy and the west (Philo, *Opp.* ii, 539; Theodoret, *in Rom.* xvi). A line of walls extended from the citadel of Corinth to Lechæum, and thus the Pass of Cenchreæ was of peculiar military importance in reference to the approach along the isthmus from Northern Greece to the Morea. See CORINTH. The apostle Paul sailed from Cenchreæ (Acts xviii, 18) on his return to Syria

from his second missionary journey; and when he wrote his epistle to the Romans, in the course of the third journey, an organized church seems to have been formed here (Rom. xvi, 1), probably a branch of that in Corinth (see Pauli, in the *Miscell. Duisb.* i, 51 sq.). See PHŒBE. The first bishop of this church is said (*Apost. Const.* vii, 46) to have been named Lucius, and to have been appointed by Paul. The distance of Cenchreæ from Corinth was seventy stadia, or about nine miles (Strabo, viii, 380; Liv. xxxii, 17; Pliny, iv, 4; Apulej. *Metam.* x, p. 255, Bip. ed.). Pausanias (ii, 3) describes the road as having tombs and a grove of cypresses by the wayside. The modern village of *Kikries* retains the ancient name, which is conjectured by Dr. Sibthorpe to be derived from the millet (κέγκρι) which still grows there (Walpole's *Travels*, p. 41). The site is now occupied by a single farm-house. Close to the sea, and in parts even covered by its waters, are the foundations of a variety of buildings, the plans of which may yet be traced, as the walls still remain to the height of from two feet to three feet and a half. Some traces of the moles of the port are also still visible (Leake's *Morea*, iii, 233-235). The following coin exhibits the port exactly as it was described by Pausanias, with a temple at the extremity of each mole, and a statue of Neptune on a rock between them (see Conybeare and Howson, *St. Paul*, ii, 195).

Colonial Coin of Corinth, with the Head of Antoninus Pius, and a diagram of the Haven of Cenchreæ.

Cendebæ'us (Κενδεβαῖος), a general left by Antiochus VII (q. v.) in command (στρατηγός v. r. ἐπιστρατηγός and ὑποστρατηγός) of the sea-board (παραλίας) of Palestine (1 Macc. xv, 38 sq.) after the defeat of Tryphon, B.C. 138. He fortified Kedron (q. v.) and harassed the Jews for some time, but was afterwards defeated by Judas and John, the sons of Simon Maccabæus, with great loss (1 Macc. xvi, 1-10). The account of Josephus (*Ant.* xiii, 7, 3; *War*, i, 2, 2) is somewhat different.

Cendevia, according to Pliny (xxxvi, 26), the name of a lake from which the river Belus (q.v.) takes its rise, near Mt. Carmel (see Reland, *Palæst.* p. 267); probably the fountains now called *Kurdany*, near Shefr Amur (Thomson, *Land and Book*, i, 486).

Cène. See LECÈNE.

Cennick, JOHN, was originally one of Wesley's lay preachers, who appointed him as a sort of lay-chaplain at Kingswood School in 1739. In a year or two he began to preach against Wesley's Arminian doctrines, and to raise a party within the Wesleyan Society. After unavailing delays and overtures of peace, Wesley read publicly a paper declaring, "by the consent and approbation of the Band Society of Kingswood," that Cennick and his followers "were no longer members thereof." Cennick afterwards united with the Whitefield Methodists, but did not continue long with them. He became at last a Moravian. He was a good though weak man, and his subsequent earnest and laborious life shows that he deserves more lenity than has usually been accorded to him by Methodist writers. After many years of diligent labor as an evangelist, he died July 4, 1795. His *Discourses* were published in 1770 (2 vols. sm. 8vo); and a new edition, with a "Life," was published in 1852 by Matthew Wilks, who says: "He possessed a sweet simplicity of spirit, with an ardent zeal in the cause of his divine Master." The well-known hymn, "Jesus, my all, to heaven is gone," was written by Cennick.—Stevens, *History of Methodism*, i, 155; Darling, *Cyclopædia Bibliographica*, i, 615.

Censer, a vessel in which incense was presented in the Temple, being used by the Jews in the daily offering of incense, and yearly on the Day of Atonement, when the high-priest entered the Holy of Holies (2 Chron. xxvi, 19; Ezek. viii, 11; Ecclus. i, 9). On the latter occasion the priest filled the censer with live coals from the sacred fire on the altar of burnt-offering, and bore it into the sanctuary, where he threw upon the burning coals the "sweet incense beaten small" which he had brought in his hand (Lev. xvi, 12, 13). In this case the incense was burnt while the high-priest held the censer in his hand; but in the daily offering the censer in which the live coals were brought from the altar of burnt-offering was set down upon the altar of incense. This alone would suggest the probability of some difference of shape between the censers used on these occasions. The daily censers must have had a base or stand to admit of their being placed on the golden altar, while those employed on the Day of Atonement were probably furnished with a handle. In fact, there are different names for these vessels. Those in daily use were called מִקְטֶרֶת (*mikte'reth*, occurs only in 2 Chron. xxvi, 19; Ezek. viii, 11), from מִקְטָר, incense; whereas that used on the Day of Atonement is distinguished by the title of מַחְתָּה (*machtah'*, *something to take* fire *with*), or *coal-pan* (often "fire-pan" in the English version). We learn also that the daily censers were of brass (Num. xvi, 39) (according to the Mishna, *Tamid*, v, 5, in the second temple, also of silver), whereas the yearly one was of gold (Josephus, *Ant.* xiv, 4, 4). The latter is also said to have had a handle (Mishna, *Yoma*, iv, 4), which, indeed, as being held by the priest while the incense was burning, it seems to have required. It is conjectured that this distinction is alluded to in Rev. v, 8; viii, 3, where the angel is represented with a golden "censer" (λιβανωτός, from λίβανος, incense), and the twenty-four elders each with a golden "vial" (φιάλη). In the Apocrypha, silver (1 Esdr. ii, 13) as well as golden (1 Macc. i, 22) "censers" (θυΐσκη) are similarly referred to. Paul, in Heb. ix, 4, speaks of the golden "censer" as a thing which belonged to the Tabernacle, but the Greek word θυμιατήριον, which there occurs, may signify "altar of incense" (see Bleek, *Comment.* p. 488; Meyer, *Bibeldeut.* p. 7 sq.; Mynster, in the *Stud. u. Krit.* 1829; ii, 342 sq.). The latter of the above Hebrew words seems used generally for any instrument to seize or hold burning coals, or to receive ashes, etc. such as the appendages of the brazen altar and golden candlestick mentioned in Exod. xxv, 38; xxxvii, 23 (in which senses it seems rendered in the Sept. by ἐπαρυστρίς, ἐπαρυτήρ, or perhaps ὑπόθεμα). It, however, generally bears the limited meaning which properly belongs to the former word, viz. a small portable vessel of metal, on which the incense was sprinkled by the priest to whose office this exclusively belonged (2 Chron. xxvi, 18; Luke i, 9). Thus "Korah and his company" were bidden to take "censers," with which, in emulation of Aaron and his sons, they had perhaps provided themselves (comp. Ezek. viii, 11); and Moses tells Aaron to take "*the* censer" (not *a*, as in the A. V.), i. e. that of the sanctuary or that of the high-priest, to stay the plague by atonement. The only distinct precepts regarding the use of the censer are found in Num. iv, 14, where among the vessels of the golden altar, i. e. of incense, "censers" are reckoned; and in Lev. xvi, 12, where we find that the high-priest was to carry it (here also it is "*the*," not "*a* censer," that he is ordered to "take") into the most holy place within the vail, where the "incense" was to be "put on the fire," i. e. on the coals in the censer, "before the Lord." This

must have been on the Day of Atonement, for then only was that place entered. Solomon prepared "censers of pure gold" as part of the same furniture (1 Kings vii, 50; 2 Chron. iv, 22). Possibly their general use may be explained by the imagery of Rev. viii, 3, 4, and may have been to take up coals from the brazen altar, and convey the incense while burning to the "golden altar," or "altar of incense," on which it was to be offered morning and evening (Exod. xxx, 7, 8). So Uzziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Chron. xxvi, 16, 19). See ALTAR.

Ancient Egyptian Censers.

1. Throwing incense on the flame in censer. 2. Balls of incense burning in censer; *a a*, Boxes for holding incense. 3, 4. Censers of different forms. 5. Box or cup for incense. 6, 7. Head of handle and pan of censers, in bronze.

These intimations help us to conclude that the Jewish censers were unlike those of the classical ancients, with which the sculptures of Greece and Rome have made us familiar, as well as those (with perforated lids, and swung by chains) which are used in the Church of Rome. It is observable that in all cases the Egyptian priests had their costly incense made up into small round pellets, which they projected successively from between their finger and thumb into the censer at such a distance that the operation must have required a peculiar knack, such as could have been acquired only by much practice. As the incense used by the Jews was made up into a kind of paste, it was probably employed in the same manner. See Sonneschmid, *De Thymiaterio sanctissimi* (Viteb. 1723); Deyling, *Observ.* ii, 565 sq.; J. G. Michaelis, in the *Mus. Brem.* ii, 6 sq., and in Ugolini *Thesaur.* xi; Wentz, in the *Nova Biblioth. Brem.* v, 337 sq.; Zeibich, *De thuribulo aureo* (Gerl. 1768); Köcher, *id.* (Jen. 1769); Braun. *Selecta aura*, p. 208 sq.; Rogal, *De thuribulis* (Regiom. 1724; also in Ugolini *Thes.* xi). See INCENSE.

CENSER, in Roman Catholic worship. See THURIBLE.

Censorship OF BOOKS, supervision of publications by means of a preliminary examination and authorization, under Church or state law. The design of censorship has always been to hinder the publication of writings supposed to be dangerous either to the state or to religion (i. e. under Roman Catholic authority, to the Church). The practice has been defended (1) by the example given in Acts xix, 9, where the "books of curious arts" were burnt; (2) by the responsibility of the Church for the souls of the flock, liable to be destroyed by bad books; (3) by the duty of teaching, which includes the withholding of bad doctrine as well as the furnishing of good.

Before the invention of printing, it was comparatively easy to control the circulation of manuscripts, and to destroy them when thought necessary. But the discovery of that art, and the spread of the Reformation in the sixteenth century, induced stronger measures and rules on the part of the Roman Church than had been known before, in order to prevent the diffusion of heretical literature. A censorship was officially established by the bull of Leo X, May 12, 1515, commanding the bishops and inquisitors to examine all works before publication, and not to tolerate any of heretical tendencies. The Council of Trent expressly prohibited the printing or reading of heretical books in the terms following: "No one shall be permitted to print, or cause to be printed, any books relating to religion without the name of the author; neither shall any one hereafter sell such books, or even retain them in his possession, unless they have been first examined and approved by the ordinary, under penalty of anathema, and the pecuniary fine adjudged by the last Council of Lateran. And if they be regulars they shall obtain, besides this examination and approval, the license of their superiors, who shall examine the books according to the forms of their statutes. Those who circulate or publish them in manuscript, without being examined and approved, shall be liable to the same penalties as the printers; and those who possess or read them, unless they declare the authors of them, shall themselves be considered as the author. The approbation of books of this description shall be given in writing, and shall be placed in due form on the title-page of the book, whether manuscript or printed; and the whole, that is, the examination and the approval, shall be gratuitous, that what is deserving may be approved, and what is unworthy may be rejected" (*Session IV*). A committee was appointed to carry out this law by proper enactments, which resulted in the *Index Librorum prohibitorum*, or *Index Expurgatorius*, and in the establishment of the *Congregation of the Index* as a perpetual censorship. The popes sought also to obtain the assistance of the civil authorities in the carrying out of the censorship, and we find that several German states published edicts in 1524, 1530, 1541, 1548, 1567, 1577, etc. recommending a stricter control of the press. Still stricter regulations were afterwards enacted in Spain, Italy, and France. In 1522 the legate Chieregati maintained in the free town of Nuremberg that it was right to take and burn all works printed without authority, and that the printers and publishers of such works were punishable. In most Roman Catholic countries there arose a twofold censorship, that of the bishops and that of the state. In many cases the two were united into one. The process was simple: the censor or licenser read over the MS. to be printed, and, after striking out any objectionable passages, certified that the work might be printed. Hence, in old books, we see the word *imprimatur* (let it be printed), followed by the signatures of the authorities. In England a censorship was established by act of Parliament in 1662, 13 Char. II, c. 33: "An act for preventing the frequent abuses in printing seditious, treasonable, and unlicensed books and pamphlets, and for regulating of printing and printing-presses." This was a temporary act, renewed from time to time; and its renewal was refused in 1693, owing to a quarrel between the House of Commons and the licenser. Since that time there has been, generally speaking, no restriction on what any man may publish; and he is merely responsible to the law if in his publication he should commit any public or private wrong. On the Continent of Europe the censorship became generally less stringent after the conclusion of the peace of Westphalia, although Leopold I and Francis II continued to enforce it. It was abolished in Denmark in 1770; Sweden, 1809; France, 1827; Belgium, 1830; Spain, 1858; Germany and Austria, 1848.—Pierer, *Universal Lexikon*, s. v.; Chambers, *Encyclopædia*; Milton, *Liberty of Unlicensed Printing*; Mendham, *Literary Policy of the Ch. of Rome*; M'Crie, *Reformation in Italy*, ch. v. See INDEX (EXPURGATORIUS).

Censures, CHURCH (*Censuræ ecclesiasticæ*), the penalties by which crimes are visited by Church authority (potestas διακριτική), the scriptural authority for which is found in such passages as Tit. i, 13; iii,

10; 1 Tim. v, 20; Matt. xvii, 17, 18; John xx, 23; 1 Cor. v, 3; 2 Thess. iii, 6, 7; Gal. v, 12. These censures are, in the state churches, admonition, degradation (q. v.), excommunication (q. v.), suspension, interdict (q. v.), and irregularity (q. v.), which hinders a man from being admitted into higher orders.

"The canonists define an ecclesiastical censure to be a spiritual punishment, inflicted by some ecclesiastical judge, whereby he deprives a person baptized of the use of some spiritual things, which conduce not only to his present welfare in the Church, but likewise to his future and eternal salvation. It differs from civil punishments, which consist only in things temporal—as confiscation of goods, pecuniary mulcts or fines, and the like; but the Church, by its censures, does not deprive a man of all spirituals, but only of some in particular. This definition speaks of such things as conduce to eternal salvation, in order to manifest the end of this censure; for the Church, by censures, does not intend the destroying of men's souls, but only the *saving* them, by enjoining repentance for past errors, a return from contumacy, and an abstaining from future sins" (Hook, *Church Dictionary*, s. v.). All churches claim the right of censure. Art. 30 of the Westminster Confession is as follows: "*Of Church Censures.*—The Lord Jesus, as king and head of his Church, hath therein appointed a government in the hand of Church officers, distinct from the civil magistrate. To these officers the keys of the kingdom of heaven are committed, by virtue whereof they have power respectively to retain and remit sins, to shut that kingdom against the impenitent both by the word and censures, and to open it unto penitent sinners by the ministry of the Gospel, and by absolution from censures, as occasion shall require. Church censures are necessary for the reclaiming and gaining of offending brethren; for deterring of others from like offenses; for purging out of that leaven which might infect the whole lump; for vindicating the honor of Christ, and the holy profession of the Gospel; and for preventing the wrath of God, which might justly fall upon the Church, if they should suffer his covenant, and the seals thereof, to be profaned by notorious and obstinate offenders. For the better attaining of these ends, the officers of the Church are to proceed by admonition, suspension from the sacrament of the Lord's Supper for a season, and by excommunication from the Church, according to the nature of the crime and demerit of the person." In most Protestant churches, censures can only be inflicted after trial by the peers of the accused person. On the persons liable to Church censures, and the crimes for which they were inflicted in the ancient Church, see Bingham, *Orig. Eccles.* bk. xvi, ch. iii; and on the rightfulness of Church censures, Burnet, *On the Articles*, art. 33; Palmer, *On the Church*, ii, 277; Watson, *Theol. Institutes*, ii, 600 (N. Y. ed.). See also DISCIPLINE; EXCOMMUNICATION.

Census, a term that does not occur in the A. V. (although it is found in the original text of the N. T. in the Greek form κῆνσος, "tribute," Matt. xvii, 25, etc.), while the act denoted by it is several times referred to both in the Heb. and Gr. Scriptures (מִפְקָד, or פְּקֻדָּה, "*numbering*" combined with lustration, from פָּקַד, to *survey* in order to purge, Gesenius, *Thes.* p. 1120; Sept. ἀριθμός; N. T. ἀπογραφή; Vulg. *dinumeratio, descriptio*). See POPULATION.

I. *Jewish.*—Moses laid down the law (Exod. xxx, 12, 13) that whenever the people were numbered an offering of half a shekel should be made by every man above twenty years of age, by way of atonement or propitiation. A previous law had also ordered that the first-born of man and of beast should be set apart, as well as the first-fruits of agricultural produce; the first to be redeemed, and the rest, with one exception, offered to God (Exod. xiii, 12, 13; xxii, 29). The idea of lustration in connection with numbering predominated also in the Roman census (Smith, *Dict. of Class. Antiq.* s. v. Lustrum), and among Mohammedan nations at the present day a prejudice exists against numbering their possessions, especially the fruits of the field (Hay, *Western Barbary*, p. 15; Crichton, *Arabia*, ii, 180; see also Lane, *Mod. Egypt.* ii, 72, 73). The instances of numbering recorded in the O. T. are as follows:

1. Under the express direction of God (Exod. xxxviii, 26), in the third or fourth month after the Exodus, during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle. The numbers then taken amounted to 603,550 men, which may be presumed to express with greater precision the round numbers of 600,000 who are said to have left Egypt at first (Exod. xii, 37).

2. Again, in the second month of the second year after the Exodus (Num. i, 2, 3). This census was taken for a double purpose: (*a.*) To ascertain the number of fighting men from the age of 20 to 50 (Joseph. *Ant.* iii, 12, 4). The total number on this occasion, exclusive of the Levites, amounted at this time also to 603,550 (Num. ii, 32); Josephus says 603,650: each tribe was numbered, and placed under a special leader, the head of the tribe. (*b.*) To ascertain the amount of the redemption-offering due on account of all the first-born, both of persons and cattle. Accordingly, the numbers were taken of all the first-born male persons of the whole nation above one month old, including all of the tribe of Levi of the same age. The Levites, whose numbers amounted to 22,000, were taken in lieu of the first-born males of the rest of Israel, whose numbers were 22,273, and for the surplus of 273 a money payment of 1365 shekels, or 5 shekels each, was made to Aaron and his sons (Num. iii, 39, 51).

If the numbers in our present copies, from which those given by Josephus do not materially differ, be correct, it seems likely that these two numberings were in fact one, but applied to different purposes. We can hardly otherwise account for the identity of numbers even within the few months of interval (Calmet on Num. i; Kitto, *Pictorial Bible*, ib.). It may be remarked that the system of appointing head men in each tribe as leaders, as well as the care taken in preserving the pedigrees of the families, corresponds with the practice of the Arab tribes at the present day (Crichton, *Arabia*, ii, 185, 186; Niebuhr, *Descr. de l'Arabie*, p. 14; Buckingham, *Arab Tribes*, p. 88; Jahn, *Hist.* bk. ii, 8, 11; Malcolm, *Sketches of Persia*, xiv, 157, 159).

3. Another numbering took place 38 years afterwards, previous to the entrance into Canaan, when the total number, excepting the Levites, amounted to 601,730 males, showing a decrease of 1870. All the tribes presented an increase, except Reuben, which had decreased 2770; Simeon, 37,100; Gad, 5150; Ephraim and Naphtali, 8000 each. The tribe of Levi had increased 727 (Num. xxvi). The great diminution which took place in the tribe of Simeon may probably be assigned to the plague consequent on the misconduct of

Ancient Egyptian Registration.

Zimri (Calmet on Num. xxv, 9). On the other hand, the chief instances of increase are found in Manasseh of 20,500; Benjamin, 10,200; Asher, 11,900; and Issachar, 9900. None were numbered at this census who had been above 20 years of age at the previous one in the second year, excepting Caleb and Joshua (Num. xxvi, 63-65).

4. The next formal numbering of the whole people was in the reign of David, who in a moment of presumption, contrary to the advice of Joab, gave orders to number the people without requiring the statutable offering of a half-shekel. The men of Israel above 20 years of age were 800,000, and of Judah 500,000; total, 1,300,000. The book of Chron. gives the numbers of Israel 1,100,000, and of Judah 470,000; total, 1,570,000; but informs us that Levi and Benjamin were not numbered (1 Chron. xxi, 6; xxvii, 24). Josephus gives the numbers of Israel and Judah respectively 900,000 and 400,000 (2 Sam. xxiv, 1, 9; and Calmet, in loc.; 1 Chron. xxi, 1, 5; xxvii, 24; Joseph. *Ant.* vii, 13, 1).

5. The census of David was completed by Solomon, by causing the foreigners and remnants of the conquered nations resident within Palestine to be numbered. Their number amounted to 153,600, and they were employed in forced labor on his great architectural works (Josh. ix, 27; 1 Kings v, 15; ix, 20, 21; 1 Chron. xxii, 2; 2 Chron. ii, 17, 18).

Between this time and the Captivity, mention is made of the numbers of armies under successive kings of Israel and Judah, from which may be gathered with more or less probability, and with due consideration of the circumstances of the times as influencing the numbers of the levies, estimates of the population at the various times mentioned.

6. Rehoboam collected from Judah and Benjamin 180,000 men to fight against Jeroboam (1 Kings, xii, 21).

7. Abijah, with 400,000 men, made war on Jeroboam with 800,000, of whom 500,000 were slain (2 Chron. xiii, 3, 17).

8. Asa had an army of 300,000 men from Judah, and 280,000 (Josephus says 250,000) from Benjamin, with which he defeated Zerah the Ethiopian, with an army of 1,000,000 (2 Chron. xiv, 8, 9; Josephus, *Ant.* viii, 12, 1).

9. Jehoshaphat, besides men in garrisons, had under arms 1,160,000 men, including perhaps subject foreigners (2 Chron. xvii, 14-19; Jahn, *Hist.* v, 37).

10. Amaziah had from Judah and Benjamin 300,000, besides 100,000 mercenaries from Israel (2 Chron. xxv, 5, 6).

11. Uzziah could bring into the field 307,500 men (307,000, Josephus), well armed, under 2600 officers (2 Chron. xxvi, 11-15; Joseph. *Ant.* ix, 10, 3).

Besides these more general statements, we have other and partial notices of numbers indicating population. Thus, *a.* Gideon from 4 tribes collected 32,000 men (Judg. vi, 35; vii, 3). *b.* Jephthah put to death 42,000 Ephraimites (Judg. xii, 6). The numbers of Ephraim 300 years before were 32,500 (Num. xxvi, 37). *c.* Of Benjamin 25,000 were slain at the battle of Gibeah, by which slaughter, and that of the inhabitants of its cities, the tribe was reduced to 600 men. Its numbers in the wilderness were 45,600 (Num. xxvi, 41; Judg. xx, 35, 46). *d.* The number of those who joined David after Saul's death, besides the tribe of Issachar, was 340,922 (1 Chron. xii, 23-38). *e.* At the time when Jehoshaphat could muster 1,160,000 men, Ahab in Israel could only bring 7000 against the Syrians (1 Kings xx, 15). *f.* The numbers carried captive to Babylon, B.C. 598-82, from Judah are said (2 Kings xxiv, 14, 16) to have been from 8000 to 10,000, by Jeremiah 4600 (Jer. lii, 30).

12. The number of those who returned with Zerubbabel in the first caravan is reckoned at 42,360 (Ezra ii, 64), but of these perhaps 12,542 belonged to other tribes than Judah and Benjamin. It is thus that the difference between the total (v, 64) and the several details is to be accounted for. The purpose of this census, which does not materially differ from the statement in Nehemiah (Neh. vii), was to settle with reference to the year of Jubilee the inheritances in the Holy Land, which had been disturbed by the Captivity, and also to ascertain the family genealogies, and ensure, as far as possible, the purity of the Jewish race (Ezra ii, 59; x, 2, 8, 18, 44; Lev. xxv, 10).

In the second caravan the number was 1496. Women and children are in neither case included (Ezra viii, 1-14).

It was probably for kindred objects that the pedigrees and enumerations which occupy the first 9 chapters of the 1st book of Chronicles were either composed before the Captivity, or compiled afterwards from existing records by Ezra and others (1 Chron. iv, 28, 32, 39; v, 9; vi, 57, 81; vii, 28; ix, 2). In the course of these we meet with notices of the numbers of the tribes, but at what periods is uncertain. Thus Reuben, Gad, and half the tribe of Manasseh are set down at 44,760 (v, 18), Issachar at 87,000 (vii, 5), Benjamin 59,434 (vii, 7, 9, 11), Asher 26,000 (vii, 40). Besides, there are to be reckoned priests, Levites, and residents at Jerusalem from the tribes of Benjamin, Ephraim, and Manasseh (ix, 3).

Throughout all these accounts two points are clear. 1. That great pains were taken to ascertain and register the numbers of the Jewish people at various times for the reasons mentioned above. 2. That the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus the entire male population above 20 years of age, excepting Levi and Benjamin, at David's census, is given as 1,300,000, or 1,570,000 (2 Sam. xxiv, 1; 1 Chron. xxi), strangers 153,600; total, 1,453,600, or 1,723,000. These numbers (the excepted tribes being borne in mind) represent a population of not less than 4 times this amount, or at least 5,814,000, of whom not less than 2,000,000 belonged to Judah alone (2 Sam. xxiv, 9). About 100 years after, Jehoshaphat was able to gather from Judah and Benjamin (including subject foreigners) an army of 1,160,000, besides garrisons, representing a population of 4,640,000. Fifty years later, Amaziah could only raise 300,000 from the same 2 tribes, and 27 years after this, Uzziah had 307,500 men and 2600 officers. Whether the number of the foreigners subject to Jehoshaphat constitutes the difference at these periods must remain uncertain.

To compare these estimates with the probable capacity of the country, the whole area of Palestine, including the trans-Jordanic tribes, so far as it is possible to ascertain their limits, may be set down as not exceeding 11,000 square miles; Judah and Benjamin at 3135, and Galilee at 930 square miles. The population, making allowance for the excepted tribes, would thus be not less than 530 to the square mile. This considerably exceeds the ratio in most European countries, and even of many of the counties of England.

But while, on the one hand, great doubt rests on the genuineness of numerical expressions in O. T., it must be considered, on the other, that the readings on which our version is founded give, with trifling variations, the same results as those presented by the Sept. and by Josephus (Jahn, v, 36; Glasse, *Phil. Sacr. de caussis corruptionis*, i, § 28; vol. ii, p. 189). See NUMBER.

In the list of cities occupied by the tribe of Judah, including Simeon, are found 123 "with their villages," and by Benjamin 26. Of one city, Ai, situate in Benjamin, which like many, if not all the others, was walled, we know that the population, probably exclusive of children, was 12,000, while of Gibeon it is said that it was larger than Ai (Josh. viii, 25, 29; x, 2; xv, 21-62; xviii, 21, 28; xix, 1-9). If these "cities" may be taken as samples of the rest, it is clear that South-

ern Palestine, at least, was very populous before the entrance of the people of Israel.

But Josephus, in his accounts (1.) of the population of Galilee in his own time, and (2.) of the numbers congregated at Jerusalem at the time of the Passover, shows a large population inhabiting Palestine. He says there were many cities in Galilee, besides villages, of which the least, whether cities or villages is not quite certain, had not less than 15,000 inhabitants (*War*, iii, 3, 2 and 4; comp. Tacit. *Hist.* v, 8). After the defeat of Cestius, A.D. 66, before the formal outbreak of the war, a census taken at Jerusalem by the priests, of the numbers assembled there for the Passover, founded on the number of lambs sacrificed, compared with the probable number of persons partaking, gave 2,700,000 persons, besides foreigners and those who were excluded by ceremonial defilement (see Tacit. *Hist.* v, 12). In the siege itself 1,100,000 perished, and during the war 97,000 were made captives. Besides these many deserted to the Romans, and were dismissed by them (*War*, vi, 8, 9, 3). These numbers, on any supposition of foreign influx (ὁμόφυλον ἀλλ' οὐκ ἐπιχώριον) imply a large native population; and 63 years later, in the insurrection of Barchochebas, Dion Cassius says that 50 fortified towns and 980 villages were destroyed, and 580,000 persons were slain in war, besides a countless multitude who perished by famine, fire, and disease, so that Palestine became almost depopulated (Dion Cass. lxix, 14).

Lastly, there are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former as compared with present times—a fertility remarked by profane writers, and of which the present neglected state of cultivation affords no test. This, combined with the positive divine promises of populousness, increases the probability of at least approximate correctness in the foregoing estimates of population (Tacit. *Hist.* v, 6; Amm. Marc. xiv, 8; Josephus, *War*. iii, 3; Jerome on Ezek. xx, and Rabbinical authorities in Reland, c. xxvi; Shaw, *Travels*, ii, pt. ii, c. i, p. 336, 340, and 275; Hasselquist, *Travels*, p. 120, 127, 130; Stanley, *Palest.* p. 120, 374; Kitto, *Phys. Geogr.* p. 33; Raumer, *Palästina*, p. 8, 80, 83, App. ix. Comp. Gen. xiii, 16; xxii, 17; Num. xxiii, 10; 1 Kings iv, 20; Acts xii, 20). See Meiner, *De Hebræorum censibus* (Langens. 1764-66); Zeibich, *De censibus Hebræorum* (Gera, 1764-6). See PALESTINE.

II. *Roman*.—This, under the Republic, consisted, so far as the present purpose is concerned, of an enrolment of persons and property by tribes and households. Every paterfamilias was required to appear before the censors, and give his own name and his father's; if married, that of his wife, and the number and ages of his children; after this, an account and valuation of his property, on which a tax was then imposed. By the lists thus obtained every man's position in the state was regulated. After these duties had been performed, a *lustrum*, or solemn purification of the people, followed. but not always immediately (Smith, *Dict. of Class. Antiq.* s. v. Census. See Dionys. iv, 15, 22; Cicero, *de Legg.* iii, 3; Clinton, *Fast. Hell.* iii, p. 457, c. 10). The census was taken, more or less regularly, in the provinces, under the republic, by provincial censors, and the tribute regulated at their discretion (Cicero, *Verr.* ii, lib. ii, 53, 56), but no complete census was made before the time of Augustus, who carried out three general inspections of this kind, viz. (1.) B.C. 28; (2.) B.C. 8; (3.) A.D. 14; and a partial one, A.D. 4. The reason of the partial extent of this last was that he feared disturbances out of Italy, and also that he might not appear as an exactor. Of the returns made, Augustus himself kept an accurate account (*breviarium*), like a private man of his property (Dion Cass. liv, 35; lv, 13; Suetonius, *Aug.* 27, 101; Tacitus, *Ann.* i, 11; *Tab. Ancyr.* ap. Ernesti, *Tacit.* ii, 188). A special assessment of Gaul, under commissioners sent for the purpose, is mentioned in the time of Tiberius (Tacit. *Ann.* i, 31; ii, 6; Livy, *Ep.* 134, 136). In the New Test. two enrolments of this kind, executed under the Roman government, are mentioned by Luke (ἀπογραφή, "taxing"). See TAX.

1. In Acts v, 37, a census is referred to as at the time a well-known event, during which a certain Judas of Galilee raised an insurrection. This import of the term there employed is sustained by Josephus (*Ant.* xviii, 1, 1; 2, 1), who says that it was an assessment of property (ἀποτίμησις τῶν οὐσιῶν or χρημάτων), which the proconsul Quirinus (Κυρήνιος, Cyrenius) carried out on behalf of the emperor Augustus after the banishment of king Archelaus (A.D. 6), in which Samaria, Judæa, and Idumæa were joined with the province of Syria under direct Roman rule. The Latin name for such a valuation, which was occasionally instituted in all the provinces of the Roman empire, is the well-known one *census*; by it new lists (ἀπογραφαί, *tabulæ censoriæ*, Polyb. ii, 23, 9) were made out, of persons, property, and business, and upon this basis the tax was imposed. See ASSESSMENT. The matter was naturally odious generally to the subjects, especially to the Jews [see PUBLICAN], not only on account of their religious prejudices [see ZELOTES], but also the violent and extortionate manner in which Oriental taxation is always enforced. See TRIBUTE. The word ἀπογραφή is used almost invariably by Greek writers of the Roman period for *census*, although an enrolment for taxation is more properly called ἀποτίμησις, a sense, however, not inapplicable (even in the Attic dialect) to ἀπογραφή and ἀπογράφεσθαι (see Wachsmuth, *Hellen. Alterth.* ii, 71, 238, 280). See JUDAS (THE GALILÆAN).

2. In Luke ii, 1, there is mentioned an enrolment or ἀπογραφή as having taken place in the year of Christ's birth, by order of Augustus, and, as the words seem to express, under the superintendence of Quirinus or Cyrenius, president of Syria, extending over the entire land (πᾶσα οἰκουμένη). This seems, according to the date indicated, to have been different from the census above mentioned, as is indeed implied in the language "this the first tax-list was made while Quirinus was governor" (αὕτη ἡ ἀπογραφή πρώτη ἐγένετο ἡγεμονεύοντος Κυρηνίου). But this passage contains great historical difficulty as well as importance (see Huschke, *Ueber den zur Zeit der Geburt Christi gehaltenen Census*, Breslau, 1840; Wieseler, *Synopse*, p. 82 sq.; Kirmss, in the *Jenaer Lit.-Zeitung*, 1842, No. 100 sq.). The principal discrepancies alleged with regard to the tax itself have been adduced by Strauss (*Leben Jesu*, i, § 28) and De Wette (*Comment. zu Luc.* in loc.): 1. Palestine was not yet directly Roman, or immediately liable to such a *census* (comp. Joseph. *Ant.* xvii, 13, 5; xviii, 1, 1; Appian, *Civ.* v, 75); an ἀπογραφή at this time, therefore, as being neither available for the purposes of the emperor, nor adapted to the relations of the Jewish vassal-kings towards him, would have been the more likely to have created a popular or governmental disturbance than the later one above referred to. 2. At all events, no historical mention of so unusual a proceeding occurs either in Josephus or the Roman writers of the period. 3. Yet some notice of this event is the more to be expected, inasmuch as the ἀπογραφή in question covered the whole empire, the restriction of its terms ("the whole earth" or land) to Palestine being altogether arbitrary. 4. In a Roman "census" the subjects were assessed at their actual residences; a journey to the family seat could only be requisite on the supposition of a Jewish genealogical registry. 5. As wives were in no case required to repair to the assessors, Mary must have undertaken unnecessarily a journey to Bethlehem, and a stay there was harassing in her condition. Some of these objections were canvassed by Paulus (in his *Comment.* in loc.); Tholuck (*Glaubwürdigk. d. evang. Gesch.* p. 188 sq.), Huschke (*ut sup.*), and others have pretty effectually answered them all. They may mostly be obvi-

ated by simply and naturally assuming that this was a registration instituted indeed by the Roman emperor, but executed in accordance with the local usages (see Strong's *Harmony of the Gospels*, notes to § viii). See CYRENIUS.

In the first place, an ἀπογραφή was properly only an *enrolment* of the inhabitants, which may have been set on foot for statistical purposes, in order to obtain a complete account of the population, perhaps as a basis for a levy of troops from this as a subject territory. The emperor Augustus caused such a roll or abstract to be made out ("breviarium totius imperii," Suetonius, *Octav.* 101), which included an account of the provincial allies ("quantum sociorum in armis," Tacitus, *Annal.* i, 11), and from this Palestine could not well have been excepted. The ordering of such a register was not inconsistent with the political relations of Herod (as thought by Hoven, *Otia liter.* ii, 27 sq.), since he was himself but a dependent monarch; and as the word in question has usually the sense of a list with a view to assessment, the probability of such a taxation in this instance can certainly not be denied. Similar examples are by no means wanting in modern times among dependent countries. Moreover, Herod was so subject to the rule of Augustus that he did not even assume to judge two of his own sons, but referred the trial to the emperor (Josephus, *Ant.* xvi, 4, 1; comp. xvii, 5, 8); and he, in fact, submitted to an oath of allegiance to the emperor, which the Jews were required to take (*Ant.* xvii, 2, 4). The latter circumstance may indeed be naturally attributed to the vassalage of a nation, but the former was a voluntary act on the part of Herod, who nevertheless, without such ceremony, executed other members of his family (comp. however, Josephus, *Ant.* xvi, 11, 1). At all events, it abundantly appears from Josephus that Augustus, in moments of passion, was capable of resolving to proceed to extremities with Herod (*Ant.* xvi, 9, 3); and that, after Herod's death, he hesitated about transferring the land to the sons of the latter (*Ant.* xvi, 11).

There are monographs in Latin on the census of Quirinus by Ammon (Erlang. 1810), Birch (Hafn. 1790), Bornitius (Viteb. 1650), Breithaupt (Helmst. 1737), Deyling (*Observv.* ii, 326 sq.), Hasse (Regiom. 1796), Heumann (Gotting. 1732), Janus (Viteb. 1715; also in Ikenii *Thes.* ii, 424 sq.), Obrecht (Argentor. 1675), Perizonius (*Diss. de Prætorio*, s. f.), Pihlmann (Aboæ, 1735), Richard (Viteb. 1764; also in Ikenii *Thes.* ii, 434 sq.), Volborth (Gotting. 1785), Wedel (Jen. 1703), Wernsdorf (Viteb. 1693, 1720); in Greek, by Friberg (Aboæ, 1750); in German, by Kist (Utr. 1791), Pitschmann (*Dub. ver. Hist.* i, 1-25), Stockmann (Grön. 1756). See NATIVITY.

Central America comprised, in 1868, five sovereign states, viz. Costa Rica, Nicaragua, Guatemala, Honduras, and San Salvador. The eastern coast of Central America was discovered by Columbus in 1502, the western by H. Ponce in 1516. The Spaniards soon subjected to their rule the greater part of the country; but on the Mosquito coast the Indians maintained their independence, and the district of Peten was not taken possession of until 1697. In 1821 the five states overthrew the Spanish rule by a bloodless revolution; in 1822 they called a Constituent Assembly, and in 1823 they declared themselves an independent republic, under the name the United States of Central America. The new confederacy was continually a prey to civil war, arising principally from the mutual hostility of the three races: the white, which prevails in Costa Rica; the Indian, to which in Guatemala almost 90 per cent. of the entire population belong; and the mixed, which is predominant in the three other states. The year 1839 put an end to the union, and the confederacy was divided into five sovereign and independent states. Together with the Spanish dominion, the ecclesiastical rule of the Roman Catholic Church was established throughout the whole extent of Central America. After the declaration of independence, the Central American confederacy showed itself favorable to ecclesiastical reforms and to religious toleration. The Constituent Assembly forbade the proclamation of papal bulls, and the receiving of money for indulgences. From 1826 to 1831 all the convents of monks except those of the Bethlehemites (q. v.) were suppressed, and in 1825 an annual visitation of the female convents was ordered, in order to see that no nun was retained in a convent against her will. In 1832 religious liberty was proclaimed, and Honduras even abrogated for some time the celibacy of priests. Since the dissolution of the union there has always been a fierce struggle between the clerical and the liberal parties. Some of the states, in particular Guatemala, have recalled the priests, and re-enforced the most odious laws of intolerance which ever disgraced a papal country; others, in particular Honduras, have been more faithful to the principles of liberalism. The religious condition of the people, as in all the papal countries of America, is very low. The grossest superstition prevails, especially among the Indians. In the Indian villages the rule of the priest is almost absolute. Worship consists mostly in processions and in the veneration of the images of the saints. Every Indian endeavors to possess a saint's image, which is preserved in the church, and which he carries about at processions on a gilded pole. At the festival of the saint the possessor of the image gives a great banquet, and the priest receives for the mass which he says, in honor of the saint, money and fowl. If the possessor of the image dies without heirs, it is bought by another Indian, lest it be rejected from the church; for the church rejects every image that has no owner, and every such rejection is expected to forbode a calamity to the village. The processions are attended by flutes and other instruments, by immense clouds of frankincense, and by a great display of fireworks. A peculiar custom is observed on the day of Pentecost, when a white dove, ornamented with flowers, is placed on the head of the priest who stands before the altar, and flowers are showered upon him from all sides. Marriages are conducted in the villages before sunrise, a custom probably transmitted from the times of Indian paganism. Efforts to establish Protestantism in Central America have been repeatedly made, especially by missionaries sent out by the venerable Mr. Gossner (q. v.), but thus far without great permanent fruit. The Moravians, however, have had (since 1848) some flourishing missions on the Mosquito Coast, an independent district of Central America inhabited by about 20,000 Indians. Their missionary statistics in 1860 were as follows: stations, 8; missionaries, 7; converts, 219. The Roman Catholic Church in the five states of Central America is under the jurisdiction of the archbishop of Guatemala (who is assisted in his diocese by two bishops *in partibus infidelium*) and four bishops, at San Salvador, Nicaragua, Comayagua (the capital of Honduras), and St. José (in the state of Costa Rica). The aggregate number of parishes in the five states, according to the last accounts, is 248, with 4 missions, and the number of churches 716. See Reichard, *Centro-America* (Brunsw. 1851); Fröbel, *Seven Years' Travel in Centro-America* (Lond. 1858); Marr, *Reise nach Central-America* (Hamb. 1863, 2 vols.); Squier, *The States of Central America* (N. Y. 1858). See AMERICA.

Centuriators, the writers of the CENTURIES OF MAGDEBURG (q. v.) are so called.

Centuries of Magdeburg (*Centuriæ Magdeburgenses*), the name given to the first great work on Church History by Protestant writers. It was projected by Matthias Flacius, and prosecuted by him, in conjunction with Joh. Wigand, Matt. Judex, Basilius Faber, Andr. Corvinus, and Thom. Holzhuter, of Magdeburg. Several of the Protestant princes joined to defray the

expense incurred in the preparation of the work. "The centuriators thus describe the process employed in the composition of their work. Five directors were appointed to manage the whole design, and ten paid agents supplied the necessary labor. Seven of these were well-informed students, who were employed in making collections from the various pieces set before them. Two others, more advanced in years, and of greater learning and judgment, arranged the matter thus collected, submitted it to the directors, and, if it were approved, employed it in the composition of the work. As fast as the various chapters were composed they were laid before certain inspectors, selected from the members of the directors, who carefully examined what had been done, and made the necessary alterations; and, finally, a regular amanuensis made a fair copy of the whole. At length, in the year 1559, appeared the first volume of their laborious undertaking. It was printed at Basle, where the thirteenth and final volume (fol.) appeared in 1574; but, as it was projected at Magdeburg, that name was to remain on its title; and the first great Protestant work on Church History has been always commonly known as the Magdeburg Centuries. It was in every point of view an extraordinary production. Though the first modern attempt to illustrate the history of the Church, it was written upon a scale which has scarcely been exceeded. It brought to light a large quantity of unpublished materials, and cast the whole subject into a fixed and regular form. One of its most remarkable features is the elaborate classification. This was strictly original, and, with all its inconveniences, undoubtedly tended to introduce scientific arrangement and minute accuracy into the study of Church History. Each century is treated separately, in sixteen heads or chapters. The first of these gives a general view of the history of the century; then follows, 2. The extent and propagation of the Church; 3. Persecution and tranquillity of the Church; 4. Doctrine; 5. Heresies; 6. Rites and Ceremonies; 7. Government; 8. Schisms; 9. Councils; 10. Lives of Bishops and Doctors; 11. Heretics; 12. Martyrs; 13. Miracles; 14. Condition of the Jews; 15. Other religions not Christian; 16. Political changes of the world" (Hook, *Church History*, s. v.). "The work enlisted all the Protestant learning of the age. It was distinguished for its familiarity with original authorities, for its frequent citations, for a criticism which paid no deference to earlier writers on the same subject, and for its passionate style of controversy. For more than a century afterwards, nothing was published but text-books formed from the materials supplied by the Centuries, and written in the same spirit" (Hase, *Church History*, § 10). As a whole, the work is controversial rather than purely historical; but its spirit, its thoroughness, and its method were far in advance of any book in the same field that had arisen in the Roman Church. The "Annals" of Baronius were undertaken in order to counteract the influence of this great work.

The "Centuries" do not reach beyond the 13th century. The best edition is the original one (*Ecclesiastica Historia*, etc. *per aliquot Studiosos et pios viros in urbe Magdeburgica* (Basil, 1559-74, 13 vols. in 8, fol.); 2d edit. by Lucius, with alterations (Basel, 1624, 13 vols. in 3); *new edition*, to be extended to 1500, commenced by Baumgarten and Semler, but reaching only the 6th century (Nürnb. 1757-65, 6 vols.); *Epitome* up to 1600, by Osiander (Tüb. 1592-1604, 9 vols.); Germ. transl. by Count Münnich (Hamburg, 1855). See Buddæus, *Isagoge*, bk. ii, chap. vi, § iv, p. 787; Schaff, *Ch. Hist.* vol. i, § 7; Schaff, *Apost. Church*, § 29, p. 66.

Centu'rion (ἑκατοντάρχης and ἑκατόνταρχος, a translation of the Latin *centurio*, which also occurs in the Græcized form κεντυρίων, Mark xv, 39, 44, 45), a Roman military officer in *command of a hundred men*, as the title implies. The number under him, however, was not always uniform, being enlarged or lessened according to circumstances (see Smith's *Dict. of Class. Antiq.* s. v.). Cornelius, the first Gentile convert to Christianity, held this rank (Acts x, 1, 22). See Cornelius. Other centurions are mentioned in Matt. viii, 5, 8, 13; Luke vii, 2, 6; Acts xxi, 32; xxii, 25, 26; xxiii, 17, 23; xxiv, 23; xxvii, 1, 6, 11, 31, 43; xxviii, 16. See Army. The centurion at our Saviour's cross (Matt. xxvii, 54; Luke xxiii, 47) is said to have been named Longinus (see the treatises on this point by Goetze and by Möller, *Obss. philol.* Rost. 1696, p. 4 sq.). See Captain.

Ceolfrid, or Ceolfirth, a Saxon monk and writer, was born about the year 642, in the kingdom of Northumberland. In 674 he is mentioned by Bede as aiding Benedict Biscop in building the monastery of St. Peter at Wearmouth; and when Benedict founded the monastery of St. Paul at Jarrow, he made Ceolfrid the abbot. Benedict, on his death-bed, designated Ceolfrid abbot of both the monasteries at Wearmouth and at Jarrow. Bede describes him as "a man of great perseverance, of acute intellect, bold in action, experienced in judgment, and zealous in religion." He died on his way to Rome, when he had nearly reached Langres, in France, on the 25th of September, 716. His remains were carried to Wearmouth, but were subsequently removed to Glastonbury. His letter concerning Easter, addressed to Naitan, king of the Picts, and preserved by Bede, is distinguished by strength of reasoning and clearness of style. Bale attributes to him some homilies, epistles, and a tract, *De sua Peregrinatione*.—Wright, *Biog. Brit. Lit.* i, 234 sq.; Bede, *Hist. Eccles.* bk. v, ch. xxi; Hook, *Eccles. Biography*, iii, 532.

Ceperaria (evidently a compound of the Hebrew כפר: see Caphar-), a town of Palestine mentioned in the *Peutinger Table* as lying between Ashkelon and Jerusalem, 8 (or 18) R. miles from Eleutheropolis, and thought by Reland (*Palæst.* p. 684) to be the same as *Capharorsa* (q. v.); but identified by Robinson with "a deserted village, *Kefr Urieh*, in or near the plain, not far from Tibneh and the mouth of the Surar" (*Researches*, ii, 643).

Ce'phas (Κηφᾶς; in later Heb. or Syriac כֵּיפָא), a surname which Christ bestowed upon Simon (John i, 42), and which the Greeks rendered by Πέτρος, and the Latins by *Petrus*, both words meaning "a rock," which is the signification of the original. See Peter.

Ce'ras (Κηράς), mentioned (1 Esdr. v, 29) as one of the "temple servants" whose "sons" returned from Babylon; evidently the Keros (q. v.) of the Heb. texts (Ezra ii, 44; Neh. vii, 47).

Cerastès. See Serpent.

Ceration, Ceratonia. See Husk.

Cerdo, or Cerdon, a Gnostic of the second century. Little is known of his history. Irenæus says that he came to Rome from Syria in the time of Hyginus, A.D. 140. Lardner gathers the testimonies of the fathers with regard to his heresy as follows: Cerdon taught, according to Irenæus, that "the God declared in the law and the prophets is not the Father of our Lord Jesus Christ. For he was well known, the latter unknown; the former was just, the latter good" (Irenæus, as cited by Eusebius (*Hist. Eccles.* iv, 11). Epiphanius's summary is to this purpose (*Haer.* 41): "That Cerdon learned his doctrine from Heracleon, making, however, some additions of his own; that he came from Syria to Rome, and there spread his notions in the time of Hyginus. He held two contrary principles; he said that Christ was not born. He denied the resurrection of the dead, and rejected the Old Testament." In his larger article Epiphanius writes that "Cerdon succeeded Heracleon, and came from Syria to Rome in the time of Hyginus, the ninth bishop after the apostles; that, like many other heretics, he held two principles and two gods: one good and unknown,

the Father of Jesus; the other the Creator, evil and known, who spake in the law, appeared to the prophets, and was often seen. He taught, moreover, that Jesus was not born of Mary, and that he had flesh in appearance only. He denied the resurrection of the body, and rejected the Old Testament. He said that Christ descended from the unknown Father; that he came to overthrow the empire and dominion of the Creator of the world, as many other heretics do; and, having been a short time at Rome, he transmitted his venom to Marcion, who succeeded him."

Theodoret's account of Cerdon is to this effect: "He was in the time of the first Antoninus. He taught that there is one God, the Father of our Lord Jesus Christ, unknown to the prophets; another, the Maker of the universe, the giver of the Mosaic law; and this last is just, the other good. For he in the law orders 'that an eye should be given for an eye, and a tooth for a tooth;' but the good God in the Gospels commands that 'to him who smiteth thee on the right cheek, turn the other also;' and that to him who would take away thy coat, thou shouldest give thy cloak also. He in the law directs to love a friend and hate an enemy; but the other, to love even our enemies. 'Not observing,' says Theodoret, 'that in the law it is directed that if a man meet his enemy's ox going astray, he should bring him back; and not forbear to help his beast when lying under his burden;' and that he who, according to him, is alone good, threatens 'hell-fire to him who calls his brother fool;' and showing himself to be just, said, 'With what measure ye mete, it shall be meted to you again.'" Irenæus says that when Cerdon was at Rome, he several times renounced his errors; but at length, for returning to them again, or for teaching them in a clandestine manner, he was finally excluded from the Church. Cerdo's views were adopted and amplified by Marcion. See Mosheim, *Commentaries*, cent. ii, § 63; Lardner, *Works*, viii, 444 sq.; Baur, *Die Christliche Gnosis*, p. 101, 278 sq.; and the articles GNOSTICS; MARCION.

Cereālis, PETILIUS, a relative of the emperor Vespasian, and a Roman general of note in several provincial campaigns (Tacitus, *Ann.* xiv, 32; *Hist.* iii, 59, 78, 79; iv, 71, 86; *Agr.* 8, 17). During the war of Titus against the Jews he commanded a detachment against the Samaritans (Josephus, *War*, iii, 7, 32), and was active in the siege of Jerusalem (*ib.* iv, 9, 9; vi, 2, 5; 4, 3).

Cereals, a general term embracing all those kinds of grain (דָּגָן, "corn") of which bread (q. v.) is made. See AGRICULTURE. These, among the Hebrews, were the following (see Jahn, *Bibl. Archæol.* § 58). See GRAIN.

1. *Wheat* (חִטָּה, *chittah'*, i.e. חִנְטָה, like the Arabic *chintah;* the several kernels are denoted by the plur. חִטִּים; Greek πῦρος; in the N. T. the more generic term σῖτος; in modern Egypt and Barbary *kamchun*, Heb. קֶמַח) was the most important kind of bread-corn grown in Palestine (Isa. xxviii, 25; Ezek. iv, 9), and, like barley, was raised throughout the land (Deut. viii, 8; Judg. vi, 11; 1 Sam. vi, 13; 2 Sam. iv, 6; xvii, 28; comp. Pliny, xviii, 21); so fully supplying the inhabitants that Solomon was enabled with a surplus to procure the services of king Hiram's artificers (1 Kings v, 11), and considerable exports of wheat to Tyre are spoken of at a later date (Ezek. xxvii, 17). The culture of wheat is still practised there (Robinson, *Researches*, ii, 276 etc.). The finest wheat is said (Mishna, *Menach.* viii, 1) to have grown in Michmash, and an unknown locality called *Mezunichah* (מזוניחה). In Ezek. (l. c.) a peculiar kind of wheat (חִטֵּי מִנִּית, "wheat of Minnith") is spoken of. See MINNITH. The sowing of wheat fell in Marchesvan (Oct.-Nov.), and the reaping (קְצִיר חִטִּים, "wheat-harvest") at the end of Nisan (March-April). See CALENDAR. Wheat still ripens in Palestine sometimes in April (Korte, *Reise*, p. 145, 432; Shaw, *Trav.* p. 290), although it is usually fit to cut in May or the beginning of June (Robinson, *Researches*, ii, 99, etc.). See FIRST-FRUITS. Wheat flour (סֹלֶת חִטִּים, Exod. xxix, 2) was used for bread and cakes (q. v.), and the grains were also roasted (see PARCHED CORN) when green (Joshua v, 11; Ruth ii, 14; 1 Sam. xvii, 17; 2 Sam. vii, 28), as is still the case in Palestine, especially by the reapers (Hasselquist, p. 91). See HARVEST. The kernels were also pounded (Lev. ii, 14; xxiii, 14; 2 Kings iv, 42) into a kind of grits (כַּרְמֶל). See EARS (OF CORN). In the sanctuary wheat was used in considerable quantity (Ezra vii, 22; comp. vi, 9; see Bel 2). Wheat was universally cultivated in the lands of hither Asia and the adjoining parts of North Africa (Egypt), from the earliest times; but how it was introduced to the Hebrews is unknown. See generally Link, in the *Abhandl. der Berliner Akademie*, 1816-17, p. 127 sq; Celsii *Hierobot.* ii, 112 sq. See WHEAT.

2. *Barley* (שְׂעֹרָה, *seirah*), of various kinds (chiefly the six-rowed), was largely cultivated (Gen. xxvii, 16; 2 Chron. ii, 10; Ruth ii, 17; 2 Sam. xiv, 30; Isaiah xxviii, 25; Jer. xli, 8) by the Egyptians (Exod. ix, 31 sq.) and Hebrews (as one of the staple products of Palestine, Deut. viii, 8; comp. Joel i, 11), and was used partly as fodder (1 Kings iv, 28; comp. *Pesach.* f. iii, 2) for cattle (Phædr. v, 5, 8; Juven. viii, 154; Pliny, xiii, 47; xviii, 14; xxviii, 81) or horses (Æsop, *Fab.* 140; comp. Sonnini, *Trav.* ii, 20), partly for bread (Pliny, *Hist. Nat.* xviii, 26) for the poorer classes (Judg. vii, 13; 2 Kings iv, 42; John vi, 9, 13; comp. Ezek. iv, 9; Joseph. *War*, v, 10, 2; Philo, ii, 307; Seneca, *Ep.* 18, p. 25. Bip.; Athen. vii, 304; Plutarch, *Apoph. reg.* p. 6, Lips.; Xenoph. *Anab.* iv, 5, 31; see Wetstein, i, 876 sq.); for the latter purpose it was regarded as wholesome (Lucian, *Macrob.* 5; Pliny, xxii, 65); but, being less palatable than wheat (Athen. iii, 115), it was not usually eaten except under the pressure of hunger (Wilhelm Tyr. xi, 22, p. 809), and therefore constituted the regular fare of Roman soldiers when undergoing correction (Livy, xxvii, 13; Sueton. *Aug.* 24; *Veget. Mil.* i, 13; Dio Cass. xlix, c. 27 and 38; Polyb. vi, 38, 4; Polyæn. iv, 24), as of the hermits in the Christian Church (Jerome, *Opp.* ii, 5); although in early times it was a common article of food (Pliny, xviii, 14; Artemid. i, 71), and is still highly relished by the Arabs in Morocco (Höst, *Nachr.* p. 132). It was also employed as malt for a species of intoxicating drink (q. v.). See WINE. Barley was sown in the middle of the month of Marchesvan (q. v.), or November (Lightfoot, p. 340, 1004), and was reaped in the month Abib (q. v.), or April (at Jericho in March; see Buhle, *Calendar. Palæst. œcon.* p. 14, 23; in less favored situations even in May, Robinson, *Res.* ii, 99, 100); and these seasons became regular notations of time (2 Sam. xxi, 9; Ruth i, 22; Judith viii, 2). See HARVEST. See generally Celsius, *Hierob.* ii, 239 sq. On the kinds of barley known to the ancients, see Link, in the *Abhandl. der physikal. Classe der kön. preuss. Akademie d. Wissensch.* 1816-17, p. 178 sq. On Num. v, 15, comp. the article JEALOUSY-OFFERING. See BARLEY.

3. *Spelt* (כֻּסֶּמֶת, *kusse'meth;* Arab. *kassamat;* Aram. כּוּנְתָּא; *Triticum spelta* of Linn.; by the Latins *ador* or *adoreum*, Adam, *Rom. Ant.* ii, 434), mentioned in Exod. ix, 32; Isa. xxviii, 25; Ezek. iv, 9 [see FITCHES], is a species of bread-corn with a four-petaled blunt calyx, hermaphrodite blossoms, followed by little bearded slender ears, seemingly shorn (hence the name, from כָּסַם, to *curtail*), whose grains adhere so firmly in the husk as to be with difficulty separated from it. It grows about as tall as barley, and was cultivated in the southern parts of Europe (Strabo, v

227), as well as in Egypt (Herod. ii, 36; Pliny, xviii, 19), Arabia, and Palestine (where it is still raised), of several varieties, the winter grain being esteemed the best (Exod. ix, 32). Among the Israelites it was usually associated with barley as a field-crop (Isa. l. c.). The meal is fine, and whiter than wheat flour (Pliny, xviii, 11); the bread made of it (Phocas, c. 23) is more brittle and less nutritious than wheaten (Dioscor. ii, 111). Comp. generally Celsius, *Hierob.* ii, 98 sq. Various other significations of the above Heb. term may be seen in Lindorfii *Lex. Heb.* ii, 1007; among moderns, Shaw (*Trav.* p. 351) understands *rice* (*oryza*, Linn.); the Sept. has ζέα in Isa., but ὄλυρα in both the other passages (both are synonymous terms, Herod. ii, 34). Comp. Link, *Urwelt*, i, 404 sq. See SPELT.

4. *Millet* appears to be denoted by the Heb. דֹּחַן, *dochan'* (Arab. *duchna*) of Ezek. iv, 9, which, however, Gesenius (*Thes.* p. 333) regards as a generic term, in distinction from the *Indian millet* (*Holchus dochna*, Linn.), a species of cereal (Pliny, xxvii, 63) peculiar for its hermaphrodite or two-bearded and mostly two-petaled calyx. It stands quite tall, and bears prolate brown kernels pressed together and resembling rice. It blossoms in Egypt (Rosellini, *Monum. civ.* i, 363 sq.; Forskal found it at Rosetta) in the beginning of November, and is also now cultivated in Arabia (Wellsted, *Trav.* i, 295), where the grain is used for a poor sort of bread (Niebuhr, *Reise*, i, 158). See generally Celsii *Hierob.* i, 453 sq.; Oedmann, *Samml.* v, 92 sq. See MILLET.

Some distinct species of grain is thought by many (so the Sept., Aquila, Theod., and Vulg.) to be designated by the term נִסְמָן, *nisman'*, of Isa. xxviii, 5; whether a variety of millet, spelt, or barley, or some totally different cereal, is not agreed; but the word is perhaps rather an appellative indicative (so the A. V. "appointed" barley) of a barley-field (see Rosenmüller and Gesenius, in loc.). Other modern gramineous plants, as rye, oats, maize, rice, etc. do not appear to be mentioned in Scripture. See RYE. Some of the smaller grasses, however, seem to have been employed as farinacea. See CUMMIN. Certain legumes also, as beans, peas, etc. were used for similar culinary purposes. See PULSE.

Ceremony, Latin *cærimonia*, a word sanctioned by Ciceronian usage, but of uncertain etymology, and variously derived: (1) from *Ceres*, and the offerings made to her; (2) from *Cære*, the Etrurian town, whither the sacred things and Vestals of the Romans were conveyed for safety from the Gauls (Forcellini, *Lex. tot. Latin.*); (3) from *Carere*; (4) from *Carus* and *Caritas*; (5) from *Cerus*, an obsolete Latin word=*pius*, *sanctus*, i. e. pious, sacred (Scaliger); (6) from *Coira*=*Cura* (Georges' *Lexikon*); (7) from *Cœlum*, as though it should be *Cœlimonia*.

Particular ceremonies are treated in this work under their appropriate heads. We propose only to consider here (1) whether the term is a suitable one to denote Christian church services, and (2) its import in creeds and symbolical books, making free use of Palmer's article in Herzog, *Real-Encyklop.* (Suppl. i, 314).

Whenever the word ceremony is used in an indefinite way of a religious act, we must not overlook the distinction between the essential, necessary part of the act, without which no worship can be, and its accompanying forms, which only serve to give it greater solemnity, and bring out more strikingly the contrast with common life. This non-essential part only is *ceremony*. To illustrate farther: the religious act may be defined as something done in obedience to divine command, and therefore necessary to salvation; while ceremony represents man's voluntary work, the offspring of the connection of the religious impulse and his æsthetic taste. Hence results the truly Protestant doctrine that these forms, because they are subjectively conditioned, may vary according to times and places. The Roman Catholic Church, in spite of her longing for absolute unity, is unable to prevent some freedom and variety in this respect, and allows that particular rites (*ritus particulares*) need not be everywhere exactly the same, though universal ones (*ritus universales*) must be observed always and everywhere alike. On this point Melancthon rightly says, "We do not fully understand what our opponents mean" (Non satis intelligimus, quid velint adversarii); for by the distinction of universal and particular rites, the Protestant view is, in fact, conceded to be correct, and the only question would seem to be, which rites belong to the one and which to the other class. Yet, under the Romish view, we have only to rank among the universals as many as possible of the most formal, unmeaning, and arbitrary things, and thus make them obligatory. In the distinction of the divinely commanded and the humanly devised, we must keep in view (1) that the Mosaic law made what we call ceremony the subject of divine enactment, and did not leave it to man's choice; and (2) that this choice is not individual caprice. Whatever, through the Church's tendency to improvement in matters of worship, has grown into ritual forms—whatever has become settled practice in the Church, should be respected by the individual, as a custom inherited from the fathers—with the condition, indeed, that when a ceremony has lost its original, correct meaning, or assumed a false one, or when its outward form has become opposed to the moral consciousness and condition of the Church, Christian freedom may assert its right to abolish, simplify, or replace such ceremony.

The distinction may be made clearer by the following illustrations: To baptize is not a ceremony, but a necessary church act; but the use of a cope and surplice, of a silver baptismal cup and bowl, of certain liturgically prescribed words, the laying on of the hands, the sign of the cross—these constitute ceremony. Again, we celebrate the Lord's Supper in obedience to Christ's command, but ceremony prescribes how we shall furnish a table, as a New Testament altar; what kind of vessels we shall use; whether, like the Lutherans, we shall give the *wafer* to each communicant, with the same words, or, like the Reformed, shall cut the bread, etc.; whether the communicants shall kneel or not, etc. These examples show that what is necessary and what is voluntary, what is divinely enjoined and what is pleasing to man, the kernel and the shell, cannot be mechanically separated; and that, though some ceremony enters into all religious services, it should never be mere empty, unmeaning form. What are called in public life court ceremonials are indeed such, but the minister of the Gospel may not be merely a master of ceremonies. In judicial proceedings ceremony may have real significance: e. g. in the taking of oath, the raised hand and set form of words, the assumption of a black cap by the judge when pronouncing sentence of death, and the breaking of a staff before the execution, non-essential, yet symbolic acts, powerfully influence the imagination.

The application of the term ceremony to the rites of Christian baptism, marriage, burial, etc. is repugnant to our feelings, as implying excessive formality. The Socinians alone call baptism and the Lord's Supper ceremonies, regarding them as essentially unmeaning observances, though enjoined by Christ. On the other hand, the Roman Catholic and High-Church view assigns to certain ceremonial acts somewhat of saving efficacy, to attain which duly authorized forms must be observed. The evangelical Protestant, eschewing either extreme, accepts as helps in the Christian life such ritual forms as by their outward correspondence with the religious idea tend to edify; but he does not trust in them as having power to save; for him, far more important than sprinkled water, folded hands, chrism, or holy vessel, is the *Word of God*, understood

by all, and pointing him to the sacrifice of Christ as his hope and salvation. We see, therefore, that the term ceremony is less frequently applicable to the services of the Protestant than to those of the Roman Catholic or Greek Church; and, indeed, in this sense the word is rather foreign to Protestant ecclesiastical and scientific language.

The Reformers were not punctilious in this respect, however; but, in their symbolical books, used ceremony as synonymous with *ritus ecclesiasticus*, and named, as such, *ordo lectionum, orationum, restitus ecclesiasticus et alia similia* (*Apol. Conf.* xii; Hase, *Libri Symb.* p. 250). Frequently ceremony was confounded with *traditiones*, and what holds good of these applies also to it. Nevertheless, a clear perception of the import of ceremony, and its distinction from the essential church act, is shown in their doctrine that it is not "*per se cultus divinus aut aliqua saltem pars divini cultus*" (*Form. Concord. Epit.* cap. x, p. 651), and that no general conformity therein is required by the practice of the ancient Church; and of more importance still, that no justifying or saving power belongs to the performance of ceremonial acts (*Apol.* viii, p. 206. Paulus ideo damnat Mosaicas ceremonias, sicut traditiones damnat, quia existimabantur esse opera, quæ mereantur justitiam coram Deo). If such an opinion of their value obtains, they must be abandoned (Luther, *Tischreden*, th. xi, cap. 10, 8). So we must not, for the sake of our ease or peace, take part in ceremonies which conscience disapproves. If those in use fail to effect the true aim of all ceremonies, i. e. the teaching the ignorant and producing harmony of worship, the Church may and should establish others; so that, on the one hand, the people lack not those seemly forms, which justly apprehended, "do serve to a decent order and godly discipline," and, on the other, be not so overburdened or misled by them as "in the bondage of the shadow" to lose "the freedom of the spirit" (*Preface to English Prayer-book*).

The Articles of Religion of the Church of England declare that "the Church hath power to decree rites or ceremonies" (Art. XX): and "every particular Church hath authority to ordain, change, and abolish ceremonies, etc." The Methodist Episcopal and Protestant Episcopal churches have similar articles. "If our reasonable service to God as Christians implies certain external acts of worship, these external acts *must be* performed after an external manner—that is to say, there *must be* certain forms and ceremonies in our divine worship. And those sects, like the Quakers, who have pretended to deny this fact, have proved, by their own quaint and peculiar ceremonies, that *something of the sort is needful* even to their form of Christianity. But as it is *needful*, so likewise is it *advantageous* to observe decent and orderly ceremonies in religion." Without such institutions, religion might be preserved, indeed, by a few of superior understanding and of strong powers of reflection, but among mankind in general all trace of it would soon be lost. When the end for which they are appointed is kept in view, and the simple examples of the New Testament are observed, they are of vast importance to the production both of pious feelings and of virtuous conduct; but there has constantly been a propensity in the human race to mistake the means for the end, and to consider themselves as moral and religious when they scrupulously observe what was intended to produce morality and religion. The reason is obvious: ceremonial observances can be performed without any great sacrifice of propensities and vices; they are palpable; when they are observed by men who, in the tenor of public life, do not act immorally, they are regarded by others as indicating high attainments in virtue; and through that self-deceit which so wonderfully misleads the reason, and inclines it to minister to the passions which it should restrain, men have themselves become persuaded that their acknowledgment of divine authority, implied in their respect to the ritual which that authority is conceived to have sanctioned, may be taken as a proof that they have nothing to apprehend from the violation of the law under which they are placed (Watson, s. v.).

"The rites and ceremonies of the Christian Church, agreeably to the general rules of Scripture, ought to be of such a kind as to promote the order, the decency, and the solemnity of public worship. At the same time they ought not to be numerous, but should preserve that character of simplicity which is inseparable from true dignity, and which accords especially with the spiritual character of the religion of Christ. The apostles often remind Christians that they are delivered from the ceremonies of the law, which are styled by Peter 'a yoke which neither their fathers nor they were able to bear' (Acts xv, 10). The whole tenor of our Lord's discourses, and of the writings of his apostles, elevates the mind above those superstitious observances in which the Pharisees placed the substance of religion; and, according to the divine saying of Paul, 'The kingdom of God is not meat and drink, but righteousness and peace, and joy in the Holy Ghost' (Rom. xiv, 17). The nature of this kingdom is forgotten when frivolous observances are multiplied by human authority; and the complicated, expensive pageantry of Roman Catholic worship, together with the still more childish ceremonies which abound in the Eastern or Greek Church, appear to deserve the application of that censure which the apostle pronounced when he represented the attempts made in his days to revive the Mosaic ritual as a 'turning again to weak and beggarly elements.' Further, all the Scripture rules and examples suggest that, in enacting ceremonies, regard should be had to the opinions, the manners, and prejudices of those to whom they are prescribed, and that those who entertain more enlightened views upon the subject should not despise their weak brethren. Upon the same principle, it is obvious that ceremonies ought not to be lightly changed. In the eyes of most people, those practices appear venerable which have been handed down from remote antiquity. To many the want of those helps to which they have been accustomed in the exercises of devotion might prove very hurtful, and frequent changes in the external parts of worship might shake the steadfastness of their faith. The last rule deducible from the Scripture examples is this, that the authority which enacts the ceremonies should clearly explain the light in which they are to be considered; should never employ any expressions, or any means of enforcing them, which tend to convey to the people that they are accounted necessary to salvation; and should beware of seeming to teach that the most punctual observance of things in themselves indifferent is of equal importance with judgment, mercy, and the love of God."—Hill, *Lectures on Divinity* (N. Y. ed., p. 773). Y. ed.), i, 593; ii, 339; iii, 168.

Cerinthians, followers of Cerinthus (q. v.).

Cerinthus (Κήρινθος), a heresiarch, who lived in the time of the apostle John, towards the end of the first and at the beginning of the second century. The accounts of the ancients and the opinions of modern writers are equally at variance with respect to him. He was a Jew by nation and religion, who, after having studied in the schools of Alexandria, appeared in Palestine, and spread his errors chiefly in Asia Minor. Our sources of information as to his doctrines are Irenæus, *adv. Hær.* i, 26; Eusebius, *Hist. Eccl.* iii, 28; vii, 25; Epiphanius, *Hær.* 28; and Theodoret, *Fab. Hær.* ii, 3 (Opp. tom. iii). Epiphanius makes him to have been one of those Jews who, in their zeal for the law of Moses, troubled the Church

of Antioch by insisting on the necessity of the legal ceremonies for the Gentile converts; but in this he is probably mistaken. The account of Irenæus is that he appeared about the year 88, and was known to St. John, who wrote his Gospel in refutation of his errors. Irenæus, on the authority of Polycarp, narrates that the apostle John, when at Ephesus, going on a certain day to the bath, and finding Cerinthus within, fled from the building, saying, "Let us even be gone, lest the bath should fall to pieces, Cerinthus, that enemy of the truth, being within." Eusebius (iii, 28), quoting from the presbyter Caius, states that Cerinthus put forth some *Revelations*, written by himself, as it were by some great apostle, filled with the most monstrous narrations, which he pretended to have received from angels.

As to his peculiar tenets, also, "there is great difference of opinion. Some consider his system to be pure Gnosticism; others a compound of Gnosticism, Judaism, and Christianity. Irenæus says, 'Cerinthus taught that the world was not made by the supreme God, but by a certain power (Demiurge) separate from Him, and below Him, and ignorant of Him. Jesus he supposed not to be born of a virgin, but to be the son of Joseph and Mary, born altogether as other men are; but he excelled all men in virtue, knowledge, and wisdom. At His baptism, the Christ came down upon Him, from God who is over all, in the shape of a dove; and then He declared to the world the unknown Father, and wrought miracles. At the end, the Christ left Jesus, and Jesus suffered and rose again, but the Christ, being spiritual, was impassible.' Epiphanius says nearly the same, but asserts that Cerinthus taught that the world was made by angels, and that he opposed the apostles in Judæa. It appears that Cerinthus considered Christ an ordinary man, born in the usual way, and devoid of miraculous powers, but distinguished from the rest of the Jews by possessing superior wisdom, so that He was worthy to be chosen as the Messiah; that he knew nothing of his high dignity till it was revealed to Him in His baptism by John, when He was consecrated to the Messiahship, and furnished with the necessary powers for the fulfilment of His office by the descent of the supreme Logos or Spirit from the heavens, which hung over Him like a dove, and at length entered into His heart; that He was then raised to the dignity of the Son of God, began to perform miracles, and even angels were now taught by His revelations; that redemption could not be effected by His sufferings. Jesus, in union with the mighty Spirit of God, could not suffer, but must triumph over all His enemies. The very fact of suffering was assumed to be a proof that the Spirit of God, which had been previously united to Him, was now separated from Him, and had returned to the Father. The sufferings were of the man Jesus, now left to himself. Cerinthus denied also the resurrection of Christ. He adhered in part to Judaism, and considered the Mosaic law binding on Christians. He taught that the righteous would enjoy a paradise of delights in Palestine, and that the man Jesus, through the power of the Logos again coming upon him, as the Messiah, would reign a thousand years" (Farrar, *Eccles. Dict.* s. v.). It is supposed that Cerinthus and his doctrines are alluded to in John's Gospel. The system of Cerinthus seems to combine Ebionitism with Gnosticism, and the Judaeo-Christian millenarianism. A full discussion of Cerinthus and his doctrines is given by Mosheim, *Comment.* c. i, § 70. See also Gieseler, *Ch. Hist.* period i, § 36; Hagenbach, *Hist. of Doctrines*, i, § 23; Neander, *Ch. Hist.* i, 396; Neander. *Planting, etc.* i, 325, 392; Dorner, *Lehre v. d. Person Christi*, i, 310; Lardner, *Works*, viii, 404 sq.; Schaff, *Ch. Hist.* i, 236; Paulus, *Historia Cerinthi* (Jena, 1795); Schmidt, in *Bibliothek für Kritik, etc.* i, 181 sq.; Cunningham, *Historical Theology*, i, 125 sq.

Certitude OF SALVATION. See ASSURANCE.

Cerularius. See CÆRULARIUS.

Cesar, Cesarea, Cesarius. See CÆSAR, CÆSAREA, CÆSARIUS.

Cestius Gallus, son of C. Cestius Gallus Cameronus, was governor (*legatus*) of Syria A.D. 64, 65, when the Jews broke out into the rebellion which ended in the destruction of their metropolis and Temple by Titus. Maddened by the tyranny of Gessius Florus (q. v.), they applied to Gallus for protection; but, though he sent Neapolitanus, one of his officers, to investigate the case, and received from him a report favorable to the Jews, he took no effectual steps either to redress their injuries or to prepare for any outbreak into which their discontent might drive them. When at last he found it necessary to act, he marched from Antioch, and, having taken Ptolemais and Lydda, advanced on Jerusalem. There he drove the Jews into the upper part of the city and the precincts of the Temple, and might, according to Josephus, have finished the war at once, had he not been dissuaded by some of his officers from pursuing his advantage. Soon after he unaccountably (comp. Matt. xxiv, 15, 16) drew off his forces, and was much harassed in his retreat by the Jews, who took from him a quantity of spoil. Nero was at the time in Achaia, and Gallus sent messengers to him to give an account of his affairs as favorable as possible to himself. The emperor, however, much exasperated, commissioned Vespasian to conduct the war; and the language of Tacitus seems to imply that Gallus died before the arrival of his successor, his death being probably hastened by vexation. (Josephus, *Life*, 43; *War*, ii, 14, 3; 16, 1 and 2; 18, 9 and 10; 19, 1-9; 20, 1; iii, 1; Tacit. *Hist.* v, 10; Sueton. *Vesp.* 4.)—Smith, *Dictionary of Biography*, ii, 226. See JERUSALEM.

Ce'tab (Κητάβ, Vulg. *Celtra*), given (1 Esdr. v, 30) as one of the "servants of the Temple" whose "sons" returned from Babylon; but the Heb. lists (Ezra ii, 46; Neh. vii, 48) do not contain any corresponding name.

Cetubim (the usual Anglo-Latin form of the Heb term כְּתוּבִים, *Kethubim'*, the *Writings*), one of the three large divisions of the Old Test. used by the Jews, and thus distinguished from the Law and the Prophets (the other divisions), as being, in the first instance, committed to writing, and not orally delivered. Hence the Book of Daniel is found in this section, his prophecies having been originally written down, and not uttered orally. This division of Scripture is also known by the equivalent Greek name HAGIOGRAPHA (q. v.). It contains the Psalms, Proverbs, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra and Nehemiah (reckoned as one), and Chronicles. See BIBLE.

Ceylon (the *Taprobănē* of the Greeks and Romans, the *Serendib* of the "*Arabian Nights;*" *Lanka'*, in Singhalese; *Se'endive*, in the Indian language, whence, probably, *Ceilan* or *Ceylon*, the European name), an island in the Indian Ocean, southeast of the coast of Coromandel (Hindostan), from which it is separated by the Gulf of Manaar. It lies between 5° 55′ and 9° 51′ N. lat. and 79° 42′ and 81° 55′ E. long. From north to south its length is about 270 miles; its narrowest width 40 miles, and its greatest 137½ miles. Its area is about 25,000 square miles. Ceylon can vie with any part of the world in natural beauty, richness of soil, and variety of fauna and flora.

The climate is much more equable than that of the main land of India. The average temperature is about 80°; 80 inches is the average annual fall of rain. The *population*, according to the Gotha Almanac for 1867, numbers 2,079,881. The European and other inhabitants, including the military, amount to about 25,000. Sir J. E. Tennent is of opinion that Ceylon, when in the height of its prosperity, must have been ten times as densely populated as at the present

day. The natives are divided into four classes: first, the Ceylonese or Singhalese, occupying the Kandian territories and the coasts; second, the Moormen, who are found in all parts of the island; third, the Veddahs, a wild race who live in the mountains in the eastern part of the island, and, fourth, the Hindoos, who occupy chiefly the N. and E. coasts, and speak the Tamil language. Besides these there are also in the island some Portuguese, Dutch, and English colonists; and an intermixture of these with each other, and with the native races, forms still another class called "burghers." The Singhalese believe themselves to have been the aborigines. The Portuguese discovered Ceylon in 1505. They subsequently became masters of the island, and from them it was conquered by the Dutch, in 1656, just a century and a half after the arrival of the Portuguese. In 1796 the English took possession of Colombo, and in 1815 of Kandy (Newcomb, *Cyclopædia of Missions*, s. v).

Religion.—"The Singhalese are devoted to Buddhism, which is the prevailing religion of the island. It does not exist, however, in that state of purity in which it is still found in the Indo-Chinese peninsula. Its sacred books are identical with those of Burmah and Siam, and both record the doctrines of Gautama in the Pali language; the deviations are in matters of practice. The Malabar kings adulterated Buddhism to a considerable extent with Brahmanism, introducing the worship of Hindoo deities into the Buddhist temples, and this continues more or less to be the case. More than once have the Buddhists of Ceylon sought to restore the purity of their faith—at one time sending deputies to Siam, at another to Burmah, with this object in view. The Burman or Amarapura sect have long been the reformers of Singhalese Buddhism, and maintain no very friendly relations with the party who, supported by the priests of Siam, acknowledge the civil power in matters of religion, sanction the worship of Hindoo deities and the employment of the priesthood in secular occupations, uphold caste, and restrict the sacred books. Caste was acknowledged by the Singhalese prior to the introduction of Buddhism, which in principle is opposed to it; but so firmly was it rooted that it still endures, though more as a social than a sacred institution. Gautama Buddha is said to have visited Ceylon three different times to preach his doctrine, and his *sri-pada*, or sacred footstep, on the summit of Adam's Peak still commands the homage of the faithful. Buddhism was not, however, permanently introduced into Ceylon till 307 B.C., when Mahindo, obtaining the support of the king, established it as the national faith. The influence of the priests gradually increased, and, by the piety of the Singhalese kings, monasteries were richly endowed; for though the Buddhist monk is individually forbidden to possess goods, a community may own property to any extent; and it is a remarkable fact that, at the present day, no less than one third of the cultivated land of the island is computed to belong to the priesthood, and is exempt from taxation" (Chambers, s. v.). The Moormen, scattered through the island, are Mohammedans. The Hindoos (Malabar or Tamils), who form the chief population of the district of Jaffna, follow Brahminism. See BRAHM; BUDDHISM; HINDOOISM.

MISSIONS IN CEYLON.—1. *Roman Catholic.*—During the tenure of Ceylon by the Portuguese (1505-1656), they introduced the Roman Catholic religion. In 1544, Xavier (q. v.) preached to the Hindoos in Ceylon. The mission was very successful; a Jesuit college and several convents were erected, and the province of Jaffna became almost wholly Christian. The missionaries did not penetrate far into the interior. The Church of Rome has at present two vicariates apostolic, Colombo and Jaffna, and claim a membership of about 140,000, of whom 55,000 belong to the vicariate of Jaffna. Detailed statistical information on the vicariate of Jaffna is given in Battersby's *Catholic Directory* for 1864 (Dublin, 1864, p. 397-400).

2. *Dutch.*—When the Dutch drove out the Portuguese, they began at once to plant the Reformed religion. (In the remainder of this account we follow Newcomb, *Cyclopædia of Missions*, p. 223 sq., and Brown, *History of Missions*, vol. i.) They took possession of the Roman Catholic churches and convents, and banished the priests and nuns. In five years they reported 12,387 children baptized, 18,000 pupils in the schools, 65,000 converts to Christianity. When the Dutch surrendered the island to the English, the number of Christians was stated at 425,000. Many of these were nominal converts; all that was required before baptism was that the candidates should be able to repeat the Lord's Prayer, the Ten Commandments, a morning and evening prayer, and grace upon meat. By a very mistaken policy, the Dutch would give no public employment to an unbaptized native, and the Singhalese were baptized by hundreds with no religious aim whatever. It is not to be wondered at that when the Dutch gave up the island there was little fruit to be seen of their missions in it.

3. *The London Missionary Society.*—In 1804 this society entered upon a mission in Ceylon, and the Rev. Messrs. Vos, Ehrhardt, Palm, and Read were employed as missionaries for several years; but after several years of effort the mission was abandoned.

4. *The English Baptist Missionary Society.*—The English Baptists commenced a mission in Ceylon in 1812 in the person of Mr. Chater, whose efforts to Christianize the Singhalese, or Buddhists, and to systematize the study of their language, have made his name memorable. He died in 1829. The labors of his successors had reached, in 1888, to 131 villages of the Singhalese, in which they maintained 73 schools, with an average attendance of 2987 pupils. They had also 961 enrolled as Church members.

5. *The American Board.*—One of the first missionaries of the American Board to the East was the Rev. Samuel Newell. This missionary spent some time at Ceylon. In a letter dated at Colombo, Dec. 20, 1813, Mr. Newell urged an American mission in Ceylon on the following grounds, among others, that the government (English) was friendly to missions; that the population of the island was from one to two millions; that there were but two languages to be learned in order to preach to three millions of people; that the natives could read and write; that the whole Bible had been translated into Tamil, and the New Testament into Singhalese; that there were 200,000 native Christians so called, and at least 100 schools were in operation, and that there but two missionaries in the whole island. The board decided to make Ceylon a mission field, and sent, in 1815, the Rev. Messrs. Meigs, Richards, Warren, Bardwell, and Poor, who landed at Colombo in March, 1816. In a year Mr. Poor was able to preach in Tamil, and schools were established at different points. By 1818, through deaths and changes, Messrs. Meigs and Poor only were left in Ceylon; but in 1819, Messrs. Winslow, Spalding, and Woodward, with John Scudder, M.D., arrived in Ceylon. A printing-press was established in 1820. In 1824 an extensive revival occurred in the island. By 1827 there was a high-school, 80 scholars, and 80 native assistants. The mission has passed through many vicissitudes, but, on the whole, its results have been very satisfactory. In 1849 a new version of the Bible in the Tamil was published. The statistics in 1889 were as follows: stations 7; out-stations 25; 13 American laborers, 8 of whom were women; 318 native laborers, 40 of whom were preachers; 15 churches, with 1442 communicants and 3116 adherents; 185 schools of all grades, with 8358 under instruction. The native contributions for the year amounted to $5466. The government schools are in charge of the missionaries, so that the mission has no expense from this part of the work.

The addition by confession during the year 1865 was only 18, while 9 were removed by death and 3 by excommunication. The aggregate number reported as attending the Sabbath morning exercises at 9 of the 10 stations was 1328; 46 preaching-places were reported, and 62 services are conducted each week; 15 adults and 38 children were baptized. The contributions of the churches for 1865 amounted to £102 7*s.* 2½*d.* The income of the Native Evangelical Society was £51. There were 7 stations, 7 sub-stations, 6 missionaries, 1 physician, 8 female assistant missionaries, 3 native pastors, 2 licensed preachers, 20 catechists, 6 teachers in seminaries, 40 school-teachers, and 9 other helpers.

6. *The Church Missionary Society.*—The Church Missionary Society sent four missionaries in 1818 to Ceylon. Two of them—Mr. Mayor and Mr. Lambrick—stationed themselves in Kandy. The town itself has only about 3000 people, but in the neighboring mountains, to which the labors of these missionaries extended, there is a population of 200,000. The fruits of this mission among the Kandians have been very small. The secluded and solitary condition of the Kandian territory, within which Europeans seldom entered, had kept this region under the sway of Buddhism, and the Kandians preserved a rigid conformity to all its rules. After five years five schools had been established, numbering 127 pupils; and in 1839 the number of schools had increased to 13, and the number of scholars to 400. During the last twenty years Europeans have settled among the Kandian Hills, causing some irritation to the peasants, but affording protection to the mission, which is still continued. It is stated in a recent report that the labors of the missionaries are confined in a great measure to sojourners from the maritime provinces, who reside at Kandy and other places in the interior, and who are nominal Christians, and that the native Kandians have received comparatively little attention.

The Church mission station at Baddagame, in the low country, ten miles north of Point de Galle, commenced at the same time as that at Kandy, has been even less successful. Schools have been established, printed books have been circulated and read, and many have been made acquainted with the principles of Christianity. Still there have been but few conversions. In the annual report for 1852, the Rev. Mr. Parsons, one of the missionaries, says: "At this place the church is built (it was dedicated by bishop Heber), and here are the mission residences, seminary, and girls' school; but here, alas! is the greatest indifference to the good news of salvation."

By far the most important of the stations of the Church of England mission in Ceylon is that at Cotta, a populous district within a few miles of Colombo. Here the mission commenced its labors in 1823, and a collegiate institute was founded in 1827 for the training of native teachers and assistants. It commenced with ten pupils, and has continued to the present time with success, being resorted to by the Tamils of Jaffna, the Kandians from the hills, and the Singhalese from the low country. In this "Oriental college" there were in 1852 22 students in Greek and Latin, Euclid, Scripture History, etc. A printing-press has been for some years in operation, which has issued a translation of the Scriptures known as the "Cotta version."

7. *Wesleyan Methodist Missions.*—The British Conference, stimulated by the earnest appeals of Dr. Coke (q. v.), and by the wishes of Sir A. Johnstone, chief justice of Ceylon, determined in 1813 to organize a mission in Ceylon. Dr. Coke, accompanied by six missionaries, Messrs. William Ault, James Lynch, George Erskine, William Martin Harvard, Thomas Hall Squance, and Benjamin Clough, set sail from Portsmouth on the 30th of December, 1813. Two of the party, Harvard and Squance, were acquainted with the management of the printing-press, which subsequently became the chief instrument in the mission. On the 3d of May Dr. Coke died on the passage The missionaries landed in June, and were most cordially received by the British functionaries on the island. It was decided to occupy at first only four stations, viz., Jaffna and Batticaloa, for the *Tamil* division of the island; Galle and Matura for the *Singhalese;* Messrs. Lynch and Squance to be stationed at Jaffna, Mr. Ault at Batticaloa, Mr. Erskine at Matura, and Mr. Clough at Galle.

It is impossible for us to enter into details concerning this most interesting and successful mission. By 1818 there were 70 members of the Wesleyan Church; in 1863 there were over 50 churches and about 2200 members. The literary labors of the Wesleyan missionaries have been more extended than those of any others, and their contributions to our knowledge of Buddhism are of priceless value. "The Methodists," says Sir E. Tennent, "have been the closest investigators of Buddhism, the most profound students of its sacred books in the original, and the most accomplished scholars both in the classical and vernacular languages of Ceylon." Their publications in Singhalese, against Buddhism and in favor of the evidences of Christianity, have been of great service. One of the missionaries, John Calloway, published a Dictionary of Singhalese, with several sermons and tracts; W. B. Fox, a Singhalese and Portuguese Vocabulary; Robert Newstead translated the N. T. and the Hymn-book into Portuguese; Alexander Hume translated the first part of Pilgrim's Progress into Singhalese. The most eminent names in literature among the Ceylon missionaries, however, are those of R. Spence Hardy (author of *Eastern Monachism; Manual of Buddhism;* and other works), and of the Rev. D. J. Gogerly († 1862), late general superintendent of the Wesleyan Missions in South Ceylon, who stood at the head of Pali scholarship at the time of his death (see GOGERLY). So great has been the effect of the preaching and of the literary labors of the Wesleyan missionaries, that the Buddhists have formed a society (since 1860) to propagate the doctrines of Gautama by itinerant preaching, the press, and colportage.

In 1889, the statistics of Wesleyan Missions were as follows:

	Circuits.	Chapels.	Other Preaching Places.	Missionaries and Assistant Missionaries.	Subordinate Agents.	Members.	On Trial.	Scholars in Sunday-schools.	Attendance on Public Worship.
South Ceylon (Singhalese).	58	50	32	17	1532	2550	—	20,785	14,683
North Ceylon (Tamil).	24					1002	—		

Newcomb gave the following statistics of all the missions in Ceylon in 1858:

MISSIONS.	When commenced.	Missionaries.	Assistants.	Communicants.	Schools.	Scholars.	Stations.
English Baptist	1812	8	34	483	31	1,003	3
Wesleyan Methodist	1814	26	69	1749	80	3,753	18
American Board	1816	9	42	385	77	4,242	8
Church Mis. Society	1818	6	167	371	101	3,599	6
Gospel Prop. Soc.	1838	3	1	113	9	381	3
Totals	....	47	313	3101	298	12,978	38

The following statistics for 1889–90 are compiled from the *Missionary Year-Book*, New York, 1890:

CEYLON.	When entered.	Stations and Out-stations.	For'gn Minist.	Native Minist.	Lay Agents.	Adherents.	Members.	Schools.	Pupils.	Native Contributions.
A. B. of F. M.	1816	32	5	40	278	3,116	1442	135	8,358	$ 5466
Wesl. Meth.	1814	81	17	53	1535	14,683	4537	528	20,785	—
Bapt. M. Soc.	1812	100	5	24	—	—	961	73	2,987	1605
Ch. Mis. Soc.	1817	12	17	13	394	6,508	2039	355	14,061	—
S. Pro. Gosp.	1838	11	6	6	97	2,935	747	40	2,688	—

B. C. F. M.* and of *Wesleyan Missionary Society;* Marshall (Roman Catholic), *Christian Missions* (Lond. and New York, 1864, 2 vols.), vol. i, p. 357–409; Stevens, *History of Methodism*, vol. iii, ch. xii.

Chabărè. See ACHABARA.

Chabatstseleth. See ROSE.

Cha'bris (Χαβρεὶς v. r. Ἀβρίς, Vulg. omits), the son of Gothoniel (ὁ τοῦ Γ.), one of the three "rulers" (ἄρχοντες) or "ancients" (πρεσβύτεροι) of Bethulia (q. v.) in the time of Judith (Jud. vi, 15; viii, 10; x, 6).

Chad, ST., bishop of York in the 7th century, was educated under Aidan at the monastery of Lindisfarne. For some years he was head of the monastery of Lestingra, Cleveland. King Oswi made him bishop of York; but as Wilfrid had before been consecrated to that see by French bishops, Chad gave it up at the suggestion of Theodore (q. v.), and was appointed to the see of Lichfield, which he held till his death, March 2, A.D. 672. His name is still preserved in the Calendar of the Church of England (March 2), and the Cathedral of Lichfield is named St. Chad's.—Churton, *Early English Church*, chap. iv.

Chaderton, LAURENCE, the first master of Emanuel College, Cambridge, was born at Chatterton, in Lancashire, in 1546. His parents were of the Romish religion, but the son, after studying the law, went to Cambridge, where he obtained a scholarship in Christ's College, for which his father disinherited him. In 1578 he took his degree of B.D., and was chosen lecturer of St. Clement's Church, Cambridge, where he preached many years; and such was his reputation that Sir Walter Mildmay declared that, if he would not accept the mastership of his college, the foundation should not go on. In the beginning of the reign of James I he was appointed one of the divines at the Hampton Court Conference, and he was also one of the translators of the Bible, translating from Chronicles to the Canticles inclusive. In 1612 he took his doctor's degree. He died in 1640. He wrote a Treatise on Justification, and a sermon preached at St. Paul's Cross.—Rose, *New Gen. Biog. Dict.* vi, 182; Hook, *Eccl. Biography*, iii, 545.

Cha'dias, named (1 Esdr. v, 20), in connection with Ammidioi, as one of the (?) places from which 422 persons ("they of Chadias," οἱ Χαδιασαι) returned from Babylon with Zerubbabel; but the Hebrew lists (Ezra ii, 26; Neh. vii, 30) do not contain the name.

Chæ'reas (Χαιρέας), a brother of Timotheus, the leader of the Ammonites against Judas Maccabæus (1 Macc. v, 6), who held Gazara (Jazar, 1 Macc. v, 8), where he was slain on the capture of the fortress by the Jews (2 Macc. x, 32, 37).

Chaff (properly מוֹץ, *mots;* ἄχυρον), the refuse of winnowed grain, separated by the breeze, and consisting of husks and broken straw. It was the custom in the East to burn the chaff after winnowing. There was danger lest, after they had been separated, the chaff should be blown again among the wheat by the changing of the wind, and to prevent this they put fire to it at the windward side, which crept on and continued to burn till it had consumed all the chaff (Psa. lxxxiii, 13; Isa. v, 4; Matt. iii, 12). See AGRICULTURE.

The word rendered "chaff" in Isa. v, 24; xxxiii, 11, is חֲשַׁשׁ (*chashash'*), and means rather dried grass or *hay*. In Jer. xxiii, 28, it is תֶּבֶן (*te'ben*), elsewhere "straw." In Exod. v, 12, we read of קַשׁ לַתֶּבֶן, *stubble for straw;* so that it is not the same as stubble. It means straw cut into small portions, in which state it was mixed with the mud of which bricks were made to give it consistency. See STRAW. In 1 Kings iv, 28, mention is made of a mixed provender for horses and camels of barley and תֶּבֶן, such as the Arabs call *tibn* to this day. In Dan. ii, 35, the term is the Chaldee עוּר (*ur*). See THRESHING.

Chaff in the Scriptures is a frequent emblem of abortive wickedness (Psa. i, 4; Matt. iii, 12, etc.). False doctrines are called chaff; they are unproductive, and cannot abide the trial of the word and Spirit of God (Jer. xxiii, 28). See BAPTISM OF FIRE. The carrying away of chaff by the wind is an ordinary scriptural image of the destruction of the wicked, and of their powerlessness to resist God's judgments (Isa. xvii, 13; Hos. xiii, 3; Zeph. ii, 2).

Chagab. See LOCUST.

Chagigah. See TALMUD.

Chain (represented by several Heb. and Gr. terms). Chains of different metals appear to have been used by the ancients for various purposes, similar to those of modern times.

1. *As a Badge of Office*.—The gold chain (רָבִיד, *rabid'*) placed about Joseph's neck (Gen. xli, 42), and that promised to Daniel (Dan. v, 7, named הַמְנִיךְ, *hamnik'*), are instances of the first use (comp. 1 Esdr. iii, 6). In Egypt it was one of the *insignia* of a judge, who wore a jeweled image of Thmei or Truth attached to it (Wilkinson's *Anc. Egypt.* ii, 26); it was also worn by the prime minister. In Persia it was considered not only a mark of royal favor (Xenophon, *Anab.* i, 2, § 27), but a token of investiture (Dan. l. c.; Morier's *Second Journey*, p. 93). In Ezek. xvi, 11, the chain is mentioned as the symbol of sovereignty. The breastplate of the high-priest was in like manner fastened to the ephod with golden chains (Exod. xxxix, 16, 21). See ATTIRE.

2. Chains for *ornamental purposes* (comp. Judith x, 4) were worn by men as well as women in many countries both of Europe (Smith's *Dict. of Class. Ant.* s. v. Torques) and Asia (Wilkinson, iii, 375), and probably this was the case among the Hebrews (Prov. i, 9). The necklace (עֲנָק, *anak'*) consisted of pearls, corals, etc., threaded on a string; the beads were called חֲרוּזִים, *charuzim'*, that is, *perforated* (Cant. i, 10, "chains," where "of gold" is interpolated). Besides

Various Forms of ancient Egyptian Pendants.

the necklace, other chains were worn (Judith x, 4) hanging down as far as the waist, or even lower. Some were adorned with pieces of metal, shaped in the form of the moon, named שַׂהֲרֹנִים (*saharonim'*, Sept. *μήνισκοι*; Vulg. *lunulæ*; A. V. *round tires like the moon*; Isa. iii, 18); a similar ornament, the *hilâl*, still exists in Egypt (Lane's *Modern Egyptians*, App. A.). The Midianites adorned the necks of their camels with such (Judg. viii, 21, 26); the Arabs still use a similar ornament (Wellsted, i, 301). To other chains were suspended various trinkets, as scent-bottles, בָּתֵּי הַנֶּפֶשׁ (*bottey' han-ne'phesh*, *tablets* or *houses of the soul*, Isa. iii, 20), and mirrors, גִּלְיוֹנִים (*gilyonim'*, Isa. iii, 23). *Step-chains*, צְעָדוֹת *tseädoth'*, *tinkling ornaments*), were attached to the ankle-rings, which shortened the step and produced a mincing gait (Isa. iii, 16, 18). See ANKLET; NECKLACE. The particular female ornaments thus rendered in Isa. iii, 19 (נְטִפוֹת, *netiphoth'*, Sept. *κάθεμα*, Vulg. *torques*), signify *drops* or pendants to earrings or other articles of jewelry. See EARRING.

3. The means adopted for *confining prisoners* among the Jews were either manacles or fetters of copper or iron, similar to our handcuffs, נְחֻשְׁתַּיִם (*nechushta'yim*, lit. *two brasses*, as though made in halves), fastened on the wrists and ankles, and attached to each other by a chain (Judg. xvi, 21; 2 Sam. iii, 34; 2 Kings xxv, 7; Jer. xxxix, 7). It was a custom among the Romans likewise to fasten a prisoner with a light chain to the soldier who was appointed to guard him. One end of it was attached to the right hand of the prisoner, and the other to the left hand of the soldier. This is the *chain* by which Paul was so often bound, and to which he repeatedly alludes (Acts xxviii, 20; Eph. vi, 20; 2 Tim. i, 16). When the utmost security was desired, the prisoner was attached by two chains to two soldiers, as was the case with Peter (Acts xii, 6; Walch, *De vinculis Petri*, Jen. 1758). (See Smith's *Dict. of Class Antiq.* s. v. Catena.) See FETTER.

Idols, it appears, were fixed in their shrines with chains (Isa. xl, 19). Pride is *emblematically* termed a chain which keeps men under its power (Psa. lxxiii, 6; comp. 1 Esdr. i, 40; Wisd. xvii, 37; Ecclus. vi, 24, 29).

Chair. See CATHEDRA; SEAT; THRONE.

Chais, CHARLES-PIERRE, a Swiss divine of the Reformed Church, was born at Geneva in January, 1701. In 1728 he became pastor of the French congregation at the Hague; and he remained in that charge until his death, October, 1785. He translated, from the English of Stackhouse, *Le Sens littéral de l'Ecriture Sainte* (La Haye, 1738, 3 vols. 8vo); and also published a commentary on the Bible (*La Sainte Bible avec un Comment. littéral, et des Notes choisies et tirées de divers auteurs Anglais*, 6 vols. 8vo; La Haye, 1742-77; a seventh volume was issued after his death by Dr. Maclaine, with preliminary dissertations, 1790); a work on Biblical Theology (*Theol. de l'Ecriture Sainte, ou la Science du Salut*, 2 vols. 8vo, 1752); *Catéchisme historique et dogmatique* (La Haye, 1755, 8vo); and numerous minor works.—Senebier, *Histoire Litt. de Genève*; Hoefer, *Nouv. Biog. Générale*, ix, 556.

Chaise. See LA CHAISE.

Chajug, JEHUDA BEN-DAVID, commonly called CHIUG, and in Arabia *Abukaria*, *Jachja B. Daûd el-Fasi el-Kartubi*, and *Jachja*, a Jewish writer who is regarded by Jewish critics as the chief of Hebrew grammarians (ראשׁ הַמְדַקְדְּקִים), was born in Fez about A.D. 1020-1040, and hence is sometimes also called *Jehuda Fâsi* (יהודה פאסי). He was the first who recognised that the stem words of the Hebrew consist of *three consonants*, as up to his time some of the chief etymologists and expositors, e. g. Suadia Gaon, Menachem, Ibn-Saruk, maintained that there were biliteral and even monoliteral stems. He, too, was the first who discovered the true relation of the *quiescent letters*, forming the mnemonic אהוי, and their changes. It was he, too, who arranged the Heb. verbs according to their conjugations, distributing them under two heads: 1. KAL, *light*, not burdened with any formative additions; and, 2. CABED, *heavy*, being burdened with formative additions; and fixed six conjugations, viz. 1. *Kal*; 2. *Niphal*; 3. *Hiphil*; 4. *Hithpael*; 5. *Pual* and *Hophal*; and, 6. *Piel*. This arrangement has been substantially adopted by all grammarians, and is exhibited in all the regular paradigms of the verb given by Gesenius, Ewald, and all modern linguists in their Hebrew grammars. These discoveries and scientific principles Chajug propounds in three books. The first is called סֵפֶר אוֹתִיּוֹת הַנֹּחַ וְהַמֶּשֶׁךְ, and treats chiefly of *the quiescent letters*, in three sections. The second book is called סֵפֶר פָּעֳלֵי הַכֶּפֶל, and treats of verbs whose *second* and *third* radicals are alike = *Ayin doubled*. The third book is called סֵפֶר הַנִּקּוּד, and treats of the vowel points and accents. Originally written in Arabic, these marvellous grammatical discoveries were at first inaccessible and unknown to the Germano-French interpreters; but they exercised so extraordinary an influence upon the Spanish school of interpreters, that in order to make them more generally useful they were translated into Hebrew by Aben-Ezra. They have been published by Leop. Dukes (Frankft. a. M. 1844, 8vo), who has also given a sketch of the life and linguistic discoveries of Chajug in his *Literaturhistorische Mittheilungen*, etc. (Stuttg. 1844). See Fürst, *Bib. Jud.* i, 160.

Chalamish (חַלָּמִישׁ), a place in Palestine mentioned by the Talmudists (*Echa Rabbati*, i, 17) as being near Naveh (Reland, *Palæst.* p. 702); thought by Schwarz (*Palest.* p. 236) to be the same with the modern *Sunamein*. See ÆRE.

Chalcedon, a city of Bithynia. It was the seat of one of the so-called General Councils of the Church, held A.D. 451 (the fourth œcumenical council), which was called by the emperor Marcianus, at the request of the bishops (especially of Leo I), to put down the Eutychian and Nestorian heresies. The emperor had first summoned the bishops to meet at Nicæa, but when the time approached he was prevented by political troubles from going so far from the imperial city, and therefore changed the place of meeting to Chalcedon, in Bithynia, on the Bosphorus, opposite Constantinople. The Council was attended by 630 bishops and deputies, all Eastern except four legates sent by Leo I from Rome. The sessions began Oct. 8, 451, and ended Oct. 31. As the two parties in the Council were roused to the highest pitch of passion, the proceedings, especially during the early sessions, were very tumultuous, until the lay commissioners and senators had to urge the bishops to keep order, saying that such *ἐκβοήσεις δημοτικαί* (vulgar outcries) were disgraceful. (See the account from Mansi, cited by Stanley, *Eastern Church*, lect. ii, p. 165.)

At the *first* session (October 8, 451) the Council assembled in the Church of St. Euphemia; in the centre sat the officers of the emperor; at their left, or on the epistle side, sat the bishops of Constantinople, Antioch, Cæsarea in Cappadocia, and of the other Eastern dioceses, and Pontus, Asia, and Thrace, together with the four legates; on the other side were Dioscurus, Juvenal, Thalassius of Cæsarea, and the other bishops of Egypt, Palestine, and Illyria, most of whom had been present in the pseudo-council of Ephesus. In the midst were the Holy Gospels, placed upon a raised seat. When they had taken their seats, the legates of the pope demanded that Dioscurus should withdraw from the assembly, accusing him of his scandalous conduct at Ephesus, and declaring that otherwise they would depart. Then the imperial officers ordered him

to withdraw from the Council, and to take his seat among the accused. The acts of the so-called "Robber Council" of Ephesus (q. v.) were discussed and condemned, and Dioscurus was left with only twelve bishops to stand by him. The Eutychian heresy, that in our Lord were two natures before his incarnation, and but one afterwards, was anathematized. The majority of the assembled bishops then proceeded to anathematize Dioscurus himself, and demanded that he, together with Juvenal of Jerusalem, Thalassius of Cæsarea, Eusebius of Ancyra, Eustachius of Berytus, and Basil of Seleucia, who had presided at the Council, should be deposed from the episcopate. See DIOSCURUS.

At the *second* session (Oct. 10), the following exposition of faith, substantially taken from a letter of Leo to Flavianus, was approved, and its opponents anathematized: "The divine nature and the human nature, each remaining perfect, have been united in one person, to the intent that the same Mediator might die, being yet immortal and impassible. . . . Neither nature is altered by the other; he who is truly God is also truly man. . . . The Word and the flesh preserve each its proper functions. Holy Scripture proves equally the verity of the two natures. He is *God*, since it is written, 'In the beginning was the Word, and the Word *was God*.' He is also *man*, since it is written, 'The Word was made flesh, and dwelt among us.' As *man*, he was tempted by the devil; as God, he is ministered unto by angels. As man, he wept over the tomb of Lazarus; as God, he raised him from the dead. As man, he is nailed to the cross; as God, he makes all nature tremble at his death. It is by reason of the unity of person that we say that the Son of Man came down from heaven, and that the Son of God was crucified and buried, although he was so only as to his human nature."

At the *third* session the deposition of Dioscurus was pronounced irrevocable, and soon after he was banished to Gangra, in Paphlagonia, where, in the course of three years, he died.

In the *fifth* session the following formula of faith on the question at issue was adopted: "We confess and with one accord teach one and the same Son, our Lord Jesus Christ, perfect in the divinity, perfect in the humanity, truly God and truly man, consisting of a reasonable soul and body; consubstantial with the Father according to the Godhead, and consubstantial with us according to the manhood; in all things like unto us, sin only excepted; who was begotten of the Father before all ages, according to the Godhead; and in the last days, the same was born according to the manhood, of Mary the Virgin, mother of God, for us and for our salvation; who is to be acknowledged one and the same Christ, the Son, the Lord, the only begotten in two natures, without mixture, change, division, or separation; the difference of natures not being removed by their union, but rather the propriety of each nature being preserved and concurring in one person and in one ὑπόστασις, so that he is not divided or separated into *two persons*, but the only Son, God, the Word, our Lord Jesus Christ, and one and the same person." At the later sessions (ix-xv) a number of questions of order, supremacy, discipline, etc. were settled. But by far the most important was the 28th canon, sess. xv, by which the patriarch of Constantinople was placed on equality of authority with the bishop of Rome, saving only to the latter priority of honor. The Roman delegates protested against this, and, after its adoption, Leo constantly opposed it, upon the plea that it contradicted the sixth of Nicæa, which assigned the second place in dignity to Alexandria; however, in spite of his opposition and that of his successors, the canon remained and was executed. See SUPREMACY OF THE POPE.

The acts of this Council in Greek, with the exception of the anathemas, are lost. See Evagrius, *Hist. Eccl.* ii, 4; Labbe and Cossart, *Concilia*, tom. iv; Mansi, *Concilia*, vi, 590; Landon, *Man. of Councils*, p. 113-127; Gieseler, *Church History* (Cunningham's), i, 240; Mosheim, *Church History*, bk. ii, cent. v, pt. ii, ch. v, § 15, 16; Neander, *Church History*, ii, 518, 524; Hefele, *Conciliengeschichte*, ii, 392; especially Dorner, *Person of Christ* (Edinburgh, div. ii, vol. i, p. 93-106); Schaff, *Church Hist.* ii, § 56, 65; ii, § 141; Shedd, *History of Doctrines*, i, 398 sq.; Elliott, *Delineation of Romanism*, bk. iii, ch. iii, xi. See CHRISTOLOGY; COUNCILS; EUTYCHES; NESTORIANISM.

Chal'cedony (χαλκηδών) occurs only in Rev. xxi, 19, being the precious stone with which the third foundation of the wall of the New Jerusalem is garnished. According to Pliny (*H. N.* xxxvii, 8, § 15), chalcedony is a gem resembling the Callais or turquoise, and some have judged it to be a kind of carbuncle or ruby. Salmasius differs from those who make the color of chalcedony to be like that of the carbuncle, and says that they confound τὸν καρχηδόνιον λίθον, which is a species of carbuncle, with τῷ χαλκηδονίῳ; but he confesses that it is by no means clear what stone the ancients called *chalcedonius*. Fignelius on Rev. (xxi, 19) says that this stone has the color of a pallid lamp, shines in the open air, but is dark in a house, cannot be cut, and has powers of attraction. The etymology of the word is not less doubtful than its meaning. Some derive it from χαλκός, from a belief that it rings like brass when struck. Others have derived it from Χαλκηδών, as though from a locality where it is found, and others from Καρχηδών. (See Braun. *de Vest. Heb.* ii, c. ii, p. 525.) The *Chalcedonius* was so called from Chalcedon, and was obtained from the copper mines there; it was a small stone, and of no great value. It is described by Pliny as resembling the green and blue tints which are seen on a peacock's tail or on a pigeon's neck. Mr. King (*Antique Gems*, p. 8) says it was a kind of inferior emerald, as Pliny understood it. This mineral is supposed by some to be the same that occurs in the Heb. Scriptures (Exod. xxviii, 18) under the name of נֹפֶךְ, *no'phek* (translated "emerald"), but this is doubtful. See EMERALD. Chalcedony of modern lapidaries is a variety of amorphous quartz, and the distinction between it and agate is not very satisfactorily established. It is harder than flint (spec. grav. 2.04), commonly semi-transparent, and is generally of one uniform color throughout, usually a light brown, and often nearly white (and then termed "white cornelian"); but other shades of color are not infrequent, such as gray, yellow, green, and blue. Chalcedony occurs in irregular masses, commonly forming grotesque cavities, in trap rocks and even granite. It is found in most parts of the world; and in the East it is employed in the fabrication of cups and plates, and articles of taste, which are wrought with great skill and labor, and treasured among precious things. In Europe it is made into snuff-boxes, buttons, knife-handles, and other minor articles. (See *Penny Cyclopædia*, s. v. Quartz.) See GEM.

Chalcidius, according to Fabricius (*Bibl. Lat.* lib. iii, c. 7), a Christian Platonist of the 4th century. Others place him in the 6th century. He translated the *Timæus* of Plato, and added a commentary. Cave (*Hist. Lit. Sæc.* iv, *an.* 330) doubts whether he was pagan or Christian. Lardner says, "I dare not be positive; but to me it seems that he was a polite Platonic philosopher, who was willing to be on good terms with Christians, and I place him, with Cave, about A.D. 330." In his Commentary on Timæus he refers to the O. and N. T. repeatedly, and mentions the "star in the East."—Lardner, *Works*, vii, 570; Brucker, *Hist. Crit. Phil.* iii, 472; Murdoch's Mosheim, *Church History*, bk. ii, cent. iv, pt. i, § 18, *note;* Cudworth, *Intell. System* (Lond. 1845), ii, 463 sq.

Chalcis (Χαλκίς), a city of Palestine mentioned by Josephus (*Ant.* xiv, 3, 2; 7, 4; xix, 5, 1; 8, 1; xx, 1, 3;

7, 1; *War*, i, 9, 2; ii, 12, 1) and Strabo (xvi, 2, 16, p. 753, 755) as lying under Mount Lebanon, near Heliopolis; but thought by Reland (*Palæst.* p. 815) to be different from the Chalcis in Syria, placed by the *Antonine Itinerary* between Beroa (Berœa or Berea) and Androna. Modern travellers (Thomson, in the *Bibliotheca Sacra*, 1848, p. 761; Seetzen, *Reise*, i, 262; Porter, i, 14-16; Robinson, *Lat. Bibl. Res.* p. 497, 498) have sought its site in the considerable ruins near Medjel Anjar, 3 hours S. of Zahleh (Van de Velde, *Memoir*, p. 303).

Chal'col (Heb. *Kalcol'*, כַּלְכֹּל, perhaps *sustenance*; Sept. Χαλχάλ v. r. Χαλκάδ, Josephus Χαλκέος, *Ant.* viii, 2, 5), one of the four sons of Mahol, who were famous for their wisdom before the time of Solomon (1 Kings iv, 31). B.C. ante 1010. In 1 Chron. ii, 6 (where the name is Anglicized "Calcol") he and his brothers are enumerated as the sons of Zerah, the son of Judah, perhaps by an error for the name Hamul preceding, which may be a transposition for Mahol. See DARDA.

Chaldæ'a (Jer. l, 10; li, 24, 35; Ezek. xvi, 29; xxiii, 16; Gr. ἡ Χαλδαία, for the Heb. כַּשְׂדִּים, elsewhere "Chaldæans") is properly only the most southern portion of Babylonia. It is used, however, in our version for the Hebrew ethnic appellative *Kasdim* (or "Chaldees"), under which term the inhabitants of the entire country is designated, and it will therefore here be taken in this extended sense. The origin of the term is very doubtful. *Kasdim* has been derived by some from Kesed (כֶּשֶׂד), the son of Nahor (Gen. xxii, 22); but if Ur was already a city "of the Chaldees" before Abraham quitted it (Gen. xi, 28), the name Kasdim cannot possibly have been derived from his nephew. On the other hand, the term Chaldæa has been connected with the city *Kalwadha* (Chilmad of Ezekiel, xxvii, 23). This is possibly correct. At any rate, in searching for an etymology, it should be borne in mind that *Kaldi* or *Kaldai*, not *Kasd'm*, is the native form (Rawlinson, *Herod.* i, 533, *note*). The Chaldæans are mentioned in the cuneiform inscriptions (q. v.). In Persian cuneiform the name of Babylon or Babylonia is written very differently:

[cuneiform characters]
B a b i r u sh.

The Babylonian cuneiform writes it in many ways, but none have any resemblance to *Kasdim* or *Kaldi*. See BABYLON.

1. *Extent and Boundaries.*—The tract of country viewed in Scripture as the land of the Chaldæans is that vast alluvial plain which has been formed by the deposits of the Euphrates and the Tigris—at least so far as it lies to the west of the latter stream. The country to the east is Elam or Susiana; but the entire tract between the rivers, as well as the low country on the Arabian side of the Euphrates, which is cultivable by irrigation from that stream, must be considered as comprised within the Chaldæa of which Nebuchadnezzar was king. This extraordinary flat, unbroken except by the works of man, extends, in a direction nearly N.E. and S.W., a distance of 400 miles along the course of the rivers, and is on the average about 100 miles in width. A line drawn from the junction of the river Khabur with the Euphrates to that of the Lesser Zab with the Tigris may be considered to mark its northern limits; the eastern boundary is the Tigris itself; the southern the Persian Gulf; on the west its boundary is somewhat ill defined, and in fact would vary according to the degree of skill and industry devoted to the regulation of the waters and the extension of works for irrigation. In the most flourishing times of the Chaldæan empire the water seems to have been brought to the extreme limit of the alluvium, a canal having been cut along the edge of the tertiary formation on the Arabian side throughout its entire extent, running at an average distance from the Euphrates of about 30 miles.

2. *General Character of the Country.*—The general aspect of the country is thus described by a modern traveller, who well contrasts its condition now with the appearance which it must have presented in ancient times. "In former days," he says, "the vast plains of Babylon were nourished by a complicated system of canals and water-courses, which spread over the surface of the country like a net-work. The wants of a teeming population were supplied by a rich soil, not less bountiful than that on the banks of the Egyptian Nile. Like islands rising from a golden sea of waving corn stood frequent groves of palm-trees and pleasant gardens, affording to the idler or traveller their grateful and highly-valued shade. Crowds of passengers hurried along the dusty roads to and from the busy city. The land was rich in corn and wine. How changed is the aspect of that region at the present day! Long lines of mounds, it is true, mark the courses of those main arteries which formerly diffused life and vegetation along their banks, but their channels are now bereft of moisture and choked with drifted sand; the smaller offshoots are wholly effaced. 'A drought is upon her waters,' says the prophet, 'and they shall be dried up!' All that remains of that ancient civilization—that 'glory of kingdoms' – 'the praise of the whole earth'—is recognisable in the numerous mouldering heaps of brick and rubbish which overspread the surface of the plain. Instead of the luxuriant fields, the groves, and gardens, nothing now meets the eye but an arid waste—the dense population of former times is vanished, and no man dwells there" (Loftus's *Chaldæa*, p. 14, 15). The cause of the change is to be found in the neglect of man. "There is no physical reason," the same writer observes, "why Babylonia should not be as beautiful and as thickly inhabited as in days of yore; a little care and labor bestowed on the ancient canals would again restore the fertility and population which it originally possessed." The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully and properly applied and husbanded, they are sufficient to make the entire plain a garden. Left to themselves, they desert the river courses to accumulate in lakes and marshes, leaving large districts waterless, and others most scantily supplied, while they overwhelm tracts formerly under cultivation, which become covered with a forest of reeds, and during the summer heats breed a pestilential miasma. This is the present condition of the greater part of Babylonia under Turkish rule; the evil is said to be advancing, and the whole country threatens to become within a short time either marsh or desert.

3. *Divisions.*—In a country so uniform and so devoid of natural features as this, political divisions could be only accidental or arbitrary. Few are found of any importance. The true Chaldæa, as has been already noticed, is always in the geographers a distinct region, being the portion most southerly from Babylon, lying chiefly (if not solely) on the right bank of the Euphrates (Strabo, xvi, 1, § 6; Ptolemy, v, 20). Babylonia above this is separated into two districts, called respectively *Amordacia* and *Auranitis*. The former is the name of the central territory round Babylon itself; the latter is applied to the regions toward the north, where Babylonia borders on Assyria (Ptol. v, 20).

4. *Cities.*—Babylonia was celebrated at all times for the number and antiquity of its cities. "Babel, and Erech, and Accad, and Calneh in the land of Shinar," are the first towns mentioned in Scripture (Gen. x, 10). The "vast number of great cities" which the country possessed was noted by Herodotus (i, 178), and the whole region is, in fact, studded with huge mounds, each mound marking, beyond a doubt, the site of a considerable town. The most important of those which have been identified are Borsippa (now *Birs-Nimrud*), Sippara or Sepharvaim (*Mosaib*), Cutha

General Map of the Chaldæan and associated Empires.

(*Ibrahim*), Calneh (*Niffer*), Erech (*Warka*), Ur (*Mugheir*), Chilmad (*Kalwadha*), Larancha (*Senkereh*), Is (*Hit*), Duraba (*Akkerkuf*); but of these not fully, and of many others not at all, have the exact sites been determined, as the Accad of Genesis (x, 10); the Teredon of Abydenus (*Fragm.* 8); *Asbi*, *Rubesi*, etc., towns mentioned in the inscriptions. Two of these places—Ur and Borsippa—are of particular note. Of the rest, Erech, Larancha, and Calneh were in early times of the most consequence, while Cutha, Sippara, and Teredon attained their celebrity at a comparatively recent period. (See each name in its place.)

5. *Canals.*—These constituted one of the most remarkable features of ancient Babylonia. Three principal canals carried off the waters of the Euphrates toward the Tigris, *above* Babylon. These were, 1. The original "Royal river," or *Ar-Malcha* of Berosus, which left the Euphrates at Perisabor or Anbar, and followed the line of the modern *Saklawyeh* canal, passing by Akkerkuf, and entering the Tigris a little below Bagdad; 2. the *Nahr Malcha* of the Arabs, which branched off at Ridhivaniyeh, and ran across to the site of Seleucia; and, 3. the *Nahr Kutha*, which, starting from the Euphrates about twelve miles above Mosaib, passed through Cutha, and fell into the Tigris twenty miles below the site of Seleucia. On the other side of the stream, a large canal, perhaps the most important of all, leaving the Euphrates at Hit, where the alluvial plain commences, skirted the deposit on the west along its entire extent, and fell into the Persian Gulf at the head of the Bubian creek, about twenty miles west of the Shat el-Arab; while a second main artery (the Pallacopas of Arrian) branched from the Euphrates nearly at Mosaib, and ran into a great lake in the neighborhood of Borsippa, whence the lands to the south-west of Babylon were irrigated. From these and other similar channels numerous branches were carried out, from which further cross cuts were made, until at length every field was duly supplied with the precious fluid.

6. *Sea of Nedjef, Chaldæan Marshes, etc.*—Chaldæa contains one natural feature deserving of special description—the "great inland fresh-water sea of Nedjef" (Loftus, p. 45). This sheet of water, which does not owe its origin to the inundations, but is a permanent lake of considerable depth, surrounded by cliffs of a reddish sandstone in places forty feet high, extends in a south-easterly direction a distance of forty miles, from about lat. 31° 53′, long. 44°, to lat. 31° 26′, long. 44° 35′. Its greatest width is thirty-five miles. It lies thus on the right bank of the Euphrates, from which it is distant (at the nearest point) about twenty miles, and receives from it a certain quantity of water at the time of the inundation, which flows through it, and is carried back to the Euphrates at Samava by a natural river course known as the Shat el-Atchan. Above and below the sea of Nedjef, from the Birs-Nimrud to Kufa, and from the south-eastern extremity of the sea to Samava, extend the famous Chaldæan marshes (Strab. xvi, 1, § 12; Arrian, *Exp. Al.* vii, 22), where Alexander was nearly lost; but these are entirely distinct from the sea itself, depending on the state of the Hindiyeh canal, and disappearing altogether when that is effectually closed.

7. *Productions.*—The extraordinary fertility of the Chaldæan soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Berosus noticed this production (*Fragm.* 1, § 2), and also the spontaneous growth of barley, sesame, ochrys, palms, apples, and many kinds of shelled fruit. Herodotus declared (i, 193) that grain commonly returned 200-fold to the sower, and occasionally 300-fold. Strabo made nearly the same assertion (xvi, 1, § 14); and Pliny said (*Hist. Nat.* xviii, 17) that the wheat was cut twice, and afterwards was good keep for beasts. The palm was undoubtedly one of the principal objects of cultivation. According to Strabo it furnished the natives with bread, wine, vinegar, honey, porridge, and ropes; with a fuel equal to charcoal, and with a means of fattening cattle and sheep. A Persian poem celebrated its 360 uses (Strab. xvi, 1, 14). Herodotus says (i, 193) that the whole of the flat country was planted with palms, and Ammianus Marcellinus (xxiv, 3) observes that from the point reached by Julian's army to the shores of the Persian Gulf was one continuous forest of verdure. At present palms are almost confined to the vicinity of the rivers, and even there they do not grow thickly except about the villages on their banks. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation, while the remaining half is to a great extent covered with marshes, owing to the same neglect. Thus it is at once true that "the sea has come up upon Babylon, and she is covered with the waves thereof" (Jer. li, 42); that she is made "a possession for the bittern, and pools of water" (Isa. xiv, 23); and also that "a drought is upon her waters, and they are dried up" (Jer. l, 38), that she is "wholly desolate"—"the hindermost of the nations, a wilderness, a dry land, and a desert" (*ib.* 12, 13). (See Loftus's *Chaldæa and Susiana;* Layard's *Nin. and Bab.* ch. xxi-xxiv; Rawlinson's *Herodotus*, vol. i, Essay ix; and Mr. Taylor's *Paper in the Journal of the Asiatic Society*, vol. xv.) See BABYLONIA.

8. *Inhabitants.*—The monuments of Babylonia furnish abundant evidence of the fact that a Hamitic race held possession of that country in the earliest times, and continued to be a powerful element in the population down to a period very little preceding the accession of Nebuchadnezzar. The most ancient historical records found in the country, and many of the religious and scientific documents, are written in a language which belongs to the Allophyllian family, presenting affinities with the dialects of Africa on the one hand, and with those of High Asia on the other. The people by whom this language was spoken, whose principal tribe was the Akkad (Accad, Gen. x, 10), may be regarded as represented by the Chaldæans of the Greeks, the Kasdim of the Hebrew writers. This race seems to have gradually developed the type of language known as Shemitism, which became in course of time the general language of the country; still, however, as a priest-caste, a portion of the Akkad preserved their ancient tongue, and formed the learned and scientific Chaldæans of later times (Rawlinson, *Herodotus*, i, 533). Their language was the language of science in those countries; and the Chaldæans devoted themselves to the study of the sciences, and especially astronomy. See CHALDÆAN PHILOSOPHY. The scientific tablets discovered at Nineveh are all in this dialect. These facts throw new and clear light on the many allusions to the Chaldæan wise men in the Bible (Dan. i, 4; ii, 2; iv, 7; Ezek. xxiii, 14). The influence and power of the Chaldæans rapidly increased, so that in the early part of the ninth century B.C. they became the dominant race in Babylonia, and gave that kingdom their name (2 Chron. xxxvi, 17; Dan. ix, 1). During the eighth century B.C. a number of them emigrated from their native plains, and settled in the mountains of Armenia. This is possibly the true explanation of the occurrence of the Chaldæans in that region, as noted by many ancient writers (Xenoph. *Anab.* iv, 3, 4; Strabo, xii; Steph. Byz. s. v. *Χαλδαία*); and this, too, shows why Gesenius and other recent authors were led to believe that the Chaldæans of Babylonia were a colony from the northern mountains, settled in that country by one of the later Assyrian monarchs. (See Rawlinson, *Five Great Monarchies*, Lond. 1864 sq.; Ditmar, *Vaterland d. Chaldäer*, Berlin, 1786; Palmblad, *De rebus Babylonicis*, Upsal. 1820; Bochart, *Geography.*) See CHALDEES.

Chaldæ'an. See CHALDEANS; CHALDEES.

Chaldæan Philosophy. Ritter (*History of Philosophy*, bk. ii, ch. i) remarks that he passes over the philosophy of the Chaldæans without special notice; both "because the fragments of Manetho, Berosus, and Sanchoniatho are not free from suspicion as to genuineness and antiquity, and also because the ideas and conceptions prevailing in them are of little value philosophically." Beard, in Kitto's *Cyclopædia* (s. v. Philosophy), remarks, nevertheless, that the subject is "of interest to the student of the Bible, in con-

sequence of the general and decided influence which the Babylonian philosophy exerted on the opinions and manner of thinking of the Israelites during their captivity in Babylon, as the Rabbins themselves admit, in alleging that the names of the angels and of the months were derived by the house of Israel from Babylon (*Rosh Hashanah*, p. 56). See CAPTIVITY. The system of opinion and manner of thinking which the captives met with in Babylon was made up of elements whose birthplace was in various parts of the East, and which appear to have found in Babylon a not uncongenial soil, where they grew and coalesced into one general system. Of these elements the two principal were the Chaldæan and the Medo-Persian or Zoroastrian.

"The former of these, which alone we shall here consider, seems to have originated in the cultivation of astronomy (q. v.), a science very early pursued under the clear sky of Babylonia, although generally corrupted with a mixture of astrology (q. v.). *Light* naturally came to be regarded as a divine principle, and the heavenly bodies were worshipped as the residence or impersonation of Deity. This soon diverged into polytheism, as the celestial luminaries were assigned to separate powers of Nature. See IDOLATRY. An observation of the astronomical phenomena led not only to the formation of horoscopes with a view to divining the future, but it likewise induced a belief in certain intermediate powers, which were supposed (as by the now discovered bond of gravitation) to link all bodies together, and whose presence was made to fill the void between them and the invisible Being at the centre. Thus arose the *emanation* theory, which figures so conspicuously in the Cabbala (q. v.) and in Gnosticism (q. v.). These intermediate or derived existences were invested with intelligence, and formed again a link between spirit and matter, giving rise to a whole world of *dæmons* (q. v.), of various characters and capacities. To guard against the malignant influence of some of these, talismans (q. v.) were used, and the arts of sorcery (q. v.) were resorted to. See CHALDEES.

"The fragments of Berosus, preserved by Eusebius and Josephus, and to be found in Scaliger (*De Emendat. Temp.*), and more fully in Fabricius (*Bib. Gr.* xiv, 175), afford some information on the subject of Chaldæan philosophy. Berosus was a priest of the god Baal, at Babylon, in the time of Alexander the Great. The Talmud and other works of the Jewish Rabbins may also be advantageously consulted, together with the following authorities: Euseb. *Præp. Evang.* ix, 10; Philo, *De Mig. Mun.*; Selden, *De Diis Syris*, Proleg. 3; Stanley's *History of Oriental Philosophy*; Rosenroth, *Cabbala denudata* (t. 1, Solisb. 1677, t. 2); 'Liber Johan. restitutus' (Francof. 1684); Kleuker, *Emanationslehre bei den Kabbalisten* (Riga, 1786); Molitor, *Philosophie der Geschichte* (1827–8); Hartmann, *Verbindung des A. T. mit dem Neuen.* (1831); Fritz, *Ketzer-Lexikon* (1838); Brucker, *Hist. Crit. Phil.*; Nork, *Vergleichende Mythologie* (Lpz. 1836)." See MAGI.

Chaldeans, or CHALDÆAN CHRISTIANS, a name by which the Nestorians (q. v.) call themselves. More commonly it is used to designate that portion of the Nestorians who have acknowledged the supremacy of the Pope.

The writings of Ibas, bishop of Odessa, and the activity of the school of Odessa, disseminated the Nestorian doctrines in Mesopotamia, Assyria, Persia, and other Eastern countries in the 5th century. The adherents of these doctrines received from the orthodox party the name of Nestorians, while they chose for themselves that of Chaldean Christians. Thus separated from co-operation with the Western Church, and the breach being subsequently widened by the schism of the Greek Church, they formed a separate organization, and established an ecclesiastical system of their own, having at its head Ctesiphon, patriarch of Seleucia. After the Council of Florence (q. v.) had to some extent reunited the Greek and Latin Churches, a large number of Nestorians returned to them. Timotheus, archbishop of the Nestorians of Cyprus, among others, abjured Nestorianism, and was received into the Roman Church in virtue of a bull of Pope Eugene IV (1445), which bull also decided that the name of Nestorians should no longer be applied to the Chaldean Christians. After this, partial accessions of Nestorians to the Roman Catholic Church took place from time to time; a number of them joined it during the reign of Pope Julius III (1552), when Sind, patriarch of the Nestorians of Mosul, asked and obtained the ratification of his election by the Pope. This union was continued by the patriarch Elias, who, in 1616, assembled a synod at Amid, where the patriarch, together with five archbishops and one bishop, endorsed the Roman Catholic Confession of Faith, and declared in favor of union with Rome. Yet separations occurred from time to time. Under Pope Innocent IX a large number of Nestorians joined the Roman Church, and he gave them, as well as to all Chaldean Christians, a patriarch in the person of Joseph I, who made his residence at Amid, usually called Diarbekir. From this time forward the Roman Catholics of Chaldæa have had a patriarch of their own, bearing the title of patriarch of Babylon, and residing at Bagdad. They also preserve a ritual of their own in the Chaldaic language. Besides the patriarch, the Chaldeans have archbishops at Amadie and Seleucia in Asiatic Turkey, four bishops in Turkey, and two in Persia. "This sect is accessible through the missions of the A. B. C. F. M. at Oroomiah and Diarbekir, but principally through the station at Mosul, where some of the members of the Protestant Church are converted Chaldeans. Recently, through papal intrigues with the pasha, the large Chaldean village of Telkeif has been closed to missionary efforts, and even Protestants who own property there have been forbidden to visit it. But such a state of things cannot last, and we may hope soon to hear that such measures have redounded, as they always do, to the furtherance of the truth" (Newcomb, *Cyclop. of Missions*, 248).—Wetzer und Welte, *Kirchen-lexikon*; Schem, *Year-book for* 1859, p. 33; Assemani, *Biblioth. Orient.* t. i, p. 203–251, 543–549; ii, p. 457; iii, part ii, p. 412; Guriel (a Chaldæan priest), *Elementa linguæ Chaldaicæ quibus accedit series Patriarcharum Chaldæorum* (Rome, 1860); *Annals of the Propagation of the Faith* (1845); Perkins, *Eight Years among the Nestorian Christians* (N. Y. 1843). See NESTORIANS.

Chaldee Language is the name by which the elder or Eastern form of the Aramaic idiom is generally distinguished (see the Introd. to Winer's *Chald. Gramm.* 2d ed. tr. by Prof. Hackett, N. Y. 1851, p. 9 sq.). Whether there is any authority in the Old Testament for applying this designation to the *Aramaic* language is a question which depends on the sense in which the expression "tongue of the Chaldees," in Dan. i, 4, is to be taken, and which involves such important historical points that it does not come within the scope of this article (see Hengstenberg, *Authentie des Daniel*, p. 310). Another preliminary question is, whether there is any propriety in the common definition of the Chaldee language as the *Eastern*, and especially as the *Babylonian* dialect—or, indeed, even as a *dialect* at all—of the Aramaic. Hupfeld strenuously maintains the negative of all these propositions in the *Theologische Studien* for 1830, p. 290 sq. Avoiding these debatable points, however, we apply the name Chaldee language to that Aramaic idiom which, in our present text of the Old Testament, is employed in the passages of Daniel, from ii, 4, to vii, 28; in Ezra, from iv, 8, to vi, 18, and vii, from 12 to 26; in Gen. xxxi, 47; and in Jer. x, 11; as also to that in which several translations and paraphrases of portions of the Old Testament, the so-called Targums, are written. The language is thus distinguished, as to the nature of the documents in which it is employed, into

Biblical and Targumical Chaldee. Winer, however, regarding linguistical characteristics chiefly, distinguishes three grades of its purity: the language, as found in the Targum of Onkelos, as most free from Hebraisms; the Biblical Chaldee, which, as it frequently intermixes certain peculiarities of Hebrew (as the ה of the article, the plural ending ִים, the dual form, and the conjugation *Hophal*), ranks below the first class; and the idiom of the other Targums, which not only abounds with foreign words, but possesses several peculiar formations bordering on those of the Syriac and of Rabbinical Hebrew. See TARGUM. The language of the Talmud is also usually called Chaldee; and, if we except the Mishnah (which is written in an idiom not so very far removed from Biblical Hebrew, with a tincture of Chaldee), it is true of the Gemaras that they are written in such very *corrupt* Chaldee that their idiom is more properly designated as the Talmudical dialect. See TALMUD.

Under the article ARAMÆAN LANGUAGE have been noticed those several features which the Chaldee possesses in common with the Syriac; and it now remains to define those, certainly not marked, characteristics by which it is distinguished from it. These are—the predominance of the A sound where the Syriac has O; the avoidance of diphthongs and of otiant letters; the use of dagesh-forte; the regular accentuation of the last syllable; and the formation of the infinitives, except in *Peal*, without the preformative מ. The mode of writing is also much less *defective* than in Syriac.

Works auxiliary to the study of the Chaldee:—GRAMMARS: Cellarius, *Grammat. Ling. Chald.* (Cizæ, 1684); Opitz, *Chaldaismus Targum. Talmud. Rabbin.* (Kiel, 1696); Hegelmaier, *Chaldaismi Biblici fundamenta* (Tüb. 1770); J. D. Michaelis, *Grammatica Chaldaica* (Götting. 1771); Hexel, *Anweisung zum Chald.* (Lemgo, 1787); Schroeder, *Institut. ad Chaldaism. Biblicum* (1787, 1810); Wittich, *Grundzüge d. bibl. u. targ. Chaldaismus* (Leipzig, 1824); Hirzel, *De Chaldaismi biblici orig. et auct. critica* (Lips. 1830); Dietrich, *De sermonis Chaldaici proprietate;* Longfield, *Introduction to Chaldee* (Lond. 1859); Riggs, *Manual of Chald. Language* (N. Y. 1858); Guriel (a Chaldæan priest), *Elementa linguæ Chaldaicæ* (Rome, 1860); Fürst, *Lehrgebäude der aram. Idiome* (Leipz. 1835). The best manual is Winer's *Grammatik* (Lpz. 1824), 2d ed. translated by Professor Hackett, *Grammar of the Chaldee Language as contained in the Bible and Targums* (N. Y. 1851). The most complete LEXICON is Buxtorf's *Lexicon Chaldico-talmudico-rabbinicum* (Basil, 1639; a new ed. by Fische and Gelbe is announced, Lpz. 1866 sq., 4to). There are also Landau's *Rabbinisch-aramäisch-deutsches Wörterb.* (Prague, 1819-24), new ed. by Sperling (Lemberg, 1857); Levy, *Chald. Wörterbuch* (Lpz. 1866, sq.). The Biblical Chaldee words are contained in the Heb. lexicons. CHRESTOMATHIES have been edited by Bauer (Norimb. 1792); J. Jahn (Wien, 1800); Grimm (Lemgo, 1801); Winer, *Chald. Lesebuch a. d. Targumim, m. Anmerk. u. Wortregister* (Leipzig, 1825); P. Ewald, "*Pirke Aboth,*" *übers. u. erklärt nebst punctirtem Texte u. Wortregister* (Erlang. 1825); Petermann (Berol. 1840). The Biblical Chaldee is contained in the Heb. Bible.

Chaldee Paraphrases. See TARGUMS.

Chal'dees (or "Chaldæans," Hebrew *Kasdim'*, כַּשְׂדִּים, Sept. Χαλδαῖοι, Chald. כַּשְׂדָּאִין, or כַּשְׂדָּיֵא) appear in Scripture, until the time of the Captivity, as the people of the country which has Babylon for its capital (2 Kings xxv; Isa. xiii, 19; xxiii, 13; comp. Isa. xlviii, 14; Jer. xxi, 4; xxxii, 2 sq.; Ezek. xxii, 15, etc.), and which is itself termed Shinar (שִׁנְעָר); but in the book of Daniel, while this meaning is still found (v, 30, and ix, 1), a new sense shows itself. The Chaldæans are there classed with the magicians and astronomers, and evidently form a sort of priest class, who have a peculiar "tongue" and "learning" (i, 4), and are consulted by the king on religious subjects. The same variety appears in profane writers. Berosus, the native historian, himself a Chaldæan in the narrower sense (Tatian, *Or. adv. Gr.* 58), uses the term only in the wider sense, while Herodotus, Diodorus, Strabo, and the later writers almost universally employ it to signify a sect or portion of the people whom they regard either as priests or as philosophers. With this view, however, is joined another, namely, that the Chaldæans are the inhabitants of a particular part of Babylonia, viz. the country bordering on the Persian Gulf and on Arabia (Strab. xvi, 1, § 6; Ptol. v, 20, 3). See BABYLONIA.

1. It appears that the Chaldæans (*Kaldai* or *Kaldi*) were in the earliest times merely one of the many Cushite tribes inhabiting the great alluvial plain known afterwards as Chaldæa or Babylonia. Their special seat was probably that southern portion of the country which is found to have so late retained the name of Chaldæa. Here was Ur "of the Chaldees," the modern Mugheir, which lies south of the Euphrates, near its junction with the Shat el-Hie. Hence would readily come those "three bands of Chaldæans" who were instruments, simultaneously with the Sabæans, in the affliction of Job (i, 15–17). In process of time, as the *Kaldi* grew in power, their name gradually prevailed over that of the other tribes inhabiting the country, and by the era of the Jewish Captivity it had begun to be used generally for all the inhabitants of Babylonia. We may suspect that when the name is applied by Berosus to the dynasties which preceded the Assyrian, it is by way of *prolepsis*. The dynasty of Nabopolassar, however, was (it is probable) really Chaldæan, and this greatly helped to establish the wider use of the appellation. It had thus come by this time to have two senses, both ethnic; in the one it was the special appellative of a particular race, to whom it had belonged from the remotest times; in the other it designated the nation at large in which this race was predominant.—Smith, s. v. Probably it was a branch of the same people that are spoken of in Greek writers as an uncultivated tribe of mountaineers, on the Carduchian mountains, in the neighborhood of Armenia, whom Xenophon describes as brave and fond of freedom (*Cyrop.* i, 31; *Anab.* iv, 3, 4, 7, 8, 25). In Hab. i, 6-10, the Chaldæans are spoken of in corresponding terms. The circumstance, moreover, that a Shemitic dialect is found to have prevailed in Babylon, corroborates the idea that the Chaldæans were of a mixed character. See CHALDÆA.

2. The kingdom of the Chaldees is found among the four "thrones" spoken of by Daniel (vii, 3 sq.), and is set forth under the symbol of a lion having eagles' wings. The government was despotic, and the will of the monarch, who bore the title of "king of kings" (Dan. ii, 37), was supreme law, as may be seen in Dan. iii, 12; xiv, 28. The kings lived inaccessible to their subjects in a well-guarded palace, denominated, as with the ancient Persians (Xenoph. *Cyrop.* 1), "the gate of the king" (Dan. ii, 49, compared with Esther ii, 19, 21, and iii, 2). The number of court and state servants was not small; in Dan. vi, 1, Darius is said to have set over the whole kingdom no fewer than "a hundred and twenty princes." The chief officers appear to have been a sort of "mayor of the palace," or prime minister, to which high office Daniel was appointed (Dan. ii, 49), "a master of the eunuchs" (Dan. i, 3), "a captain of the king's guard" (Dan. ii, 14), and "a master of the magicians," or president of the magi (Dan. iv, 9). Distinct, probably, from the foregoing, was the class termed (Dan. iii, 24, 27) "the king's counsellors," who seem to have formed a kind of "privy council," or even "cabinet," for advising the monarch and governing the kingdom. The entire empire was divided into several provinces (Dan. ii, 48; iii, 1), presided

over by officers of various ranks. An enumeration of several kinds may be found in Dan. iii, 2, 3. The head officers, who united in themselves the highest civil and military power, were denominated סְגָנִים, "rulers" (Jer. li, 23, 28, 57), or אֲחַשְׁדַּרְפְּנִין, "presidents" (Dan. vi, 2); those who presided over single provinces or districts bore the title of פַּחוֹת, "governors" (Hagg. i, 1; ii, 2; in Chald. פַּחֲוָתָא). The administration of criminal justice was rigorous and cruel, will being substituted for law, and human life and human suffering being totally disregarded. Nebuchadnezzar (Dan. ii, 5) declares to the college of the magi: "If ye will not make known unto me the dream, with the interpretation thereof, ye shall be cut in pieces, and your houses shall be made a dung-hill" (see also Dan. iii, 19; vi, 8; Jer. xxix, 22). The religion of the Chaldees was, as with the ancient Arabians and Syrians, the worship of the heavenly bodies; the planets Jupiter, Mercury, and Venus were honored as Bel, Nebo, and Meni, besides Saturn and Mars (Gesenius, *Jesa.* ii, 332 sq.). The language spoken in Babylon was what is designated Chaldee, which is Shemitic in its origin, belonging to the Aramaic branch. See CHALDEE LANGUAGE.

3. That the *Kaldi* proper, however, were a Cushite race, is proved by the remains of their language, which closely resembles the *Galla* or ancient language of Ethiopia. Now it appears by the inscriptions that while both in Assyria and in later Babylonia the Shemitic type of speech prevailed for civil purposes, the ancient Cushite dialect was retained, as a learned language, for scientific and religious literature. This is no doubt the "learning" and the "tongue" to which reference is made in the book of Daniel (i, 4). It became gradually inaccessible to the great mass of the people, who were Shemitized by means (chiefly) of Assyrian influence. But it was the Chaldæan learning, in the old Chaldæan or Cushite language. Hence all who studied it, whatever their origin or race, were, on account of their knowledge, termed Chaldæans. In this sense Daniel himself, the "master of the Chaldæans" (Dan. v, 11), would no doubt have been reckoned among them; and so we find Seleucus, a Greek, called a Chaldæan by Strabo (xvi, 1, § 6). It may be doubted whether the Chaldæans at any time were all priests, though no doubt priests were required to be Chaldæans. They were really the learned class, who by their acquaintance with the language of science had become its depositaries. They were priests, magicians, or astronomers, as their preference for one or other of those occupations inclined them; and in the last of the three capacities they probably effected discoveries of great importance.

According to Strabo, who well distinguishes (xvi, 1, § 6) between the learned Chaldæans and the mere race descended from the ancient *Kaldi*, which continued to predominate in the country bordering upon Arabia and the Gulf, there were two chief seats of Chaldæan learning, Borsippa, and Ur or Orchoë. To these we may add from Pliny (*H. N.* vi, 26) two others, Babylon, and Sippara or Sepharvaim. The Chaldæans (it would appear) congregated into bodies, forming what we may perhaps call universities, and pursuing the studies in which they engaged together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times; but they certainly made great advances in astronomical science, to which their serene sky, transparent atmosphere, and regular horizon specially invited them. The observations, covering a space of 1903 years, which Callisthenes sent to Aristotle from Babylon (*Simplic. ad Arist. de Cœl.* ii, p. 123), indicate at once the antiquity of such knowledge in the country, and the care with which it had been preserved by the learned class. In later times they seem certainly to have degenerated into mere fortunetellers (Cicero, *de Div.* i, 1; Aul. Gell. i, 9; Juv. vi, 552; x, 94, etc.); but this reproach is not justly levelled against the Chaldæans of the empire, and indeed it was but partially deserved so late as the reign of Augustus (see Strabo, xvi, 1, § 6). Josephus, however, uses the word in this sense (*War*, ii, 7, 3).

Upon the walls of the Assyrian palaces are representations of various magi, all distinguished by a peculiarity of dress. It may be difficult to determine the class to which they respectively belong, but there is one (Botta, pl. xliii) who may be particularized as a diviner, and probably of the Chaldæan race, for his person is much thinner, and his features are more delicate than are those of the other attendants of the court, indicating a different order of occupations, and an exemption from the ruder and more active employments of life. See DIVINER.

Chaldæan Diviner.

Chalice (Lat. *calix*), the cup in which the wine of the Eucharist is administered. At first, when the Christians were poor, the cups were of common materials; but when they grew rich, the cups were of the most costly materials they could afford, such as onyx, sardonyx, silver, and gold. The chalices are of two kinds, the greater, containing a large quantity of wine, and the less, called *ministeriales*, because the priests deliver the wine to be drunk out of them.—Bingham, *Orig. Eccles.* bk. viii, ch. vi, § 21; Doughtæus, *de Calic. Euchar. Vet.* (Helmst. 1726); Siegel, *Alterthümer*, i, 61.

Chalk. The Heb. גִּיר, *gir*, thus rendered in Isa. xxvii, 9, properly denotes *lime*. To make the stones of the Hebrew altars like lime-stones is to crumble and destroy them. See LIME.

Challenge. See SINGLE COMBAT.

Challoner, RICHARD, an English Romanist, was born at Lewes, Sussex, Sept. 29, 1691. His parents were Protestants, but he was led over to Rome by his tutor, Mr. Gother, a Romish chaplain at Warworth, Northamptonshire. In 1704 he went to the English college in the University of Douay, where he was appointed professor of poetry, afterwards of rhetoric, in 1713 of philosophy, and in 1718 of divinity. In 1720 he became vice-president of his college, and ten years afterwards was sent on a mission to England. He now commenced a series of controversial works, among which was a reply to Conyers Middleton's *Letter from Rome*. In 1741 he was made titular bishop of London and Salisbury, and vicar apostolic. He was accused of acting against the anti-papal law of William III, but was acquitted. In 1780 he was again in danger from Lord George Gordon's riots. He died in 1781. See Barnard, *Life of Richard Challoner* (Lond. 1784, 8vo). Among his writings are, 1. *The Catholic Christian instructed in the Sacraments, Sacrifices, and Ceremonies of the Church* (against Middleton's *Conformity between Popery and Paganism*):—2. *Britannia Sancta* (Memoirs of British Saints, 1745, 2 vols. 4to):—3. *A Caveat against Methodism*, etc.—Gorton, *Biog. Dictionary*, s. v.; Allibone, *Dictionary of Authors*, i, 361.

Chalmers, THOMAS, D.D., LL.D., eminent alike

as preacher, philanthropist, and philosopher, was born in Anstruther, in Fifeshire, Scotland, March 17, 1780. He was sent at an early age to the ancient University of St. Andrew's. He devoted himself chiefly to physical science, especially to astronomy, in which he became a proficient. In May, 1803, he was appointed minister of Kilmany, in Fifeshire. During his first years of service there he gave himself more to science than to pastoral duties, and published his first important work, the *Inquiry into the Extent and Stability of National Resources*, in which two points are especially prominent—an intense dislike of the spirit of trade, and a burning military ardor. About 1809 he was engaged to write the article on Christianity for the *Edinburgh Encyclopædia*. In prosecuting the studies necessary for this article, he began to perceive that there was something in Christianity which he had never yet comprehended. The reflections to which a severe illness gave rise completed his "conversion," and on his recovery he began to confess publicly his previous blindness, and to preach Christ crucified. In 1815 he was invited by the town council of Glasgow to take charge of the Tron Church and parish in that city. It was here, perhaps, that the highest triumphs of his eloquence were achieved. In 1823 he was transferred to the chair of moral philosophy in the University of St. Andrew's. The ethical class-room, which had before presented a beggarly account of empty benches, was soon crowded with classes of enthusiastic students. In 1828 he was appointed to the chair of theology in the College of Edinburgh—the summit of ecclesiastical elevation and influence in the National Establishment. In this post he continued to labor until the disruption of the Establishment. See FREE CHURCH OF SCOTLAND. In May, 1843, the pride and power of the ancient Church—four hundred ministers, with Chalmers at their head—departed from her, and organized the first "General Assembly of the Free Church of Scotland," over which he presided. "With the stupendous exertions that were then put forth to erect churches, manses, school-houses, and colleges; to send missions to Jews and heathen, and to set on foot all the machinery of an efficient Church; with the amazing labors of Chalmers, who travelled over the length and breadth of Scotland, breathing his own burning spirit into every class, while he seemed, like the eagle, to have renewed his youth; and with the wonderful success that crowned these exertions, we cannot be detained without exceeding our limits. Suffice it to say that, in a great measure, by the infusion of his own untiring energy into every class, rank, and age, the stupendous structure of the Free Church went up, like Aladdin's palace, as it were in a single night, and the world stood amazed at the unparalleled spectacle." Chalmers was appointed principal and professor of theology in the Free Church College, in which post he continued till his death. Busied with his professorship, with the preparation of his *Institutes of Theology* and his *Daily Scripture Readings*, he yet found time for varied works of benevolence and philanthropy. On Sunday night, May 30, 1847, he retired to his chamber apparently in his ordinary health, and was found dead in his bed next morning.

In analyzing the "intellectual character of Dr. Chalmers we find but two prominent peculiarities. The first is the large development of the perceptive faculties. It was this peculiarity that directed his mind to natural science, and fitted him to excel in those departments that demanded the exercise of the perceptive powers; that determined his thoughts to the details of economics, poor-laws, statistics, etc.; that furnished him with the exuberance of illustration that adorns his discourses, and led him generally to reason by analogy rather than on abstract principles or by metaphysical deductions. The other prominent fact in his intellectual structure was imagination. He did not look at a subject in the cold, dry light of pure intellection, but in the warm and vivid light of a poetic fancy. The 'body of divinity,' or ethics, which in the hands of other analysts became a skeleton of rattling bones, by his plastic touch was transformed into an image of living, breathing beauty, warm and bright with a glorious life. The abstractions of colder and more logical minds were to him concrete, embodied realities. But when we examine his sermons critically we find much to condemn. There is an utter disregard of all the laws of style and language. The sentences are long, involved, and tangled. The veriest colloquialisms, the most unauthorized idioms, and in some cases even an approach to vulgarisms, appear in his language. Thus, in one of his most magnificent efforts, he tells his hearers that he does not expect by such appeals to break the '*confounded* spell' that chained them to the world. The most offensive trait in his style is its endless amplification and repetition" (Moore, *cited below*).

We cannot assign Chalmers a high rank as an expositor of Scripture. His *Lectures on Romans*, and still more fully his *Posthumous Works*, prove that his excursions into this vast field were but short and narrow in their range.

The *Works of Dr. Chalmers* are published in a uniform edition by T. Constable, Edinburgh (25 vols. 12mo). They are as follows: *Natural Theology*, 2 vols.; *Christian Evidences*, 2 vols.; *Moral Philosophy*, 1 vol.; *Commercial Discourses*, 1 vol.; *Astronomical Discourses*, 1 vol.; *Congregational Sermons*, 3 vols.; *Public Sermons*, 1 vol.; *Tracts and Essays*, 1 vol.; *Essays on Christian Authors*, 1 vol.; *Christian and Economic Polity*, 3 vols.; *Church Establishments*, 1 vol.; *Church Extension*, 1 vol.; *Political Economy*, 2 vols.; *Parochial System*, 1 vol.; *Lectures on Romans*, 4 vols. Besides these, his Posthumous Works contain, *Daily Scripture Readings*, 3 vols.; *Sabbath Scripture Readings*, 2 vols.; *Discourses hitherto unpublished*, 1 vol.; *Lectures on Butler, Hill*, etc. 1 vol.; *Institutes of Christianity*, 1 vol. His *Life and Correspondence*, by the Rev. W. Hanna, D.D. (4 vols. 12mo), is not equal to the reputation of Dr. Chalmers. An abstract of his Theology, by the Rev. J. M. Manning, is given in the *Bibliotheca Sacra*, xiii, 477 sq.—Moore, in the *Methodist Quart. Review*, Oct. 1849; Hanna, *Life of Chalmers* (New York, Harpers, 1850); *N. Brit. Review*, vii, 299; viii, 210; xvii, 110; *Princeton Review*, xiii, 30.

Chalon. See HALI.

Chalons, a town in France, on the Saone, on the site of the ancient *Cabillonum*. See FRANCE.

Several provincial COUNCILS were held here during the Middle Ages, of which the most important was that of A.D. 813, ordered by Charlemagne. It published sixty-six canons, of which the first eleven relate to bishops, and direct that they shall read the holy Scriptures, the councils, and the pastoral of St. Gregory: that they shall preach to their people and edify them, establish schools, etc. The twenty-seventh forbids the repetition of confirmation. The thirty-second declares that spiritual sins must be confessed, as well as bodily sins. The thirty-sixth declares that almsgiving avails only to release from venial sins, arising from frailty, and reproves those who go on in sin, thinking to escape punishment for their much almsgiving. The forty-ninth orders prayers for the dead to be said at every mass, and declares it to be an ancient custom in the Church to commend to the Lord the spirits of those asleep. The forty-third declares the ordination of certain priests and deacons conferred by certain Scotch bishops to be null and void, being done without the consent of their diocesans, and with suspicion of simony. The forty-fifth condemns pilgrimages made in order to obtain remission of sins, which, on that pretext, the persons about to make the pilgrimage go on committing more freely; pilgrimages made from proper devotional motives are com-

mended. The forty-seventh orders all Christians to receive the holy Eucharist on Maunday Thursday.—Labbe and Cossart, *Concil.* t. vii, p. 1270; Landon, *Manual of Councils*, s. v.

Chaluza. See CHELLUS.

Chamber (the translation of various Heb. words). Oriental houses have in general a court in the centre, with cloisters and a gallery, into which the chambers open, the apartments of the women being at the back, and only to be approached by passing through the others. Toward the street is a dead wall, with a porch, over which is a chamber, sometimes used as a lodging for guests, and sometimes as a store-room, it being well suited for either of these purposes, by being connected with the rest of the house by a door in the gallery, and having a separate staircase opening into the porch. This is the "chamber on the wall" (עֲלִיַּת־קִיר,

Modern Oriental "Chamber on the Wall."

wall-loft, Sept. ὑπερῷον) which the Shunamite prepared for the prophet Elisha (2 Kings iv, 10). Such an "upper chamber" (ὑπερῷον) is still the guest-chamber where entertainments are made, which was the custom with the Greeks as well as the Jews (Matt. ix, 14; Mark xiv, 14). Among the former it occupied the upper story; among the Hebrews it seems to have been on, or connected with, the flat roof of their dwellings (comp. Acts xx, 8). These upper chambers were also sometimes used for the performance of idolatrous rites (2 Kings xxiii, 12), and in them the bodies of the dead were laid out (Acts ix, 37). The early Christians, too, held their meetings for worship in such places. Besides these, there were inner chambers, or a "chamber within a chamber" (1 Kings xxii, 25), such as that into which the messenger of Elisha retired to anoint Jehu (2 Kings ix, 2). See HOUSE.

The term *chamber* is used metaphorically in many places of the Scriptures, as Psa. civ, 3, 13; Prov. vii, 27. To apply ourselves to earnest prayer and supplication, and to depend on the promises and providence of God for special protection, is to enter into our chambers, that we may be safe, as the Hebrews were in their houses, from the destroying angel (Isa. xxvi, 20). See BED-CHAMBER.

The "chambers of the south" (Job ix, 9) are the constellations, or clusters of stars, belonging to the southern part of the firmament. See ASTRONOMY.

The term "Chambers of Imagery" (חַדְרֵי מַשְׂכִּית, *figure-apartments*; Sept. κοιτῶν κρυπτός) is used by the prophet Ezekiel (viii, 12) to denote the vision which he had of the abominations practiced by the Jews in the distant Jerusalem. As the practices there denounced were evidently borrowed from their Chaldæan oppressors, they derive striking elucidation from the gorgeous halls of the Assyrian palaces lately brought to light by Layard, with their long lines of sculptured animals, and kings worshipping before them (*Nineveh*, ii, 209). See IMAGERY.

"Chambering" (κοῖται) signifies in Rom. xiv, 13, that lewd association with courtesans and similar characters that was a peculiar feature of the heathenism of that age. See HARLOT.

Chamberlain (סָרִיס, *saris'*, 2 Kings xxiii, 18; Esth. i, 10, 12, 14; ii, 3, 14, 15, 21; iv, 4, 5; vi, 2, 14; Sept. regularly εὐνοῦχος, twice σπάδων, all signifying *castrated*; in other places it is translated "eunuch," or "officer"). The term appears to have been applied to officers confidentially employed about the person of the sovereign; thus Potiphar, who was also captain of the guard, in the Egyptian court, is styled thus (Gen. xxxvii, 36; xxxix, 1). It probably also occurs in the title Rab*saris* (q. v.). The title "chamberlain" (οἰκονόμος), in Rom. xvi, 23, probably denotes the steward or treasurer of the city, called by the Romans the *quæstor*. The Vulg. renders it by *arcarius*, which was the title of a class of inferior magistrates, who had the charge of the public chest (*arca publica*), and were under the authority of the senate. They kept the accounts of the public revenues. (See Reinesius, *Syntagm. Inscr.* p. 431; La Cerda, *Advers. Sacr.* cap. 56; Elsner, *Obs. Sacr.* ii, p. 68; and a note by Reinesius to the *Marmora Oxoniensia*, p. 515, ed. 1732.) Blastus is said in Acts xii, 20, to have been "the king's (Herod's) chamberlain" (ὁ ἐπὶ τοῦ κοιτῶνος τοῦ βασιλέως), by which is probably meant his personal attendant or *valet de chambre*. It was a post of honor, which involved great intimacy and influence with the king. The margin of our version gives "that was over the king's bedchamber," the office thus corresponding to that of the *præfectus cubiculo* (Suetonius, *Dom.* 16). See EUNUCH.

Chamberlain, Jeremiah, D.D., a Presbyterian minister, was born in York Co., Pa., Jan. 5, 1794, graduated at Dickinson College in 1814, and studied theology at Princeton. He was licensed in 1817, when he became a missionary to the West and South, visiting Natchez, New Orleans, and Mobile. In 1818 he supplied the Bedford church, Pa., and in 1822-23 removed to Danville, Ky., to the Presidency of Centre College. In 1824 he became President in a State institution at Jackson, La., but resigned in 1828, and opened an academy. In 1830 he was made President of Oakland College, Claiborne Co., Miss., the establishment of which was the result of his own enterprise. He was stabbed to the heart (Sept. 5th, 1850) by a student, who afterward committed suicide. He published *A Sermon on the Sanctity and Perpetuity of the Sabbath*, 1831. Some of his *Addresses* and *Letters* were published in the current newspapers.—Sprague, *Annals*, iv, 590.

Chamberlain, Schuyler, a minister of the Methodist Episcopal Church, was born in Woodstock, Conn., Sept. 4th, 1800. In 1818 he joined the first Methodist class formed in Craftsbury, Vt. He was received into the New England Conference in 1828, and during his itinerant career filled a number of important appointments, including the presiding eldership. He died at Craftsbury, May 5, 1862. He possessed superior abilities as a preacher; his style was easy, impressive, and attractive, and there was great clearness and definiteness in his sermons. He was elected three times a delegate to the General Conference. He also represented the town of Craftsbury in the State Legislature three terms.—*Minutes of Conferences*, 1863, p. 104.

Chameleon, a reptile belonging to the *saurian* or lizard-like order. In the original of Lev. xi, 30, occur the words *ko'ăch* (כֹּחַ, so called apparently on account of its great *strength*) and *tinshe'meth* (תִּנְשֶׁמֶת), the

first of which, in our version, is rendered "chameleon" (after the Sept. and Vulg. *χαμαιλέων*, *chamæleon*), and the second "mole;" but Bochart and others consider both words as relating to animals of the *saurian* or lizard tribe, and that which our translators have termed the mole is, in reality, the chameleon (*Chamæleo vulgaris*), while the chameleon of our version is some other and larger creature of the same order, perhaps a species of the land crocodile. See MOLE. "The chameleon is a small species of lizard, celebrated for the faculty it has of changing the color of its skin. This property, however, has no reference to the substance it may be placed on, as generally asserted, but is solely derived from the bulk of its respiratory organs acting upon its transparent skin and on the blood of the animal. The chameleons form a small genus of saurians, easily distinguished by the shagreened character of the skin, and the five toes on the feet, divided differently from those of most other animals, there being, if the expression may be allowed, two thumbs opposed to three fingers. Their eyes are telescopic, move separately, and can be directed backward or forward. Chameleons are slow, inoffensive, and capable of considerable abstinence from food, which consists solely of flies, caught by a rapid protrusion of a long

Chamæleo Africanus.

and viscous tongue. Among themselves they are irascible, and are then liable to change their colors rapidly; dark yellow or gray is predominant when they are in a quiescent state, but, while the emotions are in activity, it passes into green, purple, and even ashy black. The species found in Palestine and all Northern Africa is the common 'African chameleon,' and probably is that referred to in Lev. xi, 30, where unclean animals are mentioned." (See *Penny Cyclopædia*, s. v.). See LIZARD.

Chamier, DANIEL, a French Protestant divine, was born in 1565; studied at Orange; and at 16 became one of the professors of the college at Nismes. In 1583 he went to study at Geneva, where he was ordained. On his return he was made pastor of Vans, and afterward of Aubenas, and some time after succeeded his father, Adrian Chamier, as pastor of Montélimar. In 1596 he was sent by the province to the National Synod of Saumur, and several times afterwards to the Assemblies of Laudun, Vendôme, Saumur, and Châtellerault. He gained great credit by his firmness in the negotiations relating to the Edict of Nantes. In 1600 he distinguished himself in a controversy with Father Coton at Nismes, and the next year with the Jesuit Gaultier. In 1601 he became a delegate to the National Synod of Gergeau, and, together with Maraval, went as a deputation to the king to ask for the continuation of the Saumur Assembly; this was refused, but the convocation of an assembly at Sainte Foix was granted, and of this he also became a member, as well as of several succeeding assemblies. Made pastor of Montauban, he also applied himself to the restoration of its college, and continued his labors as preacher and professor until he was killed by a cannon-ball at the siege of that city on Oct. 21, 1621. His principal works are: *Dispute de la vocation des ministres en l'Eglise Reformée* (La Rochelle, 1598, 8vo); *Epistolæ Jesuiticæ* (Gen. 1599, 8vo); *Confusion des disputes papistes* (Gen. 1600, 8vo); *Disputatio scholastico-theologica de œcumenico pontifice* (Gen. 1601, 8vo); *La honte de Babylon* (pt. i, 1612, 8vo); *Panstratiæ catholicæ sive controversiarum de religione adv. pontificios corpus* (Gen. 1626, 4 vols. fol.; 2d ed. Frankf. ad M. 1627, 4 vols. fol.); *Corpus theologicum, sive Loci communes* (Gen. 1613, fol.). See *Memoir of Chamier* (Lond. 1852, 8vo).—Haag, *La France protestante*, iii, 317.

Chamois, the rendering in the Auth. Vers. at Deut. xix, 5, of the Heb. זֶמֶר, *ze'mer* (so called from *leaping;* Sept. and Vulg. understand the *giraffe*, *καμηλοπάρδαλις*, *camelopardalus;* Luther "elend" or *elk*). The enumeration there requires us to understand *zemer* to be a clean ruminant; but it is plain that the Mosaic list of clean animals would not include such as were totally out of the reach of the Hebrew people, and at best only known to them from specimens seen in Egypt, consisting of presents sent from Nubia, or in pictures on the walls of temples. The camelopard is exclusively an inhabitant of Southern Africa (comp. Strabo. xvi, 771; xvii, 827; Pliny, viii, 27), and therefore could not come in the way of the people of Israel (see Michaelis, *Suppl.* iii, 628). The same objection applies to the elk, because that species of deer never appears further south than Northern Germany and Poland (Cuvier, *Anim. Kingd.* i, 376 sq.). As to the chamois (Gesenius, *Thes.* i, 420), though it did exist in the mountains of Greece, and is still found in Central Asia, there is no vestige of its having at any time frequented Libanus or any other part of Syria. *Zammer* is still used in Persia and India for any large species of ruminants, particularly those of the stag kind. In the sacred text, however, the word *zemer* is not generical, but strictly specific. *Ail*, or "stag," is mentioned, as well as several Antilopidæ, in the same verse; we must, therefore, look for an animal not hitherto noticed, and withal sufficiently important to merit being named in such an ordinance. See DEER; GOAT; GAZELLE, etc.

The only species that seems to answer the conditions required is a wild sheep, still not uncommon in the Mokattam rocks near Cairo, found in Sinai, and eastward in the broken ridges of Stony Arabia, where it is known under the name of *kebsh*, a slight mutation of the old Hebrew כֶּשֶׂב, *keseb*, or, rather, כֶּבֶשׂ, *kebes*, which is applied, indeed, to a domestic sheep, one that grazed. This animal is frequently represented and hieroglyphically named on Egyptian monuments (Wilkinson, *Anc. Eg.* iii, 19). It is a fearless

Ovis Tragelaphus.

climber, and secure on its feet, among the sharpest and most elevated ridges. In stature the animal exceeds a large domestic sheep, though it is not more bulky of body. Instead of wool, it is covered with

close, fine, rufous hair: from the throat to the breast, and on the upper arms above the knees, there is abundance of long, loose, reddish hair, forming a compact protection to the knees and brisket, and indicating that the habits of the species require extraordinary defence while sporting among the most rugged cliffs (see Bochart, *Hieroz.* ii, 273 sq.; Rosenmüller, *Alterth.* IV, ii, 186 sq.). The head and face are perfectly ovine, the eyes are bluish, and the horns, of a yellowish color, are set on as in sheep; they rise obliquely, and are directed backward and outward, with the points bending downward. The tail, about nine inches long, is heavy and round. See ANTELOPE.

Chamor. See ASS.

Champaign (עֲרָבָה, *arabah'*, *desert*), an open or uninhabited district (Deut. xi, 30). See ARABAH.

Champeaux. See WILLIAM OF CHAMPEAUX.

Champion (גִּבּוֹר, *gibbor'*, 1 Sam. xvii, 51; elsewhere "mighty man"). The Heb. phrase אִישׁ־הַבֵּנַיִם, *ish hab-bena'yim*, rendered "champion" in 1 Sam. xvii, 4, 23, literally signifies a *man between the two*, that is, a go-between, an arbiter, or one who offers a challenge, and appropriately denotes the position of Goliath when he stood up between the Hebrew and Philistine armies. Single combats at the head of armies were not unusual in ancient times, and in many cases it was a condition that the result should determine the national quarrel. An example of this kind is the combat between Paris and Menelaus, described by Homer. A similar practice obtains in the present day among the Bedouin Arabs. See SINGLE COMBAT.

Cha'naän (Χαναάν), a mode of Anglicizing, or, rather, Græcizing the name CANAAN in the A. V. of the Apocrypha and N. T. (Judith v, 3, 9, 10; Bar. iii, 22; Sus. 56; 1 Macc. ix, 37; Acts vii, 11; xiii, 19).

Cha'naänite (Χαναναῖος), another form for CANAANITE (Judith v, 16).

Chanamal. See FROST.

Chancel (Lat. *cancelli*, from *cancer*, a lattice), in modern usage, part of a church set off from the rest by a railing. See CANCELLUS. Modern French writers use the word *cancel* in its original sense of a lattice or screen, as they apply it to the screen (*transenna*) which separates the choir or side chapels from the nave or main body of the church. In English Protestant churches the term chancel is applied mostly to that part of the smaller churches cut off from the nave by the *cancel*, or, rather, the railing where formerly the *cancel* stood. The original term choir (q. v.) is retained in the larger churches and cathedrals. The chancel is reserved for the use of the clergy in the administration of their offices during divine service. In the German churches the term "*kanzel*" is applied to the pulpit, which projects from the side of a gallery, that all in the church may easily hear.

"By the rubric of the Church of England before the Common Prayer, it is ordained that" the chancels shall remain as they have done in times past, "that is to say, distinguished from the body of the church in manner aforesaid; against which distinction Bucer and bishop Hooper (at the time of the Reformation) inveighed vehemently, as tending only to magnify the priesthood; but though the king and the Parliament yielded so far as to allow the daily service to be read in the body of the church, if the ordinary thought fit, yet they would not suffer the chancel to be taken away or altered." See Bingham, *Orig. Eccl.* bk. viii, ch. iii; Hook, *Church Dictionary*, s. v.; Guericke, *Manual of Antiquities*, p. 104 (Engl. transl.).

Chancellor (בְּעֵל־טְעֵם, *beël'-teëm'*; Sept. Βαλτάμ and Βαλτάν). The original word signifies a commander, or lord of the edicts or causes; it was the Chaldee title of the Persian governor at Samaria, but is rendered in our version "chancellor" (Ezra iv, 8, 9, 17).

CHANCELLOR (*Cancellarius*), a lay officer who is judge in a bishop's court, under his authority. "In ancient times bishops had jurisdiction in particular causes, as in marriages, adultery, last wills, etc., which were determined by them in their consistory courts. But when many controversies arose in these and other causes, it was not consistent with the character of a bishop to interpose in every litigious matter, and it became necessary for the bishop to depute some subordinate officer, experienced both in the civil and canon law, to determine those ecclesiastical causes, and this was the original of diocesan chancellors. Henry II of England, requiring the attendance of bishops in his state councils, and other public affairs, it was thought necessary to substitute chancellors in their room, to dispatch those causes which were proper to the bishop's jurisdiction. In a few years a chancellor became such a necessary officer to the bishop that he was not to be without him; for if he would have none, the archbishop of the province might enjoin him to depute one, and if he refused, the archbishop might appoint one himself. The person thus deputed by the bishop has his authority from the law, and his jurisdiction is not, like that of a *commissary*, limited to a certain place and certain causes, but extends throughout the whole diocese, and to all ecclesiastical matters; not only for reformation of manners, in punishment of criminals, but in all causes concerning marriages, last wills, administrations, etc." (Hook, *Church Dictionary*, s. v.). In England the chancellor presides in the bishop's court, and is called his *vicar-general*, as being clothed with the bishop's authority. In Ireland the chancellor has no ecclesiastical jurisdiction, all matters pertaining to his office being executed by a distinct officer, called the vicar-general.—Bingham, *Orig. Eccles.* bk. ii, ch. vii, § 5; Marsden, *Churches and Sects*, 331.

Chandler, Edward, D.D., bishop of Durham, was born in Dublin about 1670. He received his education at Emanuel College, Cambridge, where he took his degree of M.A., and in 1693 he became chaplain to bishop Lloyd, of Lichfield (afterwards of Worcester), who gave him preferment in both those cathedrals. In 1717 Dr. Chandler was nominated to the see of Lichfield, from whence, in 1730, he was translated to Durham. He died in London July 20th, 1750. Among his writings are *A Defence of Christianity from the Prophecies of the O. T.*, in reply to Anthony Collins (London, 1725, 8vo), a work which compelled Collins to produce, in 1727, his *The Scheme of Literal Prophecy considered*, which occasioned a second answer from the bishop, entitled *A Vindication of the Defence of Christianity, from the Prophecies of the O. T.* (Lond. 1728). He also wrote *Eight Occasional Sermons*; the *Chronological Dissertation* prefixed to Arnald's *Ecclesiasticus*; and a preface to Cudworth's *Immutable Morality*.—Rose, *New Biographical Dictionary*, vi, 200; Hook, *Eccl. Biography*, iii, 550.

Chandler, Samuel, D.D., an eminent dissenting minister, was born at Malmesbury in 1693, and completed his studies at Leyden. In 1716 he was chosen minister to a congregation at Peckham, and during his stay there was also a bookseller. In 1718 he was chosen lecturer at the Old Jewry, and, about 1726, pastor at the latter place; this last office he held forty years. In 1748 the universities of Edinburgh and Glasgow gave him the degree of D.D. He died May 8, 1766. Among his numerous works are, *Sermons published from MS.* (Lond. 1768, 4 vols. 8vo); *A Critical History of David* (Lond. 1766, 2 vols. 8vo); a *Vindication of the Christian Religion* (Lond. 1728, 8vo); *The History of Persecution* (Lond. 1736, 8vo); *Vindication of the Authority of Daniel's Prophecies* (Lond. 1728, 8vo); *Paraphrase and Notes on Galatians and Ephesians* (Lond. 1779, 4to); *Paraphrase and Commentary on Joel* (Lond. 1735, 4to). His apologetical writings are still of value. In theology he was a semi-Arian.

—*Biographia Britannica*, iii, 480; Allibone's *Dictionary of Authors*, i, 366; Rose, *New Biog. Dict.* vi, 201.

Chandler, Thomas Bradbury, D.D., a Protestant Episcopal minister, was born in Woodstock on the 26th of April, 1726, and graduated at Yale College in 1745. On his return from England in 1751, he entered upon the duties of a mission at Elizabethtown and Woodbridge, N. J. In the winter of 1763–4 Whitefield visited Elizabethtown, and Mr. Chandler refused him his pulpit on the ground of "the rules of our ecclesiastical policy." In 1766 he was made D.D. by the University of Oxford. In 1767 a controversy arose between him and Dr. Chauncy, of Boston, on the subject of episcopacy, and the pamphlets on both sides showed great ability. The Revolution did not enlist the sympathies of Dr. Chandler, and he retired to England, where he remained till 1785, when he returned to Elizabeth, having previously declined the appointment of bishop of Nova Scotia. He died at Elizabeth, June 17th, 1790.—Sprague, *Annals*, v, 137.

Chandler, William Penn, one of the most eminent Methodist preachers of his time, was born in Charles Co., Maryland, June 22d, 1764. He entered the Philadelphia Conference in 1797, and filled in succession the most important stations in the Church. He took a superannuated relation in 1811, and located in 1813, returning to the Conference, however, in 1822, the year in which he died. As a Christian and a minister, Mr. Chandler was a man of no ordinary mark; in the pulpit, the divine unction that rested upon him, and the evangelical energy of his sermons, gave eminent success to his labors (*Minutes of Conferences*, i, 402). Boehm styles him "one of the most powerful ministers that ever wielded the sword of the Spirit." In May, 1820, he had a paralytic stroke. He visited the West Indies in hope of benefit, but returned no better, and died in Philadelphia, Dec. 8th, 1822.—Stevens, *Hist. of the M. E. Church*, iii, 409–418; Sprague, *Annals*, vii, 287; Boehm, *Reminiscences of Methodism*, chap. xv; Ware, *Autobiography*.

Change of Raiment. See GARMENT.

Changer of Money, or MONEY-CHANGER (*κερματιστής*, John ii, 14; *κολλυβιστής*, Matt. xxi, 12; Mark xi, 15; John ii, 15). When Judæa became a province of Rome, the Jews were required to pay taxes in Roman currency, and at the same time the annual tribute for the service of the sanctuary was the half shekel of Jewish currency. See TAX. To exchange these, one for the other, was the business of the money-changers, like the business of modern brokers. To obtain custom, they stationed themselves in the outer courts of the Temple, the places of general resort for strangers from every part of Judæa, and their oppressive and fraudulent practices probably justified the allusion of our Saviour to "a den of thieves." Perhaps they were also (like the *τραπεζῖται*, "exchangers") accustomed to pay and receive interest on loans, and this practice is recognised in Matt. xxi, 12; xxv, 16, 27; John ii, 14. At the present day, in Oriental cities, money-changers are found in the most public places, sitting at little tables covered with coins. See MONEY.

Channel, the rendering in the Auth. Vers. in certain passages of two Heb. words: אָפִיק, *aphik'*, the *bed* of a brook (2 Sam. xxii, 16; Psa. xviii, 15; Isa. viii, 7; elsewhere "stream," "river," etc.); and שִׁבֹּלֶת, *shibbo'leth*, a *stream* (Isa. xxvii, 12; "flood," Psa. lxix, 2, 15).

Channing, WILLIAM ELLERY, D.D., an eminent Unitarian divine and philanthropist, was born at Newport, Rhode Island, April 7th, 1780; entered Harvard University in his 14th year; graduated at the age of 18; spent a part of the ensuing two years as a private tutor in Richmond, Va.; returned to Cambridge as regent (a subordinate office) in 1801; was settled as pastor of Federal Street Church, Boston, in June, 1803; visited Europe in 1822; began his celebrated essays on Milton, Napoleon, and Fénélon, which distinguish the commencement of his literary career, proper, in 1826; visited the West Indies in 1830; commenced his anti-slavery labors in 1835; and died Oct. 2, 1842.

To the American community in general Channing is chiefly known as a theologian, while on the other side of the Atlantic his fame is chiefly that of a literary man and a philanthropist. The common impression that he was the leader of the Unitarian movement in this country is false. By the publication of his celebrated sermon at the ordination of Mr. Sparks, in Baltimore, in 1819, the doctrinal position of Unitarianism was more generally made known in the American community than at any former date. By this accident, and still more, perhaps, by the fact that his literary reputation elevated him above all others engaged in the movement, he became recognised as its head, although it could boast of earlier advocates and abler polemics. He is perhaps rather to be classed with Samuel Clarke and Locke, as a high Arian, than with Priestley, Belsham, and the Socinians generally. He is described by his biographers "as a member of the Church Universal of the lovers of God and lovers of Man." But he himself says that "he had long ceased to attach any importance to the rank or dignity of Christ, or to believe in the Trinity; that the idea of Christ's death being a satisfaction is nowhere taught in Scripture; and that evil spirits have no existence, Satan being merely a figurative personation of moral evil." Still, according to his peculiar views of religious faith and duty, Dr. Channing was a devout and serious man, who had a profound reverence for the authority of Scripture, and was accustomed habitually to view all things in connection with eternity.

With Unitarianism as a system or movement, he unquestionably did not feel satisfied in his later years. In 1837 he wrote as follows: "I feel that among liberal Christians the preaching has been too vague, has wanted unity, has scattered attention too much." In 1839 he thus expresses himself: "I would that I could look to Unitarianism with more hope. But this system was, at its recent revival, a protest of the understanding against absurd dogmas, rather than the work of deep religious principle, and was early paralyzed by the mixture of a material philosophy, and fell too much into the hands of scholars and political reformers; and the consequence is a want of vitality and force, which gives us but little hope of its accomplishing much under its present auspices or in its present form."

As a preacher Channing was pre-eminent, though he had very few natural oratorical qualities. His presence in the pulpit was not commanding; he was small in stature, exceedingly emaciated, and enveloped in a superabundance of clothing; his cheeks were sunken, his eye hollow, and his voice feeble, though remarkably flexible. He generally read his discourses. Throughout his long ministry he was the most popular preacher in Boston. In philanthropic enterprise he was the Chalmers of America. His journals contain "long lists" of plans "for public works, benevolent operations, special reforms." These plans include, "Associations among Mechanics," a "Work to be written on ardent Spirits," "Fire Clubs," "Poor-houses," "Female Employment Societies," "Provisions of Wood on a large Scale," "Bake-houses for the Poor," "Associations for the Relief of the Sick, Old, Debtors," "Societies for the Advice of Emigrants, for the Reformation of Prostitutes, the Improvement of Africans," etc. His liberality was not absorbed in *devising* plans of good, but his personal charities were great. His latest and maturest strength was devoted to the discussion of American slavery, and no writer has treated the subject with more candor or more impressive eloquence. His literary reputation, especially in England, was scarcely paralleled by that of any other

American author of his time. He possessed the best elements of immediate success as a writer—a poetic temperament, and a style of remarkable transparency and power. The greatest faults of his style are repetition and expansion, the fine gold being often beaten out into very thin leaf. Channing's works were reviewed by Macaulay in the *Edinburgh Review* (vol. lxix, p. 214), and a graphic sketch of him is given by Stevens in the *Methodist Quarterly Review* (Jan. 1849, art. iv), from which the present article is condensed. His *Works* have been published in Boston in 6 vols. 12mo (reprinted in England). Many of them have been translated into German (Berlin, 1850–55), also into French, with an Essay on his Life and Writings, by Laboulaye.—*Memoirs and Correspondence of Channing* (Bost. 1848, 3 vols. 12mo); Ware, *American Unitarian Biography*, ii, 189; Sprague, *Unitar. Pulpit*, 360 sq.; *British Quarterly*, Nov. 1848, art. i; *Literary and Theological Review*, i, 304; *N. American Review*, xli, 366; *Democratic Review* (Bancroft), xii, 524; *Westminster Review* (J. Martineau), l, 317; *Edinburgh Review*, lxix, 214; Allibone, *Dict. of Authors*, i, 367.

Channunæ'us (Χανουναῖος), given (1 Esdr. viii, 48) as a person, several of whose "sons" (there named) were among the priests or Levites secured by Ezra to accompany his party to Jerusalem; corresponding apparently to MERARI of the Heb. text (Ezra viii, 19).

Chant (פָּרַט, *parat'*, to *chatter*, spoken contemptuously; Sept. ἐπικροτέω) occurs only in Amos vi, 5, where the passage, "That *chant* to the sound of the viol," may be rendered, "That sing to the sound of the harp." The Chaldee, Syriac, and Vulgate read, "who sing to the sound of the psaltery;" and the margin of our version gives "quaver." Josephus informs us that the instrument here termed *nebel* was of a triangular shape, and carried in the hand. In the paintings on the monuments at Thebes we find players on the harp in the act of singing to the sound of their own music. (See the cut below.) Similar scenes are depicted on the Assyrian monuments. See MUSIC. Both among the Jews and the Egyptians musical instruments were chiefly played upon by women: the Psalmist, describing a musical procession, says, "The singers went before, the players on instruments followed after; among them were the damsels playing with timbrels" (Psa. lxviii, 25). See HARP.

CHANT (*cantus*, a song), the word employed in the early Church to designate the vocal music of the congregation. The term was applied, later, to special tunes adapted to prose; e. g. the *Ambrosian*, established by St. Ambrose, and the *Gregorian*, introduced by Pope Gregory the Great, who established schools of chanters, and corrected the Church music. This, at first, was called the *Roman* song; afterwards the *plain* song, as the choir and people sing in unison. In modern liturgical worship, the word designates the musical performance of all those parts of a prose liturgy which are permitted to be sung or recited in a musical tone. In a wider sense, it is used to denote those forms of sacred music in which prose (e. g. passages of Scripture) is sung in simple harmonies. See MUSIC.

Ancient Egyptians (men and women) singing to the Harp, Lyre, and double Pipe.

Chantry (old French *chanterie*, from *chanter*, to sing), an ecclesiastical benefice or endowment to provide for the chanting of masses for the repose of the souls of the founders. Money was often left also for the building of a chapel in which the masses were to be chanted, and hence the term was applied also to such chapels. They were sometimes built in or near a church, but more usually were attached to an abbey or monastery, and were frequently very richly decorated.

Chanuca. See DEDICATION (FEAST OF).

Chaos, a term taken from the Greek mythology, according to which Chaos was the first existence and the origin of all subsequent forms of being (Hesiod, *Theogon.* 116; Ovid, *Metamorph.* i, 5). The word itself (in Gr. χάος, immeasurable *space*) signifies the vast void, or the confused mass of elements from which it was supposed by the ancient philosophers that the world was formed. It has been employed in later times to denote the unformed mass of primeval matter described by the sacred historian in Gen. i, 2, corresponding to the Heb. words תֹּהוּ, *to'hu*, and בֹּהוּ, *bo'hu*, *a waste void, a desert, a waste solitude*, rendered in the Sept. ἀόρατος καὶ ἀκατασκεύαστος, *invisible and without order*. These two words, combined for the sake of the paronomasia into the phrase תֹּהוּ וָבֹהוּ, in which the repetition of similar terms is a Hebrew method of designating intensity or superlativeness, signify simply *utter desolation*.

The description which Ovid (l. c.) gives of Chaos itself, and of the formation of the world from the chaotic mass, is very remarkable. The following is a literal version:

> Ere sea, or land, or sky, that covers all,
> Existed, over all of nature's round
> One face there was, which men have Chaos named—
> A rude, unfathomed mass, with naught save weight;
> And here were heaped the jarring elements
> Of ill-connected things. No sun as yet
> His rays afforded to the world; the moon
> Filled not afresh her horns by monthly growth;
> Nor hung the globe in circumambient air,
> Poised by its balanced weight; nor had the sea
> Reached forth its arms along the distant shore.
> Where'er was earth, there also sea and air;
> No land to stand upon, no wave to swim,
> And rayless air. Nothing preserved its form:
> Each thing opposed the rest; since in one frame
> The cold with hot things fought, the moist with dry,
> The soft with hard, and light with heavy things.
> *This strife the God and kindly Nature quelled,*
> By cleaving sky from land, and land from sea,
> And parting liquid sky from thicker air.
> These thus evolved and from the blind mass drawn,
> Disjoined in space, were tied in friendly peace:
> The fiery force of heaven's weightless arch
> Leaped forth, and chose the topmost point its seat;
> The air comes next in gravity and place;
> The denser earth drags down the bulky parts,
> Crushed with its weight; the water, flowing round,
> The outskirts held, and bound the orb entire.

"This statement bears so many striking resemblances to the Mosaic account of the creation that one can scarcely fail to regard it as having been derived by tradition from the same source. There is, however, this great difference between the scriptural and the heathen cosmogonies — that the former sets out with the emphatic declaration that the unformed mass was the creation of God; while the latter speaks of it as the already existing materials out of which he formed the world, or even as itself the cause and author of all things. Most interpreters, who have been ignorant of geological phenomena, have at once decided that the chaos of which Moses speaks was the form in which

matter was first created. Some have even declared that there cannot have been any such interval as we have spoken of (Prof. Stuart, in *Bib. Repos.* No. xxi, Jan. 1836). But, on the other hand, the world gives intimations, in the rocks which compose its crust, of various and long-continued changes both of condition and of inhabitants. Hence we conclude: (1) that the world has existed during some long period *before* the Mosaic record of creation in six days; (2) that during that period it was the abode of animals differing in organization and structure from those now found on its surface; and (3) that it has been exposed to various convulsions and reorganizations, more or less general. A favorite mode of explaining the Mosaic account, a few years back, was to take the six days of creation for unlimited periods, during which the changes we are speaking of took place. This ground has, however, been almost completely abandoned, both because the account, so understood, does not agree with the physical phenomena, and because such an interpretation is, to say the least, hardly admissible on exegetical principles. The first sentence of the inspired record may therefore be regarded as the majestic declaration of a fact, which the world had lost sight of, but which it deeply concerned men to know. What occurred subsequently, until the earth was to be furnished for the abode of man, is to be gathered, not from the written word, but from the memorials engraven on the tablets of the world itself. The succeeding verse of the Mosaic account then relates to a state of chaos, or confusion, into which the world was thrown immediately before the last reorganization of it. Nor is such a chaos opposed to geological phenomena, which plainly tell of 'critical periods' and of 'revolutions of organic life' (Phillips's *Geology*, in *Cab. Cyclop.* ii, 264). Whether the chaos of which we are now speaking was universal, or was confined to those regions which formed the cradle of the human race, is a distinct question. The latter supposition has been adopted by Dr. Pye Smith, in his lectures *On the Relation between the holy Scriptures and some Parts of Geological Science*. To these lectures, as well as to the articles by Prof. Hitchcock, in the *Biblical Repository* (Nos. 17, 18, 20, and 22), and to various papers which have appeared at different times in the *Christian Observer*, the reader is referred for a fuller discussion of this and kindred questions" (Kitto, *Cyclop.* s. v.). The difficulty advanced by some that geology (q. v.) gives no intimation of any such total break in the chain of organized beings as is implied in a chaotic condition of the globe just prior to man's introduction upon it, is hardly consistent with truth; for although the rocky tablets of the earth's crust do indeed exhibit a continued series of organized life, yet they also record great changes of species, and even wholesale demolitions of imperfect orders, not now extant, while they contain few, if any, specimens identifiable with those that inhabit the present surface of our planet. See also Hitchcock's *Religion of Geology* (Boston, 1855). See CREATION.

Chapel (מִקְדָּשׁ, *mikdash'*, *holy* place), a general name for a *sanctuary* (as it is elsewhere rendered) or place of worship, occurs in Amos vii, 13, where Bethel is called "the king's chapel" by one of the idol priests, because there the kings of Israel paid idolatrous worship to the golden calves. In 1 Macc. i, 47, the Greek word is εἰδωλεῖον, and in 2 Macc. x, 2; xi, 3, τέμενος; both used in a similar sense.

Chapel (Lat. *capella*, a little cloak or hood). The kings of France are said to have preserved a piece of the cloak of St. Martin in a little church, and to have taken it with them to the field of battle. The tent or church containing this *capella* hence received its name. The term was afterward applied to all small churches, and especially to the side rooms or chapels added to the side aisles of a church, and which were separately dedicated, usually to the service of some saint. Before the Reformation nearly all castles, manor-houses, court-houses, and religious or charitable establishments had such chapels. These had not the right of sepulture, nor of sacramental services.

The term *chapel* was also sometimes applied to the sets of vessels or the vestments necessary for the celebration of the church services. It is also sometimes applied to a choir of singers; also to a printer's work-house, or a body of printers, because printing in England was first carried on in a chapel of Westminster Abbey.

In England the word is now used to denote, 1. Domestic chapels, built by noblemen for private worship in their families; 2. College chapels, attached to colleges; 3. Chapels of ease, built for the use of parishioners who live at too great a distance from the parish church, 4. Parochial chapels, which differ from chapels of ease on account of their having a permanent minister or incumbent, though they are in some degree dependent upon the mother church; 5. Free chapels, such as were founded by kings of England, and made exempt from episcopal jurisdiction; 6. Chapels which adjoin to any part of the church; such were formerly built by persons of consideration as burial-places. In the great Roman cathedrals and churches of Europe side-chapels are commonly fitted up for prayer, with an altar and the other necessary appendages.

The Methodists and Dissenters in England call their churches chapels, and this erroneous use of the word has crept somewhat into use in America.

Chapelle ardente, a peculiar ceremony in the Roman Church in connection with the masses for the dead. The *chapelle* is a small tent in which the corpse is laid, and is called *ardente* in allusion to the lights placed round the catafalque. Incense is burned, holy water is sprinkled, prayers are chanted, and absolution is given, ending with *requiescat in pace*.

Chapharperah. See MOLE.

Chapin, Calvin, D.D., an eminent Congregational minister, was born in Springfield, Mass., about 1764. He graduated at Yale in 1788, and in 1791 became tutor in the same college, where he remained until March, 1794, when he was ordained pastor at Rocky Hill. He was a trustee of the Conn. Miss. Soc., and one of the five organizers of the "American Board of Commissioners for Foreign Missions." He was a strong advocate of the principle of "total abstinence." He was made D.D. by Union College in 1816. He resigned his pastoral charge in 1847, and died March 16, 1851. He published several sermons on funeral and other occasions.—Sprague, *Annals*, ii, 323.

Chapin, Stephen, D.D., a Baptist minister, was born at Milford, Mass., Nov. 4, 1778. He graduated at Harvard in 1804, and in 1805 was ordained pastor of the Congregational church in Hillsborough, N. H., from whence he removed, in Nov. 1809, to the Congregational church in Mount Vernon, N. H. Here he remained nine years, but, on account of a change in his views concerning baptism, he was discharged Nov. 18, 1818, and the same month he was received a member of the Baptist Church. In the fall of 1819 he was installed pastor of the Baptist church in North Yarmouth, Me., where he was greatly esteemed. In 1822 he was made D.D. by Brown University. In 1823 he became professor of Theology at Waterville College, Me., and remained there until his appointment as president of Columbia College, Washington, D. C., where he was inaugurated in March, 1829, and labored for twelve years with unflagging zeal and energy. In consequence of growing infirmities he resigned the presidency in 1841, and retired to a small farm near Washington, where he died Oct. 1st, 1845. Dr. Chapin published a pamphlet on Baptism in 1819, and a number of occasional sermons, addresses, etc.—Sprague, *Annals*, vi, 673.

Chapiter (רֹאשׁ, *rosh*, *head*, as it is usually rendered; but in the account of the Temple it is translated "top," as 1 Kings vii, 16, etc.), or CAPITAL, as it is called in modern architecture, is the upper or ornamental part of a column (Exod. xxvi, 38; xxxviii, 17, 19, 28), in which passages those of the Tabernacle are spoken of as being overlaid with gold. See TABERNACLE. In 1 Kings, vii, 19, the chapiters on the tops of the pillars were formed of "lily work." See JACHIN. By comparing these descriptions with the remains of ancient temples in Egypt, we find that it was the practice to gild and paint the columns of various colors. The *lotus* or lily ornament was also a favorite in Egyptian architecture. See PILLAR. A more distinctive term thus rendered is צֶפֶת (*tse'pheth*, literally something *overlaid*), which occurs in 2 Chron. iii, 15, evidently in this sense. In all other passages the Heb. word thus rendered is the specific one כֹּתֶרֶת (*kothe'reth*, literally a *coronet*), which in the case of the Sanctuary was of brass, and in some instances decorated with artificial pomegranates (Jer. lii, 22). See ARCHITECTURE. "The prevalent idea of the Hebrew term is the *roundness* of the forms which characterized the capitals of the Egyptian and Assyrian columns (Fürst, *Hebr. Wört.* p. 643). The *kothereth* consisted of two portions, the crown or ledge (in which sense it is applied to the laver [q. v.], 1 Kings vii, 31), and the 'pommel' or turban-shaped bowl beneath (גֻּלָּה). According to R. Levi ben-Gershom, this chapiter rather resembled a pair of crowns or caps, so joined as to form an oval figure of five cubits high, bulging out all around beyond the breadth of the column which it surmounted, not unlike, as we may suppose, the truncated lotus-bud capitals of the grand pillars of the Memnonium, Thebes (see Frith's *Egypt and Palestine Photographed*, vol. i, pl. 35). Lightfoot, who adopts Gershom's view (*Descriptio Templi*, xiii, 2, 3), reconciles the discrepancy between 1 Kings vii, 16, and 2 Kings xxv, 17, as to the height of the chapiters, by observing that the three cubits contained the sculpture or "wreathen-work" mentioned in the same verse, whereas the other passage included two belts or necks of plain space of two more cubits below the ornamental portion. The chapiters were festooned with 'nets of checker-work and wreaths of chain-work,' with sculptured 'pomegranates,' forming an ornate group similar to that which still adorns the columns of the beautiful temple ruins of Wady Kardassy in Nubia (Frith, ii, pl. 4). Lightfoot (*ut supra*) translates thus: 'The chapiters upon the top of the pillars possessed lily-work of four cubits over the porch,' and supposes that the lily-work surrounded the column *under* and *not around* the chapiter; the lily-leaf not enveloping the chapiter, which had its ornaments already, but curving laterally over the space of the porch, and occupying four cubits of the column below the chapiter. The more natural view, however, is that the lily-leaves or lotus ornaments formed the capital itself. A vast amount of learned information, from ancient and modern sources, is accumulated on the subject in Plesken's *Dissertatio Philologica de Columnis Æneis* (Vitemb. 1719)." See COLUMN.

Chaplain (*capellanus*), a person who performs divine service in a *capella* (chapel). The position of the chaplain was contingent upon the nature of the *capella*, which either denotes a church without parochial rights, an oratory, a sanctuary, or even a part (altar, etc.) of a particular church. See CHAPEL. Thus the chaplain was sometimes the assistant of a parish priest; sometimes even exempted from episcopal jurisdiction. The "royal or palace chaplains" (*capellani regii* or *palatini*) usually received large privileges from the popes. At the head of the army chaplains (*capellani militum*) was a chaplain general (*Capellanus major regius*), to whom usually extraordinary faculties were transferred. There were also special chaplains in the castles of noblemen and in the houses of wealthy citizens. The chaplains of the bishops usually served as their secretaries. The chaplains attached to the papal court were divided into three classes: titular chaplains (*capellani honorarii*), chaplains assisting at the pontifical ceremonies (*ceremoniarii*), and chaplains employed as private secretaries of the pope (*capellani secreti*). Chaplains were also commonly appointed for the religious services in monasteries, hospitals, and other ecclesiastical institutions; but the most common employment of chaplains in the Church of Rome soon became, and still is, service at non-parochial churches and sanctuaries, or as assistants of the parish priests at large churches requiring the services of more than one clergyman.

In many of the Protestant churches the name chaplain was for a long time retained for the assistant clergymen at large churches, but this use has gradually disappeared, and is now only to be found in a few places, especially in Hungary. It is used in modern times as the title of court preachers, of preachers appointed for the chapels of ambassadors or for private chapels, and more commonly for clergymen appointed exclusively to minister in the army or navy (army and navy chaplains). "In England there are 48 chaplains to the king, who wait four each month, preach in the chapel, read the service to the family, and to the king in his private oratory, and say grace in the absence of the clerk of the closet. While in waiting they have a table and attendance, but no salary. In Scotland the king has six chaplains, with a salary of £50 each; three of them having, in addition, the deanery of the chapel royal divided between them, making up above £100 to each. Their only duty at present is to say prayers at the election of peers for Scotland to sit in Parliament." In England, "when the system of army chaplains was remodelled in 1796, a *chaplain-general* was appointed: this office was abolished by the Duke of Wellington soon after the termination of the great war, but revived by Mr. Sidney Herbert in 1846. The chaplain-general, who receives £1000 per annum, has duties partaking somewhat of those of an archdeacon. He assists the War Office in selecting chaplains, and in regulating the religious matters of the army. His office forms one of the 17 departments under the new organization of the War Office. There are about 80 chaplains on the staff, besides assistant clergymen and chapel clerks. The commissioned chaplains receive from 16*s.* to 23*s.* per day, and there are always some on half pay, while the assistant clergymen receive from £200 to £400 a year. The whole expenditure for commissioned chaplains, assistant clergymen, chapel-clerks, and church and chapel books, figures in the Army Estimates for 1860 61 at about £45,000. In the navy every ship in commission, down to and including fifth-rates, has a chaplain. The Navy Estimates (1860-61) provide for 99 commissioned chaplains, at stipends varying from £160 to £255 per annum; 9 others in district guard-ships, at average stipends of about £175; and 66 on half-pay, at 5*s.* to 10*s.* per day. The chaplains perform divine service at stated times on shipboard, visit the sick sailors, and assist in maintaining moral discipline among the crew."

In the United States the national government has not only army and navy chaplains, but also chaplains for both houses, Senate and Representatives. Many of the state Legislatures have chaplains also.

Chaplet (French *chapelet*), a string of beads, or other material, used by Romanists in counting the number of their prayers. It is more commonly called the Rosary (q. v.).

Chaplin, Daniel, D.D., a Congregational minister, and native of Rowley, Mass., was born Dec. 30, 1743. He graduated at Harvard, 1772, and was made D.D. by the same college in 1817. He was ordained

pastor at Groton, Jan. 1, 1778, and remained in the same charge for fifty years. His great piety and decision of character gave him great influence in the stormy times of the Revolution, and his long ministry was acceptable and useful, until, toward the close of his life, part of his congregation chose a Unitarian minister. He died in peace in 1831.—Sprague, *Annals*, ii, 150.

Chaplin, Jeremiah, D.D., a Baptist minister, was born at Georgetown (then Rowley), Mass., Jan. 2, 1776; graduated at Brown University in 1799, and took charge of the Baptist Church in Danvers, Mass., about 1802. In 1817 he became principal of a theological school in Waterville, Me., of which, after its being chartered as Waterville College in 1820, he was elected President. He held the office thirteen years with great success. He was made D.D. by the College of South Carolina in 1819. In 1833 he resigned the presidency of the college, and, after preaching for some time at Rowley, Mass., and at Willington, Conn., finally settled at Hamilton, N. Y., where he died suddenly, May 7th, 1841. Dr. Chaplin published *The Evening of Life; or, Light and Comfort amidst the Shadows of declining Years*.—Sprague, *Annals*, vi, 463; Pattison, *Eulogy on Dr. Chaplin*, Boston, 1843.

Chaplin, Jonathan E., a Methodist Episcopal minister, was born in Connecticut in 1789, was converted in 1830, and entered the travelling ministry in the Ohio Conference in 1834. He was three years principal of Norwalk Seminary, Ohio, and then remained in the itinerant work in Ohio till 1840, when he removed to the Michigan Conference, and was made principal of White Pigeon Branch of the Michigan University. Here he remained until his death, Sept. 15, 1846. While young he studied law in the State of New York, and during the war of 1812 was aid-de-camp to General Porter. Soon after the peace he settled at Urbana, Ohio, where he practiced law till his conversion. In the cause of education he was of lasting service and benefit to the Church in Ohio and Michigan. His care of the institutions committed to him was very satisfactory. His last words were, "Live holiness, and preach it from the heart."—*Minutes of Conf.* iv, 178.

Chapman (אֱנוֹשׁ הַתּוּר, *enosh' hat-tur'*, *man of the journeying, traveller*, i. e. for purposes of traffic), a trader who transports articles of commerce from the place of production to a mart (2 Chron. ix, 14); a merchant-man, as the same phrase is rendered in the parallel passage (1 Kings x, 15). See MERCHANT.

Chapman, John, D.D., an eminent English theologian, was born at Strathfieldsaye in 1704; studied at King's College, Cambridge, and in 1739 became rector of Mersham, in Kent, from whence, in 1744, he removed to the rectorship of Alderton. He afterwards became archdeacon of Sudbury, and treasurer of Chichester, and died Oct. 14, 1784. The most important of his works are: *Eusebius; or, the true Christian's Defence against a late Book entituled the Moral Philosopher* [by Dr. Morgan] (1739–41, 2 vols. 8vo); *Miscellaneous Tracts relating to Antiquity, revised and corrected, with Additions* (Lond. 1743, 8vo); *Expediency and Credibility of Miraculous Powers among the primitive Christians after the Decease of the Apostles* (Lond. 1752, 4to).—Darling, *Cyclopædia Bibliographica*, i, 632; Hook, *Eccl. Biography*, iii, 554.

Chappel, William, D.D., bishop of Cork, was born at Lexington, Nottinghams., Dec. 10, 1582, and was educated at Mansfield, from whence he removed to Christ's College, Cambridge, where he obtained a fellowship. By the favor of archbishop Laud he was made dean of Cashel, Ireland, in 1633, and soon after provost of Trinity College, Dublin. In 1638 he was made bishop of Cork. He suffered many hardships in the Rebellion, and on landing in England was sent to prison, but soon obtained his liberty. He died at Derby in 1649. He wrote *Methodus Concionandi* (London, 1648), and *A Treatise on the Use of Holy Scripture* (London, 1653, 8vo). The *Whole Duty of Man* has also been ascribed to him, but without probability. Archbishop Usher and bishop Martin opposed him on account of his apparent leaning to Romanist views of discipline.—Hook, *Church Dictionary*, iii, 554; Kippis, *Biographia Britannica*, iii, 489.

Chappelow, Leonard, B.D., an eminent Oriental scholar, was born in England in 1683. He was educated at St. John's College, Cambridge, chosen fellow in 1717, and became Arabic professor in that university in 1720. He also obtained the livings of Great and Little Hormead. He died in 1768. His principal works are, *A Commentary on the Book of Job, in which is inserted the Hebrew Text and English Translation* (Camb. 1752, 2 vols. 4to); *Elementa linguæ Arabicæ* (1730, 8vo); *Six Assemblies, or ingenious Conversations of learned Men among the Arabians* (1767, 8vo).—Darling, *Cyclopædia Bibliographica*, i, 633; Rose, *New Gen. Biog. Dict.* vi, 211.

Chapter, an abbreviated form of the word *chapiter* (q. v.). *heading*, e. g. of a column.

CHAPTER OF THE BIBLE. The present numeral division of the Scriptures into *chapters* and *verses* is, in some respects, of comparatively recent origin. The Pentateuch was divided by the Jews, at an early period, into fifty-four *parshioth* (פָּרָשִׁיּוֹת) = sections, one of which was read in the synagogue every Sabbath day (Acts xiii, 15). These sections were subdivided, probably by the Masoretes, into 669 *sidrim* (סְדָרִים), or orders. After the reading of the law, it was also customary, from an early period, to read a passage from the prophets, and with that to dissolve the assembly. Such passages were called *haphtoroth* (הַפְטָרוֹת) = dismissions, and appear to have been selected according to the choice of any reader (Acts xiii, 15; xxvii, 43; Luke iv, 16). The divisions or sections found in the Greek and Latin manuscripts are different from those of the Hebrew books; they are of unequal and arbitrary length, and very different from the chapters in our printed Bibles. So, also, the books of the New Testament were divided, at an early period, into certain portions, which appear under various names. The division into church lessons, read in the assemblies like the sections of the law and the prophets, was the most ancient. Subsequently the New Testament was divided into two kinds of sections, called *titles* (*τίτλοι*) and *chapters* (*κεφάλαια* = *heads*). The *titles* were portions of the Gospels, with summaries placed at the top or bottom of the page. The *chapters* were divisions, with numeral notations, chiefly adapted to the Gospel harmony of Ammonius. Other sectional divisions are occasionally seen in manuscripts, which appear to have varied at different times and in different churches, accordingly as festival days were multiplied. See BIBLE.

The numerical division of the Old and New Testaments into modern *chapters* is by some ascribed to Lanfranc, who was archbishop of Canterbury in the reigns of William the Conqueror and William II, while others attribute it to Stephen Langton, who was archbishop of the same see in the reigns of John and Henry III. Its authorship, however, is usually assigned to the schoolmen, who, with cardinal Hugh of St. Cher, were the authors of the Concordance for the Latin Vulgate, about A.D. 1240. This cardinal wrote remarks, or *Postils*, as they were called, on all the books of Scripture; and this Latin Bible, published by him, is generally supposed to be the first Bible divided into the present chapters. Yet cardinal Humbert, about A.D. 1059, cites the 12th and 13th chapters of Exodus, and the 23d of Leviticus, according to our present division of chapters. Whoever was the author, from about this period the division of the several books into chapters was gradually adopted in the Latin and other versions; and, finally, in the Hebrew, with a few va-

riations, and also in the Greek text. The several Psalms were not included in this division. See VERSE.

CHAPTER, as an ecclesiastical term, the name of a corporation of ecclesiastics, bound by canonical rules, and generally attached to a cathedral. The name chapter arose from the fact that the first communities of canons (q. v.) were called together daily in a common hall, to hear a chapter of the Bible, or of their common rules, read aloud. The hall was hence called the Chapter, or Chapter-house (q. v.), and the name finally passed to the body of ecclesiastics assembling in it.

Originally the property of the chapter belonged to the diocese; and the monks or canons had a common life, and kept strict obedience. Corporations of this kind rapidly multiplied, however, and soon began to have wealth of their own; by the 12th century these *capitula canonicorum* were attached to almost every see. The nomination of the bishop fell to the chapter, and this was allowed by the popes, thus enlarging greatly the power of the chapter, and diminishing the authority of the bishop over it. The nobility of Europe found the canonries rich, and the chapters were made sources of income for their children, who in some dioceses filled every stall. These *secular* canons absorbed the revenues of the chapters, and appointed vicars to do the work. The Council of Trent introduced many reforms (sess. 23, 25). In 1803 the chapters, as corporations, were abolished in South Germany, and in 1810 in Prussia. Whatever rights the chapters now have are based upon the canon law, and upon the special legislation of each country in which they exist. In Switzerland, Prussia, and other Protestant countries of Germany, the chapters have received the right of electing the bishops, who in most of the Roman Catholic countries are appointed by the sovereigns.

In England the chapter of a cathedral church consists "of persons ecclesiastical, canons and prebendaries, whereof the dean is chief, all subordinate to the bishop, to whom they are as assistants in matters relating to the church, for the better ordering and disposing the things thereof, and for confirmation of such leases of the temporalities and officers relating to the bishopric as the bishop from time to time shall happen to make" (Hook, s. v.). The dean and chapter had formerly the right to choose the bishop in England, but that right was assumed by Henry VIII as a prerogative of the crown. In Germany, Luther made an attempt to preserve the chapters as ecclesiastical corporations, but soon most of them lost altogether their ecclesiastical character, and nearly all of them perished at the beginning of the present century. A few chapters, like those of Halberstadt, Minden, and Osnabruck, had both Protestant and Roman Catholic canons, and in Osnabrück even the election of the bishop had to alternate between the two denominations.—Herzog, *Real-Encyklopädie*, ii, 554 sq.; Ersch u. Gruber, *Encyklop*. xxvi, 383 sq. See CANON; DEAN.

CHAPTERS, THE THREE, a title given to three points (*κεφάλαια, capitula*) condemned by the fifth Council of Constantinople. They were, 1. The person and writings of Theodore of Mopsuestia; 2. The writings of Theodoret, so far as they were directed against Cyril; 3. The letter of Ibas of Edessa to Maris, concerning the Council of Ephesus. The emperor Justinian, under the influence of his wife Theodora, who was at heart a Monophysite, and of Theodore, bishop of Cæsarea, published an edict A.D. 544, in which the above were condemned. This edict was signed by most of the Eastern bishops, but was opposed by the African and Western bishops, especially by Vigilius, the Roman pontiff, who was ordered to Constantinople (A.D. 547), and obliged to give a written declaration (*Judicatum*) approving the condemnation of the "Three Chapters." They were afterwards condemned anew by Justinian, A.D. 551, and by the fifth Council of Constantinople, A.D. 553. Dr. Schaff remarks (iii, 770) that the "controversy of the 'Three Chapters' has filled more volumes than it is worth lines."—Mosheim, *Ch. Hist*. cent. vi, pt. ii, ch. iii, § 10, note; Schaff, *Ch. History*, iii, § 144; Gieseler, *Church History*, i, § 109. See CONSTANTINOPLE.

Chapter-house (see CHAPTER), an apartment or hall in which the monks and canons of a monastic establishment, or the deans and prebendary of cathedrals and collegiate churches, meet for transacting the business of the body of the society. Chapter-houses were often built in the most magnificent and costly style of architecture. They are of various forms, more usually located contiguous to a church, and often mere places of burial, having occasionally crypts under them.

In mediæval Latin the chapter-house is denominated *capitulum*, and also *Domus Capitularis*. The former term was also applied to the east end of the church (*caput ecclesiæ*), and hence there have been errors of translation.

Charaäth'alar (Χαρααθαλάρ v. r. *Χαρααθαλάν*, Vulg. *Carmella et Careth*) is given among the pseudo-priests in 1 Esdr. v, 36, where "Charaathalar, leading them and Aalar," is the confused translation for "CHERUB (q. v.), Addan (or Addon), and Immer," of the Heb. texts (Ezra ii, 59; Neh. vii, 61).

Char'aca (Χάραξ, Vulg. *Characa*), a place obscurely mentioned only in 2 Macc. xii, 17 (*εἰς τὸν Χάρακα*), as that to which Judas Maccabæus retired after his attack of the Nabathæans. It was on the east of Jordan, being inhabited by the Jews called "Tubieni," or of "Tobie" (see TOB), who were in Gilead (comp. 1 Macc. v, 9, 13); and it was 750 stadia from the city Caspin; but where the latter place was situated, or in which direction Charax was with regard to it, there is no clew. Ewald (*Isr. Gesch*. iv, 359, note) places it to the extreme east, and identifies it with Raphon. The only name now known on the east of Jordan which recalls Charax is *Kerak*, the ancient KIR-Moab, on the S.E. of the Dead Sea, which in post-biblical times was called *Χαράκμωβα*, and *Μωβουχάραξ* (see Reland, *Palæst*. p. 705). The Syriac has *Karka*, which suggests Karkor (Judg. viii, 10).

Character (*χαρακτήρ, impress, image*), CHRISTIAN, is the force of a man's moral personality, as modified and developed by the work of the Holy Spirit.

Christianity does not seek to destroy the natural and moral qualities of man, but to elevate, strengthen, and sanctify them. But the individual man, under the Christian system, is taught "of the Holy Spirit" the way of life; and, under his own responsibility, the influence of the Holy Spirit must be voluntarily accepted as the inspiring and controlling principle of the qualities which belong to him by nature. If this be not the case, the man remains a "natural man," and his character is his natural character. But the beginning of a new moral course of life, through the work of the Holy Spirit, is *regeneration*, and in regeneration the true foundation of the Christian character is laid. But this regeneration, though it requires active faith on the part of man, is, nevertheless, the work of God, and therefore character is necessarily a divine work, "lest any man should boast" (Eph. ii, 9). Of course, all the practical forms of goodness, the cardinal virtues, so called (2 Pet. i, 5-7), and the special Christian virtue of charity, are elements of this Christian character. It manifests itself in the "fruits of the Spirit," which always, in turn, react upon the character, bringing it constantly into nearer identity with the "inner" or "spiritual" man (Eph. iii, 16; iv, 23). It fixes the moral worth of the individual, as well as his fitness for the kingdom of God, in which the entire character, the *whole man*, is peremptorily required (Matt. vi, 24; xii, 23). Christianity demands the *whole* heart; for "out of the heart are the issues of life," and the ruling disposition of a man's heart forms the essence of his character. With Paul, character is the man: the holy

character is the "new man;" the corrupt character the "old man."

But, though the Spirit works this Christian character in man, it leaves free play for the special gifts and endowments of the individual. Although "in Christ there is neither Jew nor Greek," there is room in Christ's kingdom for diversities springing from temperament, race, or nationality. The apostles Peter, Paul, John, and Jude have been taken, by some writers, as types of the four temperaments, sanguine, nervous, lymphatic, and bilious. The Word of God is regarded, in the Christian system, as the rule of life and standard of appeal for the Christian character. On *perfection* of character, see HOLINESS; SANCTIFICATION; PERFECTION.—Herzog, *Real-Encyklop.* vii, 876; *Bibliotheca Sacra*, iii, 22.

Character Dominicus (*the mark of the Lord*), a name by which, as well as *character regius* (*royal mark*), Augustine designates the sacrament of baptism; "by which he does not mean any internal quality or spiritual power distinct from baptism imprinted on the soul, but only the external form common to all receivers, both good and bad, who are duly baptized in the name of the Holy Trinity; that they are so far signed by the mark or character of the Lord as thereby to be distinguished from unbaptized Jews and Gentiles, who never made any formal profession of Christianity, nor ever received so much as the external indication of it. He allowed this character to be so far indelible that a Christian, though he turn Jew or pagan, can never need a second baptism, but only repentance and absolution to reinstate him in the Church." It is clear that Augustine did not dream of the later Romanist theory of sacramental "character."—Bingham, *Orig. Eccles.* bk. xi, ch. i, § 7. See CHARACTER INDELEBILIS.

Character Indelebilis. In the Church of Rome it is held that a spiritual sign, called *character*, is impressed in the soul by certain sacraments. Aquinas taught that, "in consequence of the death of Jesus, the sacraments instituted in the New Testament have obtained what is called *virtus instrumentalis*, or *effectiva*, which those of the Old Testament did not possess. Therefore, by partaking of the sacraments, man acquires a certain character, which, in the case of some sacraments, such as baptism, confirmation, and the ordination of priests, is *character indelebilis*, and, consequently, renders impossible the repetition of such sacraments" (Aquinas, *Summa*, pt. iii, Qu. 60-65).

The Council of Florence (1439) laid down the following canon (Mansi, t. xxxi, col. 1054 sq.): Inter hæc sacramenta tria sunt, baptismus, confirmatio et ordo, quæ characterem, i. e. spirituale quoddam signum a cæteris distinctivum imprimunt in anima indelebile. *Unde in eadem persona non reiterantur.* Reliqua vero quatuor characterem non imprimunt et reiterationem admittunt.—"Among the sacraments there are three, baptism, confirmation, and orders, which impose in the soul a character, that is, a certain spiritual and indelible sign, distinguishing it from others. Hence, in the same persons, these sacraments are not repeated. The other four do not impress a character, and admit of repetition." The Council of Trent gives the following: "9. Whoever shall affirm that a character, that is, a certain spiritual and indelible mark, is not impressed on the soul by the three sacraments of baptism, confirmation, and orders, for which reason they cannot be repeated, let him be accursed" (sess. vii, can. 9). There is a great variety of opinions (naturally enough) among Romanist theologians concerning the nature of this "character." See Ferraris, *Promta Bibliotheca*, viii, 221 (s. v. Sacramentum); Elliott, *Delineation of Romanism*. bk. ii, ch. i.

Char'ashim (Heb. *Charashim'*, חֲרָשִׁים, *craftsmen*, as it is explained in the text; Sept. Ἀγεαδδαὶρ v. r. Γηρασείμ), the name of a valley (גֵּיא, *ravine*) inhabited by the descendants of Joab (q. v.), of the tribe of Judah, so called from their employment as artificers (1 Chron. iv, 14). The same place is mentioned in Neh. xi, 35 (A. V. "valley of craftsmen;" Sept. γῆ ἀγασείμ) as extant after the Captivity, and inhabited by the Benjamites, and as lying not far from Jerusalem. The Talmud (as quoted by Schwarz, *Palest.* p. 135) reports the valley of Charashim to consist of Lod and Ono, which lay therein. These notices appear to fix its position as in the undulating ground at the back of the plain of Sharon, east of Jaffa, being, in fact, the depression now marked by *Wady Maseirah*. See CRAFTSMAN.

Char'chamis (Χαρκαμὺς v. r. Χαλχαμὺς, 1 Esdr. i, 25), **Char'chemish** (2 Chron. xxxv, 20), other methods of Anglicising the name CARCHEMISH (q. v.).

Char'cus (Βαρχουὲ; Vulg. *Barcus*), given (1 Esdr. v, 32) as one of the heads of the Temple servants that returned from Babylon; a corruption for *Barkos* (q. v.) in the lists of Ezra (ii, 53) and Nehemiah (vii, 55), possibly by a change of ב into כ. But it does not appear whence the translators of the A. V. got their reading of the name. In the edition of 1611 it is "Chareus."

Cha'rea (Χαρέα), given (1 Esdr. v, 32) as the name of another head of the Temple servants who returned with Zerubbabel, instead of the HARSHA (q. v.) of the Heb. text (Ezra ii, 52; Neh. vii, 54).

Charenton, a town of France, five miles from Paris. A Protestant Synod was held there in 1631, in which the Confession of Augsburg was declared free of errors on all fundamental doctrinal points, and its adherents to be entitled to the sacrament of the Lord's Supper in the Reformed churches, to be accepted as sponsors for children, and to intermarry with the Reformed. See FRANCE, REFORMED CHURCH OF.

Chares (Χαρῆς), one of the most influential of the Jewish commanders, who died of illness during the final struggle with the Romans (Josephus, *War*, ix, i, 4, 9).

Charey-Yonim. See DOVES' DUNG.

Charger. The silver vessels offered by the heads of the tribes for the service of the Tabernacle (Num. viii) are thus termed in our translation, being in the original קְעָרָה (*keärah'*, literally a *deep dish*), a *bowl*, elsewhere rendered "dish" (Exod. xxv, 29; xxxvi, 16; Num. iv, 7). These are said to have been of silver, and to have weighed each 130 shekels, or 65 oz. (Hussey, *Anc. Weights*, chap. ix, p. 190). The "charger" upon which the Baptist's head was presented to Herodias (comp. Homer, *Il.* i, 141) must have been a large *platter* (πίναξ, strictly a broad *tablet* [comp. πινακίδιον, a writing-tablet, Luke i, 63], hence a wooden trencher, Matt. xiv, 8, 11; Mark vi, 25, 28; rendered "platter" in Luke xi, 39). The "chargers" of gold and silver, in Ezra i, 9 (אֲגַרְטָל, *agartal'*), were probably, as interpreted by the Sept., Vulg., and Syriac, *basins* for containing the blood of sacrifices; although others make them to have been *baskets* for first-fruit offerings. See BASIN; DISH.

Chargol. See BEETLE.

Chariot (properly מֶרְכָּבָה, *merkabah'*, a vehicle for *riding*; ἅρμα), a car used either for warlike or peaceful purposes, but most commonly the former. Of the latter use there is but one probable instance as regards the Jews (1 Kings xviii, 44), and as regards other nations, but few (Gen. xli, 43; xlvi, 29; 2 Kings v, 9; Acts viii, 28). The Scriptures employ different words to denote carriages of different sorts, but it is not in every case easy to distinguish the kind of vehicle which these words severally denote. We are now, however, through the discovery of ancient sculptures and paintings, in possession of much new information respecting the chariots of Egypt, Assyria, Babylon, and Persia, which are, in fact, mentioned in the Scrip-

tures. There has been some speculation as to any difference of meaning between the above word and the briefer (masc.) form מֶרְכָּב, *merkab'*, which occurs in three passages only. In 1 Kings v, 6, the latter obviously means chariots, taken collectively. But in Lev. xv, 9 (Auth. Vers. "saddle"), and Cant. iii, 10 ("the covering"), it has been understood by some to denote the seat of a chariot. To this view there is the fatal objection that ancient chariots had no seats. It appears to denote the seat of a litter (the only vehicle that had a seat), and its name *merkab* may have been derived from the general resemblance of the body of a litter (distinguished from the canopy, etc.), both in form and use, to that of a chariot. Another still simpler form, the word רֶכֶב, *re'keb* (with the analogous forms רִכְבָּה, *rikbah'*, Ezek. xxvii, 20, and רְכוּב, *rekob'*, Psa. civ, 3), from the same root, appears to signify a carriage of any kind, and is especially used with reference to large bodies of carriages, and hence most generally of war-chariots; for chariots were anciently seldom seen together in large numbers except in war. It is applied to the war-chariots of the Egyptians (Exod. xiv, 9), the Canaanites (Josh. xvii, 18; Judg. i, 19; iv, 3), the Hebrews (2 Kings ix, 21, 24; x, 16), the Syrians (2 Kings v, 9), the Persians (Isa. xxi, 7, 9). To this corresponds the ῥέδη of Rev. xviii, 13; the Latin *rheda*, a carriage with four wheels, an improvement of later times. By a comparison of these references with those passages in which *merkabah* occurs, we find the two words applied to all sorts of carriages indifferently and interchangeably, just as we should say either "carriage" or "coach"—neither of which is specific, and both of which differ more from each other than the Hebrew words in question—to denote the same vehicle. Indeed, there are passages in which both words are manifestly applied to the same identical vehicle, as in 2 Kings v, 9, 21, and 1 Kings xxii, 35, 38, where some have endeavored to make out a difference between the Heb. terms. There is another word once rendered chariot, viz. עֲגָלָה (*agalah'*, Psa. xlvi, 9), but it denotes a *plaustrum*, cart, or wagon drawn by oxen. See CART. The only other words rendered "chariot" in the Bible are אַפִּרְיוֹן (*appiryon'*, Cant. iii, 9), which the etymol., as well as the rendering in the Sept. and Vulg., shows to have been a portable sedan or *palanquin* [see LITTER], and הֹצֶן, (*ho'tsen*, only in Ezek. xxiii, 24), which, according to etymology and the Rabbins, means *weapons* or defensive armor. It is demonstrated that the word *rekeb*, rendered "horsemen," does not mean "cavalry," but merely riders *in* the chariots—in other words, chariot-warriors; for Exod. xiv, 7, which gives the first account of the Egyptian army, says, "he took six hundred chosen chariots, and all the chariots of Egypt, and captains over every one of them" (or in each). The "horsemen" in verse 9 and the subsequent verses means literally "riders," not *upon* the horses, but *in* the chariots. Hence, though Moses's song of triumph mentions the "horse and his rider" (Exod. xv, 1), yet ver. 4 clearly indicates that by rider chariot-rider is understood: "Pharaoh's chariots and his host hath he cast into the sea; his chosen captains also (chariot-warriors) are drowned in the Red Sea." See HORSE.

Ancient Egyptian War Car and Horses, designed from a comparison of different Monuments.

The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xli, 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xlvi, 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honor (l, 9). The next mention of Egyptian chariots is for a warlike purpose (Exod. xiv, 7). In this point of view chariots among some nations of antiquity, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. Thus Pharaoh, in pursuing Israel, took with him 600 chariots. The Canaanites of the valleys of Palestine were enabled to resist the Israelites successfully in consequence of the number of their chariots of iron, i. e. perhaps armed with iron scythes (Josh. xvii, 18; Judg. i, 19; see Schickendanz, *De curribus falcatis*, Zerbst. 1754). Jabin, king of Canaan, had 900 chariots (Judg. iv, 3). The Philistines in Saul's time had 30,000, a number which seems excessive (1 Sam. xiii, 5; but comp. the Sept. and Joseph. *Ant.* vi, 6, 1). David took from Hadadezer, king of Zobah, 1000 chariots (2 Sam. viii, 4), and from the Syrians a little later 700 (x, 18), who, in order to recover their ground, collected 32,000 chariots (1 Chron. xix, 7). Up to this time the Israelites possessed few or no chariots, partly, no doubt, in consequence of the theocratic prohibition against multiplying horses, for fear of intercourse with Egypt, and the regal despotism implied in the possession of them (Deut. xvii, 16; 1 Sam. viii, 11, 12). But to some extent David (2 Sam. viii, 4), and in a much greater degree Solomon, broke through the prohibition from seeing the necessity of placing his kingdom, under its altered circumstances, on a footing of military equality or superiority toward other nations. He raised, therefore, and maintained a force of 1400 chariots (1 Kings x, 25) by taxation on certain cities, agreeably to Eastern custom in such matters (1 Kings ix, 19; x, 25; Xenoph. *Anab.* i, 4, 9). The chariots themselves, and also the horses, were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 Kings x, 29). See SHEKEL. From this time chariots were regarded as among the most important arms of war, though the supplies of them and of horses appear to have been still drawn from Egypt (1 Kings xxii, 34; 2 Kings ix, 16. 21; xiii, 7, 14; xviii, 24; xxiii, 30; Isa. xxxi, 1). The prophets also allude frequently to chariots as typical of power (Psa. xx, 7; civ, 3; Jer. li, 21; Zech. vi, 1). Chariots of other nations are likewise mentioned, as of Assyria (2 Kings xix, 23; Ezek. xxiii, 24), Syria (2 Sam. viii, and 2 Kings vi, 14, 15), Persia (Isa. xxii, 6); and, lastly, Antiochus Eupator is said to have had 300 chariots armed with scythes (2 Macc. xiii, 2). In the N. T. the only mention made of a chariot, except in Rev. ix, 9, is in the case of the Ethiopian or Abyssinian eunuch of Queen Candace, who is described as sitting in his chariot reading (Acts viii, 28, 29, 38). See RIDER.

Jewish chariots were no doubt imitated from Egyptian models, if not actually imported from Egypt. These appear to have come into use not earlier than the 18th dynasty (B.C. 1530). The war-chariot, from which the chariot used in peace did not essentially differ, was extremely simple in its construction. It consisted, as appears both from Egyptian paintings and reliefs, as well as from an actual specimen preserved at Florence, of a nearly semicircular wooden frame with

straightened sides, resting posteriorly on the axle-tree of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leathern thongs and one wooden upright in front. The floor of the car was made of rope net-work, intended to give a more springy footing to the occupants. The car was mounted from the back, which was open, and the sides were strengthened and ornamented with leather and metal binding.

Ancient Egyptian Chariot of War, with Bow-cases and complete Furniture, except the Yoke.

Attached to the off or right-hand side, and crossing each other diagonally, were the bow-case, and inclining backwards, the quiver and spear-case. If two persons were in the chariot a second bow-case was added. The wheels, of which there were 2, had 6 spokes: those of peace chariots had sometimes 4, fastened to the axle by a linch-pin secured by a thong. There were no traces; but the horses, which were often of different colors, wore only a breast-band and girths, which were attached to the saddle, together with head furniture, consisting of cheek-pieces, throat-lash, head-stall, and straps across the forehead and nose. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving-reins passed through other rings on each side of both horses. From the central point of the saddle rose a short stem of metal, ending in a knob, whether for use or mere ornament is not certain. The driver stood on the off side, and in discharging his arrow hung his whip from the wrist. In some instances the king is represented alone in his chariot, with the reins fastened round his body, thus using his weapons with his hands at liberty. Most commonly two persons, and sometimes three, rode in the chariot, of whom the third was employed to carry the state umbrella (2 Kings ix, 20, 24; 1 Kings xxii, 34; Acts viii, 38). A second chariot usually accompanied the king to battle, to be used in case of necessity (2 Chron. xxxv, 34).

On peaceable occasions the Egyptian gentleman sometimes drove alone in his chariot, attended by servants on foot. The horses wore housings to protect them from heat and insects. For royal personages and women of rank, an umbrella was carried by a bearer or fixed upright in the chariot. Sometimes mules were driven instead of horses, and in travelling sometimes oxen; but for travelling purposes the sides of the chariot appear to have been closed. One instance occurs of a 4-wheeled car, which (like the τετράκυκλος ἅμαξα of Herod. ii, 63) was used for religious purposes. See CART. The processes of manufacture of chariots and harness are fully illustrated by existing sculptures, in which also are represented the chariots used by neighboring nations (Wilkinson, *Anc. Egypt.* i, 368, 386; ii, 75, 76, 2d ed.).

Ancient Egyptian Chariot-makers.

Fig. 1, Sawing out the Axle; 2, Preparing the bent pieces of Wood, *a*, *b*; 3, 4, Shaping the Pole, *d*; *c*, *c*, Wheels.

The earliest Egyptian chariot noticed in Scripture (Gen. xli, 43) was doubtless a state-chariot; but, among the Egyptians, it does not appear to have been different from the war-chariot, the splendid military appointments of which rendered it fit for purposes of royal pomp. Hence, although the same word (מֶרְכָּבָה, *merkabah*) is again used for chariots of state in Gen. xlvi, 29; 1 Sam. viii, 11; 2 Sam. xv, 1, it undoubtedly denotes a war-chariot in Exod. xv, 4; Joel ii, 5. In Isa. ii, 7, the same word appears to comprehend chariots of every kind which were found in cities. In fact, chariots anciently in the East were used almost entirely for purposes of state or of war, being very rarely employed by private persons. We also observe that where private carriages were known, as in Egypt, they were of the same shape as those used in war, only having less complete military accoutrements, although retaining the case for arrows. One of the most interesting of the Egyptian paintings represents a person of quality arriving late at an entertainment in his curricle, drawn (like all the Egyptian chariots) by two horses (one hidden by the other in profile). He is attended by a number of running footmen, one of whom hastens forward to knock at the door of the house, another advances to take the reins, a third bears a stool to assist his master in alighting, and most of them carry their sandals in their hands, that they may run with the more ease. This conveys a lively illustration of such passages as 1 Sam. viii, 11; 2 Sam. xv, 1. The principal distinction between these private chariots and those actually used in war was, as appears from the monuments, that in the former the party drove himself, whereas in war the chariot, as among the Greeks, often contained a second person to drive it, that the warrior might be at liberty to employ his weapons with the more effect. But this was not always the case; for in the Egyptian monuments we often see even royal personages alone in their chariots, warring furiously, with the reins lashed round their waist. So it appears that Jehu (who certainly rode in a war-chariot) drove himself, for his peculiar style of driving was recognised at a considerable distance (2 Kings ix, 20). The Egyptians used horses in the equipment of an armed force before Jacob and his sons had settled in Goshen; they had chariots of war, and mounted asses and mules, and

Ancient Egyptian Curricle.

Ancient Egyptian Chariot in Battle.

therefore could not be ignorant of the art of riding; but for ages after that period Arab nations rode on the bare back, and guided the animals with a wand. Others, and probably the shepherd invaders, noosed a single rope in a slip-knot round the lower jaw, forming an imperfect bridle with only one rein; a practice still in vogue among the Bedouins. Thus cavalry were but little formidable, compared with chariots, until a complete command over the horse was obtained by the discovery of a true bridle. This seems to have been first introduced by chariot-drivers, and there are figures of well-constructed harness, reins, and mouth-pieces in very early Egyptian monuments, representing both native and foreign chariots of war. In fighting from chariots great dexterity was shown by the warrior, not only in handling his weapons, but also in stepping out upon the pole to the horses' shoulders, in order the better to attain his enemies; and the charioteer was an important person, sometimes equal in rank to the warrior himself. Both the kingdoms of Judah and Israel had war-chariots, and, from the case of king Josiah at the battle of Megiddo, it is clear they had also travelling vehicles, for, being wounded, he quitted his fighting-chariot, and in a second, evidently more commodious, he was brought to Jerusalem (2 Chron. xxxv, 24). Chariots of war continued to be used in Syria in the time of the Maccabees (2 Macc. xiii, 5), and in Britain when Cæsar invaded the island (*Bell. Gall.* iv, 29).

In the prophecy of Nahum, who was of the first captivity, and resident (if not born) at Elkosh in Assyria, there is much allusion to chariots, suggested doubtless by their frequency before his eyes in the streets of Nineveh and throughout the Assyrian empire. In fact, when prophesying the downfall of Nineveh, he gives a particular and animated description (ii, 34) of their action in the streets of the great city:

> The shield of his heroes is reddened,
> The men of prowess are crimsoned [in dress]:
> With the fire of irons [flashing steel armatures] is the chariot in the day of his array,
> And the cypresses [lances] are brandished;
> In the streets will madden the chariot-force,
> They will race in the broad places;
> Their appearance is as the torches,
> As the lightnings will they rush.

Abundant illustrations of this passage occur on the recently discovered sculptures of Nineveh and Babylon. They are minutely described by Layard (*Nineveh*, ii, 268 sq.). The earlier Assyrian war-chariot and harness did not differ essentially from the Egyptian. Two or three persons stood in the car, but the driver is sometimes represented as standing on the near side, while a third warrior in the chariot held a shield to protect the archer in discharging his arrow. The car appears to have had closed sides. The war-chariot wheels had 6 spokes; the state or peace chariot 8 or more; and a third person in state processions carried the royal umbrella. A third horse, like the Greek παρήορος, was generally attached (Layard, *Nineveh*, ii, 350). In later times the third horse was laid aside, the wheels were made higher, and had 8 spokes, and the front of the car, to which the quiver was removed from its

Ancient Assyrian Warriors in a Chariot.

former side position, was made square instead of round. The cars were more highly ornamented, panelled, and inlaid with valuable woods and metals, and painted. The embroidered housings, in which in earlier times the horses were clothed, were laid aside, and plumes

Royal Chariot. From the later Assyrian Monuments.

and tassels used to decorate their necks and foreheads (Layard, *Nineveh*, ii, 353, 356; *Nineveh and Babylon*, p. 341, 587, 603, 618; *Mon. of Nin.* 2d series, pl. 24; comp. Ezek. xxvii, 20). Chariots used for other purposes than that of war, especially in hunting, were

Ancient Assyrian Chariot for the Chase.

also found sculptured on the Assyrian monuments, as well as occasionally carts for the transportation of persons or baggage.

The Persian art, as appears from the sculptures at Persepolis, and also at Koyounjik, shows great similarity to the Assyrian; but the procession represented at the former place contains a chariot or car with wheels of 12 spokes, while, from the sculptures at the latter, it appears that the Elamites, or Persians, besides chariots

Ancient Persian Chariot.

containing two persons, which were sometimes drawn by four horses, used a kind of cart, drawn by a single mule or more, consisting of a stage on high wheels, capable of holding five or six persons, of whom the driver sat on a low stool, with his legs hanging on each side of the pole (Isa. xxii, 6; Ezek. xxiii, 24; see Xenoph. *Cyrop.* iv, 3, 1; ii, 22; Niebuhr, *Voyage*, ii, 105; Chardin, *Voyage*, vii, 257, pl. lix; Layard, *Nin. & Bab.* p. 447, 449; Olearius, *Travels*, p. 302). Chariots armed with scythes (*ἅρματα δρεπανηφόρα*, Xen. *Anab.* i, 7, 10) may perhaps be intended by the "chariots of iron" of the Canaanites; they are mentioned as part of the equipment of Antiochus (2 Macc. xiii, 2), and of Darius (Diod. Sic. xvii, 53; Appian, *Syr.* 32). Xenophon mentions a Persian chariot with 4 poles and 8 horses (*Cyrop.* vi, 4). The Persian custom of sacrificing horses to the Sun (Xen. *Cyrop.* viii, 3, 12), seems to have led to offerings of chariots and horses for the same object among the Jewish monarchs who fell into idolatry (Ezek. viii, 17; 2 Kings xxii, 11; see P. della Valle, p. 255). See WAGON.

Not very different from the Persian chariot is one represented on a coin found at Babylon, but somewhat ruder; but the spokes of the wheels are eight, as in the Assyrian chariot. This coin has given occasion to much unsound speculation in the attempt to connect it with the history of Daniel. See BABYLON.

Ancient Babylonian Chariot.

Ancient Greek Chariot.

Among the Greeks and Romans, chariots were used at all times for purposes of war, and the chariot-races of the "Isthmian Games" were especially famous (see Smith's *Dict. of Class. Antiquity*, s. v. Currus). See CHARIOT-RACE.

Ancient Roman Chariot.

Among the parts of wheel-carriages mentioned in the Scriptures are: 1, the *wheel*, אוֹפָן (*ophan'*, Exod. xiv, 25, etc.); also גִּלְגַּל (*gilgal'*, Isa. xxviii, 28) or גַּלְגַּל (*galgal'*, Isa. v, 28; Ezek. x, 2, 6; xxiii, 24; xxvi, 10; id. Chald. Dan. vii, 9); 2, the *rim*, גַּב (*gab*, 1 Kings vii, 33; Ezek. i, 18); 3, the *spokes*, חִשֻּׁקִים (*chishshukim'*, 1 Kings vi, 33); 4, the *hub*, חִשֻּׁרִים (*chishshurim'*, 1 Kings vii, 33); 5, the *axle*, יָד (*yad*, 1 Kings vii, 32, 33). To *harness* (yoke) the horses or other animals is designated by אָסַר (*asar'*, Gen. xli, 29; 1 Sam. vi, 7; 1 Kings xviii, 14), or רָתַם (*ratham'*, Mic. i, 13); also רָכַב (*rakab'*, Hos. x, 11), which properly signifies to *ride* or *drive*. See WHEEL.

The word chariots is sometimes used figuratively for hosts or armies (Psa. lxviii, 17; 2 Kings vi, 17); and Elijah, by his prayers and counsels, and power with God, was "the chariot of Israel, and the horsemen thereof" (2 Kings ii, 12; see Rosh, *De curru Israelis*, Bautz. 1780), inasmuch as he did more for them than all the chariots they could muster (Psa. xx, 7; Isa. iii, 1). See WAR.

The term "chariot" is likewise used poetically in Scripture to designate the rapid agencies of God in nature (Psa. civ, 3; lxviii, 17; Isa. lxvi, 15; Hab. iii, 8).

CAPTAINS OF CHARIOTS (Exod. xv, 4) might be supposed to denote the officer or officers who had charge of the chariot forces, but the literal meaning is mounted *third* men (שָׁלִשִׁים). This passage seems obscure, but a picture from an Egyptian tomb (the Rameseium of Thebes), nearly or quite as ancient as the period to which the above-cited passage relates, furnishes a key to this otherwise difficult expression. It represents three men standing upon a chariot, two of whom are prepared for action, and the third manages the horses (compare the large cut above of the Assyrian chariot). They were probably selected for their valor, and perhaps formed by themselves a distinct division of the army, and each had its distinct officer (Exod. xiv, 7). See CAPTAINS.

Ancient Egyptian Chariot carrying three Warriors.

CHARIOT OF THE CHERUBIM probably means the frame-work on which the cherubim rested, and one pattern of which might resemble the body of a chariot (1 Chron. xxviii, 18). See CHERUB.

CHARIOT-CITIES, cities specially designated for storing the chariots of war during the time of peace, as magazines and arsenals of modern times are used (2 Chron. i, 14). See CITY.

CHARIOT-HORSES, such as were peculiarly fitted, by size, spirit, docility, or special training, for service in chariots, as carriage, draught, and saddle horses of later days (2 Kings vii, 14). See HORSE.

CHARIOT-MAN, the driver or charioteer, or perhaps an officer who had charge of the chariot (2 Chron. xviii, 33). See DRIVER.

CHARIOTS OF WAR (Exod. xiv, 7; 2 Sam. viii, 4). One class of carriages thus denominated were used as the common vehicles of princes and generals; but another formed the most terrible of military engines, and were employed in great numbers to break the enemy's battalions by rushing in among them (1 Sam. xiii, 5; 1 Chron. xviii, 4). Like other ancient carriages, they had usually only two wheels; and iron hooks or scythes, strong and sharp, were affixed to the extremities of the axles on each side, which made dreadful havoc among the troops (Josh. xi, 4 Judg. iv, 3, 13). War-

riors sometimes fought standing on them, or leaping from them upon the enemy. The chariots in the army of Cyrus were capacious enough to permit twenty men to fight from them. If we examine the sculptures of Egypt, we find that the strength of the armies of the Pharaohs was in their chariots, an Egyptian army being composed exclusively of infantry and bigas, or two-horsed chariots, which carry the driver and the warrior. In no instance is an Egyptian ever represented on horseback. Such palpable evidence that the Egyptians did not employ cavalry is difficult to reconcile with the Scripture account of the pursuit of the Israelites, which expressly speaks of "the horses and chariots of Pharaoh, and his horsemen" (Exod. xiv, 9). Hengstenberg, after a critical examination of the text, says, in his *Egypt and the Books of Moses* (p. 126), that "Moses does not mention cavalry at all; that, according to him, the Egyptian army is composed only of chariots of war, and that he therefore agrees in a wonderful manner with the native Egyptian monuments." See ARMY; CHARIOT.

CHARIOTS OF THE SUN. The ancient Persians who worshipped the sun dedicated to that luminary certain horses and chariots, which, in allusion to his rapid course, they consecrated to him. The kings of Judah fell into this peculiar idolatry. In these chariots, the Rabbins informs us, the king and nobles rode when they went forth to meet the morning sun. The idolatrous chariots of the sun were burnt by king Josiah (2 Kings xxiii, 11). See SUN.

In the narrative of the translation of Elijah (2 Kings ii, 11), it is said "there appeared a chariot of fire, and horses of fire," and a corrupt tradition of this miraculous ascension seems to have been preserved in the East. Mr. Roberts says, "The Hindoos believe their supreme god Siva sends his angels with a green chariot, to fetch the souls of those who are devoted to him; and there are occasionally horses, but at other times none. The holy king *Tirru-Sangu* (divine chank) was taken to heaven, body and soul, without the pain of dying."

CHARIOT-RACE, the most renowned of all the exercises used in the Olympic games of the ancient Greeks and Romans, and those from which the victors were held to derive the greatest honor. There appear to be but one or two allusions to them in the New Testament, and these are involved in some uncertainty. In Cor. xvi, 9, the apostle refers to his great success in collecting a church at Ephesus: "But I will tarry at Ephesus until Pentecost, for a great door and effectual is opened unto me, and there are many adversaries;" alluding, it is thought, to the door of the circus, which was opened to admit the chariots when the races were to be in; and by the word ἀντικείμενοι, "adversaries," which Doddridge renders "opposers," he is supposed to mean antagonists or competitors. In Colos. iii, 15, he says, "Let the peace of God *rule* (βραβεύω, preside, as the arbiters or judges of the games) in your hearts;" 2 Thess. iii, 1, "that the word of the Lord may have free course (τρέχω, *run*), and be glorified," referring, as it seems, to the applause of the spectators; 1 Tim. iv, 8, "Bodily *exercise* (γυμνασία, gymnastic discipline) profiteth little," alluding to the training of the racers; Heb. xii, 23, "the general assembly" (πανήγυρις, crowd of attendants). See GAMES.

Charisma (χάρισμα), (1.) one of the names by which baptism was designated in the early Church; (2.) a spiritual gift. See GIFTS, SPIRITUAL.

Charity, one of the three chief Christian graces. The Greek word ἀγάπη, frequently rendered in the authorized version *love*, is occasionally translated *charity*, and is so rendered throughout 1 Cor. xiii. The old English word *charity* means *love*—love to God and man, which is the fulfilling of the law. Perhaps it would have been better had the word been rendered "love." The meaning of the term can, however, scarcely be misapprehended after a careful perusal of that important chapter. In popular usage, charity is often restricted to *almsgiving*, which is only one of its manifestations. See LOVE. Christian ethics teach that charity, in this sense of love, is to be the habitual affection of the heart, in all our relations to our fellow-creatures. Charity considered, 1. As to its *source*, implies a regenerated state of mind. 2. As to its *exclusiveness*, shuts out all, 1, anger; 2, implacability; 3, revenge; 4, prejudice; 5, evil speaking; 6, petty aggressions, though legal; 7, artificial distinctions, as its limitations. 3. As to its *active expression;* (1) it delights in sympathy, liberality, and, in general, in benevolence; (2) it dictates and regulates *works of mercy;* (3) it teaches us that we are only *stewards* of the divine goodness.

"All spiritual gifts are surpassed by charity, which alone puts on them the crown of perfection (1 Cor. xii, 31–xiii, 13). By this we are to understand not a mere inclination and emotion, however pure, or natural benevolence and philanthropy, however disinterested; but a disposition wrought by the Holy Ghost, springing from the consciousness of reconciliation; a vital supernatural energy, uniting all the powers of the soul with God, the essence of all love, and consecrating them to the service of his kingdom. Without this, even speaking with the tongues of angels were but 'sounding brass or a tinkling cymbal.' Without this, the boldest prophecy, the most comprehensive knowledge, and a power of faith which could call the impossible into being, have no abiding worth or practical importance. Without this, the other gifts would separate, pass into the service of ambition, and thus ruin themselves and the whole church. Without this, the gift of tongues fosters vanity and enthusiasm, knowledge puffs up (1 Cor. viii, 1-3), and the gift of government degenerates to despotism. As faith lies at the bottom of all the charisms, and forms their common root, so also love is properly not a gift by itself, but the soul of all gifts, binding them together like the members of a body, making them work in for each other, and directing them to the common good. It maintains the unity of the manifold divine powers, subordinates every thing individual and personal to the general, and makes it subservient to the interests of the body of Christ.

"For another reason, love transcends all the other gifts. It never ceases. In the future world the other gifts will disappear, at least in their present nature. The mysterious tongues will cease in the land, where all understand them. Prophecies will be lost in their fulfilment, like the aurora in the moon. Knowledge, which on earth is but partial, will merge in immediate, perfect intuition. Nay, faith itself will be exchanged for sight, and hope for fruition. But love, by which even here we have fellowship of life with God through Christ, remains love. It changes not. It rises not out of its element. It passes not into another sphere. It only deepens and expands. It can never gain higher grounds, never reach another and better form of union with God; but only continues to grow stronger, fuller, more lively, and more blissful (1 Cor. xiii, 8–13). 'Charity,' says Bishop Warburton somewhere, 'regulates and perfects all the other virtues, and is in itself in no want of a reformer.'

"Hence Paul exhorts the Corinthians, who were inclined to place an undue estimate on the more striking and showy charisms, to strive after charity, above all, as the greatest and most precious gift, the cardinal and universal Christian virtue, of which heathenism had scarce the faintest notion. 'Heathenism,' observes Olshausen (*Comment*. iii, p. 698), 'did not get beyond ἔρως. It knew nothing of the Christian ἀγάπη. In the Old Testament nothing but the stern δίκη reigns. Eros, even in its purest, noblest form, is but the result of want, the longing for love, springing from the consciousness that we have not what is worth loving.

But the Christian ἀγάπη is the streaming forth of positive love, God himself dwelling in the believer, so that streams of living water flow out of him (John iv, 14).' And he commends it, in the most glowing and attractive description ever uttered by tongue of man or angel, in language which comes to the heart with perpetual freshness, like music from the bowers of eternity, and is of itself enough to put beyond all doubt the divinity of Christianity and its infinite superiority to all other religions. 'And now (in the present earthly life of Christians) abideth faith, hope, charity, these three; but the greatest of these is charity'" (Schaff, *Apostolical Church*, § 120). See also Watson, *Theol. Institutes*, pt. iii, ch. iv; Fellowes, *Body of Theology*, ii, 64, etc.; Barrow, *Works*, vol. i, ser. 27, 28; Fletcher, *Works* (N.Y. ed.), iii, 156 sq.

Charity, Brothers of (called, in Italy, *Fate ben fratelli;* in France, *Frères de la Charité;* in Spain, *Brothers of Hospitality*), a Romanist order, founded in 1540 at Seville, by the Portuguese Johannes a Deo, for nursing the sick and reforming immoral females. In 1572 Pope Pius V confirmed it, under the rule of St. Augustine, and it then limited itself to serving hospitals for the sick of all nations and religions. In 1580 it had a number of institutions in France, Italy, Germany, Poland, both Indies, and other countries. In 1617 it was received into the number of regular orders by adopting the solemn vows. In 1619 the brethren were exempted from the jurisdiction of the diocesan bishops, and in 1624 they received all the privileges of the mendicant orders. Among the hospitals of the order, those of Milan, Paris, Rome, Naples, Vienna, Prague, are especially celebrated. The number of houses amounts at present to over a hundred, in Italy, France, Spain, Austria, Prussia, Bavaria, and North and South America. See Helyot, *Ordres Religieux*, vol. ii; Fehr, *Geschichte der Mönchsorden*, ii, 80 sq.

Charity, Sisters of, called also DAUGHTERS OF CHRISTIAN CHARITY (*Sœurs* or *Filles de la Charité*), or, from their dress, GRAY SISTERS (*Sœurs grises*), a community of women in the Roman Catholic Church for nursing the poor and the sick, founded in 1629 at Chatillon, in France, by Vincent de Paul, aided by Madame Louise de Marillac le Gras. The rule which Vincent gave to his community was confirmed by the pope in 1668, whereupon the community spread so rapidly that by 1685 two hundred and twenty-four houses were established. Until the end of the eighteenth century they remained almost entirely confined to France, where their labors were interrupted by the Revolution. After a few years they were permitted to take them up again, and in 1807 they were placed under the protection of the mother of Napoleon. Since that time they have enjoyed the patronage of all French governments. In 1827 they nursed in France 145,000 sick persons and 120,000 children, which number has since considerably increased. Since 1815 they have rapidly established themselves in all states in which monastic orders are not forbidden. Several states, as Prussia and Baden, which exclude most of the monastic orders, have made an exception in favor of the Sisters of Charity. Since 1848 they have been admitted into all the German states except Saxony. In all Germany they had, in 1858, establishments in 194 places, with about 2000 members. Spain promised to admit them in the Concordat of 1851. They established themselves in Portugal in 1857, but were there, as also in Brazil, severely attacked by the Liberal party, and mobbed by the populace. Large numbers of them were called to Russia by the government of Alexander II, and they have penetrated even into Denmark and Sweden. In Turkey they conduct several largely-attended schools. They are also found in many of the missions of Asia, Africa, and Australia, and in several of the states of Central and South America. In the United States they were established in 1809 by *Elizabeth Seton* (a pervert from Protestantism), with a distinct rule, which is still followed in the dioceses of New York, Brooklyn, Newark, and Halifax. The houses in the other dioceses have abandoned Mrs. Seton's rule, and have united with the French order. In 1852 there were 88 houses under the charge of the sisters in different parts of the United States, and the number of sisters was 420. This number has since considerably increased. In the diocese of New York alone there are now about 250 sisters, having under their care, besides the parish schools in the city of New York, a hospital, a male and female asylum, and an industrial school. Their mother-house is at Fonthill, on the Hudson River, near Yonkers.

Sister of Charity.

Numerous other communities of women have been established on the same plan, and on nearly the same rule. The most important among them is the congregation of St. Carolus Borromæus, so called because they chose Borromeo as their patron. Their mother-house is at Nancy, France; and in 1845 they counted 70 houses, with about 700 members. Another was founded in 1808 in Westphalia, by baron Droste zu Vischering, who became afterwards archbishop of Cologne. It counted, in 1858, 41 establishments, with about 200 sisters. The United States have also a number of similar institutions, as Sisters of Charity of Montreal, Sisters of Charity of Nazareth, Sisters of our Lady of Mercy, Sisters of Mercy, Sisters of Charity of the Blessed Virgin, Sisters of Charity of St. Augustine, most of which have been founded during the present century.

No monastic institution has spread since the beginning of the present century with equal rapidity, and the increase is still going on in nearly every part of the world. In 1862, the number of establishments, as far as known, was 1064; namely, 947 in Europe, 80 in America, 17 in Asia, 17 in Africa, and 3 in Australia and Oceanica (P. Karl vom heil. Aloys, *Statis. Jahrbuch der Kirche*, Ratisbon, 1862). The number of members of the French order was estimated at 13,000, and that of all the Sisters of Charity at 28,000.

"Conscious that celibacy alone excites little admiration in modern times, Rome has sought, by her 'Sisters of Charity' and by her educational orders, to give her female aristocracy better claims on the gratitude of mankind. In England and America the female orders have attracted many to the Church of Rome, and softened many antipathies. The association of unmarried females for such purposes will ever have an attraction for romantic minds; yet the well-worked Protestant congregations in our cities send out more such sisters of charity and educators of the young than any of the sisterhoods of Rome. Without any bond but the law of love, and 'without observation,' because without the dress and separation of Rome's 'Sisters of Charity,' thousands now do the part of Priscilla or Dorcas, yet take part in all home duties and enjoyments, unconscious that they are better than others, or that they have attained a higher perfection than their fathers and mothers" (Lewis, *Bible, Missal, and Breviary*, i, 124). See also Fehr, *Geschichte der Mönchsorden*, ii, 3 8 sq.; Eremites, *Der Orden der barmherzigen Schwestern* (Schaffhausen, 1844); *Methodist Quarterly Review*, Jan. 1849, art. v.

Charlemagne (CHARLES I, or *the Great*), Emperor of the West, was born at Salzburg, in Bavaria, about 742, and, jointly with his brother Karloman, succeeded his father, Pepin-le-Bref, in 768. Karloman died in 771, and Charles became sole sovereign. By his wars against the Saxons, the Lombards, and the Saracens of Spain, he increased his empire until he was master of the best part of Europe. Pepin had granted the exarchate of Ravenna to the pope and his successors forever. After Pepin's death, Diedrich, the Lombard king, attacked the pope (Adrian I), who applied to Charlemagne for aid. He crossed the Alps (A.D. 774) with a formidable army, and terminated the contest between the bishops of Rome and the kings of Lombardy forever. The exarchate of Ravenna was overthrown, its vanquished prince was sent into France, and Charlemagne proclaimed himself king of the Lombards. The conqueror visited Rome, where it is said he not only confirmed the grants which Pepin had made to its bishops, but added to them new donations. By these acts he opened a way to the attainment of an object which Pepin had contemplated, but was unable to accomplish—he was enabled to gain the authority as well as to assume the title of Emperor of the West. In A.D. 800 he visited Rome, where Pope Leo III crowned him Emperor of the West, with the title of Carolus I, Cæsar Augustus. "Although this added nothing directly to his power, yet it greatly confirmed and increased the respect entertained for him, such was still the lustre of a title with which were associated recollections of all the greatness of the Roman empire. Nicephorus I, emperor of Constantinople, also acknowledged him, and between them they fixed the limits of the Eastern and Western empires. A profound statesman and legislator, as well as a successful conqueror, he then devoted the remainder of his life to the internal improvement of his vast empire, and to the fortification of its frontiers against the invasions of the Normans and Danes. In 813 he named his third son, Louis (Louis le Débonnaire), his colleague in the empire, and died at Aix-la-Chapelle January 28, 814. "His last days, after the coronation of his son Louis, were occupied in correcting the text of the four Evangelists, in which he was assisted by Greeks and Syrians. Charlemagne had long shown a great zeal for religion; he never failed, while his health permitted, to attend divine service daily, morning and evening. He took great care that the service should be conducted with decorum and propriety, supplied his chapels with abundance of vestments and ornaments, and, being perfectly instructed in the best manner of reading and singing, he corrected the mode of performing both; but he himself never read publicly in church, but contented himself with singing in a low tone and with others. His alms were not only liberally bestowed in his own dominions, but on all the poor and distressed Christians in Syria, Egypt, Africa, Jerusalem, Alexandria, and Carthage; and he cultivated the friendship of unbelieving princes with a view to assuage the sufferings of the Christians under their dominion" (Palmer, *Church History*, ch. xv).

Denier of Charlemagne. Obverse: Figure of the Emperor, with the (Lat.) inscription, "Pope Leo to King Charles." Reverse: "St. Peter," and "Rome" in Monogram.

Charlemagne was throughout his reign the champion of Christianity. He never rested until the Saxons were not only subjected, but baptized, if not Christianized; his war against the Lombards, whose kingdom he finally annexed, was originally commenced at the instance of the pope, whose power was menaced by the inroads of these barbarians. It cannot be denied, however, that Charlemagne propagated Christianity by the use of "carnal weapons." His "wholesale and indiscriminate mode of administering baptism on the conclusion of his campaigns drew forth the indignant expostulations of Alcuin and men of a kindred spirit" (Mac Lear, *Missions in the Mid. Ages*, p. 449). "He did not confine his benefactions to the bishop of Rome, but distributed them among all the orders of the hierarchy. He augmented their wealth, he enlarged their privileges, he exalted their dignity, he confirmed and extended their immunities. But the motives of his liberality were such as became a magnanimous and a benevolent monarch. Superstition has never been accounted among them, nor any unfounded fears or undue reverence of the ecclesiastical order; from the former he was perhaps more nearly exempt than would have appeared possible in so rude an age; and in his transactions with the clergy, even with the pope himself, he never forgot, or allowed them to forget, his own supremacy. But he was desirous to civilize his barbarous subjects; he was anxious to influence their rude manners, and correct their vicious morals, by the more general diffusion and comprehension of the Christian truths; and he was willing also to sow the seeds of secular learning, and dispel the ignorance which oppressed his people" (Waddington, *Church History*, ch. v.). As a statesman he favored the Church because he considered it a school for the improvement of his people, and, while adding to the temporal power of the Church, was careful not to render it independent. He decided against image-worship, and in his *Libri Carolini* (A.D. 790, Elias Philyra, 1549; Heumann, Han. 1731), he set forth (in opposition to the decision of the second Synod of Nicæa of A.D. 787), that "God could be worshipped only in spirit," and his opinions were indorsed by the Synods of Frankfort (794) and of Paris (825), censuring Adrian's treatise in favor of image-worship. But, while Charlemagne condemned image-worship as idolatry, the Caroline books approve of the crucifix, and of reverence to the relics of saints, etc.—Hase, *Ch. History* (N. Y. ed.), p. 178; Chambers, *Encyclopædia*, s. v.; Herzog, *Real-Encyklopädie*, vii, 379 sq.; Gibbon, *Decline and Fall*, ch. xlix; Neander, *Church History*, iii, 285 sq.; *Studien u. Kritiken*, 1855, Heft 2; Dippold, *Leben Kaiser Karl des Grossen* (Tüb. 1810); Gaillard, *Hist. de Charlemagne* (Par. 1819, 2d ed. 4 vols.); Abel, *Jahrbücher des fränk. Reiches unter Karl dem Grossen* (Berlin, 1866, vol. i). See CAROLINE BOOKS.

Charles V, emperor of Germany and king of Spain (under the title of *Don Carlos I*), eldest son of Philip, archduke of Austria, and Joanna, second daughter of Ferdinand and Isabella of Spain, was born at Ghent, Feb. 24th, 1500, and died at the monastery of San Yuste, near Placencia, in Estramadura, Spain, Sept. 21st, 1558. His father died when he was only six years of age, and his grandfather Maximilian became his guardian, and placed him under the care of William de Crey, lord of Chièvres, as governor, and Adrian of Utrecht, afterwards Pope Adrian VI, as preceptor.

On the death of his grandfather Ferdinand, Charles, conjointly with his mother, was acknowledged as his successor, and visited Spain in 1517, where the conduct of his Flemish ministers gave rise to serious troubles. In the year 1519 his grandfather Maximilian died, and Charles became a competitor for the imperial crown. Through the efforts of Frederick the Wise, elector of Saxony and regent of the empire, he was chosen over Francis I of France, his principal rival, June 28th, 1519. This contest ripened the jealousy between these young and ambitious sovereigns into an enmity which gave rise to *four* wars, and ended only with the death of Francis.

Charles was crowned emperor with great pomp at Aix-la-Chapelle, Oct. 22, 1520. His first act was to issue a call for convoking a diet at Worms early the next year, especially to consider the means of suppressing the new religious ideas awakened by the teachings of Luther. This assembly was held April 17-26, 1521, and thither Luther repaired under a safe-conduct, and plead his cause; but an edict of outlawry was pronounced against him. See WORMS. The prudent action of his patron, Frederick of Saxony, in having him taken to the Wartburg, and the almost sovereign power of the German princes, saved the reformer and his cause from the impending danger; while the wars with France, 1521-6 and 1527-9 forced Charles to "leave the conduct of German affairs to the established authorities, who were not opposed to a reform of the Church, and who, instead of executing the edict of Worms, persisted in the demand for a general council 'to be held in a German city.'" At the Diet of Spires, 1526, a decree was signed by Charles's brother, Ferdinand, as his representative, which left to each state of Germany the right to regulate its religious affairs, which decree, according to Ranke, was the basis of the legal existence of Protestantism in Germany. At a second diet at Spires, in March, 1529, the Roman Catholic party, emboldened by the more favorable aspect of Charles's affairs abroad, sought to prevent the further progress of the Reformation by a decree "that the Church should remain in statu quo until the convocation of a council." This led to the celebrated *Protest* of the Lutheran princes, April 19, 1529, from which the name Protestant arose. This protest was not favorably received by Charles; but the fear of the Turks, who had laid siege to Vienna, compelled moderation on his part until their retreat, when the subject again came up at the Diet of Augsburg (1530). In accordance with the promise of Charles that each party should lay before this diet a statement in Latin and German of their opinions, the Reformers presented the *Augsburg Confession* (q. v.), drawn up by Melancthon, which was read June 25th, and produced so powerful an impression that many Roman Catholic princes inclined to a milder judgment of the new faith.

No statement was presented by the other party, but the emperor caused a refutation of the Lutheran Confession to be prepared, to which the Protestants replied in the *Apologia Confessionis*, also from the pen of Melancthon; but this failed to change the purpose of Charles, who, influenced by Campeggio, the papal legate, issued a decree, Nov. 19, 1530, condemning the Confession, and requiring its adherents to submit unconditionally, until a future general council, and to be reconciled to the Roman Catholic Church within seven months. The design of the emperor to force submission to his will in matters of religion was now evident, and, to protect themselves, the Protestant princes and states formed the "League of Smalcald," Feb. 27, 1531, and made treaties with France, England, and Denmark. Confronted by so formidable a coalition, and threatened with a new invasion of Austria by the Turks under Solyman, Charles was forced to grant the "Truce of Nuremberg," July 23, 1532, by which liberty of conscience was allowed until the assembling of a council.

The constant pressure of foreign enterprises, and the necessity of conciliation within the empire, to ward off outward dangers, postponed for some years the armed conflict between Charles and his Protestant subjects; and at the Diet of Spires, 1544, considerable concessions were made to them in order to secure their hearty support against the French. But when the war was ended, the Protestants saw plainly that Charles purposed to compel their submission to the decrees of the Council of Trent, then assembled by Paul III, and they prepared to defend their religious liberties by arms. Owing to the lack of energy and decision on the part of their leaders, and the skill of Maurice of Saxony, who took the side of Charles, they failed of success, and were totally defeated at Mühlberg.

Shortly before this, the death of Francis and Henry VIII had freed Charles from his most powerful external foes, and he might now hope, aided by the pope and the new order of the Jesuits, to compel religious unity in Germany. Accordingly, he convoked a diet at Augsburg with this view; but after he had with great difficulty induced the Protestants to accept conditionally the Council of Trent, the pope removed the council to Bologna, and would neither change the place nor make any concessions to the Protestants. This so irritated Charles that he caused a declaration to be drawn up by Pflug, Helding, and Agricola, called the *Interim* (q. v.), to serve as a rule of faith and practice until a free and general council—a plan which pleased neither party. But Charles was now too powerful for open resistance. Maurice of Saxony, however, began to form schemes for humbling him, and so well did he conceal his purposes, that he was even appointed to the command of the army intended to compel the refractory city of Magdeburg to receive the *Interim*. Having formed alliances with France and other powers, and provided for the support of his army, Maurice openly declared against Charles in March, 1552, and by his rapid and successful movements extorted from the emperor the treaty of Passau, Aug. 2, 1552, by which, together with the release of the captive princes, complete religious liberty was granted to the Protestants—terms subsequently confirmed by the Recess or Religious Peace of Augsburg, Sept. 21, 1555.

The star of Charles had now passed its zenith. The consuming cares of a life devoted to exciting and ambitious schemes, and the uncontrolled indulgence of an excessive appetite, not to say gluttony, had left their impress in failing powers and tormenting disease, and now that he saw his cherished hope of universal monarchy and an imperial throne for his son fading away, baffled and disappointed by Fortune, which he peevishly described as a woman who smiled on his youth, but forsook him in his age, he determined to throw off the prerogatives and responsibilities of power, and seek in retirement ease of mind and body. Accordingly, Oct. 25th, 1555, before an assembly of the estates of the Netherlands, convened at Brussels for that purpose, he resigned the crown of those provinces, and, Jan. 15, 1556, at the same place, in the presence of the grandees of Spain, the crown of Spain to his son Philip II; and on August 27, 1556, also the imperial crown, in favor of his brother Ferdinand. He set out, Sept. 17th, 1556, for his chosen retreat, the Hieronymite monastery of San Yuste, where, by his orders, separate buildings had been erected for himself and the few servants who accompanied him. Here he remained until his death, occupied in religious exercises, gardening, and mechanical experiments, without, as recent researches show, losing sight of the political and religious movements of the outer world.

He is described as possessing dignity and elegance of manner, slow in resolving, but prompt to execute, patient of every hardship but hunger, firm and self-possessed in danger, but without the warmth of genius or that noble directness of character which subordinates selfish aims to the higher claims of humanity and right. Though amiable in private life, his inhuman persecution of his Protestant subjects in the Netherlands, and his testamentary directions to his son, evince the feelings of a bigot and a tyrant; while his course towards the Reformation in Germany proves how readily his secret preferences were made to yield to the promptings of policy, when the furtherance of his ambitious plans demanded a show of moderation in dealing with the newly-awakened desire of the age for religious reform.—Herzog, *Real-Encyklopädie*, vii, 379 sq.; Hoefer, *Nouv. Biog. Générale*, ix, 269; Heine, *Briefe an Karl V, geschrieben von s. Beichtvater* (Berlin, 1848, 8vo); Sleidan, *De statu religionis, etc. Carolo V*

Leipz. 1862); Gachard, *Correspond. de Charles Quint* (Brussels, 1859). Special works on the life of Charles V after his abdication and retirement have been written by Stirling (*Cloister Life of the Emperor Charles the Fifth*, N. Y. 12mo), Gachard (*Retrait et Mort de Ch. V* (Brussels, 1854-55), Pichot (*Chronique de Charles V*, Paris, 1854), and Migne (*Charles Quint*, Paris, 1854).

Charles IX, second son of Henry II and of Catharine de Medici, was born at St. Germain-en-Laye June 27, 1550, and on December 5, 1560, succeeded his brother, Francis II. "His character was a compound of passion, acuteness, heartlessness, and cunning. Although only twenty-four years of age when he died, so well had his detestable mother trained him to a love of perfidy and cruelty, that he found time, with her assistance and that of the Guises, to perpetrate an act so hideously diabolical that all civilized Europe still shudders at the recollection. The massacre of St. Bartholomew's (q. v.), Aug. 24, 1572, was the culmination of a series of treacheries toward the Huguenots which disgraced his reign. The result was that civil war broke out anew, and assumed a very threatening character, as political malcontents associated themselves with the Protestants. Charles died May 30, 1574."—Chambers, *Encyclopædia*, s. v.; and a good article, with an account of the massacre of St. B., in the *English Cyclopædia*, s. v. Charles IX. See FRANCE, REFORMED CHURCH OF.

Charleton, WALTER, M.D., an English physician, was born Feb. 2, 1619, was educated at Magdalen Hall, Oxford, became an eminent practitioner in London, president of the College of Physicians in 1689, and died in 1707. He is mentioned here on account of his *Darkness of Atheism dispelled by the Light of Nature* (Lond. 1652, 4to); and *Harmony of Natural and Positive Divine Laws* (Lond. 1680, 8vo).—Darling, *Cyclopædia Bibliographica*, i, 637; Kippis, *Biographia Britannica*, iii, 448 sq.

Charm (לַחַשׁ, *lachash'*, to *whisper*, as enchanters). In Psa. lviii, 5; Jer. viii, 17; Eccles. x, 11 ("enchantment"), this word is used to express *serpent-charming*. In the first of these passages it occurs in connection with חֶבֶר (*che'ber*, strictly a *confederacy*, i. e. with spirits of the other world), which is rendered in the same manner, and has a similar meaning. In other passages, although still rendered "charm," both words, as is the case also with other terms, signify ordinary *necromancy* or conjuration. That the most venomous reptiles might be rendered tame and harmless by certain charms, or soft and sweet sounds, and trained to delight in music, was an opinion which prevailed very early and universally (see Bochart, *Hieroz.* I, iii, cap. 6). Virgil speaks of it particularly (*Æn.* vii, 750); so also Lucan (*Pharsalia*). See SERPENT. The most famous serpent-charmers of antiquity were the *Psylli*, a people of Cyrenaica; and that theirs was believed to be a natural power appears from the story told by Pliny, that they were accustomed to try the legitimacy of their new-born children by exposing them to the most cruel and venomous serpents, which dared not molest or even approach them unless they were illegitimate. He thinks their power resided in some peculiar odor in their persons which the serpents abhorred (*Nat. Hist.* lib. vii, c. 2). Shaw, Bruce, and indeed all travellers who have been in the Levant, speak of the charming of serpents as a thing frequently seen (see especially Thomson, *Land and Book*, ii, 216, 233). The much-dreaded *Cobra di Capello*, or *good Serpent* of the Hindoos, is capable of being tamed; and the Malabar jugglers have the art of teaching them to dance to the inharmonious and slow notes of their flageolet. The serpent first seems astonished, then begins to rear himself, and sometimes, by a gentle undulatory motion of the head, and with distended hood, seems to listen with pleasure to the notes. These dancing snakes are carried about in baskets by the jugglers all over India, and Mr. Forbes states it as a well-attested fact that when a house is infested with these snakes, and some others of the *Coluber* genus, which destroy poultry, or with some even of the larger serpents of the boa tribe, the musicians are sent for, who charm the reptiles from their hiding-places to their own destruction (*Oriental Memoirs*). It is often said that the charmer introduces his tame serpents, and that they obey the accustomed call, and are exhibited in proof of the triumph of the charmer's art. This may sometimes be the case, but instances are known in which there could not have been any collusion or contrivance; and, after the severest test and scrutiny, many have been obliged to rest in the conclusion that the charmers do really possess the physical means of discovering the presence of serpents without seeing them, and of attracting them from their lurking-places. This is Mr. Lane's conclusion, who also suspects that they discover the presence of serpents by the smell, and compares their attractive powers to those of the fowler, who, by the fascination of his voice, allures the bird into his net (*Modern Egyptians*). The deaf-adder or asp may either be a serpent of a species naturally deaf (for such kinds are mentioned by Avicenna as quoted by Bochart), or on account of its appearing to be so. In either case, in the language of poetry, it may be said to *stop its ear*, from its being proof against all the efforts of the charmer (*Un. Presb. Quart. Review*, July, 1860). See DIVINATION; MAGICIAN.

In modern usage the word *charm* (Lat. *carmen*, a *song*) denotes a spell, in a form of words, generally in verse, supposed to possess, when recited, some occult power, either hurtful or beneficial. When written on paper or parchment, and worn on the person, charms are to be classed with amulets (q. v.). See also INCANTATION; MAGIC.

Char'mis (Χαρμίς v. r. Χαλμίς; Vulg. *Charmi*), son of Melchiel, one of the three "ancients" (πρεσβύτεροι) or "rulers" (ἄρχοντες) of Bethulia (Judith vi, 15; viii, 10; x, 6). See BETHULIA.

Charnel-house (med. Lat. *carnarium*), a place in the neighborhood of a church-yard or other cemetery, usually vaulted, where the dry bones of the dead, which the grave-digger had thrown up, were carefully laid in order. Afterwards a chapel was built over it, wherein interment could be made, monuments erected, and masses (see CHANTRY) be sung. In this case the "charnel-house" was a vault under the chapel. The chapels of cathedrals sometimes had such charnel-houses under them.

Charnock, STEPHEN, D.D., an eminent English Nonconformist, was born in London in 1628. He received his earliest education from his father, and when very young he entered Emanuel College, Cambridge, under Dr. William Sancroft. He commenced his labors as a minister in Southwark, but soon obtained a fellowship in New College, Oxford, and in 1652 became senior proctor of the university. In 1663 he went to Dublin, and his ministry there was eminently successful. About 1660, ejected by the Act of Uniformity, he returned to England, and spent fifteen years in and about London in study and preaching, but without a settled congregation until about 1675. He died July 27, 1680. "His sermons constitute the chief of his works; and while on the *doctrines* they contain, being

decidedly Calvinistic, a variety of opinions are entertained, yet it is universally admitted that they are distinguished by great originality and genius, and are well deserving of the widely-spread attention they have so long received. His reasonings are nervous and his appeals affecting. His judgment was sound, his taste correct, his imagination lively, his piety undissembled. He was grave without being dull, and perspicuous without being wearisome. His *Treatise on the Attributes of God* is acknowledged to be the best in the English language" (Jones). His *Works* were republished in 1815 (Lond. 9 vols. 8vo), with a life prefixed, by Edward Parsons. There is an American edition of the *Attributes*, with a life of Charnock, by Symington (N. Y. 2 vols. 8vo), and a new edition of his *Works* is now going on at Edinburgh (Nichols), 1866, vols. i-v, 8vo. See Jones, *Christian Biography*, p. 106; Symington, *Choice Works of Charnock, with his Life* (N.Y. 12mo); Middleton, *Eccles. Biography*, iii, 443; Calamy, *Non-conformist's Memorial* (Lond. 1778), i, 159 sq.

Char'ran (Χαῤῥάν), another mode (Acts vii, 2, 4) of Anglicizing the name HARAN (q. v.).

Charter-house (a corruption of *Chartreuse*, i. e. Carthusian house) is a hospital, chapel, and school-house in London, established in 1611 by Sir Thomas Sutton. It had originally been a Carthusian monastery, but after the dissolution of monastic establishments by Henry VIII it fell into various hands, and was finally purchased from Lord Suffolk by Sir Thomas Sutton for £13,000, who endowed it with the revenues of upward of 20 manors, lordships, and other estates in various parts of England. This "masterpiece of Protestant English charity," as old Fuller calls it, serves three uses—it is an asylum for poor brethren, an educational, and a religious institution; hence Bacon terms it a "triple good." The Charter-house school is memorable as the place where Barrow, Addison, and John Wesley received their early education.

Chase (צִיד, רָדַף, διώκω, etc.). The practice of hunting wild animals early prevailed among the nomade Hebrews (Gen. xxv, 28; xxvii, 3 sq.), and continued to later times to be a common employment (Lev. xvii, 13; Prov. xii, 27; Josephus, *War*, i, 21, 13), both for the sake of the flesh of the game (Sirach xxxvi, 21; but in the Sabbatical year it was allowed to multiply, Exod. xxiii, 11; Lev. xxv, 7; comp. Michaelis, *Mos. Recht*, iii, 178 sq.), and also for the extermination of noxious beasts (2 Sam. xxiii, 20), of both which there was no lack in Palestine (see Harmar, i, 328 sq.). The means employed in this pursuit were usually the bow (Gen. xxvii, 3), the spear or javelin (comp. Strabo, xv, 734), the net (רֶשֶׁת, מִכְמָר, מָצוֹד; which was likewise used for the larger kinds of animals, as gazelles, Isa. li, 21, and even for lions, Ezek. xix, 8), the sling (מוֹקֵשׁ, פַּח, צַמִּים, Eccles. ix, 12; Psa. xci, 3), and the pitfall (שַׁחַת, פַּחַת, Plin. x, 54; comp. Ezek. xix, 4; 2 Sam. xxiii, 20), the last especially for the

Ancient Chase in the Desert of Thebaïd (Wilkinson).
To the left of A was the chasseur in his chariot shooting with the bow, *now defaced*. Figs. 1, 9, 15, 18. Gazelles. 2, 11. Hares. 3. Female hyæna with its young. 4, 13. Foxes. 5 Porcupine. 6. Hyæna arrived at the top of a hill and looking towards the chasseur. 7. The ibex. 8, 14. Hounds. 12. Ostriches (*defaced*). 16. The oryx. 19. Wild oxen.

lion (Shaw, *Trav.* 152 sq.). Compare the description in Job xviii, 8 sq. They do not appear to have had hunting dogs (yet comp. Joseph. *Ant.* iv, 8, 9), and it is doubtful if in hunting birds they used trained falcons or other species of birds (Ælian, *Anim.* viii, 24), although hawks (Harmar, iii, 79), like hounds (*Odyss.* xix, 438; Strabo, v, 215; Philostr. *Icon.* i, 28; Polyb. xxxi, 22; Curt. ix, 1, 31; Plin. viii, 61; Becker, *Charicles*, i, 389) were anciently, and still are universally common in the East (Shaw, *Travels*, p. 300; Kampfer, *Amœn.* p. 131). On the Egyptian monuments hunting scenes are frequently represented (Wilkinson, i, 212 sq.). Hunting became an aristocratic sport (Meurs. *ad Lycophr.* 499) at least in later periods of Jewish history (Josephus, *Ant.* xv, 7, 7; xvi, 10, 3; see also Philo, ii, 356; comp. Heindorf on Horace, *Sat.* ii, 2, 9). Instances occur in which men of strength overcame wild animals even without weapons (Judg. xiv, 6; 1 Sam. xvii, 35). (See Jahn's *Bibl. Archæol.* § 52.) See NIMROD.

The instruments and modes of the chase are sometimes used figuratively, to indicate the wiles of an adversary, great danger, or impending destruction (Psa. ix, 16; lvii, 6; xci, 3; xciv, 13; cxix, 85; Prov. xxvi, 27; Isa. xxiv, 17; xlii, 22; Jer. v, 26; vi, 21; xvi, 16; xviii, 22; xlviii, 44; Amos iii, 5; Hos. xiii, 14; Luke xxi, 35; Rom. xi, 9; 1 Cor. xv, 55). See HUNTING.

Chase, Abner, a minister of the Methodist Episcopal Church, was born in Stonington, Conn., Dec. 11, 1784, and died in Penn Yan, N. Y., April 27, 1854. At the age of 19 he was converted, and joined the Methodist Episcopal Church. When 22 years of age he was licensed to exhort, and soon after received license to preach. He continued as an exhorter and local preacher about six years, laboring very successfully in winning souls to Christ. In 1810 he was admitted on trial in the N. Y. Conference, and appointed to the Delaware Circuit. The next year, at his own request, he was transferred to the Genesee Conference, in whose ranks he remained, part of the time as superannuated, until his death. Very few men have served the Church more faithfully, acceptably, and usefully.—*Minutes of Conf.* v, 419; Sprague, *Annals*, vii, 497.

Chase, Henry, a minister of the Methodist Episcopal Church, was born in Hoosick, N. Y., Sept. 10, 1790. His father being unable to send him to a classical school, he began, unaided, in youth a course of study which ended only with his life, and which included Latin, Greek, Hebrew, French, and German, besides general literature and theology. In 1809 he entered the Methodist ministry, and served in several laborious circuits until 1820, when he removed to New York, and became a teacher in the Wesleyan Seminary. In 1823 he devoted himself to the service of the seamen of New York, and continued, with short interruptions, to be pastor of "The Mariners' Church" until his death, July 8, 1853. He was greatly beloved and esteemed both by his own flock and by the general public.—Sprague, *Annals*, vii, 478.

Chase, Philander, D.D., a bishop of the Protestant Episcopal Church, was born at Cornish, N. H., Dec. 14th, 1775, and graduated at Dartmouth College in 1795. After ordination, he was occupied for about a year and a half as a missionary in the State of New York, extending his services to Utica, Auburn, Canandaigua, and other places. In 1799 he accepted the charge of the Protestant Episcopal churches at Poughkeepsie and Fishkill. He was next appointed to Christ Church, New Orleans, but returned to New England in 1811 to become rector of Christ Church, Hartford, "where he labored with great assiduity, acceptance, and success." His thoughts, however, were directed to the "Great West," and in 1817 he journeyed thither, preaching as he advanced. In May, 1817, he presided at the first meeting of the parishioners of Christ Church, Cincinnati, and became rector at Worthington, Columbus, and Delaware, and accepted also the charge of an academy. In 1819 he was elected bishop of Ohio; in 1821 he became President of Cincinnati College. Desiring to supply the West with an efficient ministry, he visited England, and received large contributions for education. About 1826 he engaged in the foundation of Kenyon College and the Theological Seminary of Ohio. This assiduity and energy were, however, ill rewarded, for "a stand was taken by the professors of Kenyon College as to the extent of his powers over the institution of which he was the originator; and on the same day, in September, 1831, with his usual magnanimity, he resigned his offices of president and bishop of Ohio." Being now in search of temporary repose, he selected as his residence a place in Illinois, which he named "The Valley of Peace;" engaged here, and on the St. Joseph, Michigan, in missionary labors, and planning for himself a wide circle of visitation, which "invaded no man's diocese, parish, or labors." In 1835 he was elected bishop of Illinois, and used similar expedients for the interests of his diocese as those which he had before adopted for Ohio. He again visited England, and collected nearly $10,000 for this purpose. In 1838 he laid the foundation of Jubilee College, and shortly after visited Mississippi, Louisiana, Georgia, and South Carolina, where he received liberal contributions. His colleges were subsequently better endowed, and his own circumstances rendered easy, if not comfortable; and thus, towards his latter end, "the smiles of Providence beamed on his broad philanthropy and indomitable perseverance." He died Sept. 20th, 1852. His published works are: *A Plea for the West* (1826); *The Star in the West, or Kenyon College* (1828); *Defence of Kenyon College, Ohio* (1831); *Reminiscences: An Autobiography, comprising a History of the principal Events in the Author's Life to* 1847 (1848, 2 vols. 8vo).—Sprague, *Annals*, v, 453; Bp. Chase's *Reminiscences, an Autobiography to A.D.* 1847 (2 vols. 8vo, Boston, 1848).

Chase, Squire, a Methodist Episcopal minister and missionary. He was born in Scipio, Cayuga Co., New York, February 15, 1802; was converted at about fourteen; entered the travelling ministry in the Genesee Conference in 1822; was set off with the Black River Conference at its organization in 1836; sailed as missionary to Liberia, Oct. 15, 1836; returned to America in August, 1837; was delegate to General Conference in 1840; sailed again to Africa in January, 1842; returned to America in May, 1843; and died at Syracuse, N. Y., July 26, 1843. Mr. Chase was of prepossessing appearance, natural amiability, and unaffected piety. In the pulpit his "commanding figure and earnest manner gave him great advantage over his audience, and his sermons bespoke a cultivated mind and diligent preparation." He was a good scientific and classical scholar, and a vigorous writer. As presiding elder he was eminently efficient. In 1840 he published *An Examination of the Doctrine, History, and Moral Tendency of Roman Catholic Indulgences.* — *Black River Conference Memorial*, p. 50; Sprague, *Annals*, vii, 664.

Chas'eba (Χασεβά, Vulg. *Caseba*), a name among the list of the "servants of the Temple" (1 Esdr. v, 31), which has nothing corresponding to it in Ezra (ii, 48) or Nehemiah (vii, 50), and is probably a mere corruption of that succeeding it—GAZERA (q. v.).

Chashmal. See AMBER.

Chasible. See CHASUBLE.

Chasidah. See STORK.

Chasidim (חֲסִידִים, i. e. *saints;* comp. Ἀσσιδαῖοι, 1 Macc. vii, 13), a name which among the ancient Jews was given to all who manifested their attachment to the Jewish creed in some extraordinary manner. In

a more special sense it was given to a sect which was organized for the purpose of opposing Hellenistic innovations, and uniting the true believers by voluntary imposition of works of supererogation. In the time of Judas Maccabæus the sect readily joined the great leader of the true Jewish faith. The essential principles of the Chasidim were as follows: most rigidly to observe all the ritual laws of purification; to meet together frequently for devotion, carefully preparing themselves for it by ablutions, and wearing their phylacteries longer than others; to seek diligently for opportunities of offering sacrifices (*Nedarim*, 10, a); to impose upon themselves voluntarily great acts of self-denial and mortification; to abstain from wine and all intoxicating liquors sometimes for several weeks, and sometimes for their whole lives; and to observe, like the priests, the Levitical purifications during the time of their being Nazarites, and sometimes longer. It also appears from the Mishna that they frequently had all things in common (*Aboth*, v, 10); that they sometimes withdrew altogether from general society, and devoted themselves entirely to contemplation, and to the study of the written and oral law, while others of the sect, by pursuing secular avocations, procured the common means of support; that they would not talk much to their own wives, and would not at all look at strange women. The Mishna states (*Sota*, iii, 7) that these principles were carried by some to extravagant excesses. In the course of time the association was split up into parties, those insisting upon the rigid observances forming themselves into separate denominations, such as the Essenes, etc., while the moderate party retained the name Chasidim. In the Talmudic period (A.D. 200-500) the meaning of Chasidim was on the whole again that of the word in the Old Testament, denoting those who are pious, temperate, mild, forbearing, benevolent, etc. There were, however, occasionally zealots among them who would not, for instance, extinguish a fire which broke out on the Sabbath; but they were an exception. In the post-Talmudic period, and in the Middle Ages, the philosophical school appears to have understood by the term those who possessed simple piety in contradistinction to scientific knowledge. The Karaites claimed the name for those who earnestly strove to know God as he is, and only gave it to their spiritual heads. The German and French schools also fixed so high a standard for the qualifications of a Chasid that few except the Rabbins could attain it. In these schools it somewhat approaches the asceticism of the old sect, and still more was this the case in the Cabalistic school representing the Sohar, in which a rigorous observance of externals and mortifications is insisted upon.

The Chasidim were reorganized as a special sect in the eighteenth century by Rabbi Israel ben-Eliezer Baal-Shem (בַּעַל שֵׁם, "lord of the name"=θεοῦργος, a man who by words of conjuration and other formulas knows how to exercise a power over the visible and invisible world), also called *Besht*, בעשׁט, from the initials of בַּעַל שֵׁם טוֹב. Baal-Shem made his public appearance about 1740 in Tlusti, in the district of Czartkow, from whence he subsequently removed to Medziboze, in Podolia. His miraculous cures and prophecies attracted attention in large circles; his mode of life, consisting of contemplation, study of the book Sohar, giving advice to all applying for it, and frequent washings in rivers, soon spread a halo round him, while his liberal views on the gratification of sensual wants, which he declared to be more conducive than prejudicial to true godliness, disposed a large number to become his disciples. To promote the separate organization of a sect, his disciples circulated many miraculous reports; for instance, that his father had been visited by the prophet Elijah, to predict his birth, and that his mother was a hundred years old when she was delivered of him; that, when a youth, he had notoriously struggled with evil spirits, etc.—all of which may be found in the book שִׁבְחֵי הַבַּעשׁט, published in 1815 by the grandson of Baal-Shem, R. Bär Linz. Baal-Shem and his successors received the name Zadik (צַדִּיק, i. e. *righteous*), and his fame attracted multitudes of Jews from all parts of Poland, who were desirous to submit themselves to his guidance, and become members of the sect. The following are the chief principles and tenets of the sect: 1. The great aim of every Chasid is to be in intimate communion with (דְּבֵקוּת), or wedded to the Deity (זִוּוּג שְׁכִינָה), who is regarded as a bride. This communion is effected through prayer, and more especially through frequent contact with the Zadik, or spiritual head, who is espoused to God, and who, as his delegate upon earth, can do all manner of wonderful things. The Zadik is therefore the king and supreme judge of the community; has absolute power over their thoughts, words, and deeds; is richly supported by the voluntary contributions of his followers; they perform pilgrimages to him to spend the Sabbaths and festivals with him, when the rich sit with him at the table, and the poor esteem it the greatest privilege to touch the hem of his garment, or even to catch a glimpse of him. 2. Revelation and the reward of all good works depend upon *absolute faith*, which is greatly interfered with by research and philosophy. 3. Miracles must be implicitly believed in; the greatest devotion is to be manifested during prayer, and hence shouting, clapping of hands, singing, dancing before the Lord, etc., must be resorted to, so as to preclude the intrusion of profane thoughts. 4. Repentance and conversion are essential to salvation; a man must always prepare himself for them, and never despair. 5. The Chasid must keep aloof from profane knowledge, and from the love of mammon, which leads to unbelief, but worship God, even in the performance of business. 6. He must be exceedingly cheerful, contented, unselfish, benevolent, peaceable, charitable in judging others, courageous, temperate in his dress and mode of living, etc. In every town or village where ten Chasidim are to be found, they must meet separately for prayer and meditation, and use the Spanish form of prayer, introducing into it the Cabalistic elements.

The Chasidim derive their doctrines from the Bible, the Talmud, and more especially from the Sohar. At the death of Baal-Shem, his three grandsons, Bär of Meseritz, Mendel of Przemislan, and Michael of Kolk, continued to govern the sect, which at that time numbered about 40,000 members, and became firmly established in Poland, Wallachia, Moldavia, Gallicia, and Palestine, in all of which countries it still exists, though divided into several parties. Into Hungary it was introduced in 1809, by R. Moses Dattelbaum, one of the ablest men that have thus far belonged to the sect.

The Chasidim have published a number of works in defence of their doctrines. The following are some of them: 1. A small work called תַּנְיָא (*Tradition*), by Senior Salman Lidier, 1780, reprinted in Königsberg, 1823; 2. שַׁעֲרֵי הַיִּחוּד וְהָאֱמוּנָה (*Gates of Love and Truth*), by R. Aaron the Levite, Sklow, 1820; 3. יְשׁוּרוֹת הַנְהָגוֹת, a book of ethics, arranged in alphabetical order by R. Nachman, 1821. See Kitto, *Cyclopedia*, i, 475 sq.; Herzog, *Real-Encyklop.* ii, 637 sq.; Jost, *Geschichte des Judenthums und seiner Secten*, iii, 185 sq.; *Ben Chananja*, ii, 1, 49, 145, 193; Fürst, *Bib. Jud.* i, 74. Compare ASSIDÆAN.

Chasil. See CATERPILLAR.

Chaskuni BEN-MANOACH, a learned Jew, who flourished in France about A.D. 1260. He wrote a commentary on the Pentateuch, usually styled סֵפֶר חִזְקוּנִי, in which he made large use of the Midrashic literature; indeed, it is almost entirely a compilation

from some twenty older annotators. It was printed by Bomberg at Venice in 1524, fol., and again at Basle in 1606, and in 1559 a carefully revised edition, by Vittorino Eliano, appeared at Cremona, 4to. It may be found also in the *Biblia Magna* of Moses Frankfurter (q. v.), Amst. 1724-27.—Kitto, *Cyclopædia*, i, 478; Fürst, *Bib. Jud.* i, 171.

Chassidim. See CHASIDIM.

Chasten; *chastise, correct.* (1.) To strike or afflict one for his advantage and correction; and to refuse or despise *chastisement*, or correction, is to undervalue it, and be not reformed by it (Jer. ii, 30, and vii, 28; Heb. xii, 5). The overthrow of the Jewish nation by the Chaldæans was *the chastisement of a cruel one;* it was very severe, and inflicted by cruel instruments (Jer. xxx, 14). (2.) To punish in just wrath (Lev. xxvi, 28). Thus the *chastisement of our peace* was laid on Christ; that punishment, by the bearing of which our reconciliation with God is effected, was laid on him as our surety (Isa. liii, 5). To *chasten one's self* is to be exercised before God in self-abasement, fasting, and prayer (Dan. x, 12). The Scriptures are for *correction;* by their powerful influence they pierce a man to the heart, and make him amend his evil courses (2 Tim. iii, 16).

Chastity (Lat. *castitas*), in the Christian sense, denotes (1.) freedom from impure thoughts, desires, or imaginations; and (2.) abstinence from illicit sexual intercourse. It requires a control of the passions and of the imagination to a degree which no system of morals, except the Christian, has ever succeeded in securing. The love of God in the heart is the only sure safeguard against evil lusts. The body, in Christian ethics, is "the temple of the Holy Ghost." But, apart from pure religious life, a strict morality may do a great deal toward securing purity, if not of heart, at least of life. The evil consequences of sexual disorder should be taught in morals as hindrances to lust. Among them is the certainty that domestic happiness, as well as the physical and mental health of the criminal, are endangered by it. Chastity is the noblest result of pure morality, or of the free mastery of spiritual elevation and purity over the natural instincts; it protects liberty from sinking into subjection to the flesh, so far only, however, as it is the result of virtue, not of a natural indifference arising from temperament.

The best sources of chastity are, first, the true fear of God, which leads to avoid offending God by a sinful misuse of the noblest force of nature, and disturbing the divine law of human reproduction by beastly indulgences; secondly, education, inculcating honesty, modesty, and morality; thirdly, active occupation both of mind and body; fourth, moderation in the use of drink and spices. Chastity is highly blessed in its results, for from it result the purity of the soul, the liberty of the will, the preservation of health and strength, and freedom from the difficulties and misfortunes which unchastity entails on its unfortunate victims. It is also the seal of a high mind, a true virtue, and a sincere fear of God (Mark vii, 21, 22; Rom. xiii, 13, Let us walk honestly, as in the day: not in rioting and drunkenness, not in chambering and wantonness, not in strife and envying; 2 Cor. vi, 4, 6; Gal. v, 19-22; 1 Cor. vii, 5, Defraud ye not one the other, except it be with consent for a time, that ye may give yourselves to fasting and prayer; and come together again, that Satan tempt you not for your incontinency; Phil. iv, 8; 1 Tim. iv, 12; v, 2; Titus i, 8; ii, 5; 1 Pet. i, 22; iii, 2, While they behold your chaste conversation coupled with fear; iv, 3, For the time past of our life may suffice us to have wrought the will of the Gentiles, when we walked in lasciviousness, lusts, excess of wine, revellings, banquetings, and abominable idolatries; James iii, 17). He who is under the guidance of divine wisdom is essentially chaste (James iv, 8). Those who are δίψυχοι, double-minded, cling on the one side to the earth, and on the other aspire after heaven. When the heart is purified by the spirit of God, this duality ceases, and chastity is easy.—Krehl, *N. T. Handwörterbuch*, s. v.

Chasuble (*casula*, a hut, the name of the frock worn by the Roman peasants in the rain), the outer dress worn by the priest at the altar-service; called also *pænula*. It succeeded the old Roman toga. The *pænula* was a circular cloth, with an aperture to admit the head in the centre, while it fell down over the body, so as completely to cover it. It was otherwise called φαινόλιον, *amphiballum*, and *planeta*. This *pænula*, worn rather longer than common, was adopted at an early age for the outer dress of the clergy. The Romish Church has altered it by cutting it away at the sides, so as to expose the arms, and leave only a straight piece before and behind. The color of the vestment varies according to the different festivals of the Church at which it is used. The Greek Church retains it in its primitive shape. It often appears on the older sculptures and mosaics, and also in old brasses in England.—Palmer, *Orig. Liturg.* ii, 309; Hook, *Church Dictionary*, s. v.; Siegel, *Alterthümer*, iii, 63 sq.; Martigny, *Dictionnaire des Antiquités*, 146.

Chatel, Du. See DU CHATEL.

Chatlim (חטלים) or **Chatulim** (חטולים), a place in Palestine mentioned by the Talmudists (*Menachoth*, 86 b), and made by Schwarz (*Palest.* p. 178) to be "the modern village *Al-Chatli*, east of Mt. Tabor, not far from Jordan," where it is marked as *El-Hatli* on Van de Velde's *Map*.

Chatsir. See LEEK.

Chauncy, Charles, a Congregational minister, was born in Yardleybury, Hertfordshire, Eng., 1592. He entered as student in Trinity College, Cambridge, and passed M.A. in 1617. He was chosen fellow, and was made bachelor of divinity in 1624, and, still later, was elected professor of Greek. He left the University, entered the ministry, and in 1627 became vicar of Ware. He was brought before Laud for his opposition to the "Book of Sports" in 1629, and in 1635 he was found guilty of disobedience and contempt of Church authority, but he made a recantation. He was afterwards silenced, and came to New England in 1638. About three years he lived at Plymouth, and then became pastor in Scituate. In November, 1654, he was chosen president of Harvard College, in which station he remained with honor until his death, Feb. 19, 1672. He was the author of several Latin and Greek poems, and also of *Retractation of Chas. Chauncy, formerly Minister of Ware, in Hertfordshire, written with his own Hands before his going to New England in* 1637 (Lond. 1641); *Twenty-six Sermons on Justification* (4to, 1659); *Antisynodalia Americana*, and a few occasional sermons.—Sprague, *Annals*, i, 110.

Chauncy, Charles, D.D., a descendant of president Chauncy, of Harvard University (see preceding article), was born in Boston Jan. 1, 1705, graduated at Harvard in 1721, studied divinity, and was ordained pastor of the First Church in Boston in 1727. He was distinguished for learning and independence, and was one of the founders of Universalism. He died Feb. 10, 1787, in the eighty-third year of his age. He published *A complete View of Episcopacy:—Seasonable Thoughts* (opposed to Whitfield), 1776:—*The Fall and its Consequences*, 1785:—*The Benevolence of the Deity*, 1784, 8vo:—*The Salvation of all Men*, 1784, 8vo; answered by Edwards, jun. (*Works*, N. Y. ed., vol. i, 5-279).

Chauncy, Isaac, an English Nonconformist divine (son of Charles Chauncy 1st [q. v.]), was one of the ministers ejected in 1662, and afterwards became pastor of a Congregational church at Andover. In 1687 he became pastor of the Independent Church in London, which had previously been Dr. John Owen's.

In 1704 he retired from the ministry, and was professor of divinity for several years in the Dissenters' Academy in London. He died Feb. 28, 1712. Among his writings are, *The Divine Institution of Congregational Churches:—The Doctrine according to Godliness* (in catechetical form; Lond. 1737, 12mo):—*Neonomianism unmasked* (Lond. 1692).—Calamy, *Nonconformists' Memorial*, ii, 517.

Chazir. See SWINE.

Che'bar (Heb. *Kebar'*, כְּבָר, perhaps from its *length;* Sept. Χοβάρ), a river in the "land of the Chaldæans" (Ezek. i, 3), i. e. apparently of Mesopotamia (comp. 2 Kings xxiv, 15), on the banks of which some of the Jews were located at the time of the captivity, and where Ezekiel saw his earlier visions (Ezek. i, 1; iii, 15, 23; x, 15, 20, 23; xliii, 3). It is commonly regarded as identical with the HABOR (חָבוֹר), or river of Gozan, to which some portion of the Israelites were removed by the Assyrians (2 Kings xvii, 6). But this is a mere conjecture, resting wholly upon the similarity of name, which, after all, is not very close. It is perhaps better to suppose the two streams distinct, more especially if we regard the Habor as the ancient Chaboras (modern Khabour), which fell into the Euphrates at Circesium, for in the Old Testament the name of Chaldæa is never extended so far northward. The Chebar of Ezekiel must be looked for in Babylonia. It is a name which might properly have been given to any *great* stream (comp. כָּבַר, *great*). Perhaps the view, which finds some support in Pliny (*H. N.* vi, 26), and is adopted by Bochart (*Phaleg*, i, 8) and Cellarius (*Geograph.* c. 22), that the Chebar of Ezekiel is the *Nahr Malcha*, or Royal Canal of Nebuchadnezzar—the *greatest* of all the cuttings in Mesopotamia—may be regarded as best deserving acceptance. In that case we may suppose the Jewish captives to have been employed in the excavation of the channel. That Chaldæa, not Upper Mesopotamia, was the scene of Ezekiel's preaching, is indicated by the tradition which places his tomb at Keffil (Loftus's *Chaldæa*, p. 35). See EZEKIEL.

Chebel (חֶבֶל, *che'bel;* usually rendered in the older versions σχοίνισμα, περίμετρον, περίχωρον; *regio, funiculus*), one of the singular topographical terms (q. v.) in which the ancient Hebrew language abounded, and which add so much force and precision to its records. The ordinary meaning of the word is a "rope" or "cord;" and in this sense it frequently occurs both literally (as Josh. ii, 15, "cord;" 1 Kings xxx, 31, "ropes;" Isa. xxxiii, 23, "tacklings;" Amos vii, 17, "line") and metaphorically (as Eccles. xii, 6; Isa. v, 18; Hos. xi, 4). From this it has passed—with a curious correspondence to our own modes of speech —to denote a body of men, a "band" (as in Psa. cxix, 61). In 1 Sam. x, 5, 10, our word "string" would not be inappropriate to the circumstances—"a string of prophets coming down from the high place." Further it is found in other metaphorical senses, arising out of its original meaning (as Job xviii, 10; Psa. xviii, 4; Jer. xiii, 21). From the idea of a measuring-line (Mic. ii, 5), it has come to mean a "portion" or "allotment" (as 1 Chron. xvi, 18; Psa. cv, 11; Ezek. xlvii, 13). It is the word used in the familiar passage "the *lines* are fallen unto me in pleasant places" (Psa. xvi, 6). But in its topographical sense, as meaning a "tract" or "district," we find it always attached to the region of Argob, which is invariably designated by this, and by no other term (Deut. iii, 4, 13, 14; 1 Kings iv, 13). Its propriety is illustrated by a late traveller in those regions, who shows the abrupt definiteness of the boundary of the district (Graham, in *Cambridge Essays*, 1858). A comparison of the fact that Argob was taken possession of by Manasseh—a part of the great tribe of Joseph —with the use of this word by that tribe, and by Joshua in his retort, in the very early and characteristic fragment, Josh. xvii, 5, 14 (A. V. "portion"), prompts the suggestion that it may have been a provincialism in use among that large and independent part of Israel. Or its application to the "rocky shore" of Argob may be illustrated and justified by its use (Zeph. ii, 5-7; A. V. "coast") for the "coast line" of the Mediterranean along Philistia. In connection with the sea-shore it is also employed in Josh. xix, 29. See ARGOB.

Checker (שְׂבָכָה, *sebakah'*, 1 Kings vii, 17). The original term, thus rendered, is the same as that translated *net-work* in the context, and signifies a *lattice* forming the *balustrade* surmounting the capitals of columns.

Chedek. See THORN.

Chedorla'ömer (Heb. *Kedorlaö'mer*, כְּדָרְלָעֹמֶר; Sept. Χοδολλογομόρ, Josephus Χοδολλόμορος, *Ant.* i, 9, 1), a king of Elam, who, in the time of Abraham, with three other chiefs, made war upon the kings of Sodom, Gomorrah, Admah, Zeboim, and Zoar, and reduced them to servitude (Gen. xiv, 1 sq.). B.C. cir. 2080. For twelve years he retained his hold over them; in the thirteenth they rebelled; in the next year, however, he and his allies marched upon their country, and, after defeating many neighboring tribes, encountered the five kings of the plain in the vale of Siddim. He completely routed them, slew the kings of Sodom and Gomorrah, and carried away much spoil, together with the family of Lot (comp. Psa. cx). Chedorlaomer seems to have perished in the rescue, which was effected by Abraham upon hearing of the captivity of his nephew (Gen. xiv, 17). According to Gesenius (*Thes. Heb.* p. 660 b), the meaning of the word may be "*handful of sheaves*, from the Arabic *kadara*, *handful*, and the Heb. עֹמֶר, *sheaf*," an etymology with which Fürst (*Heb. Handw.* s. v.) coincides; but this is little satisfactory. The name of a king is found upon the bricks recently discovered in Chaldæa, which is read *Kudur-mapula*. See BABYLON. This man has been supposed to be identical with Chedorlaomer, and the opinion is confirmed by the fact that he is farther distinguished by a title which may be translated "Ravager of the West." "As, however, one type alone of his legends has been discovered," says Colonel Rawlinson, "it is impossible to pronounce at present on the identification. The second element in the name 'Chedorlaomer' is of course distinct from that in 'Kudur-mapula.' Its substitution may be thus accounted for. In the names of Babylonian kings the latter portion is often dropped. Thus Shalmaneser becomes Shalman in Hoshea; Merodach-bal-adan becomes Mardocempal, etc. *Kudur-mapula* might therefore become known as *Kudur* simply. The Arabic epithet 'el-Ahmar,' which means *the Red*, may afterwards have been added to the name, and may have been corrupted into *Laomer*, which, as the orthography now stands, has no apparent meaning. *Kedar el-Ahmar*, or 'Kedar the Red,' is in fact a famous hero in Arabian tradition, and his history bears no inconsiderable resemblance to the Scripture narrative of Chedor-laomer. It is also very possible that the second element in the name of Chedorlaomer, whatever be its true form, may be a Shemitic translation of the original Hamite term *mapula*." "Chedorlaomer may have been the leader of certain immigrant Chaldæan Elamites who founded the great Chaldæan empire of Berosus in the early part of the 20th [21st] century B.C., while Amraphel and Arioch, the Hamite kings of Shinar and Ellasar, who fought under his banner in the Syrian war as subordinate chiefs, and Tidal, who led a contingent of Median Scyths belonging to the old population, may have been the local governors who had submitted to his power when he invaded Chaldæa" (Rawlinson's *Herod.* i, 348, 356.

Mr. Stuart Poole supposes that the first invasion of

Palestine by Chedorlaomer and his confederates caused the shepherd-kings to leave the East and settle in Egypt (*Horæ Ægypt.* p. 150). The narrative is strangely supposed by Hitzig (*Ps.* ii, 176) to be a late fiction referring to the expedition of Sennacherib against Jerusalem (comp. Gen. xiv, 5, and 2 Kings xviii, 13). See, on the other side, Tuch (*Genes.* p. 308); Bertheau (*Israel. Geschichte*, p. 217). See ELAM.

Cheek (לְחִי, *lechi'*, the *jaw*, as often rendered; σιαγών). Smiting upon the cheek is frequently spoken of in the Scriptures as a most grievous insult and injury (Job xvi, 10; Lam. iii, 30; Mic. v, 1; Luke vi, 29); and the incidental notices of modern travellers on this, as on other subjects, exhibit the literal accuracy of the language of the inspired writers. Lord Valentia, in his *Travels*, alluding to one of his servants, says, "Davagé was deeply incensed; nor could I do more than induce him to come to the factory on business while I was there, Mr. Pringle having, in one of his fits struck him on the cheek with the sole of his slipper." Sir W. Ouseley, speaking of the Persian court, remarks, "When the vizir declared himself unable to procure the money, Fathh Ali Shah reproached him for his crimes, struck him on the face, and, with the high wooden heel of a slipper, always iron-bound, beat out several of his teeth." Roberts remarks that the Hindoo can bear almost any thing without emotion except slippering—that is, a stroke with the sole of a slipper or sandal, after a person has taken it off his foot and spit upon it: this is dreaded above all affronts, and considered as no less ignominious than spitting in the face or bespattering with dirt among Europeans. An angry man often says, "I will beat thy cheek, thou low-caste fellow."

The term "*cheek-bone*," in Psa. iii, 7, is used figuratively, and presents the Psalmist surrounded by his enemies as by a herd of wild beasts, and denotes their complete deprivation of the power of seizing upon or devouring their prey. In Joel i, 6, the "*cheek-teeth*" (מְתַלְּעוֹת, *methalleöth'*), *grinders*, of locusts are compared to those of a beast of prey.

Cheese (in 1 Sam. xvii, 18, חֲרִיצֵי הֶחָלָב, *charitsey' he-chalab'*, *slices of the* [curdled] *milk;* Sept. τρυφαλίδες τοῦ γάλακτος, Vulg. *formellæ casei;* in 2 Sam. xvii, 29, שְׁפוֹת *shephoth'*, according to the Rabbins, so called from being *filtered* from the whey; Sept. Σαφώθ, Vulg. *pingues;* in Job x, 10, גְּבִינָה, *gebinah'*, *coagulated* milk; Sept. τυρός). It is difficult to decide how far these terms correspond with our notion of *cheese*, for they simply express various degrees of coagulation (see Gesenius, *Thes. Heb.* p. 25, 526). It may be observed that cheese is not at the present day common among the Bedouin Arabs, butter being decidedly preferred; but there is a substance, closely corresponding to those mentioned in 1 Sam. xvii; 2 Sam. xvii, consisting of coagulated buttermilk, which is dried until it becomes quite hard, and is then ground: the Arabs eat it mixed with butter (Burckhardt, *Notes on the Bedouins*, i, 60). It is noticeable that the ancients seem generally to have used either butter or cheese, but not both: thus the Greeks had in reality but one expression for the two, for βούτυρον=βοῦς, τυρός, "cheese of kine." The Romans used cheese exclusively (see Beroald, *ad Apulej. Metam.* p. 26), while all nomad tribes preferred butter. The distinction between cheese proper and coagulated milk seems to be referred to in Pliny, xi, 96. See BUTTER.

The most important passage in which this preparation from milk is mentioned in Scripture is that where Job (x, 10), figuratively describing the formation of the fœtus in the womb, says:

> Is it not like milk thou wouldst pour me out,
> Even like cheese wouldst curdle me?

This text alludes to that progressive solidification which is common to all cheese, which is always soft when new, though it hardens when it becomes old. Undoubtedly the Orientals do eat curds, or curdled milk, but that, therefore, their cheese consists of curdled milk is not the correct inference. We also eat curds, but do not regard curds as cheese; neither do they. The other passages describe "cheese" in the plural, as parts of military provision, for which the most solid and compact substances are always preferred. Persons on a march would not like to encumber themselves with curdled milk (2 Sam. xvii, 29). See CURDLE.

There is much reason to conclude that the cheese used by the Jews differed in no respect from that still common in the East, which is usually exhibited in small cakes about the size of a tea-saucer, white in color, and excessively salt. It has no rind, and soon becomes exceedingly hard and dry, being, indeed, not made for long keeping. It is best when new and comparatively soft, and in this state large quantities are consumed in lumps or crumbs not made up into cakes. All cheese in the East is of very indifferent quality, and the natives infinitely prefer English or Dutch cheese when they can obtain it. In making cheese the common rennet is either buttermilk or a decoction of the great-headed thistle or wild artichoke. The curds are afterwards put into small baskets made of rushes or palm leaves, which are then tied up close and the necessary pressure applied. (See Kitto, *Pict. Bible*, note on 1 Sam. xvii, 19.) See MILK.

There are several decisions in the Mishna relative to the pressure by which cheese was made (*Cholim*, viii, 2). This proves that, as observed before, no preparation of milk was regarded as cheese while in a fluid state, or before being subjected to pressure. In another place (*Aboda Sara*, ii, 5) it is decided that cheese made by foreigners could not be eaten, from the fear that it might possibly be derived from the milk of some animal which had been offered in sacrifice to idols. It is therefore certain that cheese was known to the Jews (comp. Philo, *Opp.* ii, 387; Otho, *Lex. Rabb.* p. 120), and there was even a valley at Jerusalem called the *Tyropœon* (q. v.), i. e. *cheese-makers'* valley (φάραγξ τῶν τυροποιῶν), doubtless from its being occupied by persons of this craft (Josephus, *War*, v, 5, 1). See BAZAAR. An instrument for cutting firm cheese is even named in the Mishna (*Shabb.* xvii, 2). (See generally Ugolini, *De re rustica vet. Hebr.* [in his *Thesaur.* xxix], ii, 15.) See FOOD.

Cheke, SIR JOHN, was born at Cambridge June 16, 1514, and was educated at the University there, devoting himself especially to the study of Greek, then much neglected in England. When the first professorship of Greek was founded in Cambridge by king Henry VIII, about 1540, Cheke was appointed professor. He was made tutor of the prince, afterwards Edward VI, but when queen Mary came to the throne his property was confiscated. He fled to the Continent, but was arrested at Brussels by order of Philip II, and sent back to London. He abjured Protestantism, but this act preyed on his mind, and he died in the following year, September 13, 1557. His writings were very numerous and learned; among them are *De Obitu Martini Buceri* (Lond. 1551, 4to); *De Pronunciatione Linguæ Græcæ* (Basil, 1555); *Translation of Matthew* (from the Greek, edited by Goodwin, Cambridge).—*Gen. Biog. Dict.* iii, 301; Strype, *Life of Cheke* (Lond. 1705, 8vo); Kippis, *Biog. Britannica*, iii, 484.

Che'lal (Heb. *Kelal'*, כְּלָל, *completion;* Sept. Χαλήλ), one of the "sons" of Pahath-Moab who divorced his Gentile wife after the return from Babylon (Ezra x, 30). B.C. 458.

Chelbenah. See GALBANUM.

Chel'cias (Χελκίας, i. e. *Hilkiah*), the name of three or four men.

1. The father of Asadiah and ancestor of Baruch (q. v.), (Bar. i, 1). B.C. considerably ante 605.

2. A priest, son of Salom (Shallum), and father of Joachim (Bar. i, 7); evidently the HILKIAH (q. v.) of the Old Test. (1 Chron. vi, 13).

3. The father of Susanna (Sus. 2, 29, 63). B.C. post 588. He was perhaps identical with the Hilkiah of Neh. xii, 7, or of Neh. viii, 4. Tradition, however (Hippol. *in Susann.* i, 689, ed. Migne), represents him as identical with the father of Jeremiah (Jer. i, 1), and also with the priest who found the copy of the law in the time of Josiah (2 Kings xxii, 8).

4. One of the two Alexandrian Jewish generals of Cleopatra in her contest with her son Ptolemy Lathyrus, in which campaign he died in Cœle-Syria (Josephus, *Ant.* xiii, 10, 4; 13, 1).

Chel'lian (or, rather, *Chellæan*, Χελλαῖος), an inhabitant of a region mentioned (Judith ii, 23) as adjoining Arabia Deserta on the north; probably that elsewhere (Judith i, 9) called CHELLUS (q. v.).

Chel'luh (Heb. *Keluhu'*, כְּלוּהוּ [text כְּלוּהִי], v. r. כְּלוּהַי or כְּלוּהִי, *completed;* Sept. Χελία v. r. Χελκία and Χελκεία, Vulg. *Chelian*), one of the "sons" of Bani who divorced their Gentile wives after the Babylonian exile (Ezra x, 35). B.C. 458.

Chel'lus (Χελλούς v. r. Χελούς, Vulg. omits), named among the places beyond (i. e. on the west of) Jordan to which Nabuchodonosor sent his summons (Judith i, 9). Except its mention with "Kades" there is no clew to its situation; this, however, would seem to locate it near Kadesh-barnea. Hence Reland (*Palæst.* p. 717) conjectures that it may be *Chaluza* (חֲלוּצָה), a place which, under the altered form of ELUSA (q. v.), was well known to the Roman and Greek geographers. With this agrees the subsequent mention of the "land of the Chellians" (ἡ Χελλαίων, Vulg. *terra Cellon*), "by the wilderness," to the south of whom were the children of Ishmael (Judith ii, 23). Movers (*Zeitschr. f. Philos.* 1835, p. 36) supposes it to be the same as HALHUL (Josh. xv, 58), and that Betane, mentioned with it, is the same as Beth-anoth (Josh. xv, 59).

Che'lod (Χελεούδ v. r. Χελεούλ, Vulg. omits, old Lat. ver. *Chelleuth*, Syr. "Chaldæans"). "Many nations of the sons of Chelod" were among those who obeyed the summons of Nabuchodonosor to his war with Arphaxad (Judith i, 6). The word is apparently corrupt (see Fritzsche, *Exeg. Handb.* in loc.). Simonis suggests Χαλάν, i. e. CALNEH, perh. *Ctesiphon.* Ewald (*Gesch. Isr.* III, ii, 543) conjectures it to be a nickname for the *Syrians*, "sons of the mole" (חֹלֶד, *choled'*).

Che'lub (Heb. *Kelub'*, כְּלוּב, a *cage*, as in Jer. v, 27), the name of two men.

1. (Sept. Χαλέβ.) The brother of Shuah and father of Mehir, of the tribe of Judah (1 Chron. iv, 11). B.C. appar. ante 1612.

2. (Sept. Χελούβ.) The father of Ezri, which latter was David's chief gardener (1 Chron. xxvii, 26). B.C. ante 1014.

Chelu'bai (Heb. *Kelubay'*, כְּלוּבַי; Sept. Χαλέβ), one of the sons of Hezron (1 Chron. ii, 9); elsewhere (ver. 18, 42) called CALEB (q. v.). It is worth noting that, while in this passage Jerahmeel is stated to be a brother of Chelubai, it appears from 1 Sam. xxvii, 10, that the Jerahmeelites were placed on the "south of Judah," where also were the possessions of the house of Caleb (Judg. i, 15; 1 Sam. xxv, 3; xxx, 14).

Chem'arim (Heb. *Kemarim'*, כְּמָרִים, *idol-priests*). This word occurs only once in our version of the Bible ("chemarims," Zeph. i, 4; Sept. confounds with ἱερεῖς following); but it is met with in the Hebrew in 2 Kings xxiii, 5 (Sept. Χωμαρίμ); Hos. x, 5 (Sept. omits), where it is rendered "idolatrous priests," and "priests;" and in both of these passages the margin has "*chemarim.*" According to Gesenius (*Thes. Heb.* p. 693), the corresponding Syriac word signifies "a priest in general; but this, as well as other Syriac words relating to divine worship, is restricted by the Hebrews to idol-worship. As to the etymology, the singular form כֹּמֶר, *ko'mer*, is properly *blackness, sadness*, and concretely, *one* who *goes about in black, in mourning*, hence an *ascetic*, a *priest.*" Fürst (*Heb. Lex.* s. v.) suggests a derivation from כָּמַר = אָמַר, in the sense of *worship*, and remarks that the title *chemarim*, although proper to the peculiar priests of Baal, was also applied to other idolatrous priests. Zeph. i, 4, the *chemarim* are coupled with the priests, and the passage may signify, "I will destroy the *chemarim*, together with the priests of the tribe of Levi who have joined in the worship of idols." The priests who officiated in the service of the golden calves at Dan and Bethel were called *chemarim* (see the other passages referred to). Even to this day the Jews retain the word, and apply it in derision to Christian ministers, on account of their black robes. See BAAL.

Chemnitz (properly VON KEMNITZ), MARTIN, an eminent German theologian, was born at Treuenbritzen, in Brandenburg, Nov. 9, 1522. His parents designed him for an artisan, but he took kindly to no trade, and a distant relative (Niemann) called him to Magdeburg (1539), where he spent three years preparing for the University. He was compelled by want of money to become a teacher at Kalbe in 1542, and at Wrietzen in 1544; studied mathematics and astrology at Wittenberg in 1545-47; was made rector at Königsberg, Prussia, in 1548, and two years afterwards became librarian of duke Albrecht. He now turned his attention to theology, and became a thorough student of the Bible and the fathers. In the controversy on the doctrine of justification he took part against Osiander; but the controversy so annoyed him that, in 1552, much against the will of the duke, he left Königsberg. He immediately after began the scientific study of dogmatics at Wittenberg, attaching himself closely to Melancthon, and lecturing in the University. He became preacher at Brunswick in 1554, and also delivered lectures there on theology, which gained great celebrity, and were published after his death by Polykarp Lyser (Frankfurt, 1591, 3 vols. 8vo, and often). His work, entitled *Theologiæ Jesuitarum præcipua capita* (Greifsw. 1562), involved him in a controversy with the Roman Catholics, and led to his writing the *Examen concilii Tridentini* (Greifsw. 1565-1573, 4 vols.; Frankf. 1707, fol.), which is still a classical work on the subject. After the death of Melancthon he showed himself a zealous Lutheran, and in 1566 became associated with Mörlin in the preparation of the *Corpus doctrinæ Prutenicum*, designed as the symbolical text-book of Prussia. In 1567, having become superintendent of Brunswick, he prepared the Confession of the Church of Lower Saxony. From 1574 he exerted himself, with Jacob Andreä, to induce the churches of Saxony and Suabia to adopt the *Formula Concordiæ* (q. v.), in the preparation of which he had taken a leading part. He devoted himself almost exclusively to this work, took with Andreä a leading part in all the meetings that were held on the subject, and obtained the admiration of his contemporaries as well by the prudence and firmness of his conduct as by the depth and extent of his knowledge. He resigned his charge in 1585, and died April 8, 1586. Besides the above-named works, he wrote also *Repetitio sanæ doctrinæ de vera præsentia corporis et sanguinis Domini in cœna sacra* (Leipzig, 1561):—*Die fürnehmsten Hauptstücke der christlichen Lehre* (Wolfenb. 1569):—*De duabus in Christo naturis* (Jena, 1570):—*Harmonia evangeliorum*, completed by Leyser and Gerhard (Hamburg, 1704, 3 vols. fol.). Chemnitz has been pronounced the "first great theologian produced by the Reformation." Schenkel (in Herzog, cited below) says that it was

on the other hand, would find the stream in the *Wady el-Kelt*, behind Jericho (*Researches*, ii, 288). This last name is, however, not greatly like Cherith, yet the identification is perhaps the best hitherto suggested. This wady is formed by the union of many streams in the mountains west of Jericho, issuing from a deep gorge, in which it passes by that village, and then across the plain to the Jordan. It is dry in summer. No spot in Palestine is better fitted to afford a secure asylum to the persecuted than Wady el-Kelt. On each side of it extend the bare, desolate hills of the wilderness of Judæa, in whose fastnesses David was able to bid defiance to Saul. The Kelt is one of the wildest ravines in this wild region. In some places it is not less than five hundred feet deep, and just wide enough at the bottom to give a passage to a streamlet (1 Kings xvii, 6), like a silver thread, and to afford space for its narrow fringe of oleanders. The banks are almost sheer precipices of naked limestone, and are here and there pierced with the dark openings of caves and grottoes, in some one of which probably Elijah lay hid. The wady opens into the great valley, and from its depths issues a narrow line of verdure into the white plain; it gradually spreads as it advances until it mingles, at the distance of a mile or more, with the thickets that encompass Riha, the modern representative of Jericho. To any one passing down from Jerusalem or Samaria towards Jericho, the appropriateness of the words in 1 Kings xvii, 3, would be at once apparent (see Tristram, *Land of Israel*, p. 202). The Kelt being near Mount Quarantania, the traditional scene of the Temptation, was a favorite resort for anchorites when the example of St. Saba made that order fashionable in Palestine. See ELIJAH.

Wady el-Kelt is held by Porter (*Hand-book for Syria*, p. 191) to be the "Valley of Achor," in which the Israelites stoned Achan (Josh. vii, 26), and which served to mark the northern border of Judah (xv, 7). Along the southern bank of the wady, by a long and toilsome pass, ascends the ancient and only road from Jericho to Jerusalem. This he deems "the *going up* to Adummim, which is on *the south side of the river* (xv, 7). But this identification would confound the name Cherith with the very dissimilar one Achor, which latter we know was retained to a late period in Jewish history. See ACHOR.

Che'rub [the proper name is pronounced *Ke'rub*] (Heb. *Kerub';* כְּרוּב, etymology uncertain; Sept. Χερούβ v. r. Χαρούβ and Χαρήβ; Vulg. *Cherub*), a place apparently in the Babylonian dominions, associated with Tel-harsa, Addan, etc., from which some Jewish exiles returned with Zerubbabel, who had lost their pedigree (Ezra ii, 59; Neh. vii, 61). The true construction of these names, however, would rather make this to be that of a *man* thus unregistered. B.C. 536. See ADDON.

Cher'ub (Heb. *kerub'*, כְּרוּב, in the sing. only in Exod. xxv, 19; 2 Sam. xxii, 11; 1 Kings vi, 24, 25, 27; 2 Chron. iii, 11, 12; Psa. xviii, 10; Ezek. x, 2, 7, 9, 14; xxviii, 14, 16; Sept. χερούβ), plur. CHER'UBIM (Heb. *kerubim'*, כְּרוּבִים, sometimes כְּרֻבִים; Sept. χερουβὶμ v. r. χερουβεὶμ, and so in Eccl. xlix, 8, and Heb. ix, 5; Engl. Vers. invariably "cherubims"), the appellation of certain symbolical figures frequently mentioned in Scripture. See SERAPH.

I. *Import of the Name.*—The origin and signification of the word it is impossible to determine with any certainty. Those who seek it in a Shemitic root are still divided in opinion, some deriving it from the Chald. כְּרַב, *kerab'*, to *plough*, so that *cherub* = "plougher," i. e. *ox*, urging the parallel between Ezek. x, 14, and i, 10; others (as Gussetius, L. de Dieu, and Rödiger) take it by a transposition of letters for רְכוּב, *rekub'*, q. d. divine "beast" (Psa. xxiii, 11), comp. the Arabic *karib*, a *ship* of transport; others (see Hyde, *De relig. vet. Pers.* p. 263) make it i. q. קָרוֹב, *karob'*, "near" to God, i. e. admitted to his presence; with others (see Maurer, *Comment. in Vet. Test.* at Isa. vi, 2) it is equivalent to כָּרַם, *karam'* (Arabic the same), "to be noble," i. e. chief (comp. *seraphim*); finally, to pass over other less probable conjectures (e. g. Rosenmüller, *Alterthumsk.* I, i, 181; and Paulus ap. Züllig, p. 31), the Talmudists regard it as the Chald. כְּרוּבְיָא, *ke-rubya'*, *boylike* (see Buxtorf, jun., *Exercitatt.* p. 100; Otho, *Lex. Rabb.* s. v.). Gesenius at first proposed a derivation from the Syriac *kerub*, *strong*, but afterwards, convinced that he was misled by an error of Castell (see his *Anecdot. Orient.* i, 66), he proposed a new etymology, as = חָרַם, *charam'* (Arabic the same), "to prohibit from a common use," to consecrate (*Thesaur.* p. 711), compare the Ethiopic kindred word for sanctuary; so that the signification would be *keeper*, or guard, sc. of the Deity against all profane approach. Others (e. g. Eichhorn, *Einleit. ins A. T.* iii, 80; Vatke, *Bibl. Theologie*, i, 325) think the cherubim were the same with the γρύπες, *griffins*, of the Oriental imagination, guardians of the golden mountains; and seek the root in the Persic *karub*, to *grasp* (Tychsen in Heeren's *Ideen*, i, 386). Forster even seeks an Egyptian derivation of the name (*De bysso*, p. 116). Hävernick (*Zu Ezek.* p. 5) suggests a derivation from a Syriac root, meaning to *cut* or carve (Keil on 1 Kings v, 9); so Aben Ezra says that "cherub" is the same as צורה, and means *any artistic figure* (Schultens, *Prov. Sol.* p. 472). An early etymology makes it from כְּרַב, *ke-rab'*, *great-as-it-were*, q. d. like Cabeiri = θεοί δυνατοί (see Psa. ciii, 20; δυνάμεις, 1 Pet. iii, 22; ἀρχαί, Eph. i, 21; so Procopius on Gen. iii; Theodorus in Gen. xlvi). The oldest derivation is from רב and נכר, as though it meant "abundance of knowledge," a meaning once universally adopted (Philo, *Vit. Mos.* p. 688; Clem. Alex. *Strom.* v, 240, ed. Sylb.; Origen, *Frag. Hex.* p. 114; Jerome on Isa. vi, 2; Dionys. *De Cœl. Hier.* vii, 96; Spencer, *De Legg.* III, iii, 1, etc.). Hence the remark of Aquinas, "The name Seraphim is given from their fervor, as belonging to love; but the name Cherubim is given from *their knowledge*" (I, i, b. 1087, ch. vii). Fürst (*Concord.* p. 571), followed by Delitzsch (*Gen.* ii, 208), regards the root as properly Shemitic, allied to the above sense of *grasping* (Sanscr. *gribh*, Engl. *grip*).

II. *History and Classification.*—1. The first occasion on which they are mentioned is on the expulsion of our first parents from Eden (Gen. iii, 24), where the office of preventing man's access to the tree of life is assigned to "*the* cherubim (הַכְּרֻבִים, not as in A.V. 'cherubims') with the flame of the waving sword." They are thus abruptly introduced, without any intimation of their shape and nature, as though they were too well understood to require comment. That some *angelic beings* are intended is obvious, and the attempts to refer the passage to volcanic agency (Sickler, *Idea zu einem Vulkan*, p. 6), or to the inflammable bituminous region near Babylon (Plin. ii, 109, etc.), is a specimen of that valueless rationalism which unwisely turns the attention from the inner spirit of the narrative to its mere external form. We might perhaps conjecture, from the use of the *article*, that there were supposed to be a definite number of cherubim, and it seems that *four* is the mystic number usually attached to the conception of them. As the number four has special significance in Hebrew symbolism—being the number to express the world and divine revelation (Bähr's *Symbolik.* i, 119 sq.)—this consideration must not be lost sight of.

The word מִקֶּדֶם, there translated "on the east," may signify as well "*before* or on the edge of." Besides, יַשְׁכֵּן, rendered by our translators "placed," signifies properly "to place in a tabernacle," an ex-

pression which, viewed in connection with some incidents in the after history of the primeval family (Gen. iv, 14-16), seems a conclusive establishment of the opinion that this was a local tabernacle, in which the symbols of the Divine presence were manifested, suitably to the altered circumstances in which man, after the Fall, came before God, and to the acceptable mode of worship he was taught to observe. That consecrated place, with its striking symbols, called "the presence of the Lord," there is reason to believe, continued till the time of the Deluge, otherwise there would have been nothing to guard the way to the tree of life; and thus the knowledge of their form, from the longevity of the antediluvians, could have been easily transmitted to the time of Abraham (Faber, *Horæ Mosaicæ*, bk. ii, ch. vi). Moreover, it is an approved opinion that, when those emblems were removed at the close of the patriarchal dispensation from the place of public worship, the ancestors of that patriarch formed small models of them for domestic use, under the name of Seraphim or Teraphim, according to the Chaldee dialect (Faber, *Origin of Pag. Idol.* i, 256).

In like manner were lion-shaped and eagle-formed griffins supposed by the aborigines of Northern Europe (Herod. iii, 102, 116) and India (Ctesias, *Ind.* p. 12) as guardians of the gold-bearing hills (comp. Gen. ii, 11); and in Greek mythology (see Creuzer, *Symbolik*, ii, 647) they were sacred to the deities (e. g. Apollo, Minerva, Bacchus). But the cherub was anointed as a divine emblem (Ezek. xxviii, 14; where some, however, take מִמְשַׁח for מִמְשָׁח, in the sense merely of "extended"), presiding over sacred mountains blazing with precious ores (ver. 16); at least the king of Tyre is there compared to such a being, unless, with others, we refer that whole description to the cherubic forms of the Jewish sanctuary (see Henderson, *Comment.* in loc.).

2. The next occasion on which the cherubim are noticed is when Moses was commanded to provide the furniture of the tabernacle; and, although he received instructions to make all things according to the pattern shown him in the Mount, and although it is natural to suppose that he saw a figure of the cherubim, yet we find no minute and special description of them, as is given of everything else, for the direction of the artificers (Exod. xxvi, 31). The simple mention which the sacred historian makes, in both these passages, of the cherubim conveys the impression that the symbolic figures which had been introduced into the Levitical tabernacle were substantially the same with those established in the primeval place of worship on the outskirts of Eden, and that by traditional information, or some other means, their form was so well known, both to Bezaleel and the whole congregation of Israel, as to render superfluous all further description of them.

Similar figures were to be enwoven on the ten blue, red, and crimson curtains of the tabernacle (Exod. xxvi, 1). The promise that God would "meet and commune with Moses from *between the two cherubim*" (Exod. xxv, 22) originates the constant occurrence of that expression as a description of the divine abode and presence (Numb. vii, 89; 1 Sam. iv, 4; Isa. xxxvii, 16; Psa. lxxx, 1; xcix, 1, etc.).

3. Cherubim after this appear likewise in the theophantic descriptions of the prophets and inspired poets (2 Sam. xxii, 11), especially in the remarkable visions of Ezekiel by the river Chebar (Ezek. x). Yet there was no mystery as to those remarkable figures, for Ezekiel knew at once (x, 20) the living creatures which appeared in his vision supporting the throne of God, and bearing it in majesty from place to place, to be cherubim, from having frequently seen them, in common with all other worshippers, in the carved work of the outer sanctuary. Moreover, as is the opinion of many eminent divines, the visionary scene, with which this prophet was favored, exhibited a transcript of the Temple, which was shown in pattern to David, and afterwards erected by his son and successor; and, as the chief design of that later vision was to inspire the Hebrew exiles in Babylon with the hope of seeing, on their return to Judæa, another temple, more glorious than the one then in ruins, it is reasonable to believe that, as the whole style and apparatus of this mystic temple bore an exact resemblance (1 Kings vi, 20) to that of Solomon's magnificent edifice, so the cherubs also that appeared to his fancy portrayed on the walls would be fac-similes of those that belonged to its ancient prototype. See TEMPLE.

Still the question arises, Was the shape already familiar, or kept designedly mysterious? From the fact that cherubim were blazoned on the doors, walls, curtains, etc., of the house, and from the detailed description of shapes by Ezekiel, the latter idea might seem out of place. But if the text of Ezekiel, and the carvings, etc., of the Temple had made them popular, Josephus could not possibly have said (*Ant.* viii, 3, 3), "No one can say or conjecture what the cherubim (χερουβεῖς) actually were." It is also remarkable that Ezekiel (chap. i) speaks of them as "living creatures" (חַיּוֹת, ζῶα) under mere animal forms. Into this description in chap. x, 14, the remarkable expression, "the face of a cherub," is introduced, and the prophet concludes by a reference to his former vision, and an identification of those creatures with the cherubim (v, 20). On the whole, it seems likely that the word "cherub" meant not only the composite creature-form, of which the man, lion, ox, and eagle were the elements, but, further, some peculiar and mystical form, which Ezekiel, being a priest, would know and recognise as "the face of a CHERUB," but which was kept secret from all others; and such probably were those on the ark, which, when it was moved, was always covered (see ARK OF COVENANT), though those on the hangings and panels might be of the popular device. What this peculiar cherubic form was is a mystery perhaps impenetrable. It was probably believed popularly to be something of the bovine type (though in Psa. xvi, 20, the notion appears to be marked as degraded); so Spencer (*de leg. Hebr. rit.* iii, diss. 5, 4, 2) thinks that the ox was the *forma præcipua*, and quotes Grotius on Exod. xxv, 18 (Bochart, *Hierozoic.* p. 87, edit. 1690). Hence the "golden calf." The symbolism of the visions of Ezekiel is more complex than that of the earlier Scriptures, and he certainly means that each composite creature-form had four faces, so as to look four ways at once; was four-sided and four-winged, so as to move with instant rapidity in every direction without turning, whereas the Mosaic idea was probably single-faced, and with but one pair of wings. Ezekiel adds also the imagery of the wheels—a mechanical to the previous animal forms. This might typify inanimate nature revolving in a fixed course, informed by the spiritual power of God. The additional symbol of being "full of eyes" is one of obvious meaning. See CREATURE (LIVING).

III. *Their Form and Character.*—If we may trust the unanimous testimony of Jewish tradition, we must suppose that they had the faces of human beings, according to the positive assertion of Maimonides, Abarbanel, Aben Ezra, etc. (Otho, *Lex. Rab.* s. v. Cherubim; Buxtorf, *Hist. Arc. Fœd.* p. 100). But, taking Ezekiel's description of them to be the proper appearance that belonged in common to all his cherubic creatures (ch. i, x, xli), we are led to conclude that they were compound figures, unlike any living animals or real object in nature, but rather a combination, in one nondescript artificial image, of the distinguishing features and properties of several. The ox, as chief among the tame and useful animals, the lion among the wild ones, the eagle among the feathery tribes, and man, as head over all, were the animals which, or rather parts of

E. Grecian.—Griffin.

which, composed the symbolical figures. Each cherub had four distinct faces on one neck—that of a man in front, that of a lion on the right side, and of an ox on the left, while behind was the face of an eagle. Each had four wings, the two under ones covering the lower extremities, or rather the centre of the person (Heb. the feet), in token of decency and humility, while the upper ones, spread out on a level with the head and shoulders, were so joined together, to the edge of his neighbors', as to form a canopy; and in this manner they soared rather than flew, without any vibratory motion with their wings, through the air. Each had straight feet (Heb. "their feet [were] a straight foot," Ezek. i, 7), and the probability is that the legs were destitute of any flexible joint at the knee, and so joined together that its locomotions must have been performed in some other way than by the ordinary process of walking, or lifting one foot after another. Bähr (whose entire remarks on this subject are valuable and often profound) inclines to think that the precise form varied within certain limits; e. g. the cherubic figure might have one, two, or four faces, two or four feet, one or two pair of wings, and might have the bovine or leonine type as its basis, the imagery being modified to suit the prominently intended attribute, and the highest forms of creature-being expressing best the highest attributes of the Creator (*Symbolik*, i, 313 sq.). Thus, he thinks, the human form might indicate spirituality (p. 340). (Comp. Grotius on Exod. xxv, 18, and Heb. ix, 5.) Some useful hints as to the connection of cherubic with other mythological forms may be found in Creuzer (*Symbol.* i, 441, 540).

It has been sometimes disputed whether the colossal cherubim of olive wood, overlaid with gold, with outspread wings, touching in the centre of the oracle and reaching to either wall, placed by Solomon in the Holy of Holies, were substitutes for or additions to the original golden pair. The latter is probably the truth, for had the Mosaic cherubim been lost we should have been informed of the fact. All that we learn about these figures is that they each had *a body* ten cubits high (1 Kings v, 23), and stood on *their feet* (2 Chron. iii, 13), so that the monstrous conception of winged child-faces is an error which should long ago have been banished from Christian iconography (De Saulcy, *Hist. de l'Art Judaïque*, p. 25). The expression "cherubims of *image work*," in 2 Chron, iii, 10 (מַעֲשֵׂה צַעֲצֻעִים, Sept. ἔργον ἐκ ξύλων, Vulg. *opere statuario*, Marg., of *movable work*), is very obscure, but would probably give us no farther insight into the subject (Dorjen, *De opere Zaazyim* in Ugolini *Thes.* viii, No. 6); but in 1 Chron. xxviii, 18, 19, we learn that David had given to Solomon a model for these figures, which are there called "the *chariot of* the cherubim" (Vulg. *quadriga* cherubim). We are not to suppose from this that any wheels supported the figures, but we must take "cherubim" in apposition to "chariots" (Bertheau, ad loc.). The same phrase is found in Ecclus. xlix, 8, and is in both cases an allusion to the poetical expression, "He rode upon a cherub, and did fly" (2 Sam. xxii, 11; Psa. xviii, 10), an image magnificently expanded in the subsequent vision of Ezekiel, which for that reason has received from the Rabbis the title of מרכבה, "the chariot." Although the mere word "cherub" is used in these passages, yet the simple human figure is so totally unadapted to perform the function of a chariot, that we are almost driven to the conclusion arrived at by De Saulcy on this ground alone, that the normal type of the cherub involved *the body of an ox*, as well

as spreading wings and a human face (*Hist. de l'Art Judaique*, p. 29). If this conjecture be correct, we shall have in these symbols a counterpart, exact in the *minutest particulars*, to the human-headed oxen, *touching both walls with their wings*, which have been discovered in the chambers of Nimrûd and Khorsabad. We shall find, further on, the strongest confirmations of this remarkable inference. We may here mention the suspicion of its truth, which we cannot but derive from the strange reticence of Josephus on the subject (*Ant.* iii, 6, 5). Now it is hardly conceivable that an emblem seen daily by multitudes of priests, and known to the Jews from the earliest ages, could be so completely secret and forgotten as this. If the cherubim were simply winged genii there would have been no possible reason why Josephus should have been ashamed to mention the fact, and, in that case, he would hardly have used the ambiguous word Ζῶον. If, on the other hand, they were semi-bovine in shape, Josephus, who was of course familiar with the revolting idolatry of which his nation was accused (Tacit. *Hist.* v, 4; Josephus, *Apion*, ii, 7), had the best reason to conceal their real form (Spencer, *De leg. Hebr. rit.* III, iv, 2 ad fin.), and to avert, as far as possible, all further inquiry about them. See Ass, Worship of.

Arks, surmounted by mysterious winged guardians, were used in the religious service of most ancient nations, and especially in Egypt (Plutarch, *de Isid.* xxxix; Wilkinson's *Anc. Egypt.* v, 271; see Ark), but none of them involved the sublime and spiritual symbolism of the cherubim on the mercy-seat—at once guardians of the divine oracles and types of God's presence for the expiation of sin. But a question here arises, how the profuse introduction of these figures into the Tabernacle was reconcilable with obedience to the second commandment. It is certain that the rigid observance of this commandment was as serious a hinderance to the plastic arts among the Jews as the similar injunctions of the Koran are to the Mohammedans; and yet no word of condemnation was breathed against the cherubim, though Josephus even ventures to charge Solomon with distinct disobedience to the Law for placing oxen under the brazen sea (*Ant.* viii, 7, 5). The cherubim, indeed, were made in obedience to a distinct command; but how was it that they did not offend the consciences or seduce the allegiance of the theocratic Hebrews? The answer seems to be, that the second commandment only forbids the plastic arts when prostituted to the direct object of idolatry, and Tertullian is right in defending the introduction of cherubim, on the ground that they were a *simplex ornamentum* (*c. Marcion*, ii, 22); even the Talmudists allowed the use of images for purely decorative purposes (Kalisch *on Exod.* p. 346). Besides, they represented created beings *as* created beings, and also as themselves in the attitude of humility and adoration (Exod. xxv, 20; 1 Pet. i, 12), so that instead of violating the commandment they expressed its highest spirit, in thus vividly symbolizing God's supremacy over the creatures which stood on the highest step of life, and were, in fact, the ideal of absolute and perfect created existence (Bähr, *Symbol.* i, 340 sq.). We may add that the danger was less, because, in all probability, they were seen by none but the priests (Cornel. a Lapide *on Exod.* xxv, 8); and when, in the desert, the ark was moved from place to place, it was covered over *with a triple veil* (Num. iv, 5, 6), before which even the Levites were not suffered to approach it (Bochart, *Hieroz.* II, xxxiv, ad fin.). It may even be the case that the shape of the cherubim was designedly considered as indefinite and variable, that the tendency to worship them might still further be obviated. This wavering and indistinct conception of them was due to their symbolical character, a fact so thoroughly understood among *all* Oriental nations as at once to save the Jews from any strong temptation, and to raise them above the breath of suspicion.

Whether the golden calf constructed by Aaron might be, not the Apis of Egypt, but a representation of the antediluvian Cherubim, as some suppose, from its being made on "*a* feast to the Lord," and called "the *gods* of Israel" (Exod. xxxii, 5), and whether Jeroboam, in the erection of his two calves, intended a schismatic imitation of the sacred symbols in the Temple of Jerusalem rather than the introduction of a new species of idolatry (1 Kings xii, 28), we shall not stop to inquire. See Calf. But as paganism is a corruption of patriarchal worship, each nation having added something according to its own taste and fancy, perhaps we may find a confirmation of the views given above of the compound form of the cherubim, in the strange figures that are grouped together in the heathen deities. The numerous ox-heads, for instance, in the statue of the ancient Diana, and particularly the Asiatic idols, almost all of which exhibit several heads and arms attached to one person, or the heads of different animals combined, afford a collateral proof, similar to the universal prevalence of sacrifice, that the form of the primitive cherubim has been traditionally preserved and extended over a large portion of the world. This may indeed be shown by the above actual figures copied from ancient monuments, all of which illustrate some one or more of the notions which we attach to the cherubic forms; and while they afford material assistance to our ideas on the subject, they show that figures of this kind, as sacred symbols, were not peculiar to the Hebrews, and that their presence in the sanctuary was not calculated to excite any surprise among the neighboring nations, or to lead to the notion that the Jews also were worshippers of idols, for even in the pagan monument they never appear as idols, but as symbols; and it was very possibly this fact—that the cherubic figures were not liable to be misunderstood—which induced the Divine wisdom to permit their introduction into the most holy place.

Mr. Layard traces many striking points of analogy between the form and position of the above figures, especially between the last ones of the Assyrian group and the cherubim of the Temple: "Within the sacred oracle itself were the two cherubim of olive-wood, ten cubits high, with wings each five cubits long; and Solomon carved all the house around with *carved figures of cherubim, and palm-trees*, and open flowers, within and without. The cherubim have been described by Biblical commentators as mythic figures, uniting the human head with the body of a lion or an ox, and the wings of an eagle. If for the palm-trees we substitute the sacred tree of the Ninevite sculptures, and for the open flowers the Assyrian tulip-shaped ornament—objects most probably very nearly resembling each other—we find the oracle of the Temple was almost identical, in general form and in its ornaments, with some of the characters of Nimroud and Khorsabad. In the Assyrian halls, too, the winged human-headed bulls were on the side of the wall, and their wings, like those of the cherubim, 'touched one another in the midst of the house.' The dimensions of these figures were in some cases nearly the same, namely, fifteen feet square. The doors were also carved with cherubim, and palm-trees, and open flowers, and thus, with the other parts of the building, corresponded with those of the Assyrian palaces" (*Nineveh and Babylon*, 2d series, p. 643).

It appears, therefore, that the symbolic figure which the Hebrew generically designates as a *cherub*, was a composite creature-form, that finds a parallel in the religious insignia of Assyria, Egypt, and Persia, e. g. the sphinx, the winged bulls and lions of Nineveh, etc., a general prevalence which prevents the necessity of our regarding it as a mere adoption from the Egyptian ritual. In such forms (comp. the Chimæra of Greek and the Griffin of north-eastern fables) every imaginative people has sought to embody its notions either of the attributes of Divine essence, or of the vast powers

of Nature which transcend that of man. Among the Greeks the *dragon* (Photius, *Cod.* 190, p. 250), and among the Indians the *griffin* (Pliny, vii, 2), were especially such creatures of mythological imagination. See DRAGON. In the various legends of Hercules the bull and the lion constantly appear as forms of hostile and evil power; and some of the Persian sculptures apparently represent evil genii under similar quasi-cherubic forms. The Hebrew idea seems to limit the number of the cherubim. A pair (Exod. xxv, 18, etc.) were placed on the mercy-seat of the ark; a pair of colossal size overshadowed it in Solomon's Temple with the canopy of their contiguously extended wings. Ezekiel, i, 4-14, speaks of four, and similarly the apocalyptic *living creatures*, ζῶα (Rev. iv, 6), are four. So at the front or east of Eden were posted "*the* cherubim," as though the whole of some recognized number. They utter no voice, though one is "heard from above them," nor have dealings with men save to awe and repel. A "man clothed in linen" is introduced as a medium of communication between them and the prophet, whereas for a similar office one of the seraphim personally officiates; and these latter also "cry one to another." The cherubim are placed beneath the actual presence of Jehovah, whose moving throne they appear to draw (Gen. iii, 24; Ezek. i, 5, 25, 26; x, 1, 2, 6, 7; Isa. vi, 2, 3, 6). The expression, however, "the chariot (מֶרְכָּבָה) of the cherubim" (1 Chron. xxviii, 18) does not imply wheels, but the whole apparatus of ark and cherubim is probably so called in reference to its being carried on staves, and the words "chariot" and "cherubim" are in apposition. So a sedan might be called a "carriage," and the masc. form מֶרְכָּב is used for the body of a litter. See, however, Dorjen, *De cherub. Sanct.* (ap. Ugolini, vol. viii), where the opposite opinion is ably supported. The glory symbolizing that presence which eye cannot see rests or rides on them, or one of them, thence dismounts to the temple threshold, and then departs and mounts again (Ezek. x, 4, 18; comp. ix, 3; Psa. xviii, 10). There is in them an entire absence of human sympathy, and even on the mercy-seat they probably appeared not merely as admiring and wondering (1 Pet. i, 12), but as guardians of the covenant and avengers of its breach. A single figure there would have suggested an idol, which two, especially when represented as regarding something greater than themselves, could not do. They thus became subordinate, like the supporters to a shield, and are repeated, as it were the distinctive bearings of divine heraldry—the mark, carved or wrought, everywhere on the house and furniture of God (Exod. xxv, 20; 1 Kings vi, 29, 35; vii, 29, 36). Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat, and to be made "of the mercy-seat," which Abarbenel (Spencer, *De leg. Heb. ritual.* iii, diss. v) and others interpret of the same mass of gold with it, viz. wrought by hammering, not cast and then joined on. This seems doubtful; but from the word employed (מִקְשָׁה) the solidity of the metal may perhaps be inferred. They are called "cherubim of glory" (Heb. ix, 5), as on them the glory, when visible, rested; but, whether thus visibly symbolized or not, a perpetual presence of God is attributed to the Holy of Holies. They were anointed with the holy oil, like the ark itself and the other sacred furniture. Their wings were to be stretched upwards, and their faces "towards each other and towards the mercy-seat." It is remarkable that with such precise directions as to their position, attitude, and material, nothing, save that they were winged, is said concerning their shape. See TABERNACLE.

Probable Form of the Cherubic Type.

IV. *Their Meaning.*—All, whether ancients or moderns, have agreed that the cherubim were symbolical, but they have greatly differed as to their figurative design; many regarding them as having a twofold significance, both physical and metaphysical. They were clearly intended, in a general sense, to represent divine existences in immediate contact with Jehovah. This was the view of Chrysostom, Ambrose, Augustine, and the fathers generally (Sixt. Senensis, *Bibl. Sanct.* p. 848), and the Pseudo Dionysius places them second (between seraphim and thrones) in the nine orders of the celestial hierarchy (Dionys. Areop. *de Cœlest. Hier.* p. 5-9). The Cabalists, on the other hand, placed them ninth in their ten choirs of spirits (Buddæus, *Philos. Hebr.* p. 415). In a special sense, Philo regarded them as signifying the two hemispheres, and the flaming sword the motion of the planets, in which opinion he is joined by some moderns, who consider them to have been nothing more than astronomical emblems—the Lion and the Man being equivalent to Leo and Aquarius—the signs of the zodiac (Landseer, *Sab. Resear.* p. 315). Irenæus views them as emblematic of several things, such as the four elements, the four quarters of the globe, the four Gospels, the four universal covenants (*adv. Hæres.* iii, 11). Tertullian supposed that the cherubic figures, particularly the flaming sword, denoted the torrid zone (*Apol.* cap. 47). Justin Martyr imagined that the living creatures of Ezekiel were symbolical of Nebuchadnezzar, the Assyrian monarch, in his distress; when he ate grass like an ox, his hair was like a lion's, and his nails like a bird's claws (*Quæst.* xliv). Athanasius supposed that they were significant of the visible heavens (*Quæst. ad Antiocl.* cxxxv). The nature of the passages in which cherubim occur—passages poetical and highly wrought—the existence of exactly similar images among other nations, and the purely symbolic character of their form, has led not only Jewish allegorists like Philo, and Christian philosophers like Clemens of Alexandria, but even such writers as Hengstenberg, Keil, Neumann, etc., to deny them any personal reality; and in this way we may explain Zullich's definition of them as "mythical servants of Jehovah" (*Die Cherubim-Wagen*, Heidelberg, 1832). Thus, in the vision of Ezekiel, it is obvious that their animal shape and position implies subjection to the Almighty; that the four heads, uniting what were, according to the Jewish proverb, the four highest things in the world (Schöttgen's *Hor. Hebr.* ad Rev. iv.), viz. the lion among beasts, the ox among cattle, the eagle among birds, and man among all, while God is the highest of all—constitute them the representative and quintessence of creation, placed in subordination to the great Creator (Leyrer, in Zeller's *Wörterb.* s. v.). The heads, too, represent not only creatures, perfect after their kind, but also perfect *qualities*, as love, constancy, magnanimity, sublimity, the free consciousness of man, the strong courage of the lion, the enduring strength of the ox, the rapid flight of the eagle (Hoffman); and possibly the number four may

indicate the universe as composed of four elements or four quarters. The four traditional (?) standards of the quadrilateral Israelite encampment (Num. ii), the lion of Judah, the man of Reuben, the eagle of Dan, the ox of Ephraim, are far too uncertain to be relied upon. Their eyes represent universal knowledge and insight (comp. Ovid, *Metamor.* i, 624, and the similar symbol of the Phœnician god Taut, mentioned by Sanchoniatho, ap. Euseb. *Præp. Evang.* x, 39), for they are the *eyes of the Lord*, which run to and fro through the whole earth (Zech. iv, 10). The wings imply speed and ubiquity; the wheels are necessary for the throne-chariot, itself a perfect and royal emblem, and so used by other nations (Chrysost. *Orat.* xxxv, 1); and the straight feet imply the fiery gliding and lightning-like flash of their divine motion (νέποδες). We purposely avoid the error of pressing the minor particulars, such as those suggested by Clemens Alexandrinus, when he supposes that the twelve wings hint at the twelve signs of the zodiac (*Stromata*, V, cap. vi, sec. 37, p. 240, ed. Sylb.). Thus explained, they become a striking hieroglyphic of the dazzling, consummate beauty of universal creation, emanating from and subjected to the divine Creator, whose attributes are reflected in his works.

The leading opinions of moderns may be reduced to three systems. (1.) Hutchinson and his followers consider the cherubim as emblems of the Trinity, with man incorporated into the divine essence: in proof of which they remark that the words rendered "a flaming sword" (Gen. iii, 24) signify either a flaming fiery sword, as the words are rendered by the Sept., or, rather, a flame of fire and a sword or knife; so that, in this figure, there was exhibited in visible form, to the minds of our first parents, fire—the emblem of divine wrath, as well as an instrument for sacrifice—which, as it enfolded or revolved round itself, can mean nothing else than a picture of the satisfaction to be made by deity itself.—But the grand objection to this theory, where it is at all intelligible, is, that not only are the cherubim, in all the places of Scripture where they are introduced, described as distinct from God, and no more than his attendants, but that it represents the divine Being, who is a pure spirit, without parts, passions, or anything material, making a visible picture of himself, when in all ages, from the beginning of time, he has expressly prohibited "the likeness of anything in heaven above" (see Parkhurst, *Heb. Lexicon*, s. v.). (2.) Another system regards the cherubim as symbolical of the chief ruling powers by which God carries on the operations of nature. As the heaven of heavens was typified by the holy of holies in the Levitical tabernacle (Heb. ix, 8-12, 24-28), this system considers that the visible heavens may be typified by the holy place or the outer sanctuary, and accordingly finding, as its supporters imagine they do, the cherubim identified with the aerial firmament and its elements in such passages as the following: "He rode upon a *cherub*, and did fly, yea, he did fly upon the wings of the *wind*," where the last hemistich is exegetical of the former (Psa. xviii, 10); "Who rideth upon the heavens in thy help, and in his excellency upon the sky" (Deut. xxxiii, 26; Psa. lxviii, 4); "He maketh the clouds his chariot:" he is said to descend in fire (Exod. xix, 18), and between them he dwelt in light (1 Tim. vi, 16); and it was in this very manner he manifested his divine glory in the tabernacle and temple—they interpret the cherubim, on which the Lord is described as riding, to be symbolical of the wind, the clouds, the fire, the light; in short, the heavens, the atmosphere, the great physical powers by which the Creator and preserver of the universe carries on the operations of nature.—This view, however, although doubtless truly representing the *origin* of the cherubic symbol, fails, by reason of its vague and extensive character, to explain the peculiar form of representation adopted. (3.) A third system considers the cherubim, from their being instituted immediately after the Fall, as having particular reference to the redemption of man, and as symbolical of the great and active rulers or ministers of the Church. Those who adopt this theory are accustomed to refer to the living creatures, or cherubim, mentioned in the Apocalyptic vision (Rev. iv, 6), improperly rendered in our English translation "beasts" (ζῶα), and which, it is clear, were not angels, but redeemed men connected with the Church, and deeply interested in the blessings and glory procured by the Lamb. The same character may be ascribed to the living creatures in Ezekiel's visions, and to the cherubim, which stood over and looked into the mercy-seat, sprinkled with the blood of the atonement, and on the Shechinah, or divine glory arising from it, as well as the cherubic figures which were placed on the edge of Eden; and thus the cherubim, which are prominently introduced in all the three successive dispensations of the covenant of grace, appear to be symbols of those who, in every age, should officially study and proclaim the glory and manifold wisdom of God.—Of this view, likewise, it may be said that, while it assigns an adequate and plausible reason for the institution of some symbol having a moral import, it does not show why the special form in question should have been selected.

It is evident that the interpretation of the symbol must be as variable as the symbol itself, and we shall accordingly find that no *single* explanation of the cherubim can be accepted as adequate, but that the best of the various explanations contain elements of truth which melt and fade into each other, and are each true under one aspect. Unsatisfactory and vague as is the treatise of Philo "on the Cherubim and Flaming Sword," it has at least the merit of seizing this truth. Thus, discarding his astronomical vagaries which are alien to the spirit of Mosaism (Kalisch *on Exod.* p. 496), we may safely follow him in regarding the cherubim as emblems at once of divine perfection—personifications, in fact, of natural power employed in God's service, as De Wette holds; and emblems also of the divine attributes, his slowness to anger, his speed to love (Grotius on Exod. xxv, 18; Bochart, *Hieroz.* ii, 18; Rosenmüller, *Scholia in Ezek.* i; Philo, περὶ τῶν Χερουβ. καὶ τῆς φλογ. ῥομφ. § 7-9; *De Vita Mos.* p. 688). Both of these views are admissible; the cherubim represent at once the subordination of the universe to God (*Pirke*, R. Elieza, c. 3; *Shemoth Rabba*, § 23, ap Schoettgen, *Hor. Hebr.* ad Apoc. ix, 6, τῆς βασιλείας αὐτοῦ σύμβολον; *Isidor.* lib. iv, ep. 70; Alford on Rev. iv, 8), and the glory of him whose servants they are (Χερουβὶμ δόξης, Heb. ix, 5); "as standing on the highest step of created life, and uniting in themselves the most perfect created life, they are the most perfect revelation of God and the divine life." This is the conclusion of Bähr, whose whole treatment of the subject, though over-ingenious, is the most valuable contribution to a right understanding of this important and interesting question (*Symbolik*, i, 340).

As the other suggestions of their meaning are, for the most part, mere adaptations, they may simply be mentioned and passed over; as that the cherubim represent the four archangels; the four major prophets; the Church (Cocceius); the two uncreated angels, i. e. the Son and the Holy Spirit (Hulse); the two natures of Christ (Lightfoot); the four ages of the world (Kaiser, *De Cherubis humani generis mundique ætatum symbolis*, Erl. 1827); or God's fourfold covenant with man in Christ, as man, as sacrificed, as risen, and ascended (Arndt, *Wahres Christenthum*, iv, 1, 6). We may compare also the absurd explanation of Clermont, that they are the northern army of Chaldæans; and of Vatke, that they symbolize the destructive powers of the heathen gods. The very wide-spread and early fancy which attached the cherubic figures to the four evangelists is equally untenable, though it first appears in the Pastor

Hermas, and was adopted by the school of St. John (Iren. *adv. Hær.* iii, 2, 8; Athanas. *Opp.* v, 2, p. 155; August. *de consens. Evang.* i, 6; Jerome, *Prol. ad Evv.; ep.* 50, *ad Paulin.;* Greg. *Hom.* 4 *in Ezek.;* Adam de St. Vict. *Hymn. de Ss. Evang.* etc.). The four, in their union, were regarded as a symbol of the Redeemer (see Trench's *Sacred Latin Poetry*, p. 61; Mrs. Jamieson, *Sacred and Leg. Art.* p. 135). The last to maintain this view is Dr. Wordsworth (on Rev. iv), who is rightly answered by Dean Alford (ad loc.).

V. The *office* ascribed to these symbolic beings is mainly twofold—1, a protective vengeful function in guarding from man's too close intrusion the physical and moral splendors of a lost paradise and a sacred revelation; and, 2, to form the throne and chariot of the divine being in his earthly manifestations, and to guard the outskirts of his unapproachable glory (Eichhorn, *Einleit.* iii, § 80). The cherubim engraved and woven in the Temple decorations, while they symbolize this function, serve also as "a seal of similitude," i. e. as heraldic insignia of the divine attributes to mark Jehovah's presence by their guardian ministries (Isidor. iv, ep. 73). At the same time, from *another* point of view, they were no less significant of the fulness of life subordinated to him who created it. A reference to the Apocalypse enables us to combine these conceptions with a far sublimer truth, and to explain the connection of the cherubim with the mercy-seat as a type not only of vengeance, but of expiation and forgiveness. For in the vision of John these immortalities appear in the same choir with the redeemed innumerable multitude of the universal church (iv, 7; v, 13); no longer armed with flaming swords, with wrathful aspect and repellant silence, but mingling with the elders and joining in the new song. And here, too, we find the recovered Eden, the water of life flowing freely, and the tree of life with no flame to hedge it round. Thus it is in the Apocalypse that the fullest and divinest significance is attached to this profound emblem. In the cherubim of the last book of the Bible we find the highest explanation of the cherubim in the first. The apparent wrath which excluded man from the forfeited paradise was but the mercy in disguise which secured for him its final fruition in a nobler form of life. Thus, to give the last touch of meaning to this changeful symbol, we catch in it a gleam, dim at first, but growing into steady brightness, of that redeemed created perfection, that exalted spiritual body, for which is reserved hereafter the paradise of God. Beyond this we cannct go; but we have said enough to show the many-sided applicability of this inspired conception—a many-sidedness which is the strongest proof of its value and greatness.

VI. It is important to observe the extraordinary resemblance of the cherubim, as described in Scripture, to the symbolical religious fancies of heathen nations. It is not true, in *any sense*, to say, with Kurz, that the *animal* character is far more predominant in the emblems of heathen pantheism. Even if we concede (which is more than doubtful) that the simplest conception of cherubim was represented by winged men, we find four-winged and six-winged human figures in the sculptures of Nineveh (Layard, i, 125). In fact, *there is no single cherubic combination*, whether of bull, eagle, and man (Layard, *Nineveh*, i, 127); man, lion, and eagle (*Ibid.* pp. 70, 349); man and eagle (*Ibid.* i, 64); man and lion (*Ibid.* ii, 463); or, to take the most prevalent (both in Scripture and in the Assyrian sculptures), man and bull (*Ibid.* i), which may not be profusely paralleled. In fact, *these wood-cuts might stand for direct illustrations* of Ezek. xli, 19; Rev. iv, 6 sq.; 1 Kings vii, 29, etc.; and when we *also* find "wheels within wheels" represented in the same sculptures (*Ibid.* ii, 448), it is Mr. Layard's natural inference that Ezekiel, "seeking to typify certain divine attributes, chose forms familiar not only to himself, but to the people whom he addressed" (Id. *Ibid.;* see, too, *Nineveh and Babylon*, ii, 643); or, as we should greatly prefer to see it expressed, the familiar decorations of the Assyrian temples moulded the forms of his imagination even at its most exalted moments. But, as we have already seen, Ezekiel was far more likely to have been supplied with this imagery by the sacerdotal sympathies which impressed his memory with the minutest details of the temple at Jerusalem; and the same symbols were not exclusively Assyrian, but were no less familiar to the Egyptians (Porphyr. *de Abstinent.* iv, 9; Ritter, *Erdkunde*, viii, 947; Witsius, *Ægypt.* ii, 13), the Persians (Hdt. iii, 116; Ctes. *Ind.* xii; Plin. vii, 22; Wilkinson's *Anc. Egypt.*, passim; Chardin's and Niebuhr's *Travels*), the Greeks (Pausan. i, 24, 6), the Arabians (D'Herbelot, *Bibliothèque Orient.* s. v. Simorg), and many other nations (Plin. x, 49, 69; Parkhurst's *Lexicon*, s. v.). On this subject, generally, see Creuzer, *Symbol.* i, 495; Rhode, *Heil. Sage*, p. 217; and Rödiger in Ersch and Gruber's *Encyclopädie*, s. v. Cherub. The similarity to the sphinx is such as to have led, even in early times, to a very strong belief that the idea of the Mosaic cherubim was in some way derived from them (Clem. Alex. *Strom.* V, cap. vi, § 37, ed. Sylb. p. 240; Orig. *c. Cels.* iii, p. 121; Euseb. *Præp. Evang.* iii, 12). For a number of weighty arguments to this effect, see Bochart, *Hieroz.* II, xviii, xxxiv, and xli; Spencer, *ut sup.* bk. III, chap. iv; and especially Hengstenberg, *Die BB. Mos. u. Ægypt.* p. 157 sq. Besides these external coincidences, still more striking, perhaps, are the cherubic *functions* ascribed in Greek mythology to the fiery-breathing bulls which guarded the golden fleece (Ovid, *Met.* vii, 104), to the winged dragon of the Hesperides, to the resuscitated Phœnix, to the Gryphons (lion-eagles) who kept the Arimaspians from their guarded gold (Æsch. *Prom.* v, 843; Meld. ii, 1; comp. Milton, *Par. Lost*, ii, 943), and to the thundering-horses that draw the chariot of Jupiter (Horace, *Od.* i, 34, 7). Influenced by too exclusive an attention to these single resemblances, Herder identifies the cherubim with the mythic gold-guarding monsters of antiquity (*Geist. der Hebr. Poes.* i, 163), and J. D. Michaelis with the Equi Tonantes (*De Cherubis;* compare Velthuysen, *Von den Cherub.;* Schleusner, *Lex. N. Test.* s. v. Χερούβ). Similarly, Justin Martyr considers that Plato borrowed from the Scriptures his πτηνὸν ἅρμα, or "winged chariot" of Zeus (πρὸς Ἕλληνας, p. 80). From these conclusions we dissent. It seems far more likely that the Hebrews were, in the most ancient times, acquainted with a symbol familiar to so many nations, than to suppose either that they borrowed it from the Egyptians, or that any other nations adopted it from them. In fact, *the conception belongs to the common cycle of Oriental traditions*, fragments of which were freely adopted by the Hebrew writers, who always infused into them a nobler meaning and an unwonted truth.

VII. For further information on the subject, see (in addition to works and monographs cited above) Hufnagel, *Der Cherubhim im Paradiese* (Francfurt a. M. 1821 [fanciful]); Gabler in Eichhorn's *Urgeschichte*, II, i, 246 sq.; Meyer, *Bibeldeut.* p. 171 sq.; Carpzov, *Appar.* p. 268 sq.; Bemer, *Gottesd.* ii, 36 sq.; Grüneisen, in the *Stutt. Kunstblatt*, 1834, No. 1-6; *Jour. Sacred Lit.* Oct. 1856, p. 154 sq.; *Critici Sacri*, i, 120; Leone, *De Cherubinis* (Amst. 1647; also Helmst. 1665, and in Spanish, Amsterd. 1654); Wepler, *De Cherubis* (Marb. 1777); Geissler, *De Cherubim* (Vitemb. 1661); Hendewerk, *De Cherub. et Seraph.* (Regiom. 1837); Jac. Ches'alon (Heb. *Kesalon'*, כְּסָלוֹן, place of *confidence;* Sept. Χασαλών v. r. Χασλών), a place named as one of the landmarks on the west part of the north boundary of Judah, beyond Mt. Seir, and apparently situated on the shoulder (A. V. "side") of Mt. Jearim (Josh. xv, 10). This last, the "Mount of Forests," has not necessarily any connection with Kirjath-Jearim, though the two were evidently, from their proximity in this statement of the boundary, not far apart. See JEARIM. Chesalon was the next landmark to Bethshemesh, and it is quite in accordance with this that Dr. Robinson has observed a modern village named *Kesla*, about six miles to the N.E. of Ain-shems, on the western mountains of Judah (*Researches*, ii, 364, note; *Later Res.* p. 154). Eusebius and Jerome, in the *Onomasticon* (s. v. Χαλασών, *Chaslon*), mention a place of a similar name, but they differ as to its situation, the former placing it in Benjamin, the latter in Judah: both agree that it was a very large village in the neighborhood of Jerusalem. The position of the border-line at this point determines that it lay within Judah. See TRIBE.

Che'sed (Heb. *Ke'sed*, כֶּשֶׂד, of uncertain signif.; Sept. Χαζάδ, Vulg. *Cased*, Josephus Χάζαδος, *Ant.* i, 6, 5), the fourth of the eight sons of Nahor by Milcah (Gen. xxii, 22). B.C. cir. 2088. The name is the same as would be the sing. form of the Heb. for *Chaldæans;* but it is doubtful whether there is any connection. See CHALDÆA.

Che'sil (Heb. *Kesil'*, כְּסִיל, a *fool*, i. e. profane, as in Psa. xlix, 11, and elsewhere; Sept. Χεσίλ v. r. Χασειρ and Βαιθήλ; Vulg. *Cesil*), a town in the extreme south of Palestine, named between Eltolad and Hormah (Josh. xv, 30). In the list of towns given out of Judah to Simeon, the name BETHUL (q. v.) occurs in place of it (xix, 4), as if the one were identical with, or a corruption of, the other. This is confirmed by the reading of 1 Chron. iv, 30, BETHUEL; by that of the Sept. as given above, and by the mention in 1 Sam. xxx, 27, of a BETHEL among the cities of the extreme south. It is merely mentioned by Eusebius and Jerome in the *Onomasticon* (s. v. Χοιλή, *Chisil*). See also URION.

Chesnut. See CHESTNUT.

Chest is the rendering in certain passages in the Auth. Vers. of two distinct Hebrew terms: 1. אָרוֹן or אָרֹן, *aron'* (from אָרָה, to *gather;* Sept. κιβωτός, Vulg. *gazophylacium*), invariably used for the Ark (q. v.) of the Covenant, and, with two exceptions, for that only. (It is instructive to be reminded that there is no connection whatever between this word and that for the "ark" of Noah, and for the "ark" in which Moses was hid among the flags [both תֵּבָה, *tebah*]). The two exceptions alluded to are (*a*) the "coffin" or mummy-case in which the bones of Joseph were carried from Egypt (Gen. i, 26; rendered in the Targum of Ps.-Jon. by γλώσσοκομον—compare John xii, 6—in Hebrew letters: the reading of the whole passage is very singular); and (*b*) the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temple (2 Kings xii, 9, 10; 2 Chron. xxiv, 8-11). See COFFIN. 2. גְּנָזִים, *genazim'* (only in the plur.; from גָּנַז, to *hoard*, "chests," Ezek. xxvii, 24; "*treasures*," Esth. iii, 9; iv, 7).

Many boxes of various forms have been discovered among the Egyptian monuments. Some of these had lids resembling the curved summit of a royal canopy, and were ornamented with the usual cornice: others had a simple flat cover, and some few a pointed summit, resembling the shelving roof of a house. The sides were secured with wooden nails and glue, and dovetailed together. This last kind of lid was divided into two parts, one of which alone opened, turning on two small pins at the base, on the principle of the doors of their houses and temples; and, when necessary, the two knobs at the top could be tied together and sealed. These boxes were frequently of costly materials, veneered with rare woods, or made of ebony inlaid with ivory, painted with various devices, or stained to imitate materials of a valuable nature; and the mode of fastening the lid, and the curious substitute for a hinge given to some of them, show that the former was entirely removed, and that the box remained open while used. When not veneered, or inlaid with rare wood, the sides and lid were painted, and those intended for the tombs, to be deposited there in honor of the deceased, had usually funereal inscriptions or religious subjects painted upon them, among which were offerings presented by members of their family. (See Wilkinson, *Anc. Eg.* i, 163; ii, 116, abridgment.) See BOX.

Ancient Egyptian Chest.

Chester, an ancient city of England, on the river Dee, founded by the Romans. In the 13th century it had several monasteries, a college, and the hospitals of St. Anne and of St. John Baptist, the latter of which remains to this day. Under Henry VIII the Church of the monastery of St. Wesburgh became the Cathedral for the new see of Chester, which took in Cheshire (from the diocese of Litchfield) and Lancashire (from the diocese of York). The revenues of the dissolved monasteries were made a provision for the bishop, dean, and chapter. The present (1867) bishop is William Jacobson, DD., consecrated in 1865.

Chestnut-TREE (עַרְמוֹן, *armon';* Chald. דְּלוּב, Sept. πλάτανος [but in Ezek. ἐλάτη], Vulg. *platanus*), mentioned among the "speckled rods" which Jacob placed in the watering-troughs before the sheep (Gen xxx, 37): its grandeur is indicated in Ezek. xxxi, 8 (as well as in Ecclus. xxiv, 19), as one of the trees to which the Assyrian empire in its strength and beauty is likened, it being there noted for its magnificence, shooting its high boughs aloft. This description agrees well with the *plane-tree* (*Platanus Orientalis*), which is adopted by the above ancient translators, to which modern critical opinion inclines, and which actually grows in Palestine (see Ritter, *Erdk.* xi, 511 sq.). The *beech*, the *maple*, and the *chestnut* have been adopted, in different modern versions, as representing the Hebrew *armon*, but scarcely any one now doubts that it means the *plane-tree.* It may be remarked that this tree is in Genesis associated with others—the willow and the poplar—whose habits agree with it; they are all trees of the low grounds, and love to grow where the soil is rich and humid. This is strikingly illustrated by the fact that Russel (*N. H. of Aleppo*, i, 47) expressly names the plane, the willow, and the poplar (along with the ash) as trees which grow in the same situations near Aleppo. But this congruity would be lost if the chestnut were understood, as that tree prefers dry and hilly situations. There is a latent beauty also in the passage in Ezekiel, where, in describing the greatness and glory of Assyria, the prophet says, "The *armon*-trees were

not like his boughs, nor any tree in the garden of God like unto him for beauty." This not only expresses the grandeur of the tree, but is singularly appropriate, from the fact that the plane-trees (*chenars*, as they are called) in the plains of Assyria are of extraordinary size and beauty, in both respects exceeding even those of Palestine (comp. Plin. xii, 3; xvii, 18; Virg. *Georg.* iv, 146; Cicero, *Orat.* i, 7; Statius, *Sylv.* ii, 3, 39 sq.; Martial, ix, 61, 5). Moreover, the etymology of the word connects it with עָרַם, *aram'*, "*to be naked*," and with Arab. *'aram*, "*to strip off bark*," the shedding of its bark yearly being characteristic of the plane-tree (see Hiller in *Hierophyt.* i, 402). The following account discriminates the several species.

Oriental Plane-tree (*Platanus Orientalis*).

The Oriental plane-tree ranks in the Linnæan class and order *Monœcia Polyandria*, and in the natural order among the *Platanaceæ.* Westernmost Asia is its native country, although, according to Prof. Royle, it extends as far eastward as Cashmere. The stem is tall, erect, and covered with a smooth bark which annually falls off. The flowers are small and scarcely distinguishable: they come out a little before the leaves. The wood of the plane-tree is fine-grained, hard, and rather brittle than tough; when old, it is said to acquire dark veins, and to take the appearance of walnut-wood. In those situations which are favorable to its growth, huge branches spread out in all directions from the massive trunk, invested with broad, deeply-divided, and glossy green leaves. This body of rich foliage, joined to the smoothness of the stem and the symmetry of the general growth, renders the plane-tree one of the noblest objects in the vegetable kingdom. It has now, and had also of old (Plin. *Nat. Hist.* xii, 1), the reputation of being the tree which most effectually excludes the sun's beams in summer and most readily admits them in winter, thus affording the best shelter from the extremes of both seasons. For this reason it was planted near public buildings and palaces, a practice which the Greeks and Romans adopted; and the former delighted to adorn with it their academic walks and places of public exercise. In the East the plane seems to have been considered sacred, as the oak was formerly in Britain. This distinction is in most countries awarded to the most magnificent species of tree which it produces (see Kitto, *Nat. Hist. of Palest.* p. ccxlix). In Palestine, for instance, where the plane does not appear to have been very common, the terebinth seems to have possessed pre-eminence. See OAK. In the celebrated story of Xerxes arresting the march of his grand army before a noble plane-tree in Lydia, that he might render honor to it, and adorn its boughs with golden chains, bracelets, and other rich ornaments, the action was misunderstood and egregiously misrepresented by Ælian (*Var. Hist.* ii, 14). The Oriental plane endures more northern climates well, and grows to a fine tree, but not to the enormous size which it sometimes attains in the East. Pausanias (l. viii, c. 23) notices a noble plane in Arcadia, the planting of which was ascribed, by tradition, to Menelaus. Pliny (*Nat. Hist.* xii, 1) mentions one in Lycia, in the trunk of which had gradually been formed an immense cavern, eighty feet in circumference. L. Mutianus, thrice consul and governor of the province, with eighteen other persons, often dined and supped commodiously within it. Caligula also had a tree of this sort at his villa, near Velitræ, the hollow of which accommodated fifteen persons at dinner, with a proper suite of attendants. The emperor called it "*his nest;*" and it is highly probable that his friend, Herod Agrippa, may occasionally have been one of the fifteen birds who nestled there along with him. A fine specimen of the plane-tree was growing a few years ago (1844) at Vostitza, on the Gulf of Lepanto: it measured forty-six feet in circumference, according to the Rev. S. Clark, of Battersea, who has given an interesting account of it in John's *Forest Trees of Britain* (ii, 206). The plane-trees of Palestine in ancient days were probably more numerous than they are now, though modern travellers occasionally refer to them. Belon (*Obs. Sing.* ii, 105), La Roque (*Voy. de Syrie*, p. 197-199), and others, mention the groves of noble planes which adorn the plain of Antioch; and the last-named traveller records a night's rest which he enjoyed under planes of great beauty in a valley of Lebanon (p. 76). Buckingham names them among the trees which line the Jabbok (*Travels in Palestine*, ii, 108). Evelyn (in his *Sylva*) seems to ascribe the introduction of the plane-tree into England to the great Lord Bacon, who planted some which were still flourishing at Verulam in 1706. This was, perhaps, the first plantation of any note; but it appears from Turner's *Herbal* (published in 1551)

Branch of the Plane-tree.

that the tree was known and cultivated in that country before the chancellor was born. The *Platanus Orientalis*, or plane of Palestine and of classical antiquity, must not be confounded with the plane-tree commonly so called in Scotland and England. This last is a maple, *Acer pseudo-platanus*, and, like the rest of its saccharine family, it contains a sweet sap in the liburnum or under bark, for the sake of which it is often tapped by school-boys in spring. Even by those least familiar with plants, the false plane or sycamore may

readily be distinguished from the plane, Oriental and Occidental, by its seeds. In the former they are *keys*, or twin carpels, flattened into wing-like discs; in the latter they are globular caskets or catkins—balls more or less rough, which hang on the branches throughout the winter in graceful strings or tassels, suggesting the name of button-wood, by which the *P. Occidentalis* is usually known in the United States (see Celsii, *Hierob.* i, 512 sq.; Hasselquist, *Trav.* p. 526; *Penny Cyclopædia*, s. v. Plane). See BOTANY.

Chesul'loth (Heb. with the article *hak-Kesulloth'*, הַכְּסֻלּוֹת, *the hopes* [or, according to some, *the loins*, from its position on the "flank" or slope of the mountain; comp. *Chesil*, *Chesalon*, etc.]: Sept. Χασελώθ v. r. Χασαλώθ), a city of the tribe of Issachar, mentioned between Jezreel and Shunem, apparently near the border (Josh. xix, 18). It is probably the same with CHISLOTH-TABOR (q. v.) of verse 12, and the simple TABOR of 1 Chron. vi, 77; the modern *Iksal* (Robinson's *Researches*, iii, 182; comp. Schwarz, *Palest.* p. 166). Eusebius and Jerome (*Onomast.* s. v. Ἀχελεθώθ, *Accheseluth; Χασελοῦς, Chaselus*) describe it as still extant under the same name (Χεαλοῦς, *Chasalus*).

Chet'tiim (Χεττιείμ v. r. Χεττειείμ, Vulg. *Cethim*), a Græcized form (1 Macc. i, 1) of the Hebrew CHITTIM (q. v.).

Cheverus, JEAN LOUIS, a cardinal of the Roman Church, was born at Mayenne, France, Jan. 28, 1768, of a noble family, and was set apart for the Church, being made prior of Torbechet at thirteen years of age. He received his classical education at the college of Louis-le-Grand, and his theological at the seminary of St. Magloire. He was ordained priest in 1790, and soon after became vicar of Mayenne. During the later troubles of the Revolution he took refuge in England, exercised his ministry for a while in London, and then sailed for Boston, Mass., where he passed many years of successful labor in organizing and spreading the Roman Church. In 1808 he was made bishop, and continued his labors until 1823, when, on account of failing health, he returned to France as bishop of Montauban. In 1826 he was made archbishop of Bordeaux and peer of France. His labors among all classes, rich and poor, in hospitals and prisons, were incessant, during all his service in the highest ecclesiastical posts. In 1836 he was made cardinal, and he died of apoplexy July 19 of that year. Few clergymen of the Roman Church have been more highly and deservedly esteemed by Protestants than cardinal Cheverus.—Hoefer, *Nouv. Biog. Générale*, x, 270; *Christian Examiner*, xxvi, 88; Huen-Dubourg, *Vie de Cheverus* (Engl. tr. Philad. 8vo).

Cheynell, FRANCIS, an English Nonconformist, was born at Oxford in 1608, and was educated at the University there. He was elected fellow of Merton College in 1629, and took orders; but in 1640 he embraced the side of Parliament, and in 1643 was one of the assembly of divines and rector of Petworth. In 1647 he was made Margaret professor of divinity at Oxford, on leaving which he returned to his rectory at Petworth. At the Restoration (1662) he was deprived of his rectory, and retired to Preston, Sussex, where he died in 1665. He was a strong, if not bitter controvertist, and published, in 1643, *The Rise, Growth, and Danger of Socinianism*, in which archbishop Laud, Hales of Eton, Chillingworth, and other eminent divines are strongly charged with Socinianism. In 1644, after Chillingworth's death, Cheynell published *Chillingworthi Novissima, or the Sickness, Heresy, Death, and Burial of William Chillingworth*, with a severe, if not abusive dedication to Drs. Bayly, Prideaux, Fell, etc., who had given their imprimatur to Chillingworth's *Religion of Protestants*. After the dedication follows the narration itself, in which Cheynell relates how he became acquainted with "this man of reason," as he calls Chillingworth; what care he took of him, and how, as his illness increased, "they remembered him in their prayers, and prayed heartily that God would give him new light and new eyes, that he might see, and acknowledge, and recant his error; that he might deny his carnal reason and submit to faith."—*New Gen. Biog. Dict.* iii, 806; Sketch by Dr. Johnson, *Gentleman's Mag.* March and April, 1755; Calamy, *Nonconformist's Memorial*, ii, 467.

Che'zib (Heb. *Kezib'*, כְּזִיב, *false;* Sept. Χασβί), the birth-place of Shelah, Judah's youngest son by the daughter of Shuah (Gen. xxxviii, 5); probably the same with CHOZEBA (1 Chron. iv, 22), and also the ACHZIB (q. v.) of later times (Josh. xv, 44). Schwarz (*Palest.* p. 201) seems to confound it with the more northern city Achzib (Josh. xix, 29), in referring to a Talmudical notice of "the river of Chezib;" an error into which also Grotius was led from the reading (Κεζίβ) of the Sept. at Josh. xv, 44. Jerome, however (*Quæst. Hebr.* in loc.), regards the name as an appellation merely (so Aquila, in Montfaucon's ed. of Origen's *Hexapla*, De la Rue's *Orig. Opp.* v, 287), indicating that this was the last of Bathshuah's sons.

Chichester, an ancient city of Sussex, England, the see of a bishop. It was a Roman station. The present cathedral was built in the 13th century; it is 407 feet long, 150 wide, with a tower and spire 300 feet high. The diocese comprises nearly the whole of Sussex, with a total population, in 1861, of 363,735. It has 12 deaneries and 138,512 church sittings. The present (1867) bishop is Achmet Turner Gilbert, DD., consecrated in 1842. Two provincial councils were held here, in 1289 and 1292, convened by Gilbert, bishop of Chichester.—Landon, *Manual of Councils*, p. 130.

Chichele, Chichley, or **Chicheley**, HENRY, archbishop of Canterbury, was born at Higham Ferrers in 1362, and was educated at Oxford. In 1407 he was consecrated bishop of St. David's by Pope Gregory XII, and in 1409 he was sent to represent the province of Canterbury at the Council of Pisa (q. v.). In 1415 he became archbishop of Canterbury. He stimulated Henry V to the war against France (see Shakspeare, *Henry V*), which he afterwards bitterly regretted, erecting All Saints' College, which still stands, as a memorial of his penitence. Chichley was a man of vigor and courage; he resisted the king and the pope, when occasion demanded, as energetically as he resisted what he thought to be the heresy of the followers of Wickliffe. He died at Canterbury, April 12, 1443.—Duck, *Life of Chichele* (Lond. 1699, 8vo); Kippis, *Biographia Britannica*, iii, 499; Hook, *Eccles. Biog.* iii, 575 sq.

Chicken (νοσσίον, *pullus*), a word that occurs but twice in the English Bible (2 Esdr. i, 30; Matt. xxiii, 37), and only in allusion to "a hen (q. v.) gathering her chickens under her wings." See FOWL.

Chi'don (Heb. *Kidon'*, כִּידוֹן, *a dart;* Sept. Χειδών, but some omit), the name which in 1 Chron. xiii, 9 is given to the threshing-floor at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, took place, and the death of Uzzah; on this account it was afterwards known as PEREZ-UZZAH. In the parallel account in 2 Sam. vi, the name is given as NACHON (q. v.), which is nearly equivalent in sense. Whether there were really two distinct names for the same spot, or whether the one is simply a corruption or alteration of the other, is quite uncertain (see Gesenius, *Thesaur.* p. 683; Simonis, *Onom.* p. 339–40). Josephus (*Ant.* vii, 4, 2) has "Chidon" (Χειδών). Some have even ventured to identify the spot with the threshing-floor of Ornan the Jebusite, on Mount Moriah. The Jewish tradition (Jerome, *Quæst. Heb.* on 1 Chron. xi, 9) was that Chidon acquired its name from being the spot on which Joshua stood when he stretched out the weapon of that name (A. V. "spear") towards Ai (Josh. viii, 18). But this is irreconcilable with all our ideas of the topography of the locality, which was evi-

dently not far N.W. of Jerusalem, possibly at the present ruins *Khurbet el-Bistun* (Van de Velde's *Map*).

Chief Captain. See Chiliarch.

Chief Musician. See Music.

Chief of Asia. See Asiarch.

Chief of Three (רֹאשׁ הַשָּׁלִשִׁי, *rosh hash-shalishi'*, or rather שָׁלִשִׁים, *shalishim'*, the *third*-men), a title of Adino (q. v.) the Eznite, one of David's greatest braves (2 Sam. xxiii, 8; Sept. πρῶτος τῶν τριῶν; Vulg. *princeps inter trees;* A. V. "chief among the captains"), otherwise called Jashobeam (1 Chron. xi, 11, where the text again corruptly has שְׁלוֹשִׁים, *shaloshim';* Sept. πρωτότοκος τῶν τριάκοντα; Vulg. *princeps inter triginta;* A. V. "chief of the captains"), and also of Abishai (2 Sam. xxiii, 18, שְׁלֹשִׁי, τριῶν, *de tribus*, "among three"), and Amasa (1 Chron. xii, 18, שְׁלוֹשִׁים, τριάκοντα, *inter triginta*, "of the captains"). In all these passages it designates the superior officer or commander of the *tristatæ, essarii*, or warriors who fought three in a chariot, and formed the phalanx nearest the king's person (Lydius, *Syntagm. de re militari* (lib. ii, c. iii, p. 39). He is also briefly called הַשָּׁלִישׁ, *hash-Shalish'* (lit. *the ternary*) = *aid-de-camp*, or general executive officer (2 Kings vii, 2, 17, 19; ix, 25; xv, 25), like the Roman "master of horse." See Captain.

Chief Priest. See Priest.

Chief Ruler. See Synagogue.

Child (properly יֶלֶד, *ye'led*, τέκνον; but represented by several other Hebrew and Greek words; comp. Children). Mothers, in the earliest times, suckled their offspring themselves until they were from thirty months to three years of age. The day on which a child was weaned was a festival (Gen. xxi, 8; Exod. ii, 7, 9; 1 Sam. i, 22-24; 2 Chron. xxxi, 16; Matt. xxi, 16). Nurses were employed, in case the mother died before the child was old enough to be weaned, and when, from any circumstances, she was unable to afford a sufficient supply of milk for its nourishment. In later ages, when matrons had become more delicate, and thought themselves too infirm to fulfil the duties which naturally devolved upon them, nurses were employed to take their place, and were reckoned among the principal members of the family. They are, accordingly, in consequence of the respectable station which they sustained, frequently mentioned in sacred history (Gen. xxxv, 8; 2 Kings xi, 2; 2 Chron. xxii, 11). The sons remained till the fifth year in the care of the women; they then came into the father's hands, and were taught not only the arts and duties of life, but were instructed in the Mosaic law, and in all parts of the religion of their country (Deut. vi, 20-25; xi, 19). Those who wished to have them further instructed either employed private teachers, or sent them to some priest or Levite, who sometimes had a number of other children under his care. It appears from 1 Sam. i, 24-28, that there was a school near the holy tabernacle dedicated to the instruction of youth. There had been formerly many other schools of this kind, which had fallen into discredit, but were restored by the prophet Samuel, after whose time the members of the seminaries in question, who were denominated by way of distinction *the sons of the prophets*, acquired much celebrity. The daughters rarely departed from the apartments appropriated to the females, except when they went out with an urn to draw water, or occasionally joined in the labors of the field—as keeping sheep, which was the practice with those who belonged to those humbler stations in life in which the more ancient simplicity of manners was still retained (Gen. xxiv, 16; xxix, 9; Exod. ii, 16; 1 Sam. ix, 11; Ruth ii, 2; John iv, 7). They spent their time in learning those domestic and other arts, which are befitting a woman's situation and character, until they arrived at that period in life when they were to be sold, or, by a better fortune, given away in marriage (Prov. xxxi, 13; 2 Sam. xiii, 7). The daughters of such as possessed rank and wealth spent the greater part of their time within the walls of their palaces, and, in imitation of their mothers, amused themselves with dressing, singing, and dancing. Sometimes their apartments were the scenes of vice (Ezek. xxiii, 18). They went abroad very rarely, but they received with cordiality female visitants. The sports of children were doubtless such as have always prevailed among youth, especially in the East. Hackett (*Illustrations of Script.* p. 120) mentions having seen Oriental boys even amusing themselves with flying a kite, and playing at leap-frog and ball.

The more children—especially of male children—a person had among the Hebrews, the more was he honored, it being considered a mark of divine favor, while sterile people were, on the contrary, held in contempt (comp. Gen. xi, 30; xxx, 1; 1 Sam. ii, 5; 2 Sam. vi, 23; Psa. cxxvii, 3 sq.; cxxviii, 3; Luke i, 7; ii, 5). That children were often taken as bondsmen by a creditor for debts contracted by the father, is evident from 2 Kings iv, 1; Isa. l, 1; Neh. v, 5. Among the Hebrews a father had almost unlimited power over his children, nor do we find any law in the Pentateuch restricting that power to a certain age; it was, indeed, the parents who even selected wives for their sons (Gen. xxi, 21; Exod. xxi, 9, 10, 11; Judg. xiv, 2, 5). It might of course be expected, while they lived in their father's house, and were in a manner pensioners on his bounty, that he would exercise his authority over the children of his sons, as well as over the sons themselves. In this case the power of the father had no narrow limits, and whenever he found it necessary to resort to measures of severity, he was at liberty to inflict the extremity of punishment (Gen. xxxviii, 24). This power was so restricted by Moses that the father, if he judged the son worthy of death, was bound to bring the cause before a judge. But he enacted, at the same time, that the judge should pronounce sentence of death upon the son if, on inquiry, it could be proved that he had maltreated his father or mother, or that he was a spendthrift, or contumacious, and could not be reformed (Exod. xxi, 15, 17; Lev. xx, 9; Deut. xxi, 18, 21). It would appear, however, that a father's power over his daughters was still greater than that over his sons, since he might even annul a sacred vow made by a daughter, but not one made by a son (Num. xxx, 4, 16). Children cursing or assaulting their parents were punished by the Mosaical law with death (Exod. xxi, 15, 17; Lev. xx, 9), a remarkable instance of which is quoted by Christ (Matt. xv, 4, 6; Mark vii, 9, 13). The authority of the parents, and the service and love due to them, are recognised in the most prominent of the moral laws of the Jewish polity, the Ten Commandments (Exod. xx, 12); but the Pharisees devised a mode of evasion which our Lord strongly reprobates (Matt. xv, 5, 6; Mark vii, 11 13). The prophetic curse or blessing of the father also possessed no little efficacy (Gen. xlix, 2, 28). (On punishing children for their parents' faults, Ezek. xviii, see Musæus, *De jure puniendi liberos propter pecc. parent.* Lips. 1714.) Children who were slaves by birth are mentioned in the Scriptures as those born in the house, the children of maid-servants, the sons or children of the house (Gen. xiv, 14; xv, 3; xvii, 23; Psa. lxxxvi. 16; cxvi, 16). Few things appear more shocking to humanity than the custom, of which frequent mention is made in Scripture, of making children pass through fire in honor of Moloch, a custom the antiquity of which is proved by its having been repeatedly forbidden by Moses (Lev. xviii, 21; xx, 1, 5; 2 Kings xvi, 3). See Moloch.

There are some allusions in Scripture to the modes in which children were carried. These appear to be adequately represented by the existing usages, as

shown in the following cut, in which fig. 1 represents a Nestorian woman bearing her child bundled at her back, and fig. 2, an Egyptian female bearing her child

Oriental Mothers carrying their Children.

on her shoulder. The former mode appears to be alluded to in several places, and the latter in Isa. xlix, 22. (See Hackett's *Illustrations of Script.* p. 57.)

In Scripture the word "child," or "children," has considerable latitude; disciples are often called children or sons. Solomon, in his Proverbs, says to his disciple, "Hear, my son;" so also our Saviour (John xxi, 5). The descendants of a man, how remote soever, are denominated his sons or children, as "the children of Edom," "the children of Moab," "the children of Israel." Such expressions as "the children of light," "the children of darkness," "the children of the kingdom," signify those who follow truth, those who remain in error, and those who belong to the Church. Persons arrived almost at the age of maturity are sometimes called children. Thus Joseph is termed "the child," though he was at least sixteen years old (Gen. xxxvii, 30), and Benjamin, even when above thirty, was so denominated (Gen. xliv, 20). Solomon called himself a little child when he came to the kingdom of his father (1 Kings iii, 7). See ADOPTION; BIRTH; SON; INHERITANCE; EDUCATION, etc.; and comp. OFFSPRING.

CHILD OF GOD. The terms "child," "children," "babe," etc., are used in the N. T. in the following senses:

I. *Psychologically* these terms are used to denote a state of ignorance and of intellectual narrowness or darkness (Matt. xi, 16; Luke vii, 32; 1 Cor. xiii, 11: "When I was a child, I spake as a child, I understood as a child, I thought as a child;" xiv, 20: "Brethren, be not children in understanding;" Eph. iv, 14: "That we *henceforth* be no more children, tossed to and fro," etc.; Heb. v, 13: "For every one that useth milk, is unskilful in the word of righteousness: for he is a babe").

II. In the *ethical* sense, they are used, in the abstract, to designate a state of innocence, and, in the concrete, to signify the totality of children, towards whom holy duties are to be fulfilled by the community, and particularly by parents. We see even that the appellation "children" is used by the Lord as an expression of his greatest love (Mark x, 24). Children are then distinguished by moral preference; yet from this it does not follow that they are holy, but merely that they are yet uncontaminated by actual contact with the world. They are, therefore, partly to be imitated, partly to be restrained, and in all cases to be the objects of the greatest moral solicitude. As duties of parents towards children, the N. T. names the providing for their wants, giving them good examples, and bringing them up in the fear and knowledge of the Lord. Children, on the other hand, are to be obedient to their parents. That the N. T. does not give a more systematic view of the relative moral duties of parents and children is to be accounted for on the ground that where faith and love are found, all the rest follows naturally (Matt. vii, 9-11; Luke xi, 11: "What man is there of you, whom if his son ask bread, will he give him a stone? Or if he ask a fish, will he give him a serpent? If ye, then, being evil, know how to give good gifts unto your children, how much more shall your Father which is in heaven give good things to them that ask him?" xviii, 1-5; Mark ix, 34; Luke ix, 47, 48: "At the same time came the disciples unto Jesus, saying, Who is the greatest in the kingdom of heaven? And Jesus called a little child unto him, and set him in the midst of them, and said, Verily I say unto you, Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven. Whosoever, therefore, shall humble himself as this little child, the same is greatest in the kingdom of heaven; and whoso shall receive one such little child in my name, receiveth me"). See also Mark x, 13-16; Matt. xix, 13-15; Luke xviii, 15-17; 2 Cor. xii, 14; Eph. vi, 1-4; Col. iii, 20, 21.

III. In the *spiritual* sense, the expression "children" designates those who have become children of God through Christ. To be a child of God through Christ is to have attained the highest (moral) perfection, and the greatest degree of holiness of which human nature is susceptible. This consciousness of its holy purity is one of the characteristics of Christianity (Matt. xi, 19; Luke vii, 33-35: "The Son of man came eating and drinking, and they say, Behold, a man gluttonous, and a wine-bibber, a friend of publicans and sinners. But Wisdom is justified of her children;" i. e. those whom Christ recognises as his prove by words and deeds that they are the children of wisdom. See also Matt. v, 9; xv, 26; John i, 12; Rom. viii, 14-17: "For as many as are led by the Spirit of God, they are the sons of God. For ye have not received the spirit of bondage again to fear; but ye have received the Spirit of adoption, whereby we cry, Abba, Father. The Spirit itself beareth witness with our spirit that we are the children of God. And if children, then heirs; heirs of God, and joint heirs with Christ, if so be that we suffer with him, that we may be also glorified together;" Rom. ix, 8; Gal. iii, 26; iv, 5, 6; Eph. i, 5; Phil. ii, 15; 1 John iii, 1, 2, 9, 10; v, 1, 2; Eph. iii, 15; Luke xx, 36; Rom. viii, 23, etc.).—Krehl, *Handwörterb. d. N. T.* s. v. See ADOPTION.

Childbirth (τεκνογονία, "child-bearing"). The throes of accouchement appear in Gen. iii, 16, to be part of the doom incurred by woman for her agency in the fall in Eden. Her passive lot in thus continuing the race is aptly expressed in that primeval sentence: "Unto the woman he said, I will greatly multiply thy sorrow and thy conception; in sorrow thou shalt bring forth children; and thy desire shall be to thy husband, and he shall rule over thee." See COHABITATION. The language of the apostle in 1 Tim. ii, 15, implies that a patient endurance of this penalty shall contribute to woman's spiritual benefit. The Prayer-book of the Church of England prescribes a form of public thanksgiving to be offered for women after safe delivery in childbed. See BIRTH; CHURCHING.

Childs, JOHN WESLEY, a minister of the Methodist Episcopal Church South, was born in Calvert Co., Md., in 1800. In 1814 he went to Richmond, Va., where he was employed as a clerk. In 1826 he received license as a local preacher; in 1827 he entered the Baltimore Conference on probation; and in 1829 he was admitted into full connection. In 1844, when the Methodist Episcopal Church was divided on the slavery question, he adhered to the Southern Church, and continued to serve in important appointments up to the year of his death. He died May 9, 1850, at Norfolk, Va., in great peace. "His highest distinction lay in his extraordinary spirituality, his deadness to the world, his devotion to Christ; and in this respect it may reasonably be doubted whether he has had his superior in modern times."—Sprague, *Annals*, vii, 729.

Chil'eāb (Heb. *Kilab'* כִּלְאָב, *protected* by the *father*, i. e. *God;* Sept. Κελεάβ v. r. Δαλουΐα), the second son of king David by Abigail, Nabal's widow (2 Sam. iii, 3), called in the parallel passage (1 Chron. iii, 1) by the equivalent name DANIEL (q. v.). The reason of this twofold name is uncertain; but for the rabbinical notions concerning it, and some speculations of his own, see Bochart, *Hieroz.* i, 603.

Chili, a republic of South America, with an area of about 170,000 square miles, and, according to the census of April, 1865, a population of 2,524,476 souls, almost exclusively Roman Catholic. There is one Roman archbishopric at Santiago, and three bishoprics at Serena, la Conception, and San Carlos de Chiloe (Ancud). The number of parish priests in 1858 was 153, of convents of monks 41, of convents of nuns 7; and a law provided that in future none of the 13 provinces should have more than one convent of every order. In 1824 the landed property of the Church was confiscated, and since that time the clergy have been paid by the state. In the budget of 1847, 180,030 *pesos* [Spanish dollars] were appropriated for this purpose. The educational institutions are far ahead of those of any other South American state. At the University of Santiago, which was reorganized in 1842, and which superintends, as the Supreme Educational Board of the state, all other educational institutions, several German Protestant professors have been teaching since 1857. The *Rivista Cattolica*, published at Santiago, is considered by Romanists as one of the best papers of the Roman Church in South America.

In July, 1865, the Chilian Congress had a long and animated discussion on amending Article 5 of the Chilian Constitution, which is as follows: "The religion of the republic of Chili is the Roman Catholic, to the exclusion of the public exercise of any other." The discussion terminated in a way quite satisfactory to the Liberal party, notwithstanding the full strength of the Ultramontane party was brought to bear in favor of the old article. The amendment to the Constitution, as adopted by Congress and sanctioned by the executive, declared: 1. That worship within buildings belonging to private persons is allowed to those who do not profess the Roman Catholic religion; and, 2. That dissenters are allowed to establish and sustain private schools for the instruction of their own children. The first Protestant mission of Chili was established for Americans and Englishmen in Valparaiso in 1846, and has now become self-sustaining. The congregation had in 1857 50 communicants, and the number of Sunday-school scholars rose in 1859 to 100. A second Protestant mission has been established in Valparaiso for the German residents. In Santiago, the capital of the republic, the Protestant (chiefly American) residents in January, 1866, fitted up a chapel at an expense of $800, capable of seating 125 persons. The press of the city generally made a kindly notice of the opening exercises, in which the American and the English ministers took part, and not the least sign of dissatisfaction was manifested. The Protestants with great unanimity came forward in support of the movement, and within one week after the opening of the chapel all the pews were rented. In 1860 a missionary of the South American Missionary Society (of England), the Rev. Allen Gardiner, established himself at Lota, in Arauco Bay (Southern Chili), a town which derived its chief importance from the coal mines in its neighborhood. In 1859 not less than 34 of these were worked, and some 3000 workmen were connected with them. At the request of the English and Scotch families engaged in the Lota mines, Mr. Gardiner established Sunday services at the mission-house, and a Sunday-school for the children. The opposition at first shown by a portion of the Roman Catholic population was gradually overcome, and the Protestant mission procured and secured religious toleration for the Protestant community of the Lota mines, by a contract signed to that effect at the company's office in a public manner, and after a public meeting, and without a dissenting voice. The missionaries also took care of the spiritual interests of the sailors visiting Arauco Bay, and provided the German settlers in the neighborhood with opportunities of Christian worship. Having in the meanwhile acquired and perfected themselves in the Spanish language, they, in 1865 and 1866, made several itinerant visits into the territory of the Indians, and took the preliminary steps for establishing the Indian missions upon a firm basis. In 1866 the society had stations at Lota and Coquimbo, at El Carmea in Northern Patagonia, Keppel Island (Falkland), besides one or two stations among the Araucanian Indians. In Dec. 1866, the society's ship, the "Allen Gardiner," left England with four natives of the Terra del Fuego, who had received a Christian education in England. The first German missionary was sent to Southern Chili in 1866 by the Gustavus Adolphus Society of Germany. He began preaching half of the time at Orsono, and the other half at Puerto Monte, a (mostly German) town of 15,000 inhabitants, in a region which, as late as 1850, was peopled only by small bodies of savages. The German Protestants of this town have bought a house in the principal square, and propose to build a chapel.

Chiliarch (χιλίαρχος, *captain of a thousand;* A. V. "high captain," Mark vi, 21; "captain," John xviii, 12; Rev. xix, 18; elsewhere "chief captain"), a military title occurring frequently in the (Greek) New Test. in the following senses. See ARMY. 1. As a general state *officer* (Mark vi, 21; Acts xxv, 23; Rev. vi, 15; xix, 18; comp. Josephus, *Ant.* vii. 2, 2). 2. Specifically, a *tribune* of the soldiers among the Romans, six of whom formed the field officers of every "legion" (q. v.), corresponding in rank nearly to our *colonel* (see Smith's *Dict. of Class. Antiq.* s. v. Exercitus); in the N. T. spoken individually of Claudius Lysias, who, as military tribune, in the capacity of a modern *major*, commanded the garrison of Fort Antonia at Jerusalem (Acts xxi, 31 sq.; comp. Herodian, ii, 12, 18; Dion. Hal. *Ant.* vi, 4). 3. Particularly applied to the *præfect* or (Levitical) superintendent of order in the Temple (John xviii, 12). See CAPTAIN.

Chiliasm. See MILLENNIUM.

Chiliasts. See ADVENTISTS; MILLENARIANS.

Chil'iōn (Heb. *Kilyon'*, כִּלְיוֹן, *pining;* Sept. Χελεών v. r. Χελαιών), the younger son of Elimelech and Naomi of Bethlehem, and husband of Orpah, Ruth's sister; he died childless in the country of Moab (Ruth i, 2; iv, 9). B.C. 1360.

Chillingworth, WILLIAM, an eminent English divine and controvertist, was born at Oxford, October, 1602. (The following account of him is modified from an article in the *English Cyclopædia*, which is based on the *Biographia Britannica*.) In 1618 he was a scholar, and in 1628 a fellow, of Trinity College in that University. Some curious memoirs of him are preserved by Anth. Wood ("Athen. Oxon." c. 20), who says "he would often walk in the college grove, and dispute with any scholar he met, purposely to facilitate and make the way of *wrangling* common with him, which was a fashion used in those days, especially among the disputing theologists, or those who set themselves apart purposely for divinity." The comparative merits of the English and Romish churches were at that time a subject of zealous and incessant disputation among the University students, and several learned Jesuits succeeded in making distinguished proselytes among the Protestant clergy and nobility. Chillingworth, being an able disputant, was singled out by the famous Jesuit Fisher, alias Johannes Perseus (*Biblioth. Soc. Jesu*), by whom he was convinced of the necessity for an infallible living "Rule of Faith." On this he at once adopted the Roman Catholic system, wrote out his reasons for abjuring

Protestantism, and joined the Jesuits in their college at Douay. After the lapse of a few months, the arguments addressed to him by his godfather Laud, then bishop of London, induced him to abandon his new faith, and he returned to Oxford in 1631, where he passed about four years in reconsidering the Protestant tenets. The reading of Daillé on the *Right Use of the Fathers* is said to have finally determined him.

In 1635 he published his great work, *The Religion of Protestants, a safe Way to Salvation.* It passed through two editions in less than five months. The principle of Chillingworth is that the volume of Divine Scriptures, ascertained to be such by the ordinary rules of historical and critical investigation, is to be considered the sole authority of Christians, to the utter exclusion of ecclesiastical tradition. The Jesuit Knott, alias Matthias Wilson (*Biblioth. Patrum Soc. Jesu*, p. 185), contended that he "destroyed the nature of faith by resolving it into reason." Cheynell (q. v.) also opposed Chillingworth from the Puritan side. Chillingworth in the mean time, unable to approve every statement in the Thirty-nine Articles, refused to accept any preferment in the Church. "However, in a very short time he was persuaded by the arguments of Sheldon and Laud that peace and union are the real object of subscription, not belief or assent—a doctrine held by Archbishop Sancroft and many other eminent divines. Accordingly he accepted the chancellorship of Salisbury, with the prebend of Brixworth, Northamptonshire, annexed. Chillingworth, in 1640, was deputed by the chapter of Salisbury as their proctor to the Convocation in London. He was attached very zealously to the royal party, and wrote a treatise (unpublished) on *The Unlawfulness of resisting the lawful Prince, although most impious, tyrannical, and idolatrous.*" Being present in the army of Charles I at the siege of Gloucester, August, 1643, he acted as engineer, and devised the construction of engines, in imitation of the Roman "testudines cum pluteis," to assault the rebels and take the city by storm. Having accompanied the king's forces under Lord Hopton to Arundel Castle, he was there, with his comrades, taken prisoner by the Parliament army under Sir William Waller, and falling ill, he was thence conveyed to the bishop's palace at Chichester, where he died, and was buried in January, 1644. (The precise day is not ascertained, but it was probably January 30.) Dr. Cheynell, then rector of Petworth, who had shown Chillingworth great kindness during his illness, appeared at the grave, with the work of Chillingworth (*Religion of Protestants*) in his hand, and, after an admonitory oration on the dangerous tendency of its rationalism, he flung it into the grave, exclaiming, "Get thee gone, thou cursed book, which has seduced so many precious souls; get thee gone, thou corrupt, rotten book, earth to earth, dust to dust—go rot with thy author!" See CHEYNELL.

The result of his remarkable proficiency in "wrangling" is stated by his friend Lord Clarendon (*History of the Rebellion*) to have been that "Chillingworth had contracted such an irresolution and habit of doubting, that at last he was confident of nothing." Tillotson styled him "the imcomparable Chillingworth;" and Locke says (on "Education"), "If you would have your son to reason well, let him read Chillingworth;" and again (on "Study"), "For attaining right reasoning I propose the constant reading of Chillingworth; for this purpose he deserves to be read over and over again;" but Anth. Wood's opinion is not outdone by any, for he declares that "Chillingworth had such extraordinary clear reason that, if the great Turk or the devil could be converted, *he* was able to do it." In theology he is classed with the "Latitudinarians" (q. v.). The best edition of *The Religion of Protestants* is that in fol. 1742, with sermons, etc., and a life of the author by Dr. Birch. It has been often reprinted.—Des Maizeaux, *Life of Chillingworth* (1725, 8vo); Kippis, *Biographia Britannica*, iii, 508 sq.; Hook, *Eccles. Biography*, iv, 1. The best modern edition of his works is that of Oxford, 1838 (3 vols. 8vo). There is also a cheap American edition (8vo), with *Life* by Birch (Philadelphia, 1848).

Chil'mad (Heb. *Kilmad'*, כִּלְמַד, etymology unknown; Sept. Χαρμάν v. r. Χαλμάν and Χαλμάβ; Vulg. *Chelmad*), an Asiatic place or country mentioned, in conjunction with Sheba and Asshur, as a trading emporium with the Tyrians (Ezek. xxvii, 23). The only name bearing any similarity to it is *Charmande* (Χαρμάνδη), a "large and flourishing" town near the Euphrates, between the Mascas and the Babylonian frontier (Xen. *Anab.* i, 5, 10; comp. Steph. Byz. p. 754), an identification generally adopted since Bochart (*Canaan*, i, 18, p. 480). Hitzig (*Comment. on Ezek.* l. c.) proposes to alter the punctuation to כְּלִמֻּד, *Ke-limmud'*, giving the sense "Asshur was *as* thy *pupil* in commerce," as first suggested by Kimchi (in loc.). The Chaldee Targum has מָדַי, *Media*. For other conjectures, see Rosenmüller in loc. See CHALDÆA, p. 198.

Chime. See BELL; CYMBAL.

Chimere (Fr. *chimère*, from the Italian *zimarra*). The upper robe worn by a bishop, to which the lawn sleeves are generally attached. Before Elizabeth's time the bishops wore a scarlet chimere over the rochet, as they still do when assembled in convocation; but bishop Hooper having scrupled at the scarlet, it was changed for black satin.—Palmer, *Orig. Liturgicæ*, ii, 319.

Chim'ham (Heb. *Kimham'*, כִּמְהָם, *pining;* Sept. Χιμαάμ v. r. Χαμαάμ), a follower, and probably a son (Joseph. Ἀχίμανος; *Ant.* vii, 11, 4; and comp. 1 Kings ii, 7) of Barzillai the Gileadite, who returned in his stead from beyond Jordan with David on his restoration after Absalom's rebellion (2 Sam. xix, 37, 38, 40, which last verse gives the name as כִּמְהָן, *Kimhan'*). B.C. 1023. David appears to have bestowed on him, as a reward for his loyalty, a possession at Bethlehem, on which, in later times, an inn or *khan* (גֵּרוּת), called after him (Sept. Γηβηρωθχαμάαμ; Vulg. *peregrinantes in Chamaam;* A. V. "habitation of Chimham;" the text has the name כִּמְוֹהָם, i. e. כְּמוּהָם, *Kemuham';* Sept. v. r. Γαβηρωχάμα, γῇ Βαρῶθ Χαμάαμ, etc.), was standing, well known as the starting-point for travellers from Jerusalem to Egypt (Jer. xli, 17). Blunt notices in this mention of the dwelling of Chimham at Bethlehem an indication of the actual munificence of David to the family of Barzillai, for which we are prepared by the narrative in Samuel and Kings (*Undesigned Coincidences*, 6th ed. p. 150). See INN.

Chimney (אֲרֻבָּה, *arubbah'*, a *lattice*, in the sing., Hos. xiii, 3; Sept. καπνοδόχη; Vulg. *fumarium;* elsewhere in the plur. a *window*, as closed by lattice-work instead of glass, Eccl. xii, 3; a *dove-cote*, as sealed with lattice-work, Isa. lx, 8, especially in the phrase "windows of heaven" [q. v.]), an opening covered with lattice-work through which the smoke passes (Hos. xiii, 3). The same word is elsewhere rendered "window." Houses in the East are not furnished with stoves and fireplaces as among us. The fuel is heaped into a pot, which is placed in a part hollowed out for that purpose in the centre of the paved floor. The smoke, therefore, escapes through the windows (Isa. xliv, 16; xlvii, 14). See HOUSE. Sometimes the fire is placed directly in the hollow place, or hearth, in the middle of the floor, as mentioned by Jeremiah (xxxvi, 22). Chimneys appear to have been employed in the round towers for furnaces, but never in dwelling-houses. They were termed *Cor-Ashan*, a smoking furnace, which is the name of a city mentioned in 1 Sam. xxx, 30, probably where many workers in metal resided. Such appears to be referred to by the

"chimneys in Sion" of the Apocrypha (2 Esdr. vi, 4, *caminus*). See FURNACE.

China (see SINIM), a vast country of Asia, extending (including its dependencies) from 20° to 56° N., and from 144° 50′ E. to 90° E. Its area is over four and a half million square miles, including one third of Asia, and nearly one tenth of the habitable globe. The empire is divided into three principal parts: *first*, the eighteen provinces; *second*, Manchooria; *third*, colonial possessions. The last includes Mongolia, Sungaria, Eastern Turkistan, Roko-nor, and Thibet. The *second* is the native country of the Manchoos, the reigning family in China, and includes the territory lying east of the Inner Duarian Mountains, and north of the Gulf of Lian Yung. The *first* division is China Proper (between 18° and 40° N. lat., including Hainan on the south; and between 98° and 124° E. long.). It is the only part settled by Chinese. "It lies on the eastern slope of the high table-land of Central Asia, and in the south-east angle of the continent, and for beauty of scenery, fertility of soil, salubrity of climate, magnificent and beautiful rivers, and variety and abundance of its productions, will compare with any portion of the globe" (Williams, *Middle Kingdom*, i, 7). Its estimated area is nearly 2,000,000 square miles, or two fifths of the empire.

Map of China Proper.

I. *Population, Usages, etc.*—The total population of China Proper was 371 millions in 1815, 396 millions in 1852, and is at present estimated at 410 or 420 millions.

This vast population has an ancient and peculiar civilization. The Chinese are generally classed in the Mongolian variety of the human race. "A tawny or parchment-colored skin, black hair, lank and coarse, a thin beard, oblique eyes, and high cheek-bones, are the principal characteristics of the race. Of the general character of the Chinese, it is not easy to form a fair and impartial judgment; and those who have resided long in the country, and know them well, have arrived at very different conclusions. M. Huc asserts that they are 'destitute of religious feelings and beliefs,' 'skeptical and indifferent to everything that concerns the moral side of man,' 'their whole lives but materialism put in action;' but 'all this,' says Mr. Meadows (*The Chinese and their Rebellions*, Lond. 1856), 'is baseless calumny of the higher life of a great portion of the human race.' He admits, indeed, that these charges are true of the mass of the Chinese, just as they are true of the English, French, and Americans; but as among these there is a large amount of generosity and right feeling, and also 'a minority higher in nature, actuated by higher motives, aiming at higher aims,' so also, he maintains, is there among the Chinese a similar right feeling, and a like minority who live a higher life than the people generally. The Chinese are, as a race, unwarlike, fond of peace and domestic order, capable of a high degree of organization and local self-government, sober, industrious, practical, unimaginative, literary, and deeply imbued with the mercantile spirit. It is to be observed that the inhabitants of China Proper are essentially one people, the differences, except in dialect, being hardly more marked than between the Northumbrian peasant and the Cornish miner. The south-eastern Chinese—the people of Kwang-tung, Fuh-keen, and the south of Che-keang—are the most restless and enterprising in all the eighteen provinces, and may be regarded as the Anglo-Saxons of Asia. In the mountainous districts of the four south-eastern provinces of China, but principally in Kwang-se, are certain tribes who maintain a rude independence, wear a peculiar dress, and are descended from the aboriginal inhabitants of China. Of these the Meaou-tze are the best known.

"Women hold a very inferior position, and are little better than slaves. Polygamy is not recognised by law, but secondary wives are common, especially when the first proves barren. Infanticide, though regarded as a crime, is undoubtedly practised to some extent, as is proved by edicts issued against it. Milne (*Life in China*) denies its prevalence [but Doolittle (vol. ii, ch. viii) abundantly confirms it]. Parents possess almost unlimited authority over their children. The intercourse of the Chinese with each other, especially in the upper classes, is regulated by a tedious and elaborate etiquette; indeed, they are the slaves of custom, and everything is done by precedent. 'A Chinaman,' says Mr. Oliphant, 'has wonderful command of feature; he generally looks most pleased when he has least reason to be so, and maintains an expression of imperturbable politeness and amiability when he is secretly regretting devoutly that he cannot bastinade you to death.' The *Le-King*, or Book of Rites, regulates Chinese manners, and is one cause of their unchangeableness, for here they are stereotyped and handed down from age to age. The ceremonial usages of China have been estimated at 3000, and one of the tribunals at Pekin—the Board of Rites—is charged with their interpretation.

"In everything that relates to death and sepulture, the customs of the Chinese are singular. They meet their last enemy with apparent unconcern; but, while their future state troubles them little, they regard the quality of their coffins as of vital importance, and frequently provide them during their lifetime; indeed, a coffin is reckoned a most acceptable present, and is frequently given by children to their parents. Education, as the high road to official employment, to rank, wealth, and influence, is eagerly sought by all classes. Literary proficiency (confined, however, to the ancient 'classics' of the country) commands everywhere respect and consideration, and primary instruction penetrates to the remotest villages. Self-supporting day-schools are universal throughout the country, and the office of teacher is followed by a great number of the *literati*. Government provides state examiners, but does not otherwise assist in the education of the people" (Chambers, *Encyclopædia*, s. v.). The best modern account of the customs and religious usages of the Chinese is given in Doolittle's *Social Life of the Chinese* (N. Y., Harper and Brothers, 1865, 2 vols. 12mo). See also Oliphant, *Narrative of the Earl of Elgin's Mission to China and Japan* (N. Y., Harper and Brothers, 1859, 8vo).

There is a general impression that the *climate* of China is specially insalubrious. That this is not so may be seen from the following statement, condensed from the *Chinese Repository* (vol. xvi, p. 12 sq.): "From the commencement of Protestant missions in China, by the Rev. Dr. Morrison, A.D. 1807 to 1847, a period of forty years, *eighty-six* missionaries had entered this field. During that time *twelve* died, and *twenty-three* retired from the work. Of those who died, one had lived twenty-seven years in the field, another sixteen years, two for eight years, and the rest for shorter periods. Thus, on an average, during forty years, the number of deaths among the Protestant missionaries was at the *rate of one in three years*. Of those who retired from the work, some engaged in other departments of labor in China; some returned, for various reasons, to their native land, and others were obliged, in consequence of ill health, to leave the field. Forty-one of the eighty-six are still in China. Of these, one has been more than thirty years in the field, and still enjoys excellent health. Others have been here for twenty, ten, and five years, according to the time they entered the work. We have not the means for making an extensive comparison, but we think these statistics will compare favorably with those of any body of ministers in America or England. It should also be remembered, that as China has only recently been opened to missionaries, a great part of those referred to in the foregoing calculation labored at other places on the coast, south of China—as Malacca, Singapore, and Batavia—where the climate is warmer and more unwholesome than in China. From these statements, we think ourselves justified in saying that the opinion in regard to the unwholesomeness of this climate is not sustained by facts" (Maclay, in *Methodist Quarterly*, Oct. 1850, p. 596).

II. *Religions of China* (modified from Pierer, *Universal-Lexikon*, iv, 6).—1. *Primitive Religion*. The oldest religion of the Chinese was very simple. Their supreme object of worship was *Schanti* (supreme ruler; also called during his life *Té-en*, *Tion*, or *Tien* [Heaven]). Objects of inferior worship were the spirit of the earth, the spirits of the cities, the mountains, the streams, the tutelar deities of agriculture, of the hearth, of the borders, of the gates, the originators of agriculture and of the raising of silk-worms, the wise men of olden times, the souls of ancestors, particularly of the deceased emperors. The gods were to be propitiated by prayer, and their favor purchased by sacrifices. Nowhere in this system do we find any trace of immortality or of a moral law.

2. *Confucianism*.—After the fall of the *Tscheu* dynasty this old religion fell into disuse. About B.C. 551 appeared the reformer Kong-fu-tse (see CONFUCIUS), who attempted to introduce better morals, and at the same time to improve the political and social relations of the people. Confucius taught that from the Original Being *Tai-ki* proceeded *Yang* and *Yen*. Yang, the *Perfect*, is the essence of heaven, of the sun, day, heat, and manhood, and is represented by ———. Yen, the *Imperfect*, is the essence of the moon, earth, night, cold, and womanhood, and is represented by —— ——. These two, by simple combination, give four signs (Sse-si-ang), viz. ⚌, ⚎, ⚍, ⚏; and by double combination the eight trigrammes of the *Kua*, viz. ☰ Heaven, ☱ the original dampness, ☲ the fire, ☴ wind, ☵ water, ☶ mountains, ☳ thunder, ☷ the earth. These figures, disposed in a circle, were used by Confucius to illustrate the creation of the world. They had also an ethical meaning, being used to represent the cardinal virtues, piety, morality, justice, and chastity. But of any spoken or written revelation there is no trace in his doctrines. Confucius says himself that the Heavens are silent; they are to be known in their effects, but no further. Those who obey the law of Heaven as presented in Nature will be happy; those who do not, become unhappy. In this system we find no notion either of immortality or of religious doctrine; it contemplates this life only, not the future. It has no special priesthood nor temples; each family sacrifices to the tutelar deities of the household in its own dwelling, but the emperor alone is permitted to sacrifice to the highest Heaven. The writings of Confucius are read and expounded with great solemnity on the 1st and 15th of every month by a mandarin in robes of ceremony, and Confucius himself is honored as a saint. His doctrines are followed by the higher and more cultivated classes of China almost universally. The golden rule of the Saviour, which Locke designates as the foundation of all social virtue, is found among the sayings of Confucius in the negative form: "What you do not wish done to yourself, do not do to others." In the "Conversations," bk. xv, ch. xxiii, it appears condensed, like a telegram, into eight characters, a good specimen of Chinese style:

ki su pok ŭk uk sic ŭ ing.
self what not wish not do to man.

3. *Lao-Tse* or *Lŏ-chŭ*.—Nearly on a level with Confucius we find the reformer and philosopher Lao-tse (Lao-kiun) or Lŏ-chŭ, who considers the *Tao* (or *Original Reason*) as the origin of all things, from whom pro-

ceeded at first one, then two, then three divine natures (*Ki*, *Hi*, *Quei*). His *moral* teaching is that man is to enjoy life, the highest aim being to become free from external evils and from inward cares. In this religion (the followers of which are called *Tao-sse*, Tauists) we find a belief in spirits having an influence over the destinies of man. After death the material part only of man belongs to the earth; the higher and lower spiritual parts (*Ling* and *Hu-en*) pass, after this life, into different spirits. Each place has its tutelar spirits; bad spirits always lead man into evil, but they are confined to the earth. This religion has a particular priesthood (in the higher degrees of which celibacy is enforced), and a great number of temples. It was originally embraced by the higher and richer classes, but has much degenerated of late, and its priests have become little better than jugglers.

"*Sang Ching*, the 'Three Pure Ones,' is the title of certain three idols found in temples belonging to the Tauist religion and worshipped by Tauist priests. The images are seated side by side. One of them, as some explain, represents Lŏ-chŭ, or the '*Old Boy*,' the founder of that religion. Others explain that the three images refer to three different incarnations of Lŏ-chŭ. There is very little known among the common people about these divinities, and they are very seldom worshipped by them. Tauist priests of both classes universally worship the Three Pure Ones" (Doolittle, *Social Life of the Chinese*, i, 249).

The Three Pure Ones.

4. *Buddha.*—The third religion of China is that of *Fo*, or *Buddha*, introduced from India about the year A.D. 65, which, however, became commingled with the remains of the old Chinese religion and with the maxims of Confucius. With the great majority of the people it has sunk into a coarse idolatry. The Dalai Lama is in China replaced by the *Ban-dschi-in-er-de-ni* as the spiritual head. The *priests* are called bonzes (Chinese *Seng* or *Ho-shang*), and number more than one million. The lower orders of priests are ignorant, live in convents, and go about begging; the higher orders (*Ta-ho-shang*) are educated, and obliged to study their religious books. There are also female bonzes, living in convents like the Romanist nuns. The *temples* are either mere chapels, or else large edifices surrounded by columns, at the end of which is a hall (*Ting*) containing the image of the god. The larger temples are merely a reunion of several smaller ones, having in the corners pavilions two stories high, in which the image of the god is kept, and which are surmounted by pyramidal octagonal towers (*Taa*) 7 to 10 stories in height, each story being separated from the next by a cornice projecting in imitation of a Chinese roof, and from each angle of which depend dragon-heads and bells. By the side of the hall are the cells of the bonzes, and accommodations for a number of animals. On occasions of great ceremony, such as the feast of the temple of *Té-en* (Heaven) and *Te* (Earth), at Pekin, the New Year's day offering, the equinox, the processions of July and August in honor of rain, the feast of the dead, and the emperor's plowing (which is also considered as a religious ceremony), the emperor officiates as high-priest. Buddhism, although the religion of the emperor, is not the religion of the state, and is actually only tolerated, like the *Tao-sse*. Both systems have been so much altered by the influence of the doctrine of Confucius that the three religions can morally be considered as but one.

Religion (so far as professing it is concerned) is in China confined principally to the educated classes, somewhat like science in other countries. The great mass of the people live on without making any distinction between the different religions, and pray in any temple without inquiring as to its form of worship. But the only worship which really seems to carry the minds and hearts of the people with it is the filial worship of ancestors.

"The hall of ancestors is found in the house of almost every member of the family, but always in that of the eldest son. In rich families it is a separate building, in others a room set apart for the purpose, and in many a mere shelf or shrine. The tablet consists of a board called *chin chu*, i. e. house of the spirit, about twelve inches long and three wide, placed upright in a block, and having the name, quality, and date of birth and death carved in the wood. A receptacle is often cut

Worshipping the Ancestral Tablet in its Niche.—(From Doolittle's China.)

in the back, containing pieces of paper bearing the names of the higher ancestors, or other members of the family. Incense and papers are daily burned before them, accompanied by a bow or act of homage, forming, in fact, a sort of family prayer. The tablets are ranged in chronological order, those of the same generation being placed in a line. When the hall is large and the family rich, no pains are spared to adorn it with banners and insignia of wealth and rank; and on festival days it serves as a convenient place for friends to meet, or, indeed, for any extraordinary family occasion. A person residing near Macao spent about $1500 in the erection of a hall, and on the dedication day the female members of the family assembled with his sons and descendants to assist in the ceremonies. The portraits of the deceased are also suspended in the hall, but effigies or images are not now made.

"In the first part of April, during the term called *tsing-ming*, a general worship of ancestors, called *pai shan*, or 'worshipping at the hills,' is observed. The whole population, men, women, and children, repair to their family tombs, carrying a tray containing the sacrifice, and libations for offering, and the candles, paper, and incense for burning, and there go through a variety of ceremonies and prayers. The grave is also carefully repaired and swept, and at the close of the service three pieces of turf are placed at the back and front of the grave, to retain long strips of red and white paper; this indicates that the accustomed rites have been performed, and these fugitive testimonials remain fluttering in the wind long enough to announce it to all the friends, for when a grave has been neglected three years it is sometimes dug over and the land resold" (Williams, *Middle Kingdom*, ii, 268, 269).

Aside from the three above-named religions, there has lately appeared another, the *Tai-ping*, which is a mixture of the ancient religion with some fragments of Christian doctrine made known by the missionaries. This religion is purely theocratic, partly on the model of the O. T. It holds that its God is the only true one; that he came to earth and spoke to his children, telling them what to do and what to avoid. The leader of the movement, Hung-Siu Tsuen, or, as he styles himself, Tien-Wang (king of Heaven), was a native of an insignificant village 30 miles from Canton, and was born in 1813. His parents were too poor to give him the education required for competing successfully at the state examinations. From his 19th year he repaired annually for half a dozen years to Canton to these examinations, but each time failed of success. At one of these visits, an American missionary, Rev. I. J. Roberts, gave him a package of tracts in Chinese. He did not read them until five years later, after his recovery from a severe illness, during which he had seen visions and uttered inflated rhapsodies in regard to his future. He now found in these tracts the key to the visions; he abandoned the belief in the teaching of Confucius, adopted views which were a mixture of ancient Chinese and of Christian doctrines, and betook himself to the mountains to make converts for his views. In 1840 he had made a number of converts, who were called God-worshippers. Not long after, in a single district, the number of his followers was reported to exceed 2000. Attacks on some Buddhist temples brought him into collision with the state authorities, and for several years he again led a retired life, though he seems to have remained in constant communication with his followers. A great change in his views took place in 1850. A rebellion had sprung up in the province of Canton, and the rebels, when pressed by the government troops, endeavored to enlist the influence of the God-worshippers in protecting them. The authorities sought to arrest Siu-Tsuen as their leader, when he, calling together his followers, seized a market-town, and thus, in December, 1850, the Tai-ping (great peace) rebellion assumed more formidable dimensions. Siu-Tsuen gave to several of his most prominent adherents the title Wang (king), and began to issue politico-religious proclamations. He assumed the title Tien-Wang (king of Heaven), and began to claim divine honors. At first he declared himself the brother and equal of Christ, and required the same homage; but subsequently he grouped in his manifestoes God the Father, Jesus Christ, himself, and his son, whom he styles the Junior Lord, as the coequal rulers of the universe. At one time he conferred the title of the third person of the Trinity upon Tung-Wang, the most blood-thirsty of the subordinate kings; but later this title was again withdrawn, and no other divine personages were recognised but those already mentioned. He professed to have often visited heaven, and declared that his favorite wife (he was reported to have 118) had also been permitted to ascend to the heavenly regions. The rebellion made rapid progress, and in 1853 Nanking was captured, and made the capital of the insurrectionary government. The inhabitants of Nanking and other captured towns were treated with extreme severity, which was justified by Tien-Wang by reference to the Old Testament. The people, he said, were idolaters, whom it was his right, as king of Heaven, to destroy. The advance of the rebels was not arrested until, after the conclusion of a peace treaty between the imperial government and England and France, the two latter powers deemed it their interest to come to the aid of the Chinese government (1862). From that time the power of the Tai-pings steadily declined, until, on the 19th of July, their capital, Nanking, fell into the hands of the Imperialists. The head of the sect, Tien-Wang, burned himself in his palace with all his wives. Thus the Tai-pings lost their centre and nearly all their leaders, and ceased to be formidable, but the rebellion still continued in May, 1867. For several years, however, the political character of the movement had altogether overshadowed the religious. See *Annual American Cyclopædia* for 1862, s. v. Tai-ping Rebellion; for 1863, 1864, 1865, and 1866, s. v. China; *Die Gegenwart* (vol. viii, Leipzig, 1852); *Unsere Zeit* (vol. i, Leipzig, 1856; vol. viii, Leipzig, 1864).

II. *Christianity in China.*—Arnobius (3d cent.) mentions the *Ceres*, who are generally held to have been Christians. It is certain that the Nestorians (q. v.) had flourishing missions, which began in the 7th century (see below). The missions of the Roman Church commenced in the 13th, the Protestant missions in the 18th century (see below). In 1586 Macao was ceded to the Portuguese, under whose dominion it has since remained. In 1842 the English secured the island of Hong Kong, and at the same time five cities (Canton, Fuh-chau, Ningpo, Amoy, and Shanghai) were declared free ports. In 1844 France made a treaty with China, in which China promised toleration of Christianity in the five cities. In 1858, after a two years' war with England and China, treaties were made with France, England, the United States, and Russia, in each of which toleration of Christianity throughout the empire was stipulated. The perfidy of the Chinese government, which tried to evade the execution of the treaties, led to a renewal of the war in 1859 and 1860. It ended with a ratification of treaties with England and France on the 24th and 25th of October, 1860. These treaties not only grant toleration to the professors of Christianity, but expressly acknowledge that the principles and practices of Christianity tend to benefit mankind. Permission was also given to preach and travel in the interior, provided that the missionary be furnished with a passport. The stipulations of the four treaties were as follows (see Schem, *Eccles. Year-book for* 1860, p. 222 sq.):

American Treaty, Article 29. "The principles of the Christian religion, as professed by the Protestant and Roman Catholic churches, are recognised as teaching men to do good, to do to others as they would have

others to do to them. Hereafter, those who quietly profess and teach these doctrines shall not be harassed or persecuted on account of their faith. Any person, either citizen of the United States or Chinese convert, who, according to these tenets, peaceably teaches and practises the principles of Christianity, shall in no case be interfered with or molested."

English Treaty, Article 8. "The Christian religion, as professed by Protestants or Roman Catholics, inculcates the practice of virtue, and teaches man to do as he would be done by. Persons teaching it or professing it, therefore, shall alike be entitled to the protection of the Chinese authorities; nor shall any such, peaceably pursuing their calling and not offending against the laws, be persecuted or interfered with."

French Treaty, Article 13. "The Christian religion having for its essential object to lead men to virtue, the members of all Christian bodies (communions) shall enjoy full security for their persons, their property, and the free exercise of their religious worship; and entire protection shall be given to missionaries who peacefully enter the country, furnished with passports such as are described in Article 8. No obstacle shall be interposed by the Chinese authorities to the recognised right of any person in China to embrace Christianity if he pleases, and to obey its requirements, without being subject, on that account, to any penalty. Whatever has been heretofore written, proclaimed, or published in China, by order of government, against the Christian faith, is wholly abrogated and nullified in all the provinces of the empire."

Russian Treaty, Article 8. "The Chinese government, recognising the truth that the doctrines of Christianity promote the establishment of peace and good order among mankind, promises not to persecute its subjects who may wish to follow the requirements of this faith; but they shall enjoy the same protection which is granted to those who profess other forms of religion tolerated in the empire.

"The Chinese government, believing that Christian missionaries are good men, who seek no material advantages for themselves, hereby permits them to propagate the doctrines of Christianity among its subjects, and allows them to pass everywhere in the country. A fixed number of missionaries passing through the cities or open ports shall be furnished with passports, signed by the Russian authorities."

In March, 1861, the ambassadors of England and France, and in July, 1861, the ambassador of the United States, took up their permanent abode at Pekin, and this city became at once a centre for the missionary operations of both Protestants and Roman Catholics. Since that time the free propagation of Christianity has not been again interrupted. After the death of the emperor Hien-Fung (Aug. 22, 1861), the administration of the empire, which, in the name of the minor emperor Ki-Tsiang, was conducted by Prince Kung, became still more favorable to the free and friendly intercourse with Christian nations. Commercial treaties were concluded with almost all the nations of Europe; thus, on Sept. 1, 1861, with Prussia and the German Zollverein (ratified 1863); in 1862, with Spain, Belgium (Aug. 8), and Portugal (Aug. 13); in 1863, with Denmark (July 10). Besides the ambassadors of the United States, England, and France, those of Russia and Spain took up their residence at Pekin, while a Portuguese minister was appointed at Macao and a Prussian at Shanghai.

1. *Nestorian Missions.*—The Nestorian patriarchs are said to have sent missionnaries to China in the 5th century. Between A.D. 636 and 781, seventy Nestorian missionaries, among whom Olopun (arrived in 696) was distinguished, labored in China. The history of the Nestorian missions is given in an inscription, discovered in 1625 by Jesuit missionaries in Si-anfu. Its genuineness, long doubted, has been recently defended by Abel Remusat and others. In 714 the patriarch Salibazacha is reported to have sent a metropolitan to China. Timotheus, who appears to have been the Nestorian patriarch upwards of forty years, was zealously devoted to Christian missions. During his patriarchate, Subchaljune, a learned monk from the convent of Beth-oben, after having been ordained bishop, penetrated China, and there extensively preached the Gospel. He was soon followed by others. In the 9th century Christians were found in Southern China by two Arabian travellers, and in 877 many Christians, conjointly with Jews, Mohammedans, and Persians, were massacred in Canton by one Baichu, who had revolted from the emperor. In 845, Wutsung is reported to have ordered 3000 priests from Ta-tsin to retire to private life. Marco Polo, the distinguished traveller of the 13th century, who spent more than twenty years in China, for a time holding a high office, speaks of his meeting with Chinese Christians. Rubruquis, in 1250, tells of fifteen cities where there were Nestorians; and the author of the *l'Estat du gran Caan* (1330) reports 30,000 Nestorians in China. The Nestorian missions seem to have been wholly or nearly extirpated simultaneously with the expulsion of the Monguls in 1369 by the Ming dynasty. At present no Nestorian churches are known to exist in China, and no Nestorian translation of the Bible is known to exist (Newcomb, *Cyclopædia of Missions*, p. 262). See NESTORIANS.

2. *Roman Catholic Missions.*—(1.) The first period in the history of Roman Catholic missions in China was introduced by the labors of Johannes de Monte Corvino, who entered India in 1291, and after meeting with great opposition, not only from the pagans, but also from the Nestorians, was so successful in his labors that in 1305 he had baptized 6000 converts. His labors were confined principally to the Tartars, whose language he had learned, and into which he translated the N. T. and the Psalms. In 1305 Pope Clement V constituted him archbishop of Pekin, and sent seven suffragan bishops (Franciscans) to his assistance. He died in 1330. Another archbishop of Pekin was appointed in 1336, and 26 additional laborers joined the mission. In 1369 the Ming dynasty came into power, and seems to have crushed out Christianity altogether, both Roman and Nestorian.

(2.) Several unsuccessful attempts were made in the years 1556, 1575, and 1579, by Dominicans, Franciscans, and Augustines, to re-establish missions in China, but it was left for the Jesuits finally to accomplish it. Matteo Ricci led the way. He reached Macao in 1581, and by persevering efforts made his way to Pekin, and into the good graces of the reigning emperor. Several high mandarins were converted through his efforts, chief among whom was Sieu, an officer of the highest rank and of great personal influence. Ricci died in 1610 at the age of 80, and was buried with great pomp and solemnity. In 1628 Adam Schaal, a German Jesuit, arrived, and through the influence of Sieu was favorably received by the emperor. His great talents and extensive acquirements caused him to be ranked among the first men of the empire. In 1631 the Dominicans and Franciscans entered China, but their success was not very great. The cause of Christianity suffered a great loss in 1632 in the death of Sieu. In 1644 the Tartars completed the conquest of China, and with the Ming dynasty the Christian missions almost expired. Schaal, however, by his genius and learning, rose into favor with the new dynasty, and by his influence obtained permission for 14 other missionaries to enter the country, among whom was the celebrated Ferdinand Verbeest. The patron of Schaal died in 1662, and the minor, Kanghi, ascended the throne. The Jesuit star remained for a short time in the zenith, but Schaal was soon thrown into prison, and sentenced "to be cut into a thousand pieces." This decree was not executed; Schaal died in 1669, in the 78th year of his age. Another missionary died in prison, and several Franciscans and 21 Jesuits were banished to Can-

ton. Verbeest became a favorite of the emperor Kanghi after he had dismissed the regents and assumed supreme control. Satisfied of the great abilities of Verbeest, Kanghi commanded him to correct the calendar, which he did with entire satisfaction to the emperor. He was appointed president of the Astronomical Tribunal. He cast many cannon, and in other ways rendered himself serviceable to government.

(3.) For some time after this the missions prospered. In 1703 they numbered 100 churches and 100,000 converts in the province of Nankin alone. But in 1734, not only the Jesuits, but all Roman missionaries, were expelled. Yet many congregations survived under protracted persecutions. Native priests were trained both in seminaries in China and in Europe (in the Propaganda at Rome and in a Chinese seminary at Naples), and many European missionaries were able to penetrate into the interior. Not a few were put to death, but the missions survived. Since the treaties of 1859, which promise liberty of worship for both Roman Catholics and Protestants, great preparations have been made for extending the Romanist missions. A few years ago, when China was divided into 20 Vicariates Apostolic, the Roman Catholic population of China amounted, according to the *Univers*, to about 800,000. Other Roman Catholic writers claim a much higher number, e. g. Huc, who estimates it at 700,000.

Since the treaty with France in 1858, the Roman Catholic missionaries claim to have received large accessions to their congregations, and to have a total membership in their Church of about one million. The number of missionaries, especially French, who have since been sent to China, is considerable. On January 1, 1867, a new cathedral was consecrated at Pekin, which is one of the largest buildings of the capital. A bloody persecution of Roman Catholic missionaries took place in 1866 in one of the dependencies of China, Corea. See COREA.

According to the *Shanghai Courier* for 1887, there were in China 35 Roman Catholic Vicariates Apostolic, divided among the orders as follows: Fuhkien and Formosa, Dominicans; North Shantung, Shansi, Shensi, South Hunan, Hupeeh, the Franciscans; South Shantung, Kansuh, Mongolia, Belgian Seminary; Honan, Hong Kong, Mail'd Seminary; North Hunan, Augustines; Kiangnan, S. W. Chihli, Jesuits; Kiangsi, Chekiang, S. W. Chihli, Lazarists; Kwangsi Szechuen Yunnan, Corea, Manchuria, Thibet, Parisian Seminary; Kwangtung, Kweichow. The European priests in all China numbered 628; the native Chinese priests, 335. The Catholic population was 541,720; catechumens, 24,900; churches and chapels, 2942; schools, 1879; pupils, 31,625; seminaries, 36; students, 744. The oldest mission is the Jesuit mission of Kiangnan, established in 1660, where the Catholics number 105,000, and have 13,300 pupils. The Lazarists were the next to enter the field, which they did in 1690. The Dominicans and Franciscans entered in 1696; the Parisian Seminary in 1831; the Mail'd Seminary in 1843; the Belgian in 1878; and the Augustines in 1879. The missions are mostly supported by the "Society for the Propagation of the Faith," which has its centre in France. Special attention to Chinese missions is also paid by the "Society of the Holy Childhood of Jesus," a children's missionary society for buying and baptizing those children who by their parents have been destined to death, and giving to them a Christian education. The receipts of the society amounted in 1856 to 872,000 francs. Up to that year 329,388 children had been bought and baptized, of whom 247,041 had died shortly after baptism.

3. *Protestant Missions.*—The first Protestant mission was undertaken by the London Missionary Society, which in 1807 sent the Rev. Robert Morrison to Canton, principally for the object of translating the holy Scriptures into Chinese. He was appointed (in 1808) translator of the East India Company's factory, with a salary which rendered him independent of the society's fund. In 1813 he was joined by the zealous and learned Mr. Milne. The translation of the New Testament was completed in 1814; of the whole Bible in 1818. In 1814 the first Chinese convert was baptized. A valuable assistant the missionaries found afterwards in Leang-Afa (baptized by Milne in 1816), who distinguished himself as the author of several valuable tracts, and by his zeal in preaching the Gospel, and in distributing books at the literary examinations. One of the books distributed on this occasion fell into the hands of the leader of the insurgents, and was the foundation of his earliest Christian impressions. The American missions commenced in 1829, when the American Seamen's Friend Society sent out two missionaries, one of whom, in 1830, transferred his services to the American Board of Commissioners of Foreign Missions, which from that time has had a mission at Canton. The Rhenish Missionary Society sent out, about 1830, Mr. Gützlaff, who soon became perfectly master of the language, and made frequent journeys through the coast countries of China. He was especially active in circulating the Scriptures, which were received with great eagerness. In 1835 the American Protestant Episcopal Church established a mission in Batavia, which in 1842 was removed to Macao. During this first period the continual hostility of the Chinese compelled the English, American, and German missionaries to restrict their labors mostly to the printing and circulating of Christian books. Permanent settlements were only made at Canton, but at Malacca also an Anglo-Chinese college was founded.

The peace of Nankin in 1842, the cession of Hong Kong to the English, and the opening of the five ports to European and American Christians, gave a new impulse to missionary zeal. The London Missionary Society gave instructions to their Chinese missionaries to meet in Hong Kong to consider the plan for future operations. Agreeably to the recommendations of this meeting (August, 1843), the Anglo-Chinese college in Malacca was changed into a theological seminary for the training of a native ministry. Also the printing apparatus of the mission was transferred from Malacca to Hong Kong, and a medical establishment opened in connection with the mission. In 1843 Shanghai was occupied, and in 1844, Amoy. The American Board stationed missionaries at Amoy in 1842, and at Fuhchau in 1847. The American Episcopal Board, whose missionary, Dr. Boone, while on a visit to the United States, had been consecrated missionary bishop, fixed on Shanghai as the most suitable station. Other missionary societies hastened to occupy the interesting field. The operations of the American Baptist Union commenced in 1842; those of the Southern Baptist Convention (of America) and of the (American) Presbyterian Board in 1844; those of the Church Missionary Society, one of whose missionaries, Rev. George Smith, was appointed bishop of Victoria, in 1849; of the General Baptist Missionary Society (England) in 1845; those of the Methodist Episcopal Church in 1846; those of the (American) Seventh-day Baptists in 1847; those of the Methodist Episcopal Church South in 1848; those of the English Wesleyans and the Free Church of Scotland in 1850.

"The first Protestant mission at Fuh-chau was established by a missionary of the American Board of Commissioners for Foreign Missions in January, 1847. The mission has averaged three or four families since its commencement. In April, 1856, occurred the first baptism of a Chinaman at this city in connection with Protestant missions. In May, 1857, a brick church, called the "Church of the Saviour," built on the main street in the southern suburbs, and about one mile from the Big Bridge, was dedicated to the worship of God. Its first native church, consisting of four members, was organized in October of the same year. In May, 1863, a church of seven members was formed at Chang-loh, distant seventeen miles from the city. In

June of the same year a church of nine members was organized in the city of Fuh-chau, having been dismissed from the church in the suburbs to form the church in the city. For the first ten years of this mission's existence only one was baptized. During the next five years twenty-two members were received into the first church formed. During the next two years twenty-three persons were baptized. Between 1853 and 1858 a small boarding-school, i. e. a school where the pupils were boarded, clothed, and educated at the expense of the mission, was sustained in this mission. Among the pupils were four or five young men, who are now employed as native helpers, and three girls, all of whom became church members, and two of whom are wives of two of the native helpers. There are at present a training-school for native helpers, and a small boarding-school for boys, and a small boarding-school for girls connected with the mission. It employs six or seven native helpers, and three or four country stations are occupied by it. Part of the members of this mission live at Ponasang, not far from the Church of the Saviour, and part live in the city, on a hill not far from the White Pagoda, in houses built and owned by the American Board (see *Statistics of Societies*, below).

"The mission of the Methodist Episcopal Church was established in the fall of 1847. It has had an average number of four or five families. In 1857 it baptized the first convert in connection with its labors. In August, 1856, a brick church, called the 'Church of the True God,' the first substantial church building erected at Fuh-chau by Protestant missions, was dedicated to the worship of God. It is located near Tating, on the main street, in the southern suburbs, about two thirds of the way between the Big Bridge and the city. In the winter of the same year another brick church, located on the hill in the suburbs on the south bank of the Min, was finished and dedicated, called the 'Church of Heavenly Rest.' In the fall of 1864 this mission erected a commodious brick church on East Street, in the city. Its members reside principally on the hill on which the Church of Heavenly Rest is built. One family lives at a country station ten or twelve miles from Fuh-chau. This mission has received great and signal encouragement in several country villages and farming districts, as well as in the city and suburbs. It has some eight or ten country stations, which are more or less regularly visited by the foreign missionaries, and where native helpers are appointed to preach regularly. It has a flourishing boys' boarding-school, and a flourishing girls' boarding-school, and a printing-press. At the close of 1863 there were twenty-six probationary members of its native churches, and ninety-nine in full communion. It employs ten or twelve native helpers. It has established a system of regular Quarterly Meetings and 3 Annual Conferences in conformity with the Discipline of the Methodist Episcopal Church" (Doolittle, *Social Life of the Chinese*, N. Y., Harper and Brothers, 1865, 2 vols. 12mo).

The following table will show the work of the Methodist Episcopal Church in China for the year 1889. It is compiled from the Society's *Report* for 1890.

One of the most remarkable awakenings that is known in the whole history of Protestantism of China took place in 1866, in connection with the out-stations of the Tientsin mission of the English New-Connection Methodists, especially at Lou-Leing, where, in September, 45 persons were admitted to baptism. The converts added to the mission churches of the London Society, in Shanghai, and the province of which it forms the capital, numbered, during the year 1866, 189. An event of considerable importance for the Protestant missions of China is the establishment of a monthly religious paper in the English language (the *Missionary Recorder*) by the missionaries of the Methodist Episcopal Church of Fuh-chau.

4. *Greek Missions.*—A mission of the Greek Church was established by the Russians in Pekin under the reign of Peter the Great. Its object, until recently, was limited to the spiritual care of a colony of Russian subjects, who had been captured on the Amoor and settled near Pekin. A treaty between China and Russia authorized the Russian government to keep six missionaries at Pekin, changing them once in ten years, with the right of having a few students to learn the Chinese and Manchoo language, and to obtain a general knowledge of Chinese affairs. A letter from one of the American missionaries in Pekin, in the Boston *Missionary Herald* (February, 1865), states that "the Russian missionaries in Pekin now labor devoutly for the Chinese in the country as well as in the city. It is an interesting fact, and one which marks a difference between them and the Roman Catholics, that they translate and use the sacred Scriptures. Their version of the New Testament into Chinese is now in print in this city [Pekin]. They have obtained also from the English missionaries the version of the Bible by Messrs. Swan and Hallybras, and published by the British and Foreign Bible Society, for the use of their ministers to the Mongolians, and the versions of the New Testament published by the same society for the use of their missions in Russian Manchuria." In 1866, the Pekin mission numbered about 200 converted Chinese and Tartars. See *Annual American Cyclopædia for* 1865, s. v. China.

Chin'nereth (Heb. *Kinne'reth*, כִּנֶּרֶת; in pause *Kinna'reth* [Josh.], כִּנָּרֶת; Sept. Χενερέθ v. r. [in Deut.] Μαχαναρέθ), the sing. form (Deut. iii, 17; Josh. xix, 35) of a town, also called in the plur. CHINNEROTH (Heb. *Kinneroth'*, כִּנְּרוֹת, 1 Kings xv, 20; Sept. Χενέρεθ; A. V. "Cinneroth;" or *Kinnaroth'*, כִּנֲּרוֹת, Josh. xi, 2, Χενερώθ); or perhaps the latter form designates the *region* of which the other was the metropolis. A similar variety appears in the name of the adjoining lake, which is perhaps intended in some of the above passages. The town was a fortified city in the tribe of Naphtali, mentioned between Rakkath and Adamah (Josh. xix, 35), the only certain reference to the city exclusively. Whether it gave its name to or received it from the lake, which was possibly adjacent, is uncertain. Jerome identifies *Chennereth* (*Onomast.* s. v., Eusebius Χενερέθ) with the later *Tiberias*. This may have been from some tradition then existing: the only corroboration which we can find for it is the mention in Joshua of Hammath as near it, which was possibly the Emmaus (modern Hummam), near the shore of the lake, a little south of Tiberias. This situation of Chinnereth is denied by Reland (*Palæst.* p. 161) on the ground that Capernaum is said by Matthew (iv, 13) to have been on the very borders of Zebulun and Naphtali, and that Zebulun was to the south of Naphtali. But the evangelist's expression hardly requires this strict interpretation. The town, or the lake, appears to have given its name (slightly altered) to a district—"all Cinneroth" (1 Kings xv, 20). See CINNERETH.

SEA OF CHINNERETH (יָם־כִּנֶּרֶת; Sept. [ἡ] θάλασσα Χενέρεθ, Num. xxiv, 11; Josh. xiii, 27) or CHINNEROTH (כִּנְּרוֹת, Χενέρεθ, Josh. xii, 3), the inland sea, which is most familiarly known to us by its New-Test. name as the "Lake of Gennesareth," or the "Sea of Tiberias" or "of Galilee." This is evident from the mode in which it is mentioned in various passages in the Pentateuch and Joshua as being at the end of Jordan, opposite to the "Sea of the Arabah," i. e. the Dead Sea, as having the Arabah or Ghor below it, etc. (Deut. iii, 17; Josh. xi, 2; xiii, 3. In the two former of these passages the word "sea" is perhaps omitted). The word is by some derived from the Heb. כִּנּוֹר, *Kinnur'* (κινύρα, *cithara*), a "harp," as if in allusion to the oval shape of the lake. But it is possible that *Cinnereth* was an ancient Canaanite name existing long prior to the Israelite conquest, and, like other names, adopted by the Israelites into their language. The subsequent name "Gennesar" was derived from "Cinnereth" by a change of letters of a kind frequent in the East. See GENNESARETH.

Chin'neroth (Josh. xi, 2; xiii, 3). See CHINNERETH.

Chintin. See WHEAT.

Chi'os (Χίος, according to some, from χίων, *snow*, with which its mountains are perpetually covered; according to others, from a Syrian word for *mastic*, with which its forests abounded), one of the principal islands of the Ionian Archipelago, mentioned in Acts xx, 15, and famous as one of the reputed birthplaces of the poet Homer. It belonged to Ionia (Mela, ii, 7), and lay between the islands Lesbos and Samos, and distant eight miles from the nearest promontory (Arennum Pr.) of Asia Minor. The position of this island in reference to the neighboring islands and coasts could hardly be better described than in the detailed account of the apostle Paul's return voyage from Troas to Cæsarea (Acts xx, xxi). Having come from Assos to Mitylene in Lesbos (xx, 14), he arrived the next day over against Chios (ver. 15), the next day at Samos, and tarried at Trogyllium (*ib.*); and the following day at Miletus (*ib.*); thence he went by Cos and Rhodes to Patara (xx, 1). See MITYLENE; SAMOS.

In the account of Herod's voyage to join Marcus Agrippa in the Black Sea, we are told (Josephus, *Ant.* xvi, 2, 2) that, after passing by Rhodes and Cos, he was detained some time by north winds at Chios, and sailed on to Mitylene when the winds became more favorable. It appears that during this stay at Chios Herod gave very liberal sums towards the restoration of some public works which had suffered in the Mithridatic war. This island does not appear to have any other association with the Jews, nor is it specially mentioned in connection with the first spread of Christianity by the apostles. When Paul was there, on the occasion referred to, he did not land, but only passed the night at anchor (Conybeare and Howson, *St. Paul*, ii, 211). At that time Chios enjoyed the privilege of freedom (Plin. v, 38; comp. xvi, 6), and it is not certain that it ever was politically a part of the Roman proconsular Asia. No record exists of its connection with Christianity in apostolic times; but after the lapse of ages we read of a bishop of Chios, showing that the Gospel had obtained a footing on the shores. Its length is about 32 miles, and in breadth it varies from 8 to 18 (having a periphery of 900 stadia, Strabo, xiv, 645, or 120 Italian miles, Tournefort, *Voy.* ii, 84). Its outline is mountainous and bold, and it has always been celebrated for its beauty and fruitfulness (Arvieux, *Voy.* vi, 169; Schubert, *Reis.* i, 414). It is very fertile in cotton, silk, and fruit, and was anciently celebrated for its wine (Pliny, xiv, 9; xvii, 34, 22; Strabo, xiv, 637; Horace, *Od.* iii, 19, 5; Virg. *Ecl.* v, 7; Athen. iv, 167; i, 32) and mastic (Pliny, xii, 36; xxiv, 74; Dioscor. i, 90). The principal town was also called Chios, and had the advantage of a good harbor (Strabo, xiv, p. 645). The island is now called by the Greeks *Khio*, and by the Italians *Scio* (Hamilton, *Researches*, ii, 5; Thevenot, *Travels*, i, 93; Chandler, *Asia Minor*, c. 16; Clarke, *Trav.* iii, 236; Sonnini, *Trav.* c. 37; Olivier, *Voy.* ii, 103). The wholesale massacre and enslavement of the inhabitants by the Turks in 1822 forms one of the most shocking incidents of the Greek war of independence (Hughes, *Tract on Gr. Revolution*, Lond. 1822). See also Malte Brun, *Geography*, ii, 86 sq.; Mannert, *Geogr.* VI, iii, 323 sq.; Hassel, *Erdbeschr.* xiii, 161 sq.; Cellarii *Notit.* ii, 19; Smith's *Dict. of Class. Geogr.* s. v.; M'Culloch's *Gazetteer*, s. v. Scio. See ASIA MINOR.

Coin of Chios.

Chis'leu (Heb. *Kislev'*, כִּסְלֵו, according to some, from Arabic, i. q. *lethargic;* according to others [Benfey, *Monatsnamen*, Berl. 1836], of Persic origin; and as it appears on the Palmyrene Inscription [ed. Swinton, *Philos. Transactions*, xlviii, tab. 29] in the form כסלול, i. e. *Kislul*, it probably represents the name of the third of the Amshaspands or celestial genii [Bournouf, *Commentaire sur le Yasna*, p. 146, 151, 174]; Sept. Χασελεῦ, Anglicized "Casleu" in 1 Macc. i, 54; iv, 59; Chaldee כִּסְלֵיו, Targ. on Eccl. xi, 3; Josephus Χασλεῦ or Χασλέβ, *Ant.* iii, 5, 4; 7, 6), the name adopted from the Babylonians, after the Captivity, by the Jews for the third civil or ninth ecclesiastical month (Neh. i, 1; Zech. vii, 1), corresponding to the Macedonian month *Apellæus* (Ἀπελλαῖος; see Spanheim in Havercamp's *Josephus*, ii, 407), and answering mainly to the moon of November. See MONTH. The following were the days specially memorable for religious exercises: On the 3d, a feast in memory of the idols which the Asmonæans cast out of the Temple; on the 7th, a fast instituted because king Jehoiakim burned the prophecy of Jeremiah, which Baruch had written (Jer. xxxvi, 23). Scaliger believes that it was instituted on account of Zedekiah's having his eyes put out, after his children had been slain in his sight. This fast Prideaux places on the 29th of the month; but Calmet, with the modern Jews, makes it the 6th, and places on the 7th a festival in memory of the death of Herod the Great, the son of Antipater. There is also some dispute whether this fast was not observed on the 28th of the month. It is an argument in favor of the earlier day that the other would fall in the middle of the eight days' Festival of the Dedication.

On the 25th, the *Chanuca*, or feast of Dedication (q. v.), so called (John x, 22), and kept as a minor festival in commemoration of the dedication of the altar after the cleansing of the Temple from the pollution of Antiochus by Judas Maccabæus, by whom it was ordered to be observed (1 Macc. iv, 59). This feast lasted eight days. A prayer for the world in general is offered up on the eighth day of the feast. In this month the winter prayer for rain commences; the precise day is sixty days after the autumnal equinox, by the calculations of Rab Samuel, which varies from the 2d to the 6th, but is generally on the 4th of December. See CALENDAR.

Chis'lon (Heb. *Kislon'*, כִּסְלוֹן, *confidence;* Sept. Χασλών), the father of Elidad, which latter was one of the princes of Benjamin, selected on the part of that tribe by Jehovah to divide Canaan (Num. xxxiv, 21). B.C. ante 1618.

Chis'loth-ta'bor (Hebrew *Kisloth' Tabor'*, כִּסְלֹת תָּבֹר, *flanks of Tabor;* Sept. Χασαλωθθαβώρ v. r. Χασελωθαιθ and Χασαλώθ-βαθώρ, Vulg. *Ceseleth-thabor*), a place to the "border" (גְּבוּל), of which the "border" (גְּבוּל) of Zebulon extended eastward from Sarid on the southern boundary (Josh. xix, 12), apparently outside its territory, at the western foot of Mt. Tabor. See TRIBE. It is probably the same elsewhere called simply CHESULLOTH (Josh. xix, 18) and TABOR (1 Chron. vi, 7), and seems to be identical with the *Chesalus* (Χεσαλούς, Chasalus) of the *Onomasticon* (s. v. Ἀχεσελώθ, Acehaseluth; comp. s. vv. Χεσελαθθαβώρ, Chaselatabor; Χασελοῦς τοῦ Θαβώρ, Chaselath), near Mt. Tabor, in the plain [of Esdraelon], 8 R. miles E. of Diocæsarea; also with the *Xaloth* (Ξαλώθ) mentioned by Josephus (*War*, iii, 3, 1; comp. *Life*, 44) as a village in the great plain, and one of the landmarks of lower Galilee (comp. Zunz, *On the Geography of Palestine from Jewish Sources* in Asher's Benj. of Tudela, ii, 432; and Seetzen's *Reisen durch Syrien*, iv, 311). See AZNOTH-TABOR. It is doubtless the modern *Iksal*, seen by Dr. Robinson on his way from Nablous to Nazareth, "in the plain toward Sabor, on a low rocky ridge or mound, not far from the foot of the northern hills, described as containing many excavated sepulchres" (*Researches*, iii, 182). It was also observed by De Saulcy, while passing through the plain of Esdraelon towards Nain, "to the left, and distant a little more than a league, built at the foot of the mountains of Nazareth" (*Narrative*, i, 74). Pococke (ii, 65) mentions a village which he calls *Zal*, about three miles from Tabor.

Chittah. See WHEAT.

Chit'tim (Heb. *Kittim'*, כִּתִּים, a Gentile plur. form of foreign origin, Gen. x, 4; Sept. Κήτιοι, A. V. "Kittim;" Num. xxiv, 24, Κιτιαῖοι; 1 Chron. i, 7 ["Kittim"], and Dan. xi, 30, Κίτιοι v. r. Ῥωμαῖοι; Isa. xxiii, 1, Κητιαῖοι v. r. Κιτιαῖοι; or in the longer and more properly national form *Kittiyim'*, כִּתִּיִּים, Jer. ii, 10, Κεττιείμ; כִּתִּיִּים, Isa. xxiii, 12, Κητιείμ v. r. Κιτιεῖς; כִּתִּיִּם, Ezek. xxvii, 6, Χεττιείμ v. r. Χετιείμ), a branch of the descendants of Javan, the son of Japheth (Gen. x, 4; 1 Chron. i, 7), closely related to

the Dodanim, and remotely (as we may conclude from the absence of the conjunction before it) to the other descendants of Javan (see Hiller, *Syntagm. hermeneut.* p. 185). Balaam foretold "that ships should come from the coast of Chittim, and should afflict Asshur [the Assyrians], and afflict Eber" [the Hebrews] (Num. xxiv, 24), thus foretelling the Grecian and Roman invasions. Daniel prophesied (xi, 13) that the ships of Chittim should come against the king of the North, and that he should therefore be grieved and return, which was fulfilled when Antiochus Epiphanes, the king of Syria, having invaded Egypt, was by the Roman ambassadors commanded to desist, and withdrew to his own country (Livy, xliv, 29; xlv, 10). In Isa. xxiii, 1, 12, it appears as a resort of the fleets of Tyre; in Jer. ii, 10, the "isles (אִיִּים, i. e. *maritime districts*) of Chittim" are to the far west, as Kedar to the east of Palestine; the Tyrians procured thence the cedar or box-wood, which they inlaid with ivory for the decks of their vessels (Ezek. xxvii, 6, בַּת־אֲשֻׁרִים, A. V. "the company of the Ashurites," but rather [ivory] *the daughter of box-wood*, i. e. inclosed in it). At a later period the name was applied to the Macedonians under Alexander the Great (1 Macc. i, 1, Χεττιείμ, A. V. "Chettiim") and Perseus (viii, 1, Κιτιέων "Citims"). On the authority of Josephus, who is followed by Epiphanius (*Haer.* xxx, 25, p. 150) and Jerome (*Quæst. in Gen.* x), it has generally been admitted that the Chittim migrated from Phœnicia to Cyprus, and founded there the town of *Citium*, the modern *Chitti:* "Chethimus possessed the island of Chethima, which is now called Cyprus, and from this all islands and maritime places are called Chethim (Χεθίμ) by the Hebrews" (Joseph. *Ant.* i, 6, 1). Other ancient writers, it may be remarked, speak of the Citians as a Phœnician colony (Pliny, v, 35; xxxi, 39; Strabo, xv, 682; Cicero, *De Finibus*, iv, 20). Pococke copied at Citium thirty-three inscriptions in Phœnician characters, of which an engraving is given in his *Description of the East* (ii, 213), and which have more recently been explained by Gesenius in his *Monum. Phœnic.* (p. 124-133). From the town the name extended to the whole island of Cyprus, which was occupied by Phœnician colonies, and remained under Tyre certainly until about B.C. 720 (Josephus, *Ant.* ix, 14, 2). With the decay of the Phœnician power (circ. B.C. 600) the Greeks began to found flourishing settlements on its coasts, as they had also done in Crete, Rhodes, and the islands of the Ægæan Sea. The name Chittim, which in the first instance had applied to Phœnicians only (for כִּתִּים = חִתִּים, *Hittites*, a branch of the Canaanitish race—Gesenius, *Comment. zu Jesa.* i, 721 sq.), passed over to the islands which they had occupied, and thence to the people who succeeded the Phœnicians in the occupation of them. The use of the term was extended yet farther so as to embrace Italy (Bochart, *Phaleg.* iii, 5, compares the *Cetia*, Κετία, in Latium, mentioned by Dionys. Hal. viii, c. 36), according to the Sept. (Dan.), and the Vulgate (Num. and Dan.), to which we may add the rendering of the Chaldee Targum, which gives *Italian* (איטליון) in 1 Chron. i, 7, and *Apulia* (אפוליא) in Ezek. xxvii, 6. In an ethnological point of view, Chittim, associated as the name is with Javan and Elishah, must be regarded as applying, not to the original Phœnician settlers of Cyprus, but to the race which succeeded them, viz. the Carians, who were widely dispersed over the Mediterranean coasts, and were settled in the Cyclades (Thucyd. i, 8), Crete (Herod. i, 171), and in the islands called Macariæ Insulæ, perhaps as being the residence of the Carians. From these islands they were displaced by the Dorians and Ionians (Herod. *l. c.*), and emigrated to the main land, where they occupied the district named after them. The Carians were connected with the Leleges, and must be considered as related to the Pelasgic family, though quite distinct from the Hellenic branch (Knobel, *Völkertafel*, p. 95 sq.). Hengstenberg has lately endeavored (*Hist. of Balaam*, p. 500) to prove that in every passage in the Old Testament where the word occurs it means Cyprus, or the Cyprians.

The most probable view, however, is that expressed by Kitto: "Chittim seems to be a name of large signification (such as our Levant), applied to the islands and coasts of the Mediterranean in a loose sense, without fixing the particular part, though particular and different parts of the whole are probably in most cases to be understood" (*Pict. Bible*, note on Ezek. xxvii, 6).

(For further discussion, see Michaelis, *Spicilegium*, i, 1-7, 103-114; also *Supplem.* p. 1138, 1377-1380; Gesenius, *Thesaur.* p. 726; Newton, *On the Prophecies*, v; Rosenmüller, *Bibl. Geogr.* iii, 378.) See ETHNOLOGY.

Chi'un (Heb. *Kiyun'*, כִּיּוּן), a word that occurs only once in the Scriptures, and that in an obscure and variously-interpreted passage (Amos v, 26), "But ye have borne the tabernacle of your *Moloch* and *Chiun*, your images, the star of your god, which ye made to yourselves." The Sept. translates it as a proper name, *Rhephan* (Ῥαιφάν or Ῥηφάν, which became still further corrupted into Ῥεμφάν), and it is quoted in that form by Stephen (Acts vii, 43). See REMPHAN. The Syriac translates it by *Saturn*, whom the Shemitic nations are known to have worshipped. But it apparently is *not* a proper name at all, being derived from the root כּוּן, *kun*, to *stand* upright, and therefore signifies simply a *statue* or idol, as the Vulgate renders it (in connection with the following word), "*imaginem* idolorum vestrum." The same is probably true of the word rendered "Moloch" in the same passage, so that the whole may be translated (with Gesenius), "Ye bore the tabernacle of your *king*, and the statue of your *idols*, the star of your god which ye made to yourselves;" referring not to any specific deity by name, but to the secret idolatrous practices which the Jews kept up along with the worship connected with the divine ark in the wilderness, and which reappeared in different forms from time to time in their later history. See CALF. Yet, as a "star" is mentioned, it has naturally been inferred that the worship of some *planet* is alluded to, and this Jerome supposed to be Lucifer or Venus. Layard thinks the name identical with that of the Egyptian goddess *Ken*, figured on the Egyptian and Assyrian monuments in the character of Astarte or Venus (*Nineveh*, ii, 169); but he admits that her worship was borrowed from Assyria into Egypt at a period later than the Exodus (p. 170). On the whole, the above supposition that the planet Saturn is intended is the most plausible, although this interpretation cannot be successfully defended merely from the name, either in the form Chium or Remphan. (See Maius, in his *Select. Exercitt.* i, 763 sq.; Jahr, *De Chiun* [Viteb. 1705]; Harenberg, *De idolis Chiun et Remphan* [Brunsw. 1723]; Meyer, *De sacello et basi idolor.* etc. [ad loc.], [Helmst. 1726]; Wolf, *De Chiun et Remphan* [Lips. 1741]; Braun, *Selecta Sacra*, p. 477 sq.) See SATURN.

Chlo'ë (Χλόη, *verdure*, a classical name), a female Christian mentioned in 1 Cor. i, 11, some of whose household (ὑπὸ τῶν Χλόης, where there is doubtless an ellipsis of οἰκείων, comp. Rom. xvi, 10, 11) had informed the apostle Paul of the fact that there were divisions in the Corinthian Church. A.D. 54. She is supposed by Theophylact and others to have been an inhabitant of Corinth; by Estius, some Christian woman known to the Corinthians elsewhere; by Michaelis and Meyer, an Ephesian, having friends at Corinth. See CORINTHIANS, EPISTLES TO.

Choäch. See THORN.

Cho'ba (Χωβά; Vulg. omits), a place mentioned in Judith iv, 4, apparently situated in the central part of Palestine. It is probably the same place as

Chob'aï (Χωβαί), which occurs in Judith xv, 4, 5 (in the latter verse Χωβά). The name suggests the HOBAH (q. v.) of Gen. xiv, 15 (חוֹבָה, which agrees with the reading of the Syriac), especially in connection with the mention of Damascus in verse 5, if the distance from the probable site of Bethulia (q. v.) were not too great. Van de Velde suggests (*Memoir*, p. 304) that it is probably the modern *Kubatiyeh*, a village 1½ hour S. of Jenin, on the highway to Sebustiyeh or Samaria (*Narrative*, i, 368; comp. Stewart, *Tent and Khan*, p. 421; Robinson, *Later Researches*, p. 120, 121).

Chœnix (χοῖνιξ, rendered "measure" in our version, Rev. vi, 6), a Greek measure of capacity, equal in dry commodities to one eighth the modius (see BUSHEL), but varying, according to different ancient authors, from one and a half to two pints English. See METROLOGY.

Choir (Gr. χόρος). The Greeks applied the term chorus to a circular dance performed during sacrifices by a company of singers around the altar of a deity. Later it was applied to this body of singing dancers. Actors afterwards were introduced, who related some myth or legend of the deity between the songs of the chorus, thus laying the foundation of the Greek drama. In the perfected drama, the chorus (composed of fifty persons in the tragedy and of twenty-four in the comedy) occupied a position intermediate between the actors and the audience, giving in a recitative manner, rather than in a song, counsel, warning, encouragement, or consolation to the actors.

Similar bodies of singers attended the religious observances of nearly all nations of antiquity. In the Jewish worship they were specially prominent after the time of David, being composed at times of 4000 singers and 288 leaders.

1. In the development of the ritual in the Christian churches, the body of singers received the same name of *chorus*. The French modification of the word, *chœur*, passed into the Norman and early English as *quire* or *choir*. The original term *chorus* is now applied to a body of singers carrying all the parts of music, in distinction from solo, duet, or quartet singers; also to the portion of music sung by this chorus. The two most noted *choirs* of the present day are that of the Vatican, in which the soprano and alto are sung by eunuchs, and the choir of the Cathedral of Berlin, in which the soprano and alto are sung by boys.

In the English Church, strictly, the term denotes a body of men set apart for the performance of all the services of the Church in the most solemn form. Properly speaking, the whole corporate body of a cathedral, including capitular and lay members, forms the choir, and in this extended sense ancient writers frequently use the word. But, in its more restricted sense, we are to understand that body of men and boys who form a part of the foundation of these places, and whose special duty it is to perform the service to music. The choir properly consists of clergymen, laymen, and chorister boys, and should have at least six men and six boys, these being essential to the due performance of the chants, services, and anthems. Every choir is divided into two parts, stationed on each side of the chancel, in order to sing alternately the verses of the psalms and hymns, one side answering the other.

2. The term *choir* is also applied in Roman churches to that portion of the church edifice allotted to the singers, nearly analogous to the chancel (q. v.) of Protestant churches. The choir is usually in the apsis (q. v.), behind the high altar, at the east (in the earlier churches in the west) end of the church. It is generally elevated one step above the level of the rest of the edifice. It has at least one row of seats or stalls. When there is more than one row, each row is a step above that before it. In this ritual sense of *place for the singers*, the choir is sometimes, especially in cruciform churches, under the tower or in front of the high altar. Large cathedrals also often have several choirs or chapels for singing mass. In Greek and Armenian churches the stalls for the singers are usually in the nave of the church, to the right and left of the front of the altar. In nunneries the choir is a part of the church, separated from the rest by a screen, where the nuns chant the service.

3. In Protestant churches generally, the word designates the body of singers, composed both of males and females, who conduct the congregational singing, with or without the aid of an organ. The name is also given to the place in the church occupied by the singers. See Bingham, *Orig. Eccles.* bk. viii, ch. vi, § 7; Bergier, *Dict. de Théologie*, i, 461.

Choir-wall, or **Choir-screen**, is the wall or screen of wood, metal, or stone which divides the choir or presbytery from the rest of the church. It is usually ornamented, often with great beauty.

Chol. See SAND.

Choled. See WEASEL.

Cholin. See TALMUD.

Chomer. See HOMER.

Chomet. See SNAIL.

Choose. See CHOSEN.

Chor. See LINEN.

Choral. (I.) This term is applied to that portion of the Liturgy of the Roman and other churches in which simple melodies, usually consisting of but four or five notes, are sung by the officiating priest, with responses from the choir or the congregation. These date their origin from the earliest period of the Christian Church, and are thought by some to have been originally ancient pagan melodies adapted to Christian worship.

(II.) It is also, and more usually, applied to hymn tunes of a slow and majestic or pathetic movement, as "*Old Hundred*," the "*Judgment Hymn*," and "*Mear*." The Germans call all psalm tunes chorals, but they always retain the original slow movement, and all the voices join in the melody, the organ giving the accompaniment. In many Protestant countries all the four parts are sung in chorals as well as in other hymn tunes. For a historical development of choral singing, see MUSIC (HISTORY OF).

Chor-a'shan (Heb. *Kor-Ashan'* כּוֹר־עָשָׁן, *smoking furnace;* Sept. Βαρασάν v. r. Βωρασάν and even Βηρσαβεέ, i. e. Beer-sheba; Vulg. *lacus Ashan;* so that both appear to have read בּוֹר־), one of the places (named between Hormah and Athach) in which "David and his men were wont to haunt," and to his friends in which he sent presents of the plunder taken from the Amalekites who had robbed Ziklag (1 Sam. xxx, 30). The towns named in this catalogue are all south of Hebron; and Chorashan, therefore, is probably identical with the simple ASHAN (q. v.) of Simeon (Josh. xv, 42; xix, 7).

Chora'zin (Χοραζίν v. r. Χοραζείν, Χοροζαΐν, and Χωραζίν), one of the cities (πόλεις) in which our Lord's mighty works were done, but named only in his denunciation (Matt. xi, 21; Luke x, 13; see Scherzer, *Salvatoris oraculum, Væ tibi Chorazin*, Lips. 1710), in connection with Bethsaida and Capernaum, not far from which, in Galilee, it appears to have been situated. It was known to Jerome, who describes it (*Comm. in Matth.* xi) as on the shore of the lake, 2 miles from Capernaum, or 12 miles, according to Eusebius (*Onomast.* s. v. Χωραζείν, Chorozain). Some compare the Talmudical *Kerazin* [q. v.] (כרזין, *Menachoth*, fol. 85, 1), mentioned as being famous for wheat (Reland, *Palæst.* p. 722; Schwarz, *Palest.* p. 189); while others compare "HAROSHETH (q. v.) of the Gentiles" (חֲרֹשֶׁת

חֲרֹשֶׁת, Judg. iv, 2); and still others consider the name as having been in the vernacular *Charashin* (חרשין), i. e. *woody places* (Lightfoot, p. 160 sq.). Origen and some MSS. write the name *Chora-Zin* (Χώρα Ζιν, H. Ernesti, *Observatt.* Amst. 1636, ii, 6), i. e. *district of Zin;* but this is probably mere conjecture. St. Willibald (about A.D. 750) visited the various places along the lake in the following order—Tiberias, Magdalum, Capernaum, Bethsaida, Chorazin (*Early Trav.* Bohn, p. 17), being doubtless guided by local tradition, for the knowledge of the site has become utterly extinct (Robinson, *Researches*, iii, 295). Some writers at one time supposed it to be the same with *Kulat el-Horsa*, a place on the eastern shore of the Sea of Gennesareth, where Seetzen (*Reisen*, i, 344) and Burckhardt (*Trav.* p. 265) describe some ruins; but this is written *K. el-Hossu* on later maps. A more recent writer (in the *Hall. Lit.-Zeit.* 1845, No. 233) regards it as a place in *Wady el-Jamus;* but this also lacks authority. Pococke (*East*, ii, 72) speaks of a village called *Gerasi* among the hills west of Tell-Houm, 10 or 12 miles north-north-east of Tiberias, and close to Capernaum. The natives, according to Dr. Richardson, call it *Chorasi*. It is apparently this place which Keith and Van de Velde (*Memoir*, p. 304) call *Kerazeh*, and describe as containing several pedestals of columns, with levelled shafts, and the remains of a building formed of large hewn stones; while Dr. Robinson (*Later Biblical Res.* p. 360) rejects the identification with disparagement of the antiquities (p. 347), although he did not visit the site (*Biblioth. Sacra*, 1853, p. 137), which Dr. Thomson, nevertheless, confidently adopts (*Land and Book*, ii, 8), apparently with good reason. M. De Saulcy is disposed to identify Chorazin with the fountain *Ain et-Tin*, near the northern extremity of the plain of Gennesareth; but his arguments, except the vicinity of the spots to the lake, are frivolous (*Narrative*, ii, 371). The question is intimately connected with that of the position of Capernaum (q. v.). Dissertations on the curse pronounced by Christ against this and the neighboring places (Matt. xi, 21) have been written in Latin by Scherzer (Lips. 1666), Hornbeck (*Miscell. Sacr.* Ultraj. 1687, I, iii, 301 sq.), Schott (Tüb. 1766).

Chorepiscŏpi (χωρεπίσκοποι, *country bishops*), an order of ministers of ancient origin. Some (e. g. Rhabanus Maurus) derive the name from the fact that the bishop was chosen *ex choro sacerdotum;* others from *cor episcopi* (heart of the bishop), as their function was to assist the city bishop in rural districts, or villages remote from his residence. The most simple and likely derivation is from χώρα, *country.* Some writers hold that they were only presbyters, but it appears certain (see the full discussion in Bingham) that they discharged episcopal functions. They acted, however, in a subordinate capacity, and possessed limited powers, being subject to a city-bishop, and acting as his colleagues or vicars. They held a different rank, but possessed a similar office; they were authorized to give letters of peace and testimonials; to superintend the affairs of the Church in their district; to appoint ecclesiastical officers, readers, subdeacons, and exorcists; and to ordain presbyters and deacons, but not without the permission and co-operation of the superior or city-bishop. They possessed the privilege of attending councils in their own right, and not merely as substitutes or representatives of the bishop. The canons of the Council of Nicæa, A.D. 325, were subscribed by nine *chorepiscopi*, attached to dioceses of which the bishops also were present. These officers were at first confined to the Eastern Church; in the Western they began to be known about the fifth century. They were never numerous in Spain and Italy, but abounded in Africa and Germany. In the Western Church, Pope Nicholas I (A.D. 864) ordained that they should abstain from all episcopal functions (Mansi, *Conc.* xv, 380); and Leo VII issued a similar rescript about A.D. 937 (Mansi, xviii, 378); but, according to some writers, they continued in France till the twelfth, and in Ireland till the thirteenth. They were succeeded by archdeacons, rural deans, and vicars-general. In the East the order was abolished, for the same reason, by the Council of Laodicea, about A.D. 365, which decreed (canon 57) that itinerant presbyters, περιοδευταί, should visit the country villages for the future, in lieu of resident chorepiscopi; but the order continued until the tenth century. The necessity of suffragan bishops greatly increased after the cessation of the *chorepiscopi.*—Bingham, *Orig. Eccles.* bk. ii, ch. xiv, § 12; Mosheim, *Historical Commentaries*, i, 175 (and references there); Siegel, *Alterthümer*, i, 387 sq.

Chorus. See CHOIR.

Chosamæ'us (Χοσαμαῖος), a name given in the Apocrypha (1 Esdr. ix, 32) apparently as a surname or epithet of one Simon, in the list of "Temple servants" returned from the Captivity; but nothing corresponding to either name appears in the Hebrew text (Ezra ii, 47).

Chosen (prop. בָּחוּר, *bachur';* ἐκλεκτός), "singled out from others to some honorable service or station. 'Chosen' warriors are such as are picked out as the most valiant and skilful in an army, or as best adapted to some special and momentous enterprise (Exod. xv, 4; Judg. xx, 6). The Hebrew nation was a 'chosen' people, God having set them apart to receive his word and preserve his worship (Psa. cv, 43; Deut. vii, 7). Jerusalem was 'chosen' to be the seat of his temple (1 Kings xi, 13). Christ is the 'chosen' of God; from eternity he was set apart in the Divine mind as the only fit person to be our mediator and surety (Isa. xlii, 1). The apostles were 'chosen,' fixed upon, and set apart from others to bear witness unto Christ's resurrection (Acts x, 41). There is an error in supposing a certain fixed technical meaning of the word, irrespective of that *to which* each is 'chosen.' The Christian Church (that is, 'all in every place' to whom the Gospel has been announced) has been chosen to the enjoyment of the benefits and privileges placed within the reach of all to whom such announcement has been made; while others, who remain in ignorance of Christianity, cannot be said to have been thus 'chosen.' Then, again, 'many are called, but few chosen,' viz., as having so profited by their opportunities as to be accepted finally." See ELECT.

Choules, JOHN OVERTON, a Baptist minister, was born in Bristol, England, Feb. 5, 1801. He was baptized by Dr. Ryland in 1820, and emigrated to America in 1824. After teaching three years at Red Hook, he became pastor of the Second Baptist Church, Newport, R. I., in 1827, but removed in 1833 to Buffalo. After serving as pastor there and in New York, he returned to Newport, where he remained as pastor of the Second Church during the rest of his life. He died while on a visit to New York, Jan. 7, 1856. He was a frequent contributor to periodicals, and at one time edited the Boston Christian Times. Besides smaller works, he published *The Origin and History of Missions*, by J. O. Choules and Thomas Smith (Boston, 1837, 2 vols. 4to). See Hague, *Discourse commemorative of Dr. Choules* (N. Y. 1856).—Duyckinck, *Cyclopædia of American Literature*, ii, 317; *Christian Review*, 1856, p. 310.

Choze'ba (Heb. *Kozeba'*, כֹּזֵבָא, *lying;* Sept. Χωζηβά, Vulg. *mendacium*), a place whose inhabitants ("men of Chozeba") are named (1 Chron. iv, 22) among the descendants of Shelah, the son of Judah. The name is sufficiently like the CHEZIB (and especially the reading of the Samaritan Codex of that name, כזבה) where Shelah was born (Gen. xxxviii, 5) to suggest that the two refer to the same place; that, namely, elsewhere (Josh. xv, 44) called ACHZIB (q. v.) in Judah.

Chrestians. The heathen made a mistake in the name of our Saviour, whom they generally called *Chrestus*, and his followers *Chrestians* (Suetonius, *in Claud.* 25). This is noted by Justin Martyr (*Apol.* 2), Tertullian (*Apol.* c. 3), and Lactantius (iv, 7). *Christus* is the same with the Hebrew Messias, and signifies a person anointed; while *Chrestus*, χρηστός, means *good*. Tertullian tells the heathen that they were unpardonable for persecuting Christians merely for their name, for both names were innocent and excellent.—Bingham, *Orig. Eccles.* bk. i, ch. i, § 11.

Chrestus, a person, named by Suetonius (*Claud.* 25) as having incited a sedition among the Jews at Rome, which led to their expulsion from the city (comp. Acts xviii, 2). Comp. FULVIA. There have been two different opinions as to whom Suetonius meant by *Chrestus* (see Kuinöl, *ad Act.* in loc.); whether some Hellenist, who had excited political disturbances (as Meyer and De Wette suppose; see Conybeare and Howson, *St. Paul*, i, 386), the name Chrestus (Gr. χρηστός, *useful*) frequently occurring as borne by manumitted slaves; or whether, as there is good reason to think (Lipsius on Tacit. *Annal.* xv, 44; Grotius, *on Acts*, xviii, 2; Neander, *Planting and Training*, ii, 231), Suetonius does not refer to some actual dissension between Jews and Christians, but confounds the name *Christ*, which was most unusual as a proper name, with the much more frequent appellation of *Chrestus* (see Tertullian, *Apol.* 3; Lactantius, *Instit.* iv, 7, 5; Milman, *Hist. of Christianity*, i, 430). Orosius (*Hist.* vii, 6) places Claudius's edict of banishment in the ninth year of his reign (i. e. A.D. 49 or 50), and he refers to Josephus, who, however, says nothing about the matter. In King Alfred's Anglo-Saxon version of *Orosius*, however, this reference to Josephus does not occur; the register simply connects the expulsion with a famine: "In the ninth year of his government there was a great famine in Rome, and Claudius ordered all the Jews that were therein to be driven out" (Bosworth's *Orosius*, p. 119 of the Saxon and 179 of the trans. See this statement of Orosius commented on by Scaliger, *Animadv.* on Euseb. *Chron.* p. 192). On the contrary, Pearson (*Ann. Paulin.*) and Vogel (in Gabler's *Journal*), without, however, giving decisive grounds for their opinion, suppose Claudius's twelfth year (i. e. A.D. 52) to be the more likely one. With Anger (*De temporum ratione in Act. Apost.* p. 118), one might, on negative grounds, assert that, so long as Herod Agrippa was at Rome with Claudius, the edict of expulsion would hardly be published; i. e. previous to the year A.D. 49. Dr. Burton, however (*On the Chronology of the Acts*, p. 26), puts the date of the edict some time between A.D. 41 and 46, supporting his opinion by the fact "that no mention is made of Claudius's decree in the Annals of Tacitus which have come down to us; and that, since the lost books of the Annals occupy the first six years of the reign of Claudius, it is probable that Tacitus mentioned this decree in one of those books." The year referred to in Acts xviii, 2, is A.D. 49. See CLAUDIUS.

Chrism (from χρίσμα. *oil, unction*), consecrated oil, used in the Roman and Eastern churches in the rites of baptism, confirmation, ordination, and extreme unction.

1. *Origin of the Usage.*—In the N. T. the word is used metaphorically for the grace of the Spirit; e. g. 1 John ii, 20, *Ye have an unction* (χρίσμα) *from the Holy One.* The actual use of oil in Christian rites is ascribed by Basil (and some Romanist writers follow him) to the apostles, but there is no foundation for this. It is probable that the name Christian (*anointed*) itself gave rise, at an early period, to the anointing of heathens before or at their baptism. Unction is mentioned by Tertullian, Cyril of Jerusalem, and the Apostolical Constitutions; and in the fourth century it seems to be found in general use throughout the Church. From Tertullian's time (A.D. 220) onward we find mention of a double anointing at baptism, one before, the other after. The latter is called, by way of distinction, χρίσμα. The first (ἔλαιον) was preparatory, and took place immediately after exorcism and the signature of the cross. Of the design of chrism, Cyril of Jerusalem (*Cateches. Mystag.* 2) says, "Men were anointed from head to foot with this consecrated oil, and this made them partakers of the true olive-tree, Jesus Christ. For they, being cut out of a wild olive-tree, and ingrafted into a good olive-tree, were made partakers of the fatness of the good olive-tree." Ambrose (*De Sacrament.* lib. i, c. 2) compares it to the anointing of the wrestlers before the combat: "Thou camest to the font and wast anointed as a *champion* of Christ, to fight the fight of this world." A distinction between the two anointings is made. "Men were first anointed with the ancient oil, that they may be Christ's; that is, the anointed of God; but they were anointed with the precious ointment after baptism in remembrance of him who reputed the anointing of himself with ointment to be his burial" (Justin Mart. *Respons. ad Orthodox.* qu. 137). The *Apostol. Constitutions* make the same distinction (bk. vii, ch. 22). Chrysostom says, "Every person, before he was baptized, was anointed as wrestlers entering the field; and this not as the high-priest was anointed of old, only on the head, or right hand, or ear, but all over his body, because he came not only to be taught, but to exercise himself in a fight or combat" (*Hom. vi in Coloss.*).

2. *In the Roman and Greek Churches.*—(1) At baptism the catechumen is anointed with "holy oil" on the breast and between the shoulders, by the priest, with the sign of the cross; *after* the baptism, the chrism is applied to the crown of the head, that the person baptized may know "that he is called a Christian from Christ, as Christ is so called from chrism" (*Catechism of Trent*, p. 135, 136, Balt. ed.). (2) In confirmation, the chrism (made of olive oil and balsam, and consecrated by the bishop) constitutes the *matter* of the sacrament, a doctrine resting ultimately upon the forged decretals (q. v.), and is applied to the forehead of the person confirmed (*Catechism of Trent*, p. 141 sq.). (3) In extreme unction, olive oil alone can be used (without balsam), and it is applied to the organs of the five senses, and also to the loins and feet.

The Greek Church agrees with the Roman as to the spiritual value of chrism, but there are some differences of usage. Both require that the chrism shall be consecrated; but every bishop has the right to consecrate it in the Roman Church, while the Greek confines this power to the patriarchs. The Greek Church, however, uses a chrism compounded of some forty ingredients, besides oil (see list of them in Siegel, i, 397). See CONFIRMATION; EXTREME UNCTION.

In the Protestant churches chrism is not used.—Bingham, *Orig. Eccles.* bk. xi, ch. 9, 10; Siegel, *Alterthümer*, i, 396 sq.; Elliott, *Delineation of Romanism*, bk. ii, ch. 2, 3; Burnet, *On the Articles*, art. xxv.

Chrisome (*chrismale*). In the Roman Church the priest puts on the baptized person after the Chrism a white robe, saying, "Receive this white garment, which mayest thou carry unstained, etc." In the baptism of infants a white kerchief is given instead of the garment, with the same words.

By a constitution of Edmund, archbishop of Canterbury, A.D. 7?6, the chrisomes, after having served the purposes of baptism, were to be made use of only for the making or mending of surplices, etc., or for the wrapping of chalices. A "chrisome child," in old English usage, was a child in its chrisome cloth. Thus Jeremy Taylor: "This day is mine and yours, but ye know not what shall be on the morrow; and every morning creeps out of a dark cloud, leaving behind it an ignorance and silence deep as midnight, and undiscerned as are the phantasms that make a chrisome child to smile" (*Holy Dying*, chap. i, sec. 2).

The first Common Prayer-book of King Edward orders that the woman shall offer the chrisome when she comes to be churched; but, if the child happens to die before her churching, she was excused from offering it; and it was customary to use it as a shroud, and to wrap the child in it when it was buried. Hence, by an abuse of words, the term is now used in England not to denote children who die between the time of their baptism and the churching of the mother, but to denote children who die before they are baptized, and so are incapable of Christian burial.—*Catechism of Trent* (Balt. ed.), p. 136; Hook, *Church Dictionary*, s. v.; Procter, *On Common Prayer*, 373.

Christ (Χριστός, *anointed*, a Greek translation of the Heb. מָשִׁיחַ, *Messiah*, and so used in the Sept.), the official title of our Saviour (occurring first in 2 Esdr. vii, 29, and constantly in the New Test.), as having been consecrated to his redemptive work by the baptism at Jordan, the descent of the Holy Spirit and his plenary unction, as the prophet, priest, and king of his people. See CHRIST, OFFICES OF; MESSIAH. It thus also distinguishes the individual JESUS (q. v.), which is his human appellation, from others of the same name; while his relations to the Godhead are expressed by the term "the Word" or LOGOS (q. v.), CHRIST therefore is not, strictly speaking, a proper name, but a designation of office. "Jesus Christ," or rather "Jesus *the* Christ," is a mode of expression of the same kind as "John the Baptist," or Baptizer. In consequence of not adverting to this, the import of many passages of Scripture is misapprehended, e. g. Acts xvii, 3; xviii, 5; Matt. xxii, 42. But the word, though an appellative, intended to denote a particular official character, came to be used as a strictly personal designation of the Lord Jesus. Even the term Messiah towards the close of the O. T. came to be used of the expected Redeemer much as a proper name (without the article prefixed); and Χριστός is often similarly used in the N. T. (e. g. Luke ii, 11; John iv, 25; especially by Christ himself, John xvii, 3). But as it was not settled in men's minds, when Jesus first appeared, that he was really Messiah, we usually find the article prefixed to Χριστός "until after the resurrection, when all doubt vanished from the minds of his followers. So, while in the Gospels the name is rarely found without the article, it is almost as rarely found with the article in the Epistles" (Fairbairn, *Hermeneutical Manual*, p. 236).

1. *History of the Title*.—(1.) Unction, from a very early age, seems to have been the emblem of consecration, or setting apart to a particular, and especially to a religious purpose. Thus Jacob is said to have *anointed* the pillar of stone, which he erected and set apart as a monument of his supernatural dream at Beth-el (Gen. xxviii, 18; xxxi, 13; xxxv, 14). Under the Old-Testament economy high-priests and kings were regularly set apart to their offices, both of which were, strictly speaking, sacred ones, by the ceremony of anointing, and the prophets were occasionally designated by the same rite. This rite seems to have been intended as a public intimation of a divine appointment to office. Thus Saul is termed "the Lord's anointed" (1 Sam. xxiv, 6); David, "the anointed of the God of Israel" (2 Sam. xxiii, 1); and Zedekiah, "the anointed of the Lord" (Lam. iv, 20). The high-priest is called "the anointed priest" (Lev. iv, 3). See ANOINTING.

(2.) From the origin and design of the rite, it is not wonderful that the term should have been applied, in a secondary and analogical sense, to persons set apart by God for important purposes, though not actually anointed. Thus Cyrus, the king of Persia, is termed "the Lord's anointed" (Isa. xlv, 1); the Hebrew patriarchs, when sojourning in Canaan, are termed "God's anointed ones" (Psa. cv, 15); and the Israelitish people receive the same appellation from the prophet Habakkuk (iii, 13). It is probably with reference to this use of the expression that Moses is said by the writer of the Epistle to the Hebrews to have "counted the reproach of Christ" (Heb. xi, 26), τοῦ Χριστοῦ (λαοῦ), the same class who in the parallel clause are termed the "people of God," "greater riches than the treasures of Egypt."

(3.) In the prophetic Scriptures we find this appellation given to an illustrious personage, who, under various designations, is so often spoken of as destined to appear in a distant age as a great deliverer. *a.* The royal prophet David seems to have been the first who spoke of the Great Deliverer under this appellation. He represents the heathen (the Gentile nations) raging, and the people (the Jewish people) imagining a vain thing "against Jehovah, and against his *Anointed*" (Psa. ii, 2). He says, "Now know I that the Lord saveth his *Anointed*" (Psa. xx, 6). "Thou hast loved righteousness and hated iniquity," says he, addressing himself to "Him who was to come," "therefore God, even thy God, hath *anointed* thee with the oil of gladness above thy fellows" (Psa. xlv, 7). In all the passages in which the Great Deliverer is spoken of as "the Anointed One" by David, he is plainly viewed as sustaining the character of a king.

b. The prophet Isaiah also uses the appellation "the Anointed One" with reference to the promised deliverer, but when he does so, he speaks of him as a prophet or great teacher. He introduces him as saying, "The Spirit of the Lord God is upon me, because the Lord God hath *anointed* me to preach good tidings unto the meek; he hath sent me to bind up the broken-hearted, to proclaim liberty to the captives, and the opening of the prison to them who are bound; to proclaim the acceptable year of the Lord, and the day of vengeance of our God; to comfort all that mourn," etc. (Isa. lxi, 1, etc.).

c. Daniel is the only other of the prophets who uses the appellation "the Anointed One" in reference to the Great Deliverer, and he plainly represents him as not only a prince, but also a high-priest, an expiator of guilt. "Seventy weeks are determined upon thy people and upon thy holy city, to punish the transgression, and to make an end of sins, and to make reconciliation for iniquity, and to bring in everlasting righteousness, and to seal up the vision and the prophecy, and to *anoint* the most holy. Know therefore and understand that from the going forth of the commandment to restore Jerusalem unto *Messiah* the Prince shall be seven weeks and threescore and two weeks; the city shall be built again, and the wall, even in troublous times; and after threescore and two weeks shall Messiah be cut off, but not for himself" (Dan. ix, 24-26). See SEVENTY WEEKS.

(4.) During the period which elapsed from the close of the prophetic canon till the birth of Jesus no appellation of the expected deliverer seems to have been so common as the Messiah or Anointed One, and this is still the name which the unbelieving Jews ordinarily employ when speaking of him whom they still look for to avenge their wrongs and restore them to more than their former honors.

Messiah, Christ, Anointed, is, then, a term equivalent to consecrated, sacred, set apart; and as the record of divine revelation is called, by way of eminence, *The* Bible, or book, so is the Great Deliverer called *The* Messiah, or Anointed One, much in the same way as he is termed *The* Man, *The* Son of Man. See ANOINTED.

2. *The import* of this designation as given to Jesus of Nazareth may now readily be apprehended.

(1.) No attentive reader of the Old Testament can help noticing that in every part of the prophecies there is ever and anon presented to our view an illustrious personage destined to appear at some future distant period, and, however varied may be the figurative representations given of him, no reasonable doubt can be

entertained as to the identity of the individual. Thus the Messiah is the same person as "the seed of the woman" who was to "bruise the head of the serpent" (Gen. iii, 15); "the seed of Abraham, in whom all the nations of the earth were to be blessed" (Gen. xxii, 18); the great "prophet to be raised up like unto Moses," whom all were to be required to hear and obey (Deut. xviii, 15); the "priest after the order of Melchizedek;" "the rod out of the stem of Jesse, which should stand for an ensign of the people to which the Gentiles should seek" (Isa. xi, 1, 10); the virgin's son, whose name was to be Immanuel (Isa. vii, 14); "the branch of Jehovah" (Isa. iv, 2); "the Angel of the Covenant" (Mal. iii, 1); "the Lord of the Temple," etc., etc. (*ib.*). When we say, then, that Jesus is the Christ, we in effect say, "This is He of whom Moses in the law and the prophets did write" (John i, 45); and all that they say of Him is true of Jesus.

The sum of this prophetic testimony respecting him is that he should belong to the very highest order of being, the incommunicable name Jehovah being represented as rightfully belonging to him; that "his goings forth have been from old, from everlasting" (Mic. v, 2); that his appropriate appellations should be "Wonderful, Counsellor, the Mighty God" (Isa. ix, 6); that he should assume human nature, and become "a child born" of the Israelitish nation of the tribe of Judah (Gen. xlix, 10), of the family of David (Isa. xi, 1); that the object of his appearance should be the salvation of mankind, both Jews and Gentiles (Isa. xlix, 6); that he should be "despised and rejected" of his countrymen; that he should be "cut off, but not for himself;" that he should be "wounded for men's transgressions, bruised for their iniquities, and undergo the chastisement of their peace;" that "by his stripes men should be healed;" that "the Lord should lay on him the iniquity" of men; that "exaction should be made and he should answer it;" that he should "make his soul an offering for sin;" that after these sufferings he should be "exalted and extolled, and made very high;" that he should "see of the travail of his soul and be satisfied, and by his knowledge justify many" (Isa. lii, *passim*); that Jehovah should say to him, "Sit at my right hand until I make thine enemies thy footstool" (Psa. cx, 1); that he should be brought near to the Ancient of Days, and that to him should be given "dominion, and glory, and a kingdom, that all people, and nations, and languages should serve him—an everlasting dominion which shall not pass away—a kingdom that shall not be destroyed" (Dan. vii, 13, 14). All this is implied in saying Jesus is the Christ. In the plainer language of the New Testament, "Jesus is the Christ" is equivalent to Jesus is "God manifest in the flesh" (1 Tim. iii, 16)—the Son of God, who, in human nature, by his obedience, and sufferings, and death in the room of the guilty, has obtained salvation for them, and all power in heaven and earth for himself, that he may give eternal life to all coming to the Father through him.

(2.) While the statement "Jesus is the Christ" is thus materially equivalent to the statement "all that is said of the Great Deliverer in the Old Testament Scriptures is true of Him," it brings more directly before our mind those truths respecting him which the appellation "the Anointed One" naturally suggests. He is a prophet, a priest, and a king. He is the great revealer of divine truth; the only expiator of human guilt, and reconciler of man to God; the supreme and sole legitimate ruler over the understandings, consciences, and affections of men. In his person, and work, and word, by his spirit and providence, he unfolds the truth with respect to the divine character and will, and so conveys it into the mind as to make it the effectual means of conforming man's will to God's will, man's character to God's character. He has by his spotless, all-perfect obedience, amid the severest sufferings, "obedience unto death, even the death of the cross," so illustrated the excellence of the divine law and the wickedness and danger of violating it, as to make it a righteous thing in "the just God" to "justify the ungodly," thus propitiating the offended majesty of heaven; while the manifestation of the divine love in appointing and accepting this atonement, when apprehended by the mind under the influence of the Holy Spirit, becomes the effectual means of reconciling man to God and to his law, "transforming him by the renewing of his mind." And now, possessed of "all power in heaven and earth," "all power over all flesh," "He is Lord of all." All external events and all spiritual influences are equally under his control, and as a king he exerts his authority in carrying into full effect the great purposes which his revelations as a prophet, and his great atoning sacrifice as a high-priest, were intended to accomplish. See CHRIST, OFFICES OF.

(3.) But the full import of the appellation the CHRIST is not yet brought out. It indicates that He to whom it belongs is the *anointed* prophet, priest, and king—not that he was anointed by material oil, but that he was divinely *appointed*, *qualified*, *commissioned*, and *accredited* to be the Saviour of men. These are the ideas which the term *anointed* seems specially intended to convey. *a.* Jesus was divinely *appointed* to the offices he filled. He did not assume them, "he was called of God as was Aaron" (Heb. v, 4), "Behold mine ELECT, in whom my soul delighteth." *b.* He was divinely *qualified:* "God gave to him the Spirit not by measure." "The Spirit of the Lord was upon him," etc. (Isa. xi, 2-4). *c.* He was divinely *commissioned:* "The Father sent him." Jehovah said to him, "Thou art my servant, in thee will I be glorified," etc. (Isa. xlix, 6). "Behold," says Jehovah, "I have given Him for a witness to the people—a leader and commander to the people." *d.* He is divinely *accredited:* "Jesus of Nazareth," says the apostle Peter, was "a man approved of God among you by miracles, and wonders, and signs which God did by him in the midst of you" (Acts ii, 22). "The Father who hath sent me," says Jesus himself, "hath borne witness of me" (John v, 37). This he did again and again by a voice from heaven, as well as by the miracles which he performed by that divine power which was equally his and his Father's. Such is the import of the appellation *Christ*.

8. If these observations are clearly apprehended, there will be little difficulty in giving a satisfactory answer to the question which has sometimes been proposed—when did Jesus become Christ? when was he *anointed* of God? We have seen that the expression is a figurative or analogical one, and therefore we need not wonder that its references are varying. The *appointment* of the Saviour, like all the other divine purposes, was of course from eternity: he "was set up from everlasting" (Prov. viii, 23); he "was foreordained before the foundation of the world" (1 Pet. i, 20). His qualifications, such of them as were conferred, were bestowed in or during his incarnation, when "God anointed him with the Holy Ghost and with power" (Acts x, 38). His commission may be considered as given him when called to enter on the functions of his office. He himself, after quoting in the synagogue of Nazareth, in the commencement of his ministry, the passage from the prophecies of Isaiah in which his unction to the prophetical office is predicted, declared, "*This day* is this Scripture fulfilled in your ears." And in his resurrection and ascension, God, as the reward of his loving righteousness and hating iniquity, "anointed him with the oil of gladness above his fellows" (Psa. xlv, 7), i. e. conferred on him a regal power, fruitful in blessings to himself and others, far superior to that which any king had ever possessed, making him, as the apostle Peter expresses it, "both Lord and Christ" (Acts ii, 36). As to his being *accredited*, every miraculous event performed in refer-

ence to him or by him may be viewed as included in this species of anointing, especially the visible descent of the Spirit on him in his baptism.

4. These statements, with regard to the import of the appellation "the Christ," show us how we are to understand the statement of the apostle John. "Whosoever believes that Jesus is the Christ is born of God" (1 John v, 1), i. e. is "a child of God," "born again," "a new creature;" and the similar declaration of the apostle Paul, "No man can say that Jesus is the Lord," i. e. the Christ, the Messiah, "but by the Holy Ghost" (1 Cor. xii, 3). It is plain that the proposition, "Jesus is the Christ," when understood in the latitude of meaning which we have shown belongs to it, contains a complete summary of the truth respecting the divine method of salvation. To believe that proposition, rightly understood, is to believe the Gospel—the saving truth, by the faith of which a man is, and by the faith of which only a man can be, brought into the relation or formed to the character of a child of God; and though a man may, without divine influence, be brought to acknowledge that "Jesus is the Lord," "Messiah the Prince," and even firmly to believe that these words embody a truth, yet no man can be brought really to believe and cordially to acknowledge the truth contained in these words, as we have attempted to unfold it, without a peculiar divine influence. That Jesus is the great comer (ὁ ἐρχόμενος, ὁ ἐλθών) is the testimony of God, the faith of which constitutes a Christian, the *one thing* (τὸ ἕν) to which the Spirit, the water, and the blood unite in bearing witness (1 John v, 6-9). This historical view of Jesus is not inconsistent with the Jewish Messianic idea, but continuative and expansive of it. See JESUS.

CHRIST, IMAGES AND PORTRAITS OF. The Gospels contain no notice whatever of the personal appearance of Christ. The passages in the O. T. which refer to his person (Isa. lii, 14; liii, 2) seem almost like premonitory warnings against any worship of Christ "after the flesh." The Apostolical Fathers are as silent on this subject as the Scriptures are. "Either the Church was too spiritual to desire such descriptions, or its leaders were too faithful to invent them." So completely, indeed, had all tradition of the personal appearance of Christ died out, that, as early as a hundred years after his death, a long controversy arose as to whether he was in form and features as described by the prophet Isaiah (lii, 14; liii, 2), without comeliness and beauty. Justin Martyr, Tertullian, and Cyril took the ground that Christ was physically uncomely; Cyril even declares that Christ was the "ugliest of the sons of men." Ambrose, Jerome, and the later fathers generally, declared him to have been the most beautiful of mankind (Didron, *Christian Iconography*, i, 268). The spurious letter of Lentulus to the Roman senate, describing Christ as a man of noble appearance, with curled hair parted in front, and falling, dark and glossy, over his shoulders, with a smooth, high forehead, a strong, reddish, and irregular beard, dated probably also from the third century, but has been known, in its present form, only since the eleventh. See LENTULUS.

When persecution arose, the early Christians felt soon the need of some visible sign of their faith. The earliest adopted was the *fish* (q. v.). Afterwards the figures under which Christ presented himself in the New Testament, as the *vine*, the LAMB (of God which taketh away the sins of the world), and, above all, as the Good Shepherd (q. v.) carrying a lamb on his shoulders, were introduced into the paintings and sculptures of the Catacombs of Rome, Naples, and Syracuse. The so-called monogram of Christ, viz. ☧ (for Χρ, the two first letters of the name Χριστός), with or without the letters A, Ω (the Alpha and Omega of the Apocalypse), appears about the time of Constantine († 337). See CHRIST, MONOGRAM OF; ALPHA; AGNUS DEI.

Again, the best class of pagan thinkers in the Roman empire, even before the official adoption of Christianity, had become dissatisfied with the complications of polytheism, and were seeking for a simpler faith. Perhaps the mystery of the unity of the Godhead, which had been celebrated through nearly all forms of paganism in secret rites, had become the common property of educated minds. Egyptian mythology, with the *sun* as its great centre, had also made its impress on the Roman mind. And thus, towards the later periods of the supremacy of paganism in the Roman empire, *Apollo*, as the deity of the sun, had assumed the chief place in heathen worship. As indicating that Christ was the true "light of the world," the "Sun of righteousness"—the most favorite figure used in speaking of the Saviour in the early centuries —this very figure of Apollo was often introduced as indicating Christ. *Orpheus* was also often thus introduced, as indicating that Christ is the true charmer of the evil passions of the human heart—indicated by the beasts that quietly listened to his music, and the true ruler of the powers of nature—indicated by the trees and other plants bowing to his music.

The figure of the Good Shepherd, usually a beardless youth not over twenty years of age, with long, curly hair and a joyful countenance, gave the most usual type of the personal figure of Christ, when represented on the sarcophagi and in some of the frescoes of the Catacombs. Many of these sarcophagi are now in the Museum of the Lateran. One of the most interesting of these youthful figures of the Saviour in sculptured monuments is that in the tomb of Junius Bassus (A.D. 359), in the church of St. Peter, at Rome, in which Christ is represented disputing with the doctors. This type of the Saviour as a youth appeared again in some manuscripts, and in other paintings of the early part of the Middle Ages.

Quite a different type, however, predominated at a later period in all Christian art through the entire Middle Ages. The first example of it occurs in a tablet of ivory now in the Vatican museum. The second, and by far the better example of this type, is a painting in a chapel in the catacombs of Callistus. It is considered by recent Roman archæologists to be of the second century, but this is not at all probable. It represents the Saviour as about thirty-three years of age, with a somewhat elongated oval face, bearded, with a grave and somewhat melancholy, but still sweet and benign expression of injured innocence. The features are not to be recognised as distinctively Greek, Roman, or Jewish, but they are highly ideal. The brow is high; the beard is sparse, somewhat pointed, and of a reddish hue; the hair parts in the middle, and flows in abundant curling masses over the shoulders. Of the many varieties of representations of Christ, of which Augustine speaks as existing in his day, this type soon gained the predominance in the Christian world, and it has held its place till modern times. In the mosaics of the Basilicas and the Byzantine churches, in Rome, Constantinople, and Ravenna, it gained an inexpressible grandeur, which was not entirely lost during the decadence of the so-called Byzantine period of painting (A.D. 600-1000). Almost its original power was renewed under the hand of Giotto. It finally reached its highest development in Christ as the Redeemer in Leonardo's Last Supper, and in Christ the Judge in Michael Angelo's Last Judgment.

In the scenes of the birth, infancy, and early childhood of the Saviour, attempts have usually been made

to infuse into his face indications of the divinity of his nature. This reached its climax in the miniatures of some Grecian manuscripts, in the paintings of the pre-Raphaelites, and especially in the Christ of the Sistine Madonna (at Dresden). Later in life, even Raphael painted the youthful Christ as merely a blooming or laughing child. Other Italian painters, in the decadence of morals of the seventeenth and eighteenth centuries, painted portraits of beautiful children in the arms of their mistresses as madonnas. Some Flemish and Dutch painters imagined scenes in which Christ, as a dutiful child obedient to the law, was helping his mother in such homely duties as hanging out clothes which she was washing, or as helping his father in his labors as carpenter.

When represented as disputing with the doctors, he is usually placed on a seat above the other figures, with his feet on a stool, as symbol of his high position and authority.

In whatever scene of his life he appeared, he is often represented, after the time of Constantine, with a nimbus (q. v.) around his head, as a symbol of his heavenly nature and origin. This often also included a cross, or the monogram ☧. He is usually represented larger than the surrounding figures. As indicating his authority and power, the Saviour is often represented with a globe—the universe—under his feet; or as sitting on the globe, or the rainbow, or with a wand in his hand, especially while performing miracles. The Saviour was usually represented in the early works as wearing a tunic, over which was thrown the *pallium* of the ancients. The tunic often had two bands of purple or of gold on the breast, and, like the pallium, it was of white cloth. Sometimes a volume, the New Testament, was placed in his hand, or he was placed between two cases of volumes, the Old and the New Testament.

Besides direct scenes from his own life, or representations indicating his holy mission, the Saviour was, during the first centuries, when symbolism was carried to a very great perfection, sometimes represented in scenes from the Old Testament, as in the fiery furnace with the three worthies, with Daniel in the lions' den, and in the place of Moses, when that patriarch was striking the rock.

Besides these extant representations of the Saviour in Christian art, we know that the Gnostics had what they called images of Christ as early as the second century. Raoul Rochette (*Types de l'Art*, p. 9 sq.) says that the cast of features described above as belonging to the best portraits of Christ was derived from the Gnostic artists. Compare also Irenæus, *adv. Hær.* i, 25, § 6. A century later, the emperor Alexander Severus (A.D. 222-235) placed among his household gods figures of Abraham and Christ beside those of the heathen deities.

Images of Christ, claimed by the Romanists to be of miraculous origin, are preserved in several churches in Italy and the Orient. Most of them are really of Byzantine origin, and probably dated from between the tenth and twelfth centuries. The power of working miracles is ascribed to these images! One of the most noted of them is *the Veronica* (the picture known as the *Ecce Homo*), on a linen cloth which a woman named Veronica is held by tradition to have given to Christ while bearing his cross to Calvary to wipe his brow. See VERONICA. On the cloth is the face of the Saviour, with an expression of great grief, and the brow pierced by the crown of thorns. Another is that which is said to have appeared miraculously when St. Sylvester was consecrating the basilica of St. John Lateran, and which was formerly preserved above the tribune of that church. Another is the *Abgarus* picture, a portrait without colors, which a baseless tradition (of the tenth century) has it that Christ sent to king Abgarus of Edessa, when that king wished Christ to come and heal him of a sickness, and the original of which picture two churches—the church of St. Sylvester in Prata, near Rome, and a church at Genoa—profess to have. See ABGARUS. Another is preserved in the sacristy of the basilica of St. Lawrence, near Rome. There are also several wooden images of the infant Saviour said to have been carved and painted by St. Luke, or by angels!

Paintings or sculptures of the crucifixion [see CRUCIFIX] are usually placed over the altar in Romish, Greek, Armenian, and Lutheran churches. In some Protestant churches, other than the Lutheran, the figure of the Saviour is often introduced in paintings of the parables, the miracles, and other Biblical subjects, rendered in a Protestant sense. See Piper, *Mythologie und Symbolik der christlichen Kunst* (Weimar, 1847); Martigny, *Dictionnaire des Antiquités Chrétiennes* (Par. 1865); Rossi, *Roma Sotterranea* (Rome, 1866); also the works of Aringhi, Bottari, Perret, etc., on the Catacombs; Glückselig, *Christus-Archæologie* (1863, 4to; reproduces the so-called Edessa picture in colors, and gives six other portraits); Marangoni, *Istoria della Cappella di S.S. di Roma* (Rome, 1747); Mrs. Jamieson, *History of our Lord in Art* (London, 1864, 2 vols. 8vo); Lecky, *History of Rationalism*, i, 221-257; Didron, *Christian Iconography* (Bohn's ed.), i, 242-298; Lewis, *Bible, Missal, and Breviary* (Edinb. 1853, 2 vols. 8vo), i, 138 sq.; Schaff, *Church History*, iii, 110. See CATACOMBS; IMAGE-WORSHIP.

CHRIST, LIFE OF. See JESUS.

CHRIST, MONOGRAM OF.—In the Catacombs and elsewhere is to be found a monogram in the forms ☧, ⳩, ☧, ⳩, composed of the Greek letters X and P, the initial letters of the name Χριστός, Christ. Sometimes the Greek letters α, ω (Alpha and Omega, the first and the last) are combined with the others, in the form α☧ω, or suspended by chains from the transverse bar, thus ⳩. The precise date of its origin is unknown; but Killen (*Ancient Church*, p. 317, note) asserts that it is found on coins of the Ptolemies, and cites Aringhi (*Roma Subterranea*, ii, 567) as his authority. But, whatever the origin of the monogram, it came into new prominence and wider use from the fact that Constantine (A.D. 312) applied it to the heathen military standard. See LABARUM. It is called, therefore, not only the monogram of Christ, but sometimes also the monogram of Constantine.—Schaff, *Ch. History*, ii, 27; Jamieson, *History of our Lord in Art*, ii, 315; Martigny, *Dict. des Antiquités*, p. 414; Perret, *Les Catacombes de Rome*, iii, 96. See CATACOMBS.

CHRIST, OFFICES OF (as *Prophet*, *Priest*, and *King*).

I. *Origin and History of this Division.*—Eusebius, in his *Church History* (i, 3), and also in his *Demonstratio Evangelica* (iv, 15), is the first who appears to have considered the mediatorial work of Christ as consisting in the three offices. The division became common in the Greek Church, and it is still usual in the Russian Church. In the Latin Church it has not passed so generally into use, although Bellarmin and many others allow it. Luther, Melanchthon, and the other early Lutheran theologians do not use the distinction. It was introduced into Lutheran theology by Gerhard (q. v.) in his *Loci Theologici*, was admitted by Spener into his Catechism, and remained prevalent among Lutheran theologians until the time of Ernesti, who wrote against it under the title *De officio Christi triplici*, and was followed by Zachariæ, Doderlein, Knapp, and others (see Knapp, *Theology*, § 107). In the Reformed Church it was adopted by Calvin (*Inst.* ii, 15), was admitted into the Heidelberg Catechism, and was generally followed by the dogmatic writers of the Reformed churches, both on the Continent and in England. The modern theology of Germany (as the works of De Wette, Schleiermacher, Tho-

Tuck, Nitzsch, Liebner, Ebrard, etc.) generally adhere to it, regarding it as an *essential*, and not merely accidental and formal division of the mediatorial work, as the only one which exhausts it. It is used by many of the best English theologians. We give here a modification of Ebrard's article on the topic in Herzog's *Real-Encyklopädie*, vi, 607 sq.

II. *Biblical View.*—The prophecies of the O. T. designate the Redeemer as the perfect and model *prophet*, as the servant of God to whom the attributes of prophecy, priesthood, and royalty alike belong; as the *kingly* seed of David, or the second, perfect David; and finally as the *priest-king*. He, moreover, in spirit, calls himself, in the Gospels, "prophet," and "son of David." In the Epistle to the Hebrews he is represented as the only true and eternal high-priest. This threefold aspect of his mission is united in the conception of the *Anointed* or *Messiah;* for as Elisha was by Elijah anointed a *prophet* (1 Kings xix, 16), so was the promised "servant of God" to be anointed by the Spirit of the Lord; and as the *kings* of Israel were anointed (1 Sam. x, 1; xvi, 13; 1 Kings i, 13; xix, 15, etc.), so was Christ anointed king of righteousness (Heb. i, 8, 9). And as it was ordained by the law that *the high-priest* should be anointed to his office (Exod. xxviii, 41; xxix, 7; xxx, 30; Lev. iv, 3; vi, 22; vii, 36), so Christ was made high-priest "*not after the law of a carnal commandment, but after the power of an endless life*" (Heb. vii, 16). The conception of the Messiah or Anointed thus divides itself into the three aspects of prophet, priest, and king.

The first prophecy bearing on the subject is in Deut. xviii, 15. The people, afraid of hearing the commandments of God, sent up Moses to hear them (Exod. xx, 19; Deut. v, 27). The Lord "heard" the people (Deut. v, 28), and promised (as they had sent up Moses to hear Him) that He would send them a prophet whom *they* could and should hear. The God who revealed his law in the midst of thunder and lightning, so that the people durst not approach him, would afterwards *approach the people* through a prophet. On Mount Sinai the people had to send Moses up to God, and God promised, in the future, to send down a prophet to the people. Thus the difference between the Law and the Gospel is sketched in its dawning outline.

The latter part of Isaiah (chapters xl-lxvi) is related, though not in the most direct way, to the prophecy in Deuteronomy. In Isaiah, not "the prophet," but the "servant of God," is the predominant conception. Isaiah "labors in vain" (xlix, 4); a *coming* servant of God, however, will accomplish both Isaiah's task in Israel and the mission of the people of Israel to the Gentiles together and perfectly (xlix, 6); and this because he is *more* than a prophet; because he takes upon himself the penalty of our sins (liii, v)—מוּסַר שְׁלוֹמֵנוּ, "the chastisement of our peace," i. e. the punishment whose fulfilment secures our exemption. He brings a *sin-offering*, אָשָׁם (ver. 10). The prophecy does not merely indicate that the prophet's mission should entail death on the servant of God, as was the case with Paul (Col. i, 24; 2 Tim. i, 11), but that he should die as an expiatory sacrifice. And in chap. xlix, 7, he appears as "King of kings," for "kings and princes" are to bow down before him.

Thus we find in Deut. v, 18 a promise of the "prophet," and in Isaiah xlix-liii a promise of "a servant of God," of whom prophetic preaching, priestly self-offering, and crowning with kingly power are predicated. But regal dominion is not merely assigned to the future Redeemer as the predicate, or as the issue of his destiny, but, on the contrary, the very root of the Messianic prophecies lies in the promise of "one of the seed of David," whose "throne should endure forever." Redemption from future servitude was promised to the seed of Abraham (Gen. xv). Through Moses, Joshua, and David, this promise, in its outward and material sense, was gradually fulfilled. It was for this reason that David determined to build a temple to the Lord, that the "Eternal might dwell with his people." But such a union of God, "who is a spirit," with a material place and edifice, did not agree with the divine plan of salvation (compare John iv, 23, 24). Israel was to acknowledge that the temporal redemption, obtained through David, was not yet the true redemption, but a mere faint foreshadowing thereof. This was indicated by the prophecy in the seventh chapter of 2 Samuel, in which it was shown that not David himself, but David's seed after his death, was to build the Lord a house, and that the Lord would assure the throne of his kingdom forever. Even here no mention is made of an *individual*, but merely of a successor of David (chap. vii, 12-15). David at the same time understood that his sinful race was not fit to build the Lord a temple, and to rule on his eternal throne, as he said, "*Thou hast spoken also of thy servant's house for a great while to come. And is this the manner of man, O Lord God?* (2 Sam. vii, 19; comp. 1 Chron. xvii, 17). The allusion in Psa. ii, 6, 7, to this prediction is unmistakable, and Psa. cx is a poetic explanation of the passage 2 Sam. vii, 19. So Christ himself (Matt. xxii, 42) explains it.

Solomon also was aware that the prediction of Nathan would not have its final fulfilment in his material temple (1 Kings viii, 26-27). After the death of Solomon, prophecy pointed more and more directly towards a certain, particular, future descendant of David, entirely distinct from his then existing posterity (comp. Isaiah vii, 14; ix, 6, with x, 21). From the chastised house of David, the fallen trunk, a fresh branch was to spring (Isaiah xi, 1), and to rule over the nations through a reign of peace and righteousness. Yet that he was not to be an ordinary earthly king, nor a Levitical priest, but a king-priest according to the order of Melchizedek, had already been shown in Psa. cx, 4, and is more fully developed in Zech. vi, 12, 13, with distinct reference to 2 Sam. vii, Psa. cx, and Isaiah xi.

2. *The Manifestation in N. T.*—The carnal Israel awaited a worldly, earthly Messiah, who should establish a worldly kingdom. "The Prophet" (ὁ προφήτης, John vi, 14) appeared to them to be distinct from the Messiah, a sort of precursor of the latter (comp. Mark viii, 27, and John i, 21); but the faithful, enlightened by the spirit of God, thought otherwise. To them had Jesus already been announced by John the Baptist (Matt. iii, 3; comp. with xii, 18, Luke iii, 4) as the "servant of God" promised by Isaiah, in whom the prophetic, priestly, and kingly offices should be united; and the Lord himself appears in these three aspects in his life, his passion, and his death.

When he goes about teaching that the "kingdom of God" has come, and confirming his words by miracles, he does a prophet's work, and therefore the people themselves recognise him as the "prophet" (Luke vii, 16; ix, 8; John iv, 19; vii, 40). But he not only spoke as a prophet, but he *was* and *is* The Prophet, the revealer of the Father in the absolute sense. The key to this perception is given us in the passage Heb. i, 1: "*God, who at sundry times and in divers manners spake in times past unto the fathers by the prophets, hath in these last days spoken unto us by his Son,*" etc., i. e. he has manifested the fulness of his essence and of his will in a personal revelation in Him who from all eternity has been the one God and consubstantial with the Father. Therefore he is in John i, 1, called the *Word*, in whom God ἐν ἀρχῇ expressed his essence to himself (πρὸς τὸν θεόν), "by whom all things were made; without whom was not any thing made that was made; in whom was life; and the life was the light of men." Christ, as the Word become man, is then no longer a prophet *merely* in word and action, but is one in his very essence. His whole being and essence is *the* revelation of the Father (John xiv, 9).

The Epistle to the Hebrews represents Christ as a priest, nay, even as the *eternal high-priest* (Heb. vii). He is the eternal high-priest because of his having offered the only eternally valid sacrifice, the final sacrifice which renders all others henceforth superfluous—*himself*. His being in other parts of the Scriptures considered more as the *hostia* (victim) than as the priest, is merely a formal, not a material difference. Christ, on the one hand, absolutely satisfied the demands of God's law upon man (namely, to be sinless, holy, and filled with the love of God), and thus rendered the *obedientia activa* which we do not render; and, on the other hand, he assumed the penalty which the law inflicted on the sinner, "Thou shalt die the death," on himself; he who owed nothing suffering for those who are debtors. See ATONEMENT; OBEDIENCE. He thus, by substitution, took upon himself our debt and its penalty, and became an expiatory offering for us. For the fundamental principle of all offerings for sin under the old dispensation was this very substitution of one to suffer death for another; who could have been the mediating priest between Christ and the Father? He himself, the sinless, holy, the λόγος—προφήτης, who had ever been with the Father, was the priest who, in eternal high-priestly purity, gave himself as an offering. His actions and his sufferings cannot be divided. He did not make an offering of himself suddenly, *ex abrupto*, with no connection with his previous life. On the contrary, his priestly, holy life brought him to his death. Thus was his offering a priestly one.

From the death of Christ the crown of thorns is inseparable. So from the crown of thorns the crown of kingly dignity and power is inseparable. When, in the days of his humiliation, he was recognised and proclaimed as the promised "Son of David," the expected "Messiah-king," he accepted the title (Matt. ix, 27; xviii, 30; xv, 22; xii, 23; xxi, 9). But the fulfilment of his kingly mission took place in a manner entirely opposite to that which the people had expected. His kingly mission culminated at the very moment when he declared unto Pilate that he was king, and thereupon received the crown of thorns (John xviii, 37, and xix, 2, comp. with verses 12-15 and verse 21). Here the kingly office became closely connected with the priestly. As a reward for this royal abnegation he was crowned with the crown of glory (Heb. ii, 9; Phil. ii, 9, 10), became head of the Church (Ephes. i, 22), and Lord over all (Ephes. i, 21). And all who come to him by faith are given to him as his own (John xvii, 6), and he claims for them a share in his glory (verses 22, 24, 26). The Christian Church is thus fully justified in considering the prayer in John xvii as a true high-priestly prayer of the priestly king and kingly priest (Psa. cx, 4) for his people, and not merely as the intercession of *a prophet* for his disciples.

Finally, redemption by Christ is best understood under this threefold aspect of his entire work. He who in his own person was the revelation of God, the λόγος of God to man, has by word and action, and by his advent, revealed to man, in his state of error, ignorance, and sin, the law of God to man, and the mercy of God to the sinner. He who in his own person was the son of man, clothed with priestly holiness, and making of himself a pure offering unto God, has, as a member of a race which is subject to the consequences of sin, preserved his holiness under circumstances which caused the curse of human sin to fall on the head of him, the sinless, and has thereby submitted himself to the judgment of God in our stead, i. e. has given himself as an expiatory offering. He who in his own person was the kingly chief of mankind, has, in order as priest to sacrifice himself, foregone this kingly power and worn the crown of thorns, but thereby has attained the crown of glory, the dominion over the Church he has redeemed, in which and for which he now reigns over heaven and earth.

We find, in all the N. T. account, that in Christ's teachings he was not exclusively a prophet, in his passion he was not exclusively a high-priest, nor was he a king only after his resurrection. On the contrary, the three offices cannot be thus mechanically set off from each other. The Scripture certainly ascribes to Christ a *munus propheticum immediatum* (direct prophetical office) only during his visible life in the state of humiliation (viz. a *prophetia personæ*, by which his whole being was in itself a revelation of God, and a *prophetia officii*, in words and doctrines). But it teaches also that, as Prophet and Revealer, the exalted Christ continues to operate (*munus propheticum mediatum*, mediate prophetic office) by his Word, which he gave once for all, as well as by his Spirit, through which he continues to enlighten the hearts of believers. In the *munus sacerdotale* (priestly office) we distinguish (scripturally) the once-offered oblation from the yet continuing intercession; and in the former, the *obedientia* and *satisfactio activa*, the offering of a holy life, from the *obedientia* and *satisfactio passiva*, the assumption of the undeserved expiatory suffering. Finally, the Scripture teaches that Christ, in his state of humiliation, was already king (*rex fuit*, or *rex natus erat*), as in John xviii, 37. He disclaims only the "exercise" of kingly power, not the fact. We distinguish also the inherent regal glory and power of Christ from his exercise of them — the *dignitas regia* from the *officium*—and in the latter also we distinguish the *regnum gratiæ*, the governing of his people by his spirit, from the *regnum gloriæ*, the dominion over all. There is, in fact, no concrete point in the existence and activity of Christ, whether in the state of humiliation or of glorification, in which the three offices are not found constantly connected. Thus Christ remains in all respects, inseparably, the Revealer of the Father to man, the Intercessor for man with God, and the Chief and King of his people. See Knapp, *Christian Theology*, § 107; Nitzsch, *System der christlichen Lehre*, § 132; Herzog, *Real-Encyklopädie*, vi, 607; Pye Smith, *First Lines of Christian Theology*, bk. v, ch. iv, § 2.

CHRIST, PERSON OF. See CHRISTOLOGY.

CHRIST, RESURRECTION OF. See RESURRECTION.

CHRIST, SINLESSNESS OF. The Christian Church has always held that Christ was absolutely free from sin. (This article is based upon Weiss, in Herzog's *Real-Encyklopädie* [Supplement, i, 193 sq.], and Ullmann, *Sinlessness of Jesus* [Edinburgh trans. 1858].)

I. *Historical.*—1. To the minds of the apostles the perfect sinlessness of their divine Master presented itself as an unquestionable fact, and this view continued to prevail, through the period immediately succeeding, in the development of the Church's doctrine of the person and work of Christ. No explicit statement of it seems to have been made or deemed necessary, but the allusions in the early ecclesiastical writers show that the doctrine was neither rejected as unfounded nor ignored as unimportant. Tertullian inferred the sinlessness of Christ from his divinity; Origen regarded it as a peculiar property of the human soul of Christ, resulting from its union with the divine Logos, by whose virtue it was interpenetrated as red-hot iron is by fire, so that sin became for him an impossibility. Apollinaris, setting out with the belief that human nature implies limitation, mutability, conflict, sin, etc., held that no man can be a perfect man without sin; and in order to preserve, consistently with this view, the sinlessness of Christ, sacrificed his true humanity by adopting the opinion that the Logos took the place of the human soul in Christ, and imparted to him an irresistible tendency to the good. Athanasius held the doctrine of a sinless yet perfectly human nature in Christ, arguing that sin does not belong to human nature *per se*, which was originally pure and sinless;

and that Christ could, consequently, assume the nature of man without thereby being made subject to sin, and thus, by his perfect life as a man, become man's exemplar and guide in his conflict with evil and progress towards the good.

2. At the Council of Chalcedon (A.D. 451) the doctrine of Christ's true yet sinless manhood was formulized in the words, "truly man, with a rational soul and body of like essence with us as to his manhood, and in all things like us, sin excepted;" and there has not since been any change within the accepted Christological doctrine of the Church. The theologians of the Middle Ages contented themselves with the traditional doctrine, without any special efforts for its further development; though in the controversies with regard to the Immaculate Conception of the Virgin Mary, her champions sought to add weight to their arguments by claiming that the acceptance of their views would recognise also the sinlessness of Christ. A doctrinal error of a different sort hence arose, viz. the putting Christ in the background as too holy for mortals to address, and substituting the mediation of the Virgin and the priesthood.

3. One of the chief merits of the Reformers is the fact that they taught that Christ is individually and immediately apprehended by faith, and that the Holy Scriptures, not the dogmatic and liturgical traditions of the Church, are the sources whence Christian truth is derived. They accepted the doctrine of the Roman Catholic Church concerning the person and character of Christ, of which his sinlessness formed an essential part. It was received, as in the apostolical times, as an intuition not needing proof, but "above mere logical demonstration."

4. Socinianism might have been expected to open up a new and fruitful discussion of this subject, yet, apparently in antagonism with its views of the person and office of Christ, it asserted not only the sinlessness of Jesus as a fact, but also the *non posse peccare*, and indeed denied that he was really subject to temptation, because of his supernatural generation.

5. From the rise of German Rationalism, about the middle of the 18th century, this doctrine has been repeatedly impugned by writers of that school. Some (as Reimarus, Bahrdt, Venturini) even go so far as to characterize Christ as an impostor. So also, among English Rationalists, Newman, *Phases of Faith*, finds imperfections in the moral character of Christ. Strauss denied Christ's sinlessness on the ground principally of its *à priori* impossibility, or of the necessary connection of sin with finite existence. Pécaut, a recent French writer, adduces as proofs of Christ's moral imperfections (*Le Christ et la conscience*, Paris, 1859), his treatment of his mother (Luke ii, 41-52; John ii, 4); the expulsion of the profaners of the Temple (Matt. xxi, 12 17, et al.); the cursing of the fig-tree (Matt. xxi, 17-22; Mark xi, 12-26); the destruction of the swine (Matt. viii, 28-34, et al.); his severe reproofs of the Pharisees (Matt. v, 20, et al.); and also his supposed abnegation of the title good (Matt. xix, 17, et al.); but, in strange contradiction of his own views, he uses such language as this: "To what a height does the character of Jesus Christ rise above the most sublime and yet ever imperfect types of antiquity. . . . . Jesus Christ has been humble and patient; holy, holy, holy before God; terrible to devils; without any sin. . . . . His moral life is wholly penetrated by God" (Schaff, *Person of Christ, the Miracle of History*, p. 208, 209, 346-348). Other Rationalistic writers (as Kant, Jacobi, and others) have labored to place in clear light the unparalleled moral excellence of Christ, as the abiding type and proof of the divinity of his teachings. The denial of this doctrine, whether open or covert, mostly arises from shallow moral and religious conceptions, or from lowering the fundamental moral nature of sin, justification, etc., into mere relations.

5. On the other hand, Ullmann has laid the Church under lasting obligations by his monograph, *Die Sündlosigkeit Jesu* (last ed. 1863, Gotha), transl. by Brown, *The Sinlessness of Jesus* (Edinb. 1858, 12mo). Dorner, Schaff, and Weiss have still further contributed to its elucidation (see references at end of this article). The subject has been more or less fully treated: in relation to Rationalism by Hase (*Streitschriften*, iii, 1837; *Leben Jesu*, and *Dogmatik*); Schweizer, in *Studien und Kritiken*, 1834, iii and iv; 1837, iii); in connection with historico-critical examination of the person of Christ, by Keim (*Der geschichtliche Christus*, p. 43, 106-116); from the stand-point of the doctrine of Christian morals and Church history, by De Wette (*Christliche Sittenlehre*, vol. i, § 50-53), Weisse (*Evangelische Geschichte*), Ewald (*Geschichte Christus*, p. 184 f.), Schenkel (*Dogmatik*, and very waveringly in his *Characterbild Jesu*, p. 35 and 39), Weizsäcker (*Evangelische Geschichte*, p. 437); from the stand-point of Church confessions, by Thomasius, Hofman, Philippi, and Ebrard; from a purely biblical point of view, by Schmid, Beck, Gess, Garbett (*Christ as Prophet, Priest, and King* [Lond. 1842, 2 vols. 8vo]), Stevenson (*On the Offices of Christ* [Lond. 1834, 8vo]), and Riggenbach; from that of the mediation theology of Schleiermacher, in treatises on the life of Christ, by Neander and others, and in works on dogmatics and the history of dogmas by Rothe, Liebner, Dorner, Nitzsch, J. Müller, Lange, Martensen, Schöberlein, and others.

II. *Statement of the Doctrine.*—The term sinlessness, ἀναμαρτησία, involves a twofold idea, *first*, a negative one, viz., "the absence of antagonism to the moral law and to the divine will, of which that law is the expression; and this not only in relation to separate acts of will and outward actions, but also in relation to the tendency of the whole moral nature, and to its most deep-seated disposition" (Ullmann, *Sinlessness of Jesus*, p. 41), which may be expressed by the term innocence, goodness of nature, etc.; and, *secondly*, a positive one, viz., the expression in outward form of this inward harmony by a life of complete and perfectly holy activity, working out in full obedience to the will of God the duties of each hour, while keeping both spirit and life unstained by evil. This we term absolute holiness.

We hold, then, that our Saviour, in his humanity, was, in both these senses, sinless; at first relatively, just as Adam before his fall, with a perfectly human nature to which the liability to temptation must be conceded; otherwise no true manhood could have existed, no true example for our race could have been presented in his life. The doctrine of Edward Irving, however, that Christ partook of the sinful nature of Adam after the fall, cannot be allowed. It is not necessary at all to the true conception of his perfect example as a man for sinful men; which, on the contrary, implies that the second Adam should not be placed in his human nature below the original condition of the first, and thus burdened with the sin and weakness of sullied manhood. This view would demand of his divine nature so miraculous a support of the human as to destroy the force of his example. On the contrary, Christ, in his humanity, clothed with man's original purity of nature, lived, suffered, "was tempted in all points like as we are, yet without sin," and so could "justify the ways of God to man," and show that man was made "sufficient to have stood, though free to fall." His relative sinlessness became absolute holiness in the development of his moral life, in his free, yet perfect, active, and passive obedience to the will of his Father. To use the terms of the schoolmen, the *posse non peccare* or *impeccabilitas minor*, in him, grew, through vanquished opposition and the achieved results of perfect obedience in love, into the *non posse peccare* or *impeccabilitas major*, "into the impossibility of sinning, which cannot sin because it will not" (Schaff).

III. *Proofs of the Doctrine.*—1. *À priori.* We may

argue, *à priori*, that as Christ's acknowledged mission on earth was the moral elevation and the salvation of our race from sin, it was fitting, nay, necessary, in order to accomplish these objects, that he should be superior to us in these respects. To raise man from his ruin, the Prince of his salvation must be one "who is holy, harmless, undefiled, separate from sinners, and made higher than the heavens," while his heart, "touched by the feeling of our infirmities," would yearn for the renewal of humanity. How fully Christ's perfect life meets this ideal every Christian feels; and with what deep and grateful confidence does he, when oppressed by the temptations and conflicts of his probation, turn to him who "needeth not daily to offer up sacrifices first for his own sins," and "then for the sins of the people," as did other priests.

2. *A posteriori*, we find that Christianity has exerted and does exert a power for moral good upon the world. Wherever it has taken hold of the hearts and minds of men in its purifying power, we see that they have attained a higher moral and religious state, a condition of life far beyond the pagan or even the Jewish types. How shall we account for this, apart from the life of the founder of Christianity, imparting its renewing power to the hearts of his followers? Mere theories of moral conduct without example are not capable of producing such results. Streams do not rise above the level of their sources; no more do followers of religious systems rise above the laws and principles of religious life prescribed in the conduct as well as teachings of their founders. We may justly claim that the higher moral condition of Christian nations is due mainly to the influence proceeding from the spotless life of Christ.

Many of the early as well as recent opponents of Christianity as a system bear testimony to the surpassing moral greatness of its founder. Pilate declared that he found no fault in him touching the things whereof the Jews accused him, and thrice asked the question, "What evil hath he done?" (Luke xxiii, 22). The Roman centurion, who witnessed his sufferings on the cross, said, "Certainly this was a righteous man." Josephus, if the passage be authentic (*Antiq.* bk. xviii, ch. iii, § iii), says of him that he "was a teacher of such men as receive the truth with pleasure." Porphyry (A.D. 304) says, "But himself is pious, and gone to heaven as other pious men do. Him therefore thou shalt not blaspheme." The celebrated tribute of Rousseau to the Gospel and its author need not be quoted here. A fuller view of the testimony of unbelievers to the person and character of Christ is given in the work of Schaff referred to above.

3. *Biblical View of the Doctrine.*—The doctrine of the Old-Testament writers in regard to the original purity and grandeur of man's moral and intellectual nature is shown conclusively by the language employed in describing his creation and endowments: that he was made in the image of God; that the dominion over the earth and lower animals was given to him, etc. When man by disobedience fell, the promise was given of one to come, who should repair, by his obedience and perfectness, the ruin made, and through whom man might be reconciled to God. The coming of such a Redeemer was prefigured in the worship and sacrifices of patriarchal times, in the separation and Temple services of the Jewish nation, and in those holy men who from time to time appeared as lights amidst the darkness of the world. Throughout all these preparatory manifestations the idea of the sinlessness of the coming Messiah appears. In the spotless victims, in the purifying services, in the strains of the poets of Israel, and in the magnificent imagery and language of the prophets are found, more or less complete, the elements whose union culminates in the idea of the sinless Son of God and Redeemer of men (Isa. ix, xl, xlii; Jer. xxxi, 31 sq.; Ezek. xxxvi, 8 sq., etc.).

The New-Testament writings bear unequivocal and harmonious testimony to the truth of this doctrine. Christ is described in them as the Holy One, the Just and Righteous (Acts iii, 14; xxii, 14; 1 Pet. iii, 18; 1 John ii, 1, 29; iii, 7); as tempted "like as we are, yet without sin" (Heb. iv, 15); as our example "who did no sin, neither was guile found in his mouth" (1 Pet. xi, 21, 22); as "a lamb without blemish and without spot" (1 Pet. i, 19); as "an high-priest who is holy, harmless, undefiled" . . . "who needeth not daily to offer sacrifices" "for his own sins," as did other priests (Heb. vii, 26, 27); as the Mediator "who knew no sin" (2 Cor. v, 21). These writings, indeed, are full of proofs that his apostles and followers recognised in Christ, because of his holiness, as well as his wonder-working power, the Messiah foretold by prophecy, coming in the fulness of the divine spirit to be the founder, lawgiver, and king of the kingdom of God on earth.

Christ no less unequivocally claims for himself such perfection of nature and life, in the assumption of oneness with God (John x, 30), in the fact that he nowhere prays for forgiveness of his own sins, or recognises that sin exists in himself, and, specifically, in the expression "which of you convinceth me of sin" (John viii, 46).

IV. *Objections.*—But brief notice can be taken here of the objections to this doctrine, which are grouped by Ullmann (p. 143) under two classes, viz. (1) those resting "on a denial of the actual sinlessness of Jesus," and (2) those resting "on a denial of the possibility of sinlessness at all in the sphere of human life; and by Weiss (*l. c.*) under three heads, viz. (1) that unique individuality (*Einzigkeit des Individuums*) contradicts both the nature of the individual and the idea of the human race and its development; (2) that sinlessness is irreconcilable with the nature of man; and (3) that the same is irreconcilable with the actual sinful condition of mankind. The former classification seems the simpler one, and we prefer to follow it. In regard to the objections of Pécaut, which belong to the first class, it may suffice to say that all of them except the last are founded on incorrect conceptions of the spirit and purpose of Christ in the several actions noticed, and of the duty which his office as Messiah imposed on him. Viewed in the proper light, no disobedience of or disrespect to his parents, no outburst of angry passion, no wanton destruction of the property and disregard of the rights or feelings of others can be found. Attention to the scope and import of the question of Christ to the young man, "*Why* callest thou me Good?" (τί με λέγεις ἀγαθόν), will show that he does not reject the title good, but seeks to lead the questioner to its true application; the emphasis, as the order of the words shows, rests not on the expression good, but the *why*. "God only is good; but he that hath seen me hath seen the Father."

In reply to the objection that the idea of sinlessness is inconsistent with the growth in wisdom and the development of his moral nature which the Gospel portraiture of Christ assigns to him, we may say that growth and development do not necessarily or commonly imply imperfection. A human being, possessing in infancy and boyhood the maturity and complete development of manhood and age, would be a monstrosity. We expect from infancy, youth, manhood, and age what befits each period, and regard as irregular and imperfect what is contrary thereto. Again, finite nature is not necessarily imperfect. The perfect action of such a nature in conformity with the laws and limitations of its being cannot be sinful, or evidence of imperfection as finite existence, but just the contrary.

The notion that individual pre-eminence is inconsistent with the nature of the individual or the nature of the race is not warranted by the actual past and present history of man. We see that through all periods of time individual men stand out prominently en-

dowed above their fellows. Is it then irrational to suppose that in view of the great work which Christ came to do, he would be superior in purity to those whom he sought to elevate?

In all the relations of his life on earth, Jesus always did what was due to them. He did not seek, in virtue of the connection of his humanity in one personality with his divinity, to exempt his human nature from the influences which legitimately operate on it; but meeting fully life's duties as they came to him, he asserted in himself the triumph of one unfallen nature over the power of evil in the world. Thus his perfect holiness of life stands out clearly in the moral heavens, the unchanging, ever-brilliant star of hope whose light no cloud can ever dim, a safe and surely-guiding beacon to those who traverse the sea of life in search for the Promised Land.

Christ, Order of, Knights of the. After the abolition of the order of Knights Templars, in 1312, king Dionysius of Portugal left to such as resided in his dominions a large share of their estates, and in 1317 reconstituted them into a new spiritual order of "Knights of Christ." It was sanctioned by Pope John XXII on condition of obedience to the papal see. He also instituted a branch of the order in the Papal States. The knights were secularized in Portugal in 1789, and divided into three classes: "great crosses," of which there were 6; "commanders," numbering 450; and knights, the number of which was unlimited. The distinctive marks of the order are a golden cross, carved and ornamented with red enamel, the ends terminating in two points; a scarlet band, which, by the papal knights, is carried around the neck. The Portugal grand crosses wear a particular dress on great occasions, with a golden chain wound three times around the neck, but which is usually thrown across the shoulder from right to left; a band; and on the breast a star, containing in its centre the cross of the order. The commanders and knights wear a similar but smaller cross, the former in a star and on the breast, with the band; the latter pending from the button-hole, and without the star. As a religious order, they have been suppressed, with all such orders, in Portugal.—Pierer, *Universal-Lexikon*, s. v.; Chambers, *Encyclopædia*, s. v.

Christendom, the kingdom of Christ in its diffusion among men on the earth. In the way of territorial extension, Christendom has been enlarging almost without interruption from the beginning. In the second and third centuries congregations were established in all parts of the Roman empire, and beyond the limits of the empire it collected churches in Parthia, Persia, and India, and extended to several barbarous nations whose languages had never been reduced to writing. The conversion of Constantine established the first Christian state. By A.D. 423 the whole eastern portion of the Roman empire was free from paganism, which lingered a little longer in the western, without, however, disputing any longer the ascendency. In the fifth and sixth centuries Christianity conquered in great part Northern Africa, Spain, Gaul, Scotland, England, and a number of the German tribes. The erection of the empire of Charlemagne paved the way for the conversion of Northern Europe. The Saxons consented to accept Christianity in 803, and Scandinavia in the tenth and eleventh centuries. Thence it spread soon to Iceland and Greenland. The conversion of the Sclavonians of Eastern Europe commenced in the ninth century, and was nearly completed in the twefth. In the tenth and eleventh centuries the dissemination of Christianity in Hungary, Transylvania, and Russia commenced. At the same time, its territory was lessened in Western Asia, Northern Africa, and a part of Southern Europe, by the progress of Mohammedanism. In the period from the eleventh to the sixteenth century the conversion of Northern Europe, and in particular of Pomerania, Esthonia, and Livonia, was completed. A part of Eastern Europe, however, was gained by the Mohammedans, but, on the other hand, a large new territory was secured to Christianity in Western Africa, East India, and America, in connection with the discoveries of the Portuguese and Spaniards. After the sixteenth century the newly-discovered continent of America began to be filled up by a Christian population, thus making the second Christian continent. The Roman Church for some time seemed successful in Christianizing Eastern Asia, especially China and Japan, but its progress was stopped by persecution. In the eighteenth century a new Christian state sprang up in South Africa, in connection with the political rule of the Dutch and the English. The nineteenth century opened with brighter prospects than any preceding. In South Africa the territory of Christian nations extended; in Western Africa, Liberia was founded as a Christian republic; in Northern Africa, Algeria is filling up with a Christian population; and in Eastern Africa, Abyssinia, which, in spite of its isolation, has preserved since the fourth century a kind of Christianity, promises to re-enter the union of the Christian states. Australia has already become the third Christian division of the world, with only a few weak remnants of paganism. In Asia the Karens of Farther India have been brought under the influence of Christianity, while in the north nearly one third of the continent forms part of a Christian state. Thus the territory of Christianity at present comprises three out of the five large divisions of the world, with a considerable part of the two others. Moreover, large territories in Asia and Africa, though not yet Christianized, are under the dominion of Christian nations, and hardly a single country is at present left into which Christian missionaries have not forced their way. Thus the time seems near when the extent of Christendom will coincide with the extent of the earth. The following estimate of the Christian population of the world is based upon the latest (1889) works on political and ecclesiastical statistics:

	Total Population.	Roman Catholics.	Protestant.	Christian.
America....	93,108,000	51,500,000	38,000,000	89,500,000
Europe.....	355,000,000	142,000,000	65,000,000	277,000,000
Asia.......	783,650,000	5,000,000	725,000	15,725,000
Africa	185,790,000	1,500,000	725,000	6,000,000
Australia, Polynesia.	30,000,000	1,000,000	1,550,000	5,000,000
	1,447,548,000	201,000,000	106,000,000	393,225,000

See also Smith, *Tables of Church History*. Compare Christianity.

Christ-emporia (χριστεμπορεία), *selling of Christ*. See Simony.

Christening, a name given to the act of baptism, (1) as if thereby the child were *made a Christian*; or

(2), as baptism fixes the *Christian* or *Christened* name of the child.

Christian (Χριστιανός), the name given to those who believe Jesus to be the Messiah (Acts xi, 26). Commentators and critics are not agreed whether the followers of Christ gave this appellation to *themselves*, or whether it was bestowed on them by *others*. Neither view appears to be wholly true or wholly false. Such titles do not usually originate in any arbitrary way, nor do they spring from a single party, but rather arise from a conventional assent to their appropriateness. It was, indeed, the interest of the Christians to have some name which might not, like the Jewish ones (Nazarenes or Galilæans), imply reproach. And though the terms *brethren*, *the faithful*, *elect*, *saints*, *believers*, *disciples*, or *the Church*, might suffice among themselves, yet none of them were sufficiently definite for an appellation, and might perhaps be thought to savor of vanity. They would therefore be not disinclined to adopt one, especially for exoteric use. Yet the necessity was not so great as to stimulate them to do this *very soon;* whereas the people at large, in having to speak of this new sect, would soon need some distinctive appellation; and what so distinctive as one formed from the name of its founder? It is therefore most likely to have been suggested by the Gentile inhabitants of Antioch, and to have early come into general use by a sort of common consent. (See Conybeare and Howson's *Life and Epistles of St. Paul*, i, 119.)

There is no reason to think with some that the name "Christians" was given in absolute *derision*. When used by Agrippa (Acts xxvi, 28), there is no proof that it was a term of reproach; had he intended derision, he might have employed the term Nazarene, which was in frequent use among the Jews, and has continued current in the East, wherever the Arabic language is spoken, to the present day. The early adoption of it by the Christians themselves, and the manner in which they employ it, are sufficient to dispel all idea of this nature (1 Pet. iv, 16). The only reproach connected with the name would be the inevitable one arising from the profession of faith implied in it. Neither is the view of others more probable, that it was a name imposed by divine appointment. The term χρηματίζω (translated "called" in the passage first quoted), usually relied upon to sustain this view, has other significations than that of an oracular response, and is fairly capable of the meaning assigned to it in our version.

"This world-famous name (William of Tyre, iv, 9) occurs but three times in the New Testament (Acts xi, 26; xxvi, 28; 1 Pet. iv, 16). In the first of these passages we are informed that it arose in the city of Antioch, during the year spent there in preaching by Paul and Barnabas, A.D. 34. Both Suidas (ii, 3930, a, ed. Gaisford) and Malalas (*Chronograph.* x) say that the name was first used in the episcopate of Evodius at Antioch, who is said to have been appointed by the apostle Peter as his successor (Jerome, *Chronic.* p. 429). That Evodius actually invented the name (Malalas, l. c.) is an assertion which may be disregarded as safely as the mediæval fiction that it was adopted at a council held for the purpose.

"The name itself was only contemptuous in the mouths of those who regarded with contempt him from whom it was derived; and as it was a universal practice to name political, religious, or philosophical societies from the name of their founders (as Pythagoreans, Epicureans, Apollonii, Cæsariani, Vitelliani, etc.), it was advantageous rather than otherwise for the Christians to adopt a title which was not *necessarily* offensive, and which bore witness to their love and worship of their master; a name intrinsically degrading—such as the witty Antiochenes, notorious in the ancient world for their propensity to bestow nicknames, might easily have discovered (Philost. *Vit. Apol.* iii, 16; Zosim. iii, 11; Ammon. Marcell. xxii; Procop. *Bell. Pers.* ii, 8)—would certainly have retarded the progress of the new religion; and as we see, even in modern times, that it is the tendency of rival sects to brand each other with *derisive* epithets, it is natural to suppose that the name 'Christians' resulted rather from philosophical indifference than from theological hatred. The Latinized form of the word—Greek in form, Latin in termination—is not indeed a conclusive proof that it emanated from the Romans, because such terminations had already been familiarized throughout the East by the Roman dominion; but it is precisely the kind of name which would have been bestowed by the haughty and disdainful spirit of victorious Rome, which is so often marked in early Christian history (John xviii, 31; Acts xxii, 24; xxv, 19; xviii, 14). That the disciples should have been called from 'Christus,' a word implying the *office*, and not from 'Jesus,' the *name* of our blessed Lord, leads us to infer that the former word was most frequently on their lips, 'which harmonizes with the most important fact, that in the epistles he is usually called, not 'Jesus,' but 'Christ' (Lactant. *Div. Instit.* iv, 7). In later times, when the features of the 'exitiabilis superstitio' were better known, because of its ever-widening progress (Tacit. *Ann.* xv, 44), this indifferentism was superseded by a hatred against *the name* as intense as the Christian love for it, and for this reason the emperor Julian 'countenanced, and perhaps enjoined, the use of the less honorable appellation of Galilæans' (Gibbon, v, 312, ed. Milman; Greg. Nazarene, *Orat.* iii, 81). Yet, as Tertullian, in an interesting passage, points out, the *name* so detested was harmless in every sense, for it merely called them by the office of their master, and that office merely implied one set apart by solemn unction (*Apolog.* 3).

"It appears that, by a widely prevalent error, the Christians were generally called *Chrestiani* (Χρηστιανοί, Sueton. *Nero*, 16; Claud. 25) and their founder *Chrestus* (q. d. χρηστός, *excellent*), a mistake which is very easily accounted for (Lactant. *Instit. Div.* iv, 7), and one which the Christians were the less inclined to regret, because it implied their true and ideal character (Clem. Alex. *Strom.* II, iv, 18; Tert. *Apol.* c. 3). See CHRESTIANS. The explanation of the name Christian, as referring to the 'unction from the Holy One,' although supported by the authority of Theophilus Antiochenus (A.D. 170), 'who lived not long after the death of John' (*ad Autolyc.* i, 12), can only be regarded as an adaptation or an after-thought (see Jer. Taylor, *Disc. of Confirm.* § 3).

"The adoption of the name marks a very important epoch in the history of the Church; the period when it had emerged, even in the Gentile observation, from its Jewish environment, and had enrolled followers who continued *Gentiles* in every respect, and who differed widely from the Jewish proselytes. 'It expressed the memorable fact that a community consisting primarily of Jews, and directed exclusively by them, could not be denoted by that name, or by any name among them. To the disciples it signified that they were witnesses for a king, and a king whom all nations would be brought in due time to acknowledge' (Maurice, *Eccl. Hist.* p. 79). See Buddeus, *De origine, dignitate et usu nominis Christiani* (Jen. 1711; also his *Miscell. Sacr.* i, 280 sq.); Wetstenii *Nov. Test.* in Acts xi; Zeller, *Bibl. Wörterb.* s. v. Christen, etc." (Kitto, s. v.).

To be denominated *Christian* was, in the estimation of the confessors and martyrs, their highest honor. This is illustrated in the narrative which Eusebius has copied from an ancient record, of one Sanctus of Vienna, who endured all the inhuman tortures which art could inflict. His tormentors hoped, by the continuance and severity of his pains, to extort from him some acknowledgment which might implicate him; but he withstood them with unflinching fortitude, neither dis-

closing to them his name, nor his native land, nor his condition in life, whether freeman or slave. To all their interrogatories he only replied, *Christianus sum;* affirming that his name, his country, and his kindred all were included in this. Of the same import was the deportment of the martyr Lucian, as related by Chrysostom. To every question he replied, "I am a Christian." "Of what country are you?" "I am a Christian." "What is your occupation?" "I am a Christian." "Who are your parents?" "I am a Christian."—Bingham, *Orig. Eccles.* bk. i, ch. i.

Christian, first bishop of Prussia, was born at Freienwalde, in Pomerania, in the latter part of the 12th century. He became a monk of the Cistercian order, in which he acquired great eminence for his piety and learning. In 1210 he went as missionary to Prussia, which country had before resisted all attempts at Christianization. He proved successful in his undertaking, and was made bishop of Prussia in 1214. In order to give a permanent protection to the Church, he founded, in 1215, the order of the Knights of Christ. He died in 1241.—Neander, *Ch. History* (Torrey), iv, 43; M'Lear, *Missions in Middle Ages*, p. 341.

Christianity, (1) in the *objective sense*, is the religion of Christians, including doctrines, morals, and institutions. Of Christianity, the Scriptures of the Old and New Testaments are the sole foundation and source, as containing "all things necessary to salvation; so that whatever is not read therein, nor may be proved thereby, is not to be required of any man that it should be believed as an article of the faith, or be thought requisite or necessary to salvation" (*art. vi of the Church of England*). (2) In the *subjective* sense, it denotes the Christian faith and life of the individual, in which is manifested the life of Christ, the God-man, imparted through the Holy Spirit. The statement of Christian doctrines, in scientific form, is the object of theology (q. v.). The special doctrines are treated under their proper heads in this dictionary. The proof of the divine origin and authority of Christianity is the province of *Apologetics*, or the *Evidences* of Christianity. See APOLOGETICS; EVIDENCES. The statement of the practical principles of Christianity belongs to *Ethics* or *Morals* (q. v.). The institutions of Christianity are treated under the heads CHURCH, BAPTISM, LORD'S SUPPER, MINISTRY, SACRAMENTS. The aggressive movements of Christianity in heathen countries are treated under MISSIONS; its present territorial extent under CHRISTENDOM.

The *history of Christianity* is the history of the reception of the teachings, ordinances, and institutions of Christ among men, and embraces what is more commonly, but less properly, called the history of the Christian Church. We give a brief survey of the history of Christianity, and divide it for this purpose into five periods.

I. *From the Foundation of Christianity until its Establishment as a State Religion in the Fourth Century.*—When Christ appeared upon earth, both paganism and Judaism had lost their influence over the mass of the people. Presentiments of the proclamation of a purer religion were widely disseminated. Among the Jews, the Messianic hopes which had been awakened by the prophets had gained new strength from the political oppression under which the nation so long suffered. Christ confined his preaching to the Jews, and we read in the Gospels that large crowds of the people were always eager to hear him, though the most influential sects of those times, the Pharisees and Sadducees, opposed him. After the ascension of Christ, the disciples were prepared, by the outpouring of the Holy Ghost on the day of Pentecost, to carry on the dissemination of Christianity. The first congregation was established at Jerusalem, the second at Antioch. In Judea, and especially in Jerusalem, the apostles and other Christians were cruelly persecuted, and Stephen was stoned and became the first martyr. But one of the leading instigators of the persecution, Saul of Tarsus, was soon converted in a miraculous manner, and established new churches, not only among the Jews in a great many provinces of the Roman empire, but also among the pagans. At Antioch, the followers of Jesus, who during his lifetime had had no distinguishing name, received the name *Christians*. See CHRISTIAN. Paul warned the congregation in Corinth not to assume party names, as parties of Apollos, of Paul, of Cephas, or of Christ; but the term is applied, not to distinguish a *party* among Christians, but to distinguish Christians from pagans and Jews. By the Jews, the Christians were for a long time called Galilæans or Nazarenes. The Christians of Jewish extraction separated only by degrees from outward connection with the synagogues, and the fundamental elements of a church constitution were not developed before the second half of the first century. The details of this development have been of late the subject of most minute and ingenious investigations, but the darkness in which the subject, on account of the meagreness of the contemporaneous literature, has been involved, is far from being removed. Comp. APOSTOLIC AGE; CHURCH. The apostles remained the centre for the Christian churches, and devoted themselves, in connection with so-called evangelists, to the spreading of the Gospel, while under them presbyters (or bishops) were the teachers and superintendents of particular congregations. Deacons, and sometimes also deaconesses, were charged with the care of the poor and other social wants of the community. The spread of Christianity gave rise to repeated persecutions by the Roman emperors, some of which were local, while others were more or less general. Usually ten persecutions are counted, viz. first, under Nero, 64-68, by whose order several Christians of Rome were put to death, Nero, as is reported, charging them with having caused the great conflagration. In the second persecution (93-95), Domitian, misinterpreting the royal office of Christ, ordered the surviving relations of Christ, whom he looked upon as rivals, to be put to death. The third persecution was under Trajan, in Bithynia, in 116. Many were punished as apostates from the state religion, although a report from the younger Pliny bore a good testimony to their character. The fourth persecution, in 118, under Hadrian, did not proceed from the government, but the Christians greatly suffered in many places, especially in Asia Minor, from riots of the mob. The fifth persecution, under Marcus Aurelius, in 177, affected especially the congregations of Lyons and Vienne, in Gaul, and the churches of Asia Minor. Among the martyrs was Polycarp, bishop of Smyrna. From the sixth persecution, under Septimius Severus, in 202, especially the Christians of Egypt and Asia Minor had to suffer. The seventh persecution, under Maximin, in 235, was properly directed only against the bishops and leaders of the congregations, but the Christians suffered greatly during his reign from the mob, especially in Cappadocia, because earthquakes and other calamities of that kind were laid to their charge. Very severe and extensive was the ninth persecution, under the emperor Decius (249-251), who was alarmed at the rapid increase of the Christian population. In consequence of the severity of the persecution, many Christians apostatized and many congregations were destroyed. The ninth persecution, under Valerian, in 257 and 258, was also very cruel. He ordered bishops to be exiled, prohibited the assemblies of the Christians, and declared state officers who were Christians to have forfeited their offices, and, later, also their lives. The tenth and last persecution, under Diocletian, in 303 and 304, was the severest of all. The edict of 303 ordered all the churches of the Christians to be burned, the state officers who were Christians to be declared infamous, and all

free Christians to be made slaves. According to an edict of 304, all Christians were to be compelled by tortures to sacrifice to the pagan gods. With the abdication of Diocletian in 305, the era of persecutions ended (see Benkendorf, *Historie der zehn Hauptverfolgungen*, Leips. 1700, 8vo). Those Christians who, in some way or other, succumbed in the persecution, were called *Lapsi* (q. v.), of whom there were several classes, as *Libellatici*, *Sacrificati*, *Thurificati*, and *Traditores*; those who remained steadfast were called *Confessores*. See CONFESSORS. Christianity was, however, not persecuted by all the Roman emperors, but was tolerated by some, and even favored by a few, e. g. Caracalla, Alexander Severus, and Philippus. In 306 Constantine established toleration of Christianity in the provinces of Britain, Gaul, and Spain. Conversion to Christianity was expressly permitted by another edict of Constantine in 313, and restoration of the Christian churches ordered. Even an indemnification from the public treasury was promised. Constantine, by a decree of 324, established full religious liberty for the Christian religion in the whole Roman empire, and restored to liberty those who, under Diocletian, had been enslaved. Toward the end of his reign he even issued edicts against paganism. He was baptized himself shortly before his death. See CONSTANTINE.

Christianity during the first period of its history was not only exposed to the persecution of the emperors, but also to the *literary* attacks of many pagan scholars, as Lucian, Celsus, Porphyrius, Hierocles, and others, which called forth among the Christians a number of apologetic writers. See APOLOGISTS. Dissensions and divisions were very numerous among the Christians from the earliest period of the Church. A strict line of demarcation established itself between the common faith (orthodoxy) and the secessions (heresy). As early as the apostolic age we find the Gnostics, Simonians, Nicolaites, Cerinthians; in the second century the Basilidians, Carpocratians, Valentinians, Nazareans, Ophites, Patripassians, Artemonites, Montanists, Manicheans, and others; in the third century the Monarchians, Samosatensians, Noetians, Sabellians, Novatians, etc. Most of these controversies concerned the person of Christ; some related to the creation of the world and of the spirits; others to the Lord's Supper; only a few had regard to the discipline of the Church and some other points.

The *diocesan* constitution gradually developed itself, the congregations in villages and smaller places seeking a connection with the bishops of the town. Of a regular *metropolitan* constitution, only the first beginning is found during this period, but the bishops of Rome, Alexandria, and Antioch were already regarded as the heads of very extensive ecclesiastical districts. Christian ministers assumed a distinguishing name (*clerici*), and a peculiar dress for divine service, and they were divided into many classes (see Bingham, *Origines Ecclesiæ*; Planck, *Gesch. der christlich-kirchlichen Gesellschaftsverfassung*, Hanov. 1803). Towards the end of this period, resort began to be had to synods and councils to settle ecclesiastical disputes. See COUNCILS. The form of public worship was gradually fixed in imitation of that of the Jewish synagogue, and consisted of prayer, singing, reading, and interpreting the Scriptures. Baptism was performed in the name of Jesus; the agapæ (q. v.) and the Lord's Supper (q. v.) were celebrated after divine service. The sources of doctrine were the epistles of the apostles and the records of the life of Jesus (the Gospels). Some of the gospels, which are now regarded as apocryphal, were in use in some of the churches, and some importance was also attributed to ecclesiastical tradition. Church discipline was very strict, and all grave offences were punished with exclusion (excommunication). Asceticism and monasticism found their first adherents in this period in Anthony, Paul of Thebes, and others.

II. *From the Death of Constantine the Great to Charlemagne* (A.D. 337 to 800).—The last attempt to suppress Christianity by force, or at least to repress its further advancement, was made by Julian the Apostate (q. v.), but it failed utterly. His successors remained Christians, and Christianity became the religion of court and state. The Church and the state began to exert a powerful and reciprocal influence upon each other. See CHURCH AND STATE. The metropolitan constitution was organized throughout the whole Church, and in connection with it the patriarchal constitution, represented by the four patriarchs of Rome, Constantinople, Alexandria, and Antioch. The bishops of Rome began to claim jurisdiction over the whole Church. Councils and synods became more frequent. In addition to the provincial councils of the first period, œcumenical councils (q. v.) (of which one had been held during the first period, viz. that of Nice, A.D. 325), to which all bishops of the Christian Church were invited, were held at Constantinople (381, 553), at Ephesus (431, 449), at Chalcedon (451). See COUNCILS. They were occasioned by doctrinal controversies, the number of which greatly increased during this period. The doctrine of the Church on the person of Christ was attacked by the Arians, Eunomians, Aëtians, Anomœans, Adoptians, Nestorians, Eutychians, Monophysites, Jacobites, Monothelites, and other sects; that of the Trinity by the Tritheites; that of the nature of God by the Seleucians and the Anthropomorphites. The Church also rejected the views of the Antidikomarians, Bonosians, Jovinians, Collyridians, on the Virgin Mary; those of the Euchites and Priscillianists (modified Gnostico-Manichæan doctrines); those of the Meletians and Donatists on the constitution of the Church. *Monasticism* was rapidly developed after the fourth century; and as the lower secular clergy were generally ignorant, the missionary work and the culture of letters were almost entirely left to the monks. The ignorance of clergy and people facilitated the introduction of many innovations and corruptions in the doctrine of the Church, such as the veneration of saints and relics. Pomp and magnificence were introduced into the celebration of divine worship, and the arts began to be used to serve ecclesiastical ends. The Latin language was retained in worship, though it was no longer understood by all the people. The changes in the ancient discipline of the Church (for which in many cases even payments of money were substituted) exerted a most disastrous influence on the Christian life. In the literature of this period, the names of Chrysostom, Augustine, Cyril, Theodoret, Isidor of Pelusium, Isidor of Hispalis (Seville), and Johannes Damascenus, stand forth most conspicuous.

III. *From Charlemagne to Gregory VII* (A.D. 800 to 1073).—Among the Germanic tribes, the Franks were attached most firmly to Christianity. Charlemagne in his conquests always sought to make Christianity the established religion, and his wars against the Saxons and Sclavonians were wars for the extension of Christianity. The degraded condition of the clergy and the Church in his states induced Charlemagne to attempt various reformatory measures in behalf of the Church. By the establishment of convents and cathedral schools, he sought to promote the education of the clergy. By his order the corrupt translation of the Bible was corrected, the congregational singing improved, more prominence given to the sermon in divine worship, and annual visitations of the diocese by the bishops introduced. See CHARLEMAGNE. While Christianity rapidly advanced in Northern Europe, the body of the Church was divided, in consequence of the rivalry of the bishops of Rome and Constantinople, into the Western or Latin, and the Eastern or Greek Church. The two churches excommunicated each other, and a permanent union has never since been effected. The Greek Church, first enslaved by the emperors of Constantinople, and afterwards trodden down by the Turks,

became petrified and stationary. In the Roman Church the rights of metropolitans and bishops were more and more curtailed, and those of the pope enlarged, especially by the pseudo-Isidorian Decretals. See DECRETALS, FALSE. Spain, England, and the other European countries gradually surrendered their ecclesiastical independence, and the pope became all-powerful in the exercise of jurisdiction as well as in doctrinal decisions. Bishops and abbots became the possessors of large property; the pope entered the ranks of secular princes, and strove to subject even the secular governments to his influence and rule. Most of the literary institutions founded by Charlemagne were suspended within half a century after his death, and the general ignorance of the clergy became so great that the bishops had to order that "every clergyman must know at least the Apostles' Creed." The theology of this period spoke little of Christ, his work and his merits; the belief in the intercession of the saints, in the efficacy of their relics, and similar points, became prominent in the mind of the Church. The pope reserved to himself the examination of the genuineness of the relics, and the beatification and canonization of holy men. In the eleventh century the rosary (q. v.) came up in England and Holland, and new festivals were introduced, especially festivals in honor of the Virgin Mary. Pilgrimages (q. v.) commenced in this period. In ecclesiastical architecture the Romanic style was developed in the tenth century. Among the doctrinal controversies, those on the Lord's Supper (q. v.) were the most important. Morality was generally at a low ebb, and there was no vice which was not prevalent among the clergy and in the monasteries, and immorality passed over from them to the people.

IV. *From Gregory* VII *to the Reformation* (1073-1517).—The oppression of Christianity by the Turks called forth the crusades against the Saracens (1096-1246), in order to deliver the Holy Land. See CRUSADES. Palestine was conquered and held for a short time, and several orders of Christian knights were established there for the protection of Christianity; but towards the close of the 13th century it was reconquered by the Saracens, by whom Christianity was barely tolerated. The oppression suffered by the Greek Church led to an attempt at a new union with the Roman, which, however, was soon given up as impracticable. The power of the popes reached its climax under Gregory VII and Innocent III, but it soon began again to decline, especially through the papal schism (1378-1414), during which two papal sees existed—Rome and Avignon. The popes secured the right of the investiture of the bishops and abbots, and the exemption of the clergy, and enforced throughout the Church the celibacy (q. v.) of the clergy. The Bible was less and less appealed to as the rule of faith; the fathers and tradition took its place. The pope became the sole legislator and judge in matters of faith. New doctrines and practices, such as auricular confession, transubstantiation, and indulgences, together with new festivals (e. g. *Corpus Christi*), were established. The Inquisition and the mendicant orders, especially the Franciscans and Dominicans, crushed out all opposition to the ruling Church. Public worship greatly degenerated. The Mass became its centre; sermons became rare, and consisted mostly either in unintelligible scholastic lectures, or in comic invectives against the follies of the times. The increasing corruption among the clergy, and still more the traffic with indulgences, undermined the piety of the people. Attempts to stop the prevailing abuses were frequently made, both by individuals and by smaller and larger denominations, among which the Albigenses (q. v.), Waldenses (q. v.), and Hussites (q. v.) were prominent. At the request of the Church the secular governments proceeded against these sects, and crusades were preached for their extirpation. Most of them were extirpated; but the *Waldenses* in Italy, the *Moravian Brethren* in Germany, and the *Lollards* in England, survived to see and to share in the great Reformation of the 16th century. In *theological science*, Scholasticism arose, a system full of acute subtleties, but entirely incapable of satisfying the religious wants of the heart. In opposition to the Scholastics (q. v.), many pious Mystics (q. v.) strove to maintain a pure Biblical Christianity, more by ignoring the antiscriptural doctrines of the Church than by openly rejecting them. In ecclesiastical architecture the Byzantine style was supplanted in France, England, Spain, and especially in Germany, by the Germanic or Gothic, which reached the highest stage of development in the 13th and 14th centuries.
